PROCEEDINGS AND DEBATES OF THE 99th CONGRESS, FIRST SESSION

HOUSE OF REPRESENTATIVES—*Thursday, May 9, 1985*

The House met at 11 a.m.

The Chaplain, Rev. James David Ford, D.D., offered the following prayer:

We pray, O God, that with the tumult and distractions of each day, You will grant inner peace which is Your gift to us. We pray for serenity of mind in spite of the tensions, we pray for quiet moments to hear Your spirit, even when noise seems to overwhelm. Speak to us, O God, in the depths of our hearts, heal and refresh us with Your peace that possesses all human understanding. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

Mr. STRANG. Mr. Speaker, pursuant to clause 1, rule I, I demand a vote on agreeing to the Speaker's approval of the Journal.

The SPEAKER. The question is on the Chair's approval of the Journal.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. STRANG. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 250, nays 162, answered "present" 2, not voting 20, as follows:

So the Journal was approved.

The result of the vote was announced as above recorded.

APPOINTMENT AS MEMBERS OF ADVISORY COMMISSION ON INTERGOVERNMENTAL RELATIONS

The SPEAKER. Pursuant to the provisions of section 3(a), Public Law 86-380, the Chair appoints as members of the Advisory Commission on Intergovernmental Relations the following members on the part of the House:

Mr. WEISS of New York;

Mr. LEVIN of Michigan; and

Mr. WALKER of Pennsylvania.

APPOINTMENT AS MEMBERS OF FRANKLIN DELANO ROOSEVELT MEMORIAL COMMISSION

The SPEAKER. Pursuant to the provisions of section 1, Public Law 94-371, as amended, the Chair appoints as Members of the Franklin Delano Roosevelt Memorial Commission the following Members on the part of the House:

Mr. PEPPER of Florida;

Mr. SCHEUER of New York;

Mr. FISH of New York; and

Mr. GREEN of New York.

PERMISSION FOR COMMITTEE ON THE JUDICIARY TO SIT TODAY DURING 5-MINUTE RULE

Mr. MORRISON of Connecticut. Mr. Speaker, I ask unanimous consent that the Committee on the Judiciary be permitted to sit while the House is reading for amendment under the 5-minute rule today, May 9, 1985.

The SPEAKER. Is there objection to the request of the gentleman from Connecticut?

Mr. PASHAYAN. Mr. Speaker, reserving the right to object, I should like an explanation, please, of what the request is all about.

Mr. MORRISON of Connecticut. Mr. Speaker, if the gentleman will yield, this is merely a request that the committee be permitted to sit during the 5-minute rule, and it has been cleared with the ranking member on your side, the gentleman from New York [Mr. FISH], who is on the floor.

Mr. PASHAYAN. What bills does the gentleman have in mind?

Mr. MORRISON of Connecticut. This is for the consideration of H.R. 2348, the Department of Justice authorization for appropriations act for 1986, and H.R. 1452, the Refugee Assistance Extension Act of 1985.

Mr. PASHAYAN. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from Connecticut?

There was no objection.

NATIONAL SCIENCE WEEK

Mr. GARCIA. Mr. Speaker, I ask unanimous consent that the Committee on Post Office and Civil Service be discharged from further consideration of the Senate joint resolution (S.J. Res. 59) to designate "National Science Week," and ask for its immediate consideration.

The Clerk read the title of the Senate joint resolution.

The SPEAKER. Is there objection to the request of the gentleman from New York?

Mr. PASHAYAN. Mr. Speaker, reserving the right to object, this side of the aisle has no objections. We support the measure.

Mr. FUQUA. Mr. Speaker, will the gentleman yield?

Mr. PASHAYAN. I yield to the gentleman from Florida.

Mr. FUQUA. Mr. Speaker, I would like to thank the gentleman. This is a very fine resolution, honoring science next week, and I urge its consideration. I appreciate the cooperation of the members of the committee.

Mr. TRAXLER. Mr. Speaker, will the gentleman yield?

Mr. PASHAYAN. I yield to the gentleman from Michigan.

Mr. TRAXLER. Mr. Speaker, I thank the gentleman for yielding to me, and I congratulate the committee for reporting this fine resolution.

Mr. PASHAYAN. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

The Clerk read the Senate joint resolution, as follows:

S.J. Res. 59

Whereas science and technology are currently major elements in the expansion of the economy and in the improvement of the quality of life in the United States;

Whereas the rate of scientific discovery and technological innovation continues to increase more rapidly than at any time in our history;

Whereas it is vital to build and maintain a highly dedicated and motivated work force with scientific and technological skills;

Whereas it is important that scientific research be made more interesting and accessible to youth as a potential career option;

Whereas it is in the national interest to increase the public's awareness and understanding of science and technology; and

Whereas schools, universities, museums, and professional, educational, and voluntary organizations, along with industry, labor, government, and private individuals, should be encouraged to work cooperatively to develop programs, events, and materials that will contribute to the public's education in science and technology: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the week of May 12 through May 18, 1985, is designated as "National Science Week". The President is requested to issue a proclamation calling upon the people of the United States to observe such week with appropriate ceremonies and activities, including programs aimed at furthering the awareness of all Americans, and particularly the Nation's youth, of the importance of science and technology.

The Senate joint resolution was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. GARCIA. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on Senate Joint Resolution 59, the Senate joint resolution just passed.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

CENTRAL AMERICA: A DOSE OF REALITY

(Mr. GONZALEZ asked and was given permission to address the House for 1 minute.)

Mr. GONZALEZ. Mr. Speaker, I wish to continue my discussion of the violations by the United States of the Treaty of the Organization of American States.

Some of us have learned through the ages that there is strength in numbers, and that by working together combining resources and negotiating viewpoints we may pursue a thoughtful and united policy. We forgot this lesson within our country when we tried to fight a war in Vietnam without the combined support of the Congress and the people of America as well as with the leadership of the President. And we are forgetting this lesson as well as we pursue a fragmented and undirected policy in Central America.

The administration has made commitments and taken action without the support of the Congress and the American people. Tragically, the administration has also failed to remember that there is strength in numbers not only within our country but within our world. The President has unilaterally intervened in the affairs of Central America without working together with countries who have pledged mutual support in peaceful endeavors. The Rio Treaty pledges mutual cooperation and mutual decisionmaking in security matters of the signatory countries.

The President is not working with the other countries; in truth, he is working against them, because his

intervention in Central America is not a peaceful intervention which the other member countries of the OAS can support. The Rio Treaty condemns war—it doesn't endorse war like the war our President is conducting. The signatory countries to the Rio Treaty agree not to attack each other with armed force, and yet that is exactly what this President is doing against the country of Nicaragua.

When is this President going to learn? If the United States does not work with the OAS countries, it works against them. If the United States does not seek the support of the other OAS countries in peaceful activities, then the United States has turned against these same countries in making war on any one of them, such as Nicaragua. And by making war on any one of the OAS countries, according to the Rio Treaty which the United States signed, the President is making war on all of the OAS countries. He has not learned the lesson of Vietnam; and he has forgotten the wisdom of the concept of mutual support and collective security, which was the whole purpose of the Rio Treaty, and the sole purpose for the existence of the OAS.

ADMINISTRATION'S ECONOMIC SANCTIONS POLICY AGAINST NICARAGUA BASED ON NATURAL SECURITY

(Mr. LAGOMARSINO asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LAGOMARSINO. Mr. Speaker, in a hearing Tuesday, May 7, before the Joint Subcommittees on International Economic Policy and Trade and Western Hemisphere Affairs, critics of the administration decision to impose economic sanctions against Nicaragua complained that U.S. allies do not support that policy decision.

Administration officials rightly responded that the United States makes its policy choices based on what is in its national security interests and not on a popularity poll. And whether there are nations who speak out in opposition to our having imposed sanctions on Nicaragua or are those who privately support our actions, there are some nations who do have the courage of their convictions to stand up and express their support and back U.S. policy against Nicaragua.

One of the most important examples is Honduras, which is the country which faces one of the greatest threats from Nicaragua. Honduran foreign minister Edgardo Paz Barnica, in a press conference, said he welcomed the U.S. embargo against Nicaragua, but added that if it fails, the next step will have to include military measures. Foreign Minister Paz said that if diplomatic and economic pressures fail, then the only other alternative will be to use force.

CONGRESS SHOULD DECLARE WAR ON DRUG SMUGGLERS

(Mr. TRAFICANT asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. TRAFICANT. Mr. Speaker, in today's newspapers there were two headlines that might be interesting. The first one, "Two Tons of Cocaine Seized in Miami," the second one, "The Coast Guard, Florida Officers, Grab 3 Tons of Drugs."

When is Congress going to take the stand and declare war on these large drug smugglers?

My bill, introduced 6 weeks ago, H.R. 994, will do just that. First of all, it will eliminate bond for large drug smugglers who bring in excess of 1 kilogram of narcotics into this country.

Second of all, if convicted, they must serve 50 percent of that sentence.

Finally, what many Members are backing off of, a second offender of this type would be subject, with an option, to the death penalty.

I think, before long, Congress is going to have to make a decision, or we are going to have this type of problem every day in the newspaper, and more and more of our children and the lives of our children will be threatened by this problem.

Congress must declare war on drug smugglers.

I would appreciate it if the Members would look at H.R. 994.

WORKER RETRAINING

(Mr. CLINGER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. CLINGER. Mr. Speaker, Preston Martin, the Vice Chairman of the Federal Reserve Board, was quoted as saying that America was on the verge of a "growth recession." In a growth recession, the economy grows, but not enough to prevent a rise in unemployment. This comes on the heels of news from the Commerce Department that our economy has become sluggish and our slower growth rate may prevent us from reaching the administration's goal of reducing unemployment.

Mr. Speaker, while we all hope that these predictions are wrong, let's not wait until the unemployment rate grows worse. Let's not ignore the changes which are occurring within our economy and the world's economy. It is time to retrain American workers to keep step with changes and address the new competitive challenges faced by U.S. business and industry.

It is in this spirit that I and a bipartisan group of 42 of our House colleagues have cosponsored the national Training Incentives Act of 1985. This bill would increase American competitiveness by encouraging additional training of our work force. It permits employers to take a 25-percent tax credit for training expenses over a 5-year historical average. It allows individuals with IRA's to withdraw their savings without penalty or taxation to pay for retraining. And it provides that the participation of unemployed workers in a training program will not disqualify them from unemployment compensation.

Mr. Speaker, it's time to take aggressive and appropriate steps to help American workers respond to global challenges. It's also time for Congress to be ahead of the curve of change, rather than behind it. I would invite my colleagues to cosponsor this important retraining proposal.

JTPA DOES MAKE A DIFFERENCE

(Mr. LEVIN of Michigan asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LEVIN of Michigan. Mr. Speaker, I recently received two letters regarding the Job Training Partnership Act [JTPA] that I want to bring to my colleagues' attention. They both demonstrate the importance for this House to reject the administration's request for a 25-percent cut for JTPA next year.

The first letter was from the Wayne County Private Industry Council [PIC]. In an area with double digit unemployment, the Wayne PIC has put together a program to train dislocated and disadvantaged workers for 1,000 newly created jobs in the airline industry. In addition to putting people back to work, this program will help to diversify Wayne's economy away from its traditional dependence on the highly cyclical automobile industry. This program represents some of the best of what JTPA can accomplish—Government and business working together to the advantage of both.

The second letter was from Mr. John Ong, the chairman of the B.F. Goodrich Co. in his capacity as Chair of the National Alliance of Business [NAB]. In his letter, Mr. Ong notes "the powerful impact of the public/private partnership in job training for the disadvantaged which is embodied in the act." After stating that "Federal funding for job training has already been reduced substantially from almost $10 billion in 1981 to the current $3.6 billion," he urges the Congress to reject the administration's proposed recissions and to maintain the current funding levels for next year.

Mr. Speaker, I believe these endorsements of JTPA pointedly show that

the answer to joblessness is not to slash funding, but to support programs that are clearly putting people back to work.

FREEZE EVERYTHING

(Mr. PORTER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PORTER. Mr. Speaker, we in this Congress owe it to our children and grandchildren to find a bipartisan solution to this plaque of deficits.

The best first step is plain to see. A total freeze, on every budget category. A freeze on Republican priorities. A freeze on Democratic priorities. On defense. On Social Security COLA's. On everything else, too. Almost everyone will accept this for their program, if everyone else is treated the same.

I hear support for a freeze every day, from defenders, of all kinds of spending programs. Listen to what the American Medical Association recently said. The AMA wants to unfreeze and increase physicians' and hospitals' Medicare fees, unless—

The Congress legislates an across-the-board freeze of domestic and defense spending as part of a broad program to reduce the federal deficit and bring stability to the economy.

We have two choices, as I see it. We can debate priorities, end up in a stalemate, and watch the deficits mount. Or we can agree on a freeze.

SPINOFFS

(Mr. NELSON of Florida asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. NELSON of Florida. Mr. Speaker, each year NASA publishes its book on "Spinoffs" from space technology. Such items as robotic systems, high temperature lubricants, protective coatings, medical scanning equipment, tough new ceramic surfaces, even ingestible toothpaste are contributions from the space program to society.

There is a small Florida-based company that was founded in 1979—Microgravity Research Associates—which expects its first product to be crystals of gallium and arsenic made in space on the shuttle. Gallium-arsenide crystals, which conduct electron crystals 10 times faster than silicon, can be used in computer chips, lasers, switching devices in fiber-optic systems, high frequency antennas, solar power arrays, and other wonders necessary for the high tech world.

Because of the great market potential of these gallium-arsenide crystals in the next generation of computers and in solar-cell technology, other companies, such as the giant 3M Corp. are also joining in the research.

If we are to make progress on reducing the deficit through economic growth, we need real growth, the kind of growth that can be enabled by gallium-arsenide technology, which lets us do more with less.

This is another example of the kind of benefit that we get from our space program and demonstrates why we need to continue a vigorous civilian program.

WIC FUNDING

(Mr. KOLBE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. KOLBE. Mr. Speaker, I am today introducing a resolution stating that it is the sense of Congress that the Office of Management and Budget release funds appropriated by Congress for the Women, Infants, and Children Program.

Fiscal year 1985 funding for the WIC Program was contained in a continuing resolution, that was passed at the end of the last session of Congress. It was clear that Congress intended that the total amount appropriated in Public Law 98-473 be spent. The continuing resolution stated that the total amount: "be appropriated to the States based on an annual appropriation level of $1.5 billion."

The OMB has chosen to interpret the language of Public Law 98-473 to mean that they need only maintain the WIC caseload that existed in September 1984. Consequently, they intend to spend only $169 million of the $245 million appropriated for August and September of this year. Because the State WIC programs were not, in some cases, officially notified of this decision until early April, and had previously operated under the assumption that the full funding would be available, approximately 237,000 women in at least 30 States must be cut from WIC roles in the fourth quarter of the fiscal year. My resolution restates the sense of Congress that the executive branch should release the remaining funds appropriated by Congress. Because of the urgency and the gravity of the situation, I urge my colleagues to join as cosponsors.

□ 1140

BORDER SHOOTING INCIDENT

(Mr. BATES asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BATES. Mr. Speaker, on April 18, a tragic incident occurred. Humberto Carillo Estrada, a 12-year-old Mexican boy, was shot and wounded by a U.S. Border Patrol Agent. Humberto was standing on the Mexican side of the border and reportedly throwing rocks at agents who were trying to apprehend his 15 year-old brother. Humberto's brother was attempting to return to Mexico.

The U.S. attorney's office in San Diego determined that it had no statutory authority to review this case.

While only a full and accurate accounting of the situation can determine if the Border Patrol Agent's actions were justified or not, it would be a travesty if improper conduct did occur and no Federal action was taken.

This is clearly a Federal matter that should be handled by the Federal Government.

Mr. Speaker, I am introducing legislation today that would establish a Federal criminal statute that would ensure the prosecution of Federal law enforcement officers who committed an unjustified injury. I urge my colleagues to join me in this important endeavor.

CIVIL RIGHTS "YES", H.R. 700, "NO"

(Mr. ARMEY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ARMEY. Mr. Speaker, in Tuesday's Dallas Times Herald, James Kilpatrick, a respected columnist, wrote about H.R. 700. I want to share this wisdom with my colleagues.

I quote, "Very soon now, the House of Representatives will take up the most dangerous bill of the Year. The bill is marvelously named "Civil Rights Restoration Act of 1985."

If the principle of federalism still has meaning, if separation is to be maintained between the public and private sectors of American life, if the heavy hand of Federal regulation is not to be laid upon the whole of our society, members of Congress had better vote against this devious and deceptive little sleeper.

[The bill] is cosmetically disguised with fresh lipstick and an innocent wig. It wears this darling new title. . . . The many sponsors do not acknowledge—perhaps they do not even know—the drastic reach of the bill to which they have given their names.

The bill is not a bill to restore anybody's civil rights, for no civil rights were taken away by the Grove City case. It is a bill to expand Federal power into every aspect of our public and private life.

Mr. Speaker, civil rights "yes", H.R. 700 "No."

WHAT "MILITARY MIGHT" REALLY MEANS TO MR. GORBACHEV

(Mr. McMILLAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. McMILLAN. Mr. Speaker, on the news this morning, we watched a commentator report on the activities of the world's two most powerful leaders as they celebrated V-E Day.

President Reagan was traveling in Europe promoting peace. General Secretary Gorbachev was attending a Soviet parade in Red Square where hundreds of tanks and nuclear missiles were driven by.

President Reagan spoke of eliminating the nuclear arsenals of the world. Gorbachev saluted his country's war equipment.

I wonder what would happen around the world if we here in the United States held a ticker tape parade in New York City and displayed U.S. tanks and missiles? Would our citizens smile or frown? Our press would call it sabre-rattling. Of course, we will never know what the Soviet citizens really are thinking—or their press, for that matter.

The commentator noted that the Soviets said this event was not a show of military might. God forbid that we should ever find out what "military might" really means to Mr. Gorbachev.

HOUSE SHOULD RECONSIDER GIVING AID TO THE CONTRAS

(Mr. GROTBERG asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GROTBERG. Mr. Speaker, I rise in the hope of persuading my colleagues to reverse the dreadful decision we made 2 weeks ago not to aid the Nicaraguan Contras.

Every Member of this body should be embarrassed that immediately after we voted down humanitarian aid to the Contras, Mr. Ortega visited his comrades in Moscow and the Sandinistas began a major offensive against the Contras. There can be no doubt that there is a direct correlation between our failure to act and Mr. Ortega's actions.

We must continue to put pressure on the Sandinistas to moderate their hardline Marxist-Leninist policies and to sit down and negotiate with the Contras. Peace will only come to Nicaragua when truly free elections have been held.

Mr. Speaker, we must act swiftly to reverse our fateful decision of 2 weeks ago. As Winston Churchill said, "The signals flash through the night in vain, for death is in charge of the clattering train." I believe that the actions of the Sandinistas over the last 2 weeks are signals that we must not ignore.

THE AMERICAN MERCHANT MARINE IS AN ENDANGERED INDUSTRY

(Mrs. BENTLEY asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. BENTLEY. Mr. Speaker, the American merchant marine is an endangered industry today primarily at the hands of agricultural interests which represent the most heavily subsidized U.S.A. industry in the past half century.

The cargo preference law, which several of my colleagues would have repealed or severely reduced in scope, generated in 1983 approximately 37 percent of the total tonnage carried by the U.S. merchant marine and provided it with more than a half billion in revenues. This same law impacted in the AID and Public Law 480 Programs only 2.9 million tons of agricultural exports which were carried by the U.S. merchant marine. This tonnage represents less than 2 percent of the 145 million tons of U.S. agricultural commodities which were exported in 1983.

Yes; the merchant marine is clearly an endangered industry. There are few, if any, industries that could survive with an immediate loss of 37 percent of their revenue environment. Elimination or serious reduction of this law to the artificially generated exports, for which we the Congress have provided the funding, will be a death blow to this industry. Then, we will have only ourselves to thank for being held hostage by foreign nations' vessels.

THINGS HAVE NOT CHANGED A HECK OF A LOT, HAVE THEY?

(Mr. BURTON of Indiana asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BURTON of Indiana. Mr. Speaker, yesterday House Republican Leader BOB MICHEL and the Republican leadership of this House introduced a series of House reform amendments, changes to the House rules. It brought to mind something that happened about 11 years ago in this body.

In the Bloomington, IN, press they reported a caucus that the Democrats had on May 9, 1974; exactly 11 years ago today. During that meeting, that Democrat caucus, there was a great deal of controversy over changes in the House rules. Some of the people thought the rules ought to be changed; they were outdated, archaic, and unfair, as we do today.

After the caucus took place, after the brutal fight subsided, the rules remained the same as they are today. Perhaps Speaker TIP O'NEILL of Massachusetts, who was majority leader at the time, best explained why the caucus voted the way that they did. He said, and I quote:

> The name of the game is power, and the boys don't want to give it up.

Things have not changed a heck of a lot, have they? But it is time they did, Mr. Speaker; it is time they did.

FEDERAL RESERVE SHOULD REGULATE GOVERNMENT SECURITIES DEALERS

(Mr. McCOLLUM asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. McCOLLUM. Mr. Speaker, the newspapers again today report another Government securities dealer in trouble—one of a long series of Government securities dealers who have problems that have been in the press with ESM and so forth over the past few weeks. There is no question we need to have regulation of Government securities dealers.

There is, at the present time, no statutory authority for any agency or any entity that is associated with the Federal Government to actually regulate Government securities dealers. A few weeks ago, I introduced H.R. 1896 which would give that authority to regulate Government securities dealers to the Federal Reserve Board, which I admit is the most logical agency to deal with this problem; to regulate the dealers.

The Government securities market is the largest capital market in the world. On some days they actually sell more than 80 billion dollars' worth of U.S. bills, bonds, and notes just to finance the debt of this country. If we are going to be able to keep the United States alive while we, in this Congress, get responsible about balancing our budget, we have got to be sure that whatever we do we do not disrupt this marketplace. We need to have confidence restored in it; we need to have liquidity in it; we need to have efficiency in it; we need to have all of the various dealers audited regularly, and we need to be sure that whoever does the regulation is the right agency.

The Federal Reserve Bank of New York sells all debt instruments and is the only Government-related agency which has an indepth experience with Government securities dealers and this market.

I submit it is long past time we regulated. The agency that ought to have the regulatory authority is the Federal Reserve Board, and I urge my colleagues to join with me and cosponsor H.R. 1896. Thank you.

□ 1150

RESOLUTION CONDEMNING SANDINISTA OPPRESSION

(Mr. LEWIS of California asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LEWIS of California. Mr. Speaker, there are Members of this House who would suggest that Sandinista President Ortega's trip to the Soviet Union can be directly linked to our ex-

pression of support for the freedom fighters—otherwise known as Contras. These Members would say that we are pushing the Sandinistas into the arms of the Soviets. Others, however, argue that the opposite is, in fact, the case. America played an important part in the Organization of American States' role of forcing the Somoza government to step down. Just weeks later, the Sandinistas were playing footsie with the Soviets while we were flooding Nicaragua with millions and millions of U.S. tax dollars.

Before taking over, the Commandantes were devout Marxists. They promised a democratic government which would protect human rights, ensure freedoms such as elections, and a free press, on the public platform, while they went about establishing a regime more oppressive than Somoza's.

I oppose the practices of this Sandinista government and today am introducing a resolution condemning their oppression as well as condemning President Ortega's recent trip to Moscow.

DEPARTMENT OF STATE, U.S. INFORMATION AGENCY, AND BOARD FOR INTERNATIONAL BROADCASTING AUTHORIZATION ACT, FISCAL YEARS 1986 and 1987

The SPEAKER pro tempore. Pursuant to House Resolution 137 and rule XXIII, the Chair declares the House in the Committee of the Whole House on the State of the Union for the further consideration of the bill, H.R. 2068.

□ 1152

IN THE COMMITTEE OF THE WHOLE

Accordingly, the House resolved itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill (H.R. 2068) to authorize appropriations for fiscal years 1986 and 1987 for the Department of State, the U.S. Information Agency, the Board of International Broadcasting, and for other purposes, with Mr. PEASE in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. When the Committee of the Whole rose on Wednesday, May 8, 1985, title I was open for amendment at any point.

Are there further amendments to title I?

Mr. MICA. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I take this opportunity to bring the Members up to date as to where we are on this legislation.

First, let me remind everyone that we are again considering the State Department authorization legislation, as we have been for some 3 weeks now.

We are in the midst of approximately 25 amendments that have been filed for committee consideration. We have accepted or dealt with about 15 of the 25. It is my understanding that we have all of the amendments before us, and that the order of business today will be to consider those key amendments and then have a final vote on this legislation.

I might say, just as an aside, that as chairman of the subcommittee, I am extremely pleased at the way this legislation has progressed and the professionalism that has characterized the debate. Each of the amendments has been discussed in a way that I think reflects very well on this House and on the committee, and we hope we can maintain this attitude for the balance of the debate.

AMENDMENTS OFFERED BY MR. MC COLLUM

Mr. McCOLLUM. Mr. Chairman, I offer two amendments, and I ask unanimous consent that they be considered en bloc.

The CHAIRMAN. Is there objection to the request of the gentleman from Florida?

There was no objection.

The CHAIRMAN. The Clerk will report the amendments.

The Clerk read as follows:

Amendments offered by Mr. MCCOLLUM: Page 28, after line 25, insert the following new section:

SEC. 128. AUDITS OF US FUNDS RECEIVED BY THE UNITED NATIONS HIGH COMMISSIONER FOR REFUGEES.

The Migration and Refugee Assistance Act of 1962 (22 U.S.C. 2601 et seq.) is amended by adding at the end thereof the following new section:

"SEC. 8. AUDITS OF US FUNDS RECEIVED BY THE UNITED NATIONS HIGH COMMISSIONER FOR REFUGEES.

"(a) Funds may not be made available to the United Nations High Commissioner for Refugees under this or any other Act unless the President of the General Assembly directs and the High Commissioner provides for—

"(1) the United Nations Joint Inspection Unit to conduct quarterly audits of the use of such funds, including audits of the use by private and voluntary organizations of such funds; and

"(2) such audits to be made available for inspection by the Comptroller General of the United States.

"(b) The Comptroller General of the United States shall inspect each such audit and submit a report of that inspection to the Congress.".

Page 28, after line 25, insert the following new section:

SEC. 128. USE OF REFUGEE FUNDS TO ACQUIRE UNITED STATES GOODS.

(a) STUDY.—The Comptroller General of the United States shall conduct a study to determine the origin of goods acquired with funds contributed by the United States to the United Nations High Commissioner for Refugees. In conducting such study, the Comptroller General shall determine—

(1) the criteria the High Commissioner uses in determining what goods to acquire and the origin of those goods;

(2) the percentage of goods of United States-origin which are acquired with funds contributed by the United States; and

(3) why more goods of United States-origin are not acquired with such funds.

(b) REPORT.—Not more than six months after the date of the enactment of this Act, the Comptroller General shall submit to the Congress a preliminary report on the study conducted under subsection (a). As soon as practical after two years after the date of the enactment of this Act, the Comptroller General shall submit a final report to the Congress on the study conducted under subsection (a).

Mr. McCOLLUM (during the reading). Mr. Chairman, I ask unanimous consent that the amendments be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Florida?

There was no objection.

Mr. McCOLLUM. Mr. Chairman, the United Nations and the United States have one thing that we do that is very important and not discussed often in this body. There are thousands of refugees all around the world, in Pakistan, in Southeast Asia, in Africa, in Central America.

Those refugees are driven out of countries for various reasons of war, famine, hunger, whatever. They are then in other countries and are most often in refugee camps. Those camps are supervised by the U.N. High Commissioner on Refugees. The High Commissioner really supervises a lot of voluntary agencies who are granted money under his supervision to perform various necessary social services and to prepare the camps and make sure that they are healthy, and so on and so forth, while the various countries of the world decide, if they are to decide, what to do about those refugees—if they are to return home, or perhaps to be placed, as they are in some cases, in our country or settled in another country.

It is a very important humanitarian function. This bill embodies the authorization for moneys that the United States donates, contributes, gives from time to time to the U.N. High Commissioner on Refugees as our part of that assistance to take care of refugees in the world. In my role as a member of the House Immigration, Refugee, and International Law Subcommittee of the Committee on the Judiciary, I have spent a lot of time involved with the various camps around the world, and I am concerned that there is no easy audit trail of what happens to our moneys or how they are spent in the process.

So the amendments I have offered today are very simple. They simply call upon the U.N. General Assembly President and the High Commissioner to provide for regular quarterly audits of the funds and to provide such audits to the Comptroller General and he report to us about them, and to provide for a study by the Comptroller

General of how these funds are used, that is, the U.S. contribution to the funds.

Are American goods purchased with them? What percentage of all the goods purchased are American goods? Just where does the money go and how does it go, and what else is done in the proceedings of the U.N. High Commissioner in dealing with these funds?

I submit that we need this. It adds no additional cost to this bill, and it would help immensely in a better understanding of what is happening to our funds and how the U.N. High Commissioner conducts his business.

Mr. MICA. Mr. Chairman, will the gentleman yield?

Mr. McCOLLUM. I would be glad to yield to the chairman, the gentleman from Florida.

Mr. MICA. I thank the gentleman for yielding.

Mr. Chairman, I would just like to commend the gentleman for his initiative. I think the audit could provide information for us to make better judgments and evaluation on the use of funds, and the committee, on this side of the aisle, has no problem with the amendments and would accept them.

Mr. McCOLLUM. I thank the gentleman.

Ms. SNOWE. Mr. Chairman, will the gentleman yield?

Mr. McCOLLUM. I would be delighted to yield to the gentlewoman from Maine.

Ms. SNOWE. I thank the gentleman for yielding.

Mr. Chairman, I thank the gentleman for raising these issues and bringing them to our attention. I support the gentleman's amendment and hope that the investigations and the audits will produce the results that we hope for.

Mr. McCOLLUM. I thank the gentlewoman.

The CHAIRMAN. The question is on the amendments offered by the gentleman from Florida [Mr. McCOLLUM].

The amendments were agreed to.

AMENDMENT OFFERED BY MR. BONKER

Mr. BONKER. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. BONKER: Page 28, after line 25, insert the following new section:

SEC. 128. INTELSAT.

(a) POLICY.—The Congress declares that it is the policy of the United States—

(1) as a party to the International Telecommunications Satellite Organization (hereafter in this section referred to as "Intelsat"), to foster and support the global commercial communications satellite system owned and operated by Intelsat;

(2) to make available to consumers a variety of communications satellite services utilizing the space segment facilities of Intelsat and any additional such facilities which are found to be in the national interest and which—

(A) are technically compatible with the use of the radio frequency spectrum and orbital space by the existing or planned Intelsat space segment, and

(B) avoid significant economic harm to the global system of Intelsat; and

(3) to authorize use and operation of any additional space segment facilities only if the obligations of the United States under Article XIV(d) of the Intelsat Agreement have been met.

(b) PRECONDITIONS FOR INTELSAT CONSULTATION.—Before consulting with Intelsat for purposes of coordination of any separate international telecommunications satellite system under Article XIV(d) of the Intelsat Agreement, the Secretary of State shall—

(1) in coordination with the Secretary of Commerce, ensure that any proposed separate international satellite telecommunications system comply with the Executive Branch conditions established pursuant to the Presidential Determination No. 85-2; and

(2) ensure that one or more foreign authorities have authorized the use of such system consistent with such conditions.

(c) AMENDMENTS OF INTELSAT AGREEMENT.—(1) The Secretary of State shall consult with the United States signatory to Intelsat and the Secretary of Commerce regarding the appropriate scope and character of, a modification to Article V(d) of the Intelsat Agreement which would permit Intelsat to establish cost-based rates for individual traffic routes, as exceptional circumstances warrant, paying particular attention to the need for avoiding significant economic harm to the global system of Intelsat as well as United States foreign policy interests.

(2) Pursuant to the consultation under paragraph (1), the United States shall actively support an appropriate modification to Article V(d) of the Intelsat Agreement to accomplish the purpose described in paragraph (1).

(d) CONGRESSIONAL CONSULTATION.—In the event that, after United States consultation with Intelsat for the purposes of coordination under Article XIV(d) of the Intelsat Agreement for the establishment of a separate international telecommunications satellite system, the Assembly of Parties of Intelsat fails to recommend such a separate system, and the President determines to pursue the establishment of a separate system notwithstanding the Assembly's failure to approve such system, the Secretary of State, after consultation with the Secretary of Commerce, shall submit to the Congress a detailed report which shall set forth—

(1) the foreign policy reasons for the President's determination, and

(2) a plan for minimizing any negative effects of the President's action on Intelsat and on United States foreign policy interests.

(e) NOTIFICATION TO FEDERAL COMMUNICATIONS COMMISSION.—In the event the Secretary of State submits a report under subsection (d), the Secretary, 60 calendar days after the receipt by the Congress of such report, shall notify the Federal Communications Commission as to whether the United States obligations under Article XIV(d) of the Intelsat Agreement have been met.

(f) IMPLEMENTATION.—In implementing the provisions of this section, the Secretary of State shall act in accordance with Executive Order 12046.

(g) DEFINITION.—For the purposes of this section, the term "separate international telecommunications satellite system" or "separate system" means a system of one or more telecommunications satellites separate from the Intelsat space segment which is established to provide international telecommunications services between points within the United States and points outside the United States, except that such term shall not include any satellite or system of satellites established—

(1) primarily for domestic telecommunications purposes and which incidentally provides services on an ancillary basis to points outside the jurisdiction of the United States but within the western hemisphere, or

(2) solely for unique governmental purposes.

Mr. BONKER (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Washington?

Mr. BROYHILL. Mr. Chairman, reserving the right to object, I do so only for the purpose of asking the gentleman which amendment he is offering. I have two in my hand.

Mr. BONKER. If the gentleman will yield, I would respond by saying that the amendment is essentially the Broyhill amendment, with these two changes that will be explained in the course of my presentation.

Mr. BROYHILL. I thank the gentleman.

Mr. Chairman, I withdraw my reservation of objection.

The CHAIRMAN. Is there objection to the request of the gentleman from Washington?

There was no objection.

Mr. BONKER. Mr. Chairman, this amendment is intended simply to assure that any U.S. decision to authorize separate satellite communications systems is fully and properly coordinated with Intelsat, the international consortium of 109 nations which provides the international segment for public satellite communications around the globe. The amendment would also assure that certain key issues regarding Intelsat's authority to compete with separate private systems are confronted before those new systems are finally approved by the United States, and that the limitations on new systems set forth recently by the President are fully adhered to.

This amendment, Mr. Chairman, has been worked out in close consultation with the chairman of the Energy and Commerce Committee and others. It deals only with aspects of this complex process of international communications which are directly within the jurisdiction of the Committee on Foreign Affairs; namely, the steps to be taken by the Secretary of State in consulting and coordinating with the parties to the Intelsat Agreement, of which the United States is one.

In conjunction with the Subcommittee on International Operations

chaired by the gentleman from Florida [Mr. MICA], the Subcommittee on International Economic Policy and Trade which I chair, has held several hearings on the foreign policy implications of creating new satellite communications systems which would compete with Intelsat. Substantial concern was expressed at those hearings that the economic strength and viability of Intelsat be fully protected and assured. The United States was the guiding light behind the creation of Intelsat. The idea was to bind the whole world together—rich and poor nations alike—in a single global public telecommunications network.

That system has been an unqualified success. Intelsat's 15 telecommunications satellites today serve 173 countries, territories, and possessions. In contrast, the Soviet Union's competing Intersputnik system serves only a few countries outside the Soviet bloc itself.

This achievement would be in jeopardy, however, if new private satellite systems divert substantial Intelsat traffic from the most lucrative transatlantic routes.

Mr. Chairman, the President, the Secretary of State, and the Secretary of Commerce, in authorizing the Federal Communications Commission to consider applications for separate satellite systems, have already established two conditions that would help assure that such systems do not destroy Intelsat's economic viability. First, any separate system should provide only customized services—that is communications which are not interconnected with the public-switch network. Second, the United States and foreign governmental authorities which may authorize use of such a separate system should consult with Intelsat so as to ensure technical compatibility and prevent significant economic harm to Intelsat, which the United States is obligated to do.

My amendment, Mr. Chairman, endorses those conditions, and directs the Secretary of State to adhere strictly to them in international consultations prior to any final authorization by the United States of such a private satellite communications system.

In addition, however, my amendment would assure that the question of whether Intelsat has the ability to compete with separate satellite systems on a route-by-route basis be taken up by the Intelsat Assembly of Parties prior to any final U.S. action authorizing separate systems, and that the United States would actively support an effort to modify article 5(d) of the Intelsat Agreement to permit Intelsat to establish competitive, cost-based rates for individual traffic routes. That is a crucial condition because the economic impact of separate systems on Intelsat cannot be fully known until the question of route-by-route pricing flexibility is resolved. Prospective competitors deserve and need to know whether flexible route-by-route pricing is available to Intelsat before making the huge capital investments that separate systems involve. By the same token, Congress and the executive branch cannot fully judge the economic impact upon Intelsat of competitive systems without a clearer indication of Intelsat's ability and readiness to compete on a route-by-route basis.

Which brings me to a further feature of my amendment, Mr. Chairman. The amendment provides for a 60-day period after consultation is complete within Intelsat and prior to any final authorization of a competitive system for Congress to review the situation. The Secretary of State is required to report the results of the consultations to the Congress, and no final action can be taken by any executive agency or official until 60 days have elapsed. The importance of Intelsat to our foreign policy and national security is such that Congress should have a final opportunity to assess the situation. Particularly from a foreign policy point of view, the implications of going forward with separate systems cannot be fully understood until the required Intelsat consultation process is completed.

Mr. Chairman, this is a workable amendment. It does not preclude final approval of competitive systems. It does not significantly delay a final decision. The consultative process that is outlined in the amendment is one that we are already obligated to engage in as a signatory to the Intelsat Agreement. What the amendment does is make sure that those obligations are fulfilled, and that all factors bearing upon Intelsat's ability to compete, and therefore its economic viability, are resolved. We are committed to give priority to the continued economic viability of Intelsat, and this amendment simply assures that we fulfill that obligation.

Mr. Chairman, we have attempted to negotiate with other principals in order to reach agreement on this amendment. My amendment has Congress presupposing the need for a change in the Intelsat agreement to allow for flexible pricing on a route-by-route basis. Congress is not prejudging the outcome of the matter of Intelsat. That decision belongs to the assembly of parties.

I might conclude by saying that this amendment is needed for the reasons that Secretary of Commerce, Malcolm Baldrige, cogently stated in his October 30, 1984, letter to Secretary Shultz, and I quote:

Intelsat should have pricing flexibility when confronted by actual or potential competition as long as the prices it charges covers its costs.

Mr. Chairman, I ask for adoption of the amendment.

□ 1200

The CHAIRMAN. The time of the gentleman from Washington [Mr. BONKER] has expired.

(On request of Mr. NELSON of Florida, and by unanimous consent, Mr. BONKER was allowed to proceed for 5 additional minutes.)

Mr. NELSON of Florida. Mr. Chairman, will the gentleman yield?

Mr. BONKER. I yield to the distinguished gentleman from Florida.

Mr. NELSON of Florida. Mr. Chairman, I thank my friend for yielding.

As the Member having the privilege to Chair the Subcommittee on Space Science and Applications, I want to lend my support to the amendment offered by the gentleman from Washington [Mr. BONKER].

Our Nation has a longstanding commitment to Intelsat and support of a single global satellite system.

The industry framework which the Congress established 20 years ago to provide international communications has served the world well.

A duplication of Intelsat facilities may jeopardize U.S. relations with the 107 other member nations of Intelsat and U.S. relations with developing countries which rely on one of the most advanced communications network in history.

Consideration must be given to the ramifications of any alterations to our international communications policies. A change could have a negative impact on U.S. foreign relations as well as create complex problems in the delicate network of relationships that make up the international communications marketplace.

The Intelsat agreements require member nations to coordinate with Intelsat before building or using any system that could have an adverse economic or technical impact on the system.

This amendment calls for responsible review and coordination between the State Department and Intelsat of any U.S. decision to authorize independent telecommunications companies.

Mr. BONKER. Mr. Chairman, I thank my friend, the gentleman from Florida.

Mr. MICA. Mr. Chairman, will the gentleman yield?

Mr. BONKER. I yield to the distinguished chairman of the subcommittee.

Mr. MICA. Mr. Chairman, I would like to take a moment to speak in favor of the Bonker amendment. I also would like to ask the gentleman to correct me if my comments are inaccurate, because I have tried to look through the gentleman's amendment and see for myself what it does and does not do. If I have an incorrect assessment, please let me know.

The Bonker amendment, as I see it, does not alter the regulatory process in any way. The applicant is still required to meet the same conditions and go through the same process. It does not create any new delays. The Bonker amendment does not add any roadblocks in the processing of FCC applications.

The Bonker amendment does not alter the conditions—and I think this is important—of the Presidential determination No. 85-2 on this subject. In fact, the Bonker amendment reaffirms the Presidential determination. The Bonker amendment, as I understand it, in no way undermines U.S. sovereignty.

I might add that the Bonker amendment does reaffirm the U.S. commitment to Intelsat, as expressed in the administration's proposal.

I might just say at this point that, as we cochaired these hearings in our subcommittees, I said on numerous occasions that I support separate systems and would like to see competition take place, but also feel that we should protect Intelsat. This is what this effort is all about. In fact, for the first time, as I read the Bonker amendment, separate systems are legitimatized in legislation. These are just a few of the things that I think Members need to know.

Mr. Chairman, I do support the Bonker amendment. I must commend the gentleman for doing everything possible to try to work out an agreement, and I hope we can have an agreement on this amendment.

Mr. BONKER. Mr. Chairman, I thank the gentleman for his kind comments and his support, and I would note that he is one of the most knowledgeable members on this subject in our respective subcommittees, having conducted a series of hearings on this issue. In light of those hearings, I think the amendment is timely.

Ms. SNOWE. Mr. Chairman, will the gentleman yield?

Mr. BONKER. I am happy to yield to the gentlewoman from Maine, who is the ranking member of the subcommittee.

Ms. SNOWE. Mr. Chairman, I thank the gentleman for yielding, and I would like to congratulate the gentleman for offering this amendment here today and for bringing this issue to our attention.

I do believe this issue has far-reaching implications. Having joined the gentleman in a number of hearings concerning the ramifications of opening up separate systems to Intelsat, I think our efforts were worthwhile and are deserving of consideration here in the House of Representatives.

I would say to the gentleman that there is a fundamental question here today. It is not a question of opening up competition to Intelsat. The question is, do we intend to maintain our commitment?

The CHAIRMAN. The time of the gentleman from Washington [Mr. BONKER] has expired.

(On request of Ms. SNOWE, and by unanimous consent, Mr. BONKER was allowed to proceed for 5 additional minutes.)

Ms. SNOWE. Mr. Chairman, if the gentleman will yield further, the fundamental issue here today is whether or not we are willing to maintain that commitment and preserve the integrity and the economic soundness of Intelsat as a system. We as a country created Intelsat some 22 years ago as part of a consortium of 109 nations.

Are we now willing to reverse that commitment and that investment, as well as the foreign-policy position that we have, because Intelsat provides communications services to all parts of the world? And what obligation will there be to the new business interests, for example, the new competitors to Intelsat, to fulfill that obligation?

What we are saying is that we support competition, but we want to insure that the President's criteria are met before the competition is allowed to Intelsat.

□ 1210

I stress that, because it is the President's criteria. It is not the criteria of the gentleman from Washington. The President of the United States set this down and put it forth in a determination, so that is all we are recommending here today.

I would suggest that the burden of proof is on those who think that if the benefits are so great that it is worth presenting the risk that it does to Intelsat. The Intelsat system has worked well in the last 22 years. I consider it analogous to the divestiture of AT&T. Are we better off today than we were prior to that divestiture?

It is an analogous situation because many parts of the world are provided communications services because of Intelsat and if we allow unabated competition to the Intelsat system, I am afraid that it threatens the eventual existence of that system as exists today.

So I support the gentleman's amendment. I think this issue needed to be addressed here in the House of Representatives because of the applications that are now pending.

I support competition, but I think it ought to be competition that does not duplicate the services that are now provided by the Intelsat system. That is all we are asking for here today.

So I would hope the Members of the House would support this approach, because the gentleman offers a very reasonable approach and he is only setting into legislative form the criteria of the President of the United States.

So I thank the gentleman.

Mr. BONKER. Mr. Chairman, I think the gentlewoman has stated the case extremely well and I welcome the gentlewoman's support.

Mr. BROYHILL. Mr. Chairman, will the gentleman yield?

Mr. BONKER. I would be happy to yield to the distinguished ranking member of the Energy and Commerce Committee.

Mr. BROYHILL. Mr. Chairman, I thank the gentleman for yielding.

I understand that the gentleman's amendment follows to a great extent the language that I have submitted to the gentleman and I certainly appreciate the gentleman including that language in this amendment; however, I do understand that there may be one or two changes in the language that I had submitted to the gentleman. I wondered if the gentleman could point out those differences or those areas where there have been changes. I think I found two areas, but I want to make sure that there are not others. One is on page 2 in the gentleman's amendment, page 2, subsection (c). The gentleman has left out the words "need for." Is that correct?

Mr. BONKER. The gentleman is correct and it is not an oversight.

Mr. BROYHILL. Would the gentleman explain the reason that he would leave out the words "need for"? It would seem to me that the Secretary in consulting with the U.S. signatories to Comsat and also consulting with the Secretary of Commerce should have the flexibility to discuss the need for any modifications to the Intelsat agreement that would permit any changes in the rates. That it seems to me goes to the heart of the arguments that I have been making, that what we are doing here is tying the hands of our administration, of our Secretary of State and that we ought to give them some flexibility to deal with these issues and not tie their hands in legislative language of this kind.

Mr. BONKER. Well for the benefit of those who do not have the draft in front of them, I shall read just a few lines involved:

> The Secretary of State shall consult with the United States signatory to Intelsat—that is COMSAT—and the Secretary of Commerce regarding the appropriate scope and character of, a modification to article V(d).

The language of the gentleman from North Carolina [Mr. BROYHILL] included the words "need for," so it read: "the Secretary of Commerce regarding the need for."

That is a critical phrase.

My position presupposes that Congress wants to see a change in article V(d) to allow for price flexibility on a route-by-route basis. It makes the language consistent with the next para-

graph, which says, "The United States shall actively support" such a position.

I might add that the Secretary of Commerce in his letter dated November 30, 1984, to the Secretary of State has already asserted such a position on this question of flexible prices. In that letter, Secretary Baldrige said: "Intelsat should have pricing flexibility when confronted with actual or potential competition as long as the prices it charges cover its costs."

Mr. BROYHILL. Well, if the gentleman will continue to yield, and I appreciate his patience in this and also the fact that we have been able to negotiate it to this extent, that we are only debating over some few words, but they are critical words.

It seems to me that what the amendment of the gentleman would do with these changes would tie the hands of the administration.

The CHAIRMAN. The time of the gentleman from Washington has again expired.

(At the request of Mr. BROYHILL, and by unanimous consent, Mr. BONKER was allowed to proceed for an additional 5 minutes.)

Mr. BROYHILL. Mr. Chairman, if the gentleman will continue to yield, it is an issue that needs to be resolved and that is the changing of the rate structure in Intelsat, but it may be that in the future as events occur that there is no need to change the rate structure. It may be that there would be no loss of traffic. There would be no loss of communication traffic, and for the United States to jump in and to be forced by this legislation to support this amendment is going to do damage to our foreign policy interests.

As the gentleman from Florida so correctly said, and both gentlemen from Florida I think said that, we do need to be concerned about our foreign policy interests; but it could be that this may have the opposite effect that the gentleman intends here, that there may be no loss of traffic and there is no need for this, and yet we have tied the hands of our Secretary of State and thus by their actions they will be alienating many people who we should be trying to seek friendship with.

Would the gentleman respond to that argument?

Mr. BONKER. Well, the gentleman, I think, makes a valid point and as the gentleman knows, we have attempted to work out an accord on this matter, but my amendment by striking "need for" does not mandate the administration to propose to Intelsat that such a modification of article V(d) take place.

Indeed, I have made a major concession by dropping the next clause which would have mandated the administration to raise this issue. That is where we have accepted the gentleman's language on "actively supporting" such a position that may be raised by another member nation.

So what we are talking about in the earlier provision is a matter of the administration taking appropriate steps toward modification of article V(d), but we cannot unilaterally make that change. We have to go to Intelsat and vote like all the other member nations on any changes to their charter.

Mr. BROYHILL. Well, let us assume we have a situation that arises where one nation makes a proposal and then we are required to support that, but we have alienated everybody else and they are voting no. Our representative and our State Department is left in the position that they have no flexibility to negotiate this and to work with the other signatories in order to work out the problem. There could be other ways to accomplish the same results or it could be that if there is a competitive service that is being offered, for example, that has been approved, that it is not going to take away business from Intelsat, it is not going to take away traffic, and to require the United States to take this action is going to deprive these nations of income and then they are going to blame the United States for that action. It seems to me that is not what we want to accomplish here. We want to maintain some flexibility.

Mr. BONKER. Let me be clear so that we can put this matter to rest.

The amendment does not mandate any particular U.S. position on this question.

I think Congress ought to provide some direction to that position, but we are not getting into the specifics. We are only saying that the United States through the Secretary of State ought to take the appropriate steps to modify article V(d).

Now, whatever the member nations want to do, that is their collective decision.

Mr. BROYHILL. That is an important statement the gentleman made. I want to be sure of our understanding.

The gentleman is saying that the Secretary of State, our administration, will have some flexibility with regard to the position that it takes, that if they should find that there is no need for any change in the rate structure in Intelsat, would they then be able to say that we would not have to support an amendment——

The CHAIRMAN. The time of the gentleman from Washington has again expired.

(At the request of Mr. BROYHILL, and by unanimous consent, Mr. BONKER was allowed to proceed for an additional 5 minutes.)

Mr. BROYHILL. Mr. Chairman, I appreciate having this additional 5 minutes and I appreciate the patience of Members, because this is critical.

Mr. BONKER. I say to the gentleman from North Carolina, there is flexibility in this language, because we only provide that the Secretary in consultation with the other departments of our Government shall look at the appropriate scope and character of article V(d) for the purpose of modification.

□ 1220

So the administration has the flexibility to develop its position. But we ought to be moving in that direction.

Mr. BROYHILL. Well, what happens then if there is a decision and apparently it is supported by a majority of the signatories that there is no need to make a change and then do you say that then our country is forced to vote for a change?

Mr. BONKER. The United States cannot actively support "no position."

Mr. MICA. Will the gentleman yield?

Mr. BONKER. I yield to the chairman of the subcommittee.

Mr. MICA. I would just say that a reading of the language shows that the amendment addresses the gentleman's concern.

I must just add, too, the gentleman's committee is fully protected on this.

What we are talking about is not accepting whatever Intelsat or a member thereof proposes but rather supporting an appropriate modification. So as I understand the language, Intelsat could make a recommendation, we may not agree with it and offer some other appropriate recommendation. That would then give us the flexibility the gentleman is seeking.

Mr. BROYHILL. Will the gentleman yield further?

Mr. BONKER. I yield to the gentleman from North Carolina.

Mr. BROYHILL. Would the gentleman from Florida [Mr. MICA] agree with me that we could have a situation arise where we are forcing our Nation to support a position that may be untenable or may not have support and thus tie the hands of our representatives and not be able to negotiate this with the other signatories?

Mr. MICA. First, let me say I would share the gentleman's concern but I do not read the legislation as doing that.

I think we will always be in the position to offer a counterproposal and we will always be in a position to offer what we call in the legislation "an appropriate modification" which may not be—and the legislation does not say it has to be—the same as that which would be proposed. I think that does cover the gentleman's concern.

Mr. BROYHILL. If the gentleman would continue to yield, would the gentleman from Washington agree with what the gentleman from Florida has said? Because it is certainly an important interpretation.

I am not quite sure that the words say that and that is why I offered additional words. Perhaps if we had time, we could continue to negotiate and work this out. But apparently the legislative process is moving on and we do not have that flexibility ourselves.

With that understanding, I would like to continue working with the gentleman as the legislative process goes through to the other body to see if we could not have legislative language that would carry out the intent of what the gentleman have stated here.

If the gentleman would yield further, I have one other concern with respect to language that is found in subsection 2 of (b). My concern is that we are having foreign governments here, we are saying that they would have to be enforcing conditions that have been laid down by the President in Presidential Determination No. 85-2. I am not sure that we want to do that. I think we can certainly have the authority to enforce Presidential conditions but is it the intent here that you want the foreign authorities to be enforcing Presidential determinations?

Mr. BONKER. I do not think the legislation really speaks to this issue in a way that will breach our extraterritorial respect for foreign governments and their policies. I think the administration has responsibility, in consultations with other governments, to see that we are playing by the same rules. So I do not think this will have extraterritorial reach that will prove offensive.

Mr. BROYHILL. The reason I bring this up is a letter addressed to the chairman, signed by the Acting Secretary. Mr. Kenneth Dam raises this point as to whether or not the U.S. national interests would be served.

The CHAIRMAN. The time of the gentleman from Washington [Mr. BONKER] has again expired.

(On request of Mr. BROYHILL and by unanimous consent, Mr. BONKER was allowed to proceed for 5 additional minutes.)

Mr. BROYHILL. I assume the gentleman has seen this letter. If not, I will be glad to show it to him.

Mr. BONKER. I have not seen the letter. Maybe as others speak, I will have an opportunity to read the letter and respond.

Mr. BROYHILL. As I understand, at the end of that first paragraph, what he is saying is that the U.S. limitations on services is expressing concern that we are going to be imposing these kinds of limitations on foreign governments and that what we are doing we can do ourselves but we are in effect saying what other governments should do.

Mr. BONKER. It is not my intent through this amendment to dictate our policies to other countries, but I do think the Secretary ought to be consulting with them concerning changes to the Intelsat system.

Mr. BROYHILL. I thank the gentleman for his patience.

Mr. LAGOMARSINO. Will the gentleman yield to me?

Mr. BONKER. I am glad to yield to the gentleman from California.

Mr. LAGOMARSINO. With regard to the last question of the gentleman from North Carolina, the way I read the duty of the Secretary of State, it is merely to find whether something is a fact or not, has another country agreed, as is required under the Intelsat agreement. Is that not the gentleman's understanding?

Mr. BONKER. If you read the language, subsection b(2) of the amendment says that the Secretary shall "ensure that one or more foreign authorities have authorized the use of such system consistent with such conditions."

Mr. LAGOMARSINO. But it does not impose on him a duty to get another state to do that?

Mr. BONKER. No, it does not.

Mr. LAGOMARSINO. It merely is to find whether or not they actually have. You could say the Secretary of State shall find. I think you could perhaps use other words. But I do not know that it really makes any difference.

Mr. BROYHILL. Would the gentleman yield?

Mr. BONKER. I yield to the gentleman from North Carolina.

Mr. BROYHILL. Let me see if I can articulate my concern here. I think my concern is what this could be doing is giving the foreign government the power to interpret these U.S.-imposed conditions which are contained in that Presidential order or pronouncement or whatever you want to call it that the foreign government could interpret those in such a way that they could become a trade barrier.

In other words, it would make it difficult for a competitive satellite system to operate, depending upon the interpretation of the host government.

Mr. BONKER. I think you may be reading more into the provision than is actually there, but that is why this colloquy is useful. It is not my intent as sponsor of the amendment to dictate the Presidential conditions to other foreign governments. But I think that we ought to be working with foreign governments to see that compatible conditions are in place.

Mr. LAGOMARSINO. Will the gentleman yield again?

Mr. BONKER. I yield to the gentleman from California.

Mr. LAGOMARSINO. With regard to the first point the gentleman from North Carolina and the gentleman from Washington had a colloquy about with regard to the Secretary of State and Intelsat, if you read on in the language, it says the Secretary of State, regarding the appropriate scope and character of a modification to article V(d) of the Intelsat agreement, which would permit Intelsat to establish cost-based rates for individual traffic routes as exceptional circumstances warrant.

So there would have to be that and then it goes on to say paying particular attention to the need for avoiding significant economic harm to the global system of Intelsat, as well as the United States.

So I think that there is perhaps even more flexibility in the gentleman's amendment than the gentleman thinks there is and perhaps the deletion of the words "need for" and "above" do not have as much effect as perhaps the gentleman told us.

I think that even with that deletion, that there is appropriate discretion on the part of the Secretary of State and while perhaps it could be helpful if at some point along the line clarifying language could be added, I think the amendment makes sense. I support it.

I started out about one year ago strongly in opposition to the idea of the kind of competition we are talking about. Through a series of meetings and hearings that have been held in the gentleman's subcommittee, I have come to the conclusion that what is being proposed here is a pretty good way to do.

In other words, that competition is not going to be harmful as long as we keep in mind the basic parameters of the original agreement to set up the system in the first place. So I hope the gentleman's amendment is adopted.

□ 1230

But I do urge on the gentleman that he continue the dialog with the gentleman from North Carolina [Mr. BROYHILL] and others to see if we cannot get even closer agreement on this issue.

Mr. BONKER. I appreciate the comments of the gentleman and his support.

Mr. WIRTH. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I will not oppose this amendment. I have discussed its contents with its sponsors, and they have agreed to a number of changes that I think will provide a better balance to the language that was originally going to come before us. I thank them for their willingness to accommodate my views.

Mr. Chairman, as we debate the issue of alternative satellite systems, and the role of the United States in Intelsat, I'd like to take a few moments and try to put these issues in perspective. We are not simply picking a winner between Intelsat and the applicants to provide alternative services. We are setting in place the infrastructure that will facilitate U.S. exports—

in this case, not telecommunications hardware, but the information and programming services which can make a significant dent in our trade deficit.

Until there was the threat of competition to Intelsat, it was impossible to obtain a 24-hour video channel linking the United States and Europe. Cable programming services, for instance, had no mechanism to export their product to cable systems in Europe.

But within the last few months, Intelsat's signatory—Comsat—has finally signed a contract to provide such a service to a U.S. programmer—CNN—and service will commence in September.

That's the good news.

The bad news is that Comsat's rates are double the rates for comparable service in the United States. And the service is preemptible.

Mr. Chairman, I do not mean to imply that Intelsat has not been good for the United States. From its conception in the early days of the Kennedy administration Intelsat has succeeded in creating a global satellite network that serves its members well.

Intelsat now has 109 member countries. It has brought instantaneous communication to virtually every country in the world, helping to make the world a smaller place. Its interconnected network has hastened the integration of member countries into the world economy, and has made international telecommunications almost as ubiquitous as the domestic system. Intelsat is a monument to the peaceful uses of outer space, and to cooperation among nations.

But it is important to understand just who Intelsat's owners are. They are primarily the postal, telephone and telegraph administrations of member countries. The satellite network they designed is suited to their needs—providing point-to-point telecommunications for switched voice and record services.

Thus, traffic destined for European distribution is collected at one of three Earth stations in the United States, uplinked to the satellite, and received in another country. At that point, the message transits the domestic network of the receiving country, and ultimately arrives at its destination.

The facilities of Intelsat have served this market well. Moreover, by virtue of satellite technology, thin routes and high density routes can be served over the same facility. Transmissions are virtually distance insensitive.

But there are other markets, distinct from the switched voice market, that lend themselves to satellite technology. We can identify some of these other markets—for example, the video market. And the video market provides a good example of the way changes in satellite policy can help to bring new products and services to the public. Let me explain.

Until 1972, the FCC regulated the ownership and construction of satellite Earth stations, even if the Earth station could only receive a signal. In 1972, however, the FCC adopted its so-called open-skies policy, which deregulated receive-only Earth stations. No one was quite sure what benefits would result from the new policy, but the FCC took a chance and let marketplace forces work.

And the marketplace did work. Programmers for cable systems quickly realized that satellites offered an inexpensive alternative to terrestrial transmission facilities. With a single uplink signal, a programmer could reach virtually every cable system in the country, at nominal costs.

The result was the inauguration of services like HBO. And with the advent of premium channels on cable systems, the cable industry has grown at a rapid pace.

Intelsat does not now serve the video marketplace in a meaningful fashion. The few video transponders that are available are preemptible, they must be reserved far in advance, and they are extremely expensive.

Moreover, the Intelsat tariffs include additional charges for additional receiving points, reflecting the fact that Intelsat was designed to meet the needs of its owners—the PTT administrations.

The applications currently under consideration by the FCC propose to serve the video market. They will make facilities available that will facilitate the export of U.S. programming.

In short, there is a market under construction, which the alternative satellite systems could enable U.S. programmers to fill.

What are the U.S. options? If we are to take advantage of the development of nontraditional applications of satellite technology. What is the appropriate course to pursue?

It seems to me that our options are threefold.

First, we could rely upon Intelsat, and try to encourage Intelsat to fulfill these new needs as well as its obligations to the public switched network.

Second, we could protect Intelsat's switched services from competition, but allow alternative systems for other applications.

Or third, we could pursue competition with ideological fervor, and permit alternative satellite systems to compete directly with Intelsat.

As Americans, I believe we have a predisposition toward competition. We know that competition encourages innovation, lower prices, and a greater level of responsiveness to the market. Moreover, we already have alternative systems providing international satellite services—most notably, the Inmarsat system—which connects ships at sea to the public switched networks of the world.

And asking Intelsat to be all things to all people is not fair—particularly to those from underdeveloped nations. The new applications for satellite transmissions—video, high speed data—will, in all likelihood, only be utilized by developed countries. Forcing Intelsat to meet the needs of a few of its members—while incurring costs for each member country—is unfair. The Third World should not be forced to underwrite the cost of video distribution between the United States and Europe. Thus, I do not believe that the first option is realistic for the United States.

The third option—of permitting unrestricted competition to Intelsat for all services—is equally unrealistic. To do so would constitute an abrogation of our obligations under the Intelsat agreements. Unrestricted competition would deny us the benefits of a globally interconnected system for switched services. And such a policy would offend our partners in Intelsat.

The second opinion of permitting competition for some services, while protecting Intelsat's switched traffic, is far more reasonable. It has the virtue of maintaining the good things that Intelsat has brought—cooperation, interconnectivity, and access to every corner of the world.

But this option will also permit the development of new applications of satellite technology, without imposing the costs of the new applications on those who do not use them. Reliance on market forces for the offering of nontraditional services is consistent with our own tradition of free enterprise, and will facilitate greater responsiveness to the marketplace.

We have already seen Intelsat respond to the threat of competition. Just 2 months ago, Ted Turner announced an agreement to export his Cable News Network to Europe, over Intelsat. Intelsat now offers a new data service—International Business Satellite Services. I would expect to see additional innovation on the part of Intelsat in the future, proving the maxim that competition brings users new services.

Protecting Intelsat's switched services, while permitting alternative systems for customized services, is sound telecommunications policy. But international telecommunications are, by their nature, joint undertaking. And Intelsat, in particular, represents both a telecommunications and a foreign policy success.

There are foreign policy ramifications to this issue, which I'd like to address as well. Those ramifications have both substantive and political dimensions, which must be separated.

On a substantive basis, there is legitimate concern that fragmenting In-

telsat's traffic will cause Intelsat economic harm. It seems to me that, by limiting alternative systems to customized services, and prohibiting them from offering switched service, Intelsat's primary mission will be safeguarded. We're not talking about cream skimming here, in which the most lucrative traffic is diverted from Intelsat.

Rather, we are opening up to competition a new market, currently unserved or underserved—and making sure that those who use the new services are the ones who pay for them.

The political dimension is, however, another story. For a variety of reasons, and by a variety of players, the members of Intelsat have been told that the decision to permit alternative systems represents a movement away from a single global system for the provision of switched service.

Nothing could be further from the truth.

Those member countries must be presented with a detailed explanation of U.S. policy, the safeguards that will be employed to Intelsat, and most importantly, the rationale behind the policy to permit alternative systems.

That job has not been done.

The absence of that explanation has created a situation in which a foreign policy problem can develop, if it hasn't already.

I do not believe that the proposed alternative systems pose substantive problems for the United States and its relationship with the other members of Intelsat. But the manner in which the United States has addressed the issue may well have created a political problem.

The State Department must undertake an aggressive effort to explain the policy to our partners in Intelsat. It must reassure them that the limited authorizations proposed by the President will not have an adverse economic impat on Intelsat, and do not represent a diminution of America's commitment to Intelsat.

One subsidiary question that has been raised in this debate is whether Intelsat ought to be allowed to compete with the alternative systems.

It seems to me a more competitive Intelsat could bring many advantages—to the United States and to the rest of the world.

However, as we address this question, it seems to me that there are two principles that ought to govern the resolution of the debate:

First, there should be no cross-subsidies. Intelsat should not be permitted to use its protected position in the switched market to underwrite the cost of entering the new markets.

Second, those who benefit from Intelsat's competing should be the ones to pay for it. Less developed countries [LDC's]—which will not be utilizing high speed data links, nor 24-hour video transponders—should not be forced to pay for their construction, launch, and operation.

The United States—together with its partners in Intelsat— should begin the process of defining the future role of Intelsat in these newly competitive markets. If there is a consensus that Intelsat should be permitted to compete, we should attempt to define the manner of that competition, consistent with the two principles I outlined earlier. This effort should help to reassure Intelsat and its member countries that the United States has a strong interest in seeing Intelsat prosper, and will continue to work to achieve that goal.

We are only at the beginning of this process. The detailed recommendations from the executive branch are less than a year old.

As we examine these issues, it is important to keep several things in mind:

First, the technology that has made Intelsat possible is not static. There have been tremendous advances over the past 20 years.

As the technologies involved have changed, so also should the policies of the United States. By permitting alternative systems to make facilities available for unserved, or underserved markets, those who depend on satellite transmission will be better off.

Second, unless we continue in the direction of alternative systems, there will be serious opportunity costs. New export markets will remain undeveloped. At a time when our balance of trade is approaching crisis proportions, those opportunity costs are significant and growing.

Finally, we should remember that Intelsat has been good for the United States, and good for the rest of the world. We should attempt to build on that base as we permit new applications of satellite technology, and make sure that our partners are kept well aware of our ongoing commitment to the Intelsat system.

Mr. Chairman, the amendment before us today will not impede this goal. I would like to thank the gentleman from Florida [Mr. MICA] and the gentleman from Washington [Mr. BONKER] for their willingness to work with us in crafting an amendment. Very importantly, I appreciate their willingness to assure that the amendment reflect my view that with respect to the issue of flexible pricing, the United States have complete flexibility in determining what position it will support. I look forward to working with them in the future, as the Committee on Energy and Commerce continues its work in international telecommunications issues.

I give back the balance of my time.

Mr. Chairman, I want to first of all compliment the gentleman from Washington [Mr. BONKER] and the gentleman from Florida [Mr. MICA] for making accommodations to the concerns that many of us on the Commerce Committee have about this important piece of legislation. The amendment offered by the gentleman from Washington [Mr. BONKER] is certainly a great deal better than the original language and I think we have practically accommodated our concerns.

I was especially pleased to hear the gentleman from Florida [Mr. MICA] point out that we were not going to in any way interfere with the FCC's process.

I point out there is some confusion, I think, about what is being accomplished here; there are three broad principles that I think we all agree with. The first, relating to competition in the international satellite area, is critically important and there is no intent here to interfere with such competition.

Second, contrary to some of the arguments that have been made against competition, there is no intent here to harm Third World countries in any way, shape, or form.

Third, there is no intent here that we would permit cross subsidies on the part of Intelsat.

The most vexing question is the question of price flexibility for Intelsat and it is my understanding, having talked to the gentleman from Washington and the gentleman from Florida, that under this amendment the United States will have full flexibility in developing a position on the issue of flexible pricing as put forward by any party to the Intelsat agreement.

That issue of price flexibility is there, the Congress is not determining one way or another; it is saying that that flexibility remains.

Mr. Chairman, I just want to confirm with the gentleman from Washington that it is his intent as the author of the amendment that the amendment does not in any way prejudge or predetermine the issue of flexible pricing with respect to the Intelsat agreement?

I offer that question to the gentleman from Washington.

Mr. BONKER. Mr. Chairman, will the gentleman yield?

Mr. WIRTH. I yield to the gentleman.

Mr. BONKER. I thank the gentleman for yielding.

As was discussed earlier, the administration has flexibility within Intelsat on flexible pricing. I think that is implied in the language that is in the amendment before the House.

Mr. WIRTH. I understand what the gentleman's intent is. I think we have arrived at that under this amendment and I think that this does not involve any kind of prejudging of the issue.

Mr. TAUKE. Mr. Chairman, will the gentleman yield on that point?

Mr. WIRTH. I would be happy to yield to the gentleman from Iowa.

Mr. TAUKE. I thank the gentleman for yielding.

If I may also have the attention of the gentleman from Washington, is he suggesting by that comment that the United States need not necessarily support the averaging of rates?

Mr. BONKER. Mr. Chairman, will the gentleman yield to me?

Mr. WIRTH. I yield to the gentleman from Washington [Mr. BONKER].

Mr. BONKER. I thank the gentleman for yielding.

There is nothing that specific in the amendment. But we do have a provision in there that says that the U.S. Government shall actively support a position to modify article 5(d).

Now, what the United States position is, developed through the Secretary of Commerce and Secretary of State and Comsat, remains to be seen.

My language requires the United States to address the question of route-by-route price flexibility and modification of article 5. While the amendment does not require that the United States support any particular proposed modification of article 5(d) of Intelsat's charter, it does require that the United States support some version of route pricing authority. I regret that I was not able to reach agreement with all Members on this particular point. But the language is clear that the United States support route-by-route pricing flexibility within Intelsat, and I am unable to agree to anything less than that.

Mr. TAUKE. But if we were to conclude that for some reason a position of deaveraging was not necessarily in the interest this amendment would not compel the U.S. Government to support something like that.

Mr. BONKER. The amendment does not compel the United States to support any specific position.

Mr. TAUKE. I thank the gentleman from Washington [Mr. BONKER].

Mr. Chairman, I thank the gentleman from Colorado [Mr. WIRTH].

Mr. WIRTH. I thank the gentleman from Washington.

Mr. DINGELL. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise to engage my colleague, Mr. MICA, in a colloquy concerning his amendment.

Am I correct that the Secretary of State is required to conduct the activities assigned to him by this amendment under the existing terms and procedures that govern the allocation of executive branch responsibilities for international communications policy?

Mr. MICA. Mr. Chairman, if the gentleman will yield, the gentleman is correct. The amendment does not assign to the Secretary of State an expanded role in the formulation of executive branch international communications policy. Subsection (f) of this section states that "In implementing the provisions of this section, the Secretary shall act in accordance with Executive Order 12046." Pursuant to this Executive order, a State-Commerce Arrangement on Responsibilities for International Communications and Information Policy was signed on August 31, 1983, by the Secretaries of State and Commerce. This arrangement will govern the activities of the Secretary of State under this section.

Mr. DINGELL. I thank the gentleman. Is it his understanding that this arrangement assigns to the Department of Commerce the responsibility "for the development and presentation of telecommunications and information policy for the executive branch."

Mr. MICA. That is correct. In addition, under this arrangement the State Department is responsible for incorporating the telecommunications policy area with other aspects of U.S. foreign policy. Effectively advancing U.S. interests requires close collaboration and cooperation between the Departments of State and Commerce.

I want to assure my colleague, the chairman of the Committee on Energy and Commerce, that nothing in this amendment alters the current allocation of international telecommunications responsibilities. The Secretary of Commerce retains his role as the President's principal adviser on telecommunications policy.

Mr. DINGELL. I thank the gentleman and urge my colleagues to support this amendment. It is a compromise that allows alternative international satellite systems to be established only under the terms recommended by the administration, while assuring that Intelsat has the flexibility to provide U.S. customers with high quality, reliable service at cost-based rates.

Mr. Chairman, I thank my colleague and express my great respect for him.

Mr. MICA. I thank the gentleman.

Mr. MACKAY. Mr. Chairman, I move to strike the requisite number of words.

I would like to read a statement and ask the gentleman from Florida [Mr. MICA] to listen to this and confirm that it represents his intention.

Ever since the breakup of AT&T, I have been concerned that, prior to authorizing major changes to existing telecommunications institutions, Congress must analyze the effects of proposed changes and ensure that the benefits to be gained outweigh the possible detriments.

I am likewise interested, however, in allowing innovation and new technologies to flourish and to bring benefits to all parts of the world. I am particularly interested in making sure that our procedures are not used to stymie developments in the lesser developed world.

I support the amendment because I have been assured that the intent here is to ensure that transatlantic competitors to Intelsat will not impair Intelsat's ability to continue to provide quality international services to all countries of the world.

The amendment is not intended to impede the development of domestic satellite services or transborder satellite services. For example, this amendment would not affect the Mexican satellite system from providing services to the United States on a transborder basis nor will it affect American companies from selling satellite capacity to Latin American nations for domestic and transborder purposes.

Mr. MICA. Mr. Chairman, if the gentleman will yield, first I would like to thank the gentleman for his concern. I think this will be a very helpful addition to the Record on this subject.

Mr. Chairman, the gentleman is absolutely correct.

Mr. MACKAY. I thank the gentleman.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Washington [Mr. BONKER].

The amendment was agreed to.

□ 1240

AMENDMENT OFFERED BY MR. PANETTA

Mr. PANETTA. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. PANETTA: Page 28, after line 25, insert the following new section:

SEC. 128. EMERGENCY TELEPHONE SERVICE AT U.S. CONSULAR OFFICES.

It is the sense of the Congress that the Secretary of State should ensure that all United States consular offices are equipped with 24-hour emergency telephone service through which United States citizens can contact a member of the staff of any such office. The Secretary should publicize the telephone number of each such service for the information of United States citizens. Not more than 90 days after the date of the enactment of this Act, the Secretary shall submit a report to the Congress on steps taken in accordance with this section.

Mr. PANETTA (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. PANETTA. Mr. Chairman, I rise today to offer an amendment to the State Department authorization. I offer it, because I think it addresses a very real problem in the services provided by our consulates abroad.

I ask you today to amend the State Department authorization to include a new section, section 128, which would express the sense of Congress that the

Secretary of State ensure that all U.S. consular services worldwide are equipped with a 24-hour emergency telephone service through which U.S. citizens can contact a member of the consulate staff. This amendment would also direct the Secretary to publicize this phone number so that any U.S. citizen traveling abroad is aware of who to call in the event of an emergency.

Mr. Chairman, it was only last fall when two of my constituents were killed in a car accident in Tijuana, Mexico. Leslie and Mary Bugalski were visiting with friends in Mexico when the van they were riding in was struck. Four of the passengers in the van died as a result of the accident.

If the accident were not tragic enough, consider that it happened at a time when the U.S. consulate was closed. Friends of the victims, kept calling the consulate, attempting to find information relating to their friends—not knowing about the accident. Sadly, these friends learned of the accident and their friends' deaths not from the U.S. consul, but from a local newspaper the next day.

I will not relate here the horrible treatment to which two of the victims' father was subsequently subjected, but let me say that it was clear that our consular services were sorely lacking in Tijuana.

Unbelievable as it might sound, U.S. consulates worldwide are not required by law to provide for 24-hour-a-day contact with a member of the consulate staff, even in the event of dire emergency or death. In many consulates, callers to the U.S. consul after business hours reach a local answering service. Whether the U.S. consul ever gets the message, and whether the U.S. citizen in trouble gets the assistance he or she needs immediately, depends on the operability of the local system.

Mr. Chairman, I believe we owe our citizens more than that. I ask my colleagues to adopt this amendment to provide for 24-hour-a-day contact with a member of the U.S. consulate staff. Further, I ask that this emergency phone number be publicized so that all American travelers are aware of this service.

In the case of the Bugalski girls, the availability of this service might have avoided undue trauma and delay. Now that such services are provided at the U.S. consulate in Tijuana, I am confident that no American citizen in Tijuana will ever have to wait to receive the emergency assistance they need. But what guarantees do we have in other parts of Mexico, and other parts, indeed, of the world?

Mr. Chairman, I urge the passage of this amendment so that American citizens, wherever they may be, can rest easy knowing that emergency assistance from a U.S. consultate is available whenever they need it, and not just during normal working hours. Let us not abandon our own citizens during their times of greatest need.

Mr. Chairman, I yield to the chairman of the subcommittee.

Mr. MICA. The committee has reviewed this amendment and has no objections to it. I would like to add, however, that it has been our understanding that this type of service has been provided by the Department of State. There may be some holes in this network, and this amendment would indeed patch that up.

I think this amendment is needed. It is a helpful amendment, particularly since a report will be submitted in 90 days as to what actions have been taken to make sure that there is a worldwide comprehensive system, so this type of situation does not occur again.

Mr. PANETTA. I thank the gentleman.

Mr. Chairman, I yield to the gentlewoman from Maine [Ms. SNOWE].

Ms. SNOWE. Mr. Chairman, we have examined the amendment, and I, too, would be in absolute agreement with the gentleman from California.

In the meantime, I think we should explore the situation further, beyond this amendment, to make sure that this does not occur again. It was unfortunate circumstances that brings this issue to our attention.

I thank the gentleman for raising the issue, and I support the amendment.

Mr. PANETTA. Mr. Chairman, I thank the gentlewoman.

The CHAIRMAN. The question is on the amendment offered by the gentleman from California [Mr. PANETTA].

The amendment was agreed to.

AMENDMENT OFFERED BY MR. HUTTO

Mr. HUTTO. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. HUTTO of Florida: Page 28, strike out line 11 and all that follows through line 25, and insert in lieu thereof the following:

Assignment of members and advisers to the United States delegation to the Coordinating Committee on Export Controls shall be determined by the Secretary of State in consultation with the Secretary of Defense and the Secretary of Commerce.

Mr. HUTTO. Mr. Chairman, my amendment would delete the section 127, and replace it with language that would permit the Secretary of State, after consultation with the Secretaries of Defense and Commerce, to assign the members and advisers to the U.S. delegation to the Coordinating Committee on Export Controls, known as Cocom.

The present section 127 must be deleted from this bill for the following reasons:

Under section 127, as presently written, only State Department employees could be members of the U.S. delegation or assigned to Cocom as advisers to the U.S. delegation. Further, only State Department appropriations could be used to fund, repair, or maintain Cocom facilities.

Section 127 would serve to undermine the extensive, ongoing efforts to improve our Nation's ability to control defense-related goods and technology for national security reasons, and we do need to protect these critical technologies, because the Soviets have been getting a free ride on the military technology that the American taxpayers have been spending, over $20, nearly $30 billion a year, and this isn't right.

It would prevent the use of DOD funding already committed for Cocom modernization and enhancement. Two years ago, $2 million of defense funds were requested by the Under Secretary of State to enhance the Cocom secretariat; and the Congress approved this request, which was cleared through the House Armed Services Committee.

It would also deny the assignment of DOD and Commerce experts to provide timely advice to the U.S. Cocom representatives—even though, for a number of years, officials of the Departments of Defense and Commerce have been active participants in the Cocom negotiating process.

Furthermore, I understand this section was suggested during full committee consideration of the bill without hearings or testimony from responsible witnesses. Also, the section was not considered by the House Committee on Armed Services, which is responsible for all matters affecting the Department of Defense.

Cocom has been operating with minimum staff, with virtually no equipment and under poor working conditions, and members of our staff visited Cocom a year or so ago and found this to be a fact. As a result of the DOD funds, modern computer equipment is about to be installed to serve exporters more expeditiously.

My amendment would ensure that the already authorized and appropriated funds are permitted to be used to improve the Cocom operations, which is clearly in our best interests. In addition, the Secretary of State will have at his disposal the best of talents from both the Departments of Defense and Commerce to help his own department's personnel.

Section 127 is counterproductive, ill advised and has the dual effect of undermining national security and cheating the business community of the efficiency we are trying to create for them in Cocom.

Mr. Chairman, I know that Members have received letters from defense contractors, from the U.S. Chamber of Commerce, and surely, no, they want little or no restrictions, but we have a

responsibility to see that our critical technology does not go to the Soviet Union, the Warsaw Pact nations.

For that reason, we need to strike section 127 from this bill.

Mr. ZSCHAU. Will the gentleman yield to me?

Mr. HUTTO. I would be happy to yield to the gentleman.

Mr. ZSCHAU. I thank the gentleman for yielding to me. It is my understanding that currently there can be at Cocom advisers, consultants, temporary personnel from a variety of agencies to deal with some of the problems that the gentleman alludes to without their being there on a permanent basis.

It would seem to me that in those events where it is necessary to have those people, that under current law, even if this—your amendment would not pass, and the language in this bill were retained, that these resources could be used.

Is not that correct?

(On request of Mr. ZSCHAU and by unanimous consent, Mr. HUTTO was allowed to proceed for 3 additional minutes.)

Mr. HUTTO. The gentleman from California is exactly right, and what my amendment does is to maintain the status quo, and I cannot understand why the Committee on Foreign Affairs would not accept this amendment, because I put it under the Secretary of State, as you heard the amendment read.

And so, if section 127 is maintained, no, you would not be able to have the advisers; it explicitly states in section 127 as passed by the committee without a lot of hearings, then you would preclude those advisers.

Mr. ZSCHAU. If the gentleman will yield, does not section 127 refer to permanent personnel rather than people who are there on a temporary basis, or consulting basis, as is currently done?

Mr. HUTTO. Let me read section 127(a) for you:

Funds for Cocom Facilities.—No funds other than funds appropriated to the Department of State may be used to alter, repair, expand, or modernzie, or engage in any other additional construction of, the facilities of the Coordinating Committee on Export Controls.

Of course, you would deny the facilities that we used for Cocom, if you kept in 127.

Now, going to your point a little further in paragraph (b):

Assignment of Members and Advisers to United States Delegation.

It says:

No officer or employee of any department or agency other than the Department of State may—

(1) be assigned to be a member of the United States permanent delegation to the Coordinating Committee on Export Controls, or

(2) be permanently assigned to the Coordinating Committee as an adviser to the United States permanent delegation to the Coordinating Committee.

□ 1250

Mr. ZSCHAU. If the gentleman would yield further, I appreciate that clarification, and what it does clarify is that the permanent member and permanent adviser or member of the permanent delegation is what is being prohibited here. This language, 127, would not prevent temporary advisers, consultants, as are currently used at Cocom from a variety of departments.

Mr. HUTTO. If I may, let me ask the gentleman a question. What is the purpose, other than prohibiting the upgrading of the facilities which we very badly need, what is the purpose of that paragraph (b)?

Mr. MICA. Mr. Chairman, will the gentleman yield on that point?

Mr. HUTTO. I would be happy to yield to the chairman.

Mr. MICA. There is no problem with upgrading the facilities. In fact, the State Department was authorized $2 million for upgrading the Cocom facility last year, but these funds were not appropriated.

(On request of Mr. MICA and by unanimous consent, Mr. HUTTO was allowed to proceed for 5 additional minutes.)

Mr. MICA. If the gentleman will yield further, I have been wrestling with this situation because I share some of the concerns of the gentleman from Florida and can certainly give some support to the intent of his language. I have reviewed it. I understand the concern is that we wanted in some way to alter the status quo. In the gentleman's opening statement he said that the language in the legislation would prohibit other agencies from being involved in Cocom and that would somehow change the status quo. Currently the permanent delegation is led by the State Department. That is the status quo. This would allow this situation to continue. The Defense Department can send advisers. Commerce can send advisers. Anybody can send advisers. What would change—and this is where I was concerned because I wanted to help the gentleman—was not the status quo. It is the gentleman's amendment that would affect the status quo because for the first time you would have a situation where the State Department, which is now the lead agency, would have to compete with other departments at Cocom.

The gentleman from California just pointed out what the gentleman in the well just read, that the word "permanent" applies in both of these. So I would submit that there might be some misunderstanding. We are trying to preserve the status quo. We would like to see the facilities upgraded, but we do not want a situation where you have every agency in the Government potentially coming in and adding permanent people to Cocom.

Mr. HUTTO. Mr. Chairman, I understand your concern, and I know that you are concerned. But it is considerably changing the status quo if we maintain 127. If we want to maintain the status quo, I think that we would adopt my amendment, because it clearly puts it in the domain of the Secretary of State, and then he could name advisers or delegates or whomever, after consultation with the Departments of Defense and Commerce.

And also I would like to say, Mr. Chairman, that Secretary Baldrige of the Commerce Department called me today and he is very much in support of this amendment. It has to be a cooperative effort between the agencies of Government. You are trying to exclude Defense, and we need that expertise.

Mr. MICA. If the gentleman will continue to yield, there is no provision in section 127 that permanently excludes Defense or any other agency. With regard to the Commerce Department, the U.S. Chamber of Commerce totally opposes deletion of this section 127.

Mr. HUTTO. I understand that.

Mr. MICA. What I continue to say is that I think we have a misunderstanding or misinterpretation of the intent of the language that the gentleman just read. In effect we are preserving the current situation at Cocom. We would like to preserve what appears to be an attempt to station permanent individuals from other agencies at Cocom.

Mr. HUTTO. That is the chairman's interpretation.

Mr. LAGOMARSINO. Mr. Chairman, will the gentleman yield?

Mr. HUTTO. I yield to the gentleman from California.

(On request of Mr. LAGOMARSINO and by unanimous consent, Mr. HUTTO was allowed to proceed for 5 additional minutes.)

Mr. LAGOMARSINO. Mr. Chairman, I want to rise in strong support of the gentleman's amendment.

It seems to me that the Chamber of Commerce and others who oppose the gentleman's amendment and favor the Bonker amendment maybe are not really looking at what happens.

The complaint I get from people is that Cocom takes too long, that they do not know what is going to happen, and even when they find out, it is many months later and perhaps they have even lost their sale. And it seems to me that what we need to do is to carry out what the President stated to our allies; namely, we want to modernize and enhance Cocom, not go the other way.

The Under Secretary of State promised in the 1983 meeting of Cocom that the United States would fund a

$2 million effort to modernize and upgrade it, and subsequently he asked the DOD for funding, and that was done, it was programmed, as the gentleman knows, in 1984 from DOD funds. We have made formal commitments on this, and there has been no money authorized and appropriated in the State Department budget.

So I think the gentleman's amendment not only makes sense from the national security standpoint, and I think it is far different to have someone temporarily assigned who, if you are going to follow the law, would be temporarily assigned, not permanently. You can violate that, I suppose, but the same people would be objecting to that, as well they should, because it would be a violation of law.

One of the problems that we have in Government is that all too often the people who are in an assigned spot do not stay there long enough to find out what is going on.

The amendment that is in the bill is not going to lead to a correction of that, whereas the gentleman's amendment might. It might not, either, depending on how the assignments are made; but certainly it allows it to be done.

I think, from both the national security standpoint and from the standpoint of those who need to get answers from Cocom, that the gentleman's amendment makes sense. I hope the House will adopt it.

Mr. HUTTO. I thank the gentleman very much. I believe the gentleman, who is a member of the Foreign Affairs Committee, makes an excellent point, that what we want to do is upgrade Cocom, and thereby I think it would be beneficial to American industry, because our defense contractors and our computer producers I do not think want these things to get into the hands of the Soviets and the Warsaw Pact nations, and this amendment is entirely reasonable.

Mrs. BYRON. Mr. Chairman, will the gentleman yield?

Mr. HUTTO. I yield to the gentlewoman from Maryland.

Mrs. BYRON. I thank the gentleman for yielding, and I rise in strong support of the gentleman's amendment.

Mr. Chairman, I am a bit surprised that the opponents are so concerned over this amendment offered by the gentleman from Florida.

They were not so adamant when the Department of Defense came up with $2 million at the request of the State Department to meet its commitment to modernize the Cocom's headquarters. Mr. Chairman, DOD has spent money on the Cocom process to upgrade the facilities and the communication equipment at the request of the Department of State.

Nor were these same individuals arguing over the nearly 2½ years that was necessary to draft the Export Administration Act that the Department of Defense was to be excluded from the Cocom process. It was, seemingly, obvious during those years that an international organization designed to restrict the flow of military technology would have defense experts involved. What has changed in the few months that now calls for the elimination of military experts in the process has not been explained.

Yet, Mr. Chairman, the bill as presently written would preclude the Secretary of State from using Department of Defense military technology experts in the Cocom delegation. Mr. HUTTO's amendment would retain the authority of the Secretary of State to appoint the Cocom staff as necessary, which would include DOD military technology experts if in the Secretary's judgment it would improve the Cocom delegation.

It is also interesting that the opponents of this amendment are opposed to better management and efficiency in the Cocom delegation. In the past, the Department of Defense has rotated teams of experts into the Cocom process. In all probability, we could expect that a permanent expert that understands military technology would ensure a continuous, unbroken corporate memory that would better serve the negotiating process. If it is a consistent and rational export processes that is often claimed to be needed for American businessmen, then surely a stable and consistent Cocom delegation will go a long way toward that end.

Finally, Mr. Chairman, let us note one important point. The committee provision, that Mr. HUTTO is attempting to restore to existing practice, would preclude any Department of Defense military experts to be on staff at Cocom. The committee proposes that a State Department economics specialist be assigned in that space. Mr. Chairman, Cocom is supposed to restrict the flow of critical military technology to the Soviet Union and the Warsaw Pact. With all due respect, Mr. Chairman, it would be a sham to send a U.S. delegation to the Cocom process and not have a military technology expert out of the Department of Defense at the disposal of the negotiating team appointed and headed by the State Department.

Mr. Chairman, I urge my colleagues to support the Hutto amendment.

Mr. HUTTO. I thank the gentlewoman very much. Not only would if shut defense out of the process, more or less, but also Commerce, which is the lead organization, as I understand it, for screening the exports of our technology and critical materials to the Soviet Union.

Mr. ZSCHAU. Mr. Chairman, will the gentleman yield?

Mr. HUTTO. I yield to the gentleman from California.

Mr. ZSCHAU. Mr. Chairman, the gentlewoman from Maryland suggested that in our long deliberations on the Export Administration Act, which passed the House on April 16, that we did not raise any objection to the involvement of the Department of Defense in the licensing in Cocom or West-West trade.

□ 1300

The CHAIRMAN. The time of the gentleman from Florida [Mr. HUTTO] has expired.

(On request of Mr. ZSCHAU and by unanimous consent, Mr. HUTTO was allowed to proceed for 4 additional minutes.)

Mr. ZSCHAU. Mr. Chairman, will the gentleman yield?

Mr. HUTTO. I continue to yield to the gentleman.

Mr. ZSCHAU. I thank the gentleman.

Mr. Chairman, as the gentleman knows, because he was part of the conference with the other body, there was a lot of debate about this issue. The Export Administration conference finally concluded that no additional authority should be provided to the Department of Defense for review of West-West licensing. This is an issue that we discussed, and debate went along the following lines: The question was asked, "What would be the additional value of having Department of Defense involvement in the licensing process involving West-West trade; trade with our allies?"

The conclusion was that the license decisions would not be improved, but that there might be additional delays. I guess I would ask the gentleman what specific value or additional value in the Cocom decisions do you feel that having permanent members on the delegation of Cocom from Department of Defense, would have, versus the current system, which allows consultants and temporary advisors on issues of particular importance?

What would be the unique, additional value that would result from this amendment?

Mr. HUTTO. I appreciate very much the gentleman asking that because I think there is a very big misunderstanding on the part of a lot of Members.

My amendment does not mandate any permanent members to Cocom; not at all. In fact, I thought I made that clear in my opening statement, that this is strictly controlled by the Secretary of State. That is the reason. I fail to find a good reason for the Foreign Affairs Committee to disagree with that.

Mr. ZSCHAU. If the gentleman would yield further, is the gentleman suggesting that he would not antici-

pate any employees from the Department of Commerce or the Department of Defense to be assigned?

Mr. HUTTO. No.

Mr. ZSCHAU. Is there any reason why you would feel that they might be assigned?

Mr. HUTTO. No; I did not say that. It does not mandate any permanent delegates, but it does mandate that the Secretary of State would have control of this in consultation with Commerce and Defense. I believe the gentleman would want that. Commerce is the lead agency in this export business, and Defense certainly is having a key role in what goes to our adversaries.

Mr. ZSCHAU. If the gentleman would yield further, when the gentleman made his original presentation, he suggested that one of the problems today that we face is a leakage of technology and part of the cause may be that only State Department employees are there at Cocom. If those comments are true, I guess my question is: What additional activities would the Department of Defense employees, if they were assigned there on a permanent basis, be?

Mr. HUTTO. I did not mean to infer that it was the result of any State Department activity; certainly not. We live in a free and open society, and it is hard enough to guard our technologies because the KGB is ever present, even here in the United States. I did not mean to infer that at all.

But Defense and Commerce, as I understand it, they have been a part of this process, and essentially this section 127 would preclude them. What I am doing is just trying to maintain the status quo and let the Secretary of State handle the responsibility.

Ms. SNOWE. Mr. Chairman, will the gentleman yield?

Mr. HUTTO. I yield to the gentlewoman from Maine.

Ms. SNOWE. I thank the gentleman for yielding to me.

Mr. Chairman, I think the gentleman has answered a number of concerns that have been raised today with respect to the current provisions regarding Cocom that are in the bill before the House. I thank the gentleman for his amendment because I do believe that his amendment is far more flexible in allowing the military personnel to continue in the present advisory role.

As I understand what the gentleman has indicated here today, he is attempting to maintain the status quo in the relationship that exists between the Department of State and the Department of Defense. Am I correct in this understanding?

Mr. HUTTO. That is correct.

Ms. SNOWE. And will the Department of State continue with its primary responsibility for the negotiations and for the administration of Cocom?

Mr. HUTTO. Absolutely.

Ms. SNOWE. I also understand that the Department of State agreed to the reprogramming of funds by the Department of Defense to upgrade Cocom facilities because the Department of State did not request any additional authorizations or appropriations this year for the upgrading that is obviously necessary.

Mr. HUTTO. It is my understanding that the Department of State requested the DOD funding for the upgrading of the facility.

Ms. SNOWE. I thank the gentleman for his amendment. It is necessary to continue the presence of the Department of Defense in providing the technical expertise during the decisionmaking process as to which commodities will be exported, and which need to have security controls. The gentleman raises a legitimate point, as I am also concerned that the provisions in the legislation, as it is currently written, will prohibit the advisory participation of the Defense Department personnel.

So long as we have the understanding that it is the Department of State that will continue the lead role and that all participating agencies will be answerable to it I will support the gentleman's amendment.

Mr. MICA. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I would just like to say that I think we have an honest difference of opinion here. As I read this amendment, there is nothing, absolutely nothing in the amendment that precludes any agency from continuing to operate on the basis of the status quo.

The Defense Department can indeed, with this language, advise, and so can the Commerce Department. Any agency can be involved and can advise. I think, I truly believe we just have a misunderstanding here, and it is unfortunately that we were not able to work it out prior to the floor debate. There is nothing in this language that prevents the Department of Defense to do exactly what the gentleman from Florida [Mr. HUTTO] would like to see them do, and that is to advise and be involved.

It just simply maintains a situation so that new approaches are not developed that expand the role of what could be dozens of agencies to take a permanent role on what is essentially an informal agreement among our trading partners to work on the day-to-day licensing prospects for U.S. trade and U.S. business, and in a cooperative spirit.

I think that needs to be mentioned here. That has been the whole success of Cocom. It has been a cooperative effort. If we ever get into a situation where it becomes antagonistic, Cocom, in and of itself, would collapse.

Mr. HUTTO. Mr. Chairman, will the gentleman yield?

Mr. MICA. I yield to the gentleman from Florida.

Mr. HUTTO. I thank the gentleman.

If we pass this, it will not be too acrimonious, because at least two departments do not like this provision at all. I do not think the State Department is too enamored with it. But you automatically set them at odds if you pass this bill with this section in it as it is written.

Mr. MICA. I would just state again that I have no greater respect for any Member in this Chamber, but I think we, very respectfully, disagree with that assessment.

Mr. Chairman, I yield back the balance of my time.

Mr. SOLOMON. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in strong support of the amendment offered by the gentleman from Florida. As presently written, section 129 in the bill would prohibit any official or employee of the Defense Department from being assigned as a member of the permanent U.S. delegation to Cocom. I believe this restriction to be very ill-advised. And the amendment now before us would modify this very damaging provision.

Frankly, I am baffled as to how it is that Congress will go to great lengths scrutinizing every aspect of the defense budget and be constantly sniping at the weapons systems that are necessary to protect the freedom and security of our country while at the same time Congress takes a casual, even cavalier, approach to the whole problem of how American technology is bought, copied, and stolen. Technology that the Soviets then use for their military buildup, requiring in turn a corresponding response from us.

Mr. Chairman, as presently written, section 129 wipes out 4 years of interagency efforts within our Government to develop stronger U.S. participation in Cocom. Our delegation at Cocom would ultimately have to send all substantive matters concerning national security back to Washington for review, because the Defense Department representatives at Cocom would be on a revolving door. How continuity and effectiveness can be achieved that way is beyond me.

I deeply regret the committee action that placed the responsibility for U.S. participation in Cocom exclusively in the hands of the State Department. A Defense Department representative would be prohibited from being permanently assigned even as an adviser to the U.S. delegation.

We have to get serious about the technology drain to the Soviets. Our

role in Cocom must be strengthened. And I urge support for Mr. HUTTO's amendments as a very important and necessary step in the right direction.

□ 1310

Mr. FRENZEL. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, it is with some trepidation that I rise to oppose an amendment which is supported by people whose positions I normally follow and whose rationale is often similar to my own.

In this case, however, it is, at least to me, quite clear that this Committee of the Whole would be best advised to follow the path set out for it by the subcommittee of the Committee on Foreign Affairs.

The situation at Cocom, I think, is well known. This House has just gone through a 2½-year period in which we have sweated, and negotiated, and worked very hard to develop an Export Administration Act. We have finally achieved an agreement with the other body. I understand the President concurs in that agreement. Soon we will have an extended Export Administration Act.

All of the work and all of the understandings that have gone into the Export Administration Act are not going to be overturned by the amendment offered by the gentleman from Florida [Mr. HUTTO]. But some of them are. The Hutto amendment is in conflict, in my personal judgment, with the agreements that we made with respect to the Export Administration Act.

My principal objection to the Hutto amendment is that it will create a series of secretariats at Cocom headquarters, rather than the single, focused, Cocom delegation now controlled by the Department of State. That is, we will have a State Department contingent, a Commerce Department contingent, and a Defense Department contingent, each operating with at least some autonomy. That will give industrial interests in the United States and patriotic interests among our Cocom allies three different shopping centers, depending on what kinds of decisions any of those interests are looking for.

As I understand the Cocom operation, its decisions are supervised by an interagency in the United States. The Cocom group responds to those decisions. Defense is included; Commerce is included; State is included in the interagency group. Any other agency which has a legitimate interest, and often there are many, can be included. However, it is important, I think, in the conduct of our international affairs that we have, as often as possible, a single voice speaking for America.

It seems to me what we are doing is creating the possibility that our work at Cocom in Europe, will be fractionalized, and that makes me very, very nervous. The other thing that makes me a little bit nervous is that the Department of Defense is already a major partner in the process in which it has a very important need to be a partner. It does not need an enhanced role. In fact, a new DOD delegation at Cocom may reduce the Department's effectiveness in maintaining a strong export administration law.

DOD is not the lead agency, and yet this amendment is asking it for money to rebuild the facilities of Cocom, and to fund what seems to me to be permanent Cocom positions in Paris. My guess is that no item in the U.S. budget is going to be under more severe pressure in this House than the Defense Department budget.

I believe that it is probably not a good thing for the Department of Defense to look as if it is willing to spray money around for operations in which it has an interest but in which it is not the lead agency. So I suggest that the DOD construction money is unwise policy, too.

Those of our industrial interests who worked with us on the Export Administration Act now think they understand how the system works. Many of them are very nervous about changing the system as the Hutto amendment would do. Who are they going to see now? Who do they work through? Is it one department? Is it four departments? Who is in charge, and where?

My great fear, and that fear stems from many exporting corporations talking to me about it, is that if we pass the amendment offered by the gentleman from Florida [Mr. HUTTO], we will put confusion in the game.

The CHAIRMAN. The time of the gentleman from Minnesota [Mr. FRENZEL] has expired.

(By unanimous consent, Mr. FRENZEL was allowed to proceed for 4 additional minutes.)

Mr. FRENZEL. My worry is that, when we have this enormous trade deficit, we want to be very sure we impose no confusion or inhibitions to trade. We want to give our people the best shot.

Our industrial corporations are anxious to cooperate with whatever kind of program we have. They are patriotic. We do not want any technology to escape. We grant that the Department of Defense should have, and has, a major role. We think it has the authority and the facilities to carry out that role effectively.

So my respectful suggestion to the House is that it follow the direction of the committee of jurisdiction here, the Committee on Foreign Affairs, and not put any more confusion into an already confused area. If we pass the Hutto amendment, the U.S. commercial interests abroad may be not well served and we may lose sales.

Mr. HUTTO. Mr. Chairman, will the gentleman yield?

Mr. FRENZEL. I yield to the distinguished gentleman from Florida, and I apologize for running on at such length.

Mr. HUTTO. I appreciate the distinguished gentleman from Minnesota yielding to me.

Mr. Chairman, I am a little bit perplexed at a couple of statements that the gentleman made, and for that reason I think there is some misunderstanding.

The gentleman indicated that my amendment would overturn some provisions of the Export Administration Act. Can my colleague elaborate on that a little bit?

Mr. FRENZEL. I did not say any of the conditions of the act. I said the understandings of the act, which, I believe, was that the State Department would continue to do the operations in Europe and that it would be assisted by the detailees and the people from the Department of Defense who normally make up the bulk of our people over there.

Mr. HUTTO. And that is in accordance with the Export Administration Act that you are talking about.

Mr. FRENZEL. That is in accordance with past practice. I simply want to be sure that we do not confuse the thing by putting more than one agency in charge.

Mr. HUTTO. We are not, and I think where there is a lot of misunderstanding. If the gentleman will read my amendment, it is fairly simple and I think reasonable. It leaves it in the hands of the Secretary of State, and we still speak with one voice in Cocom, but the Secretary of State would be in charge. He would consult with Commerce and Defense, as is now the case.

Mr. FRENZEL. I thank the gentleman for his description of the amendment. I must say that it has caused some unease, and I will be delighted to take another look at it at the gentleman's suggestion.

Mr. HUTTO. I would appreciate it if the gentleman would do that.

Mr. BONKER. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, I authored section 127 to deny money for the expansion of the Cocom facilities in Paris and to ensure that the State Department remains as the U.S. permanent representative in Paris.

The Export Administration Act, the law governing our export control program, very clearly states that the Secretary of Commerce is the principal department for administering and enforcing the program. It also states that the Secretary of State, in consul-

tation with the Secretaries of Defense and Commerce, will represent the United States at Cocom in Paris.

□ 1320

The amendment I offered and which was adopted in the committee, reaffirms this intention of Congress that the State Department represent the United States.

So what is happening? What is happening is that the dispute and the controversy that pervades our domestic export control policy, much of which we have attempted to deal with in the reauthorization of the Export Administration Act, is all going to spill over to the multilateral Cocom process. All of the divisions and the confusions, the uncertainty, the licensing delays and the disapprovals—all of the problems that plague our domestic licensing program are now going to be present at that Cocom office in Paris.

My amendment was intended to prevent this transfer of problems from happening. It merely states that the State Department will represent the United States at Cocom.

Now, there is a need from time to time for Commerce and Defense to have representation, and that is provided for in current law and protected by my amendment. Indeed, over the past year we have had delegations going on almost a monthly basis to the Cocom office in an advisory capacity. On July 9, we had 19 advisers going to Cocom, 11 of whom represented the Department of Defense.

DOD has considerable influence, not only in Washington, DC, in the development of our export control policy but at Cocom as well. But if we allow Defense and Commerce to set up their own offices there and to represent U.S. policy, we are going to confuse and dismay our allies in Cocom, and we are going to frustrate U.S. exporters who need to be more competitive.

Mr. Chairman, I would add that the money that is prohibited under my provision is money that was originally authorized by our committee to go to the State Department to upgrade those facilities. And I might add that we are talking primarily about cosmetic changes, physical expansion of the offices there, not equipment. But that money was denied by an Appropriations Committee of this House, and so Defense went around the block and over to the Armed Services Committee to have the money reprogrammed. So it is not State Department money, it is DOD money. But if this House determined, for whatever reason, that it was going to deny the $2 million to the State Department, it had good reason, and we should not have departments going around to committees to get exceptions, which is the case here.

Mr. HUTTO. Mr. Chairman, will the gentleman yield?

Mr. BONKER. I yield to the gentleman from Florida.

Mr. HUTTO. Mr. Chairman, I would like to ask the distinguished gentleman from Washington if he is knowledgeable of this fact: It is my understanding that the State Department wanted these funds. That is not something we would deny.

Mr. BONKER. The State Department indeed wants the funds, and our committee authorized the funds.

Mr. HUTTO. And at their request.

Mr. BONKER. But the Appropriations Committee denied the funds. It does not matter who wants them. If the Congress has spoken, the Congress has spoken.

Mr. HUTTO. I agree wholeheartedly. And tell me, by what provision would Defense and Commerce have the authority to set up an office at Cocom under my amendment? It is clearly left to the Secretary of State.

Mr. BONKER. My amendment would deny Commerce and DOD from sending personnel to the permanent delegation at Cocom.

Mr. HUTTO. If the Secretary of State wanted to do that.

Mr. BONKER. Your amendment merely restates the fact that the State Department will continue to represent the United States in consultation with Defense and Commerce, but it will permit these departments to have permanent staff assigned, and that is the whole point of the amendment.

Mr. HUTTO. No. How does the gentleman read that it would allow them to assign permanent staff?

Mr. BONKER. Well, if you state that your amendment merely maintains the status quo, that is the status quo at the moment.

The CHAIRMAN. The time of the gentleman from Washington [Mr. BONKER] has expired.

(On request of Mr. MICA, and by unanimous consent, Mr. BONKER was allowed to proceed for 1 additional minute.)

Mr. BONKER. Mr. Chairman, the Department of Defense is in the process of sending permanent representatives to Cocom. We heard in testimony before my subcommittee 2 weeks ago that the Department of Commerce was denied the request for representatives at Cocom by the State Department, and yet the Defense Department has been approved. So we are going to have the Defense Department with permanent personnel stationed at Cocom, and the Commerce Department, which is the principal authority for enforcing and implementing our export control laws, being denied.

Mr. HUTTO. Mr. Chairman, if the gentleman will yield further, that is one of the points I made, that the Department of Commerce is being excluded, and under your provision 127, Defense is being excluded.

Mr. BONKER. My purpose is to exclude both Commerce and Defense and allow the State Department to properly represent us. That is congressional intent. Not only that, but if we allow each of these departments, with equal authority in their own eyes——

Mr. HUTTO. It would not be equal authority.

Mr. BONKER. Well, let me tell you, in the licensing program, they all believe they have equal authority.

The CHAIRMAN. The time of the gentleman from Washington [Mr. BONKER] has again expired.

(On request of Mr. MICA, and by unanimous consent, Mr. BONKER was allowed to proceed for 30 additional seconds.)

Mr. MICA. Mr. Chairman, if the gentleman will yield, I would like to say that I support the position of the gentleman from Washington [Mr. BONKER]. I commend the gentleman and say that the committee urges a no vote on the Hutto amendment.

Mr. BONKER. Mr. Chairman, I thank the chairman of the subcommittee, and I will take a little time to conclude my statement.

The CHAIRMAN. The time of the gentleman from Washington [Mr. BONKER] has again expired.

(By unanimous consent, Mr. BONKER was allowed to proceed for 2 additional minutes.)

Mr. BONKER. Mr. Chairman, the U.S. State Department had a very distinguished public servant who served as director of the Office of East-West Trade for many years, and he has written a letter to me as the principal sponsor of section 127 in support of my efforts to ensure that the State Department maintains its exclusive representation of the United States at Cocom. I will quote briefly from the letter. I will first, Mr. Chairman, include the full text of the letter with my remarks, as follows:

KENSINGTON, MD, *May 9, 1985.*

Hon. DON BONKER,
Chairman, Subcommittee on International Economic Policy and Trade, Committee on Foreign Affairs, Washington, DC.

DEAR MR. CHAIRMAN: I believe you are on the right track in insisting on State financing of COCOM and on a U.S. Delegation to COCOM staffed by State personnel.

The need for more money for the international COCOM secretariat was (and is) minimal. Starting in 1981 and 1982, Defense pressed money on State for COCOM improvements, i.e., several years before any decision State might have made in 1985 concerning the assignment of DoD personnel to the U.S. Delegation. State was, naturally receptive to obtaining money. But there was no serious unfunded COCOM requirement.

The modernization of Secretariat equipment was proceeding without Defense funding. The justification for other improvements in Secretariat furnishings and space (which, as you know, were never in the basement) was largely cosmetic. New drapes will not speed processing of cases.

The Defense-funded communication link between Paris and Washington is a negative, rather than a positive, factor. Defense insisted on a separate channel between the offices of the U.S. Delegation and the Pentagon so that DoD members of Washington Teams in Paris could communicate directly with DoD officials in Washington. This parallels the official U.S. Government link between the Paris Embassy and Washington, which is substantially as fast for Defense purposes because there is electronic transmission from the Embassy to the Pentagon. The separate DoD link therefore increases the risk of uncoordinated instructions without improving transmission times for coordinated messages.

COCOM problems are a function of inadequacies in national delegations, not in the Secretariat. Difficulties are experienced in reaching agreements not only between these delegations but also within national governments, particularly within the U.S. Government.

Assigning Defense personnel to the U.S. Delegation in Paris will not help. This has been considered many times before but has, previously, been rejected on the grounds that decisions are made in Washington and there would be little, if anything, which a Defense person could do constructively in Paris. It is virtually certain that Defense would not permit such a person to speak for Defense on issues for which DoD in Washington had not already reached a clear position.

The State personnel assigned to the U.S. Delegation in Paris have conscientiously carried out instructions from Washington. Occasional DoD complaints about uncoordinated actions have arisen because of the content of instructions from the State Department in Washington, not because of free-wheeling by the U.S. Delegation in Paris.

Under these circumstances, it is difficult to see any purpose for the assignment of Defense personnel to the U.S. Delegation in Paris other than a desire by Defense to position itself to take over some of State's statutory responsibility to conduct negotiations with other countries regarding their cooperation in restricting exports for security reasons.

If you have any questions on these matters which I might be able to answer, please feel free to call me.

Sincerely yours,

WILLIAM A. ROOT.

Mr. Chairman, Mr. Root has made reference to the fact that the Defense Department has influenced policy decisions beyond what Congress intended, which is the reason why Mr. Root resigned in protest, in the first place.

Second, he said that the modernization of the program there is a justification for DOD to increase its impact on those policy decisions, and said that the improvements are merely cosmetic. He says, "New drapes will not speed processing of cases."

Indeed I would make that point that if you want to improve the turnaround time and expedite licensing at Cocom, you are not going to achieve that goal by setting up the DOD permanent staff there.

In conclusion, Mr. Root in his letter to me stated this:

Under these circumstances, it is difficult to see any purpose for the assignment of Defense personnel to the U.S. Delegation in Paris other than a desire by Defense to position itself to take over some of State's statutory responsibility to conduct negotiations with other countries regarding their cooperation in restricting exports for security reasons.

Mr. Chairman, if we are going to reduce our trade deficit, we have to allow our high-tech industries, which are competitive now in global economy, to compete equally with other countries, and I think we can help achieve that goal by defeating the Hutto amendment.

Mr. ZSCHAU. Mr. Chairman, I move to strike the requisite number of words. I rise in opposition to the amendment.

Mr. Chairman, this has been an excellent debate about the issue of who should represent the United States in Cocom. This debate is a continuation of the debate that we had over the past 2½ years, because the whole export licensing procedure was discussed in depth when the House and the other body considered the Export Administration Act.

As the gentleman from Minnesota has indicated, the Hutto amendment, even though it seems rather innocuous, is, by what it deletes from section 127, against and contrary to the spirit of the Export Administration Act that was passed here in the House on April 16 and which was so carefully crafted.

Mr. FRENZEL. Mr. Chairman, will the gentleman yield briefly?

Mr. ZSCHAU. I am happy to yield to the gentleman from Minnesota.

Mr. FRENZEL. Mr. Chairman, I would like to respond—because I could not in the presentation by the gentleman from Florida—by agreeing with the gentleman from California. I do not have objection to the language of the gentleman's amendment. I have strong objections to deleting the language it strikes from the committee bill.

Mr. HUTTO. Mr. Chairman, will the gentleman yield?

Mr. ZSCHAU. I yield to the gentleman from Florida.

Mr. HUTTO. Mr. Chairman, if I may, I would like to ask the gentleman from Minnesota, is it the first part or the second part of section 127 that I delete that the gentleman objects to?

Mr. FRENZEL. Well, I prefer the committee language as it stands in section 127, but as between (a) and (b), I do not have a particular preference.

Mr. HUTTO. (a) would be, of course, the upgrading of facilities there, and I think the gentleman would want that. The other part leaves it in the hands of the Secretary of State.

Mr. Chairman, I thank the gentleman for yielding.

Mr. ZSCHAU. Mr. Chairman, the Export Administration Act, after extensive negotiation, was written specifically to not provide increased authority for the Department of Defense in the licensing of West-West trade. However, shortly thereafter the Department of Defense announced that it would be sending its own representatives to Cocom.

Within the current authorized procedures, the Department of Defense and other agencies are involved in the licensing process, but that involvement occurs here in the United States. When decisions are made here, they are transmitted to Cocom. It is my feeling that we should speak with one voice, and one voice only, in international fora such as Cocom. Otherwise, the problem which the gentleman from Minnesota has suggested might occur—that is, shopping around for more favorable decisions would probably occur.

□ 1330

I believe we should speak with one voice at Cocom. However, that one voice in Paris needs to be assisted from time to time. Under the current system and under section 127, temporary advisers and consultants from a variety of departments could still be provided. If the Hutto amendment is defeated, this assistance and support from other departments could still be provided while the permanent delegation would be from the Department of State.

Exporters who have to deal with the export control procedures have been concerned about the impact of this amendment. The Private Sector Advisory Committee to the Department of Commerce has written to the Secretary of Commerce opposing this particular proposal. It would seem to me that at a time when we have enormous trade deficits that are impacting the industrial structure of this country, we should be very concerned about avoiding any actions that would make it more difficult by delays, more paperwork, or confusion for our exporters to export.

The author of the amendment has pointed out that it would permit the Department of Defense to spend $2 million in the upgrading of the U.S. facilities at Cocom. I support the upgrading of the facilities, but frankly it seems to me that it is the Department of State that has responsibility for this and should be doing the upgrading. It is only because the Department of Defense is able to get a lot more money than the other departments that they have the funds available to do this.

Mr. HUTTO. Mr. Chairman, would the gentleman yield on that point?

Mr. ZSCHAU. I would be happy to yield to the gentleman.

Mr. HUTTO. Mr. Chairman, does the gentleman know of any dispute between the Department of State and DOD about the funding, about the Congress funding the money?

Mr. ZSCHAU. No. As a matter of fact, the Department of State, since it was unable to get its own funds, would welcome additional funds.

Mr. HUTTO. In fact, they requested them.

Mr. ZSCHAU. But it seems to me that the Department of Defense, just because it has a lot of money, should not be permitted to buy its way into increased authority and responsibility throughout the rest of the Government.

The CHAIRMAN. The time of the gentleman from California has expired.

(By unanimous consent, Mr. ZSCHAU was allowed to proceed for 1 additional minute.)

Mr. ZSCHAU. In conclusion, Mr. Chairman, let me say that this amendment goes counter to the spirit of the Export Administration Act. It would blur the lines of responsibility. It could result in delays in the licensing process that could hurt exports. I frankly feel that even though the Department of Defense has funds to spend on a variety of projects, that those projects should be focused on defense responsibilities, rather than enabling the Department of Defense to buy its way into increased authority.

Mr. LAGOMARSINO. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I will not take the 5 minutes.

Mr. Chairman, I am advised that the municipal authorities in Paris have condemned the building in which Cocom operates, so they have to find a new one.

The statement has been made by some that the changes that would be made with the $2 million are cosmetic. I would like to read what the $2 million would be used for:

Equipment for Cocom Secretariat, two Wang work stations, one paper feeder.

Cocom building architectural study performed by State Department contract architects.

Purchase of minicomputer system for the Cocom Secretariat.

Development of custom software system for automation of Cocom case processing and less review management.

I would only repeat what I said earlier and that is that the complaints I get about Cocom are that people do not get answers right away. Let us speed up the process. It sounds to me like we are going in the right direction.

Mr. BONKER. Mr. Chairman, will the gentleman yield?

Mr. LAGOMARSINO. I yield to the gentleman from Washington.

Mr. BONKER. Mr. Chairman, if the municipality has condemned the building, I think this committee would be more than happy to provide funds to the State Department for upgrading. Meanwhile, DOD ought to use the money we give it to meet our defense needs.

Mr. LAGOMARSINO. Mr. Chairman, I am sorry, I did not hear what the gentleman said. What was the gentleman's last statement, to do what?

Mr. BONKER. The money this Congress grants to the Department of Defense ought to be used for weapons systems, for carrying out our defense needs. Cocom is properly a matter for the State Department and this authorizing committee.

Mr. LAGOMARSINO. Well, it just seems to me that it does not do much good to authorize defense systems and arms systems if we are going to be giving the Soviets the technology to counter the systems we have.

Mr. SOLOMON. Mr. Chairman, will the gentleman yield?

Mr. LAGOMARSINO. I yield to the gentleman from New York.

Mr. SOLOMON. Mr. Chairman, just standing here listening to the debate, I have already spoken in favor of the Hutto amendment and I urge everybody on both sides of the aisle to support it; but I have heard several speakers claim that the Defense Departmetn is trying to horn in on the Cocum jurisdiction and that is not so. It is Members of this House like me who want the Defense Department to have a say in how much high technology we allow to be sold, given away or stolen and since the State Department does not always have the expertise in these matters, we need to have the Defense Department input when it comes to the national security of the country.

Mr. AUCOIN. Mr. Chairman, I rise in opposition to the amendment which would allow the Defense Department to pay for improved Cocom facilities and have permanent Cocom representatives. The gentleman's amendment is ill-advised on two counts.

First, it would permit the Defense Department to go ahead with its plans to transfer $2 million of its own funds to expand the Cocom building without congressional consent.

Second, it would increase the Defense Department's influence over export control policy even when it doesn't make sense to do so. No other Cocom nation has military personnel assigned to its delegation. The Defense Department already has a heavy hand in export licensing both at Cocom and here at home. The committee bill does not change that.

This amendment must be defeated to block what amounts to an unauthorized attempt by the Defense Department to dominate the export control process. We must continue to speak with one voice and to our allies at Cocom and resist any moves that could muddle our message to the detriment of both U.S. exports and national security. I urge you to reject the Hutto amendment and support the committee bill.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Florida [Mr. HUTTO].

The question was taken; and the Chairman announced that the noes appeared to have it.

Mr. SOLOMON. Mr. Chairman, I demand a recorded vote, and pending that, I make the point of order that a quorum is not present.

The CHAIRMAN. Evidently a quorum is not present. Pursuant to the provisions of clause 2, rule XXIII, the Chair announces that he will reduce to a minimum of 5 minutes the period of time within which a vote by electronic device, if ordered, will be taken on the pending question following the quorum call. Members will record their presence by electronic device.

The call was taken by electronic device.

The following Members responded to their names:

The CHAIRMAN pro tempore (Mr. DURBIN). Four hundred nine Members have answered to their names, a quorum is present, and the Committee will resume its business.

RECORDED VOTE

The CHAIRMAN pro tempore. The pending business is the demand of the gentleman from New York [Mr. SOLOMON] for a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 196, noes 222, not voting 16, as follows:

Messrs. PARRIS, LIGHTFOOT, ECKART of Ohio, and FISH changed their votes from "aye" to "no."

Mr. OXLEY changed his vote from "no" to "aye."

So the amendment was rejected.

The result of the vote was announced as above recorded.

AMENDMENT OFFERED BY MR. BROOMFIELD

Mr. BROOMFIELD. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. BROOMFIELD: On page 28, after line 25, add the following section:

SEC. . Sense of the Congress in response to the murder by the Soviet Union of Major Arthur D. Nicholson, Jr.

It is the sense of the Congress that the Soviet Union's chief of mission to the United States should be declared persona non grata beginning on June 1, 1985, until

the President certifies to the Congress that the Soviet Union has made a formal apology for the murder of Major Arthur D. Nicholson, Jr., unless the President certifies to the Congress that an apology has been made by the Soviet Union before June 1, 1985.

Mr. BROOMFIELD. Mr. Chairman, I offer this sense of Congress amendment calling for action against the Soviet Chief of Mission. It's time to get tough with the Kremlin over the tragic murder of Major Nicholson. Once again, the Soviets shot first and asked questions later. Let's send a clear signal to the Kremlin leaders showing our outrage over this tragic murder of an innocent man.

The Soviets murdered Maj. Arthur D. Nicholson, Jr., in cold blood. They refused to let his companion, an Army sergeant, administer first aid. The murder was a clear violation of the 1947 accords governing the treatment of Soviet and U.S. military personnel in East Germany.

The murder was also a clear violation of the rules of fair play. It undermined the spirit of confidence and trust which the United States and the Soviet Union are trying to foster.

While the Soviets agreed to reject the use of force in future incidents when they met with U.S. negotiators, they later refuted the U.S. claim that they would not resort to force against U.S. military personnel in future incidents. They have yet to apologize for their barbaric and senseless action.

How can our Nation ever trust a country which takes a human life with an almost cavalier attitude? How can we expect the Soviets to honor solemn arms control accords if they violate basic agreements regarding military personnel?

If the Soviet Union has not made a formal apology to the United States by June 1, 1985, this amendment calls for the Soviet Chief of Mission to be declared persona non grata and sent packing back to the Soviet Union.

This, my friends, is serious business. I believe that something must be done to show our country's outrage at the mindless murder of Major Nicholson. I call upon all of you to support this important effort.

Mr. WEISS. Mr. Chairman, will the gentleman yield?

Mr. BROOMFIELD. No.

Mr. WEISS. The gentleman will not yield?

The CHAIRMAN. The time of the gentleman from Michigan [Mr. BROOMFIELD] has expired.

Mr. WEISS. Mr. Chairman, I move to strike the last word.

The CHAIRMAN. The gentleman from New York [Mr. WEISS] is recognized for 5 minutes.

Mr. WEISS. Mr. Chairman, I had wanted the gentleman to yield so that I could ask him whether he had checked this matter out with either the White House or the Secretary of State, because what he is suggesting is an extremely serious matter.

As the ranking member of the House Foreign Affairs Committee, I would assume that he would not be offering a resolution wherein he asks the House of Representatives to go on record in favor, in essence, of almost breaking off diplomatic relations with the Soviet Union without at least having checked with the White House or the Secretary of State.

Pending that kind of explanation, I would hope that we would vote this amendment down. It is extremely important and destructive without that kind of information.

Mr. RUDD. Will the gentleman yield?

Mr. WEISS. I would be pleased to yield to my friend.

Mr. RUDD. I thank my friend for yielding to me. I only have a question that has come up two or three times during the course of this bill, as to the reason why the Congress should check with the State Department before placing amendments in on a bill. I do not know whether we are answerable to them or not.

Mr. WEISS. If I may, I have heard Members, especially on the gentleman's side of the aisle, repeatedly over the course of recent weeks and months, take matters of broad policy, not matters of executive branch privilege but matters of broad national policy, and suggest that the House ought to allow the administration, the executive branch of Government, to have a total free reign.

□ 1410

And I think that is wrong. But certainly in matters which are in the purview of the executive branch, for this House to be asked to take action, without even so much as asking the President or the Secretary of State as to what their position, is, whether they believe this would be helpful or damaging to the national security interest of the United States, I think is so terribly irresponsible that I would hope that the gentleman from Michigan would see the wisdom of not asking the House to do that at this point.

Mr. RUDD. I thank the gentleman for his explanation, and I can understand that we should certainly confer with the President of the United States, who was elected by the people to be our leader, but I do not understand about the State Department, which does not always agree with the leadership at all.

Mr. WEISS. Does the gentleman know if in fact the President was asked about this amendment?

Mr. RUDD. If the gentleman will yield, I really would like to thank the gentleman for his expanation, and I thank him for yielding.

Mr. GINGRICH. Mr. Chairman, will the gentleman yield?

Mr. WEISS. I yield to the gentleman from Georgia.

Mr. GINGRICH. I just want to ask the gentleman, because he went through this same cycle the other day when I offered an amendment, when the gentleman offered a resolution to impeach the President of the United States, the current President, the same one who appoints the State Department, did the gentleman clear it with the State Department?

Mr. WEISS. If I may take my time back at that point, the gentleman knows full well that the offering of a resolution of impeachment is in fact within the absolute purview of the House of Representatives. There is nothing in it to be left to the executive branch. This matter however is one which is in the purview of the executive branch of government. To move forward, even if it were not a President of your own party, but to move forward with a President of your own party in the White House, and to undertake an action which he may consider to be damaging to the national security of the United States is just beyond my comprehension. I cannot think of anything more irresponsible than such an action.

Mr. ARMEY. Mr. Chairman, will the gentleman yield?

Mr. WEISS. I yield to the gentleman from Texas.

Mr. ARMEY. I cannot quite understand the gentleman's argument, since indeed we would not by this resolution actually declare the gentleman from the Soviet Union personna non grata but express our congressional point of view that the President or the State Department ought to take that action. We are only extending our opinion, not asking for his.

Mr. WEISS. If the gentleman will permit me to take back my time, this House has already adopted a resolution by unanimous vote, in fact, expressing the outrage of the House at the action regarding Major Nicholson. Now, what this amendment seeks to do is to become involved in the execution of foreign policy, and I think that before you undertake such a step the very least you would want to do is to check with the President and with the Secretary of State.

Mr. SOLOMON. Mr. Chairman, will the gentleman yield?

Mr. WEISS. I would be pleased to yield to my friend, the gentleman from New York.

Mr. SOLOMON. The gentleman just spoke about my resolution which was unanimously adopted by this House, condemning the Soviet Union.

I am corrected to say that two Members voted "no." But besides that——

Mr. WEISS. OK, all but unanimous, with two Members voting "no."

Mr. SOLOMON. If the gentleman will continue to yield, I will not argue over who voted how.

Mr. WEISS. I would be pleased to yield to the gentleman.

Mr. SOLOMON. But the problem was that 2 weeks after——

The CHAIRMAN. The time of the gentleman from New York [Mr. WEISS] has expired.

Mr. SOLOMON. Mr. Chairman, I ask unanimous consent that the gentleman from New York [Mr. WEISS] be allowed to proceed for 2 additional minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

Mr. MICA. Mr. Chairman, reserving the right to object, the gentlewoman from Maine and the gentleman have discussed this continuing situation in which we are drawing out these discussions over more and more time. We have agreed that from this point forward, without any prejudice to the Members speaking, we would both encourage the Members try to move on with the business, and will object to further such requests.

I will make a comment about this particular resolution, but by agreement with the majority and the minority we are going to try to maintain the schedule that we have laid out to the leadership, both the majority and the minority, and we will be objecting from this point forward.

Mr. Chairman, I object.

The CHAIRMAN. Objection is heard.

Mr. MICA. Mr. Chairman, I rise in support of the amendment.

I say that with some regret.

This particular amendment, the language of which was not worked out with the ranking minority or majority member of the committee, but was presented to us without notice, creates some concerns. The amendment is a sense of Congress resolution. We still have an opportunity to go to conference to work on the language. It is, if you will, a recommendation from the minority party to their President. It is a recommendation only as a sense of Congress.

We had a recorded vote on the issue that all but two Members supported. I think it would be very difficult for Members to oppose it, but I do also understand some concerns with the wording.

I would yield to our ranking minority member to make whatever comments she might wish.

Ms. SNOWE. I thank the gentleman for yielding, and I rise in support of the resolution before us. On many occasions we do pass resolutions here expressing the sense of Congress on a number of issues, and in this case we are expressing our outrage with respect to the fact that the Soviet Union has failed to apologize for what was a reprehensible act.

Mr. FASCELL. Mr. Chairman, will the gentleman yield?

Mr. MICA. I yield to the distinguished chairman of the Committee on Foreign Affairs.

Mr. FASCELL. I thank the gentleman for yielding.

I understand the position of the gentleman from Florida [Mr. MICA] and the ranking minority member. We have to remember that in our anxiety to make a declaration that we seek to make in this resolution that we also have an ambassador in Moscow. This is a matter that we are going to have to seriously consider before the final outcome of this legislation, as to what our representation in the Soviet Union will be if we persist in this course of action. So, while I understand what the committee is trying to do, I think we need to take that part of the equation into very careful consideration.

Mr. MICA. We do understand that, and that is why we have made the point that this is simply a sense of the Congress resolution, a recomendation, not a requirement.

Mr. SOLOMON. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I know we all have to keep rational minds on this issue. But as I started to say before, this House did pass a unanimous resolution, or minus 2 votes, condemning the Soviet Union for the barbarous murder of Major Nicholson, and 2 weeks later the official Soviet newspaper, Tass, reported that the Soviet Politburo had no intention of apologizing to this country, no intention to apologize to the family of Major Nicholson, and certainly no intention to make any kind of monetary settlement for the family. And I think that is more of a outrage than just our condemnation of 2 weeks ago. I think that this House ought to pass this resolution. I do not think it ought to be a question of debate. I think it ought to be unanimously accepted and done so right now.

Mr. WALKER. Mr. Chairman, will the gentleman yield?

Mr. SOLOMON. I yield to the gentleman from Pennsylvania.

Mr. WALKER. I thank the gentleman for yielding.

Mr. Chairman, the statement was made here a few minutes ago that the action that is proposed in the sense of the Congress resolution is a very serious action. And indeed it is. Indeed it is. But I think that what we have got to understand here is, what the Soviet Union did against Major Nicholson was a very serious act, too. They murdered an American military soldier who was doing his duty in accordance with the agreements that we had with the Soviet Union. They murdered him in cold blood.

I cannot imagine there is a more serious kind of action that can be taken than that one. That is what took place. That is what we are complaining about. It does not seem to me that what we are proposing is anywhere near as serious as the action that the Soviet Union has already engaged in.

So I think the gentleman is absolutely right. I think the question in my mind is: How long do we go on in this Congress memorializing the Soviet Union to do certain things that they can laugh in our face about. Is it not about time that we pass something around here that has some teeth in it? And this particular action with regard to the Major Nicholson murder has a little bit of teeth in it, and no wonder we hear some people complaining. But it is about time, it seems to me, to pass that kind of resolution.

Mr. RUDD. Mr. Chairman, will the gentleman yield?

Mr. SOLOMON. I yield to the gentleman from Arizona.

Mr. RUDD. This is a very serious matter, and I am very concerned about it. I intend to support the resolution. But I think we ought to consider that there could be some problems attached to it from the standpoint of the chief of mission here from the Soviet Union, who has been here for 30 years, and it might be he might refuse to go home if he were called home. So I would like to just point that out, because it is a serious consideration which would cause an incident.

Mr. SOLOMON. The gentleman makes an excellent point.

Mr. GONZALEZ. Mr. Chairman, I move to strike the requisite number of words.

I know you are groaning, Mr. Chairman, but you should have heard my grown when you signified you were going to accept this rather derogatory amendment to the integrity of the House of Representatives. I think this whole procedure stinks, literally, and I want to rise in support of everything that the distinguished Member from New York, Mr. TED WEISS, has said.

Let me expain why.

□ 1420

If these gentlemen really want to send a message to Russia, as they say, then submit a resolution declaring war. Why do you not do that? That is really sending a message to Russia; that would really be a message.

What you are trying to do here is bring the ridicule of the knowledgeable world and every single parliamentary body in the world; that is all you are doing. Now, of course, it can be used as a test to show patriotism; great indignation; great hatred of communism; that is fine. But I think it is illusory; I think it is self-delusion.

I think, above all, it reflects on our capability as legislators. It reflects on our misunderstanding of the rightful constitutional prerogatives, with limi-

tations and all, that are placed on this first branch of the Government, the policymaking or the legislative.

Certainly Mr. WEISS was correct in asking the question where the House is making an incursion into that thicket of the second branch of Government, the executive branch, to at least inquire of the President and his Secretary of State, if the sense of Congress as expressed in the House's resolution, is in conformity with the over-arching policy of this administration.

Nobody doubts for a minute that President Reagan is anti-Russian and has spoken his unutterable indignation at the murder of the American soldier. But the real issue is deeper than that, my friends. Just like in the case of the downing of the Korean airliner, the headline the day before yesterday or rather the front page story was that the United States and Russia were once again trying to see how they could sanction international flights between the United States and Russia and vice versa, which the President, in the sense of an embargo, suspended, and which was the direct reason and the underlying cause for the knocking down of the Korean flight.

If you think that this tension that has been excited, particularly since the President has brought up a "psychosis of war" against Russia, wait until you see what is apt to happen over this narrow corridor and its approach in Berlin. There is your real issue. Tensions have mounted; the Russians are just as fearful as we would be if we were to be in a reverse situation.

I think that rather than approaching the focal problem with a focal solution; rather than pantomiming and parading and prancing to the ridicule of the world, our great indignation at this outrageous act on the part of Soviet soldiery. I certainly do not favor this; I am shocked that the chairman of the subcommittee would accept this sense of Congress resolution. I am really shocked.

I again say that instead of saying what Mr. WEISS said, that he hoped that it would not be considered, I say that I would appeal to the author and the ranking minority member of the committee to withdraw this resolution, and let us have a chance to soberly, calmly, dispassionately consider the issue.

Mr. MICA. Mr. Chairman, will the gentleman yield?

Mr. GONZALEZ. I yield to the gentleman.

Mr. MICA. I thank the gentleman.

I would just like to say that, as the manager of this bill, I made a judgment as to how a vote on this issue would turn out. It appears there will not be a vote. In the judgment of this chairman, the vote will be overwhelmingly in support of this amendment as worded.

The chairman had intended that we look at this language in conference and try to work this out with the ranking minority member.

Mr. CROCKETT. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I want to identify with the comments just made by my colleague from New York [Mr. WEISS] and my colleague from Texas [Mr. GONZALEZ].

I think we should face up to the fact that the only thing that distinguishes our present relations with the Soviet Union from an actual state of war is the fact that we are not actually shooting bullets at each other. Once we realize that, we can appreciate the fact that when a member of the Armed Forces of the United States is found trespassing upon restricted territory occupied by the armed forces of the Soviet Union, you can expect that person to be treated essentially as he or she would be treated during a state of war. Particularly when it appears that he or she is engaged in photographing objects that have been prohibited from being photographed by the forces of the Soviet Union. You can expect that extreme measures will be taken.

I voted against the resolution condemning the Soviet Union, not because I approve of the actual killing of a member of the American Armed Forces, but because I was not satisfied that this House had before it all of the facts connected with the case. The State Department, at the time we passed that resolution, was still engaged in discussions with the Soviet Union about that incident. I felt that it was undiplomatic, that it was an interference with the carrying on of foreign policy by the State Department for us to pass that resolution. That explains why I voted against it.

Mr. SOLOMON. Mr. Chairman, will the gentleman yield?

Mr. CROCKETT. I yield to the gentleman.

Mr. SOLOMON. I thank the gentleman.

You are entitled to your opinion, and I do respect your right to your opinion, even though I do not agree with it, but it has to be made perfectly clear that Major Nicholson was not trespassing; Major Nicholson was acting under the accords of the 1947 agreements in which we and they are allowed to take photographs in unrestricted areas and this was, by the Soviets' own admission, an unrestricted area.

Further, he was unarmed, as all of our men are, military personnel traveling under those accords. The Russians knew he was unarmed and after shooting him, they let him lay there for 1 hour. They prevented Sergeant Shatz from administering vital first aid to him to prevent him from dying, and they murdered him in cold blood. We ought to have that perfectly clear.

The gentleman is entitled to his opinion, but he is not entitled to stand here and say that Major Nicholson was trespassing and was doing something against the law in the Soviet Union, because even the Soviet Union says he was not.

Mr. CROCKETT. That is the gentleman's understanding of the facts. My understandings are to the contrary.

Thank you.

Mr. McHUGH. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I had not intended to speak on this issue, and I know Members are anxious to bring it to a vote. But our friend from Florida, the manager of the bill, indicated, probably correctly, that we would have a record vote on this issue, and for that reason, I think it is important to state for the record that those of us who vote against this sense-of-Congress provision in no way intend to suggest that what the Soviet Union did is tolerable or in any way acceptable.

I voted for the resolution condemning the Soviet action because, in my judgment, based upon the facts that we have, there was no justification whatsoever for the shooting of Major Nicholson.

However, the issue before us is not whether or not that action was in any way justifiable or indeed, whether it is deplorable, which it is; the issue is whether, as a matter of policy, the executive branch of our Government should, in effect, terminate diplomatic relations or suggest the termination of diplomatic relations over the incident. In my judgment, that would be wholly disproportionate to the act which took place.

If anyone here votes against this resolution on that basis, it should not be interpreted as a vote in favor of the Soviet action or in any way an implication that what the Soviets did was acceptable or not a serious act. It was, but this policy, as reflected in the resolution offered here is wholly disproportionate to that act.

□ 1430

Mr. SEIBERLING. Mr. Chairman, will the gentleman yield?

Mr. McHUGH. I would be happy to yield to the gentleman from Ohio.

Mr. SEIBERLING. I thank the gentleman for yielding.

Mr. Chairman, I think the gentleman has made a very fine statement, and also the gentleman from Texas [Mr. GONZALEZ] and the gentleman from Michigan [Mr. CROCKETT].

Let me just say this: For 2 years now Members of the House and Senate, over 100 of them, have been attending a monthly series of discussions on U.S.-U.S.S.R. relations—bipartisan sponsorship, all points of view repre-

sented, expert speakers from the United States mainly, although occasionally a Soviet point of view presented by one of their officials.

If there is one thing we have learned from that, it is that the Soviets, above everything else, want respect as a great power, which indeed they are, whether we like all their policies or not, and of course we do not. To make a deliberate slap at the Soviet Union will be counterproductive to the efforts the President himself is trying to make to reach a modus vivendi on nuclear weapons and other important issues. Just yesterday he spoke at Strasbourg and advocated four important steps to try to avoid exacerbating the bad state of relations.

I tell the Members who think they are going to use this kind of amendment for political reasons and try to put Members on this side of the aisle who are acting responsibly in a hole by this kind of thing; they are playing with dangerous fire; they are undermining the foreign policy of the President of the United States; they are going to label themselves a war party at the rate they are going. I suggest to them and their colleagues that they better stop and think and work these things out on a sensible basis without going off the deep end, before they even have any idea of what the consequences are—and I have just outlined what I think they will be in this case.

Mr. McHUGH. I thank the gentleman for his comments.

Let me make clear once again that I do think it was appropriate for us to adopt the resolution condemning the act of the Soviet Union in the case of our serviceman who was shot, but I think it would be wholly irresponsible to suggest that as a result of that act, as serious as it was, we should terminate our diplomatic relations with the Soviet Union.

Mr. GINGRICH. We are not doing that.

Mr. McHUGH. Or take an act which will be interpreted in that way. We are two superpowers. We have enormously important issues to deal with which transcend this particular incident, as significant as it was in itself, and therefore I think it would be wrong to suggest that taking the step of withdrawing our Ambassador is proportionate to that event.

In any event, my purpose in speaking was simply to indicate that anyone who votes on the record against this particular resolution is in no way sanctioning what the Soviets have done.

Mr. GINGRICH. Mr. Chairman, will the gentleman yield?

Mr. McHUGH. I will be happy to yield to the gentleman from Georgia.

Mr. GINGRICH. I thank the gentleman for yielding.

Mr. Chairman, I just want to make the point that this resolution in no way terminates relations. It singles out the single most important ambassador the Soviet Union has, the person who is the most important single pawn they have on the planet outside the Soviet Union.

Mr. GINGRICH. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I want to continue my point to the distinguished gentleman from New York. The central problem the Western World has is in dealing with the Soviet system which, after shooting down an airliner, rewards and promotes the man who shot it down, which after killing an American major specifically refuses to take responsibility, and the reason, frankly, that many on this side of the aisle think this is a legitimate expression of concern is to say to the Soviet Union we can respond in a very narrow and precise way involving one personality, the personality you most value, the personality you have the highest level of investment in, the personality with the widest range of networking in the Western World, the personality who you will suffer the most if that person has to leave America.

If it is so important to the Soviet Union that they not accept the moral responsibility for killing an American major, if it is so important to the Soviet Union that they not under any circumstance admit that what they did in killing an American soldier was wrong, that they would accept that loss, then the world needs to understand the kind of system they have.

It is not just that they accidentally happened to kill an American officer. It is not just that they happened to accidentally shoot down a Korean airliner. It is the systematic decisions at the top of the Soviet system to reject any civilized behavior when a wrong of this nature has been done.

It is clear that in conference, as the distinguished gentleman from Florida said, this can be made more sophisticated, it can be made more appropriate, that ways are there to apply pressure, but I would say to everybody before they vote, the Soviet Union and its allies have learned to watch this Congress; that the gentleman who is the distinguished representative of the Soviet Union in this city, if he sees a decisive vote by this House saying, "If your government does not apologize, quite candidly, we are willing for you to leave," I suspect that he will this evening have a much deeper sense of the long-term willingness of our society to find new and relatively sophisticated methods of dealing with them.

I am not sure of the exact figures, and I do not know if the gentleman from Michigan has them, but my guess would be that between the United Nations mission, the consulate in San Francisco, the other members of the Soviet delegation here in Washington, there would be literally hundreds of Soviet representatives still in the United States, and I yield to the gentleman from Michigan for confirmation of that.

Mr. BROOMFIELD. It is several thousand in fact. The gentleman is very, very low in numbers. There are several thousand involved.

Mr. GINGRICH. In other words, the point I make to the body is that we would still have diplomatic relations, we would not have closed the consulate in San Francisco, as someone suggested, but we would have in a very narrow way focused attention on the most important asset the Soviet Union has in the United States.

Mr. KASICH. Mr. Chairman, will the gentleman yield?

Mr. GINGRICH. I yield to the gentleman from Ohio.

Mr. KASICH. I thank the gentleman for yielding.

Mr. Chairman, I would like to relate to the House that I had the good fortune of having Anatoly Shcharansky's wife fly from Israel to the United States to hold a press conference on the steps of this Capitol because she says it does make a difference what the U.S. House of Representatives says about Soviet action.

She pleaded with me to get as many Members of Congress as possible down there because it would send a strong signal, because the Soviets, in fact, do listen to the Congress of the United States. The gentleman from Georgia, Mr. GINGRICH, is only trying to say here today that this sends a clear signal to the Soviet Union about our feelings about the killings of that major and the concern about his family.

We should do it. We should not only do it because it is our judgment, but it is the judgment of a woman whose husband still sits in a Soviet prison who has the hope that this House will speak loud and clear to the Soviet Union and we ought to do it in this circumstance.

Mr. GINGRICH. Let me make one more point and then I will yield to the gentleman from New York.

Mr. Chairman, somebody over here got up and said, "Well, why do you not just declare war?" I would suggest to Members that this resolution, this proposal, this amendment, precisely lays out the question.

If the only choices America has are absolute impotence or war, then we are indeed in a terribly risky world. Instead, we are offering a very specific diplomatic action which they have several weeks to avoid having happen but which says to the Soviets that we in this body can learn to raise diplomatic stakes also.

Mr. WEISS. Mr. Chairman, will the gentleman yield?

Mr. GINGRICH. I yield to the gentleman from New York.

Mr. WEISS. I thank the gentleman for yielding to me.

Mr. Chairman, the gentleman is a very sophisticated practitioner of political science and he understands full well that if the Soviet Union's national legislative body were to adopt a resolution, that unless the United States apologized for a certain act which they considered to be insulting to them, they would have our Ambassador considered personna non grata, the gentleman would consider that kind of ultimatum to be unacceptable. Indeed every Member of this body would rightfully resent it. Why should we expect the Russians to react differently than we would?

The CHAIRMAN. The question is on the amendment offered by the gentleman from Michigan [Mr. BROOMFIELD].

The question was taken; and the Chairman announced that the ayes appeared to have it.

RECORDED VOTE

Mr. WEISS. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 322, noes 93, answered "present" 1, not voting 18, as follows:

[Roll No. 105]

□ 1450

Messrs. GARCIA, GRAY of Pennsylvania, WOLPE, BOLAND, CONTE, DELLUMS, DICKS, KLEZCKA, and BONKER changed their votes from "aye" to "no."

Mr. SCHUMER changed his vote from "no" to "aye."

So the amendment was agreed to.

The result of the vote was announced as above recorded.

□ 1500

(By unanimous consent Mr. MITCHELL was allowed to speak out of order.)

RUNS ON DEPOSITS ON BALTIMORE SAVINGS & LOAN

Mr. MITCHELL. Mr. Chairman, I thank my colleagues on both sides of the aisle for allowing me this privilege.

Today I understand that some people are lined up outside the doors of a savings and loan in my city of Baltimore requesting a return on their deposits. I also understand that there are so-called solid runs on several other State-chartered savings and loans in my State of Maryland.

The institutions on which these runs are taking place are State-chartered institutions and are insured by the Maryland State Insurance Fund.

I wish to state to you, Mr. Chairman, and Members of the House, and to my fellow citizens in Maryland that I, along with other members of the Maryland delegation, Congresswoman MIKULSKI, Congressman HOYER, and all of us have been in touch with all of the necessary Federal agencies to make sure they are aware of the situation and are prepared to offer whatever assistance they can, whatever assistance that is necessary and appropriate.

Several of these institutions have applied for Federal insurance through the Federal Savings and Loan Insurance Corporation. I want to make it very clear that is why I took this time.

The CHAIRMAN. The time of the gentleman from Maryland [Mr. MITCHELL] has expired.

(On request of Mr. HOYER, and by unanimous consent, Mr. MITCHELL was allowed to proceed for 1 additional minute.)

Mr. MITCHELL. I was saying that some of these institutions have applied for the Federal Savings and Loan Insurance Corporation. In order to obtain that Federal insurance they will have to comply with the necessary net worth standards and other criteria contained in the law and other regulations of the Home Loan Bank Board and its Federal corporation.

I know that there is a great deal of uncertainty with reference to some of our S&L's. I know there is a great deal of uncertainty on the part of some of the citizens. But speaking for the Maryland delegation I want to take this time to assure everyone that we will do all that we can, that is necessary, in order to protect the institutions and to protect the safety of the deposits.

We have touched base with all of the Federal agencies. We are in contact with the Banking Committees in both Houses, and whatever is necessary to be done to protect these deposits will be done.

I thank the gentleman from Florida [Mr. MICA] and the gentlewoman from Maine [Ms. SNOWE] for allowing me this time.

AMENDMENT OFFERED BY MR. BURTON OF INDIANA

Mr. BURTON of Indiana. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. BURTON of Indiana: Page 5, strike out lines 4 through 11 (section 106), and redesignate subsequent sections accordingly.

Mr. BURTON of Indiana. Mr. Chairman, section 106 of the State Department authorization bill provides $25,000 in 1986 and another $25,000 in 1987 for special religious sensitivity instruction for Foreign Service officers. Special religious sensitivity instruction! I would like to ask the gentleman from New York [Mr. WEISS] the author of this amendment—what is special religious sensitivity instruction and why we are paying taxpayers money for this purpose?

Now I understand that with this amendment, we will be sending Foreign Service officers for a 1-day trip to New York to the Appeal to Conscience Foundation. The Appeal to Conscience Foundation will provide our Foreign Service officers with instruction on Judaism, Hinduism, Buddhism, and other world religions.

I didn't realize that the gentleman from New York was such a strong supporter of combining state and church. That is of using taxpayers money to provide religious instruction to Government officials.

I am really amazed by the gentleman's amendment. We are facing a crisis in reducing the Federal budget. This is not the time to be adding new programs. And particularly not for special religious sensitivity instruction.

I assume that all of our Foreign Service officers went to college. In fact many of them are graduates of Georgetown's School of Foreign Service—a Jesuit school that requires instruction in world religions. I assume also that many Foreign Service officers practice a religion—and have learned about other religions through their church or synagogue. But even if a Foreign Service officer has never studied world religions, we do have libraries in this country. And I would assume that if a Foreign Service officer is being assigned to India, he might take the time to learn about their religious culture.

We do not need to spend taxpayer's money on this program and I hope that the House Appropriations Committee will take a good look at this expenditure for a new, unnecessary, and inappropriate program.

Mr. WEISS. Mr. Chairman, will the gentleman yield to me?

Mr. BURTON of Indiana. I am glad to yield to my colleague, the gentleman from New York.

Mr. WEISS. I thank the gentleman for yielding and I appreciate his asking the question as to what the program is about.

First let me say that the purpose of religious sensitivity training is to provide an opportunity for Foreign Service officials of the United States who are sent to those parts of the world, especially in Eastern Europe but also some parts of Asia where discrimination against various religious groups and members of those religious groups is rampant.

The U.S. State Department's Foreign Service Institute has for some time now been sending its people to get this training from the Appeal to Conscience Foundation. That foundation has been conducting this program without any cost to the taxpayers for a number of years.

It has now come to the point where the expenses of this organization, funded strictly by voluntary, philanthropic contributions, has become a burden to the organization and so after checking with the State Department they asked us to provide for reimbursement to them of up to $25,000 a year.

Now let me just say a word about the Appeal to Conscience Foundation.

Mr. BURTON of Indiana. I would like to interrupt for just a second.

As I understand it, we have been paying for the transportation costs for our Foreign Service officers to go up there already and now, to add to that $25,000 per year as a fee to this organization I think is wrong. It appears to me to be unconstitutional.

Mr. WEISS. If the gentleman will allow me to finish my statement, and if not I will get my own time and do it whatever way the gentleman prefers.

Mr. BURTON of Indiana. Sure.

Mr. WEISS. I appreciate that.

The Appeal to Conscience Foundation has an ecumenical board and a track record which we should all be proud of and be supportive of. These are people who have been working with the countries which we consider to be most discriminatory and oppressive as far as religious practices are concerned, and they have had a tremendous track record in helping individuals and families to exercise their rights.

Now let me indicate who comprises the board. On the board of directors——

Mr. BURTON of Indiana. I think I will let the gentleman finish with his time. I just want to summarize because I am limited to 5 minutes, and I know the gentleman from New York [Mr. WEISS] will be happy to get 5 minutes for his defense of his amendment.

Mr. WEISS. I thank the gentleman for yielding to me.

Mr. BURTON of Indiana. You are welcome.

This is a new program and the bottom line is that it is a new program and we are facing a fiscal chaos in this country.

We are trying to cut $50 billion out of the deficit and here is a new program that is going to add $25,000 this year and $25,000 next year.

Granted, it is a small sum. But, nevertheless, it is an additional expenditure and it should not be tolerated.

Mr. WEISS. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I do appreciate the gentleman having yielded some of his time to me. I simply want to continue naming some of the people who comprise the board of directors of the Appeal to Conscience Foundation.

On that board are the Vice President of the United States, Mr. George Bush; Mr. J. Peter Grace; the chairman of the New York County Republican Party, Mr. Roy Goodman; Mr. J.W. Marriott, Jr., the president of the Marriott Corp.; Mr. Walter Stoessel, Jr., a former Ambassador of the United States; and former Ambassador Angier Biddle Duke; Archbishop Ikavos of the Greek Orthodox Church; Rev. John M. Allin of Boston; Rev. James R. Crumley, Jr.; Rev. Theodore E. McCarrie of the Metuchen Archdiocese of the Roman Catholic Church; Richard L. Moore of the Grace Co.; Dr. Austin S. Murphy, East River Savings Bank; and Rev. Joseph A. O'Hare, S.J., president of the Fordham University, as well as a great number of other clergymen of all faiths, as well as laymen of all faiths and denominations.

Again, we are not asking for a specific sum. We are asking for an amount up to $25,000. The moneys would be expended upon the judgment of the Foreign Service Institute of the State Department. The program is administered by them. They would, in essence, retain so this group, which has had this tremendous experience behind the Iron Curtain of working to help people to exercise their religious rights, to continue their good work.

□ 1510

It seems to me, on the basis of some of the expressions that we have heard on behalf of human rights throughout this entire House, that this may be the most effective investment for the dollar that we can possibly make.

I offered this provision only after I was assured, and personally verified, that it had the full support of the State Department.

I hope that the amendment is not agreed to.

Mr. MICA. Mr. Chairman, will the gentleman from New York yield to me?

Mr. WEISS. I yield to the gentleman from Florida.

Mr. MICA. I thank the gentleman for yielding.

Mr. Chairman, I would like to point out to the Members that the very amendment to be introduced will be a freeze amendment that will bring this bill in far below the President's request and comparable to last year's level.

Mr. WEISS. Mr. Chairman, I yield back the balance of my time.

Mr. ROTH. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, this is an issue that I have some interest in. I did have a chance to talk to the gentleman from New York about it, and he was gracious enough to explain it to me and I told him I was not going to add an amendment. I do support the amendment that the gentleman from Indiana [Mr. BURTON] has introduced for these reasons: The gentleman from Florida [Mr. MICA], who is the manager of this particular bill, is doing a terrific job and I take my hat off to him and to the ranking minority Member [Ms. SNOWE] for the diligence and work that they have put into this legislation.

But, quite frankly, when we talk about a freeze it is not going to be touching this issue because this is a new issue, a new funding introduced into the bill. It is $25,000 this year and $25,000 next year and we know where it is all going to lead. Where is it all going to stop? It starts with an anthill and grows into a Mt. McKinley.

We also, I think, have to consider the issues involved as far as the constitutional question. I think there is a question here of some constitutional dimension.

Everybody in the State Department is going to be for this amendment. Why not? It is a day's vacation up to New York. If you were in the State Department you would probably also be for it.

But the question is: Who is paying for it? The American taxpayers. When we are proposing cutting back on Social Security, Amtrak, all of these other programs, including programs in every one of our districts, is it fair to start a new program? Yes; it is only $50,000 here, but I predict in 5 years it will be $1 million and from there on up.

That is why I think it is very important for us to look at these amendments when they come in as innocent programs that are started with a very few dollars. We all know how they can mushroom and go out of all proportion.

Mr. BURTON of Indiana. Mr. Chairman, will the gentleman yield to me?

Mr. ROTH. I yield to the gentleman from Indiana.

Mr. BURTON of Indiana. I would like to point out that the gentleman from New York [Mr. WEISS] indicated or stated a list of people who support this foundation, many of them multimillionaires. I am sure $50,000 is but a pittance to that august group of individuals.

One of them he mentioned I think was Mr. Grace of the Grace Commission, who is very concerned about the budget deficit and has recommended 2,477 areas that we can cut Federal spending in, trying to get the budget more in balance.

I feel confident that Mr. Grace and those other individuals could raise that $50,000 and not burden the Federal Government with an additional $50,000 in expenditures.

I think this is an improper use of Government funds, opening up a new door for spending, and I do not think we need it.

Mr. Chairman, I thank the gentleman for yielding.

Mr. ROTH. I thank the gentleman for his comments.

Our good friend from New York [Mr. WEISS] keeps asking the question, whenever an amendment comes up: "Did you ask the State Department? Are they in favor of this amendment?" I would like to ask the gentleman from New York sometime: "Did you ask the Members of this Board and are they in favor of this amendment?" And if Peter Grace is in favor of it, well——

Mr. WEISS. Mr. Chairman, will the gentleman yield?

Mr. ROTH. I yield to the gentleman from New York.

Mr. WEISS. I thank the gentleman for yielding.

Mr. Chairman, the president of the Appeal to Conscience Foundation made the request after consulting both his board and with the State Department.

Mr. ROTH. So Peter Grace is in favor of this amendment. Then I think it is only appropriate that the next time Mr. Grace comes to us and talks about cutting the budgets and make the tough decisions we are going to ask him about this particular proposal. If he is for more spending for his particular programs, then I think we are justified in asking Mr. Grace some questions about his purposes, and the like, also.

Mr. Chairman, I yield back the balance of my time.

Mr. GREEN. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise simply to say to the Members that the Appeal of Conscience Foundation is one that I know well, it is a group with a most distinguished leadership of clergy and laity.

The work it has done in this field I think is extremely well regarded and well needed.

I would urge my colleagues not to throw away a most valuable program in a fit of pique.

This is a program which is extremely useful in parts of the world where religious freedom is virtually known, in grave trouble, and it is an area where I think Foreign Service officers, however excellent their previous education may have been, can use some additional training. We might have avoided some pitfalls in the Mideast, for example, if some of the people in our Foreign Service had had somewhat more understanding of some of the religious cross-currents there involved.

So it seems to me that our recent history teaches us that in fact this kind of training is extremely useful.

It is, it seems to me, a very, very small price to pay to accomplish a very, very important goal in terms of America's world objectives.

Mr. Chairman, I would therefore urge my colleagues to support the committee's recommendation and to defeat the effort to delete these funds.

Mr. SMITH of Florida. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I will try to be brief, and I hope I can be the last speaker.

I understand the sensitivities of the gentleman who proposed the amendment and those who support him. Obviously, any time you talk about even a small amount of money in these times of trying to stem the red ink you are asking about something which I think has a raw nerve in it. But I think, by the same token, let us examine the record of this House. There is not a single person in this House on either side of the aisle who has not expressed deep concern about human rights. Human rights are the umbrella words, part of which include religious rights. There are countries behind the Iron Curtain, countries in the Middle East and the like where our diplomats on a daily basis have to deal with questions that arise about religious differences and differences between religious and oppressions of religions.

To talk in terms of $25,000 a year for training for some of our diplomats as being excessive or costly when it comes to their understanding the

question of religious rights in places like Czechoslovakia or the Soviet Union or Bulgaria or Roumania, is a little bit beyond the pale of how we ought to approach the problem of the deficit.

Yes, every dollar counts; but there are some places where even the application of a few dollars, even in times of red ink, can enhance greatly the prospects of the foreign policy of this country.

Every Member of this House, and I think it is 100 percent of the body who has not talked about human rights I believe understands the value of this program.

I understand the gentleman's concern. I share his concern. Let us talk about the programs where the money is wasted where the big bucks are. This is really not the place to attack the foreign policy of this country; it is de minimis and it is wrong.

I would urge everyone vote against this amendment, although we understand the spirit in which it is delivered.

□ 1520

The CHAIRMAN. The question is on the amendment offered by the gentleman from Indiana [Mr. BURTON].

The question was taken, and on a division (demanded by Mr. BURTON of Indiana) there were—ayes 26, noes 26.

RECORDED VOTE

Mr. BURTON of Indiana. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 224, noes 189, not voting 21, as follows:

[Roll No. 106]

□ 1530

Messrs. SCHEUER, DIXON and GEJDENSON, Mrs. KENNELLY, Messrs. BARTLETT, OWENS, MILLER of California, BIAGGI, LOEFFLER, WALGREN, and DORNAN of California changed their votes from "aye" to "no."

Messrs. DASCHLE, DICKINSON, SAXTON, DINGELL, HERTEL of Michigan, and ROWLAND of Georgia changed their votes from "no" to "aye."

So the amendment was agreed to.

The result of the vote was announced as above recorded.

□ 1540

The CHAIRMAN. Are there further amendments to this title?

If not, the Clerk will designate title II. The text of title II reads as follows:

TITLE II—UNITED STATES INFORMATION AGENCY

SEC. 201. SHORT TITLE.

This title may be cited as the "United States Information Agency Authorization Act, Fiscal Years 1986 and 1987".

SEC. 202. AUTHORIZATION OF APPROPRIATIONS.

There are authorized to be appropriated for the United States Information Agency $949,639,000 for the fiscal year 1986 and $1,138,177,000 for the fiscal year 1987 to carry out international information, educational, cultural, and exchange programs under the United States Information and Educational Exchange Act of 1948, the Mutual Educational and Cultural Exchange Act of 1961, and Reorganization Plan Numbered 2 of 1977, and for other purposes authorized by law.

SEC. 203. MODERNIZATION OF VOICE OF AMERICA.

Of the authorizations of appropriations contained in section 202, authorizations of $151,947,000 for the fiscal year 1986 and $310,000,000 for the fiscal year 1987, which shall be available for essential modernization of the facilities and operations of the Voice of America, shall remain available until the appropriations are made and when those amounts are appropriated they are authorized to remain available until expended.

SEC. 204. INCREASED AMOUNTS FOR BOOK PROGRAM.

An amount not less than the amount requested by the United States Information Agency in its presentation to the Congress for increases in TV WORLDNET and facilities for each of the fiscal years 1986 and 1987 shall be used for increases in the world wide book program initiative and related support for the Educational and Cultural Exchange Bureau.

SEC. 205. NATIONAL ENDOWMENT AND DEMOCRACY.

(a) REQUIREMENTS RELATING TO THE ENDOWMENT AND ITS GRANTEES.—The National Endowment for Democracy Act (22 U.S.C. 4411 et seq.) is amended by adding at the end thereof the following new section:

"SEC. 505. REQUIREMENTS RELATING TO THE ENDOWMENT AND ITS GRANTEES.

"(a) CODIFICATION OF CERTAIN POLICIES OF THE ENDOWMENT.—The Endowment shall adhere to the following policies:

"(1) All proposals approved by the Board of Directors, grant agreements between the Endowment and its grantees, and any other official document of the Endowment shall be available to the public upon request.

"(2) Funds may not be expended, either by the Endowment or by any of its grantees, to finance the campaigns of candidates for public office.

"(3) No funds granted to the political party institutes by the Endowment may be used to finance activities of the Republican National Committee or the Democratic National Committee.

"(b) CONSULTATION WITH UNITED STATES DIPLOMATIC MISSIONS.—The Endowment shall require its grantees to consult with the United States Chief of Mission to a foreign country before funds provided by the Endowment are made available by the grantee for a project in that country.

"(c) JOINT PROJECTS BY POLITICAL PARTY INSTITUTES.—Amounts made available by the Endowment in the fiscal years 1986 and 1987 to the institutes established by the two major American political parties shall be used, to the maximum extent feasible, for projects jointly implemented by those institutes.".

(b) EARMARK FOR CERTAIN RECIPIENTS.—Section 503(e) of such Act (22 U.S.C. 4412(e)) is amended to read as follows:

"(e)(1) Subject to paragraph (2), of the amounts made available to the Endowment for each of the fiscal years 1986 and 1987 to carry out programs in furtherance of the purposes of this Act—

"(A) not less than $13,800,000 shall be for the Free Trade Union Institute; and

"(B) not less than $5,500,000 shall be for the Center for International Private Enterprise.

"(2) If the amount made available to the Endowment for either of the fiscal years 1986 or 1987 is less than $31,300,000, the Board of Directors of the Endowment may reduce the amounts provided pursuant to paragraph (1), except that in exercising this authority, the Board may not provide—

"(A) the Free Trade Union Institute with less than 40 percent, and

"(B) the Center for International Private Enterprise with less than 20 percent,

of the amount made available to the Endowment for that fiscal year.".

(c) AUDITS BY USIA.—Section 504 of such Act is amended—

(1) by redesignating subsections (g) and (h) as subsections (h) and (i), respectively, and

(2) by inserting after subsection (f) the following new subsection (g):

"(g) The financial transactions of the Endowment for each fiscal year may also be audited by the United States Information Agency under the conditions set forth in subsection (f)(1).".

(d) EFFECTIVE DATE.—The amendment made by subsection (b) shall take effect on October 1, 1985.

AMENDMENT OFFERED BY MR. MICA

Mr. MICA. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. MICA.

Page 29, line 9, strike out "$949,639,000" and insert in lieu thereof "$922,286,000"; and line 10, strike out "$1,138,177,000" and insert in lieu thereof "$962,866,000".

Page 29, line 19, strike out "$151,947,000" and insert in lieu thereof "$136,594,000"; and line 20, strike out "$310,000,000" and insert in lieu thereof "$142,604,000".

Page 33, line 15, strike out "$136,677,000" and insert in lieu thereof "$127,700,000"; and line 24, strike out "$30,000,000" and insert in lieu thereof "$21,030,000".

Page 32, after line 24, add the following:

(d) LIMITATION ON GRANTS TO THE ENDOWMENT.—Of the amounts authorized to be appropriated by section 202 for the United States Information Agency, not more than $19,300,000 for the fiscal year 1986 and not more than $20,100,000 for the fiscal year 1987 may be made available to the National Endowment for Democracy.

Page 33, line 1, strike out "(d)" and insert in lieu thereof "(e)".

Page 31, strike out line 19 and all that follows through line 14 on page 32 and insert in lieu thereof the following:

"(e) Of the amounts made available to the Endowment for each of the fiscal years 1986 and 1987 to carry out programs in furtherance of the purposes of this Act—

"(1) not less than 40 percent shall be for the Free Trade Union Institute; and

"(2) not less than 20 percent shall be for the Center for International Private Enterprise.".

Mr. MICA (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Florida?

There was no objection.

Mr. MICA. Mr. Chairman, the much heralded and long awaited freeze amendment is at hand. Knowing of the constraints on Members' time, the minority Member, Ms. SNOWE and myself have agreed to try to present this in a 5-minute period of time for a vote. We know of no single objection to this amendment.

Essentially, we have a budget freeze before us. Let me just relate what the committee has done. we came in $40 million less than the President's request. On top of that, we have crafted a freeze amendment that brings us in $27 million less, for a total reduction of $67 million this year.

Next year, the bill is $9 million less than the President's request. The freeze on top of that, adds up to $184 million less, for a total reduction of $193 million. We have heeded the actions of the House this year; we have heeded the urgings of my colleague, Mr. MORRISON from Connecticut and others that we should move ahead with a freeze amendment, and that is simply and precisely what we are doing. A 4.4-percent inflation factor is the only factor that was added in at this point

Ms. SNOWE. Mr. Chairman, will the gentleman yield?

Mr. MICA. I yield to the gentlewoman from Maine.

Ms. SNOWE. I thank the gentleman for yielding.

Mr. Chairman, I rise in support of the amendment that has been offered by the gentleman. I think this is certainly the direction that we should be moving in, and is part of an ongoing effort on the part of Members here in the House to offer amendments to authorizing legislation that would freeze the overall funding level to the 1985 appropriations level.

We did that by reducing programs in the Voice of America, by providing a reduction in the National Endowment for Democracy funds to the 1985 appropriations level. We think that these programs can absorb those reductions, and I would urge the Members to support this amendment.

Mr. MORRISON of Connecticut. Mr. Chairman, will the gentleman yield?

Mr. MICA. I yield to the gentleman from Connecticut.

Mr. MORRISON of Connecticut. I thank the gentleman for yielding.

Mr. Chairman, I rise in support of the amendment. I want to commend the committee, and, in particular, the chairman and the ranking Member for having brought us this freeze amendment which is in keeping with the overwhelming votes of the House in this direction.

I hope we will continue to move in that direction.

Mr. PURSELL. Mr. Chairman, will the gentleman yield.

Mr. MICA. I yield to the gentleman from Michigan.

Mr. PURSELL. I thank the gentleman for yielding to me.

Mr. Chairman, I want to congratulate the Committee leadership on both sides to move ahead on the freeze movement. Our group 92 has been in the forefront; this is the fourth budget battle today. The leadership here on the Committee has taken that initiative, rather than other Members outside the Committee, to offer amendments.

Therefore, I too, put my signature on behalf of our group, in support of this amendment. I am not sure we even need a recorded vote; I think we can expedite the matters of the House, because I think this will be a unanimous vote.

● Mr. RUDD. Mr. Chairman, I support the pending amendment to freeze the fiscal year 1986 State Department authorization at the anticipated 1985 appropriated level.

If we are ever to gain control over spending and make serious progress toward lower deficits, we must begin exercising restraint at every opportunity.

We've already had the courage to freeze authorizations for the National

Science Foundation, the National Bureau of Standards, and NASA.

A spending freeze alone will not make the deficits disappear, nor will it solve the problem of wasteful or unnecessary programs. However, a freeze is a step in the right direction.

I urge my colleagues to support the amendment.●

The CHAIRMAN. The question is on the amendment offered by the gentleman from Florida [Mr. MICA].

The question was taken; and the Chairman announced that the ayes appeared to have it.

RECORDED VOTE

Mr. MORRISON of Connecticut. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and they were—ayes 398, noes 1, answered present-1, not voting 34, as follows

So the amendment was agreed to.

The result of the vote was announced as above recorded.

AMENDMENT OFFERED BY MR. KOSTMAYER

Mr. KOSTMAYER. Mr. Chairman, I offer an amendment and I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman rom Pennsylvania?

There was no objection.

The text of the amendment is as follows:

Amendment offered by Mr. KOSTMAYER: Page 33, after line 2 add the following new section:

SEC. 206. DISTRIBUTION WITHIN THE UNITED STATES OF THE USIA FILM ENTITLED "HAL DAVID: EXPRESSING A FEELING".

Notwithstanding the second sentence of section 501 of the United States Information and Education Exchange Act of 1948 (22 U.S.C. 1461)—

(1) the Director of the United States Information Agency shall make available to the Archivist of the United States a master copy of the film entitled "Hal David: Expressing a Feeling"; and

(2) upon evidence that necessary United States rights and licenses have been secured and paid for by the person seeking domestic release of the film, the Archivist shall reimburse the Director for any expenses of the Agency in making that master copy available, shall deposit that film in the National Archives of the United States, and shall make copies of that film available for purchase and public viewing within the United States.

Any reimbursement to the Director pursuant to this section shall be credited to the applicable appropriation of the United States Information Agency.

The CHAIRMAN. The gentleman from Pennsylvania [Mr. KOSTMAYER] is recognized for 5 minutes in support of his amendment.

Mr. KOSTMAYER. Mr. Chairman, this will take less than 30 seconds.

There is currently in law a ban on the dissemination of films produced by the United States Information Agency for showing in this country. This amendment would waive that ban for a film called "Hal David: Expressing a Feeling."

Mr. Chairman, I ask for agreement on this amendment.

Mr. MICA. Mr. Chairman, will the gentleman yield?

Mr. KOSTMAYER. I yield to the gentleman from Florida.

Mr. MICA. Mr. Chairman, this will also take less than 30 seconds.

Not only this film but two other films, will be offered for release in this bill. An amendment will be offered on those in just a moment. The committee staff has reviewed them and recommended them, and there is no objection on either side.

Ms. SNOWE. Mr. Chairman, will the gentleman yield?

Mr. KOSTMAYER. I yield to the gentlewoman from Maine.

Ms. SNOWE. Mr. Chairman, we support the amendment as well. I understand the distribution of these films is often done by acts of Congress, so I support the amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Pennsylvania [Mr. KOSTMAYER].

The amendment was agreed to.

AMENDMENT OFFERED BY MR. LAGOMARSINO

Mr. LAGOMARSINO. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. LAGOMARSINO: Page 33, after line 2, add the following new section:

SEC. 206. DISTRIBUTION WITHIN THE UNITED STATES TWO USIA FILMS RELATING TO AFGHANISTAN.

Notwithstanding the second sentence of section 501 of the United States Information and Education Exchange Act of 1948 (22 U.S.C. 1461)—

(1) the Director of the United States Information Agency shall make available to the Archivist of the United States a master copy of the films entitled "Afghanistan 1982: the Struggle for Freedom Continues" and "We Are Afghanistan"; and

(2) upon evidence that necessary United States rights and licenses have been secured and paid for by the person seeking domestic release of such a film, the Archivist shall reimburse the Director for any expenses of the Agency in making the master copy of such film available, shall deposit such film in the National Archives of the United States, and shall make copies of such film available for purchase and public viewing within the United States.

Any reimbursement to the Director pursuant to this section shall be credited to the applicable appropriation of the United States Information Agency.

Mr. LAGOMARSINO (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. LAGOMARSINO. Mr. Chairman, my amendment is noncontroversial and quite simple. The U.S. Information Agency [USIA] has produced two outstanding films which document the tragic plight of the people of Afghanistan since the Soviet invasion in 1979. The amendment would allow USIA to take action to allow them to be seen by the U.S. public.

The first film, entitled "Afghanistan 1982: The Struggle for Freedom Continues," contains exclusive interviews with eyewitnesses, respected international journalists and other concerned individuals, combined with extensive footage of the actual 1979 invasion; Soviet troops, tanks, helicopters, and antipersonnel mines; scenes of recent destruction; refugees in camps in Pakistan and on the move inside Afghanistan; Afghan resistance fighters in the hills; and scenes from the 1980 and 1981 U.N. General Assembly votes condemning the Soviet invasion. Interviews include Soviet emigre and author Vladimir Bukovsky; a former official in the Afghan Government; an Afghan student leader; a recently evacuated "Mujahideen" or freedom fighter "double agent" from Kabul; U.N. General Assembly delegates; a representative of the International Federation for Human Rights in Paris; two Soviet prisoners of war held by the "Mujahideen"; two French volunteer doctors just back from the strategic Panshir Valley; and American, French, Italian, and other TV and print journalists. This 47-minute color film was produced in 1982, yet the information it conveys is still quite useful and instructive.

The second film, entitled "We are Afghanistan," was produced in 1984 for use in conjunction with United States and worldwide activities marking the fifth anniversary of the Soviet invasion of Afghanistan. It contains the latest available footage from inside Afghanistan, and through scenes of the refugee camps and extensive interviews with refugees, Western medical volunteers, and Western journalists, documents the plight of the 4 million-plus refugees driven from their homeland. Included are scenes of the aid and cooperation provided by neighboring Moslem and Western countries; scenes of the frontier refugee camps in Pakistan; discussion of the economic and social effects of the refugee influx on Pakistan; the plight of the 1 to 2 million refugees wandering within Afghanistan, homeless, in their attempt to escape the ravages of war; the role of French and American medical volunteers in Afghanistan and the refugee camps; and interviews with individual freedom fighters and London Sunday Times correspondent Barry Penrose after his return from Kabul on an unauthorized visit to that embattled and besieged capital city. The film appropriately closes with scenes that demonstrate the will of the Afghan people to fight until the Soviets are driven from their homeland.

Mr. Chairman, it is time the American people were given a glimpse of that brutal and destructive war. To date, the war has received from the Western news media only scant coverage. Many reporters refuse to go to Afghanistan for fear of their very survival—and who can blame them. The Soviets have specifically threatened Western reporters with death if they dare cover this bloody genocide. Obviously, an integral component of the Soviet strategy in the Afghan war is to limit opposition to their barbaric behavior in Afghanistan through preventing adequate media coverage. Simply stated, Soviet leaders are content with the slaughter underway in that country; they do wish, however, that opposition and condemnation of their vicious war would go away.

My amendment, Mr. Chairman, would help ensure that Americans do receive sufficient information about the Afghan war, and its disastrous effect on the people, culture, and terrain of that once unrulable land.

During the crisis in Poland in 1981, this House voted to release another marvelous USIA film entitled, "Let Poland Be Poland." That outstanding film documented the role of "Solidarnosc—Solidarity," the outlawed Polish trade union, in the Polish peoples' efforts to gain freedom from Communist tyranny and oppression. The release of that film was, I believe, viewed universally as a strong message of support for the Polish people in their time of struggle. By releasing these two USIA films on the war in Afghanistan, we can send an equally strong message to the Afghan people that we are aware of their plight and that we stand with them in their struggle to be free from foreign domination.

Mr. Chairman, legislation, Senate Concurrent Resolution 74, passed this body late last Congress, which plainly specified U.S. policy toward the Afghan war. In part, Senate Concurrent Resolution 74 stated:

It should be the policy of the United States: (1) To encourage and support the people of Afghanistan to continue thier struggle to be free of foreign domination; (2) to effectively support the Afghan people in their fight for freedom; and (3) to pursue a negotiated settlement to the conflict.

Mr. Chairman, my amendment would help to ensure that stated U.S. policy on the war in Afganistan is being implemented. If any people today are pursuing a just and legitimate struggle for national liberation, it is the Afghans. They have taken on the Soviet Union—and all its trappings, including its troops, helicopters, Mig jets, chemical weapons, booby trap toys, and so forth—and have emerged only more determined to rid their country of the foreign invaders. They deserve our support. And one way we can show our support is by approving my amendment.

Mr. MICA. Mr. Chairman, will the gentleman yield?

Mr. LAGOMARSINO. I yield to the chairman of the subcommittee.

Mr. MICA. Mr. Chairman, as was just indicated moments ago, we have reviewed this film, and we have no objection to it. In fact, we hope in the future to find a way to do this without congressional action.

Ms. SNOWE. Mr. Chairman, will the gentleman yield?

Mr. LAGOMARSINO. I yield to the gentlewoman from Maine.

Ms. SNOWE. Mr. Chairman, I support the gentleman's amendment.

I think it would be appropriate for the distribution of these films to further inform the American public about the brutal nature of the Soviet invasion of Afghanistan and the

Afghan people's opposition to the occupying forces. We need to continue to inform the American people and other countries as well as to the exact problems there now and into the future.

Mr. LAGOMARSINO. Mr. Chairman, I thank the gentlewoman, and I want to take this time to commend the chairman of the subcommittee and the ranking member for their fine work on this legislation.

The CHAIRMAN. The question is on the amendment offered by the gentleman from California [Mr. LAGOMARSINO].

The amendment was agreed to.

AMENDMENT OFFERED BY MR. SMITH OF FLORIDA

Mr. SMITH of Florida. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. SMITH of Florida: Page 33, after line 2, add the following new section:

SEC. 206. NOTIFICATION OF PROGRAM GRANTS.

(a) APPLICATION TO FISCAL YEARS 1986 AND 1987.—Section 705(b) of the United States Information and Educational Exchange Act of 1948 (22 U.S.C. 1477c(b)) is amended by striking out "1984 and 1985" and inserting in lieu thereof "1986 and 1987".

(b) EFFECTIVE DATE.—The amendment made by subsection (a) shall take effect on October 1, 1985.

Mr. SMITH of Florida (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Florida?

There was no objection.

Mr. SMITH of Florida. Mr. Chairman, this amendment really is mostly a technical amendment. What it does is basically increase the existing portions of the bill for the next 2 years, adding in 1986 and 1987, to make sure that the letter and spirit of the Fulbright-Hays Act and the U.S. Information Educational Exchange Act is effectively observed and partisan political considerations do not enter into the grant-making process with reference to the USIA, which makes grants to education and cultural exchange programs.

All the amendment does is for the next 2 years carry forward the policy that is already in the law this year and has been for previous years.

Mr. MICA. Mr. Chairman, will the gentleman yield?

Mr. SMITH of Florida. I am happy to yield to the gentleman from Florida.

□ 1610

Mr. MICA. Mr. Chairman, the committee has reviewed this amendment. This amendment is technical in nature. It simply continues existing law that is due to expire.

Ms. SNOWE. Mr. Chairman, will the gentleman yield?

Mr. SMITH of Florida. I would be pleased to yield to the gentlewoman from Maine.

Ms. SNOWE. Mr. Chairman, I would be pleased to accept this amendment as well. This has been a good provision in the past, which does not require much paperwork on the part of the USIA. It is a notification process which gives Congress an idea as to how and to whom these grants are issued; so I would be pleased to accept this amendment.

Mr. CHAIRMAN. The question is on the amendment offered by the gentleman from Florida [Mr. SMITH].

The amendment was agreed to.

AMENDMENT OFFERED BY MR. MC CAIN

Mr. McCAIN. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. McCAIN: Page 30, strike out lines 19 through 23; line 24, strike out "(2)" and insert in lieu thereof "(1)"; Page 31, line 1, strike out "(3)" and insert in lieu thereof "(2)"; line 15, strike out the quotation marks and the final period; and after line 15, add the following new subsection:

"(d) PUBLIC ACCESS TO INFORMATION.—

"(1) The Endowment shall make available to the public, upon request, any information regarding its organization, procedures, requirements, and activities, except that the Endowment is authorized to withhold information which is exempted from disclosure pursuant to subsection (b) of section 552 of title 5, United States Code (relating to freedom of information).

"(2) The Endowment, upon receipt of any request for information, shall (in accordance with section 552(a)(6) of such title) determine promptly whether to comply with such request and shall promptly notify the person making the request of such determination. In the event of an adverse determination, and if requested by the person requesting the information, such determination shall be reviewed by the General Counsel of the Endowment.".

Mr. McCAIN (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Arizona?

There was no objection.

Mr. McCAIN. Mr. Chairman, I will be as brief as possible, since I have secured the agreement of the chairman and the ranking minority member on this amendment. It basically is an improvement so that we can make it easier for those individuals or groups who have not been granted funds by the National Endowment for Democracy to ascertain the reasons why and for our taxpayers to be able to know better how the funding is being dispensed from the National Endowment for Democracy.

Mr. Chairman, the current language states that all proposals approved by the board of directors, grant agreements between the endowment and its grantees and any other official document shall be available to the public upon request. This amendment helps to assist those who were disapproved as well.

This amendment recognizes the valid concerns of those who feel that the National Endowment for Democracy is a private organization and should not be covered by the FOIA.

The language is very similar to that contained in the authorization for the Synfuels Corporation, another private group which receives funding from the Federal Government.

We will not be creating new regulations or setting new precedents by putting in this amendment.

The amendment refers to two sections of the Freedom of Information Act. The first allows the National Endowment for Democracy to withhold information if they determine that releasing such information would be dangerous or inappropriate. Current language provides no such protection to the NED.

The second reference is a timetable and procedure for the National Endowment for Democracy to follow when responding to a request for information. It provides them a framework from which to operate.

I believe the taxpayers have a right to know if a group of Americans is denied funding.

I also understand that complete use of this FOIA could harm or damage the activities and the role of the National Endowment for Democracy.

This is not an attempt to harm the apparatus nor work against the National Endowment for Democracy.

I believe the amendment is noncontroversial.

I would like to express my appreciation to the subcommittee chairman, the gentleman from Florida, and the ranking minority member, the gentlewoman from Maine, for their assistance in working out what at one time was a very difficult problem.

Mr. MICA. Mr. Chairman, will the gentleman yield?

Mr. McCAIN. I yield to the gentleman from Florida.

Mr. MICA. I thank the gentleman. Let me just take 10 seconds to say, first, that the committee tried to address the Members' concerns on access to information. The USIA now has specific authority to audit. We have codified extensive disclosure rules. This amendment adds to that already expansive disclosure requirement.

The committee is happy to accept the amendment.

Ms. SNOWE. Mr. Chairman, will the gentleman yield?

Mr. McCAIN. I am happy to yield to the gentlewoman from Maine.

Ms. SNOWE. Mr. Chairman, I certainly support the gentleman's amendment. It does expand upon what we have already done in the committee.

As the gentleman has explained, his amendment would modify the committee bill to specify the means by which we could secure public access to those documents held by the National Endowment for Democracy.

I think the gentleman has drafted his amendment very carefully, because it is modeled after the Synthetic Fuels Corporation, which is an entity similar to the structure of the National Endowment for Democracy.

I also support the gentleman's intent, which is to make these agencies even more accountable by opening up their files for public scrutiny. Although the National Endowment for Democracy is a nongovernmental entity, in a sense it is entirely supported by Government funds, and for that reason we should require as much access to their files as possible.

As I also understand, the gentleman's amendment would only provide exemption from disclosure similar to the exemptions provided for under the Freedom of Information Act.

So I support the gentleman's amendment.

Mr. McCAIN. Mr. Chairman, I thank the gentlewoman.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Arizona [Mr. McCAIN].

The amendment was agreed to.

The CHAIRMAN. Are there further amendments to title II? If not, the Clerk will designate title III.

The text of title III is as follows:

TITLE III—BOARD FOR INTERNATIONAL BROADCASTING

SEC. 301. SHORT TITLE.

This title may be cited as the "Board for International Broadcasting Authorization Act, Fiscal Years 1986 and 1987".

SEC. 302. AUTHORIZATION OF APPROPRIATIONS.

(a) FISCAL YEARS 1986 AND 1987.—Subparagraph (A) of section 8(a)(1) of the Board for International Broadcasting Act of 1973 (22 U.S.C. 2877(a)(1)(A)) is amended to read as follows:

"(A) $122,325,000 for the fiscal year 1986 and $136,677,000 for the fiscal year 1987; and".

(b) EFFECTIVE DATE.—The amendment made by subsection (a) shall take effect on October 1, 1985.

SEC. 303. IMPROVEMENT OF FACILITIES.

Section 8 of the Board for International Broadcasting Act of 1973 (22 U.S.C. 2877) is amended by adding at the end thereof the following new subsection:

"(c) Of the authorization of appropriations contained in subsection (a)(1)(A), authorizations of $20,000,000 for the fiscal year 1986 and $30,000,000 for the fiscal year 1987, which shall be available for radio modernization, shall remain available until the appropriations are made and when those amounts are appropriated they are authorized to remain available until expended.".

SEC. 304. MANAGEMENT OF RFE/RL, INCORPORATED.

(a) FINDINGS.—The Congress finds that—

(1) RFE/RL, Incorporated, is essential to the continued and effective furtherance of the open flow of information and ideas throughout Eastern Europe and the Soviet Union:

(2) effective communication of information and ideas can only be accomplished if the long-term credibility of RFE/RL, Incorporated, operating in accordance with the highest standards of professionalism, is maintained:

(3) the performance of RFE/RL, Incorporated, is dependent on proper management, an objective approach to news, quality programming, and effective oversight;

(4) The Board for International Broadcasting, in addition to making grants, is responsible for overseeing broadcast quality and effectiveness and for overseeing effective utilization of Federal funds;

(5) RFE/RL, Incorporated, is responsible for its own management and for daily broadcasts into Eastern Europe and the Soviet Union;

(6) the Board for International Broadcasting and RFL/RL, Incorporated, must remain very distinct and different institutions if they adhere to the Joint Explanatory Statement of the Committee on Conference relating to the Board of International Broadcasting Authorization Act, Fiscal Years 1982 and 1983;

(7) the absence of a procedure, and an individual (other than the President) charged with enforcing that procedure, for supervising the daily program content and quality of RFE/RL, Incorporated, may have undermined the management of the radios and their sensitivity to audience reaction to programming;

(8) the Board for International Broadcasting, in an effort to preserve or enhance its ability to properly oversee the operations of RFE/RL, Incorporated, must avoid even the appearance of involvement in daily operational decisions and management of RFE/RL, Incorporated; and

(9) the absence of satisfactory pre-broadcast review and the lack of sufficient records of actions taken to explain or remedy program problems identified through post-broadcast review, may endanger the long-term credibility of RFE/RL, Incorporated.

(b) ACTIONS TO BE TAKEN BY RFE/RL.—It is the sense of the Congress that RFE/RL, Incorporated, should—

(1) reestablish the procedure, and a position charged with enforcement of that procedure, the primary emphasis of which is the daily oversight and managment of RFE/RL, Incorporated, program content and quality;

(2) strengthen existing pre- and post-broadcast review and controls; and

(3) improve its personnel management system to include such things as better documentation of internal decisionmaking and communication, personnel review, and job description.

(c) ACTIONS TO BE TAKEN BY BIB.—It is the sense of the Congress that the Board for International Broadcasting should—

(1) periodically review and update the Program Policy Guidelines of RFE/RL, Incorporated, with the goal of maintaining their clarity and responsiveness; and

(2) ensure that the distinctions between the Board for International Broadcasting and RFE/RL, Incorporated, remain clear and that these two entities continue to operate within the framework established by law.

AMENDMENT OFFERED BY MR. HUNTER

Mr. HUNTER. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. HUNTER: At the end of the bill, add the following new section:

SEC. . The Congress commends our fine Ambassador to Mexico, John Gavin, for insuring a full and complete investigation and prosecution of the murderers of Enrique Camerena and for his continuing advocacy of a strong drug enforcement program.

Mr. MICA. Mr. Chairman, will the gentleman yield?

Mr. HUNTER. I would be happy to yield.

Mr. MICA. Mr. Chairman, we would be happy to accept this amendment. There is no objection from the majority side.

Mr. HUNTER. I appreciate the gentleman's cooperation.

Ms. SNOWE. Mr. Chairman, will the gentleman yield?

Mr. HUNTER. I yield to the gentlewoman.

Ms. SNOWE. Mr. Chairman, I rise in support of the gentleman's amendment. I congratulate the gentleman for raising the issue and congratulate the Ambassador for his outstanding work in handling a very difficult situation.

Mr. HUNTER. Mr. Chairman, I thank the gentlewoman.

The CHAIRMAN. The question is on the amendment offered by the gentleman from California [Mr. HUNTER].

The amendment was agreed to.

Mrs. SCHROEDER. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I would like to engage the gentleman from Florida [Mr. MICA] in a colloquy concerning section 115 of the bill which authorizes, in exceptional circumstances, the Secretary of Commerce to make limited appointments in the United States and Foreign Commercial Service without regard to the 5-percent limit on noncareer appointments to the Senior Foreign Service. When we developed the Foreign Service Act of 1980, we placed a 5-percent limit on the number of noncareer members of the Senior Foreign Service systemwide to prevent a wholesale politicization of the Foreign Service and to insure that career paths are not blocked by political appointees. This second concern is of paramount importance if the Foreign Service is to work as up or out system. Yet, section 115 of this bill provides an exception to this 5-percent limit. Could the gentleman from Florida explain the reasoning behind this?

Mr. MICA. Mr. Chairman, will the gentlewoman yield?

Mrs. SCHROEDER. I yield the gentleman from Florida.

Mr. MICA. First, I would like to thank the gentlewoman from Colorado [Mrs. SCHROEDER] for her assistance in drafting this section. The 1980 act excepted the Department of Commerce from the 5-percent limitation on noncareer appointees to the Senior Foreign Service until September 30,

1985. When this transitional provision lapses, the Foreign Commercial Service can have only one noncareer appointee. Right now, the Service has six from the business community and another four who have reemployment rights in the Senior Executive Service. If the transitional provision lapsed, the Foreign Commercial Service would lose much of its ability to promote trade with the United States abroad.

So, section 115 provides for one noncareer appointee and authorizes the appointment of other individuals to limited appointments where two conditions are met. The first condition is that no career member of the Senior Foreign Service with the necessary qualifications is available to serve in the position. The second condition is that the individual appointed to the limited position has unique qualifications for the specific position. In this regard, the first sentence of the committee report concerning section 115 should read: "Section 115 allows the United States and Foreign Commercial Service to appoint individuals to limited appointments for specific positions abroad in the Senior Foreign Service where no career member is qualifed or available and where the appointed individuals have unique qualifications for the specific position."

Mrs. SCHROEDER. Thank you for the description. These special limited appointees, who could never serve more than 5 years in any case, would be appointed to a single position and would not be subject to reassignment. Is that right?

Mr. MICA. The gentlewoman is correct. Currently, they are appointed on 2-year contracts, which can be renewed up to a total of 5 years. I expect that the Department of Commerce would continue to limit the initial length of appointments of noncareer members of the Senior Foreign Service to 2 years. And, they are appointed to specific positions for which they are uniquely qualified.

Mrs. SCHROEDER. One condition in this section has to do with the lack of availability of career members of the Service. What does this mean?

Mr. MICA. Currrently, the Department has procedures for surveying career members of the Service when a vacancy occurs or is expected. I expect the Department to continue and strengthen these procedures so that only in extraordinary circumstances is the noncareer authority utilized. If a qualified career member of the Service can be found and made available, the career member should be assigned to the position.

Mrs. SCHROEDER. I have heard concerns raised about the open ended authority to name political appointees to FS-1 positions, just below the Senior Foreign Service. Could the United States and Foreign Commercial Service be larded with political appointees at the FS-1 level to circumvent the strict limits on the use of noncareer personnel in the Senior Foreign Service?

Mr. MICA. Let me say, first, that my experience with the United States and Foreign Commercial Service is that they have not abused their authorities to appoint noncareer staff by using these authorities for political appointees. I think the administration would be making a mistake if it believes that it can appoint all the political people it wants at the FS-1 level. Section 115 provides for the unrestricted appointment of only one noncareer person in the Senior Foreign Service. We will be watching the use of the authority contained in section 115 closely and the appointments to the United States and Foreign Commercial Service to make sure that FS-1 appointments are not used to circumvent the provisions of section 115.

Mrs. SCHROEDER. Do you expect the Department to report to your subcommittee each time an appointment is made under section 115?

Mr. MICA. As you know, this is not required by the bill. Yet, I have no doubt that the United States and Foreign Commercial Service would report each time such an appointment is made if we request them to do so and I intend to make such a request.

Mrs. SCHROEDER. One last question. What does the language "the individual appointed has unique qualifications for the specific position" mean?

Mr. MICA. What that means is that a person appointed in a specific country, for example Japan, should have specialized knowledge about trading with the Japanese. This knowledge would typically be demonstrated by an ability to speak the local language, by experience in dealing with companies and government officials in that country, and by experience with trade with that country. The new authority in section 115 is there so that the United States can hire the best to promote trade with the United States abroad. As I said, we will be monitoring this authority to ensure that only the best are hired.

Mrs. SCHROEDER. I thank the gentleman.

□ 1620

The CHAIRMAN. The time of the gentlewoman from Colorado [Mrs. SCHROEDER] has expired.

(By unanimous consent, Mrs. SCHROEDER was allowed to proceed for 1 additional minute.)

Mrs. SCHROEDER. Mr. Chairman, I would also like to commend the gentlewoman from Maine [Ms. SNOWE] for her work at the Foreign Affairs Committee to draw attention to the slow progress on preparations for the upcoming World Conference on Women. This U.N.-sponsored global event, set in motion 10 years ago, represents the culmination of the U.N. Decade for Women. It is a serious, international conference and one that demands significant preparation of our U.S. delegation. But with barely 2 months left before the world conference, it appears that preparations are way behind schedule.

Ms. SNOWE. Mr. Chairman, if the gentlewoman will yield, I want to thank the gentlewoman for raising this issue. I share her concern about the state of U.S. preparations for the conference. Our colleagues may not be aware that the Secretariat at the State Department, which is charged with these preparations, has undergone almost a complete change of staff since it was created only 8 weeks ago. The committee report on the State Department authorization contains, at my request, language urging the Department to provide adequate staff and resources to the conference Secretariat so that preparations can be completed at the earliest possible time.

Mrs. SCHROEDER. The massive preparation appears to be an enormous task to complete within a matter of weeks. A worldwide conference is clearly a major and serious political event, and surely one that demands the full commitment of time, staff, and resources from our Government. This is not a ladies' tea party. But when the Secretariat office is physically relocated three times in the last few weeks, one wonders whether there is a serious commitment to U.S. involvement.

Ms. SNOWE. Again, I share the gentlewoman's concern on this matter, but I would say that I am encouraged by the fact that our delegation consists of many distinguished women to be led by the President's daughter, Maurean Reagan. To be a truly effective force, however, these delegates must be prepared for every issue and eventuality likely to arise at the Nairobi Conference. I hope our colleagues here today will join us in urging the State Department to fulfill its responsibility to our delegation and the conference at large.

Mrs. SCHROEDER. I thank the gentlewoman for her remarks.

AMENDMENT OFFERED BY MR. RINALDO

Mr. RINALDO. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. RINALDO: Page 36, after line 22, add the following new section:

SEC. 305. TASK FORCE WITH RESPECT TO BROADCASTS TO SOVIET JEWRY.

(a) ESTABLISH TASK FORCE.—There shall be established by the Board for International Broadcasting a task force to conduct a study of the advisability and feasibility of increasing broadcasts to the Jewish population within the Soviet Union.

(b) STUDY.—The Task Force shall—

(1) investigate the needs of Jewish audiences in the Soviet Union;

(2) study the practicality and desirability of establishing a special program, in accordance with the Program Policy Guidelines of RFE/RL, Inc., of Russian language broadcasting to the Jewish population of the Soviet Union; and

(3) make recommendations with respect to the desirable content of broadcast programming;

(c) REPORT.—Not later than six months after the date of the enactment of this Act, the Board for International Broadcasting shall submit a report to the Congress. Such report shall include the following:

(1) Whether expansion of original programming scheduled ("Jewish Cultural and Social Life") or planned ("Judaism") is fulfilling the needs of the audience, and whether expanded Soviet-Jewish programming should include broadcasts on Jewish history, culture, and religion.

(2) The extent to which such programming is broadcast in Russian, Hebrew, and Yiddish.

(3) Recommendations for implementing expanded programming within the structure of RFE/RL, Inc., including specific personnel required and providing for a Soviet Jewry administrative unit within Radio Liberty.

(4) The findings of, and the recommendations from, the study required under subsection (b).

(d) EXISTING PERSONNEL TO CONDUCT STUDY AND MAKE REPORT.—The study and the report required by this section shall be carried out by existing personnel of RFE/RL, Inc., or the Board of International Broadcasting.

Mr. RINALDO [during the reading]. Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

Mr. RINALDO. Mr. Chairman, my amendment would require that the Board for International Broadcasting establish a working group known as the Radio Maccabbee task force that would identify the radio broadcasting needs of the Jewish population of the Soviet Union.

This amendment contains the theme of legislation which I introduced on January 3, 1985, H.R. 423 calling for the establishment of a Radio Maccabbee radio program that would operate under the auspices of Radio Liberty.

The amendment I offer today establishes the foundation upon which Radio Maccabbee or any other entity which increases broadcasting to the Jewish population of the Soviet Union can be built. Radio Liberty, which broadcasts to 12 other nationalities in the Soviet Union, must do more to provide communication to the Jewish population behind the Iron Curtain.

As we are all well aware, the situation in the Soviet Union grows worse each day for its 3 million Jewish citizens. Emigration which totaled over 50,000 in 1979 fell to less than 1,000 last year. Almost every day there are new reports of state-sanctioned anti-Semitism and the arbitrary detention of those who seek to practice their religion. Soviet authorities, in violation of the Helsinki accords, are interfering with postal and telephone communications and seek increasingly to isolate the Jewish population from contact with the West.

Our colleagues are well aware of this breakdown of communications, and more than 50 of them have cosponsored my bill.

The Radio Maccabbee task force should include representatives from not only the Board for International Broadcasting but also from groups which have taken an active interest in this issue, such as the Union of Councils for Soviet Jews. In 6 months, they are to report to Congress the efforts that are being undertaken by the Board for International Broadcasting to meet the needs of the Jewish population of the Soviet Union. They are also instructed to make a recommendation as to whether or not the establishment of a separate Radio Maccabbee radio program would be an appropriate response to a pressing communications problem.

Far too often, Members of this body are frustrated in our efforts to come to the assistance of persecuted persons in the Soviet Union.

By adopting this amendment, we are sending a clear signal that the American people will never waver in their support.

With growing Soviet interference over telephone and postal communications, the Board for International Broadcasting must do more. The Radio Maccabbee task force will identify those needs and set into place the programs which are so vital for the survival of the Jewish people in the Soviet Union. Radio communications will be the messenger of hope for those who seek to preserve their culture.

Mr. SMITH of Florida. Mr. Chairman, I move to strike the requisite number of words.

I just want to rise to commend the gentleman from New Jersey [Mr. RINALDO] for the effort that he has made on this amendment. As a Member who has been timely involved with Radio Liberty and Radio Free Europe, and did an overview as a result of which we brought many of the things that the gentleman referred to tonight, I want to congratulate the gentleman for the interest that he has taken and commend him for the kind of thing that we are doing with this amendment.

This is the kind of situation that bears very strong scrutiny by the Congress of the United States to make sure that Radio Liberty, especially that very credible voice of the United States that beams to the Soviet Union, does not offend sensibilities and takes into account all of the things that are ongoing of a political nature in the Soviet Union.

The Radio Maccabbee Task Force will not create more bureaucracy, will not add more money. And what it will do is to make sure that the radio continues to be sensitive to the kinds of things that the gentleman outlined in his remarks.

Mr. RINALDO. Will the gentleman yield?

Mr. SMITH of Florida. I will be happy to yield.

Mr. RINALDO. I want to thank the gentleman for his comment and also commend him for his efforts in this regard. I know he has been diligent in seeking to further the causes which this legislation promotes, and I am very grateful for his assistance in this matter.

Mr. SMITH of Florida. I thank the gentleman. I think this is a good amendment and I hope everyone will support it.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New Jersey [Mr. RINALDO].

This amendment was agreed to.

Mr. WRIGHT. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I take this time simply to note the significant public servcie that has been performed by the distinguished chairman of the subcommittee and the manager of this bill. The gentleman from Florida [Mr. MICA] has been on this floor now for 4 weeks attempting to get the bill passed and now, as he brings it toward the end, I think it is appropriate that all of us take notice of the diligence that he has demonstrated and of the foresight and the really responsible, constructive manner in which this bill has been managed by the gentleman from Florida [Mr. MICA].

And may I say also the ranking minority Member, the gentlewoman from Maine, OLYMPIA SNOWE, who has provided the same character of foresight and ability and bipartisan responsibility.

The CHAIRMAN. Are there further amendments to title III?

AMENDMENT OFFERED BY MR. CONYERS

Mr. CONYERS. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment Offered by Mr CONYERS: Page 29, line 9, strike out "$949,639,000" and insert in lieu thereof "$918,339,000"; and line 10, strike out "$1,138,177,000" and insert in lieu thereof "$1,106,877,000".

Page 30, strike out line 9 and all that follows through line 2 on page 33 and insert in lieu thereof the following:

SEC. 205. NATIONAL ENDOWMENT FOR DEMOCRACY.

(a) PROHIBITION ON FUNDING FOR NED. — Funds authorized to be appropriated for the United States Information Agency or any other agency of the Government may not

be provided to the corporation known as the National endowment for Democracy.

(b) REPEAL OF NATIONAL ENDOWMENT FOR DEMOCRACY ACT.—The National Endowment for Democracy Act (22 U.S.C. 4411-4413) is repealed.

(c) GAO AUDITS.—Subsection (b) shall not affect the authorities and responsibilities of the Comptroller General and the General Accounting Office as they relate to audits of the National Endowment for Democracy in accordance with the National Endowment for Democracy Act.

□ 1630

The CHAIRMAN (during the reading). The Clerk will suspend. The Chair must notify the gentleman from Michigan that his amendment is to title II which has already been passed in the reading of the bill.

In order to entertain this amendment the gentleman would have to seek unanimous consent.

Mr. CONYERS. Mr. Chairman, I ask unanimous consent that I may be able to introduce this amendment.

The CHAIRMAN. Is there objection to the request of the gentleman from Michigan?

Mr. MICA. Objection, Mr. Chairman.

Ms. SNOWE. Mr. Chairman, I object.

The CHAIRMAN. Objection is heard.

Are there further amendments to title III?

Mr. LAGOMARSINO. Mr. Chairman, I move to strike the last word.

Mr. COBEY. Mr. Chairman, will the gentleman yield?

Mr. LAGOMARSINO. I yield to the gentleman from North Carolina.

Mr. COBEY. I thank the gentleman for yielding.

Mr. Chairman, I was going to offer an amendment to create a new title IV to this bill concerning the continued funding of activities that came out of the International Youth Conference in Kingston, Jamaica. But I have received an assurance from the chairman of the subcommittee.

Mr. MICA. Mr. Chairman, will the gentleman yield?

Mr. LAGOMARSINO. I yield to the chairman of the subcommittee.

Mr. MICA. I thank the gentleman for yielding.

Mr. Chairman, the Chair has agreed to raise this subject in hearings. We appreciate the gentleman [Mr. COBEY] withdrawing the amendment.

I understand that there are no further amendments.

Mr. COBEY. Mr. Chairman, will the gentleman yield further?

Mr. LAGOMARSINO. I yield to the gentleman from North Carolina.

Mr. COBEY. I thank the gentleman for yielding.

Mr. Chairman, could the Chairman of the subcommittee give me some assurance as to how sooon those hearings could be held?

Mr. MICA. The Chair would say very frankly, and this is not an intent to avoid, but as quickly as we can do it we will.

I do not have a date.

Mr. COBEY. I appreciate the response of the gentleman.

I appreciate the gentleman yielding.

Mr. LAGOMARSINO. Mr Chairman, I yield back the balance of my time.

The CHAIRMAN. Are there further amendments to the bill?

Mr. CONYERS. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I apologize for my inability to timely bring an amendment that would eliminate the National Endowment for Democracy which has been bothering a number of Members in this body and also has been voted to be abolished and defunded at least once, if memory serves me correctly.

I consider the NED to be one of the most wasteful and mischievous expenditures of funds in the foreign policy area that I've seen in some time.

At a time when we are cutting billions of dollars from programs to feed our young and poor, to house our elderly, and to educate our students, I see no justification whatsoever to be supporting this $18 million such dubious program as NED which actively supports political parties in other countries. Its a program which also has a highly dubious track record to accompany it.

According to NED's annual report, its political arms, including the National Republican Institute for International Affairs, the National Democratic Institute for International Affairs, and the American Institute for Free Labor Development, have been supporting political parties in other countries as well as organizations with clear ideological affiliations. I don't think that U.S. Government should sponsor or endorse such questionable activities.

The taxpayers don't support it, it has been embarrassing when revealed to the public in the past, it can backfire in terms of our own national interests, and in a time of budget cutting, we already have dozens of private and public organizations engaging in similar activities.

Mr. Chairman, we all remember how embarrassing it was when it became public last year when a NED recipient spent $20,000 to actively support a Presidential candidate in Panama in a very close election. How many more debacles of this sort will we see?

What about the embarrassing political repercussions of supporting an organization which, with a U.S. Government sanction, meddles in foreign elections. Are U.S. interests really served through this overzealous expenditure of Federal moneys for such a dubious political purpose?

What happens if the President's political party supports, in any election in any country, a political party that does not prevail? We would be putting the United States in an unprecedented position of having to deal with a foreign country where the elected officials he himself opposed through his political party.

Some argue that NED recipients use these large sums of money simply for technical assistance and get out to vote. I think that one has to be somewhat naive to buy this. Political parties get out to vote who they want to get out to vote. Additionally, if you support a political party in any way, you support it in every way. A party is like an institution. It is a fungible whole. If you support one part of it, you promote the whole program.

The credibility and utility of NED is also questioned by a March GAO report which concluded that NED had improperly and perhaps illegally diverted funds to the political party institutes after Congress last year mandated that the party institutes be ineligible for NED grants.

Mr. Chairman, it is ironic that when an organization giving funds to promote democracy ends up interfering in free elections of another country, that a group such as NED, which claims to be dedicated to the rule of law, disregards the very statutes that created it, and that a group which should avoid any conflict of interest gives most of its funds to groups represented on its board.

The U.S. Government has more than enough to account for with the CIA than to explain the activities of any NED-sponsored activity. This is not about left, right, or center. It is about whether we should be butting into elections in other countries.

There are a dozen private and public groups attempting to promote democracy throughout the world. These include the State Department's Agency for International Development and the U.S. Information Agency, the Peace Corps, and others. Last year, private citizens contributed over $1.5 billion to such private groups.

At a time of unprecedented Federal deficits, and with dozens of public and private organizations already installed for this purpose, with its questionable political track record, and with its lavish expense and travel accounts, if we are really serious about cutting the deficit, then we should cut this.

Legally, NED is a private entity. Perhaps it would be better off it it sought private funding. It was a bad idea from the start. I hope that the House will now reaffirm the position that it took last year. This was a bad idea to begin with.

Mr. BROWN of Colorado. Mr. Chairman, I move to strke the requisite number of words.

Mr. Chairman, I would just like to comment briefly on the National Endowment for Democracy and the real progress I believe that has been achieved in this session. The measure that is before the body has some major shifts and changes in the National Endowment for Democracy. First of all, the issue of disclosure and Freedom of Information Act has been addressed not only with the McCain amendment but with the amendments that are contained in section 505. It is not perfect, but I believe it represents substantial progress and a sincere and honest effort on the part of the chairman and its ranking member to address this important issue.

Second, on funding, the committee has been willing to cut back the authorization funding in line with the freeze proposal and I believe that represents an honest and a sincere effort to face up to our funding dilemma.

Third, the political parties specifically have been addressed in the amendments that are before the body.

In subparagraph 3, it indicates clearly no funds granted to the political party institutes by the endowment may be used to finance activities of the Republican or Democratic National Committees.

Mr. Chairman, I add those remarks because, while I have not been a fan of the activities of the National Endowment for Democracy, I believe there has been substantial progress made in this piece of legislation and I believe through the leadership of the chairman we have seen many of what I had considered abuses or potential abuses of the Endowment corrected in this legislation.

Mr. MICA. Mr. Chairman, will the gentleman yield?

Mr. BROWN of Colorado. I yield to the gentleman from Florida.

Mr. MICA. I thank the gentleman for yielding, for just about 10 seconds.

Mr. Chairman, I want to commend the gentleman. What we see here today is a year of cooperative work to address the legitimate problems that the gentleman raised and to have the gentleman stand up and speak like that is really a tribute to the work of the entire committee. I thank the gentleman very much.

Ms. SNOWE. Mr. Chairman, will the gentleman yield to me?

Mr. BROWN of Colorado. I yield to the gentlewoman from Maine.

Ms. SNOWE. I thank the gentleman for yielding.

Mr. Chairman, I thank the gentleman for his comments as well because we tended to address a number of the issues that the gentleman from Colorado [Mr. BROWN] has raised over the last several years since the inception of the National Endowment for Democracy. As one who originally opposed the National Endowment, because of the changes that have been made to address the misgivings of Members like those of the gentleman, I hope that we can now see a positive outcome and results from the National Endowment for Democracy.

We should give it an opportunity to work to strengthen democratic institutions throughout the world.

So hopefully we have made sufficient changes to address the possible misuse of funds or any misgivings concerning the program.

So I thank the gentleman for his comments and we will now await the results.

Mr. BROWN of Colorado. I thank the gentlewoman for comments and for her leadership on this subject.

The CHAIRMAN. Are there further amendments to the bill?

If not, under the rule, the Committee rises.

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. PEASE, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 2068) to authorize appropriations for fiscal years 1986 and 1987 for the Department of State, the U.S. Information Agency, the Board of International Broadcasting, and for other purposes, pursuant to House Resolution 137, he reported the bill back to the House with sundry amendments adopted by the Committee of the Whole.

The SPEAKER. Under the rule, the previous question is ordered.

Is a separate vote demanded on any amendment? If not, the Chair will put them en gros.

The amendments were agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

□ 1640

The title was amended so as to read: "A bill to authorize appropriations for fiscal years 1986 and 1987 for the Department of State, the United States Information Agency, the Board for International Broadcasting, and for other purposes."

A motion to reconsider was laid on the table.

AUTHORIZING THE CLERK TO MAKE TECHNICAL CORRECTIONS IN THE ENGROSSMENT OF H.R. 2068

Mr. MICA. Mr. Speaker, I ask unanimous consent that, in the engrossment of the bill H.R. 2068, the Clerk be authorized to correct section numbers, punctuation, and cross references and to make such other technical and conforming changes as may be necessary to reflect the actions of the House in amending the bill.

The SPEAKER. Is there objection to the request of the gentleman from Florida?

There was no objection.

GENERAL LEAVE

Mr. MICA. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill just passed.

The SPEAKER. Is there objection to the request of the gentleman from Florida?

There was no objection.

PERMISSION FOR COMMITTEE ON WAYS AND MEANS TO FILE REPORT ON H.R. 1868, THE MEDICARE AND MEDICAID PATIENT AND PROGRAM PROTECTION ACT OF 1985

Mr. PEASE. Mr. Speaker, I ask unanimous consent that the Committee on Ways and Means be permitted to file its report on the bill, H.R. 1868, the Medicare and Medicaid Patient and Program Protection Act of 1985 on Friday, May 10.

The SPEAKER. Is there objection to the request of the gentleman from Ohio.

There was no objection.

LEGISLATIVE PROGRAM

(Mr. BOEHLERT asked and was given permission to address the House for 1 minute.)

Mr. BOEHLERT. Would the distinguished majority leader please enlighten us as to the schedule for next week?

Mr. WRIGHT. I am delighted to respond to the acting minority leader. This concludes the business for today and for this week. When we adjourn today we will ask to adjourn until 11 o'clock on Monday. The reason we want to come in at 11 o'clock is because that is the annual observance of Former Members Day, from 11 until 12 here on the House floor.

They have an honorable society, to which many of us aspire some day to belong, not in any big hurry about it, but some day. They will meet here at 11 o'clock on Monday. We will declare a recess, if that permission is granted for that purpose.

Then we will have suspensions Monday. There are six bills that we hope to bring on the suspension of the rules, postponing votes until Tuesday on the suspensions.

They are as listed on a sheet which I believe the gentleman from New York has in his possession, H.R. 873, providing authority for additional Federal employee health benefit plans; H.R. 105, providing for the Washington Square at the Independence National Historical Park in Philadelphia.

H.R. 934, erosion control at the Cuyahoga National Recreation Area; House Concurrent Resolution 95, pro-

viding for the 20th anniversary of the Head Start Program; House Concurrent Resolution 132, providing for the 20th anniversary of the Older Americans Act; and H.R. 2005, to amend title II of the Social Security Act to make technical changes.

On Tuesday, we would expect to take up a bill providing Panama Canal authorization, and one providing the Maritime authorization, each under an open rule with 1 hour of general debate, and then we would hope to adopt a rule on the Foreign Assistant Act authorizations. That is an open rule with 1 hour of debate, but we would adopt that rule only on Tuesday.

On Wednesday and the balance of the week, we meet at 10 o'clock a.m. and take up the Department of Defense authorization bill, subject to the granting of a rule, hoping to take the rule and the general debate on Wednesday and conclude it on—we will have the general debate on Thursday. That is a bill of some substance, and we are not sure that we would be able to conclude it next week.

Mr. BOEHLERT. Am I correct that there are no legislative votes scheduled for Monday?

Mr. WRIGHT. The gentleman is correct. There are no legislative votes scheduled.

Mr. LOTT. Will the majority leader yield, please.

Mr. WRIGHT. Of course, the gentleman from New York has the time. I am sure he would yield.

Mr. BOEHLERT. I yield to the gentleman.

Mr. LOTT. I had a number of questions I would like to ask about, if I could.

Perhaps I missed it, but the rule on the Panama Canal authorization and the maritime authorization, I know the one on maritime authorization has not been passed yet and I do not think the one on the Panama Canal authorization has been passed yet, so I presume that we would, on Tuesday that you would intend to take up the rule, and then go to the general debate and the vote on the Panama Canal authorization and the maritime authorization. Is that correct?

Mr. WRIGHT. That would be our expectation, to vote on those two things as well as any votes that would be held over from the suspensions considered on the previous day.

Mr. LOTT. And then the rule on the Defense authorization bill is not referred to, either, so I presume that that rule would come up on Wednesday just prior to the Defense authorization bill coming up.

Mr. WRIGHT. Yes, that would have to happen, would it not. We would expect to have a vote on that rule on Wednesday and go into general debate.

Then probably on Thursday we would expect to have the general debate on the Foreign Assistance Act authorization.

Mr. LOTT. Now, looking at this schedule, it looks to me like that except for some votes on the Journal or something of that nature, that there would not be recorded votes after Tuesday on either amendments to the Defense authorization bill or the Foreign Assistance Act, if it should come up, because it does say general debate only.

So you anticipate, other than potentially procedural votes, no votes on Wednesday, Thursday, or Friday of next week?

Mr. WRIGHT. Of course there would have to be a debate on the rule, I suppose. Beyond that, I am not sure that there would be any requisite votes and the probability is that the House will want to debate these matters and consider them in general debate, and give them ample time for full consideration.

Mr. LOTT. Well, I think I know what is happening Thursday or Friday, but forgive me, I do not know why on Wednesday we would not possibly have recorded votes.

Is there any particular reason?

Mr. WRIGHT. Oh, I fully expect that on Wednesday there would probably be a vote on the rule for the Defense authorization, and then I suppose that the Defense authorization would consume sufficient time in the general debate that it would consume most of the the day. I doubt very much that we would get to the point of having to, being able to get into the 5-minute rule, because that is a very big bill; as the gentleman knows, that is probably the largest single authorization bill that the House considers in a given year.

Mr. LOTT. The Members should expect probably at least one or two votes on Wednesday?

Mr. WRIGHT. Members will probably want to have a vote on the adoption of the rule. I do not know whether anybody will demand a rollcall vote on it or not, but if one did, then that vote could indeed come on Wednesday.

Mr. LOTT. You do not intend to complete consideration, though, of the Defense authorization bill next Friday.

Mr. WRIGHT. I very much doubt that it will occur.

Mr. LOTT. Could the distinguished majority leader give us any information about the status of the budget? Next week also includes May 15, which is supposed to be a magic day with regard to having to get action on the budget here in the House.

I know the other body has been addressing that question, shall we say, but this one does not seem to have done anything yet; either a subcommittee or a full committee level, and certainly not on the floor, and May the 15th is upon us.

What is the status of the budget resolution out of the Budget Committee?

Mr. WRIGHT. The hearings have been conducted in the Budget Committee, on the budget resolution. The gentleman will recall that last year, we were quite early in our adoption of the budget resolution on the floor. I think we passed the budget resolution on the House floor in April, perhaps it was April 9 last year, and that was a budget resolution which called for $181 billion in cuts in the deficit, below the figures that had been projected in the budget submitted by the executive branch.

We passed that, and it went over to the other body and languished there for many weeks, I think it was June before the other body passed a budget resolution last year, and then it was August before they assented to meet us in conference.

For those reasons, we had not thought it not necessary to bring the budget resolution next week; we had been requested by the chairman of the Armed Services Committee to schedule the Department of Defense authorization bill.

□ 1650

And I think the Department of Defense was anxious to have that considered, as well. That is the reason we scheduled it.

The budget we had thought would be best considered after the other body had completed its action. As the gentleman knows, they have not done so, unless they have done so in the last few minutes. We had heard early reports, back in January, from the majority leader in the Senate and also from the chairman of the Budget Committee to the effect that they would have a budget in place by February 1, I think I recall. That date has long since passed, of course. Then we heard there would be one by February 15, and we were waiting until that occurred and adopted the general rule that we would wait and see what the other body did because we did not feel that we should be denying them or preempting them the opportunity to perform their action.

As of the moment, I think they have not yet completed their action on that budget. Once they do, perhaps I could respond intelligently to the gentleman. There is no deliberate plan, I can report, to delay or to drag our feet, and I would expect that the Budget Committee probably would be in markup next week on the budget resolution.

Mr. LOTT. If the gentleman will yield further, I would like to just note here that I think we are getting in a real problem around here with our schedule, in that we are now at the

end of the week of the 11th. Next week we will complete very little action. We will not complete the Foreign Assistance Act authorization; we will not complete the Defense Department authorization; we are not going to take up the budget resolution. We are going to be out for a few days at the end of this month for the Memorial Day recess. We have got a supplemental appropriations bill coming along. I think more and more is being shoved off later and later into the month of June, and we are going to have a real problem as we get into the summer and try to complete the work we need to do around here.

One of the things that concerns me on this May 15 deadline, we have got committees that are coming forward now having to get budget waivers because we have not had a budget resolution.

So next week I propose to offer and will offer an amendment to the appropriate legislation that would require that with any waivers of the Congressional Budget Act the Rules Committee has to report, accompanying that waiver, an explanation of and a justification of any such waiver and a summary of comments received from the Committee on the Budget with respect to any such waiver. I think that we need to have an understanding here that we are proceeding without a budget. We are going to have to waive every bill that comes to the floor, and I think, at the very minimum, the Rules Committee ought to have to give an explanation in the their report as to why that is being done. So I do want to put the Members on notice that next Tuesday I plan to offer that amendment.

Mr. WRIGHT. If the gentleman from New York would yield, I would just like to comment that I am sure the gentleman from Mississippi is most anxious to expedite the business of the House. I appreciate his diligence and his concern over the dilatory tactics that some Members have employed this year. I know that the gentleman from Mississippi will use his quite considerable influence to put at a minimum any further dilatory tactic, delay, guerrilla warfare, obstructionism or just general downright cussedness that might occur on either side of the aisle.

Mr. LOTT. If the gentleman from New York will yield, I appreciate the comment and the intent of the distinguished majority leader to move legislation forward, and that is why I have been asking these questions about next week's schedule. As a matter of fact, we are going to have 1 day next week on which we are going to have substantive votes. That is Tuesday.

Mr. WRIGHT. And the gentleman from Mississippi has given us an additional matter to consider on that particular day. I want to express my appreciation to him for having fleshed out the schedule, so to speak.

Mr. LOTT. Well, we want to put the distinguished majority leader on notice as to some of the things he might expect next week. But I want the Members to take note, when there is talk around here about dilatory tactics of the previous few days or weeks, that in next week's schedule we are going to have 3 days of the week on which we will have no substantive votes here in the House of Representatives. That is not the result of any kind of dilatory tactics by any of the Members on this side of the aisle.

ADJOURNMENT TO MONDAY, MAY 13, 1985

Mr. WRIGHT. Mr. Speaker, I ask unanimous consent that when the House adjourns today it adjourn to meet at 11 a.m. on Monday next.

The SPEAKER pro tempore (Mr. GRAY of Illinois). Is there objection to the request of the gentleman from Texas?

There was no objection.

AUTHORIZING SPEAKER TO DECLARE A RECESS ON MONDAY, MAY 13, 1985

Mr. WRIGHT. Mr. Speaker, I ask unanimous consent that it may be in order for the Speaker to declare a recess, subject to the call of the Chair, on Monday, May 13, 1985, for the purpose of receiving in this Chamber former Members of Congress.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

DISPENSING WITH CALENDAR WEDNESDAY BUSINESS ON WEDNESDAY NEXT

Mr. WRIGHT. Mr. Speaker, I ask unanimous consent that the business in order under the Calendar Wednesday rule be dispended with on Wednesday next.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

NATURAL RESOURCES SUBSIDY

(Mr. GIBBONS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.

Mr. GIBBONS. Mr. Speaker, today I am introducing a very important piece of legislation addressing the problem of natural resource subsidies. Although a similar provision was passed by the House of Representatives during the 98th Congress as part of H.R. 4784, the Trade Remedies Reform Act, the provision was dropped in conference due to administration objections and did not become part of the Trade and Tariff Act of 1984.

The problem of foreign government regulatory controls affecting natural resource distribution is one of growing concern to U.S. industries. These policies, which are becoming particularly noticeable in the energy, mining, and timber sectors, generally involve a rigidly controlled high world price for the resource coupled with a domestic price that is a mere fraction of the world price. Such policies are being pursued by a number of resource-rich countries to promote their own export industries, and in the process, are causing material injury to resource-based manufacturers in the United States.

The competitive position of many U.S. industries, such as the cement, ammonia, refining, lumber, and petrochemical industries has deteriorated in recent years as a direct result of foreign governments' natural resource subsidies. I strongly believe that these government resource policies are subsidy practices, and that they should be cognizable under our countervailing duty law if they cause injury to U.S. industries.

The bill I am introducing today addresses the trade distorting effects resulting from the subsidization of input products used in manufacturing articles such as cement, ammonia, carbon black, petrochemicals, and gasoline as well as the trade distorting effects resulting from subsidization of removal rights relating to input products to be sold in this country at prices substantially below what would otherwise be a fair price absent any government regulation and below prices charged to U.S. producers who do not have access to such subsidized inputs or removal rights. The bill contains a material injury test to conform to our GATT obligations.

This bill would amend our countervailing duty law to clearly establish that a subsidy exists when a government, acting through a controlled or regulated entity, sells an input product or sells or grants the right to remove or extract an input product to domestic industries at a price that is below market value for such inputs or removal rights. The subsidy would only exist if the controlled domestic price of the input product is not freely available to U.S. purchasers and if the resource components constitutes a substantial portion of the total production costs of the final manufactured product. The provision would authorize a countervailing duty against the final manufactured product, but only if imports of such products cause or threaten to cause material injury to U.S. producers of the like product.

The subsidy would be measured by the difference between the domestic price for such resource input products or removal right and the fair market value of such product or removal right. The fair market value for an input product would be the price that, in the absence of government regulation or control, a willing buyer would pay a willing seller for that product from that country in an arms length transaction. Among the factors which shall be taken into account in making this determination is the export price of the product.

The fair market value of a removal right would be:

(i) The price paid for a comparable removal right in a comparable region in the country (other than the country providing or selling the right) which has the largest number of arms-length sales of such rights, or

(ii) If no country sells a comparable removal right at arms length, the price that a willing buyer would pay a willing seller in an arms-length transaction for the removal right in the country providing or selling the right.

I urge my colleague to join me on this legislation to help lend the playing field for the many U.S. industries which are being devastated by these subsidy practices.

COMMUNICATION FROM HONORABLE MARY ROSE OAKAR

The SPEAKER pro tempore laid before the House the following communication from the Honorable MARY ROSE OAKAR, Member of Congress:

HOUSE OF REPRESENTATIVES,
Washington, DC, May 8, 1985.

Hon. THOMAS P. O'NEILL, Jr.,
Speaker of the House, H-204, the Capitol, Washington, DC.

DEAR MR. SPEAKER: This is to notify you, pursuant to Rule L(50) of the Rules of the House, that I have recently been served with a civil trial subpoena issued by the United States District Court for the Eastern District of Virginia, Alexandria Division.

I have consulted with the General Counsel to the Clerk of the House and have determined that compliance with this subpoena is consistent with the privileges and precedents of the House of Representatives.

Sincerely,

MARY ROSE OAKAR,
Member of Congress.

HAWAII'S SMALL BUSINESSMAN OF THE YEAR: ROBERT M. FUJIMOTO

(Mr. AKAKA asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. AKAKA. Mr. Speaker, I rise before this august body to honor an outstanding citizen of my fair State. I wish to speak of a man whose contributions in business and community service have garnered the deepest admiration and respect of his colleagues, neighbors, and friends. I speak in honor of a man and his business which have survived natural disasters and the vagaries of the market to become a success. My fellow colleagues, I rise today during Small Business Week to salute Hawaii's Small Businessman of the Year, Mr. Robert M. Fujimoto.

The story of Mr. Fujimoto's business career is rooted in his four-generation family business, HPM Building Supply of Hilo, HI. Founded in 1921 by Robert's grandfather, Kametaro Fujimoto, HPM Building Supply originally processed rough hewn timbers from the mainland and supplied the finished lumber to building contractors.

In 1929, Kametaro's son, Barney, took over and expanded the firm by adding other construction supplies to the family lumber business. Then disaster struck. In 1946, a tsunami wiped out the lumber mill. The Fujimoto family pulled themselves up by their bootstraps, rebuilt and prospered.

In 1954, our honoree Robert Fujimoto, assumed leadership of HPM Building Supply. Then, in 1960, a second tsunami completely destroyed the company's newly relocated and enlarged facility. Robert was able to rebuild with the help of a $650,000 Small Business Administration [SBA] Disaster Assistance Loan, hard work, determination, and talent. By 1968, Robert was able to refinance his SBA loan and further expand his business.

Today, Robert's son, Michael, who developed under the tutelege of his father, is at the helm of HPM Building Supply. This extremely successful company now has a corrugated metal facility, a lumber and truss manufacturing plant, a lumber pressure treating facility, a prehung door operation, as well as the latest management tools such as a modern electronic accounting system. Last year, HPM's sales exceeded $18 million and employed 112 people, a considerable number in our big island community.

Mr. Fujimoto's achievements as an entrepreneur were recognized by his peers. He is now director of one of Hawaii's largest corporations, C. Brewer & Co.

Furthermore, Mr. Fujimoto, as all leaders do, has made the time to serve his community. He has won awards for his contributions to scouting and has been a leader in United Way campaigns. He has also served on the Hawaii State Board of Land and Natural Resources and has chaired the University of Hawaii's board of regents, two of the most important executive and policymaking bodies in the State.

Enduring tidal waves and the fluctuations of the construction industry, Bobby, as his friends call him, has distinguished himself as a true leader. This week we repay him in some small measure as Hawaii's Small Businessman of the Year.

□ 1130

PLANT CITY, FL: THE SPIRIT OF AMERICA

(Mr. BILIRAKIS asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. BILIRAKIS. Mr. Speaker, all of us have communities in our districts that truly embody the spirit of America. One of those cities I am fortunate to represent is Plant City, FL.

This year marks the 100th anniversary of Plant City, and residents have been celebrating it in a grand fashion. There have been parades, fireworks, songfests, pioneer days, and the golden anniversary of the Strawberry Festival.

I can honestly say that the enthusiasm, pride, and sense of history displayed by the people of Plant City have made it an honor for me to represent them in Congress.

The people of Plant City wish to share their centennial celebration with you, and tomorrow through strawberry growers Tommy Brock, Johnny St. Martin, Carl Grooms, Charlie Grimes, Darryl Williams, and F.G. "Jerry" McDonald Produce, each of your offices will receive delicious Plant City strawberries. These particular berries had an official send off by mayor of Plant City, J.D. Merrill; Strawberry Festival president, B.M. "Mac" Smith; and Strawberry Growers Association executive director, Dr. Charles F. "Chip" Hinton.

Mr. Speaker, in our increasingly complicated world, places like Plant City are extremely important. As they join in celebration of themselves, they also celebrate the spirit of all America.

The Plant City calendar of events follows:

CENTENNIAL CALENDAR OF EVENTS

September 6—Release Centennial Edition *Plant City: Its Origin and History* by Quintilla Geer Bruton and D.E. Bailey, Jr. and *100th Anniversary Calendar*, both sponsored by the East Hillsborough Historical Society, Meet the Authors Party, Lobby, Hillsboro Sun Bank.

September 24—100th Anniversary Plant City Courier.

October 3—Centennial Fantasy Fashions, Yesterday and Today. Sponsored by the Junior Woman's Club.

October 4)—Second Century Kick-off Bar-B-Que sponsored by the Pilot Club.

October 27—Henry B. Plant Birthday Banquet sponsored by the East Hillsborough Historical Society.

November 16-18—Plant City's Flying High Centennial Celebration Hot Air Balloon Race, Florida State University Flying Circus, Carnival and Concessions by Area Civic Clubs Centennial Classic Run.

December 1—Centennial Christmas Parade, sponsored by Holiday Inn; Christmas at the Depot, sponsored by the Arts Council.

December 20—Historic District Walking Tour and Caroling sponsored by East Hills-

borough Historical Society and Arts Council.

January 9—Centennial Ball sponsored by the Chamber of Commerce.

January 10—100th Birthday Celebration—Downtown Plant City.

February 2—Strawberry Ball, Celebrating Fifty Years of Memories Sponsored by the Strawberry Festival.

February 7—Strawberry Festival Fashion Show and Luncheon Celebrating Fifty Years of Memories sponsored by Strawberry Festival.

February 28-March 9—Florida Strawberry Festival and Hillsborough County Fair—Golden Anniversary.

March 4—Grand Feature Parade Celebrating The Festival's Golden Anniversary and Plant City's Centennial sponsored by Strawberry Festival.

March 31—Palm Sunday Community-wide Choral Performance.

April 7—Sunrise Easter Service at Walden Lake.

April 20—Centennial Children's Fun Festival sponsored by Arts Council; Centennial Health Fair sponsored by South Florida Baptist Hospital.

May 4-5—Centennial Flower Show sponsored by area Garden Clubs.

May 3—Henry B. Plant Art Exhibit sponsored by First National Bank of Florida and Arts Council.

May 15—Law Enforcement Banquet.

May 18—Centennial Pioneer Day sponsored by East Hillsborough Historical Society.

June—School Class Reunions Month.

July 4—A Salute to Independence; Religious Emphasis Month.

July 25—100th Anniversary Celebration, First Presbyterian Church.

September—Plant City Business Showcase sponsored by Chamber of Commerce.

THE PRIVATE CALENDAR

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Massachusetts [Mr. BOLAND] is recognized for 5 minutes.

● Mr. BOLAND. Mr. Speaker, I would like to take this opportunity to set forth some of the history behind, as well as describe the workings of the Private Calendar. I hope this might be of some value to the Members of this House, especially our newer colleagues.

Of the five House calendars, the Private Calendar is the one to which all private bills are referred. Private bills deal with specific individuals, corporations, institutions and so forth, as distinguished from public bills which deal with classes only.

Of the 108 laws approved by the First Congress, only 5 were private laws. But their number quickly grew as the wars of the new Republic produced veterans and veterans' widows seeking pensions and as more citizens came to have private claims and demands against the Federal Government. The 49th Congress, 1885 to 1887, the first Congress for which complete workload and output data is available—passed 1,031 private laws, as compared with 434 public laws. At the turn of the century the 56th Congress passed 1,498 private laws and 443 public laws—a better than 3-to-1 ratio.

Private bills were referred to the Committee of the Whole House as far back as 1820, and a calendar of private bills was established in 1839. These bills were initially brought before the House by special orders, but the 62d Congress changed this procedure by its rule XXIV, clause 6 which provided for the consideration of the Private Calendar in lieu of special orders. This rule was amended in 1932 and then adopted in its present form on March 22, 1935.

A determined effort to reduce the private bill workload of the Congress was made in the Legislative Reorganization Act of 1946. Section 131 of that act banned the introduction or the consideration of four types of private bills: first, those authorizing the payment of money for pensions; second, for personal or property damages for which suit may be brought under the Federal tort claims procedure; third, those authorizing the construction of a bridge across a navigable stream, or fourth, those authorizing the correction of a military or naval record.

This ban afforded some temporary relief but was soon offset by the rising postwar and cold war flood for private immigration bills. The 82d Congress passed 1,023 private laws, as compared with 594 public laws. The 88th Congress passed 360 private laws compared with 666 public laws.

Under rule XXIV, clause 6, the Private Calendar is called the first and third Tuesday of each month. The consideration of the Private Calendar bills on the first Tuesday is mandatory unless dispensed with by a two-thirds vote. On the third Tuesday, however, recognition for consideration of the Private Calendar is within the discretion of the Speaker and does not take precedence over other privileged business in the House.

On the first Tuesday of each month, after disposition of business on the Speaker's table for reference only, the Speaker directs the call of the Private Calendar. If a bill called is objected to by two or more Members, it is automatically recommitted to the committee reporting it. No reservation of objection is entertained. Bills unobjected to are considered in the House in the Committee of the Whole.

On the third Tuesday of each month, the same procedure is followed with the exception that omnibus bills embodying bills previously rejected have preference and are in order regardless of objection.

Such omnibus bills are read by paragraph, and no amendments are entertained except to strike out or reduce amounts or provide limitations. Matters so stricken out shall not be again included in an omnibus bill during that session. Debate is limited to motions allowable under the rule and does not admit motions to strike out the last word or reservation of objections. The rules prohibit the Speaker from recognizing Members for statements or for requests for unanimous consent for debate. Omnibus bills so passed are thereupon resolved in their component bills, which are engrossed separately and disposed of as if passed separately.

Private Calendar bills unfinished on one Tuesday go over to the next Tuesday on which such bills are in order and are considered before the call of bills subsequently on the calendar. Omnibus bills follow the same procedure and go over to the next Tuesday on which that class of business is again in order. When the previous question is ordered on a Private Calendar bill, the bill comes up for disposition on the next legislative day.

Mr. Speaker, I would also like to describe to the newer Members the official objectors system the House has established to deal with the great volume of private bills.

The Majority Leader and the Minority Leader each appoint three Members to serve as Private Calendar objectors during a Congress. The objectors are on the floor ready to object to any private bill which they feel is objectionable for any reason. Seated near them to provide technical assistance are the majority and minority legislative clerks.

Should any Member have a doubt or a question about a particular private bill, he can get assistance from objectors, their clerks, or from the Member who introduced the bill.

The great volume of private bills and the desire to have an opportunity to study them carefully before they are called on the Private Calendar has caused the six objectors to agree upon certain ground rules. The rules limit consideration of bills placed on the Private Calendar only shortly before the calendar is called. The agreement adopted on June 3, 1958, the members of the Majority Private Calendar Objectors Committee have agreed that during the 99th Congress, they will consider only those bills which have been on the Private Calendar for a period of 7 days, excluding the day the bill is reported and the day the calendar is called. Reports must be available to the objectors for 3 calendar days.

It is agreed that the majority and minority clerks will not submit to the objectors any bills which do not meet this requirement.

This policy will be strictly enforced except during the closing days of a session when House rules are suspended.

This agreement was entered into by: The gentleman from Massachusetts [Mr. BOLAND], the gentleman from Minnesota [Mr. OBERSTAR], the gentleman from Virginia [Mr. BOUCHER], the

gentleman from Wisconsin [Mr. SENSENBRENNER], the gentleman from Colorado [Mr. BROWN] and the gentleman from Ohio [Mr. DEWINE].

I feel confident that I speak for my colleagues when I request all Members to enable us to give the necessary advance consideration to private bills, by not asking that we depart from the above agreement unless absolutely necessary.

EDWARD P. BOLAND,
JAMES L. OBERSTAR,
FREDERICK C. BOUCHER,
F. JAMES SENSENBRENNER, JR.,
HANK BROWN,
MICHAEL DEWINE,
Members of Congress.●

PERSONAL EXPLANATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Florida [Mr. PEPPER] is recognized for 5 minutes.

● Mr. PEPPER. Mr. Speaker, I was unavoidably absent for the vote agreeing to the Speaker's approval of the Journal yesterday, May 8, 1985, roll No. 99. Had I been present for this vote approving the Journal by a vote of 259 yeas to 157 nays, I would have voted "aye."●

CURRENT LEVEL OF SPENDING AND REVENUES FOR FISCAL YEAR 1985

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from South Carolina [Mr. DERRICK] is recognized for 5 minutes.

● Mr. DERRICK. Mr. Speaker, on behalf of Chairman WILLIAM H. GRAY III, pursuant to the procedures of the Committee on the Budget and section 311(b) of the Congressional Budget Act of 1974, I am submitting the official letter to the Speaker advising him of the current level of spending and revenues for fiscal year 1985. There have been no changes since the last report to the House, but I am submitting a report stating such.

The current level is used to compare enacted spending after the start of a fiscal year with the aggregate ceiling on budget authority, outlays, and revenues established in a second budget resolution and enforced by point of order pursuant to section 311(a) of the act. The term current level refers to the estimated amount of budget authority, outlays, entitlement authority, and revenues that are available—or will be used—for the full fiscal year in question based only on enacted law.

As with last year, the procedural situation with regard to the spending ceiling is affected this year by section 4(b) of House Concurrent Resolution 280. Enforcement against possible breaches of the spending ceiling under section 311(a) of the Budget Act will not apply where a measure would not cause a committee to exceed its "appropriate allocation" made pursuant to section 302(a) of the Budget Act. In the House, the appropriate 302(a) allocation includes "new discretionary budget authority" and "new entitlement authority" only. It should be noted that under this procedure neither the total level of outlays nor a committee's outlay allocation is considered. This exception is only provided because an automatic budget resolution is in effect and will cease to apply if Congress revises the budget resolution for fiscal year 1985.

The intent of the section 302(a) "discretionary budget authority" and "new entitlement authority" subceiling provided by section 4(b) of the resolution is to protect a committee that has stayed within its own spending allocation—discretionary budget authority and new entitlement authority—from points of order if the total spending ceiling has been breached for reasons outside of its control. The 302(a) allocations to House committees made pursuant to the conference report on House Concurrent Resolution 280 were printed in the CONGRESSIONAL RECORD, September 25, 1984, H. 10190 [daily edition] (H. Rept. 98-1079, page 32).

As Chairman of the Budget Process Task Force, and on behalf of Chairman GRAY, I intend to keep the House informed regularly on the status of current level.

COMMITTEE ON THE BUDGET,
Washington, DC, May 9, 1985.

Hon. THOMAS P. O'NEILL, Jr.,
Speaker, U.S. House of Representatives, Washington, DC.

DEAR MR. SPEAKER: On January 30, 1976, the Committee on the Budget outlined the procedure which it had adopted in connection with its responsibilities under Section 311 of the Congressional Budget Act of 1974 to provide estimates of the current level of revenues and spending.

Pursuant to Committee Rule 10, I am herewith transmitting the status report under H. Con. Res. 280, the First Concurrent Resolution on the Budget for Fiscal Year 1985. This report reflects the adopted budget resolution of October 1, 1984, and the current CBO estimates of budget authority, outlays, and revenues.

As with last year, the procedural situation with regard to the spending ceiling is affected this year by Section 4(b) of H. Con. Res. 280. Enforcement against possible breaches of the spending ceiling under Section 311(a) of the Budget Act will not apply where a measure would not cause a committee to exceed its "appropriate allocation" made pursuant to Section 302(a) of the Budget Act. In the House, the appropriate 302(a) allocation includes "new discretionary budget authority" and "new entitlement authority" only. It should be noted that under this procedure neither the total level of outlays nor a committee's outlay allocation is considered. This exception is only provided because an automatic budget resolution is in effect and will cease to apply if Congress revises the budget resolution for fiscal year 1985.

The intent of the Section 302(a) "discretionary budget authority" and "new entitlement authority" subceiling provided by Section 4(b) of the resolution is to protect a committee that has stayed within its spending allocation—discretionary budget authority and new entitlement authority—from points of order if the total spending ceiling has been breached for reasons outside of its control. The 302(a) allocations to House committees made pursuant to the conference report on H. Con. Res. 280 were printed in the Congressional Record, September 25, 1984, H. 10190 (H. Rept. 98-1079, page 32).

The attached tables compare actual legislation to each committee's 302(a) allocation of discretionary budget authority and of new entitlement authority.

With best wishes,

Sincerely,

WILLIAM H. GRAY III,
Chairman.

REPORT TO THE SPEAKER OF THE U.S. HOUSE OF REPRESENTATIVES FROM THE COMMITTEE ON THE BUDGET ON THE STATUS OF THE FISCAL YEAR 1985 CONGRESSIONAL BUDGET ADOPTED IN H. CON. RES. 280

REFLECTING COMPLETED ACTION AS OF MAY 8, 1985

[In millions of dollars]

	Budget authority	Outlays	Revenues
Appropriate Level	1,021,350	932,050	750,900
Current Level	1,015,965	933,359	750,739
Amount under ceilings	5,385		
Amount over ceilings		1,309	
Amount under floor			161

BUDGET AUTHORITY

Any measure providing budget or entitlement authority which is not included in the current level estimate and that exceeds $5,385 million for fiscal year 1985, if adopted and enacted, would cause the appropriate level of budget authority for that year as set forth in H. Con. Res. 280 to be exceeded.

OUTLAYS

Any measure providing budget or entitlement authority which is not included in the current level estimate in outlays for fiscal year 1985, if adopted and enacted, would cause the appropriate level of outlays for that year as set forth in H. Con. Res. 280 to be exceeded.

REVENUES

Any measure that would result in a revenue loss for fiscal year 1985, if adopted and enacted, would cause revenues to be less than the appropriate level for that year as set forth in H. Con. Res. 280.

FISCAL YEAR 1985 BUDGET AUTHORITY—COMPARISON OF CURRENT LEVEL AND BUDGET RESOLUTION ALLOCATION BY COMMITTEE

U.S. CONGRESS,
CONGRESSIONAL BUDGET OFFICE,
Washington, DC, May 8, 1985.

Hon. WILLIAM H. GRAY III,
Chairman, Committee on the Budget, U.S. House of Representatives, Washington, DC.

DEAR MR. CHAIRMAN: Pursuant to section 308(b) and in aid of section 311(b) of the Congressional Budget Act, this letter and supporting detail provide an up-to-date tabulation of the current levels of new budget authority, estimated outlays and estimated revenues in comparison with the appropriate levels for those items contained in the most recently agreed to concurrent resolution on the 1985 budget (H. Con. Res. 280). This report for fiscal year 1985 is tabulated as of close of business April 3, 1985, and is based on assumptions and estimates consistent with H. Con. Res. 280. A summary of this tabulation is as follows:

[In millions of dollars]

	Budget authority	Outlays	Revenues
Current level	1,015,965	933,359	750,739
1985 budget resolution, H. Con. Res. 280	1,021,350	932,050	750,900
Current level is:			
Over resolution by	....	1,309	....
Under resolution by	5,385	....	161

Since my last report the Congress has cleared Appropriations for the MX Missile, H.J. Res. 181, urgent supplemental appropriations for Emergency Famine Relief and Recovery in Africa, H.R. 1239, and the Federal Supplemental Compensation Phaseout Act, H.R. 1866.

With best wishes,
Sincerely,

RUDOLPH G. PENNER.

PARLIAMENTARIAN STATUS REPORT—HOUSE SUPPORTING DETAIL, FISCAL YEAR 1985 AS OF CLOSE OF BUSINESS MAY 8, 1985

[In millions of dollars]

	Budget authority	Outlays
I. Enacted:		
Permanent appropriations and trust funds	651,994	579,636
Enacted previous session	543,411	534,273
Offsetting receipts	−184,669	−184,669
Enacted this session	....	....
Total enacted	1,010,735	929,240
II. Entitlement authority and other mandatory items requiring further appropriation action:		
Assistance payments	23	23
Black lung trust fund	25	25
Child support enforcement	82	82
Civilian agency pay raise allowance	777	803
Coast Guard pay raise allowance	25	23
Defense pay raise allowance	2,242	2,201
Defense claims	20	3
Family social services	20	20
Medicaid	7	7
Public Health Service officers retirement pay	3	....
Range improvements	2	2
Readjustment benefits	163	156
Salaries of judges	5	5
Student loans	498	....
Supplemental security income	5	....
Veterans compensation	389	241
Total	4,286	3,591
III. Continuing resolution authority	....	....
IV. Conference agreements ratified by both Houses:		
Appropriations for the MX missile (Public Law 99–18)	....	79
Famine relief and recovery in Africa (Public Law 99–10)	784	289
Federal supplemental compensation phaseout (Public Law 99–15)	160	160
Total	944	528
Total, current level as of May 8, 1985	1,015,965	933,359
1985 budget resolution, H. Con. Res. 280	1,021,350	932,050
Amount remaining:		
Over ceiling	....	1,309
Under ceiling	5,385	....

Note:—Detail may not add due to rounding.●

□ 1700

THE TAX FAIRNESS FOR FAMILIES ACT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Indiana [Mr. COATS] is recognized for 60 minutes.

Mr. COATS. Mr. Speaker, I have asked time for this special order to highlight what I think is an extremely important issue before the Congress; one that we will be increasingly focusing on in the coming days and weeks, something that I hope my colleagues will pay a great deal of attention to, as many already have.

The subject is "Tax Fairness for Families." As we move into, I think the critical period of the discussions on tax reform, I think it is important that perhaps the one group in America that is least heard from in terms of the Tax Code and the impact of the Tax Code is the American family.

Each day as I walk from my office to the floor of the House of Representatives, I have to pass by the Ways and Means hearing room. Often, the halls are so full that is difficult to wend my way through on the way to the floor. Those halls are filled with some fairly well-paid, high-priced Washington lobbyists, there to lobby members of the Ways and Means Committee for special tax deductions for various interest groups.

Anyone who has just recently completed, as most of us have, our tax forms, this last April 15, knows how complicated and how difficult our Tax Code is. Anybody who has picked up the actual United States Code and looked at the tax provisions know that it consists of thousands and thousands of pages of materials, of deductions, of special interest provisions, accompanied by many more thousands of pages of regulations. Our Tax Code is complex to the point that very few people in our society can comprehend the various deductions and special privileges that are available for various special interest groups.

But the family does not stalk the Halls of Congress. It does not wait outside the Ways and Means Committee room; it does not have a voice as to whether or not it is being treated fairly under the Tax Code. I have had the great privilege in the last several months to be the Republican ranking member of the Children, Youth, and Family Committee, and as such, I have heard, not only in my position this last several months, but in the previous 2 years, as chairman of the Economic Security Task Force, heard testimony from families, and children, and youth from across this land as to the difficulties that our present-day families encounter.

It has become evident in those hearings that the average American family is finding it increasingly more difficult to bear the financial burdens of raising children. We have heard testimony from mothers, many of whom do not choose to be in the employment market, but out of economic necessity, find themselves working either part-time, or more often is the case, full-time, in the job market.

Mothers with small children at home that would prefer to be at home, particularly during those critical early years, early months of childhood, where the mother's presence is so needed and necessary, but, out of economic necessity, cannot do that.

We have heard from families where even with two incomes they have found that the cost of affording quality day care so their children can be taken care of when they have to work is prohibitively high.

These family difficulties, and all the accompanying family problems and social problems that result from economic difficulties within the family, are not caused, as we have found, by decreasing income, but rather are directly attributable to increasing tax

burdens on the average taxpayer in the family.

Over the past 3½ decades, median family income has increased dramatically; increased dramatically in real terms and in constant dollars. Since 1950, the median income for two-parent, one-earner families has increased more than 50 percent. For two-earner families, the median income has almost doubled. But the increase in Federal taxes for both the one-earner and the two-earner families has far outstripped the increases in income, making average families not income poor, but tax poor.

This dramatic increase was not legislated, but it came about rather because the personal exemption that is allowed to family members has not been indexed for inflation or for income growth, and as a result it has diminished greatly in value over this time period.

The personal exemption, which taxpayers take for themselves, their spouses, and their dependents, is the primary means that the Federal Government has of adjusting the tax burden according to the family's expenses for its children. Therefore, the failure to adjust the personal exemption for inflation has affected all taxpayers, but it has hurt families with children far more than any other group. I might add that the greater the number of children, the greater the tax impact has been on the family and the greater the amount of discrimination.

As I said, the personal exemption has not kept pace with either income growth or inflation growth. In 1948, the personal exemption was set by Congress at $600 for each taxpayer, spouse, and dependent. By 1979, this exemption had been raised to $1,000; a $400 increase over a substantial three-decade period. Finally, this personal exemption has been indexed for inflation, and in fact this year went up about $40 per taxpayer.

However, if the personal exemption had been indexed back to 1948, it today would be worth about $2,600. If it were to offset the same percentage of average income as it did in 1948, it would be worth $5,600. So it is this devaluation of the personal exemption that has caused a tremendous increase in the tax burden of the average family. Let us look at some of these percentages.

In 1950, when median family income was $3,319 and the exemption was $600, the personal exemption reduced the taxable income of the typical family of four by 72 percent. In 1983, the exemption reduces the taxable income of that same family by only 16 percent. In 1950, the median income family of four with one wage earner, paid 3.4 percent of its income in Federal taxes. Today, that same family pays 11.8 percent of its income in Federal taxes; a more than threefold increase.

This devaluation of the personal exemption has caused the Federal tax burden to shift disproportionately onto the backs of families with children.

For single persons and couples without children, because increases in exclusions from adjusted gross income and in itemized deductions and tax credits have offset the decreased value of the exemption, these persons face almost the same average effective tax rate in 1984 as they did in 1960. In other words, the single taxpayer or the married taxpayer and spouse without children are paying about the same average tax rate as they were in 1960.

In 1984, however, the average couple with two dependents had an effective tax rate of 43 percent higher than what they paid in 1960, and a couple with four dependents had an average tax rate 223 percent higher than what they paid in 1960.

So what have we seen? We have seen changes in the Tax Code effected so that the single taxpayer, the married taxpayer, and spouse without children, have been able to maintain a tax rate at about the same level as it was in 1960. But those families that have two children have an average tax increase of 43 percent; those with four children have an average tax increase of 223 percent. They have faced an increasingly difficult tax burden.

Was this discrimination intended? No; I do not think so. But it is the unintended consequence of the failure to index the personal exemption for increases in inflation and for increases in income growth. Therefore, our current Tax Code places a penalty on families with children. It means that for each additional child added to the family, that family has to bear a disproportionate share of the income tax burden.

The current personal exemption recognizes less than one-fourth of what the average family spends on its children, and only one-half of what it costs to raise a child in poverty. Let me illustrate that point.

The average cost of raising a child to 18 today in a middle-income family with two children, with wife employed, part-time, was estimated to be a little more than $84,000 a year in 1981.

□ 1710

Divide that by 18 and that works out to about $4,600 per child per year. The official U.S. poverty threshold is increased an average of $2,027 for each child added to a family, so what do we have here?

We have an indication from pretty reliable estimates that is costs more than $4,000 per child per year to raise children at home. We have official U.S. Government statistics that says for each additional child in a family, $2,027 is added to the poverty threshold level that is used for official statistical purposes and welfare benefit purposes. Yet, we have a Tax Code that only allows $1,000 exemption for each child, a Tax Code, then, that discriminates against a family with children.

This antifamily bias of this backdoor tax increase, unintended though it may have been, falls most heavily, interestingly enough, on those racial and ethnic groups which are also the most economically vulnerable groups.

I want to repeat this point, because it is important. We are not here talking necessarily about a white, suburban, two-child, four-person family. We are talking here about a situation where the burden of this tax inequity falls most heavily on racial and ethnic groups, which are the most economically vulnerable groups in our society today.

About 50 percent of all American families have children under 18 years of age, but 60 percent of black families and almost 70 percent of Hispanic families have children under 18 years of age. In 1960, 36 percent of all American families with children under 18 had three or more children. By 1983, that figure had dropped by more than a third, to 21 percent, as families are becoming smaller, as families are having fewer children.

But that is not the case with Hispanic families or with black families. In 1983, 31 percent of Hispanic families and 29 percent of black families in 1983 had three or more children.

It is this background, it is this 2½-year presentation of the burden of the Tax Code on the American family before our Committee on Children, Youth, and Families that has led us to look at ways in which we can address this inequity. We have seen the incidence and the problems of poverty and its effect on the American family. We have seen the struggles of the low income and the low to middle-income and the middle-income families as they attempt to meet and address the burdens of raising children from a financial standpoint. We have seen the difficulties of providing for those children because of increased costs of everything that children need across the board, the increase in clothes, and food, housing provisions, education, the things that we want to provide for our children and are necessary to provide for our children in raising a family today.

Yet, we have seen that family try to cope with that situation in an ever more difficult situation as that personal exemption has remained flat while the average tax rate for families with children has increased. For that reason, I was an early cosponsor of the Kemp-Kasten bill, the tax reform package introduced by the gentleman

from New York, Mr. KEMP, and Senator KASTEN, primarily because that bill, including all its other merits, places at its very center the whole concept of tax fairness for families by doubling the personal exemption from $1,000 a year to $2,000 a year.

I have had numerous occasions to speak with the gentleman from New York [Mr. KEMP] regarding this particular provision and know of his deep and abiding commitment to this principle, to the principle of raising the personal exemption from $1,000 to $2,000, and heard him just this morning in a news conference announce that that is one of two items that he will not compromise on in this whole tax reform process which we are now undergoing.

I have introduced a bill, H.R. 1551, the Tax Fairness for Families Act, which isolates on this particular question, and we hope, through this effort, to gather a coalition of support not only on the floor of the House of Representatives but across the country in support of tax fairness for families in raising the personal exemption from $1,000 to $2,000 per year. We want to make this a central part of tax reform.

I was pleased when the initial Treasury proposal also included the provision for the doubling of the personal exemption. I was both pleased and disappointed when the Bradley-Gephardt bill was introduced, because while it did provide for an increase in the personal exemption, it did not do so to the extent that I thought was necessary. The $2,000 level does not even bring the family to an equity position, although it goes a long way to restoring that equity position.

As I indicated earlier in my remarks, just indexing for inflation alone would require a level of $2,600 exemption, and if we tied that to growth and income, we are talking about several thousand dollars more. But we realize the political realities of what we are dealing with. We realize that we cannot redress the problem completely at one time, so we are doubling this from $1,000 to $2,000 and we want to make this a very central part of the entire tax reform process.

We think that these proposals can achieve tax fairness without increasing the deficit. Both the Kemp-Kasten proposal and Treasury-I proposal are revenue neutral; that is, they do not bring in more revenues than we currently have, nor do they take away from revenues that we currently have. I think this is an important component of tax reform. We do not want to use tax reform as a basis for dealing with the deficit because we realize the pitfalls that can result from that. We do not want to be accused of using tax reform as a guise for raising revenues for the Government, nor do we want to impact negatively on the current deficit that we have, so we have constructed these bills to be revenue neutral.

I am pleased to announce to my colleagues and to others that the provisions in the Kemp-Kasten bill and Treasury-I bill both call for a doubling of the personal exemption, yet do not impact negatively on the deficit. They are a pay-as-you-go type of process and I think bring about some basic fairness to the process.

I have more I want to say on this, but I notice that my colleague, the gentleman from Virginia [Mr. WOLF], is here and I would like to yield to him at this particular time.

Mr. WOLF. I want to thank the gentleman very much for yielding.

Mr. Speaker, I want to join the gentleman and thank him today for taking this special order to bring this important issue to the people of America.

Mr. Speaker, I would like to join my colleague today, in expressing concern about the tax burden on families. To address this issue I have joined as a cosponsor of H.R. 1551, the Tax Fairness for Families Act, introduced by Congressman DAN COATS.

A review of the statistics shows that the value of the personal exemption has decreased over the past 35 years. Even though the exemption rose from $600 in 1950 to $1,000 in 1984, it has not kept up with inflation. It would be worth nearly $5,600 today if it had done so.

As a member of the Select Committee on Children, Youth, and Families and a father, I think it is important to support the family, which is the basic component of American society, in any way we can. The figures I just mentioned contribute to my concern about the tax burden on families.

Families today have trouble making ends meet, buying homes, and raising their children with the standard of living they desire. These are difficult times for families; raising the personal deduction could assist families by making money available to families who need the cash to invest in their future.

I urge my colleagues to support a doubling of the personal exemption and to consider cosponsoring this legislation and to support all legislative efforts to relieve the financial burden on families.

□ 1720

So I want to urge all the people watching today, certainly those in Virginia and those in the other 49 States, to think seriously about this and to urge your Congressmen and your Senators to support this. This legislation is very, very important to the future of the American family. As my colleague said, it does not have a negative impact on the deficit.

What are the figures? How does this work? Is it basically revenue-neutral based on the other changes?

Mr. COATS. That is correct. As I indicated before in my remarks, the idea is embodied in the Kemp-Kasten tax reform proposal. That is a revenue-neutral proposal, as is the initial Treasury proposal. In fact, the gentleman from New York [Mr. KEMP] is here, and he can explain it better than I can. I would be happy to yield to him. He is the gentleman who really grabbed onto this idea and made it a central part of the tax reform. He has carried the torch long and hard for the American family, and I greatly appreciate his efforts.

I also want to thank my colleague, the gentleman from Virginia [Mr. WOLF], who has served so diligently and faithfully on the Select Committee on Children, Youth, and Families, and who has been a voice for the family in this Congress. Your cosponsorship of H.R. 1551, the Tax Fairness for Families Act, and your outspoken work in favor of the family over a number of years has been very important to this institution and very important to the American family.

Mr. WOLF. Mr. Speaker, I thank the gentleman very much, and I want to commend him for taking this time. I thank him for his leadership on this issue.

As the ranking member on the Select Committee on Children, Youth, and Families, you are the Member who pushed this, and I am glad you did.

I want to say this about Congressman KEMP. His leadership in this area and, quite frankly, his leadership on all the tax issues, the indexing and the tax cuts we have had before, I think, has been such a help to the American family. Anybody watching today, I think, owes a tremendous debt of gratitude to Congressman JACK KEMP.

Mr. Speaker, I thank the gentleman for yielding.

Mr. COATS. Mr. Speaker, I thank the gentleman from Virginia [Mr. WOLF], and I am happy now to yield to the gentleman from New York [Mr. KEMP]. Again I wish to express my deep appreciation for his leadership and support on this most important issue.

Mr. KEMP. Mr. Speaker, I thank my colleague, the gentleman from Indiana, for yielding, and also for the kind words. I want to express my thanks not only for his words but also those of the gentleman from Virginia [Mr. WOLF], both of whom are good friends of mine and with whom I have had a very pleasant friendship. I salute him for the effort that he has made, and I salute you for the effort you have made, Congressman COATS, on the Select Committee on Children, Youth, and Families, for your concern about

this issue, and for your recognition that the keystone of our whole democratic system, our free society, is the family. What we do in Government to help encourage the family is very instrumental, not just to the survival of that institution, but also to the overall institution of democracy and freedom for America.

So if I put it in rather expansive terms, it is just because I join the gentleman from Indiana in believing that this is one of the most important issues in America today.

Someone said this morning—I think it was Beverly La Haye—at our press conference that if the family exemption had been indexed to inflation in 1946, today the exemption would be closer to $5,000 or $6,000, not the $1,000 at which it is presently set. We are raising it to $2,000.

That is a fundamental part of reform. It is a fundamental part of the Kemp-Kasten tax simplification plan. We also index it so that we do not see a devaluation of this family exemption in the future.

We used to look at children as an asset. Today in some cases the Government has treated children as a drain on the resources of our country. I particularly appreciate the leadership of the gentleman from Indiana because he has reminded us, if we needed reminding as parents, that children are not a drain on resources, they are a resource, not just for the family in terms of those intangible things that are important to our lives but also in terms of their own futures and their own ability to produce the good life for themselves and their new families. But it is very difficult to raise children, knowing that this exemption has not been indexed.

I think highlighting the issues and reminding ourselves of these very important ideas is extremely valuable to the deliberations, not just of the House of Representatives but also of the White House, because the President soon will make a decision on what type of a tax reform bill he will send up to Capitol Hill. And the Treasury plan, as highlighted in several of our newspapers, suggests that there will be an $1,800 exemption

□ 1730

I hope that this effort that we are making today and that which was made this morning in our press conference will remind our colleagues and the President that $2,000 is just the barest equity treatment of the family exemption, that indexing should be an institutionalized part of our tax system, not only on personal income, but on the exemption.

We have to make sure that whatever tax reform moves forward in the Congress that it is aimed at expanding the economy and creating jobs and the opportunity for people and families not only to remain together, but to rise on that ladder that we call the American dream.

Not only is the job important, but how you tax that job, how you tax that family, how you tax the future is incredibly important to those basic institutions so necessary to our country, to our freedoms, to our families, to our ability to see our children rise on the ladder of opportunity.

If a woman on welfare with two or three children were to leave welfare and take a job in America today the county, the State, and the Federal Government would take away the welfare benefits or at least reduce them sharply. Then her income would be taxed to a point where in many counties in the United States that family of four, held together by the barest and most meager access to income, would literally have to earn close to $18,000 of pretax income in order to get the equivalent of about $9,000 of transfer payment income on welfare, which is not taxed.

So we have created this terrible disincentive in our economy wherein we are taxing work at such a level that it is strangling the ability of men and women to get access to the income that is so necessary to their own lives and that of their families.

I hope some day the top tax rate in America is about 24 or 25 percent and no poverty-level family has to pay any Federal income tax and the personal exemption is $2,000 or $3,000 and indexed. Then we can get this country back on the right road, the right track to full implementation of the American dream, not just for working men and women, but for all those families who are relying on us in government to do something about the poverty trap, about the inability to send your children to school or to buy a home.

There are certain things upon which I will compromise. But the two things upon which I will not compromise are the personal exemption for families must be $2,000 and indexed.

Second, tax reform must be growth oriented. It must get this economy moving at such a high level of output and employment and productivity that we can raise the national income; we can get that tide rising that will lift those boats.

Mr. COATS. Well, Mr. Speaker, I thank the gentleman for his remarks and appreciate not only the gentleman's support, but his leadership on this important issue.

Two points I think are important to follow up on what Congressman KEMP has said. First is the point of compromise. There is as we get down to the crunch period here of tax reform, there is a lot of give and take. There are interests that want to be addressed and there are, as the gentleman said, a heterogeneous composition here of this House floor that represent the 230 million-some people of this country and there are important interests; but on the question of who gives and who takes, it is important to remember that the $2,000 level that has been selected as the level at which the personal exemption ought to be set at is already a compromise level.

We are not fully redressing the inequities that exist toward the American family. We have not brought this to $2,600, as it would be if indexed for inflation, or $5,600, as it would be if it kept pace with income growth. The $2,000 is already a compromise. It is already a concession that we cannot go all the way.

So as I said, as we get into this process of giving and taking and fashioning a final package, it is extremely important that we not give in and compromise on the $2,000 level.

Mr. KEMP. Mr. Speaker, will the gentleman yield for one further comment?

Mr. COATS. I yield.

Mr. KEMP. I just saw the gentleman from Mississippi [Mr. LOTT] on the floor. It really is important for me at this point to express my thanks to TRENT LOTT, our minority whip, for his support of this bill and this effort. He is the original cosponsor of the Kemp-Kasten bill.

At the Republican Party Convention in Dallas, it was TRENT LOTT who helped build into our platform this $2,000 exemption and indexing for families. I personally want to thank him and appreciate his leadership.

When Senator KASTEN and I first introduced Kemp-Kasten last year, one of our chief concerns was to design a tax system that was profamily. A major flaw in the current Tax Code is its strong bias against investment in human capital. Over the years we have put in all kinds of tax loopholes to protect various groups from rising tax rates—but not the traditional family.

In many respects Kemp-Kasten was guided by asking how tax reform would affect the traditional family of modest means trying to raise children. We also wanted to protect senior citizens, the working poor, single people and two-earner couples; after all, a family doesn't stop being a family when the children grow up and the parents grow old.

I really believe that we succeeded in making Kemp-Kasten a profamily tax reform bill. In fact, it is the most favorable overall in its treatment of what might be called investment in human capital. With the family in mind, three of Kemp-Kasten's features are especially important:

First, there is a flat 24-percent tax rate on taxable income.

Second, we double the personal exemption to $2,000 for each taxpayer, spouse, and dependent—as well as the

extra exemption for the elderly, blind, and disabled.

Third, there is a new exclusion: In general, people can exclude 20 percent of their wages and salaries up to the amount on which they pay Social Security tax. The exclusion is phased out by adding back 20 percent of income in excess of the maximum Social Security wage base. This exclusion lowers the effective and marginal income tax rates on low- and middle-income Americans and helps offset the Social Security payroll tax, resulting in a smooth, almost flat total tax rate.

We also retain the current deductions for mortgage interest, real proerty taxes, charitable contributions, and catastrophic medical expenses, as well as the tax deferral of all kinds of retirement savings. We keep the exclusion for employer-provided health and life insurance. Many of the other tax preferences in the Tax Code are eliminated.

Kemp-Kasten also keeps indexing, which is especially crucial to lower- and middle-income taxpayers so that they are not forced to bear higher tax burdens because of inflation-induced bracket creep. Under Kemp-Kasten, the personal exemption, zero bracket amounts, employment income exclusion, and the earned income tax credit are all indexed for inflation.

This approach has several major advantages over progressive income tax rates. It allows a much higher tax-free income threshold than the other tax reform plans without greater cost. It also allows a lower marginal tax rate at the top. It substantially removes the unequal tax rates on labor and capital income, and results in a virtually flat combined income and payroll tax rate. Finally, it avoids shifting the tax burden like a pure flat income tax rate.

Let me explain these advantages by considering their effect on various taxpayers.

FAMILIES WITH CHILDREN

The drastic erosion of the personal exemption by inflation has caused taxes to rise almost twice as fast for families with children as for other taxpayers since World War II. Back in 1948, the personal exemption was $600; in constant dollars, it has shrunk to only $137, or to about one-fifth of its value almost 40 years ago. If the personal exemption had been indexed for inflation since 1948, it would be more than $2,500 today. Instead, it is only $1,040.

The value of the personal exemption depends not only on its size, but also on the nature of its deductibility. For example, the same $1,040 exemption under current law is worth $114 in the bottom tax bracket, but $520 in the top tax bracket.

The Bradley-Gephardt tax proposal increases the exemption for adults to $1,600, but reduces the exemption for dependent children from $1,040 in 1985 to $1,000 in 1986. Because of the higher bottom tax rate, the value of the exemption for each child rises from $114 to $140 a year, though Bradley-Gephardt repeals inflation-indexing. Since the Bradley-Gephardt plan allows the exemption only against the 14-percent bottom tax rate, the exemption is worth $140 for all taxpayers, including those in the 26-percent and 30-percent tax brackets. This represents a reduction of the tax value for the exemption in the top bracket from $520 to $140.

The personal exemption is worth $2,000 and indexed for inflation under both Kemp-Kasten and the Treasury plan. But because of the different rate structures, the effect of the $2,000 exemption is different under the Treasury plan than under Kemp-Kasten.

Under the Treasury plan, with tax rates of 15 percent, 25 percent, and 35 percent, the value of each exemption rises from $114 to $300 in the bottom tax bracket, and from $520 to $700 in the top tax bracket. Under Kemp-Kasten, all exemptions, deductions, exclusions, et cetera are worth 24 cents on a dollar. Therefore, the value of each child exemption for a low-income family more than quadruples, from $114 to $480 a year. At high incomes the value of the exemption remains about the same, $480 compared with the current $520. The increased value of the child exemption under Kemp-Kasten is concentrated at middle and low incomes where it is most needed.

THE WORKING POOR

Right now, families living in poverty pay rather stiff rates of Federal income tax. While the 1981 tax rate reductions helped to slow down the rising tax burden on the poor, high inflation and sharp increases in the Social Security payroll tax—the most regressive of all taxes—during the late 1970's hit the working poor especially hard.

Much of the worst impact of inflationary bracket creep has been felt by low-income families, who used to be exempt from income tax but have been swept onto the tax rolls by inflation. The poverty level in 1985 is $11,101 for a family of four—it probably will be more than $11,500 next year—while the income tax threshold for a family of four is $7,700—or $9,436 including the earned income tax credit. The tax disincentives are compounded because in many cases the disposable income obtainable through transfer payments for not working is almost as great as or even greater than after-tax wages at a comparable income. This is the famous poverty trap.

Kemp-Kasten addresses this problem in several ways. One way is to raise signifcantly the tax-free threshold of income. The income tax threshold for a family of four is raised to $11,800 under the Treasury plan, and $11,500 under Bradley-Gephardt. But under Kemp-Kasten, the tax-free level of income for a family of four is raised to $14,125. For a single taxpayer, the income tax threshold is $5,750 under Kemp-Kasten, compared with $4,800 under the Treasury plan, $4,600 under Bradley-Gephardt, and $3,430 under current law. Kemp-Kasten also raises the income tax threshold for a retired couple from $7,700 to $14,125, and for a retired single person from $4,470 to $8,250. The income tax threshold for a single parent with two dependents is increased from $8,375 to $10,750. This removes about 1.5 million of the lowest-income taxpayers from the tax rolls, and indexing will keep them off the rolls for as long as they are poor.

Another Kemp-Kasten change which cuts high effective marginal tax rates at low incomes is to modify the earned income credit. Under current law, the earned income credit is 11 percent of earned income up to $5,000. The maximum credit of $550 is phased out by reducing the credit by 12½ percent of income in excess of $6,500. This makes the credit disappear at $11,000.

Phasing out the credit adds a marginal tax rate of 12½ percent to the usual tax rate; and since the bottom income tax brackets overlap the phaseout range of the earned income tax credit, this can result in fairly high effective marginal tax rates at low incomes, under current law and under the other tax reform plans. For example, a single head of household earning $10,000 with one dependent faces a marginal income tax rate of 26 percent under current law and under Bradley-Gephardt, and 27 percent under the Treasury plan, plus the 7 percent payroll tax rate and the 50 percent to 75 percent effective marginal tax rates from foregoing transfer payments. This only makes it more difficult for low-income people to work their way out of poverty.

Kemp-Kasten reduces these effective marginal income tax rates by coordinating the earned income credit and the normal income tax thresholds. This approach increases work incentives at low incomes and supports intact families with children. Kemp-Kasten ties the percentage of the earned income tax credit to the combined employer/employee Social Security payroll tax. For 1986, this means that the credit is increased from 11 percent under current law to 14.3 percent. This explicitly recognizes that the earned income tax credit is not welfare, but a refund of taxes already paid by families who earn their own income.

Kemp-Kasten relates the maximum earned income tax credit for the first time to the size of a family. Under cur-

rent law, the credit is the same for a single parent with one child as for a family of three, four, five. Our new bill starts phasing out the credit at $4,500 for a family with one dependent, $5,000 for a family with two dependents, and $5,500 for a family with three or more dependents.

Because Kemp-Kasten phases out the earned income credit before taxpayers reach the bottom tax bracket, it keeps down the high marginal tax rates on the poor. The credit for two-person families is phased out at about $8,800, for three-person families at about $9,700, and for families with four or more persons at about $10,750. Though the credit is phased out somewhat sooner under Kemp-Kasten than under current law, the tax burden is lower in almost every case because the percentage is larger, and because Kemp-Kasten substantially raises the income tax threshold. Kemp-Kasten also indexes the earned income credit for inflation, for the first time, to help protect the poor from paying higher taxes because of inflation-driven increases in income.

Important as the poverty trap is, cutting high effective marginal tax rates alone will not magically cure poverty. The more we understand about the causes of poverty, the more we are drawn to the conclusion that it has at least as much to do with the stability of families as with after-tax income. While this question goes far beyond the realm of tax policy, I believe that the profamily aspects of Kemp-Kasten should be considered as an integral part of its antipoverty strategy.

WAGE-EARNERS

For many years upper-bracket taxpayers faced a higher tax rate on investment than on employment income. This distinction was removed in the 1981 tax bill. However, there still exists a distinction between labor and capital income at middle and lower incomes. Under current law—and the other tax reform plans—the payroll tax is added on top of the personal income tax rate for labor income, but not for capital income. Therefore, the tax rate on workers is higher than the tax rate on savers. This is true under current law and under all tax reform plans other than Kemp-Kasten.

Since the payroll tax base stops at about $40,000, the marginal tax rate on labor income can be higher at lower income levels than on upper-income taxpayers, under both current law and the other tax reform plans. Viewed by income level, the combined marginal tax rate structure above the income tax threshold behaves as follows. Under current law, the tax rate starts at 18 percent, rises to 41 percent, falls to 34 percent, then rises to 50 percent. The tax rate under Bradley-Gephardt starts at 21 percent, rises to 37 percent, then falls to 30 percent. The Treasury plan tax rate starts at 22 percent, rises to 42 percent, then falls to 35 percent. Under Kemp-Kasten, the income and payroll tax rates are coordinated, so that the tax rate starts at 26 percent for labor income, 24 percent for capital income, and ends at 28 percent for both.

MORE FAMILY ISSUES

Kemp-Kasten seeks to equalize the tax treatment among families in several ways. Both Bradley-Gephardt and the Treasury plan repeal the child care credit and replace it with a deduction for child care expenses, which generally helps only two-earner families with children below school age.

Kemp-Kasten repeals the credit and devotes the extra revenue, in effect, to helping all families with children by increasing the personal exemption. Compared with current law, this helps one-earner families with children more than two-earner families; but in general the Kemp-Kasten treatment is absolutely more favorable for all low- and moderate-income families than either Bradley-Gephardt or the Treasury plan.

For example, a family of four earning $15,000, with the second spouse earning a third of the income and child care expenses totaling 10 percent of the family's total income, pays Federal income tax in 1986 of $393 under current law, $475 under Bradley-Gephardt, $419 under the Treasury plan, and $168 under Kemp-Kasten. With only one earner and no child care expenses, the Federal tax is $868 under current law, $532 under Bradley-Gephardt, $480 under the Treasury plan, and $168 under Kemp-Kasten.

In this way, Kemp-Kasten equalizes the treatment of families with children, regardless of their parents' employment status. Any other approach seems to imply that the effort of the parent who stays at home to care for the children is worth less than if he or she worked outside the home. It does not seem fair to recognize the expense of earning a second income, but ignore the cost of giving up a second career, which often goes with the decision of a spouse to remain at home to raise the children.

At the same time, Kemp-Kasten removes a bias against two-earner couples, which exists under current law and the other major tax reform plans. A two-earner family with combined wages in excess of the Social Security payroll tax base pays a higher Social Security payroll tax and therefore a higher combined marginal tax rate than other taxpayers on the same income. Under Kemp-Kasten, two earner couples may figure out their 20-percent wage exclusions separately and add the two, if this results in a larger total exclusion. This offsets 5 of the 7 percentage-point increase in the combined marginal tax rate that occurs under current law and the other tax reform plans. In a sense, then, the Kemp-Kasten wage exclusion acts like a second-earner deduction for married couples.

The American family is the foundation of our society, and I believe that any tax reform plan will ultimately be judged on how well it helps American families in their daily lives to fulfill their hopes through their own efforts. We cannot have real tax reform and ignore our best and brightest investment—our children. Our children are our hope for the future—a promise that another generation will carry on the dreams and aspirations that we all share.

Children and the poor really have no high-powered lobbying firm to look after their interests. We must ensure that tax reform meets their needs and hopes for the future. In discussing the fate of this deduction or that credit, I hope that we all keep in mind the needs of the American family.

Mr. COATS. Well, Mr. Speaker, I appreciate those comments also. The gentleman from Mississippi was one of the first and earliest supporters of the Tax Fairness for Families Act and we have appreciated his support for this.

□ 1740

As I said earlier, the $2,000 level, it is important to remember, is already a compromise level. It only partially redresses the inequity that has existed since 1948 because the personal exemption has not been indexed.

The second point I think is important to reiterate was made by the gentleman from New York [Mr. KEMP]. That is the fact that our Tax Code historically has been based on some basic principles. The primary one was that people should be taxed according to their ability to pay. Two, that taxpayers with dependents have less ability to pay than those with equal income but without dependents. And, three, that persons in poverty should not be taxed.

Those are principles that were integral to the massive tax reform that took place in the 1960's. Yet because the personal exemption has been ignored since that time, because it has not been indexed, these principles are no longer reflected in our Tax Code as they relate to families, and families have disproportionately paid a higher tax than they should.

The gentleman from Ohio [Mr. KASICH] is also a cosponsor of this important piece of legislation.

Mr. KASICH. Will the gentleman yield?

Mr. COATS. I yield to the gentleman from Ohio [Mr. KASICH].

Mr. KASICH. I would like to rise in support of the legislation offered by the gentleman from Indiana, Congressman COATS. He really points out some very important facts when he

talks about the fact that the personal exemption has not been indexed as it should have been since 1948. And I am not going to attempt to go through all of the argument because I do not think anybody does it better than the gentleman from New York [Mr. KEMP].

But if we could one more time I think make the point that in 1948 Congress set the exemption at $600 and then in 1979 we increased the personal exemption to $1,000 as an attempt to offset inflation.

But the significant thing is if it had been indexed, in other words, starting in 1948, if we had taken into account inflation and made sure that the family or that individuals in that family, if every year their exemption was increased to make up for inflation, there was no real increase but simply an increase to make up for inflation as had been originally set in 1948, that exemption would be worth $2,600 a person today, in 1984.

So I think, as the gentleman, DAN COATS, says, we are not attempting in any way, shape, or form to give away the store here. What we are simply trying to do is the offset just part of the inflation that the American family has experienced over the years. And I think what is really something that is amazing is that in the middle 1960's the policymakers in this country basically agreed that we ought not to tax people who are either at the poverty line or below it, but literally today there are people who are at or below the poverty level who are paying taxes.

Now, we try to figure out ways in which to increase the incentives of people to work and I think Congressman COATS would agree that there are many people, many of our constituents, you go home and you say what can we do to give people more incentives to work. Well, you do not give people an incentive to work when, if they are struggling to try to get out of what Mr. KEMP calls the poverty trap and if they go out and earn their first dollar of income, they find themselves in a higher marginal or at a higher tax rate on the first dollar that they earn than those people who were at the highest levels of income in the country, you kill the incentive for people to go to work. It suddenly becomes not productive for them to go out and earn that first dollar in the private sector. And that is counterproductive to everything we believe in.

What we ought to be doing is encouraging people and giving them incentives, financial incentives to be able to get a job.

I personally believe that those people who are at or below the poverty line, who are not working, but want to work, I think it is in our best interests and in the best interests of the American spirit to give people an incentive and make it advantageous for them to have productive work and give them an opportunity to improve their lives, not tax them into the chains of poverty, because I think most people want to get out there and get that job.

It does not make sense to have a tax system that is counterproductive.

Of course the Treasury plan that the gentleman from New York [Mr. KEMP] referred to, and I know the gentleman from Indiana [Mr. COATS] has been talking about is a very critical plan because what it tries to do is to bring down marginal rates doubling that personal exemption so people can earn more, can be more productive at the lower levels, but also designed to make those people who pay nothing at the upper levels start to pay. But also to bring down that marginal rate.

Why do we want to do that? Why do we want to close the loopholes and bring down the marginal rate? Because we believe there is some rate at which people are taxed that produces the maximum amount of revenue. If you get above that rate you start to lose revenue. It is the old law of diminishing return that every farmer in America understands when they are trying to plant their crops.

There are only so many rows you can plant on an acre, just like there is only so much, there is some point, some level at which you start to lose revenue by raising taxes higher.

What we are trying to do is to bring that tax level down as low as possible to make sure that the incentives that we tried to put in the tax system in 1981 are enhanced so that we have greater productivity, greater earning capacity, and greater incentives in our tax system so that America can go forward. And doubling of this personal income tax exemption is critical. And I think everybody on this floor today that is here to talk on this legislation wants to send a clear message to the Treasury that we do not want any eating away or ebbing away at that $2,000 personal exemption as the family-oriented provision in that original Treasury bill. Do not take it away because we are simply going to fight you up here on Capitol Hill because we think that DAN COATS is right. DAN COATS was a leader in this area and I know DAN COATS is not going to give up the ship. And I am certainly going to be right there along with him as a Member, as one of the mates on that ship, to make sure that we preserve something that the American family needs, deserves, wants, and something that is going to build a stronger America.

I want to commend the gentleman for his hard work and let me tell you it takes a lot of work to put together something like this, to travel all over Capitol Hill promoting this, trying to lobby support among your colleagues, testifying at every opportunity you have, not on behalf of DAN COATS but on behalf of the American taxpayer and the most integral part of this country: the American family.

Again I want to commend the gentleman for his efforts.

Mr. COATS. I thank the gentleman from Ohio for his strong support and eloquent statement in support of the Tax Fairness for Families Act. And we are looking forward to the battle that lies ahead. Thirty-five Members have already signed up onto the Tax Fairness for Families Act. It was introduced today in the other body. It is gaining support there.

Families across America are finding out about this particular provision. You know, for years the family has silently paid their taxes believing that they were doing their fair share, only to find out now that because of this situation that exists with the personal exemption they were doing more than their fair share, only to find out that because they did not have a high paid Washington lobbyist working for them in the Halls of Congress, that special interest groups are receiving special deductions at the expense of the American family. And it was the family, the wage earner, the basic average American at home trying to make a living and raise his kids or her kids, they were the ones that were footing a disproportionate share.

Just since I have introduced this bill I have received in my office letters from 49 of the 50 States, people from all over the country, writing in and saying a number of interesting things about the Tax Fairness for Families Act. I would like to, if I could, just quote from a couple.

One lady from New York writes in and says:

> My husband needs the dignity of being able to bring home most of his pay and not stand in line for government surplus and other handouts. The tax exemption for his children should be * * * doubled. He should not have to pay the Federal deficit by himself.

We heard from a constituent from Ohio, the gentleman's State, Bay Village, OH:

> I never collected unemployment compensation in my life. When one job wasn't enough, I had to moonlight, and still care for the house and children. You see, I have no write-off for tax shelters or loopholes.

From Buckeye, AZ:

> I feel the time has come that we need our families to be considered. After all, the Constitution says "We, the people," not "We, the lobbyists."

From West Chester, PA:

> We have nine in our family. We barely skim by. We could qualify for a least reduced school lunches for our seven children, but we don't feel this is right or good, We are supposed to be close to poverty level but we pay all of those taxes.

Mr. KASICH. If the gentleman would yield, I think he makes a very

important point when he says that the taxpayers in this country, middle income, low income, taxpayers don't get tax breaks, that the tax breaks go to people who are at the top income levels and to the corporations in the country.

□ 1750

Now you know, I think DAN would have to agree with this. It sometimes does not sound like a Republican to talk about corporations that do not pay any taxes or people who are making fortunes and pay no taxes, but the simple fact of the matter is this party is changing and this individual, who is a conservative, I believe and have believed all along that this system ought to be made fair.

And those companies who buy and sell tax credits, major industries who have made billion and billions of dollars, who get refunds and do not pay one dime in taxes by manipulating this tax system, a lot of which was constructed by special interests in this Congress, in addition to that, individuals at the highest levels of income in this country who do not pay one dime in Federal income taxes and take advantage of all the loopholes.

What concerns me is, yes, there have to be some provisions in this tax law which encourage a strong America, that is what tax reform is all about; what we are trying to do is to close those loopholes that are simply just that, loopholes that allow people to avoid paying their fair share but do not build a stronger America, versus what we want to do with tax reform, which is to have incentives in that tax law that really contribute to a stronger America.

They may benefit an individual in getting a deduction but that deduction benefits everybody, not just the people at the top income levels, but those people at the middle and at the lower income levels.

So what this provision does is to say, "Hey, American taxpayer," not the one who has to be lobbying in the Halls of Congress, but the American family and those people at the lowest income levels, "we are going to give you what you deserve, which is to help catch you up to what you would have had if this personal exemption would have been indexed starting in 1948 like it was promised." They should be getting $2,600 in exemptions.

What they are going to get under this is $2,000 and it is a real, justifiable provision in this Tax Code.

So when we move to close the loopholes that do not go toward a strong America, but we move to preserve those exemptions that we believe make a strong economy and make a stronger America, we also ought to have a provision in there that makes for a stronger American family.

I think that is what this gentleman is all about and what the American people want and certainly ought to be the philosophy that we ought to be promoting.

I hope and pray that we do get a good tax reform bill that not only takes advantage of a tax system to build a stronger America on the corporate side, or helps build a stronger America with proper incentives for upper income Americans but also takes into account the middle and lower income Americans who make this country what it is.

Mr. Speaker, I appreciate the gentleman allowing me this time.

Mr. COATS. I thank the gentleman for his comments. He puts his finger precisely on the pulse and the mood of the average working American today. The responses that we have received in our office, the hundreds and thousands of responses we have received reflect exactly what the gentleman was saying.

If I may continue reading some of this, from Florida, and right to the point:

Thank you for your interest in helping take some of the burden off of the backs of the taxpayers that are not able to walk the Halls of the Capitol Building.

It seems to me it would be a great idea to help our children be able to afford to have children by doubling the exemption for dependents. If you pass H.R. 1551 maybe they can afford to marry and give me grandchildren.

That is from Patricia Heller Kelley. I am not exactly sure where she is from, but she is a lady looking for some grandchildren and wanting tax exemptions for her children.

If I may read on, from Newkirk, OK:

As a young couple with five children we desparately desire some sort of tax reform that will make it possible to have our own home someday.

From Missoula, MT:

I believe this bill is overdue but at least it is a start in the right direction.

From Coos Bay, OR:

I have no children of deductible age. I do recall how difficult it was from the 1950's as our family grew. We never seemed to have any more than barely enough from one month to the next. Because the situation has greatly worsened since those days my heart bleeds for the young families of today.

From Decatur, GA:

Thank you for standing tall for the traditional family.

From Yonkers, NY:

Thanks for speaking for those who are too busy providing basic needs as food, clothing, and shelter to lobby in Washington.

From Spencer, IN:

I do support your tax bill concerning the family. We have had six children. My husband has worked very hard as a truck driver trying to support the family, yet I needed to work out, too, to help and yet they were taking out more in taxes than I could earn.

I could go on and on. We have had hundreds and thousands of letters from people expressing the same basic point, that is that the working family today is suffering a tremendous burden in terms of raising the family and meeting its tax obligations.

Again, what are we asking for? A special break? A special deduction? No. What we are asking for is some basic fairness, some basic justice in our Tax Code that treats the American family as an important unit, that redresses an imbalance that has existed since the 1950's.

We are seeking not even to restore the personal exemption to the full measure of equity, but by merely doubling the personal exemption from $1,000 to $2,000, making it part of the basic tax reform to treat the American family as one of the most basic, one of the most special, one of the broadest and one of the most pervasive interests in this society today.

If we learned anything in our hearings in the Children, Youth and Families Committee, it is that the American family, No. 1, is in trouble today and, No. 2, is the absolute basic, bedrock portion of this society. It is absolutely essential that we do what we can to strengthen the family, to make the family whole, to keep the family from pulling apart.

We can do that in part by enacting Tax Fairness for Families, by supporting H.R. 1551, the Tax Fairness for Families Act, by making sure that it is incorporated in the tax reform proposals that come before this body, by making sure that those who are talking about tax reform and supporting it understand how basic and how important this concept is to true reform, and by making sure that most of us who support this concept hold fast and not compromise on this most important issue.

I want to thank the Members of Congress who have supported this legislation, those who took the time to help support this special presentation of this issue and, most importantly, those families across America who have taken the time to write expressing their support for H.R. 1551, the Tax Fairness for Families Act, and who are ready to stand shoulder to shoulder with us as we move forward into tax reform and bring about some basic equity and fairness to the American family.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. NEAL (at the request of Mr. WRIGHT), for today, on account of illness.

Mrs. LONG (at the request of Mr. WRIGHT) after 2 p.m. today, on account of official business.

Mr. LELAND (at the request of Mr. WRIGHT), after 1 p.m. today, on account of official business.

Mr. WEAVER (at the request of Mr. WRIGHT), for today, on account of illness.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

Mr. BOEHLERT, for 60 minutes, May 14.

(The following Members (at the request of Mr. KANJORSKI) to revise and extend their remarks and include extraneous material:)

Mr. ANNUNZIO, for 5 minutes, today.
Mr. BOLAND, for 5 minutes, today.
Mr. PEPPER, for 5 minutes, today.
Mr. DERRICK, for 5 minutes, today.
Mr. GONZALEZ, for 60 minutes, today.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. AUCOIN, prior to the vote on the Hutto amendment in the Committee of the Whole today.

(The following Members (at the request of Mr. BOEHLERT) and to include extraneous matter:)

Mr. KOLBE in four instances.
Mr. LEACH of Iowa in three instances.
Mr. CHAPPIE.
Mr. BROOMFIELD in two instances.
Mr. LEWIS of California.
Mr. FRANKLIN.
Mrs. HOLT.
Mr. MYERS of Indiana.
Mr. EDWARDS of Oklahoma.
Mr. GEKAS.
Mr. RITTER in three instances.
Mr. DREIER of California.
Mr. KEMP in two instances.
Mr. COATS.
Mr. BEREUTER.
Mr. BARTLETT.

(The following Members (at the request of Mr. KANJORSKI) and to include extraneous matter:)

Mr. BORSKI in two instances.
Mr. MONTGOMERY in two instances.
Mr. FAZIO.
Mr. KANJORSKI.
Mr. STUDDS.
Mrs. SCHROEDER.
Mr. HEFTEL of Hawaii.
Mr. TRAFICANT.
Mr. ACKERMAN in two intances.
Ms. KAPTUR in two instances.
Mr. FRANK.
Mr. MOAKLEY in five instances.
Mr. RUSSO.
Mr. BOUCHER.
Mr. LUNDINE.
Ms. MIKULSKI.
Mr. LELAND.
Mr. BARNES.
Ms. OAKAR in two instances.
Mr. WALGREN in two instances.
Mr. FORD of Michigan.
Mr. BERMAN.
Mr. MURTHA.
Mr. EDGAR.
Mr. KILDEE in two instances.
Mr. HERTEL of Michigan in two instances.
Mr. STARK.
Mr. RANGEL.
Mr. WEISS.
Mr. WOLPE.
Mr. MAVROULES.
Mr. MILLER of California.
Mr. LANTOS.
Mr. HUBBARD.
Mr. FORD of Tennessee.
Mr. RAHALL.
Mr. SOLARZ.
Mr. ASPIN.

ADJOURNMENT

Mr. COATS. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 58 minutes p.m.) under its previous order, the House adjourned until Monday, May 13, 1985, at 11 a.m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1259. A letter from the Director, Office of Management and Budget, transmitting the cumulative report on rescissions and deferrals of budget authority as of May 1, 1985, pursuant to 2 U.S.C. 685(e) (H. Doc. No. 96-66); to the Committee on Appropriations and ordered to be printed.

1260. A letter from the Chairman, Federal Energy Regulatory Commission, transmitting a draft of proposed legislation to authorize the Federal Energy Regulatory Commission [FERC] to collect fees and charges for services, benefits, privileges, and authorizations granted in administering its regulatory programs, and for other purposes; to the Committee on Energy and Commerce.

1261. A letter from the Director, Office of Management and Budget, transmitting a draft of proposed legislation to integrate the Office of Federal Procurement Policy more closely with the Office of Management and Budget, to vest the duties and functions of the Administrator for Federal Procurement Policy in the Director of the Office of Management and Budget, and for other purposes; to the Committee on Government Operations.

1262. A letter from the Senior Vice President—Planning, Administration and Human Resources, Federal Home Loan Mortgage Corporation, transmitting an audited copy of the financial report on the Corporation's Employees' Pension Trust for the year ending December 31, 1983, pursuant to 31 U.S.C. 9503(a)(1)(B); to the Committee on Government Operations.

1263. A letter from the Secretary of Transportation, transmitting a draft of proposed legislation to amend the Urban Mass Transportation Act of 1964 to provide authorizations for appropriations and for other purposes; to the Committee on Public Works and Transportation.

1264. A letter from the Under Secretary, Department of Labor, transmitting a report on the expenditure and need for worker adjustment assistance training funds under the Trade Act of 1974, covering the fourth quarter of fiscal year 1984, pursuant to Public Law 93-618, section 236(a)(2) (95 Stat. 885); to the Committee on Ways and Means.

1265. A letter from the Director, Office of Management and Budget, transmitting a draft of proposed legislation to amend the Office of Federal Procurement Policy Act and the Small Business Act to increase the dollar threshold required for publicizing procurement notices in the "Commerce Business Daily" and raise the ceiling for reservation of small purchases for small business concerns; jointly, to the Committees on Government Operations and Small Business.

1266. A letter from the Secretary of Energy, transmitting a draft of proposed legislation to encourage the standardization of nuclear powerplants, to improve the nuclear licensing and regulatory process, to amend the Atomic Energy Act of 1954, and for other purposes; jointly, to the Committees on Interior and Insular Affairs and Energy and Commerce.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Ms. OAKAR: Committee on Post Office and Civil Service. H.R. 873. A bill to permit Employee Organizations, which are not eligible to participate in the Federal Employees Health Benefits Program solely because of the requirement that applications for approval be filed before January 1, 1980, to apply for approval to offer a health benefits plan; with amendments (Rept. No. 99-72). Referred to the Committee of the Whole House on the State of the Union.

Mr. HAWKINS: Committee on Education and Labor. House Concurrent Resolution 95. Resolution commemorating the 20th anniversary of Head Start (Rept. No. 99-73). Referred to the House Calendar.

Mr. HAWKINS: Committee on Education and Labor. House Concurrent Resolution 132. Resolution observing the 20th anniversary of the enactment of the Older Americans Act of 1965 (Rept. No. 99-74). Referred to the House Calendar.

Mr. JONES of North Carolina: Committee on Merchant Marine and Fisheries. H.R. 1406. A bill to authorize appropriations for nongame fish and wildlife conservation during fiscal years 1986, 1987, and 1988 (Rept. No. 99-75). Referred to the Committee of the Whole House on the State of the Union.

Mr. WOLPE: Committee on Foreign Affairs. H.R. 1460. A bill to express the opposition of the United States to the system of apartheid in South Africa, and for other purposes; with an amendment (Rept. No. 99-76, Pt. I). Ordered to be printed.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. SAM B. HALL, JR.: Committee on the Judiciary. H.R. 1529. A bill for the relief of Gerald M. Hendley (Rept. No. 99-77). Referred to the Committee of the Whole House.

PETITIONS, ETC.

Under clause 1 of rule XXII,

103. The SPEAKER presented a petition of the Dutchess County Legislature, Poughkeepsie, NY, relative to social services programs; which was referred to the Committee on Ways and Means.

SENATE—*Thursday, May 9, 1985*

(Legislative day of Monday, April 15, 1985)

The Senate met at 9 a.m., on the expiration of the recess, and was called to order by the President pro tempore [Mr. THURMOND].

PRAYER

The Chaplain, the Reverend Richard C. Halverson, D.D., offered the following prayer:

Let us pray.

Almighty God, in whom love and justice, mercy and grace, wisdom and knowledge meet in perfection, we pray for a manifestation of Your presence and virtue in this place today. Eloquent speeches, moving and persuasive in content and presentation, have been made. Those who spoke share a common, profound concern for the present dilemma and future welfare of the Nation. You know what divides the Senate, Lord, the depths of division, and its justification. You know the hearts and minds of the Senators and that which motivates each. You know the total picture, past, present, and future, and the short-term—long-term consequences of whatever action the Senate takes on the monumental issue now confronting it. Spirit of God, move upon hearts and minds in ways which will guarantee truth and justice be served in the interests of the Nation. Let these deliberations yield victory for all the people and their descendants. We pray in the name of Him whose unconditional, universal love covers all humanity. Amen.

RECOGNITION OF THE MAJORITY LEADER

The PRESIDENT pro tempore. The distinguished majority leader is recognized.

SCHEDULE

Mr. DOLE. Mr. President, under the standing order, the leaders have 10 minutes each. Then we have special orders in favor of the distinguished Senator from Pennsylvania [Mr. SPECTER] and the distinguished Senator from Wisconsin [Mr. PROXMIRE].

Following that, there will be a period for routine morning business not to extend beyond the hour of 10 a.m. with statements therein limited to 5 minutes each.

Following morning business, we shall resume consideration of the budget resolution, hopefully by about 10 o'clock. By then, we may have some idea of how many amendments Senators feel compelled to offer.

It is my hope that Members will keep in mind that if they want to finish this bill at a reasonable time today, they should withhold amendments, because if there are 25 or 30 amendments and rollcalls on each amendment, that in itself will keep us here until tomorrow morning.

There are, I think, about 6 hours remaining on the budget resolution about 4 hours on the Democratic side and 2 on this side. I hope that I shall be in a position to indicate whether we will try to finish the bill today. It is my present intention to do that.

I think it is fair to say that we need to make one phone call to Portugal. Somebody over there wants to check out what we have been doing. I think as soon as that is completed, I shall be in a position to notify the minority leader.

Then, if we could get our amendments together—hopefully not too many—we can finish the resolution. I am advised by colleagues on both sides of the aisle that it is their hope that we can finish early, rather than late in the day, because of commitments. As soon as I have some information, I shall relay it to the minority leader.

Mr. President, I reserve the remainder of my time.

RECOGNITION OF THE MINORITY LEADER

The PRESIDENT pro tempore. The distinguished Democratic leader is recognized.

Mr. BYRD. Mr. President, I thank the distinguished occupant of the chair, the President pro tempore of the Senate.

BUDGET RESOLUTION AMENDMENTS

Mr. BYRD. Mr. President, I wish to say that we, on our side of the aisle, are checking this morning to try to get some indication of how many amendments remain. I am hopeful that we can work with the distinguished majority leader and sequence the amendments and, even more hopefully, that we can provide for a total reduction of time on those amendments. I do not know whether we shall be successful or not, because that is what I am going to try to do to cut the time if we possibly can and avoid duplication of amendments, if possible—recognizing the right of Senators, however, to offer whatever amendments they wish to offer.

I have to say we are running short on time and will finally reach the point where, if any further amendments are offered, there will be no debate on them, just votes. I hope we will not too much extend the Senate's time doing that. But we shall have to see.

Mr. President, I reserve the remainder of my time to the end of the period for morning business by unanimous consent.

The PRESIDENT pro tempore. Without objection, it is so ordered.

ORDER OF PROCEDURE

Mr. DOLE. Mr. President, if the minority leader has no objection, I ask unanimous consent that special orders may be executed in the order in which Senators appear. If Senator PROXMIRE should arrive first, he will speak first.

The PRESIDENT pro tempore. Without objection, it is so ordered.

RECOGNITION OF SENATOR PROXMIRE

The PRESIDENT pro tempore. The distinguished Senator from Wisconsin is recognized.

Mr. PROXMIRE. I thank the Chair.

STILL ANOTHER REASON WHY WE DON'T NEED STAR WARS

Mr. PROXMIRE. Mr. President, in the argument for the strategic defense initiative or star wars, the assumption is made that without some kind of defense a Russian nuclear attack on targets in this country would succeed unless we could construct a defense that would frustrate the Soviet's ICBM's. The reasoning assumes that, without some kind of defense, the Russians would devastate this country. And, they would. But would an antimissile system protect this country?

With a star wars defense, Secretary of Defense Weinberger has contended, we might stop all of their attacking missiles. What would really happen in the event of a nuclear exchange? Would any defense we might construct in the next 15 or 20 years provide any kind of effective defense, the kind of effective defense Mr. Weinberger has talked about. The answer, Mr. President, is that any Russian nuclear missile attack on this country, with or without an American antimissile system, would have only partial success, and it would have many, many failures. The devastation on our coun-

try would be immense, but there would probably be far more failures than successes. The same would apply—and even more so—to any defense we might construct. Such a defense might succeed in stopping some incoming missiles, but there is no way that we could achieve the perfection Secretary Weinberger talks about.

In an editorial on December 8, the New York Times discussed the huge uncertainties for the attacker in a nuclear war. The editorial discusses the experience every nation has had with new technology. Working the bugs out of any new technology takes repeated tests over and over again in the kind of circumstances that would prevail in actual practice. The fact is that no nation has ever tested their nuclear striking force in an actual nuclear attack in wartime since the United States dropped single bombs from planes over Hiroshima and Nagasaki in 1945. Since then, there have been a series of far-reaching revolutions in nuclear weapons. Today's nuclear weapons vastly differ from the fat A-bombs dropped on Japan in World War II. Not one single nuclear weapon has ever been tested in combat conditions in all those 39 years.

Would this new technology work? The New York Times in an editorial of December 8, 1984, offers the following examples of the kind of failures and mistakes that both sides would suffer in any kind of a nuclear war:

An Atlas rocket now sitting at Vandenberg Air Force Base in California has had its launch reset for tomorrow—the 11th attempt in a month to get it off the ground. Previous attempts have been canceled because of high altitude winds that threatened to whipsaw the rocket apart, problems with a radar console and a glitch in the guidance system.

Of course, this is because someone of the literally 100 people who monitor the rocket can cancel it. And as an Air Force official said, "when they were less fussy, a lot of them blew up." That Air Force official points out that our warhead carrying missile, the Minuteman, can be even less assured of reliable takeoff; he said that "We had one Minuteman that we tried to launch every night for a year." The Russians' nuclear arsenal is almost certainly even less reliable. Their strategic missiles are liquid fueled. That surely reduces the reliability of timely launch.

Mr. President, this is the status of U.S. nuclear weaponry after nearly 40 years of intense technological research and development and an expenditure of close to a trillion dollars. With that record, can anyone really have any confidence in the perfection of the administration's proposed antimissile defense or star wars to shoot down incoming missiles? Absent effective arms control progress, we have two big facts on which to pin our hopes and prayers for nuclear peace. One is the deterrence that the appalling threat of nuclear retaliation poses for both sides. With all its terrible implications, deterrence has been widely recognized as the prime peacekeeping element in the world today. But, ironically, there is another force that may be even more potent in keeping the nuclear peace. It is the fact that the top military advisers on both sides—the experts on whose advice the leaders who can push the nuclear button must rely—these military leaders understand that if and when that button is ever pushed by either superpower the result could be a fiasco. Some missiles undoubtedly would reach their targets in the adversaries' homeland. But many more would explode in the air. Some would even collapse on the homeland of the power that launched them.

Nothing has enjoyed greater immunity from "will-it-work" criticism than scientific progress in nuclear missiles. And it has been overpowering and awe-inspiring. But these awesome arsenals have never been put to the practical test of real war. Thank God for that. But, meanwhile, we move on to an even more distant technological dream land with the star wars future the President and his Secretary of Defense have called for.

If an offensive attack by a superpower would fumble and stumble and at most achieve only limited success while causing considerable devastation in the homeland of the attacking power, the defensive technology of star wars would certainly have an even greater failure rate. Obviously, it would never be tested in a wartime scenario. So the fact is that an antimissile defense could be frustrated by the simple multiplication of numbers on the other side, by decoys, by hardening the skin of attacking missiles, by the shift by the opposition to cruise missiles and bomber and submarines, all of which would be immune from the star wars defense.

The killing fact is that the star wars defense depends on working perfectly the first time everywhere—and with a system that had never been tested until the doomsday of Armageddon arrives. Would star wars work then? Whom are we trying to kid?

NEVER AGAIN AND THE NEED FOR THE GENOCIDE CONVENTION

Mr. PROXMIRE. Mr. President, when President Reagan visited the site of the Bergen-Belsen concentration camp in West Germany on May 5, he spoke sadly of the innocent men, women and especially children who were killed there. Mr. Reagan went on to speak of the hope he believes has risen from the ashes of the crematoriums and finished by repeating the traditional pledge of Holocaust survivors: "Never again."

The President's return to a site where, as Mr. Reagan said, "lie people—Jews—whose death was inflicted for no other reason than their very existence," reinforces our perception of the need for U.S. ratification of the Genocide Convention. This treaty when ratified by the United States would do much to focus world attention on preventing contemporary attempts at genocide.

When President Reagan broke his long silence on the subject of the Genocide Convention on September 6, 1984, and joined every postwar President, except one, in announcing his support for the treaty, it appeared that ratification was close at hand. Unfortunately, this was not the case.

However, the President's visit to the site of one of the Nazi death camps on the 40th anniversary of the defeat of those hated tyrants should spark new interest in the treaty. President Reagan was clearly moved by the sight of "bleak and lifeless mounds, the plainness of which does not even hint at the unspeakable acts that created them." I hope that this visit to Bergen-Belsen will lead him to redouble his efforts to secure immediate ratification of the Genocide Convention.

For, as the President himself said at the graveyard, "We are here today to confirm that the horror cannot outlast the hope—and that even from the worst of all things, the best may come forth. Therefore, even out of this overwhelming sadness, there must be some purpose." Ratification of the Genocide Convention could, in an important way, fulfill this purpose. Then the United States would be adding its voice to 97 other nations in proclaiming to all the world that humanity will never allow anything like the Nazi death camp at Bergen-Belsen to happen again.

HUD WINS MAY GOLDEN FLEECE AWARD

Mr. PROXMIRE. Mr. President, I am awarding my Golden Fleece for the month of May to the Department of Housing and Urban Development—HUD—for bestowing over $1 million in public money to build an access road, ramp and tunnel to a privately-funded entertainment spa in Pittsburgh featuring sightseeing and shuttle boats, and a 3-tiered floating dock. The taxpayers' money was actually spent, nothing new about that, but the promised passenger boat ended up in New York, the shuttle has yet to be seen, and the dock, to be bustling with restaurants, lounges, and offices, faded into the bureaucratic fog and reemerged as two barges.

The sinking of this project gave new meaning to the phrase "Up the creek without a paddle." HUD's riverboat

gamble leaves the taxpayers with a losing hand.

The Urban Development Action Grant Program [UDAG] has the dubious distinction of funding this project. These grants are touted as seed money for local governments, which chase after them because the money can be used to encourage private development. According to HUD, "As a requirement for funding, a firm private sector financial commitment must be in place."

HUD must have a squishy-soft definition of the word firm. In support of this project, HUD committed a $530,000 grant, a $370,000 loan, and $155,000 in other funding. This money was spent essentially to improve access to the project.

In return for this taxpayer money, the private concern was to spend $1,551,000 for that sightseeing boat, $500,000 for the shuttle, and $1,500,000 for the entertainment dock. HUD spent its money based on a January 29, 1982, agreement. But the required private investment, remember that firm private sector financial commitment, sank faster than the *Titanic.*

An internal HUD audit concluded, "The developer failed to complete any of the activities identified in the grant agreement, including the acquisition of a 1,000 passenger sightseeing boat and a 300-passenger shuttle boat, and the development of an 18,000 square foot floating dock." HUD was not completely routed—the developer found two barges in place of the dock. HUD clearly bankrolled this floating crap game without covering their bets.

The lawyers will now pick over the bones of this failure. This fleece demonstrates why I oppose UDAG grants. They do some good for a few communities but all too often they subsidize outright boondoggles, support development which would have taken place without a subsidy, or help one community pirate industry from another. They are corporate welfare and have no place in the budget.

Mr. COCHRAN. Mr. President, if the distinguished Senator has any time remaining, I wonder if he will yield it to me.

Mr. PROXMIRE. I am delighted to yield to my good friend from Mississippi whatever time I have remaining.

Mr. COCHRAN. Mr. President, I thank the distinguished Senator.

THE U.S. TRADE DEFICIT

Mr. COCHRAN. Mr. President, this morning I noticed in the Washington Post a report that was filed by the Associated Press relating to the trade deficit for this quarter. Yesterday, the Commerce Department, according to this article, released figures showing that during the quarter from January through March of this year the United States has suffered a $28.3 billion merchandise trade deficit. The article goes on to describe the specific parts of the trade picture that were most significant. Among the disclosures in this report was included a statement that farm exports, agriculture exports are down 11 percent from the October-December quarter.

Mr. President, the reason I think this is important enough to bring to the attention of the Senate is that it corroborates projections which were earlier made by the Department of Agriculture that exports of farm products were grinding to a halt. In December, the Department projected a $36.5 billion volume for export sales in agriculture, but in February that estimate was revised downward to $35.5 billion, and then the very next month, in March, another billion dollars was cut from the projection. So that as of March, the projection is that our exports in agriculture will amount to no more than $34.5 billion this year.

This illustrates very clearly, Mr. President, that our effort to come together on a resolution to effectively reduce the budget deficit is so important to the economic health and well-being of our country. We have to get these deficits down and relieve the pressure on the dollar value, which is responsible in some measure for the difficulties we are facing in selling our goods and services and commodities in overseas markets.

There is another challenge which I think is also a part of this morning's story, and that is as we go about the business of rewriting our farm legislation, which is scheduled to begin next week, as I understand, in our Agricultural Committee, it is so important for us to include in the farm bill provisions which will assist the farmer in selling his commodities overseas.

We have to have an aggressive trade policy written into that farm bill or we are going to see a crisis of unbelievable dimensions in American agriculture. The article I refer to, Mr. President, has within it a very important message for the Senate today. We have to get serious about reducing our budget deficit, and we have to use our good judgment to the fullest in coming up with provisions for a farm bill that will make our farmers more competitive sellers in the international marketplace.

Mr. President, I ask unanimous consent to have printed in the RECORD the Associated Press article to which I have referred.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

TRADE DEFICIT 16 PERCENT HIGHER FOR QUARTER

(By Martin Crutsinger)

The United States suffered a $28.3 billion merchandise trade deficit from January through March, up 16 percent from the deficit during the last three months of 1984, the government reported yesterday.

The sharp deterioration came despite the fact that oil imports fell to the lowest level since the early 1970s.

The good news on oil was overshadowed by a big increase in imports of manufactured goods and a sizable decline in agricultural sales overseas, the Commerce Department said.

The new report, which shows merchandise trade on a balance-of-payments basis, confirms parallel figures released last week showing an even deeper merchandise trade deficit of $32.8 billion for the first three months of 1985.

While the new report covers the same trade, it shows a lower deficit because it omits such factors as military sales and the cost of shipping and insurance.

Commerce Secretary Malcolm Baldrige, commenting on the report, repeated calls for congressional action to lower federal budget deficits as a way to lower the value of the dollar and thus bolster the country's poor trading performance.

He said the trade deficit was "likely to continue to worsen, though not by as much as the first quarter's deterioration."

The surge in imports and weak export sales during the first quarter have been blamed for the sharp slump in overall growth. The economy, as measured by the gross national product, grew at an anemic 1.3 percent rate from January through March, the slowest pace in more than two years.

The new report said imports rose 5 percent and exports dropped 1 percent during the first three months of the year, compared with the October-December quarter.

Imports totaled $84.4 billion from January through March, with non-oil imports surging by 11 percent. The big gains in this category were registered by household appliances, automobiles and other manufactured goods.

Oil imports dropped 25 percent from the fourth-quarter level as both the price and the amount of overseas oil declined.

The country imported 4.32 million barrels of oil daily, compared with 5.59 million barrels a day in the October-December quarter. It was the lowest rate since 4.17 million barrels were imported from July through September of 1971.

The price fell from $27.59 per barrel in the fourth quarter to $26.86 per barrel in the first three months this year.

Exports dropped 1 percent to a total of $56.1 billion despite a 44 percent increase in sales of civilian aircraft.

Exports were hurt by an 11 percent slump in sales of U.S. farm products. Agricultural sales totaled $8.5 billion from January through March, compared with $9.5 billion in the last quarter of 1984.

American farmers have seen their sales restricted by the high value of the dollar, which makes their products more expensive on overseas markets.

Wheat shipments dropped 35 percent, corn sales were off 12 percent, soybean sales fell 5 percent and cotton sales dropped 2 percent from levels in the fourth quarter, the government said.

The average price of cotton was down 6 percent, while the price of soybeans and corn both fell 2 percent and the average price of wheat was unchanged.

Mr. PROXMIRE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. MCCONNELL). The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. SPECTER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECOGNITION OF SENATOR SPECTER

The PRESIDING OFFICER. Under the previous order, the Senator from Pennsylvania is recognized for not to exceed 15 minutes.

Mr. SPECTER. I thank the Chair.

S. 1112—THE TAX FAIRNESS FOR FAMILIES ACT

Mr. SPECTER. Mr. President, today I am introducing the Tax Fairness for Families Act. This bill will double the personal exemption for taxpayers, their spouses, and their dependents from $1,000 to $2,000.

I have just come from a media conference where Mr. Jerry Regier, chairman of the Committee for Fairness to Families and president of the Family Research Council, presided over a session stating the intent of a broad-based coalition to press ahead to enact legislation which would double the exemption for tax purposes for all taxpayers, including spouses and dependents, from $1,000 to $2,000. This event was also attended by Mrs. Beverly LaHaye of the Concerned Women for America; Mr. Paul Weyrich, president of the Free Congress Committee; and Rabbi Yehuda Levin, president of the Union of Orthodox Rabbis. The Committee for Fairness to Families constitutes these and other groups, representing a large coalition. I ask unanimous consent at this point that the complete listing of all the groups so represented by the Committee for Fairness to Families be printed in the RECORD.

There being no objection, the list was ordered to be printed in the RECORD, as follows:

American Legislative Exchange Council.
American Coalition for Traditional Values.
Family Research Council of America.
Concerned Women for America.
Eagle Forum.
National Pro-Family Coalition.
Conservative Caucus.
Citizens for America.
National Association of Pro America.
Pro-Family Forum.
National Integrity Forum.
Catholic Study Council.
Couple to Couple League.
Union of Orthodox Rabbis.
Family Protection Lobby.
Intercessors for America.
Committee to Protect the Family.
Alive and Free.
Conservative Youth Federation.
United Families.
Terence Considine—Businessman.
Christian Impact.
Contact America.
National Center for Public Policy.
National Forum Foundation.
National Center for Constitutional Studies.
Free the Eagle.

Mr. SPECTER. Mr. President, also in attendance was my colleague from Idaho, Senator STEVE SYMMS, who is cosponsoring this legislation with me today, and Congressman DAN COATS, a Representative from Indiana, who has introduced similar legislation in the House of Representatives. Congressman JACK KEMP was present, speaking about tax reform generally and the importance of raising the personal exemption from $1,000 to $2,000. Raising this exemption comprises an integral part of the tax reform which he has introduced in Congress under the designation of Kemp-Kasten.

This legislation, Mr. President, will provide recognition of the importance of children in our society by elevating the economic value of this exemption. The personal exemption stood at $400 in 1948 and was raised to $1,000 in 1979. Had the personal exemption kept pace with inflation and the rise in personal income, the exemption would be worth approximately $5,600 today.

In pressing for this change in the tax laws, it is obvious that it is an expense proposition at a time when the deficit is high and when major efforts are being made, as evidenced by the action on this floor in the past many days, and continuing today. We are trying to achieve a budget which will make a significant reduction in the deficit for fiscal year 1986 in the amount of approximately $52 billion and for a 3-year period, fiscal years 1986, 1987, and 1988, in the range of $300 billion.

But in assessing the tax picture today and in looking at the legislative proposals for a leveling and a fairness in taxation, there are many preferences and many benefits which are given by the Tax Code which ought to be changed and ought to be equalized on an approach which would be tax neutral, so that there would not be a loss in revenue to the Federal Government.

Mr. President, the personal and dependent exemptions measure, in a very fundamental sense, the importance that society attaches to the children and to families. Its value has decreased significantly over past decades, and the tax burden has gradually shifted to families with children. Fair tax reform must restore the value of this exemption and protect it against inflation.

The personal and dependent exemptions are the principal means by which our Tax Code takes into account taxpayers' responsibilities for their children. Its failure to keep up with income growth has hit families with children harder than any other group. For three decades, families have been footing the bill for other special interests, and now families are in trouble. More and more, average families are finding that they cannot make ends meet. They cannot buy homes. They can no longer afford to live on just one income. These are difficult times in which to raise children, and the Federal Government is making them even harder.

According to the Committee for Fairness to Families, whose member groups represent over 5 million constituents, over 81 percent of Americans live in families. Working parents, who are raising the Nation's next generation, have lost a great deal of ground due to rising taxes as a result of inflation over the past two decades. For example, since 1948 the value of personal exemption has decreased by two-thirds. As a result, the increase of the tax burden on households has risen 10 percent.

While the value of the personal exemption has been shrinking, taxes and the cost of raising children have increased dramatically. According to a recent Census Bureau study, the average family of four spends over $103,000 from birth to college graduation for each child. Quite clearly, even an exemption of $2,000 provides only a small aid to our Nation's primary resource—its children.

Doubling the personal exemption will not give back to families all we have taken from them, but it will be a significant downpayment. We are in the midst of a historic debate over the future direction of our Tax Code. It is time that tax policy again reflect the simple justice due to parents who are giving their all to bring up the next generation of Americans.

Mr. President, rebuilding America begins with restoring family strength and preserving family values. I hope that you and my colleagues agree that this is an important step to achieving a fairer sharing of our Nation's tax burden and join me in supporting this bill.

Mr. President, I ask unanimous consent that the full text of the legislation be printed in the RECORD.

There being no objection, the text was ordered to be printed in the RECORD, as follows:

S. 1112

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Tax Fairness for Families Act".

SEC. 2. INCREASE IN EXEMPTION AMOUNT TO $2,000.

(a) IN GENERAL.—Subsection (f) of section 151 (relating to allowance of deductions for personal exemptions) is amended by striking out "$1,000" each place it appears and inserting in lieu thereof "$2,000".

(b) EFFECTIVE DATE.—The amendment made by this section shall apply to taxable years beginning after December 31, 1985.

ROUTINE MORNING BUSINESS

The PRESIDING OFFICER. Under the previous order, there will now be a period for the transaction of routine morning business not to extend beyond the hour of 10 a.m. with statements therein limited to 5 minutes each.

SALLY FIELD, JANE FONDA, JESSICA LANGE, AND SISSY SPACEK ON THE FARM CRISIS

Mr. KENNEDY. Mr. President, the Reagan administration isn't winning any Oscars for its farm program; that point was forcefully driven home earlier this week when four Oscar-winning actresses testified before the House Democratic Caucus Task Force on Agriculture. The task force is chaired by our able colleague in the House from South Dakota, Representative TOM DASCHLE.

It is not coincidence that four important films in the past year have dealt with the crisis in American agriculture. All of us know that our current farm policy has been a costly and continuing failure. The so-called economic recovery of which the administration is so quick to boast in other areas has bypassed the farm economy; hundreds of thousands of family farmers across the country are suffering hardships of a magnitude not seen since the Great Depression.

In the past year, four of the most famous actresses in America—Sally Field, Jane Fonda, Jessica Lange, and Sissy Spacek—have appeared in widely acclaimed films that have provided outstanding entertainment and have also helped to sensitize the Nation to the very real crisis facing our family farmers.

Their testimony to the House task force last Monday is an eloquent tribute to their impressive understanding of the issue, their commitment to a more effective national policy—and their intention to do something about it. I recommend Congressman DASCHLE for organizing the hearing, and I ask unanimous consent that the testimony and other materials may be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

(House Democratic Caucus Task Force on Agriculture Hearing on "Human Dimensions of the Farm Crisis" May 6, 1985)

STATEMENT OF SALLY FIELD

I regret being unable to personally participate in today's hearing with my colleagues.

The crisis in agriculture has affected more than just the farm families throughout the country. It has touched small towns and their many small businesses in every rural corner of the nation.

My friends here today will testify to the fact that you don't have to live on a farm to experience the pain these families are feeling. We have played the roles of the farm family and in doing so have witnessed the suffering inflicted on the American farm family today.

We don't pretend to have all the answers. We are not the policy makers.

We hope by our words today to encourage the men and women of Congress to act now in improving the environment for our nation's farm families.

STATEMENT OF JANE FONDA

Mr. Chairman and Members of the Task Force, last year I played Gertie Nevels in a film I produced for television called "The Dollmaker". She was a farm woman in the mountains of Kentucky, and in the years I spent researching and preparing for the role I spent time with small farmers in Arkansas, Kentucky and Tennessee.

I was very moved by the people I met, by how hard they worked and by their attachment to the land. Perhaps I felt at home with these people because as far back as I can remember my father had loved to plow his fields and plant and grow things.

He was born and raised in Nebraska, and while he was never a farmer by profession, he always felt a kinship with rural America. That was perhaps why, of all his roles, he loved Tom Joad in "The Grapes of Wrath" the most.

Maybe it was then, as a little girl, sensing how he identified with and internalized that role, and watching his silhouette on his tractor as he put in a field of alfalfa, that I learned how a role strongly felt by an actor can open his heart and mind and eyes to realities that extend beyond the screen and the darkened movie house.

Perhaps that's the most wonderful part of our profession: that it exposes us to these realities and allows us to be affected. That's why I'm here today.

Not since "The Grapes of Wrath" have we seen so much attention by actors and filmmakers to the plight of the family farmer—until today.

Art and movies reflect reality, but also shed light on it. Having made these films, we three have a natural desire to express our concern for those farmers in the real world who are being driven off their land into the graveyard of debt.

We understand there are no simple answers to farm policy, but there are simple values that never lose their meaning. One is that people come before profit because it is people who create profit—not the other way around.

Another is that families should not be disrupted or destroyed by circumstances beyond their control. High interest rates mean lower incomes, and the strong dollar means a weak foundation for countless farm families who depend on exporting to a needy world.

We believe as well in the simple propositions that land should not be taken away callously and impersonally from families who have farmed it well for generations. Nor should the next generation of Americans be discouraged from entering into the profession of farming.

The Reagan Administration practices a double standard regarding free enterprise. They want to subsidize silos for MX missiles but not for family farmers. They lavish subsidies on wasteful defense contractors but take them away from providers of our food.

They provide tax loopholes wide enough to drive a tractor through for Beverly Hills attorneys who farm for tax breaks, but want to take incentives away from those who farm for a livelihood.

Most importantly, they provide lower interest rates to foreign governments than to Kansas farmers, and they roll over the debt of Poland more obligingly than of Iowa.

These policies are unfair. Reducing the deficit by destroying what remains of the family farm is the wrong course.

We are not simple romantics, though there is nothing all that wrong with a little romanticism to off-set the pervasive cynicism of public policy.

We recognize the need for reform and adjustment. Much of agriculture is over-centralized, over-mechanized and over-dependent on dangerous pesticides.

The wealthier farmers often receive greater benefits from federal programs than the smaller farmers with greater needs. But the Reagan Administration policies will only accelerate these trends, not relieve them.

It seems sensible that a cap should be placed on commodity price support loans, as Congressman Byron Dorgan suggests, to eliminate the excessive amounts going to larger farmers and freeing up money to be re-targeted towards family-sized farms.

The FMHA loan program might be re-focused to its original purpose of providing economic opportunity to fledging farmers and small farmers. Tax policies which encourage speculation and drive up land prices should be reformed. And interest rates must be revised to make credit more accessible.

The development of policy, however, we leave to the legislators whose business is legislative. The immediate need is some way to re-structure farm debt to prevent the human tragedy of unnecessary foreclosures.

The reason we are here is to underscore the gravity of the crisis that is leading to the bankruptcy, humiliation and banishment of farmers from their lands at a rate not seen since my father made "The Grapes of Wrath."

As actresses whose work is to identify with what is most human, we cannot confine ourselves to the screen while the cruel and unusual punishment of farmers grinds on. There are a lot of Tom Joads and Gertie Nevels still out there.

Please do not let them perish from the earth. Thank you.

STATEMENT OF JESSICA LANGE

Mr. Chairman and Members of the Task Force, one of the difficulties in speaking about the crisis in American farming is that the implications found in this single issue are so wide sweeping that they become synonymous with the crisis in American culture as a whole.

This nation was founded by an agrarian society, and inherited by a technological one. Parallel with these two, diametrically opposed systems, two completely independent psychologies have evolved. Even though we could say one grew out of the other, neither has the least understanding of the other's essence.

It's as though the inheritors have fallen into a profound amnesia of their origins. While the descendants of our agrarian forefathers are desperately waving white flags all over this country they are getting little or no response.

The question we're faced with now is more far-reaching than mere economics or political maneuvering. It's a question of values. Are we willing to allow the last remnants of our heritage to disappear? Or, worse, to see

it systematically eradicated by an economic power structure that views small farming as obsolete? Is it really possible for us to repeat the same blind mistakes without examining the history of similar action in our society?

The small farmer in America is being replaced—that's obvious. By what, is the question? How many other sub-cultures in this country have been similarily replaced and what is there, now standing, that we could say justified that replacement? Is economic feasibility the only true measure of a culture's value?

The outcome of the issue being addressed here today, the plight of the family farm, will have monumental repercussions throughout this society and across this land for time to come. And that issue is: how we relate to our land.

There is a theory put forth that divides people into two mutually exclusive groups—those who exploit. Those who nurture. The exploiter's goal is money, profit. The nurturer's goal is health—his land's health, his own, his family's, his community's, his country's. The exploiter thinks in terms of numbers, quantities, "hard fact". The nurterer in terms of character, condition, quality, kind.

There is no question, the best farming requires a farmer, a nurturer. Family farms, owned and controlled by those who labor to produce food for this nation and whose connection to the land is an emotional one have created an unique environment and culture across this country.

Absentee ownership of farms and corporate agriculture would drastically and tragically change all that. The loss of talented and industrious families from the land will have disastrous consequences for our society and for our economy!

If it's really true that large scale agri-business proves to be more efficient, more productive and more controlled than small scale family farming then what do we have left to measure that increase against? Nothing but the memory of the traditional American family farm.

This memory will camp right alongside the memory of the American Indian, the memory of Vietnam and all our other memories that are intimately related through greed and arrogant disregard. Already there are ghost towns sprinkled throughout the farm-belt. Abandoned farms. Fields that have gone to seed. Equipment and farm auction notices are posted in every shop window.

With every farmer that leaves the land, and there have been roughly 280,000 since January 1981, the repercussions are felt throughout rural society. Schools, shops, businesses drop away like dominoes. What we are witnessing in this decade is the systematic destruction of much of rural society. And in those states, the so-called farm states when the family goes down, the whole state will go down.

The heartland of America is being vacated, almost without a sound. Suddenly we are being faced with the fact that in one generation's time there will be no trace of the traditional American character Ralph Waldo Emerson described when he spoke of farming:

"This hard work will always be done by one kind of man; not by scheming speculators, nor by soliders, nor professors, but by men of endurance—deep chested, long-winded, tough, slow and sure, and timely."

I have sat countless hours over the last couple years talking with farmers trying to understand what they are going through. And I know this: they are in pain. Heartbreaking anguish as they watch their lives stripped away. Their boundaries disappearing. The boundaries which describe their work, their land, their family, their faith in this country and their faith in God.

These people are living in a kind of modern day slavery. Not just physical laboring fullscale with no proportionate reward. But also mental and emotional. I've seen over and over the terrible toll living with the fear of losing everything takes on these proud people.

They are being made to believe they have failed. They've failed their families, their heritage, their country and they have failed their land.

Every morning they must newly encounter the overwhelming anxiety and stress of their situation. Outstanding loans, principle payments that can't possibly be met. Interest payments that are larger than the family's yearly income, operating loans that are handed out or withheld with no conscionable license. Being forced to make figures work that cannot work until a recommitment is made by this government to assure the survival of our farms and rural communities.

They, as individuals, are not responsible for this economic crisis that has pushed them to the brink. The staggering combination of low prices, high interest rates, high production costs and declining net worth is beyond the control or responsibility of any one individual citizen. But for them the result is a life of torment. Emotional and intellectual imprisonment.

In all my experiences, I've never seen a people work harder or longer or with more commitment to their product. And like all Americans, they've been taught the work ethic and they've been encouraged to do more, get bigger, get better, more efficient, be more productive, make more money, expand! Plant fence post to fence post.

You know, I never really understood what the meant until I lived in Iowa during the winter months and discovered the reality of planting fence post to fence post was the cutting of the hedgerows. Hedgerows, by nature, were left as a protection, a guard against the elements. Now they've been eliminated.

And isn't it a strange and sad parable that in an effort to live the American dream these people are now left totally unprotected out there on the American landscape?

If this is allowed to continue then we must admit that it is painfully clear we are a nation no longer motivated by laws of Christianity, that we are exempt from moral or spiritual responsibilities by our own misguided and mis-informed self-righteousness.

Farmers, by the nature of the breed, are typically and historically the most patriotic people in this country. But they are being betrayed by this government and left to suffer.

If this administration continues on the path it has determined it will cause irreparable damage across the homeland of America. If David Stockman's response to the farm crisis is: "We have too many farmers." And Ronald Reagan lamely jokes that it's the farmers who should be exported. Or that farm bankruptcies and foreclosures are part of the solution to inflation.

What prayer do these people have?

It is a great tragedy to witness their loss of faith in this government because as Thomas Jefferson said, "The farmer is the strength of the nation."

How can we allow this great American tradition to be annihilated through conscious and cruel disregard? If you who are going to be making the policies that shape their destinies—if your could truly see with your hearts and not just allow the issue to remain an intellectual idea locked in the mind—then perhaps there is hope.

If immediate short term action is taken to aid distressed farm families and ease the current credit crunch—followed by the working out of a 1985 farm bill that would guarantee better price supports in combination with supply management on the part of the farmers. Perhaps then there is hope.

But if economic debt becomes the criteria for justifying extinction than we have conveniently erased our moral debt. Is there a political frame of mind that can honestly weigh these two sides, or is an entire way of life going to be swept away on the basis that the "numbers don't work"?

Emerson voiced it this way and it still holds true: "It needs science and great numbers to cultivate the best lands, and in the best manner. Thus true political economy is not mean, but liberal, and on the pattern of the sun and sky.

"Population increases in the ratio of morality; credit exists in the ratio of morality. The city has always recruited from the country. The men in cities who are the centers of energy, the driving wheels of trade, politics, or practical arts, and the women of beauty and genius, are the children and grandchildren of farmers, and are spending the energies which their fathers' hardy, silent life accumulated in frosty furrows, in poverty, necessity and darkness."

Thank you.

STATEMENT OF SISSY SPACEK

Mr. Chairman and Members of the Task Force, my personal connection to American agriculture goes beyond appearing in one of last year's "farm" movies. I am a product of rural America. I was born there. I grew up there. I was a 4-H'er.

My mother was a homemaker. My father served for 30 years as a county Agricultural Agent in Texas. My grandfather was a farmer and Deputy Agent of the Federal Farm Credit Administration under Franklin Roosevelt.

I am very proud that I come from a family that for generations has cared about American farmers and American farmlands, and it is our conviction that the American family farmer is the most efficient, stable and productive of all the world's farmers.

So I'm not here today to defend them on nostalgic grounds, but to support them as the best and wisest of farmers.

Right now the future of American agriculture looks pretty bleak. Young farmers can't afford to get started, and in an effort to make up losses, existing farmers plant every available scrap of ground, contributing to the worst soil erosion in history.

And corporate farms are learning the hard way what the family farmer has known for centuries: farming is no easy road to short-term profits.

I would be naive to assume that this is a simple problem with simple answers, but one thing I'm sure of: we can't turn our backs on these people who have fed us all so abundantly and cheaply throughout our history.

Our largest and most vital industry is disintegrating. It is not marginal producers, speculators or bad managers who are being

squeezed out, but the solid core of our agriculture which is threatened.

And trouble on the farm spreads without regard for performance. As bankruptcies mount, land values fall—and since production loans are secured by land, without borrowing another dime, all farmers fall deeper into debt.

If we think this catastrophe affects only the farmers, we are dangerously naive.

The drugstore, the implement dealer, the grocery store and the bank in every agricultural community in this country is in trouble, and that trouble arrives in the cities when homeless farmers with their wives and children come to town to look for a job.

We have a responsibility to insure that our farmers make not only a fair living, but can't afford to put back into the soil what they take out.

And the American public recognizes our responsibility in this crisis: According to recent USA Today and New York Times polls, more than 70 percent believe that the federal government has a clear obligation to save financially distressed farm families—families who are endangered by forces beyond their control, families who are the stewards of our homelands, this fertile American earth.

We have to give farming back its hope. We have to give farming back its future, because these farmers are our hope.

I quote Wendell Berry: "We have neglected the truth that a good farmer is a craftsman of the highest order, a kind of artist. It is the good work of good farmers—nothing else—that assures a sufficiency of food over the long term. Good work, which in fact endures beyond the foresight of economists, can be valued, but not priced because its worth is incalculable.

"We are a society that has fallen in love with disposable items. We are fast becoming a society that knows how much things cost but has no idea what they are worth"—end quote.

I would like to read this letter from a farmer in Minnesota, postmarked April 17th, 1985:

"Dear Ms. Spacek, I am writing this letter to you because you understand the farm problem. I am asking you if you could help me financially save my farm. I don't like doing this but I've got to find somebody before it drives both my wife and I crazy. I know I'm asking a lot, but all I want is a chance for my son to farm too. If you can't help me, would you know of anyone who would? As it is time to put the corn in the ground, could you respond quickly?"

Mr. Chairman, it will be a great world tragedy if we allow ourselves to believe that the family farm is disposable.

A century ago, William Jennings Bryan said, "Burn down your cities and leave your farms, and cities will spring up again as if by magic, but destroy our farms and the grass will grow in the streets of every city in the country."

Thank you for this opportunity to appear before you today.

[Press Release House Democractic Caucus Task Force on Agriculture]

ACTRESSES TESTIFY ON FARM CRISIS

WASHINGTON, May 6, 1985.—Three award-winning actresses who recently starred in films portraying struggling family farmers testified today on the "human dimensions of the farm crisis" before a special House panel on agriculture.

Jane Fonda, Jessica Lange and Sissy Spacek appeared before the House Democratic Caucus Task Force on Agriculture, chaired by Rep. Thomas Daschle (SD). They also met privately with House and Senate members and with farm organizations at a meeting hosted by WIFE (Women Involved in Farm Economics).

"These very talented women care deeply about agriculture and the plight of the family farm," Rep. Daschle said. "With their films and their testimony today, they have raised the consciousness of the American people about the struggling family farmer and have made an important contribution to the national debate on the crisis in rural America."

In her testimony, Ms. Fonda said, "The reason we are here is to underscore the gravity of the crisis that is leading to the bankruptcy, humiliation and banishment of farmers from their lands at a rate not seen since my father made 'The Grapes of Wrath.'"

Ms. Lange added, "I have sat countless hours over the last couple years talking with farmers, trying to understand what they are going through. And I know this: they are in pain."

Ms. Spacek, who grew up on a farm, told the task force, "We have to give farming back its hope. We have to give farming back its future, because these farmers are our hope."

Ms. Fonda spent 10 years developing "The Dollmaker", which she produced for ABC-TV and which won her an Emmy for her role as Gertie Nevels, a farm wife struggling to keep her family together during World War II. Ms. Lange portrayed Jewell Ivy in "Country," a film about an Iowa farm family trying to overcome seemingly insurmountable odds. And Ms. Spacek, produced and starred in "The River." Both Ms. Lange and Ms. Spacek received Academy Award noninations for Best Actress.

Actress Sally Field, who won the Best Actress award for her role in "Places in the Heart," another film about the farm crisis, was unable to testify personally but did submit a written statement.

TAKEOVER ATTEMPTS

Mr. BUMPERS. Mr. President, recent press reports indicate that the oil industry is being subjected to a major involuntary restructuring as a result of takeover attempts by various financial interests. Mr. Boone Pickens and others have made persuasive arguments that this revolution should proceed unexamined, but I am not convinced. The Senate should be concerned about such radical changes in a major industry for many reasons.

One of the arguments that Mr. Pickens makes with the most conviction is that the companies which he and his allies have targeted are poorly run, and that a takeover will help the shareholders. Mr. Pickens' record as chief executive officer of Mesa Petroleum, however, indicates a rather limited concern for shareholders.

The May 6, 1985, issue of Business Week contains an article showing that Mr. Pickens is the highest paid executive of any company, earning $22,823,000 in 1984 and a total of $23,773,000 from 1982 to 1984, but Mesa shareholders only realized a 5 percent return on their investment, including dividends and appreciation of equity. Similarly, some shareholders have been hurt by fluctuations in the value of Mesa's stock. In 1981 Mesa was selling for $34 per share, but today it is selling for only $17. These fluctuations were caused by Mr. Pickens' attempts to take over various companies. It appears that Mr. Pickens' concerns for shareholders lasts only as long as their interests happens to coincide with his.

Mr. Pickens and his financial allies have argued persuasively that they are merely operating as our free market allows them. That begs the question, because there is no doubt that such financial freebooters as Jay Gould and his allies did the same thing in the 19th century. It became very apparent that their operations were nonetheless contrary to the public interest, because they were manipulating stock values in order to benefit themselves and ruin others.

States passed laws to prevent such manipulations, and Congress eventually passed security laws to cure other problems. Therefore, the question is not whether these moneyed men are operating in the free market, but whether they are able to manipulate the market unfairly to their advantage and to the economic disadvantage of true investors. If so, Congress should take appropriate action.

In this regard, there are some very definite and immediate financial concerns, particularly the use of so-called "junk bonds" to finance these takeovers. Junk bonds are exchanged for pledges of financial assistance in a takeover attempt.

If the attempt succeeds, they will be repaid out of either the assets of the target company or its future profits.

They are a very speculative undertaking when used in taking over an oil company. A sudden decrease in oil prices can bankrupt a company saddled with such a debt. Investors would be severely damaged. That in itself need not be a serious concern in our free market economy. The difficulty arises from the fact that federally insured depository institutions may be among the major investors in these bonds.

Thus it is conceivable that the Federal Government is at least the partial surety for some of these shaky investments. This fact deserves serious consideration, and it is one of the reasons that Senator DOMENICI introduced S. 975, the Securities Safety and Soundness Act of 1985, which would impose a moratorium upon using junk bonds in hostile takeovers.

There is a further serious and fundamental public policy consideration in takeovers of oil companies, and that is the effect upon future energy production. When Phillips Petroleum staved off successive takeover attempts, it did

so only by assuming huge amounts of debt and contracting its operations, including a reduction of exploration. ARCO has recently taken similar action.

Outsiders can argue whether this action resulted from the considered judgment of company officials or from sheer fear of being taken over. Regardless of the motivation, the most important point is that its restructuring will undoubtedly reduce its exploration efforts. Similarly, with smaller exploration funds available, the company will assuredly shrink from more risky ventures, even though they might have a higher payoff.

It is very likely that if Unocal survives Mr. Pickens' latest takeover attempt, it will do so as a shrunken company with a greatly reduced oil exploration budget. Moreover, we must remember that most of these companies have made valuable efforts to develop alternative sources of energy. Mr. Pickens has already stated that these efforts are a waste of the shareholders' equity, so it is clear that any company that he eventually conquers will be forced to abandon attempts to develop oil shale, geothermal and solar technologies.

I am afraid these takeover artists have a very shortsighted approach to profitability and a no-sighted view toward the public interest. Rather than meekly submitting to their financial ministrations under the guise of honoring the free market and its hidden hand, we must carefully examine whether their activities serve the public interest, and, if not, then we must devise appropriate legislative responses.

SOVIET MANIPULATION OF THE MEDIA

Mr. HATCH. Mr. President, the Soviet Union is engaging in an intensive ideological warfare campaign aimed at discrediting the United States and breaking up the NATO alliance. According to the CIA, the Soviets spend at least $3 to $4 billion per year on ideological warfare. This effort is not mere propaganda, but an intensive so-called disinformation campaign of lies, distortions, and forgeries which are part of a larger Soviet tactic known as active measures. The Soviets use the term "active measures" to describe their efforts to actively influence Westerners to further Soviet interests. One key component of this campaign is manipulation of the Western press. Experts disagree on the extent of Soviet influence in this area and how successful their effort has been, but it is widely acknowledged that the Soviets are making a conscious effort to influence Western political behavior through the media.

An interesting and very important paper has come to my attention on this topic by Dr. Roy Godson, who is a distinguished foreign service professor at Georgetown University and an expert on Soviet active measures. Dr. Godson points out that the Soviets' long-term goal in manipulating the Western press is first and foremost to discredit the United States. According to Dr. Godson, the Soviets seek to affect Western attitudes and behaviour on important issues, especially the key issue of military preparedness.

Mr. President, I hope that each and everyone one of my colleagues will take the time to read this thought-provoking paper by Dr. Godson. I ask unanimous consent that it be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

SOVIET MANIPULATION OF THE MEDIA: FACT OR FICTION

(Address to the Commonwealth Club of California)

Today, I want to talk about a subject which is attracting increasing and serious attention in the West, a subject which controversial but one which remains important: the manipulation of the media, and hence informed decisionmaking in our democratic society.

Although we sometimes take for granted our vigorous and free press, we tend to react strongly against attempts to manipulate free expression, either by legal means, or by overt or covert pressure from governments or groups which espouse particular ideas. We generally assume that left to its own devices, and given freedom and time, the press will deliver to us truthful, objective information and analysis that contributes to rational policymaking. Recently, however, we have begun to learn about a relatively new threat to objective media reporting: that we may be reading, seeing and hearing a version of events which not only is inaccurate and downright false, but one which has been manufactured to distort our perception of reality and to influence us. This afternoon I would like to discuss this issue.

Let me begin with a major and telling example. In the Spring of 1982, the world press and particularly the American press was flooded with stories about the former Soviet KGB Chairman, Yuri Andropov, who some months later succeeded Leonid Brezhnev as the major Soviet leader. When Andropov headed the KGB from 1967 until the early 1980's, his image in the Western press was that of a hardline secret police boss, who used the largest and perhaps the most effective secret police and intelligence service in the history of the world to ensure the Communist Party's continued control of the Soviet people. Indeed, under his regime, the KGB, in a fit of creativity that surely rivals that of Heinrich Himmler and Joseph Mengele, developed the use of psychiatric hospitals to control Soviet dissidents.

But in the Spring of 1983, Andropov's public image in the West began to suddenly and radically change. Let me recall for you just a few of the stories and descriptions of Andropov that appeared in many newspapers.

One major East Coast daily headlined a story from Moscow with: "Andropov Seen as Closet Liberal." That paper had previously reported Andropov to be an unimpressive "five feet eight inches", but now elevated him to "tall", and added urbane, well-educated, and enlightened. Another major East Coast paper noted that Andropov "stood conspicuously taller than most" Soviet leaders, and that "his spectacles, intense gaze and donnish demeanor gave him the air of a scholar." He was credited with knowledge of foreign languages—English, German and even Hungarian. He was described as a "witty conversationalist" a "bibliophile," a lover of jazz, romantic novels and a connoisseur of modern art. There were even hints that he might be partly Jewish. In short, as the liberal magazine, The New Republic put it, "a short, burly thug almost overnight became a tall, dapper Chubby Checker fan."

Let me cite a few more examples of stories which I believe have a less obvious but nonetheless common thread:

"CIA Seen Involved in Ghandi Assassination."

"Regan Presidency Leads to Strained Relations With Moscow."

"U.S. Implicated in Plot to Tie Soviets to Pope Assassination."

"Korean Airliner Alleged to be U.S. Spyplane."

How and why did these and many other similar stories—of very dubious authenticity—appear on almost every continent? Why did the electronic and print media from Washington to Wellington give international currency to them? All are sensational and have damaging implications far beyond their apparent subject matter.

Of course, it is entirely possible that the media, on its own, in various parts of the world and at about the same time, came to similar conclusions on the basis of highly contentious "evidence." It is also true that many journalists are not sympathetic to the United States or to its current Administration, and that it is by no means unusual for stories about the U.S. to be negative in tone and content.

There is however, another possible explanation—namely that the headlines and the stories just cited—and many like them—are the result of a conscious effort to manipulate the media. Proponents of this view differ on how extensive this manipulation is and how successful it has been, but they believe there is a massive and ongoing effort to affect political behavior in the West through the world media—and that the Soviet Union and its allies are largely responsible.

I have been studying this subject together with a colleague on the faculty at the Fletcher School for several years, and we recently published a book—"Dezinformatsia"—about it, convinced that the weight of evidence supports the view that manipulation can and does take place.

I want to be very clear about what I am saying, however. I do not believe, as some do, that most of the world's media are controlled or manipulated systematically and that every or almost every negative story about the United States is the result of Soviet manipulation. Nor do I mean to imply that ALL attempts to make use of the media succeed. What I would like to propose and submit evidence to support is the proposition that there is a massive attempt by the Soviet Union to influence and use the media as well as other important Western governmental and private sector opinion leaders; that sometimes these attempts are successful; that the campaign is ongoing; and that by being aware of it, by speaking the truth about it, a free society can in large part neutralize its effects.

How can such conclusions be substantiated?

First, we have learned a great deal from information provided by Soviet bloc officials who now live in the West. This information has been cross-checked by scholars and Western government officials. These defectors tell us that the manipulation the media is part of what in Moscow is referred to as "active measures" (aktivnyye meropriatia). These are attempts to actively influence Westerners to act in ways designed to further Soviet interests.

A variety of tactics are subsumed under the term "active measures." Among the most important are the use of the media to influence, mislead, or deceive the target so that he acts in a way favorable to Moscow. This is done through overt propaganda and manipulation, as well on covert means including the use of secret agents of influence and forgeries—or a combination of the two—Kombinatsia—as the Russians sometimes call it. This also involves the use of information which is basically true, as well as intentionally false information, or disinformation.

Based on the eyewitness accounts of those who received their orders to engage in these activities from top Soviet leaders, we can be fairly sure that Moscow believes that the use of "active measures" and particularly media manipulation and disinformation is an important means of shifting what they call the "correlation of forces" further in their direction.

The institutions or organizations in Moscow and throughout the world that engage in these activities are directed from the very top echelons of Soviet government. They involve a vast array of techniques, fueled by an unprecedented level of financial and human resources.

The most important Soviet institutions that control and carry out these activities are the International Department of the Central Committee of Communist Party of the Soviet Union—the CPSU. The International Department is perhaps one of the most important and least studied parts of the Soviet government. It controls, to a significant degree, more than ninety Communist parties around the world and 13 major international fronts, the most important of which—the World Peace Council—has affiliates in every major western country including the US Peace Council. The International Department also works to influence Western scholars, young political leaders, trade unions, women's groups, and lawyers around the world.

The second organ of the CPSU is the International Information Department. Created in the late 1960's this institution coordinates the Soviet media in Moscow and the Soviet media and press throughout the world. It passes on the information in the 3,000 plus hours of Soviet radio broadcasts to the world in eighty languages each week. It coordinates the themes of the hundreds of Soviet "journalists" stationed throughout the world. It would be as if the Republic Party controlled and coordinated the entire media in the U.S., and every U.S. journalist overseas.

A third institution in the Soviet active measures apparatus is the press section of the Ministry of Foreign Affairs. It accredits Western correspondents in Moscow, and has a great deal of day-to-day control over their access to and contacts with Soviet officials and citizens. Through Soviet Embassies and consulates abroad, it also seeks to influence journalists in non-communist countries.

Two other institutions that play an important role in Soviet manipulation are the KGB's First Directorate and a section of the KGB's Second Chief Directorate. The First Chief Directorate works almost exclusively to spy on and to influence the noncommunist world. It has a special staff in Moscow, now known as Service A, whose function is to assist in secretly influencing the media and other important sectors of our society.

Abroad, the First Chief Directorate of the KGB and other Soviet bloc intelligences have headquarters in every country, usually based in Embassies, missions, and consulates. In addition to engaging in espionage and buying—or stealing—technology, they also carry out "active measures." In Western Europe, for example at any one time there are approximately 14,000 legal Soviet bloc officials, 30-40% of whom work for the KGB and its sister services. Of these ½ or approximately 3,000 work in what Moscow calls Line PR—that is political espionage and influence operations. In the United States there are about 2,200 legal Soviet bloc officials, so using the 30-40% figure, this means about 700 are intelligence officers, and 300 of them in Line PR, engaged in political spying and influence operations.

In addition to thousands of "legal" spies and active measures specialists, Moscow also has an unknown number of illegal or deep cover agents embedded in Western society. In recent years for example I was startled to learn that a student at my own university was a second generation illegal. That is, his parents had been sent by the KGB to be illegal agents first in West Germany and Canada. Then his parents went to live and work as photographers in the suburbs of New York in the 1970's and they sent their son to Georgetown University. In addition to his regular studies, the son was being trained in the summers to be a deep cover illegal and it was expected that after graduation he would seek a position in the U.S. government. While he was at Georgetown Moscow also asked him to identify fellow students who were planning to join the CIA, as well as keep an eye on Chinese students studying on the campus.

Another section of the KGB in Moscow, the Second Chief Directorate, is concerned with counterintelligence, but has a special section to study, assess, and manipulate the Western press stationed in Moscow. I have talked with a former Soviet official who worked in this section and he has described in detail how he went about his work.

In terms of manpower, it is estimated that these institutions employ somewhere between ten and fifteen thousand people in Moscow and another ten to fifteen thousand throughout the world. Their annual budget the U.S. government now believes is in the range of 3-4 billion dollars.

To influence and manipulate the western media, the Soviet apparatus uses a combination of overt and covert instrumentalities, and old tried and true methods together with new public relations techniques. For example, in Moscow, because they completely control access to all important government officials and all Soviet media, they are in a position to assist a journalist become a star reporter—first with the news. Take the case of the liberalization of Yuri Andropov. How did this come about? Let me cite the seminal story in the East coast newspaper in 1983. "While largely unknown in the West, East Europeans who have met with Andropov"—because the Western journalist could not—"have described him as an affable and efficient man who has managed to place considerable restraints on the KGB". Note that this report about Andropov is the story about the same man who crushed the Hungarian Revolution in 1956, who innovated the use of psychiatric hospitals and drugs, and who was responsible for the KGB at the time there were attempts on the life of the Pope and probably Lech Walensa. Clearly, someone in Moscow was planting rumors.

Some columnists and reporters are conscious of this Soviet technique. For example, Joseph Kraft recently pointed to various published stories about current Soviet leaders as emanating from a journalist "long in Moscow, who is thought to have KGB ties. A second was a planted rumor which blazed through the diplomatic community and was then traced back to a KGB source." Other journalists, particularly those under pressure from their editors for dramatic news from Moscow, may be less careful and more susceptible to influence and rumors. This is a tried and true Soviet gambit, and I have discussed the technique involved with specialists who used it.

Other documented methods of Soviet influence include actually recruiting and controlling a journalist, a government press spokesman, a news service, or even a newspaper as well circulating and recycling forgeries. One example which shocked France in recent years was the conviction of journalist Charles Pathe in the late 1970's, who had been working for the KGB for nearly twenty years. Pathe was a well connected journalist who wrote under his own and other names. He also published a newsletter, which the Soviets helped finance, received by a small but influential readership. The newsletter consistently attacked the U.S. and sought to detach France from the NATO Alliance. Now in other European countries, the public is learning that a recent press spokesman at the Norwegian Ministry of Foreign Affairs has been working for the KGB for many years, and that a major Greek daily newspaper was influenced by, if not completely financed by the KGB, and is consistently anti-U.S.

Another favorite covert Soviet bloc tactic is the production and dissemination of forgeries. This long time favorite apparently was halted in the 1970's during the Watergate investigations, but in the late 1970's the pace of Soviet bloc forgeries picked up and now hardly a month goes by without the U.S. government finding forgeries designed to influence the media. Sometimes these forgeries are crude, quickly spotted and do little damage, such as the fake Ku Klux Klan letters last summer designed to intimidate African and Asian athletes. Sometimes however they damage the reputation of the U.S. and are recycled in the press year after year in spite of being identified as forgeries.

In addition to these covert and traditional methods of media manipulation, Moscow also sometimes is more open and innovative. One new technique is the Western-style press conference. One of the more sensational examples was the appearance of the then head of the Soviet General Staff before the world press after the Soviets again shot down an unarmed civilian airliner, this time in September, 1983. The news conference was unprecedented. The General's speech and charts received extensive coverage and confused many as the Soviets sought to exculpate themselves from intentionally shooting down the Korean civilian airliner, whose many passengers included a U.S. Congressman. During the

course of the press conference and in the ensuing propaganda barrage, the Soviets sought to sow doubt about the benign nature of the flight, and tried to suggest that the United States was somehow implicated in the massacre of innocent travellers.

Another recent technique is the veritable parade of Soviet "journalists' and "scholars" who now appear as invited guests regularly on Sunday morning and late night TV talk shows, live coast-to-coast radio programs—as well as instant commentators on special occasions such as the inauguration of President Reagan. All of them speak very good English, appear very much at home on the U.S. media, and are excellent propagandists. All of these gentleman, however, are part of the Soviet active measures apparatus. Their appearances and the themes they espouse are coordinated by the International Department and IID of the Central Committee. They are completely paid Soviet government propagandists, even though their U.S. radio and TV talk show hosts usually describe them to the U.S. audience as "journalists" and "scholars". I am not suggesting here that they should be denied free time on the U.S. media. What I am saying, however, is that we should recognize them for what they are—part of a massive and increasingly sophisticated effort to use the media to influence us.

Now what does Moscow hope to achieve with all this effort and money? It is not always easy to understand Soviet motivation, but based on careful reading and analysis of Soviet overt and covert propaganda and disinformation, as well as numerous interviews with former Soviet specialists who sought to manipulate the Western press, Moscow appears to have both long-term objectives which they pursue year in and year out, as well as short term objectives geared to specific events and opportunities.

Over the past several decades, and there is no indication that this is about to change, whether we are in a period of detente or a period of more strained relations, Moscow seeks first and foremost to weaken and discredit the U.S. We are, they teach their KGB and other active measures personnel the "main enemy," (glavnyy vrag) and one of their main tasks is to diminish U.S. military, economic, and political power throughout the world. Second, they seek to split the various strategic alliances we have built up, particularly the NATO Alliance. They want to separate—to decouple—the U.S. from Britain, France and Germany, and to separate the major European allies from each other, as well as to weaken our alliance with Japan, Australia and New Zealand. Should they succeed, they would be in a position to dominate each continent.

Third, Soviet leaders seek to enhance the reputation of politicians and parties that help achieve these objectives, and denigrate if not destroy those politicians, parties, and movements that don't. Their attempt to enhance Andropov's reputation and denigrate Reagan's in recent years, was preceded in the 1960's and 1970's with active measures—campaigns against politicians such as the conservative Franz Joseph Strauss in Germany, and supportive of center right candidate Giscard d'Estaing against Socialist Mitterand in France. In other words, they don't only support left-of-center politicians. They support those whom they believe are useful. In their view, Giscard was more useful and Strauss and Mitterand less valuable in splitting and weakening the NATO Alliance.

Finally, they seek to affect Western attitudes and behavior on important issues, particularly military preparedness. They engaged in a massive, and they believed, successful campaign to stop NATO deployment of the so-called neutron bomb in the late 1970's. They are still in the midst of seeking to influence the peace movement to prevent the modernization of U.S. and NATO forces.

In addition to pursuing these long term objectives, Moscow also pursues short-term gains. In the coming months, for example, they will seek to influence the media so that (1) the new Indian Prime Minister, scheduled to visit the U.S. in June, 1985, does not develop closer relations with the U.S., (2) ensure attention is drawn away from the evidence that more and more links Moscow and the Bulgarians intelligence service to the shooting of the Pope; and (3) ensure that the 40th Anniversary of the ending of World War II is perceived as a result of Soviet efforts and that the cause of the war and the use of the atomic bomb can be laid at the feet of Western politicians.

Not all these campaigns—and others they will mount—will be successful by any means. Moscow doesn't expect them to be. They are, however, an important means, in addition to diplomacy and military power, that the Politburo uses to exert its influence.

What can and should be done about this attempt to manipulate the press and distort our understanding of reality? There are no simple solutions. We are and wish to remain a free, pluralistic society which allows freedom of expression. Hence, we will remain vulnerable to manipulation, in ways which closed totalitarian systems—where the media is totally controlled—are not.

At the same time there are a number of measures, each with advantages and disadvantages, that can be taken to limit the deleterious effects of Soviet manipulation.

The most appealing option we have is truth.

Let us simply make ourselves as aware as possible of how and through what means Moscow is seeking to manipulate the media and to disinform us. To a large extent this already is happening. Seven or eight years ago those in the government, the press and the academic community who stated that there was cause to study Soviet active measures techniques and disseminate information about them were ridiculed or called McCarthyites and right-wing fanatics.

But beginning in the last year of the Carter Administration and now continuing in the Reagan Administration, the U.S. government is making available information on Soviet attempts at manipulation. This should be continued and expanded. I am glad to see that other Western governments such as the West Germans are beginning to do the same.

On the non-governmental side, academics, novelists and journalists, more and more are taking the subject seriously and alerting the public and their colleagues. Much more needs to be done however.

One important step would be the creation of a non-governmental scholarly group to identify and report to the press on current and anticipated Soviet attempts at manipulation and disinformation. Until now, awareness of Soviet efforts at manipulation has been based on revelations of past ventures. There has been no mechanism dedicated to the timely monitoring and dissemination of information on current and anticipated Soviet activities. Politicians, journalists and scholars are uncertain of Soviet attempts to influence and deceive them until after the fact. Hence, protective measures are all but impossible.

I am glad to report that plans are now underway for the production of timely information and analysis on Soviet active measures. The National strategy Information Center of New York and Washington, D.C., which sponsored the research which resulted in my recent book on Soviet disinformation, hopes to produce such analysis and make it available to the public and the press, several times a year.

These reports, like the book "Dezinformatsia," will be based on objective study both of contemporary Soviet overt and, to an extent, Soviet covert attempts to manipulate the West. The reports will be prepared, entirely by non-governmental scholars and specialists with private funds. Hence, journalists and others who are the target of the Soviet apparatus, whether they are stationed in the United States, Moscow, or elsewhere in the world, will be further forewarned and forearmed.

Another series of steps can be taken by the media itself. Here, a series of very impressive proposals have been made by the British/French publisher, Sir James Goldsmith who puts out two major and very popular French magazines, L'Express and Lire. In a speech last year in Washington, he suggested, among other things, that journalists should disclose to their editors and publishers their sources of income, to help ensure that they are not subject to conflicts of interest. Sir James pointed out that while the invasion of some degree of privacy is odious, public servants and other types of professionals are required to make just such disclosures about their income. He then recommended that journalists do the same, and to bolster his point he gave the example of a New York journalist who was asked to resign when his editors unexpectedly discovered that he was receiving money from a Palestinian/American organization of dubious objectivity.

Sir James also maintained that owner/publishers, as well as editors should exercise more rigor in the supervision of their employees. He cited as examples the failure of the editors of Op-Ed columns to adequately identify the partisan backgrounds of some of their columnists, and the failure of other editors to ensure that their reporters remained objective and not subject to manipulation. Just how this might be done, Sir James did not say. He maintained, however, that until now discussion of these problems has been taboo. Those who confronted them frankly were labelled McCarthyites or worse. He urged further serious consideration of the problem, by publishers, journalists and editors.

Another proposal which has been made, and again it fits in with the theme of using the truth and openness to combat manipulation and disinformation, is including in the curriculum and training program of journalists, courses on disinformation and manipulation. Indeed, at least one school of journalism in the United States, Boston University, now has a course on the subject. Similar courses could be added to the curriculum of other schools of journalism and communications.

Finally, there is investigative journalism. Journalists, in the best tradition of the free press, could investigate attempts at manipulation and publish their findings. Scholars investigate the work of other scholars, policemen investigate other policemen, should not journalists probe attempts to manipulate the media? Again, this is beginning to happen. The media in the U.S. and abroad increasingly is publishing stories on the sub-

ject. As Time magazine put it last fall, after the major German newsmagazine Der Speigel accepted that to some extent it had been manipulated by Moscow to discredit Franz Joseph Strauss in the 1960's, the problem raised in the Speigel case "is one that knowing journalists cannot easily dismiss."

Ladies and gentlemen, that the Soviets attempt to manipulate the media is a fact. Soviet policymakers believe that this is an important vehicle to affect our behavior, and they have increased the resources they devote to this instrumentality as well as improving the quality of their efforts.

Sometimes, Soviet leaders are successful. On occasion we learn of their success when the truth about a particular subject becomes known years later, or when individuals who engaged in these activities defect and tell us precisely what they did.

We will continue to be the targets of attempt to deceive and mislead us. The best defense is truth, not regulation. Government can assist by making available information on attempts at manipulation. But it is up to all of us to ensure that the information that affects our ability to make informed rational decisions remains as objective as possible.

Thank you very much.

"THE POPPY"

Mrs. HAWKINS. Mr. President, the National Geographic did its usual fine job with an article in its most recent issue entitled "The Poppy."

In this exhaustively researched article, the National Geographic provides its readers with a wealth of information about the opium poppy. This information is provided from both a historical perspective and a modern-day insight. The product of the heroin-producing poppy is referred to as "unique in its profound and far-reaching effects on humanity, both good and evil."

The good that comes from this beautiful flower we all know—the medically necessary painkillers, morphine and codeine. But it is the evil that comes from the opium poppy, heroin, that holds half a million Americans in the grips of addiction, and that causes users to rob and kill to procure it.

Nearly all heroin is produced by outlaws, primarily from poppies illicitly grown in remote corners of Asia or Mexico. Smuggled into the United States, it reaches nearly every community and every level of our society, bringing addiction and misery to hundreds of thousands of people.

This product of the opium poppy has been recognized as special for many centuries. In its long recorded history, it initially appears as an accessory of magic and religious ritual, and as a sedative and sleeping potion. Ceramic jugs shaped like poppy capsules which date from the late Bronze Age are exhibited in museums, and relics from ancient Egypt also indicate that society's use of opium.

A particularly fascinating bit of historical hypothesis emerges from this article: When Christ was dying on the Cross, according to Scripture, He was offered vinegar mixed with gall. It seems that the ancient Hebrew word for gall is "rosh," which means opium.

As civilization advanced, the benefits of the poppy became more obvious; for example, the father of medicine, Hippocrates, discovered its use as a pain killer. As early as mid-16th century, opium was developed into a liquid form, which became known as laudanum, and was used as a pain killer until this century. In 1815, morphine was derived from opium by a German scientist, and this drug is still the modern world's standard against which all pain medicines are measured.

But, as this article points out, it was an equally long time ago that it was discovered opium can kill. It was not until the late 19th century that opium's most destructive derivative, heroin, was developed and marketed. It has remained, since its inception, as the most addictive and damaging of narcotics. The short-term effect of heroin, when injected directly into a vein, is a rush, an overpowering sensation of pleasure. The results soon thereafter include illness, hallucination, and addiction.

Latest U.S. Government estimates indicate that Americans spend $4 billion a year on heroin. The National Geographic also provides us with spending estimates for other illicit narcotics: $18 billion for cocaine and $44 billion for marijuana. Then, the markup for these products is compared—for cocaine and marijuana, as much as 200 percent; for heroin, 900 percent.

The amount of heroin smuggled into the United States per year is estimated to have reached 4 metric tons a year, and it is thought by the Drug Enforcement Administration that nearly half of this tonnage comes from the nations of Afghanistan and Pakistan. The National Geographic points out that even though opium was banned in parts of the opium growing areas in 1979, tradition dies hard and the farmers in this mountainous terrain are slow in relinquishing their opium crop. Something is happening in opium producing nations in this part of the world, however, that might speed up their crop eradication efforts—heroin addiction is becoming an internal problem. It is estimated that Pakistan has now tens of thousands of addicts; in 1979, there were almost none.

The newly escalating problem of heroin trafficking and abuse in India is discussed in detail in this National Geographic article. Opium itself is legally available to certain physicians in India, but only those who practice ancient rites of medicine. Opium constitutes a large part of India's history, as it has produced this crop for their own and other nations for centuries. While the Indian Government makes great effort to control legal opium production, some does leak to an illicit market. More and more, India is becoming a haven for narcotics traffickers, and this is also resulting in an increasing problem of internal drug consumption.

The other area of the world responsible for the production of the opium poppy is referred to as the Golden Triangle, the Burma-Thailand-Laos area of Southeast Asia. Extensive poppy growing began in this area of the world in the 19th century. As one villager commented: "If you grow something else to trade, you might have to carry it for 2 days' walking; for opium, the trader comes to you." Though numerous drug law enforcement officials in Thailand have taken steps to curb drug production, Laos and especially Burma remain major producers of the world's heroin supply.

The misconception of heroin being solely an American problem is discussed at length in this article, and as more and more nations fall victim to the problems caused by heroin abuse, the true international scope of the problem is perceived. There is barely a nation left in the world community that is not affected by drug abuse, and the problems we each experience are very much the same, and just as destructive. For this reason alone, we must all fight the war against drugs together.

Mr. President, I would like to take this opportunity to commend the National Geographic magazine for its consistently fine work, and especially for this superb article, "The Poppy."

RESTORATION OF PROGRAMMATIC CIVIL SERVICE CUTS TO BUDGET DEFICIT PACKAGE

Mr. EAGLETON. Mr. President, the Republican compromise amendment on civil service proposes to save approximately $15.1 billion during the next 3 years through civil service programmatic reductions—reductions that will come somehow from employee's total compensation packages—salary, health and retirement benefits, annual leave, raises, et cetera. That is $15.1 billion from a group—Federal employees—which during the last decade has already withstood $40 billion in cuts, according to calculations by the General Accounting Office and the House Post Office and Civil Service Committee.

How can the Senate—a body that on May 3 refused to cut its own pay—ask this group to absorb an additional $15.1 billion in programmatic reductions? Most of these individuals earn far less than Senators; many of them live in the high-priced Washington area. It is simply unfair and unjust to ask this magnitude of savings from

this group at this time. It is also poor policy.

What benefits will be cut as a result of these projected savings? The Republicans don't really know, $2 billion of the projected savings come from unspecified program cuts; I repeat, unspecified program cuts. The remaining billions represent major policy changes in existing retirement, health, and employment programs, and I do not feel these policy decisions can be made in the meat-ax fashion adopted by the Republican compromise amendment.

For example, the Republicans totally ignore the fact that for 2 years the Governmental Affairs Committee, on which I serve as ranking minority member, has been formulating a new retirement system for Federal employees brought into the Social Security system beginning January 1, 1984. The new retirement system will both directly and indirectly affect the benefit package of the current work force. As a case in point, the Republicans project a savings of $3 billion over 3 years by raising employees' contributions to the current retirement system from 7 percent of salary to 9 percent. Now the new system may allow current employees to transfer to the new plan, and the new plan will probably be noncontributory.

If 50 percent of the current work force were to transfer into the new plan, the contribution base would be so reduced that the $3 billion figure would be impossible to attain. Likewise, the Republicans suggest having the Postal Service and the District of Columbia pay substantially more for retirement coverage. Again, the new system may not include District of Columbia employees or even Postal Service employees, so where does that leave our budget projections?

Mr. President, I urge my colleagues on both sides of the aisle to take a careful look at this area and restore the bulk of these funds in any future compromise budget legislation. I am placing in the RECORD a lengthy and detailed statement which addresses the specific proposals and explains why the budget process cannot be used to make the necessary policy decisions at this time.

The statement follows:

STATEMENT OF SENATOR THOMAS F. EAGLETON

Mr. President, included in the Republican compromise amendment are cuts in civil service programs which severely hurt the federal employee. These are not pay freezes or cost-of-living adjustments, but programmatic changes proposed in addition to pay freezes and COLA reductions.

Some of the programmatic changes are straightforward, such as raising federal employees' contributions to their retirement system from 7 percent of salary to 9 percent. Some $2 billion in other deficit reduction amounts, however, come out of unspecified program cuts—let me repeat—unspecified program cuts.

Mr. President, during the last 10 years federal civil servants have already borne nearly $40 billion in cuts in specified programs: reductions and delays in scheduled pay increases, revisions in the Federal Employee Health Benefits Program, implementation of the Medicare hospital insurance tax, elimination of paid holidays from lump sum annual leave payments upon separation from federal service, revisions in the basis for computing general pay from 2080 to 2087 hours annually, changing the annuity adjustment for federal retirees from semi-annual to annual adjustments, limiting the COLA to ½ of the increase in the CPI for retirees under age 62, denying any COLA to military retirees employed in the civil service, postponing the COLA, covering federal workers hired after January 1, 1984 under Social Security, reducing the "windfall" created by dual entitlement to Civil Service retirement and Social Security, and reducing Federal retirees' Social Security spouses benefit by an amount equal to two-thirds their Government pension.

These specified cuts and their accumulated 40 billion dollar savings—calculated by the General Accounting Office and up-dated by the House Post Office and Civil Service Committee—have also been accompanied by loss of jobs through reductions-in-force and contracting out.

Now, after 10 years of cost cutting at the expenses of the federal workforce—a group that I contend has already taken its fair share of deficit reductions—the Republican package suggests deficit reduction methods which will further reduce the number of federal jobs and further "reform" federal retirement benefits, federal pay, and federal health benefits. Worst of all, even the Republicans are hard pressed to find an additional $2 billion they want from the civilian workforce, so we are expected to buy-off on $2 billion of unspecified cuts.

Mr. President, this is simply no way to manage the government's workforce—our employees. Before any additional programmatic changes can be made in the Civil Service, the appropriate House and Senate committees will need to take a long and careful look at the policy proposed, the costs associated with each proposal, and the impact on specific programs. For example, the meat-ax approach embraced by the Republicans in this recent exercise totally ignores the fact that since March, 1983, the Governmental Affairs Committee, on which I serve as ranking minority member, has been working on legislation to provide a new Civil Service Retirement System for employees hired after January 1, 1984, since those employees are now covered by Social Security.

The Committee has spent hundreds of hours on this matter and under the 1983 law must have legislation in place by the end of this year. During the two years it has tackled this project—the largest change in civil service retirement since the system started in 1920—the Committee has been acutely aware that all decisions it makes regarding civil service retirement ultimately affect all other employment benefits. The buzz word is "total compensation," but the point is that if retirement benefits are changed, then can the employee be compensated elsewhere through higher pay, more health benefits, more annual leave, better disability provisions, etc? The programmatic changes proposed in the Republican budget package fail to acknowledge that any "trade-offs" will adversely affect the federal employees. This is particularly serious in light of a recent study by the highly regarded private company, Hay/Huggins, which concluded that total federal compensation already lags 7.2 percent behind the private sector.

Therefore I deeply resent, and personally cannot be party to, ill-conceived and unspecified budgetary cuts at the expense of the federal employee and retiree, and I urge my colleagues to restore the Republican reductions in any final compromise budget package.

Obviously the $2 billion in unspecified changes cannot be substantively assessed, so I recommend that we simply restore $2 billion. The Republican package also includes the following:

(1) Increasing employees' contributions to the federal retirement system from 7 to 9 percent (in effect a pay reduction);

(2) Conforming civil service survivor benefit criteria to Social Security for future beneficiaries;

(3) Reforming the Federal Employee Health Benefits Program to further reduce health benefits now available to federal employees;

(4) Delaying the waiting period for within-grade pay increases by one year (it is unclear whether merit increases and bonuses for senior executives would also be so frozen);

(5) Reducing the federal workforce through attrition by hiring only two workers to replace every three employees who leave;

(6) Substantially increasing the Postal Service and District of Columbia employer contributions to the Civil Service Retirement System and ending the retirement health subsidy for the District of Columbia;

(7) Making pay raises effective in January of each year rather than October;

(8) Cutting agency administrative costs (other than salaries) by 10 percent; and

(9) Making permanent the 2087 hour work year (for purposes of computation of pay per pay period).

Let's analyze each of these proposals.

1. INCREASING EMPLOYEE CONTRIBUTIONS TO RETIREMENT

The Administration has consistently charged that federal employees do not pay enough for their pensions. At the present contributory rate, civil servants must pay 7 percent of their base pay to the Civil Service Retirement System and 1.35 percent of salary, up to the Social Security maximum wage base, to Medicare, for a total payroll deduction of 8.35 percent. In the private sector, workers must contribute 5.7 percent of salary up to $39,600 for Social Security and an additional 1.35 percent to Medicare, for a total payroll deduction of 7.05 percent, more than a full percent less than federal employees. In addition, private sector workers receive pension benefits for which, according to a 1982 Bureau of Labor Statistics survey of firms employing 250 or more employees, 93 percent of private employers require no employee contributions. Finally, many private sector employers match employees' voluntary contributions to thrift or savings plans. Thus, the private sector employee currently has the potential to receive more retirement benefits than federal employees, and at a mandatory contribution rate (Social Security and Medicare) less than the combined Medicare and civil service rate. Therefore, to raise the federal contribution rate at this time would be both unfair and unwise.

2. CONFORMING CIVIL SERVICE SURVIVOR BENEFITS TO SOCIAL SECURITY

The survivor benefits available to federal employees are part of their retirement package, which is an employment benefit for which each employee contributes. There is no social welfare aspect to the Civil Service Retirement System, as there is to Social Security, so it is irresponsible to jump to the conclusion, as does the Republican package, that what is good policy for Social Security is good policy for federal employees. The civil service retirement benefits for survivors are more generous than Social Security—for example, Social Security will allow benefits to surviving children only to age 18, while Civil Service allows them to 21 if the child remains a full-time student—but these are benefits provided federal employees, as explained earlier, in lieu of other employment compensation. Also, I should emphasize that the civil service survivor's package is similar to the package required by private sector employers under ERISA, and finally, since few civil servants actually die while working, the cost of providing a fair survivor benefit package is actually a minimal expense item.

3. REFORMING THE FEDERAL EMPLOYEE HEALTH BENEFITS PROGRAM

The Republican budget package seeks to freeze physicians' fees for a period of one year, as they are currently frozen under Medicare, and it establishes a system of flat rates that hospitals may charge federal health benefit enrollees, again based on a Medicare-type fee schedule. Again, I remind my colleagues that benefits provided federal employees for health care are part of a total compensation package. Also, no federal program can be equated with Medicare because the federal government workforce is an active, working group of individuals, primarily under 65. The needs of a workforce are not the needs of Medicare recipients.

In addition, the federal employee already pays more for health coverage than does the equivalent private sector employee, whose benefits are very often provided by the employer with no employee contributions required, and private health care plans do not use Medicare formulations as the basis for health care coverage. Finally, at this time, the Medicare prospective payment system should not be our model. The Medicare PPS is a brand new program whose results are still being studied. There are allegations that the quality of care is slipping, and until we know more about this, we should not adopt the Medicare system for other programmatic areas simply to save money.

Having said this, however, I also wish to advise my colleagues that while I disagree with the Republican programmatic changes proposed in the health benefit area, I also feel there are potential government savings in the FEHBP—savings that are in excess of one billion dollars. These savings can be found in the special reserves held by those insurance companies who underwrite the federal health plans. Each year when premiums are established for federal health insurance plans, a portion of the money is held in reserve for unforeseen contingencies. Half of the reserves are held by the Treasury; half are held by private carriers.

While CBO and GAO have recommended that these reserves levels should equal about 6 percent of premium income, and while the private sector retains about 10 percent of premium income in reserves, the Reagan Administration has allowed its FEHBP reserve level to grow to 30 percent of premium income, or, $2.1 billion. If the government simply brings the carriers' reserves back to the Treasury—a procedure recommended by both CBO and GAO—we could attain a $1 billion deficit reduction. Because of possible outstanding contractual and legal obligations to the carriers, I do not recommend using the budget process to enact legislation to bring this money back. I am confident, however, that these reserve funds will provide at least as much savings as are contained in the Republican budget reduction targets for health, and I am committed to bringing all the funds back to government through the appropriate legislation at the appropriate time.

4. DELAYING WITHIN-GRADE PAY INCREASES ONE YEAR

To delay within-grade pay increases is to cut pay for employees on the General Schedule. It is unclear whether the Republicans also seek to delay merit pay raises and bonuses, which go to mid-level senior executives. Also, blue-collar federal workers, protected under union contracts, probably will not have negotiated pay increases frozen, so I simply cannot accept singling out one group of workers over another. Thus, I urge that this cut be put back in.

5. REDUCING THE FEDERAL WORKFORCE FOUR PERCENT THROUGH ATTRITION

The Reagan Administration has made a really big thing of cutting the federal workforce. What it has not publicized so vociferously is that for every civilian employee cut, another civilian has been hired over at the Defense Department. Because of this, the size of the federal workforce has actually increased slightly during the Reagan Administration. We should not allow this game to continue through the budget process. If the workforce is to be cut, then we must know where those cuts will occur, which agencies and departments will suffer the consequences, and what savings by government department will result. A simple formula is not acceptable, and I reject that budget cut, too.

6. INCREASING POSTAL SERVICE AND DISTRICT OF COLUMBIA EMPLOYER CONTRIBUTIONS TO THE CIVIL SERVICE RETIREMENT SYSTEM

Most of my colleagues are probably unaware that most District of Columbia employees, because of historical reasons, are part of the Civil Service Retirement System. On the other hand, most of my colleagues probably assume that Postal workers are part of the system. However, since the independent Postal Service was created in 1970, it is questionable whether postal employees should remain part of civil service. There are good arguments that neither D.C. employees nor Postal workers should remain in civil service retirement, but if they do, there are also good arguments that both groups and their employers should be required to pay the full cost of their participation in the system. This is not the place to debate those concerns. Nor, however, is the budget the place to make those policy determinations. Both the Postal Service and the District government will need extensive lead time to re-work their budgets and other commitments, should they decide to opt out of Civil Service, or should they be required to pay full costs. I cannot, in fairness, ask either group to make the necessary adjustments and changes at this time because of this process, and I will therefore urge restoration of the savings projected from these cuts, too.

7. MAKING PAY RAISES EFFECTIVE IN JANUARY OF EACH YEAR RATHER THAN OCTOBER

8. CUTTING AGENCY ADMINISTRATIVE COSTS 10 PERCENT

9. MAKING PERMANENT THE 2087-HOUR WORK YEAR

Mr. President, here are three areas where I would leave the Republican package alone. First, the Governmental Affairs Committee has already discussed and approved the January pay raise date and the 2087 hour work year on a temporary basis, and despite some complaints, these are not policy issues that need further examination or revisiting. As for the 10 percent administrative savings, while I would certainly oppose this if it results in a back-door reduction-in-force, my understanding is that all agencies, departments and government entities will face a like administrative reduction. Therefore, in fairness and equity, I cannot argue for special treatment for programs which administer federal employees' concerns. I have serious reservations, however, that this may mean people rather than paperclip reductions, and I will monitor changes made pursuant to these cuts most carefully to make sure that Congress is not authorizing RIFs.

That, Mr. President, covers the scope and content of my concerns. Restoring these budget reductions will not be cheap. My budget wizards tell me that restoration of the bulk of the civil service programmatic changes will cost $1.2 billion in FY 1986, $5.5 billion by FY 1987, and $6.1 billion in 1988. Let me remind my colleagues, however, that $2 billion of this was earmarked from unspecified cuts, and I cannot believe any of my colleagues would support such amorphous savings.

Like all of my colleagues, I, too, am committed to reducing the deficit and solving the nation's economic problems. In fact, I think the deficit is our country's single most pressing problem. I cannot, however, reduce the deficit on the backs of civil servants who have already withstood $40 billion in cuts during the last decade. Nor can I support reductions which are ill-conceived and ignore programmatic and policy realities and needs. There may be savings in the Civil Service area. Our committee may reduce government costs as it drafts new programs and reviews old programs, but the Republican budget proposals simply fail to do the job fairly.

I-MATCH IS BAD NEWS FOR U.S. EXPORTERS

Mr. HEINZ. Mr. President, as we continue to devote our attention to crafting a budget for the country that produces major savings while providing for necessary expenditures, it is crucial that we take into account the essential role played by the Export-Import Bank in sustaining American exports and the jobs and economic growth that these exports provide. Without a healthy export sector all of our recent debate on the budget will have been beside the point, because we will find ourselves in a recession with disastrous consequences for the long-term industrial strength of our country. As I have pointed out on number of occasions, failure to support the Export-Import Bank will result in an industrial policy in reverse, for we will

be forcing our major capital and high technology industries to move their operations to countries where export financing is available.

Mr. President, my counterpart in the House of Representatives, the chairman of the House Banking Committee's Subcommittee on International Finance, Mr. NEAL, recently introduced legislation that would reject the proposal to eliminate Eximbank's direct credit program and replace it with an interest subsidy program, the so-called I-Match Program. In introducing the bill H.R. 1787, Congressman NEAL makes an excellent analysis of the importance of the Bank and of the pitfalls of the I-Match Program which I have strongly opposed it would be a grave mistake if we were to curtail the Exim's direct credit program. While I would differ with my colleague from Iowa on the partisan tone of some of his comments, I find his analysis of the Bank and the I-Match Program to be directly on target, and I recommend it to my colleagues for their consideration.

Mr. President, I ask unanimous consent that the text of Congressman NEAL's statement be included in the RECORD at this point.

There being no objection, the text was ordered to be printed in the RECORD, as follows:

STATEMENT IN SUPPORT OF H.R. 1787

(Stephen L. Neal)

The purpose of this legislation is to make clear and explicit the Committee's rejection of the Administration's proposals to eliminate Eximbank's authority to make direct loans and to substitute in lieu thereof its so-called "I-Match" program. Before I explain why I think we should reject the Administration's proposals, I want to respond to a few distorted and misleading charges that have been leveled at the Export-Import Bank by its critics, including some within the Administration.

The Administration has apparently reached a budget compromise, of sorts, with some Senate Republicans. It includes adoption of I-Match and elimination of Exim loans. A booklet has been distributed setting forth some arguments for this budget package, including some statements to support its elimination of Exim's direct loans. I want to address a few of these grossly misleading statements.

According to the Administration, "from 1980 to 1984 almost half of (Exim) direct loan financing went to only five major corporations." It charges that Exim is used primarily to subsidize big business.

While it is quite true that Exim loans finance the exports of these companies, it is grossly misleading to caricature them simply as big business subsidies. Many of these companies operate, in fact, like large trading companies. They have hundreds, even thousands of subcontractors, small businesses who supply them with many of the parts, much of the input into the big projects—power plants, aircraft, communications or transportation systems—that they build or export abroad. These companies collect these inputs, package them and add to them, and export the final product. Exim financing for big corporations should in fact be viewed as a highly efficient mechanism for financing the exports of all their subcontractors.

It is, moreover, hard to understand why this charge is always leveled against big exporters. Exim was established primarily to promote and facilitate U.S. exports. It would seem natural for it to finance the sales of those companies that can export most successfully, and whose exports face the most severe competition in terms of foreign financing. To blame those companies for being large and successful is entirely beside the point. It amounts to blaming Exim for doing what it is supposed to do—promoting U.S. exports.

Furthermore, the subsidies in question do *not* go to the exporter. They go to the foreign purchaser. The foreign importer gets the loan at slightly below market rates, and profits thereby. The U.S. exporter profits only because he is able to make a sale he otherwise could not have made.

Official export credit from Exim is absolutely essential to offset the subsidies offered by foreign governments to their exporters. Ideally, we should all abolish these subsidies. But we do not face the ideal world of perfectly free markets. The degree of subsidy embedded in these export loans has been progressively reduced in the past few years, due to real progress we have made in negotiating better international agreements to regulate and discipline official export financing. The remaining modest subsidy is the price we must pay to remain competitive in those few cases where subsidized financing offered by foreign governments will steal our overseas markets unless our exports receive equivalent support from the Export-Import Bank.

The Administration points out Exim has financed only a small share of U.S. exports. Most U.S. exporters do not use Exim financing. It then implies that this fact somehow justifies taking it away from those who do use it. That is illogical. While many U.S. exporters can be competitive because they do not face serious foreign subsidized financing. Those who do face it need Exim financing to compete on even terms.

If they had merit, the Administration's rhetorical attacks on Exim might possibly support the conclusion that we should simply put Exim out of business, that is, stop all subsidized export financing. But the Administration does not propose the elimination of such financing. It just proposes to carry it out under a different guise—its so-called "I-Match", or interest subsidy payment program. Every criticism the Administration makes of Exim financing would be just as valid of its own I-Match program: the same degree of subsidies will be offered to finance U.S. exports; the same exporters, the same notorious big corporations the Administration likes to pillory in its bogus populist rhetoric, would continue to receive the same kind of support from I-Match as they now receive from Exim direct loans; and the same percentage of U.S. exports would be financed under I-Match as under Exim's direct loan program. In short, the Administration's rhetoric in support of its I-Match is, on these points, pure and complete hypocrisy.

I-Match would be vulnerable to the same criticisms the Administration levels against Exim loans (if those criticisms had merit) because I-Match promises to offer foreign purchasers exactly equivalent financing—just to offer it through a different funding mechanism. Then why not adopt it, if it does the same thing? I have decided that we should reject it because it is not, in fact, and equivalent substitute for direct loans. It is seriously flawed, for three reasons:

(1) It is inherently more costly than Exim direct loans. In terms of real cost to the taxpayer—that is, funds expended that will never be recouped—it will substantially exceed the real cost of an equivalent volume of Exim loans. This point emerged quite clearly from our hearings on I-Match.

(2) Its budgetary savings are phony. I-Match would, to be sure, generate some recorded reduction in the federal deficit—but only by the budgetary gimmick of replacing Exim loans with Exim guarantees of private loans. Even these savings would disappear after a few years, when all of Exim's outstanding loans were paid off. This budgetary gimmick would have no beneficial impact on the economy.

The Administration contends that I-Match would rely on private sector rather than public sector financing. That claim is ridiculous. The only change would be from an Exim direct loan to an Exim guaranteed loan. Loans guaranteed by the U.S. government are not "private sector" loans.

(3) Finally, I-Match, as presently constituted, will not work well on a technical level. Our hearings have revealed a number of serious drawbacks in its design—so serious that, if it went into effect as it now stands it would not provide fully competitive financing on terms equivalent to those offered by Exim's direct loan program. While these technical flaws could perhaps, be remedied, until they are we should withhold any authority for I-Match.

The Administration's proposal for I-Match has generated unprecedented confusion and uncertainty about the future of the Export-Import Bank. Our purpose in calling up H.R. 1787 is to reduce that uncertainty to the extent we can—to establish clearly and explicitly that this Committee is not prepared to approve it in its present form. By taking this action, we also make clear that Exim should stick to its current direct loan program, and spend its time trying to make it work even better, not dreaming up new remedies to problems that don't exist.

WILLIAM HADDON, JR., M.D.

Mr. DANFORTH. Mr. President, earlier this year, the world lost a true pioneer in the field of highway safety, William Haddon, Jr., M.D. Dr. Haddon's distinguished career included his service as the first Director of what is now known as the National Highway Traffic Safety Administration and as president of the Insurance Institute for Highway Safety.

Throughout his life, Dr. Haddon was a staunch advocate of improved automobile safety and worked tirelessly to that end. His efforts have saved thousands of lives over the years and are sure to continue to do so.

Clearly, one person can make a difference; Bill Haddon was such a person. He will be greatly missed.

Mr. President, I ask unanimous consent that four tributes given at Dr. Haddon's memorial service be included in the RECORD in their entirety. These tributes, by Susan Baker, Joan Claybrook, Brian O'Neill, and Donald

Schaffer, indeed demonstrate Bill Haddon's unflagging commitment to highway safety.

There being no objection, the tributes were ordered to be printed in the RECORD, as follows:

REMARKS BY SUSAN BAKER, M.P.H., ASSOCIATE PROFESSOR, JOHNS HOPKINS UNIVERSITY SCHOOL OF PUBLIC HEALTH

Bill Haddon's family has always shared him generously with the rest of the world. I want to thank them for giving all of us who admired and cared for him a chance to be together for this celebration of his life.

Until fairly recently, most people believed that human injury was part of the price you had to pay for moving people around in cars. Bill Haddon didn't believe it. He spent most of the past three decades trying to correct that and many other misconceptions, to explore new ideas, and apply available knowledge—so that fewer people would die needlessly.

In the process, he created the field of Injury Control, giving it a solid scientific base as well as practical application, and attracting and inspiring and encouraging promising young scientists.

Yesterday, I spent a couple of sad but wonderful hours reading over all my correspondence with Bill, stretching back over 17 years. There was the usual ration of criticism, and occasional annoyance with me or someone else, but the bulk of the letters consisted of very short notes of encouragement or praise for something I'd written or done—what I call "attaboys." Somehow, an "attaboy" from Bill Haddon was worth three or four from anyone else.

The very first letter in the file, dated February 26, 1968, was actually to my husband. Tim had written Bill to say that his wife New York State Health Department, and Tim had written Bill to say that This wife was getting her MPH degree and was interested in accidents.

Bill's response began "Dear Tim: Thank you for your letter. What I have been trying to do now for over a decade is to sow seeds for others to reap, so, needless to say, I am always pleased to hear that things are sprouting and being taken care of * * *. I do hope, however, that Mrs. Baker will not do her work on 'accidents.'"

I confess there have been times when I wondered whether all the fuss over the word "accident" was worthwhile. But, today I know that the reason we have attracted not only public health professionals but also the medical community to this field is the shift in emphasis from accidents to injury—to human damage, and ways to prevent it.

Among Bill's greatest contributions have been the conceptual frameworks he developed. Haddon's Ten Strategies are now well known to thousands of students, who have applied them to everything from bee stings to electrocutions. Bill himself applied them to just about every problem I can think of, perhaps except "running out of gas," a problem that many of Bill's family and friends wondered whether he would ever solve.

With his strategies, and his vivid ways of applying them, the excitement he generated in every class he taught, and his incredible vision, Bill set many things in motion that will be reaping benefits for a long, long time. For many researchers, he and the Insurance Institute made it possible for us to grow professionally, to do better research than we had believed possible, and eventually be recognized as productive members of an important field.

As most of you know, Bill liked to play games. I suspect what he really liked was winning. I remember the end of a long day when we'd been working together on what he referred to as "the damned chapter." He apologized for the fact that he hadn't been able to agree with me on some particular point of contention. "Oh, that's OK," I said. "Can't win them all." Bill looked dismayed. "Which one did *you* win?"

Bill Haddon was a winner. He won the admiration and respect of colleagues, students, friends, and even adversaries. He won the highest awards and honors in the public health world. Best of all, he won freedom from injury for millions of people in this and future generations. In fact, all of us are winners today, because of Bill Haddon's life.

REMARKS BY BRIAN O'NEILL, EXECUTIVE VICE PRESIDENT, INSURANCE INSTITUTE FOR HIGHWAY SAFETY

I joined the Insurance Institute for Highway Safety at the end of 1969, nine months after Bill Haddon had been made president. I didn't know anything about Bill before I joined; if I had I might not have taken the job. Sometimes ignorance is bliss.

Before I worked for Bill, I had worked in a number of research capacities and for several individuals who, at the time, I thought of as outstanding scientists. It didn't take long, however, to realize that Bill was special, a man of extraordinary vision. He was one of those rare scientists who make major breakthroughs by tearing up the old rules and rewriting them. I believe that an important difference between Bill and most other scientists was that Bill had the ability to identify and ask the truly insightful questions. Many of Bill's ideas now seem to us so simple and they are widely accepted. This is one of the most important tributes we can pay to Bill, because he was one of the first to ask the questions that cut right through to the basic issues. Bill and a handful of other pioneers like Hugh de Haven asked questions that today may not seem profound. But at the time they were, because they had not been asked before and they had the effect of reorienting the research in entirely new directions.

They asked why shouldn't the same scientific approaches that had successfully controlled many infectious diseases be applied to the control and prevention of motor vehicle crash injuries. These approches are now being applied and are paying off.

Bill asked why not apply the same principles that we use for packaging fragile objects for shipment through the mail, when we design automobiles for transporting people. Bill never tired of explaining the principles of crash packaging, pointing out for example that no one would dream of packing china so that if the box were dropped, the china could be thrown clear! The analogies may be obvious now, but they weren't always.

He also asked why not apply the well proven principles of automatic protection widely used in public health to motor vehicle protection.

Bill Haddon recognized—long before most others—that crash deaths and injuries are a public health problem needing effective countermeasures derived from scientific studies, not wishful thinking and sloganeering. As I said before, he tore up the old rules and started a new ballgame.

Those of us who worked with Bill at the Institute never had a better teacher—nor a more demanding one. But his demands were O.K.—sometimes they frustrated us when he made them, but eventually we would realize they were O.K. because he was demanding excellence, refusing to allow us to settle for second best. At the Institute the basic rule was, and still is, quality not quantity. This insistence on excellence is one of the many important legacies from Bill for those of us still at the Institute.

Bill Haddon was a medical doctor who dedicated his professional life to saving lives and preventing injuries. Unlike doctors in the more traditional fields, his patients cannot be identified. People cannot come forward and thank him, like patients saved by surgeons. Bill Haddon's contributions in government and at the Institute have saved thousands of lives and prevented many more injuries. Perhaps even in this church someone is alive because of Bill's work.

Those of us who worked with him at the Institute feel that the nation has lost one of its finest servants. And we feel a personal loss too, made all the more profound because he was still young. Bill had so much more to teach us and the Institute can never be quite the same without him.

We will all miss him.

REMARKS BY DONALD L. SCHAFFER, SENIOR VICE PRESIDENT, SECRETARY, AND GENERAL COUNSEL, ALLSTATE INSURANCE CO.

We are gathered here to remember and honor Dr. William Haddon, physician, engineer, scientist, researcher, administrator, government official, husband, father, humanitarian, saver of lives and preventor of injuries—and friend. He combined ability, foresight, dedication and energy into a cohesive, organized assault on the entire matrix of events that can cause death and injury on the highways of America. He developed the first organized and systematic approach to the study of injury cause, effect and prevention. He moved the Insurance Institute for Highway Safety from the era of slogans and handwringing to production of meaningful data and effective responsive action. I am here for the Board of that organization to attest to our respect, admiration and affection for Bill Haddon.

The family has asked that this not be a somber or sad occasion—and it should not be. We should rather rejoice in the success which Bill has achieved. Tens of thousands of Americans are either alive or uninjured because of his vision and accomplishments. Automobiles are safer to operate and more protective in crashes—they are less subject to damage and easier and less expensive to repair.

Child restraint laws resulted directly from Bill Haddon's foresight and efforts. His work has led to the phased introduction of passive restraints—air bags and automatic belts—scheduled for the future. The pressure and background produced by his passive restraint activity created the present environment making it politically possible to enact seat belt use laws in a number of states. Even such mundane but important items as automobile bumpers of equal height which can absorb minor impacts without damage are the product of Bill's imagination and activity. Plus thousands of other contributions to automotive engineering and medicine. Highway design improvement, traffic control, motor vehicle administration, driver training and licensing, drug and alcohol impairment, vehicle lighting and design—in these and many other areas Bill Haddon's imprint has been the cause of major change and improvement.

In 1969 when Dr. Haddon was just concluding his successful and productive term as the first head of what is now the National Highway Traffic Safety Administration, the Board of IIHS had determined it needed a new head man and new direction. Bill had established all the initial vehicle safety rules and the Board was highly impressed by both his accomplishments and vision. The unanimous opinion of the Board was that he was the perfect choice to head the Institute.

As the then Chairman I was asked to approach Bill and offer him the presidency of the Institute. I made a date for dinner with Bill at Paul Young's Restaurant. I heard some rumors that other opportunities were available and that Bill was probably going to turn down the Institute offer.

So knowing Bill fairly well—knowing his inherent reaction to challenge—his often sharp response to criticism—I decided to play a lawyers trick on Bill. After the initial hellos and Bill had consumed his traditional thimbleful of sherry, I made up a little story and said: "Bill, the Board of IIHS is very much interested in you as President. Everyone has great confidence in your technical and scientific ability but some of the Board members think you are a poor Administrator and may not have the administrative skills to staff and run a small organization of this type."

Well Bill blew up and vehemently denied he was a poor administrator and strongly asserted that he could staff, organize and run the Institute better than any other candidate. He rose to the challenge, took the bait and accepted the job.

I've never known whether or not my ploy was an important factor—whether he might have accepted in any event. But I and the Board will be eternally thankful and grateful that he did—and so should the American people.

Bill has left us with a strong, able, effective and dedicated staff and organization. The Institute possesses both a national and international reputation. It is the pre-eminent scientific highway safety organization in the world—thanks to Bill Haddon.

And the Board thanks the Haddon family for lending us so much of Bill Haddon.

If we can continue his work and particularly if passive restraints become standard equipment, Bill Haddon will have saved more lives than anyone since Louis Pasteur.

May the Lord accept and honor him as we do.

REMARKS BY JOAN CLAYBROOK, PRESIDENT, PUBLIC CITIZEN

I rise to celebrate the life and work of Dr. William Haddon, Jr., the father of vehicle crashworthiness, a physician of preventive medicine who represented the victims rather than treating the rich and powerful, an engineer who bridged the gap between concept and action.

Bill Haddon's conceptual work in developing a unified theory of safety revolutionized our nation's approach to reducing highway death and injury. His epidemiological analysis of the precrash, crash and post crash events, his focus on energy management, and his insistence on allocating resources to factors such as automatic crash protection that can effectively limit human injury, are all now well accepted. But in the mid-1960's, when his definitive book "Accident Research, Methods and Approaches," was published, these precepts were not part of the transportation safety lexicon. Auto crashes were treated as a human behavioral problem. "The life you save may be your own" was the cliche of the day. The potential for injury prevention technology was recognized, but only by industry engineers and researchers and a few other technical experts. It was not publicly discussed. Bill Haddon brought the scientists out from behind the closed doors and made crashworthiness job one, as they say in Detroit.

Bill had some unique human qualities and preferences those of us who had the privilege of working with him can never forget. I'd like to mention a few picked from among many during the early days at NHTSA after consultation with his other colleagues Bob Brenner and Lenora Borow.

As his special assistant, I learned in short order that he was a creative genius and a perfectionist, in the words he used, the papers he authored, the ideas he developed. And there is also no question about what Bill liked and disliked. In those days he had a military crew cut, wore white shirts and a bow tie—every day. He hated air conditioning and kept the windows at the Department of Commerce building wide open all summer long. He also disliked anything green (it reminded him of bile), mayonnaise (from his MIT food technology days), cigarette smoking, garrulous people, and especially lawyers.

He disdained the perks of public office and ignored the furnishings until his secretary ordered new furniture when we moved from Commerce to DOT. It included a bright orange couch with high tufted sides and a multitude of covered buttons, a glass top coffee table, and multicolored low-slung matching chairs on wheels. Within minutes of the delivery, Bill complained he couldn't put his feet on a glass topped table. He ordered it all removed immediately to the hall where it sat for months until a senior DOT scientist for whom Bill already had great disdain, rescued it.

Bill Haddon enjoyed challenging authority, even his own. Shortly after his face appeared on the front pages of numerous national magazines, irate consumers started writing thousands of letters and crowding our then tiny offices with defective tires. Late one evening as we were leaving after a particularly grueling day Bill picked up a defective tire and slung it like a bowling ball down the full length of the Department of Commerce block-long hall which was populated with glass doors. As we looked on in horror, he roared with laughter at his own boyishness.

The other giant Bill enjoyed twitting was the auto industry. When he could, he pursuaded them to move, as in his conversations with GM President Ed Cole about side bar protection devices and padding the header. But other occasions were not so friendly as when Henry Ford threatened to close down the auto industry if the proposed initial standards weren't changed.

In the tradition of his beloved New England, Bill was sparse with his words, a very direct, no nonsense person. He was a great teacher of people he respected, but parcelled out tart words for those he didn't. He was also sparse in expressing appreciation or giving compliments, but when they came you knew he really meant it. Once after I edited an urgent report Haddon and Brenner had struggled to write, he read it and looking somewhat surprised, said "not bad."

Bill Haddon's legacy is found in the millions of American who have not died or suffered grievous injury on the highway because of his insight, determination, energy and courage. And his legacy will continue to grow as the years pass. His contributions will become even better known after his life than during it because he helped change massive institutions which will never be as they once were. He forced the auto industry to design safety into its product planning and raised the stature of the safety engineer inside these companies. With only a few engineers on board in 1966, Bill and Bob Brenner personally wrote the first 30 vehicle safety standards, an accomplishment unmatched with more than 100 engineers during the subsequent 18 years.

Bill also energized and focused the auto insurance industry on expanding the base of safety proponents and getting actively engaged in battling Detroit for safety improvements, paticularly air bags. Rarely have two giants of Amercan industry ever clashed over a public health issue.

As a medical doctor, Bill Haddon was furious about the sorry state of emergency medical services and poured DOT money into upgrading them, despite the outraged cries of jurisdictional encroachment from bureaucratic competitors at the Department of HEW. To regain their jurisdiction, the NIH finally started an aggressive program to upgrade hospital emergency treatment of trauma victims, just as Dr. Haddon predicted they would. In 1968 Dr. Haddon also found time to write a definitive report on alcohol and driving, and pioneered the finding still accurate today: That alcohol is involved in 50 percent of all crashes.

Bill Haddon believed that the highest professional ethic was preventing death and injury rather than applying his talents to remedying the damage after the fact. I hope that all of us here, and Bill's many colleagues and friends around the world, can help to continue the seed planting he relished so much by establishing a memorial lecture in injury prevention at Harvard Medical School or the John Hopkins School of Public health or an endowment for summer scholarships for young doctors and engineers in trauma prevention to entice the next generation to carry on his work. Perhaps we can do both. I know Bill would like that.

THE PRESIDENT'S SPEECH IN STRASBOURG

Mr. WARNER. Mr. President, I rise this afternoon to commend President Reagan for the eloquent and moving address which he delivered to a special session of the European Parliament in Strasbourg, France. On this, the 40th anniversary of the liberation of Europe, the President vividly recalled the triumphs and tragedies of that war. He reminded us once again of lessons that must never be forgotten. And, equally important, he spoke with confidence and vision of the opportunities and challenges that confront the Western democracies as we begin the fifth decade of the postwar era.

In his speech, President Reagan defined the task of current leaders in the following terms, "to keep the peace with an ever more powerful Soviet Union, to introduce greater stability in our relationship with it, and to live together in a world in which our values can prosper." I am particularly pleased that the President used the oc-

casion of this speech to go beyond mere words and propose to the Soviet Union a number of practical steps that could, if accepted, contribute significantly to the realization of these goals.

The President's four-part proposal for reducing military tensions includes the exchange of observers at military exercises, regular, high-level contacts between United States and Soviet military leaders, discussion in the Conference on Disarmament in Europe of the Soviet proposal on the nonuse of force in the context of Soviet agreement to NATO's proposed CBM's, and the establishment of a permanent military-to-military communications link to exchange notifications and other information regarding routine military activities.

Mr. President, over the past several years, the Senate has been in the forefront of efforts to devise practical measures to strengthen controls over nuclear weapons and to reduce the risk that these weapons might ever be used due to accident or miscalculation. Let me briefly review the history of our risk reduction initiative.

Back in the early 1980's, Senator NUNN asked the Strategic Air Command [SAC] to undertake a study of the dangers of an accidental war between the United States and the Soviet Union triggered by a third party. The SAC study concluded that neither superpower may have the capability to determine the country of origin of a third party attack, and neither had adequate warning and detection systems to deal with unconventional type attacks.

In 1982, Senator NUNN, our beloved late colleague Senator Jackson, and I introduced an amendment to the fiscal year 1983 defense authorization bill requiring the Defense Department to evaulate several proposals aimed at reducing the risk of nuclear confrontations. That legislation resulted in an April 1983 report by Secretary Weinberger to the Congress outlining four specific risk reduction measures which were eventually proposed to the Soviet Union. The four measures were:

First, adding a high-speed facsimile capability to the hotline.

Second, creating a joint military communications link [JMCL] between the Pentagon and the Soviet military command. This is one of the proposals which the President today asked the Soviets to reconsider.

Third, installing high rate data links between the United States and the Soviet Union with their embassies in the capital of the other.

Fourth, proposing a multilateral agreement for nations to consult in the event of a nuclear incident involving terrorists.

Of these four measures, the Soviets have showed no interest in the JMCL or the embassy date links. There has been discussions on the nuclear-armed terrorist problem, and agreement was reached last July on the hotline upgrade. On April 4, Senator NUNN and I introduced Senate Joint Resolution 108, authorizing the Secretary of Defense to provide to the Soviet Union, on a reimbursable basis, equipment and services necessary to implement this agreement. The joint resolution was passed unanimously by the Armed Services Committee on May 2, and I hope that it will be quickly approved by the Senate.

One important risk reduction measure which was cited in our 1982 legislation, but not acted on by the administration, was the establishment of risk reduction centers. Basically, the administration took the position at that time that while these centers might represent a useful long-term goal, it preferred to pursue its own package of proposals before taking on what it regarded as the more ambitious step of establishing the centers.

In November 1983, the Nunn/Warner Working Group on Nuclear Risk Reduction, which we had formed a year earlier, released its report and recommendations. Members of our group included Gen. Brent Scowcroft, Gen. Richard Ellis, Dr. James Schlesinger, William Hyland, Dr. Barry Blechman, Adm. Bobby Inman, Dr. William Perry, and Dr. Donald Rice.

In its report, the working group commended the administration for proposing the four confidence-building measures. However, it disagreed with the administration's decision not to adopt the risk reduction center proposal. In its report, the group stated that there are "crucial political aspects" to controlling crises which can only be addressed through "more comprehensive language involving designation of particualr representatives and facilities in both nations that would be assigned specific responsibilities for preventing a nuclear crisis."

On February 1, 1984, Senator NUNN and I introduced Senate Resolution 329, which incorporated the recommendations of the working group and urged the President to propose to the Soviets the establishments of these centers. This resolution was approved unanimously by the Foreign Relations Committee last May. On June 15, the Senate voted 82-0 to approve an amendment which we introduced to the fiscal year 1985 defense authorization bill incorporating the language of Senate Resolution 329. This provision was subsequently approved by the conference committee on this bill and enacted into law.

Despite the overwhelming congressional support for this proposal, the idea has yet to be formally embraced by this administration. We were, however, encouraged by Secretary Weinberger's January 31 testimony before the Foreign Relations Committee, in which he stated that it was very important to negotiate the creation of these centers.

Mr. President, I applaud the President for renewing his earlier crisis prevention offers to the Soviet Union, and I urge the Soviets to sit down with our representatives and try to reach agreement along these lines. At the same time, I remain hopeful that the administration will recognize the merit of our proposal for the establishment of risk reduction centers and add it to its negotiating agenda in future discussions with the Soviet Union on an overall framework of confidence-building measures.

I recognize that the Soviets often strongly resist proposals for easing tensions and reducing mutual risks which seem eminently sensible to us. But, as Secretary Weinberger said in his testimony in January, "this is not a reason not to try again."

I speak from some personal experience on this point, because 15 years ago I had the privilege of leading a U.S. delegation to the Soviet Union for the initial round of discussions that led to the 1972 Incidents At Sea agreement. After nearly 2 years of rigorious negotiations, in Washington, DC, and Moscow, I was privileged to sign in May 1972, on behalf of the United State Navy, an agreement that has been most effective for both nations.

Mr. President, I now yield to my distinguished colleague from Georgia, Senator NUNN.

Mr. NUNN. Mr. President, I join Senator WARNER in paying tribute to the President for his speech yesterday in Strasbourg and his four-part proposal for reducing military tensions.

One year ago, when Senator WARNER and I testified before the Foreign Relations Committee on our resolution, I noted that although the United States and the Soviet Union had in large measure been able to avoid confrontations entailing the risk of nuclear war over the past three decades, there were compelling reasons to be concerned about their ability to continue this into the future. Indeed, there are an increasing number of circumstances that could precipitate the outbreak of nuclear war that neither side anticipated or intended, possibly involving terrorist groups or the growing number of nuclear-armed states that will likely exist by the end of the century.

If anything, I am more convinced today that I was then that the establishment of nuclear risk reduction centers is a crucial, indeed imperative, step. Over the past year, we have witnessed three different Soviet military accidents that could easily have been misinterpreted by one side or the other: The errant Soviet cruise missile incident in January and two major explosions in the Soviet Union last year, one at the naval munitions depot at

Severomorsk, the other at a munitions factory in western Siberia.

Even more compelling, though, is the shift that both sides are now undertaking in their strategic posture toward a much prompter launch of land-based systems. I will not get into a discussion here as to whether we are talking about launch on confirmed warning of attack or launch under attack. But suffice it to say that as increasingly accurate, MIRV'd ICBM's like the MX, the SS-18, the SS-19, and the new SS-24 which the President mentioned in his speech yesterday make each side more and more vulnerable to a first strike, we are moving inexorably toward a hair trigger retaliatory posture. In these conditions, there is an extraordinary premium placed on avoiding any misinterpretation of nuclear incidents or military activities, and this is precisely the role that nuclear risk reduction centers could perform.

What we have in mind is separate facilities in Moscow and Washington, linked by the most modern communications equipment. The U.S. center should probably be directed by an ambassador-level official who would report directly to the National Security Council through the President's National Security Adviser. The permanent staff should include such other diplomatic, military, and intelligence personnel needed to maintain a 24-hour watch and support the various other functions performed by the centers. We do not believe that it would be prudent to start out with joint United States/Soviet manning of the centers, though this step might be feasible at some stage further down the road.

Senator WARNER and I believe that there are presently a number of functions which these centers could usefully perform. We recommend that the centers be assigned rather modest tasks in their initial phase of operations, recognizing that a more ambitious set of responsibilities would have to evolve over time as the centers demonstrated their worth.

The first recommended function is one which is most commonly associated with the risk reduction center concept: That of serving as the primary point of contact for the exchange of all military information required under United States/Soviet agreements and, if accepted by the Soviets, the types of notifications that were proposed by the United States in the START working group on confidence building measures. This tasking corresponds to a function that was specifically cited in our amendment, the exchange of information about military activities that might be misunderstood during periods of mounting tensions.

This communications link would be under political control, as opposed to the military-to-military communications system which President Reagan proposed yesterday. Given the Soviets' longstanding practice of keeping their military under strict political control, we think that they might be more disposed to establishing this kind of communications link if it were not proposed to be under independent military control.

The centers could also serve as facilities for the exchange of information concerning events that might lead to the acquisition of nuclear weapons by subnational groups or terrorists. This function also specifically cited in the legislation which the Senate passed last year.

Another function draws on a proposal by President Reagan in his September 1984 U.N. speech. The President suggested that the United States and Soviet Union hold regular, institutionalized meetings at the ministerial or Cabinet-level and that the agenda for these meetings could involve, for example, the exchange of 5-year military plans for weapons development and procurement. Another activity that might be appropriate for these meetings is one that was also outlined in the legislation: Discussing procedures to be followed in the event of possible incidents involving the use of nuclear weapons by third parties. We believe the risk reduction centers would be an ideal location for conducting these kinds of discussions.

Another promising option also relates to a proposal that President Reagan renewed yesterday, though it has been suggested by many others, including General Vessey when he became Chairman of the JCS in 1982, and by myself, Senator LEVIN, and 54 other Senators in a letter to the President in 1983. This is to institute regular, high-level meetings between United States and Soviet military leaders. These meetings could promote a dialog on nuclear doctrines, forces and activities, as recommended in the Nunn/Warner amendment. We believe the risk reduction centers would also be a perfect facility for conducting these meetings.

In closing, I would say that of these functions, the first is probably the one most directly related to the concept of these centers as it has evolved over time. Obviously, the most important function is the around-the-clock maintenance of communications, facilities, and personnel for preventing a nuclear crisis. To the extent that the other functions involve activities that could stand on their own absent the existence of risk reduction centers, bringing them under the umbrella of these centers is admittedly an essentially symbolic act.

But when we are dealing with the profound question of preventing nuclear war, I would argue that symbols matter. The American people want reassurance. They want to know that the Government which they are entrusting with command authority over tens of thousands of nuclear devices is giving the highest priority to reducing the risks of nuclear war. The establishment of nuclear risk reduction centers can provide such a symbol and also serve crucial substantive functions. Holding various high-level meetings in these centers would promote greater public awareness of the centers and, in turn, greater reassurance that the two Governments were indeed working to reduce the risk of nuclear war.

Mr. President, President Reagan's four-part proposal could, if accepted, contribute significantly to reducing military tensions. I hope that both countries will also consider taking another important step toward this goal: The establishment of nuclear risk reduction centers.

BISHOP JAMES D. NIEDERGESES HONORED IN NASHVILLE

Mr. SASSER. Mr. President, I rise to pay tribute to a distinguished constituent, a leader in the cultural and spiritual life of Tennessee, His Excellency James D. Niedergeses, bishop of the Roman Catholic Diocese of Nashville.

I was recently privileged to speak at a dinner in the bishop's honor in Nashville, and I was deeply impressed by the fondness toward him that was displayed by the 650 people in attendance at that event. He deserves the affection and respect of them all.

The bishop has tirelessly served God and the Catholic community of middle and east Tennessee for more than a decade. His stewardship has been one of honor and distinction.

Nowhere more than in the field of Catholic education has the bishop's many contributions been more evident or more appreciated. The dinner in his honor was on behalf of Father Ryan High School, a great institution he has served nobly by establishing its development fund. Bishop Niedergeses' example has demonstrated that Catholic education, especially in the Nashville diocese, renders a positive contribution to society and to the minds and spirits of the young.

I commend the devoted service of a distinguished clergyman and citizen, Bishop James D. Niedergeses.

50TH ANNIVERSARY OF REA

Mr. SIMPSON. Mr. President, I am pleased to join with several of my colleagues to speak in commemoration of the 50th anniversary of the establishment of the Rural Electrification Administration—the REA. When the REA first embarked upon its historic mission to "electrify" America, it was viewed by all America as a stunning success. In those early beginnings in

1935 when most farm homes were illuminated—but just barely—with kerosene lamps—it literally illuminated the face of America. It financed electric co-ops and even conducted traveling "road shows" to promote the use of electricity, prepared wiring and plumbing plans and lent farmers the money to purchase and install appliances. Today it is as busy as ever, even though over 99 percent of all of America's farms have electricity.

Rural electric cooperatives today comprise a vast operating network of more than 1,000 local and regional electric systems found in 46 States. These co-ops are consumer-owned, nonprofit utilities incorporated under the laws of the States in which they operate. I know personally those fine gentlemen and gentlewomen who serve on the various boards of directors of REA's in my own State of Wyoming—they are a remarkable and dedicated lot. In fact, one of the most significant supporters of the REA was from my home State of Wyoming many years ago. He was one of the founders of the National Rural Electric Cooperative Association [NRECA]—a man named J. C. "Kid" Nichols. He was one of the guiding lights and a moving force in the early days of the REA.

Rural electric systems serve approximately 25 million people in about 2,600 counties of the United States. Their service territories encompass 75 percent of the land base of the United States. They pay no Federal income tax because they are nonprofit entities and in at least 21 States they are not regulated by public utility commissions. They own and maintain nearly 44 percent of the Nation's electric distribution lines. In fiscal year 1978, 92 percent of the capital requirements of all rural systems was satisfied through REA insured and guaranteed loans.

Yet all is not well with REA. I think all thoughtful persons would admit that the task of electrifying rural America is largely completed, and yet we find that over the years some very crafty and creative financiers, accountants, lawyers, businessmen and trade associations entered the picture in order to preserve the massive infusions of Federal money into the original system. They created a phalanx of complex financing schemes, off budget financing and revolving fund capers for the REA-financial plotting that would make even an atomic scientist marvel. In their zeal to expand they forgot the original reason for being.

Almost as important a duty for the REA as advancing new services has been subsidizing the costs of existing services. The price of electricity, for example, has been held down despite the higher cost of serving rural areas. Only 172 of the Nation's 930 rural electric distribution systems increased their retail rates during 1984. This continued a trend in which the number of co-op rate increases have declined in each year since 1981, when 443 co-ops increased their rates.

"The major reason for the decline in co-op rate increases is the slowdown in wholesale power costs," according to Richard Larochelle, NRECA economic and rate specialist. "The large wholesale power rate increases of the 1970's and early 1980's are over and co-ops in most parts of the country can look forward to a period of relative rate stability," he said.

At the center of the Federal Government's rural electrification program is the assurance that the Nation's rural electric systems will have access to operating and finance capital. REA's role in making and backing loans to co-ops—historically for electric distribution and transmission—has been pivotal to the success of the rural electric program from its beginning. Since 1935, the REA role in financially backing rural electric systems has only been altered twice; once in 1944 to extend the loan repayment period from 10 to 35 years at a fixed 2 percent rate; and again in 1973, when the direct 2 percent loan program was terminated and replaced with insured and guaranteed loan programs (amendments made in the Rural Electrification Act in 1976 were required to correct technical deficiencies of the 1973 amendments). Since the beginning of the Rural Electric Administration, in each instance where Congress has set an interest rate to borrowers, that rate has been made approximately equivalent to the then prevailing cost of government funds.

As with so many of the varied activities of the Federal Government, programs that draw their nourishment from deep within the bowels of the Federal Treasury—on budget and off budget—tend to grow beyond all projections. In that way, the REA has become much much more than just a distribution system. It is both a growing dynamo and a ruptured dinosaur providing power to commercial industry (with the taxpayer providing the subsidy through the low interest loans), and providing backdoor Federal financing for commercial utilities in their generation and transmission activities and in the construction of conventional and nuclear powerplants. There are presently 54 REA co-ops which serve urban, rather than rural areas—and they continue to be heavily subsidized. Such procedures need a most thorough review, and the Congress deserves an opportunity to thoughtfully determine whether the Nation's taxpayers should continue to foot a good part of the bill for the projects that have sprouted up from the creative and original need to electrify rural America—and to honestly re-assess the worth of those that have grown far out of proportion to their basic and well-accepted mission.

During the last Congress, the NRECA presented us with legislation which purported to bring self-sufficiency to the rural electric and telephone revolving fund. I dubbed that proposal "fiction financing" and urged my colleagues to consider all of the issues involved in order to shed some light on the workings of that remarkable revolving fund which no longer revolves. If we are to make adjustments to the revolving fund, let us do it up front, honestly, responsibly. Let's stop the duplicity and outbursts of defensiveness and legerdemain to shroud what is really going on. Let's really assure that "REA pays its way." Let us continue to make available the specific Federal assistance which was envisioned as being so necessary at the birth of the REA. In that way the individuals who—because of geography, isolation or other valid reasons—need assistance in receiving a dependable supply of power indeed shall have it. At the same time, we will demonstrate a responsibility to the general public which has grown so very weary of Federal programs which have grown far beyond their fine original intended purposes and which have then become distorted in concept and increasingly ravenous for Federal dollars. REA is assuredly one of those. Let's get it fixed up and working right. I'm ready to help.

Mr. KERRY. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. SPECTER). The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. DANFORTH. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. BOSCHWITZ). Without objection, it is so ordered.

CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. Morning business is closed.

FIRST BUDGET RESOLUTION FOR FISCAL YEAR 1986

The PRESIDING OFFICER. The clerk will report the pending business.

The assistant legislative clerk read as follows:

A concurrent resolution (S. Con. Res. 32) setting forth the congressional budget for the United States Government for the fiscal years 1986, 1987, and 1988 and revising the congressional budget for the United States Government for the fiscal year 1985.

The Senate resumed consideration of the resolution.

AMENDMENT NO. 59

(Purpose: To provide funding for Amtrak at a level which is 10 percent less than fiscal year 1985 levels)

Mr. SPECTER. Mr. President, I call up amendment No. 59.

The PRESIDING OFFICER. The amendment will be stated.

The bill clerk read as follows:

The Senator from Pennsylvania [Mr. SPECTER] proposes an amendment numbered 59.

Mr. SPECTER. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 3, increase the amount on line 12 by $600,000,000.

On page 3, increase the amount on line 13 by 700,000,000.

On page 3, increase the amount on line 14 by $700,000,000.

On page 3, increase the amount on line 18 by $500,000,000.

On page 3, increase the amount on line 19 by $700,000,000.

On page 3, increase the amount on line 20 by $700,000,000.

On page 3, increase the amount on line 25 by $500,000,000.

On page 4, increase the amount on line 1 by $700,000,000.

On page 4, increase the amount on line 2 by $700,000,000.

On page 4, increase the amount on line 6 by $500,000,000.

On page 4, increase the amount on line 7 by $1,200,000,000.

On page 4, increase the amount on line 8 by $1,900,000,000.

On page 4, increase the amount on line 12 by $500,000,000.

On page 4, increase the amount on line 13 by $700,000,000.

On page 4, increase the amount on line 14 by $700,000,000.

On page 16, increase the amount on line 20 by $600,000,000.

On page 16, increase the amount on line 21 by $500,000,000.

On page 17, increase the amount on line 4 by $600,000,000.

On page 17, increase the amount on line 5 by $600,000,000.

On page 17, increase the amount on line 13 by $600,000,000.

On page 17, increase the amount on line 14 by $600,000,000.

On page 33, increase the amount on line 2 by $100,000,000.

On page 33, increase the amount on line 3 by $100,000,000.

On page 33, increase the amount on line 11 by $100,000,000.

On page 33, increase the amount on line 12 by $100,000,000.

On page 38, decrease the first amount on line 24 by $616,000,000.

On page 38, decrease the second amount on line 24 by $536,000,000.

On page 38, decrease the amount on line 25 by $616,000,000.

On page 39, decrease the amount on line 1 by $577,000,000.

On page 39, decrease the first amount on line 2 by $616,000,000.

On page 39, decrease the second amount on line 2 by $616,000,000.

On page 46, decrease the amount on line 9 by $616,000,000.

On page 46, decrease the amount on line 10 by $536,000,000.

On page 46, decrease the first amount on line 11 by $616,000,000.

On page 46, decrease the second amount on line 11 by $577,000,000.

On page 46, decrease the amount on line 12 by $616,000,000.

On page 46, decrease the amount on line 13 by $616,000,000.

On page 52, increase the amount on line 1 by $600,000,000.

On page 52, increase the amount on line 3 by $600,000,000.

On page 52, increase the amount on line 4 by $600,000,000.

Mr. SPECTER. Mr. President, in order to expedite the treatment of this amendment, because of the limited time remaining—and the distinguished Senator from New Mexico [Mr. DOMENICI] has asked as little time be used as possible—I shall be referring to some of the material I will be introducing and will try to use as little floor time as possible.

Mr. President, today I offer an amendment to Senate Concurrent Resolution 32, the fiscal year 1986 budget resolution, as amended by the distinguished majority leader's substitute amendment.

My amendment to the budget would restore Federal funding for Amtrak at a 10-percent reduction over the fiscal year 1985 level.

Amtrak is presently threatened with the total elimination of its Federal subsidies by September 30, 1985. If this happens, the United States would be the only industrial nation without rail passenger service. My amendment to restore funding for Amtrak at a 10-percent cut over the fiscal year 1985 level is the maximum cut that Amtrak could withstand without sacrificing or eliminating major components of its passenger service. A cut, and not total elimination, in Amtrak represents an equitable move toward reducing the Federal deficit while sustaining the viability of this vital program.

Preservation of Amtrak's passenger service is a matter of great national importance. It provides vital services for the entire Nation, particularly for the populous eastern seaboard. With its elimination, traffic will be snarled all over the east coast, with highways jammed and airports clogged. It would become impossible for traffic to get through the Baltimore Harbor Tunnel. In fact, the U.S. Senate might have difficulty getting a quorum.

The elimination of Amtrak will also have serious economic implications nationwide. Amtrak presently employs some 25,000 people in 44 States, and in 1984, contributed $1.4 billion to our economy through its payroll and the purchase of goods and services. During 1984, Amtrak remained the sixth largest transportation company in the country.

In my State of Pennsylvania in 1984, Amtrak employed 3,242 residents with an annual payroll of $85.5 million. Amtrak contributed another $76 million to Pennsylvania's economy through the purchase of goods and services in 1984.

Amtrak's passenger service plays a vital role in our intercity transportation network and Amtrak's sustained progress in improving its service and reducing its dependence on Federal funds shows continued Federal support will pay great dividends in the long run. Amtrak's current funding level of $684 million is the lowest since fiscal year 1977. In 1986, Amtrak expects to cover at least 60 percent of its costs through revenues, compared to 48 percent just 4 years ago.

Amtrak's capital plant, assembled almost entirely with Federal funds, is now worth some $3.1 billion. Salvage value on these assets—rail line, stations, maintenance facilities, and the like—will be minimal if all intercity rail passenger service is eliminated.

In addition to the investment of the Federal Government, many States have made capital expenditures that total more than $100 million in order to support and enhance passenger service within their borders. This investment will be lost if Amtrak is phased out.

Amtrak currently carries 20 million passengers each year. The total elimination of rail passenger service will leave many communities, particularly in the more sparsely settled areas of the country, without any common carrier passenger transportation. Even travelers that count on other modes of transportation under normal conditions find they must depend on Amtrak in the event of weather emergency or labor strikes.

Among the major cities between Washington and New York, Amtrak trains carry almost 18,000 people daily, or 60 percent of the total air/rail ridership. Elimination of Amtrak service in the Northeast corridor will add to air congestion and will ultimately require billions of dollars in additional Federal investment for airport and highway construction.

Amtrak's Northeast corridor is also used by Conrail freight trains and commuter rail trains. If Amtrak is eliminated, Conrail and the commuter agencies will have to absorb $116 million in additional costs to sustain their own operations on the Northeast corridor.

The elimination of funding for Amtrak would trigger a $2.1 billion Amtrak liability for labor protection agreements, which provide up to 6 years full salary for employees who are furloughed. Neither the Government nor the public would derive any benefit in service or value from these payments.

State and local governments are unable or unlikely to pick up Amtrak rail passenger service. If they do, costs

will still be borne by the taxpayer but with reduced service because Amtrak's current contracts allow for more favorable operating agreements than outside parties could hope to negotiate.

The private sector will not pick up lost Amtrak service, as confirmed by Transportation Secretary Elizabeth Dole on April 23. The cost of doing so in competition with publicly subsidized air and highway transportation would be prohibitive.

The effective elimination of Amtrak will result in serious adverse economic consequences to the Nation in terms of: loss of investment, loss of income to equipment and supply contractors with Amtrak, loss of rail passenger service, and loss of jobs along with the strain on the railroad retirement system.

When these costs and consequences are considered, it is clear that the far better choice is for the Federal Government to continue providing support to Amtrak.

The amendment I am offering today would continue to fund Amtrak at a 10-percent reduction over the fiscal year 1985 level of $684 million. According to the Congressional Budget Office, this would translate into budget authorities of $616 million for fiscal years 1986, 1987, and 1988. Corresponding outlays would be $536 million for fiscal year 1986, $573 million for fiscal year 1987, and $616 million for fiscal year 1988. This amendment accordingly modifies the reconciliation instructions to the House and Senate authorizing committees of jurisdiction.

I submit that the cost to continue Federal funding of Amtrak could be offset by $500 million if the Congress approves legislation I recently introduced which would use the profits of Conrail to defray Amtrak's deficits. The remainder of the cost to operate Amtrak could be funded by a corresponding reduction in function 300, relating to national resources and environment. The $200 million offset will reduce the Bureau of Reclamation's construction budget in a manner consistent with the administration's budget proposal for that account. The administration has proposed a reduction of $300 million for fiscal year 1986, but the budget resolution before us now contains a reduction of only $80 million. According to OMB, the Bureau of Reclamation failed to spend some $200 million of its fiscal year 1985 appropriation.

Mr. President, I urge my colleagues to consider these arguments as we reduce the Federal deficit while recognizing the critical importance of our national rail passenger service.

Mr. President, if the current proposal stands with the elimination of Federal support for Amtrak, Amtrak will stop operating on September 30 and will constitute an enormous national dislocation affecting some 20 million riders in 44 States in this country. I suggest, Mr. President, that it will be impossible to land an airplane at La Guardia and National Airports and many other airports around the country because of the clog of the transportation system; that it will be difficult, if not impossible, to drive on the eastern seaboard with the added influx of bus and automobile traffic; impossible perhaps to get through the Baltimore Harbor Tunnel without enormous delay; and probably impossible to get a quorum in the U.S. Senate, not that the latter fact might be of great consequence to the national welfare, but it would be an enormous dislocation.

Mr. President, if the Federal funding is eliminated, there is not going to be any magical way that Amtrak is going to continue to operate under some private auspices in certain key sections of the country like the eastern seaboard or in other parts which are profitable for Amtrak.

As set forth in Congressional Quarterly for April 27, 1985:

> Transportation Secretary Elizabeth Hanford Dole admitted on April 23rd that if the administration proposal to cut all assistance to Amtrak were enacted, private railroads are unlikely to want any of Amtrak's routes and the passenger rail corporation might go bankrupt.

The same issue of Congressional Quarterly pointed out that Secretary of Transportation Dole said the Department of Transportation had sought a $765 million subsidy for Amtrak for fiscal year 1986, and when that was rejected by the Office of Management and Budget, then the U.S. Department of Transportation sought a $608 million subsidy for Amtrak. And that is obviously strong evidence that prior to the intervention by OMB, the official of the U.S. Government responsible for transportation felt it worthy of a subsidy for $765 million.

The reinstatement of funding that this amendment proposes would take the $684 million for fiscal year 1985 and reduce it by 10 percent in an effort to be as economical as possible and make as much contribution as possible to reduce the deficit, leaving a net subsidy of $616 million. This figure has been arrived at after I consulted with Mr. Graham Clater, president of Amtrak, who says that that is the absolutely irreducible minimum that it would take to operate Amtrak.

The Budget Committee had proposed a 30-percent reduction in Amtrak funding for fiscal year 1986, but according to information provided to me, the committee did not take into account the labor protection agreement which could have consumed the remaining subsidy, leaving virtually nothing for train operation; and it would be satisfactory with this Senator to have whatever figure is practical for the operation of Amtrak. If that could be lower than $616 million, that would be acceptable. But based upon all the information available to this Senator, that appears to be the irreducible minimum.

Mr. President, I suggest that if the funding for Amtrak is eliminated, the Federal Government will be paying more money than it would if this amendment were adopted and Amtrak continued to exist with the $616 million Federal subsidy. That is because the labor protection cost would be $645 million in the first year, assuming an 80-percent employee participation rate, and the total 6-year liability for labor protection costs will be some $2.1 billion.

Mr. President, at this time I ask unanimous consent to print in the RECORD opinions of counsel Covington and Burling dated April 17, 1985 and April 25, 1985, which set forth the legal authority for the proposition that the U.S. Government will be liable for the labor protection costs even if funding stops. There are conflicting opinions, not unusual in the context where lawyers opine on the same subject, and it may be that before the litigation costs are completed the figure will be staggering, very large even in comparison to the amount of money which is involved in this amendment.

There being no objection, the opinions were ordered to be printed in the RECORD, as follows:

COVINGTON & BURLING,
Washington, DC, April 17, 1985.

PAUL F. MICKEY, ESQ.,
Executive Vice President, Law and Public Affairs, National Railroad Passenger Corp., Washington, DC.

DEAR MR. MICKEY: You have informed us that, if no funds for Amtrak are included in the FY 1986 budget, Amtrak will be unable to continue its rail passenger service operations.[1] In the event of discontinuance of such operations Amtrak will become insolvent, since it will be unable to pay from funds on hand its labor-protection[2] and other[3] obligations. Proceedings under Chapter 11 of the Bankruptcy Act would, presumably, quickly follow. It is expected that liquidation of Amtrak's assets would fall far short of producing the amount needed to pay its creditors in full.[4]

You have asked us four questions:

1. Would a bankruptcy court be likely to hold that the claims of the United States, although secured by liens on most of Amtrak's property, should be equitably subordinated to prebankruptcy unsecured claims, particularly the $2.1 billion of labor protection, with the probable result that the United States would realize nothing on its claims?

2. Could Congress constitutionally, by amending the RPSA or otherwise, eliminate or reduce Amtrak's labor-protection obligations in the context of a complete elimination of federal funding of Amtrak?

---

[1] Footnotes at end.

3. If the answer to question 1 is yes, could Congress prevent that result, and ensure priority for the United States' claims, by legislation?

4. Is it likely that the United States would itself be held liable to pay Amtrak's labor-protection obligations?

Our answers are as follows: question 1, yes; question 2, probably not; question 3, probably not; question 4, yes.

THE FACTS

The facts material to these questions are as follows. The United States, by § 301 of RPSA, caused Amtrak to be incorporated as a for-profit corporation, "the purpose of which shall be to provide intercity and commuter rail passenger services." "The Corporation will not be an agency or establishment of the United States Government." "The right to appeal, alter, or amend this Act at any time is expressly reserved." Id.

While Amtrak issued common stock to private railroads in return for financial contributions mandated by Congress, RPSA, § 304(a), the United States owns all the preferred stock, which has a liquidation preference, id., and is entitled to all the voting power until the preferred stock is progressively converted to common stock, § 303(c), which has never occurred. The federal government thus is for practical purposes the sole shareholder of Amtrak.

The rail passenger system that Amtrak was initially ordered to operate was directed by Congress on the recommendation of the Secretary of Transportation, §§ 201, 202. All subsequent decisions as to whether to continue, abandon or add specific service are determined by detailed criteria established by Congress, §§ 403, 404, 1001-04. It is thus on the United States' sole responsibility that Amtrak has operated a rail passenger system that results in substantial losses and has made large federal subsidies necessary.

As already mentioned, Amtrak was required by Congress (§ 405) to enter into the contract that establishes the labor-protection obligations which, upon Amtrak's complete discontinuance of service, would constitute the major non-federal creditor claims against Amtrak's estate.[5] While Congress has provided annual funding for the relatively minor labor-protection payments occasioned by specific discontinuances of service, it provided no funding or security that could meet the approximately $2.1 billion of payments that Amtrak would be required to make in the event of complete discontinuance. Since these claims would rank equally in bankruptcy with other prebankruptcy unsecured claims, all other claims in that category would be decisively affected by the existence of these obligations and Amtrak's inability to discharge them out of the liquidation proceeds of its assets. Thus ordinary trade, tort and other creditors would, like Amtrak's employees, be adversely affected by the failure to fund labor-protection obligations and, absent liability of the United States, are likely to realize only a small fraction of their claims in the event of Amtrak's bankruptcy.

In operating the rail passenger service prescribed by Congress, Amtrak has incurred large losses in each year of its operations. Cumulatively, Amtrak has received approximately $10 billion from the United States. Of this amount, preferred stock has been issued for approximately $2.9 billion; $1.1 billion has been treated as a loan secured by Amtrak's rolling stock; another $1.9 billion has been treated as a loan secured by a mortgage on the Northeast Corridor, and the remaining $4.1 billion has not been converted into any debt or equity interest.

We are informed that it could not reasonably be contended that the approximately $3 billion of federal payments to Amtrak that have been treated as loans could have been borrowed from any other source.

QUESTION 1.—EQUITABLE SUBORDINATION

We believe it probable that a bankruptcy court would hold that the claims of the United States as a creditor against Amtrak's estate should be equitably subordinated to the claims of general unsecured prebankruptcy creditors, and the United States' liens[6] should disappear or pass to the estate.[7]

Equitable subordination, until recently judge-created doctrine, now has statutory recognition in the Bankruptcy Code.[8] The doctrine entails that the claims, as creditor, of controlling shareholders will be subordinated in circumstances where allowance of such claims on a priority or equal basis would be unfair and harmful to other creditors.[9] Among the best-recognized situations in which the doctrine will be applied are (1) where the bankrupt corporation is deemed to have been undercapitalized by its controlling shareholders,[10] and (2) where those shareholders have supplied debt financing in circumstances where equity capital was economically requred.[11] Such shareholders will not be permitted to enjoy equality with, let alone priority over, other creditors when they made loans to, and/or obtained security interests in the property of, their undercapitalized subsidiary.

An enterprise is undercapitalized if its owners do not provide it with sufficient equity capital to meet the normal and foreseeable demands and obligations of the business in which it is to engage.[12] A strong, though not at all necessary, factor indicating undercapitalization is the existence of loans made to the subsidiary by the parent in circumstances where investing the amount as equity would have made the subsidiary more viable and where such loans could not have been procured from independent sources of financing.[13]

We believe a court would probably find that Amtrak was undercapitalized, and particularly so with respect to its labor-protection obligations. While Congress conveyed very large sums to Amtrak in the form of appropriations, taking no ownership or debt interest at all for some of those sums and taking an equity interest (the preferred stock) for some others,[14] the adequacy of the sums must be assessed in the light of the magnitude of the nationwide, money-losing rail passenger operations that Amtrak was required to conduct and, indeed, to expand and to upgrade. Moreover, to the extent that the congressional appropriations were expended on operations or for investment in capital purchases and improvements with no net-income-producing capacity, they furnished little or no equity cushion to Amtrak or protection to its creditors. And Congress kept Amtrak on a tight leash; there has never been a time when a cessation of government appropriations would not have led to Amtrak's prompt bankruptcy.[15]

Most important of all, Congress required Amtrak to assume by contract a liability for labor protection that, in the event of Amtrak's total discontinuance of service, is estimated to amount to some $2.1 billion. Total discontinuance was always a real and foreseeable possibility. Congress originally authorized Amtrak to operate its service on a two-year trail basis only. Appropriations could always be cut off, with discontinuance as the necessary result. And Congress expressly reserved the right to repeal, alter or amend the RPSA at any time.[16] Thus a total discontinuance of Amtrak's operations, and the consequent triggering of the maximum labor-protection obligation, must be considered a normal and foreseeable incident of the business in which Amtrak was directed to engage.[17]

In these circumstances, it can be strongly argued that, since Amtrak's parent—the United States—did not provide Amtrak, through equity capital or otherwise,[18] with some means of satisfying that obligation, the legal conclusion must be that Amtrak was undercapitalized and that the United States' claims should be subordinated. The fact that Amtrak's parent caused it to assume the liability in question, without regard to Amtrak's own business interests, provides strong additional support for this conclusion.[19]

Still further support is provided by the fact that the United States caused Amtrak to become indebted to it to the extent of some $3 billion—a sum far greater than the probable liquidation value of all its assets—in circumstances where such debt financing could not have been obtained from any independent source. As we have seen, this is a circumstance that has been accorded substantial weight in determining undercapitalization. Finally, the United States required Amtrak, as security for the debt financing, to convey liens on the great bulk of its assets, to the prejudice of Amtrak's employees and others who have unsecured claims that otherwise might have been satisfied, at least in part, from the proceeds of those assets.

QUESTION 2.—COULD CONGRESS CONSTITUTIONALLY ELIMINATE OR REDUCE AMTRAK'S LABOR-PROTECTION OBLIGATIONS IN THE CONTEXT OF A COMPLETE ELIMINATION OF FEDERAL FUNDING OF AMTRAK?

Could it be successfully argued that Congress could constitutionally, by statute, eliminate or reduce the labor-protection obligations—imposed by Section 405 of the RPSA and undertaken in Appendix C-2 to the Basic Agreement—as part of a plan to disengage the United States from Amtrak by the complete elimination of funding?

In Title V of the Regional Rail Reorganization Act of 1973 (RRRA), 87 Stat. 1012 (1974), Congress provided certain labor-protection benefits for employees of Conrail. No contract was involved; the detailed protection provisions were spelled out in the statute. Subsequently, in successive stages, by the Staggers Act of 1980, 94 Stat. 1985, and then by the Northeast Rail Service Act of 1981, 45 U.S.C. 581 et seq., Congress first modified and then repealed Title V and substituted less generous protection provisions. In Section 1132 of the 1981 Act, Congress declared that the RRRA had failed in its objective of creating a self-sustaining Conrail; that the labor-protection provisions of the RRRA "have resulted in the payment of benefits far in excess of levels anticipated at the time of enactment, have imposed an excessive fiscal burden on the Federal taxpayer, and are now an obstacle to the establishment of improved rail service and continued rail employment in the Northeast"; and that failure to reduce the benefits provided by Title V "would destroy [Conrail's] prospects of becoming a profitable carrier and further injure its employees."

The reduction of benefits was challenged as an unconstitutional taking of property

without just compensation and without due process of law. The Special Court rejected the challenges, holding that Title V created no proerty rights but was rather "social welfare legislation" which Congress could repeal or amend at any time, so long as its action had a reasonable basis and was not patently arbitrary or irrational.[20] The Court examined in detail the finding in Section 1132 that Title V had resulted in benefits far higher than anticipated, and held that finding to have been fully justified.[21] The congressional finding that failure to reduce the benefits of Title V would result in discontinuance of rail service, and consequent great injury to employees, was also held justified. In these circumstances, the court had no difficulty in holding that Congress had a reasonable basis for its action, and therefore in rejecting the constitutional challenges.

Congressional repeal or reduction of Amtrak's labor-protection obligations in the context of a complete cessation of funding would present quite different consideration. We are informed that, unlike the situation with Conrail, it could not be claimed that Amtrak has incurred obligations beyond what was intended or expected. Moreover, Congress' purpose would not be the continuance of rail service—since Amtrak's service will stop in any event if federal funding ceases [22]—with concomitant benefits to employees. Congress' purpose would, rather, be to advantage other claimants against Amtrak's assets (including the United States) and/or to avoid the expenditure of federal funds to discharge the labor-protection obligations. It is by no means clear that such purposes would be held to provide the reasonable basis that due-process-clause analysis requires even for the repeal of mere social-welfare benefits.

Moreover, in Amtrak's case, unlike Conrail's contractual rights are involved. With respect to Congrail Congress provided for benefits by statute, whereas with respect to Amtrak Congress caused a contract to be negotiated, signed, and certified by the Secretary of Labor. It is true that Congress can legislate so as to frustrate private contract rights if a reasonable basis exists.[23] For the reasons already indicated, we doubt that a reasonable basis would be found if the congressional objective was not to preserve amtrak's service and employment but merely to benefit some of Amtrak's creditors at the expense of others. [24]

Finally, a substantial argument could be made that congressional action eliminating or reducing the labor-protection rights of Amtrak's employees—action taken in circumstances in which Amtrak's bandruptcy was foreseeable and indeed imminent—would in substance be an ad hoc attemp to alter the rights and priorities of creditors in a particular bankruptcy. So viewed, the statute would stand an excellent change of being held to infringe the uniformity requirement of the bankruptcy clause of the Constitution (Art. I, § 8, cl. 4, giving Congress power "To establish . . . uniform Laws on the subject of Bankruptcies throughout the United States").[25]

QUESTION 3.—COULD CONGRESS PREVENT EQUITABLE SUBORDINATION BY LEGISLATION?

An attempt by Congress to prevent equitable subordiation by legislation would be in substance, if not in form, an amendment to § 510(c) of the Bankruptcy Code. If such an amendment were limited to an Amtrak bankruptcy, it would almost certainly be held to infringe the uniformity requirement of the bankruptcy clause of the Constitution, see above.

In addition, such legislation would likely be held to infringe the due-process clause of the Fifth Amendment for the reasons discussed in the answer to Question 2, as well as the equal-protection component of that clause, discussed below.

Suppose that Congress enacted legislation providing that, as a general and uniform rule in bankruptcy, claims of the United States are not subject to equitable subordination. The uniformity problem would then disappear. Moreover, such a statute would not infringe the rule that vested rights in specific property may not be destroyed by bankruptcy legislation,[26] because that rule is inapplicable to unsecured claims.[27] And statutory alterations in the priorities of creditors can constitutionally be made applicable to bankruptcy proceedings commenced before the enactment.[28]

However, a substantial argument could be made that the statute violated the equal-protection component of the due-process clause,[29] which is fully applicable to bankruptcy legislation.[30] Under the principles discussed in our answer to Question 2, a reasonable, non-arbitrary basis would have to be shown for treating the United States differently from all other creditors for the purpose of equitable subordination. If the United States has acted in a fashion that would require subordination of any other creditor's claim, it is difficult to discern a non-arbitrary basis for treating the United States differently. In addition, the fact that the difference in treatment resulted in direct financial benefit to the United States would permit a substantial argument that application of the statute to defeat equitable subordination in a particular bankruptcy would effect a taking of property without just compensation, notwithstanding the rule that statutory alterations of priorities in bankruptcy do not normally have that result.

Finally, if the United States were itself held liable for Amtrak's labor-protection obligations—and we suggest under Question 4 that it might well be so held—any issue of equitable subordination or the constitutionality of a congressional attempt to defeat that result would be academic.

QUESTION 4.—DIRECT LIABILITY OF THE UNITED STATES FOR AMTRAK'S LABOR-PROTECTION OBLIGATIONS

Liability of a controlling shareholder or parent for the debts of its subsidiary is variously justified on alter-ego, piercing-the-corporate-veil, and agency-or-instrumentality principles.[31] No finding of "wrongdoing" is necessarily involved; it is sufficient if the corporate form has been used in such a way that creditors have been injured in circumstances inconsistent with justice and equity.[32] Piercing the corporate veil for one purpose does not imply piercing it for other or all purposes; what is required, as has been held with respect to Amtrak itself, is "a nexus between the challenged actions of the defendant and the state's regulation and subsidization.[33]

Undercapitalization of the subsidiary is a major and often decisive factor in holding the parent liable.[34]

The fact that Amtrak's parent is a government rather than a commercial enterprise would not appear to be material in assessing its liability. Many formally separate corporations created by the United States have been held to be its agents, instrumentalities or alter egos for a variety of purposes. Questions of whether ostensibly private conduct is attributable to the federal or a state government, so as to become "state action" for purposes of the 5th and 14th amendments to the Constitution, have been analyzed on the basis of normal veil-piercing principles.[35] And in appropriate circumstances government-created corporations, including those created by the United States, have been held to be interchangeable with their sovereign parents for purposes of liability.[36]

As the Court of Claims has observed, "We recognize, of course, that these corporations wholly owned by the Government [e.g., the Panama Canal Company] are hybrid creatures, and that if the equivocal nature of such creatures resulted in fraud upon or other abuse of outside persons, a court would look through the corporate fiction and place liability upon the real pincipal." [37]

The provision of the RPSA that Amtrak is not "an agency or establishment of the United States Government," RPSA § 301, should not preclude that result. The provision is best read as making it clear that Amtrak was to be a private corporation and that the United States would not be liable for its debts merely because it was created by statute; in other words, that the relationship created was one of parent and subsidiary, subject to limited liability except as the law provides otherwise. It strains the provisions too far to argue that it exempted the United States-Amtrak relationship from the entire body of common law on the subject of parents and subsidiaries. While Congress may have acted from the best of motives, and in the public interest, in creating Amtrak and in managing and funding it as it did, the fact remains that Amtrak was a business corporation quite capable of going bankrupt, with consequent injury to its creditors. In such circumstances it is difficult to see why the normal rules for holding parents liable should not be fully applicable. In other contexts, courts have held that the normal rules are fully applicable to the United States-Amtrak relationship.[38]

We conclude, therefore, that there is a substantial likelihood that, if Amtrak enters bankruptcy, the United States would be held liable for Amtrak's debts. The argument is strongest with respect to Amtrak's labor-protection obligations, since we have found an undercapitalization directly related to those obligations.

The factors we have already discussed under Question 1—undercapitalization, the congressional requirements that Amtrak both operate a losing business and undertake massive labor-protection liability in the event of discontinuance, and the federal loans to Amtrak and taking of liens therefor—appear to provide the "nexus" between the United States' actions and Amtrak's debts that arguably makes the United States liable for those debts, at least for its labor-protection obligations. Cases where no such nexus was shown, and which hold merely that Amtrak is not generally an agency or instrumentality of the United States, are therefore readily distinguishable.[39]

Yours very truly,

COVINGTON & BURLING,
(By) BRICE M. CLAGETT.

FOOTNOTES

[1] You have informed us that, even without regard to labor-protection obligations, continued operation not only of Amtrak's entire system but of any part thereof (such as the Northeast Corridor) without federal funding would be at a loss.

In these circumstances, Amtrak would appear not to be authorized to operate after the beginning of FY 1986, in view of the provision of Section 404(c)(4)(A) of the Rail Passenger Service Act, as

amended ("RPSA," 45 U.S.C. § 501 et seq.), that Amtrak's "annual total costs shall not exceed the funds" provided by Congress and by other sources.

[2] Under Section 405 of the RPSA, Amtrak was required to "provide fair and equitable arrangements to protect the interests of employees . . . affected by a discontinuance of intercity rail passenger service," in accordance with detailed standards specified in the statute, and such arrangements were required to be certified by the Secretary of Labor as complying with the requirements of the Act. The labor-protection obligations were agreed between Amtrak and the labor unions and signed by them, and were certified by the Secretary of Labor. They appear in Appendix C-2 to the Basic Agreement between Amtrak and the railroads.

You have informed us that Amtrak's studies indicate that, in the event of a total discontinuance of Amtrak operations, the labor-protection obligations pursuant to Appendix C-2 would require the payment of approximately $2.1 billion over the six years following discontinuance.

[3] The amount of prebankruptcy unsecured claims, aside from labor-protection obligations and claims of the United States, has not yet been estimated but would be substantial. They would include claims under trade contracts and tort claims.

The United States' principal claims as a creditor would be (1) $1,119,635,428.43, plus interest, pursuant to a Note dated as of October 5, 1983, secured by "all Amtrak equipment" (rolling stock), and (2) approximately $1.9 billion (plus interest in certain contingencies), or such lesser amount as shall represent the value of the Northeast Corridor on Apr. 1, 1976, secured by a mortgage on the Northeast Corridor. Both notes have maturity dates far in the future and no installment payments are provided for. However, the United States may declare all amounts under the equipment Note due and payable if Amtrak should permanently cease operation of intercity rail passenger service, and the United States may declare amounts owing under the mortgage Note due and payable at any time by statute.

[4] While the book value of Amtrak's assets is approximately $3.1 billion, you have informed us that the amount realizable in liquidation for those assets would undoubtedly be far less.

[5] The United States was not itself a party to the Basic Agreement with the railroads, *National Railroad Passenger Corp.* v. *Atchison, T. & S.F. Ry.*, 53 U.S.L.W. 4285 (U.S., Mar. 18, 1985), or to Appendix C-2 to the Basic Agreement, which contains Amtrak's direct labor-protection obligations.

Appendix C-1 contains the labor-protection obligations of the freight railroads which contracted with Amtrak. Amtrak agreed to reimburse these railroads for amounts spent by them to protect employees holding jobs which Amtrak requested to be added subsequent to the initiation of Amtrak's service. That agreement would cost Amtrak approximately $.2 billion in the event of complete discontinuance; Amtrak's direct obligations under Appendix C-2 would cost approximately $1.9 billion.

[6] One of the United States' liens is a security interest in Amtrak's rolling stock. It does not, however, appear to be a "purchase-money equipment security interest" within the meaning of § 1168 of the Bankruptcy Act, and in any event the Note for the debt in question does not grant the United States a right to take possession of the rolling stock in the event of bankruptcy. For both these reasons, the United States would not be entitled under § 1168 to take possession of the rolling stock in the event of Amtrak's bankruptcy.

[7] This is a consequence of equitable subordination. *Reiner* v. *Washington Plate Glass Co.*, 711 F.2d 414 (D.C. Cir. 1983).

[8] 11 U.S.C. § 510(c). See 3 Collier on Bankruptcy § 510.05 (15th ed. 1984).

[9] Id. at § 510.05[2]; *In the Matter of Mobile Steel Co.*, 563 F.2d 692 (5th Cir. 1977).

[10] *Pepper* v. *Litton*, 308 U.S. 295 (1939); Hackney & Benson, "Shareholder Liability for Inadequate Capital," 43 U. Pitt. L. Rev. 837, 879–83 (1982).

[11] *Taylor* v. *Standard Gas & Electric Co.*, 306 U.S. 307, 323 (1939); *Goldie* v. *Cox*, 130 F.2d 695 (8th Cir. 1942); *In the Matter of Mobile Steel Co.*, supra.; *Machinery Rental Inc.* v. *Herpel*, 622 F.2d 709 (5th Cir. 1980); *In re Trimble Co.*, 479 F.2d 103 (3d Cir. 1973). "The essential fairness of this result is readily apparent because not only did the claimant increase the risks of failure to the debtor by undercapitalizing it, the claimant also seeks to share in the distribution of the debtor's assets based on purported loans to the debtor which were substitutes for risk capital. If these 'loans' had been invested in the proper form, they would not have been grouped, in the order of distribution, on a parity with the claims of the general creditors." 3 Collier, supra, at § 510.05[4][a].

[12] *In the Matter of Mobile Steel Co.*, supra, at 703 ("Capitalization is inadequate if, in the opinion of a skilled financial analyst, it would definitely be insufficient to support a business of the size and nature of the bankrupt in light of the circumstances existing at the time the bankrupt was capitalized"); Henn & Alexander, Laws of Corporations 356 (3d ed. 1983); 1 Fletcher, Cyclopedia of the Law of Private Corporations § 44.1 (1983).

[13] *In the matter of Mobile Steel Co.*, supra, at 703 ("Capitalization is inadequate if, at the time when the advances were made, the bankrupt could not have borrowed a similar amount of money from an informed outside source."); 3 Collier on Bankruptcy § 510.05[4][a] (1984); Latty, op. cit. at 110–41; Hackney & Benson, op. cit. at 893–95.

[14] It might, however, be argued that the preferred stock resembles debt more than equity in view of RPSA § 304(d), which provides that "no obligation with a liquidation interest superior to any preferred stock . . . shall be incurred without the consent of the Secretary."

[15] "If the subsidiary is financially helpless and, through the fault of the parent corporation can call on the parent corporation for capital funds only when and if the parent corporation pleases to grant them, it is cogent evidence" of undercapitalization. Powell, Parent and Subsidiary Corporations 14–15 (1931).

[16] RPSA § 301.

[17] It might be argued that those who voluntarily and knowingly contract with an inadequately capitalized corporation are not entitled to equitable subordination, although this argument is generally deemed relevant only when the creditor seeks to hold the parent directly liable for the subsidiary's debts. See Hackney & Benson, "Shareholder Liability for Inadequate Capital," 43 U. Pitt. L. Rev. 837, 860–67 (1982). Even if the argument is relevant when only equitable subordination is sought, it is far from clear that the argument would succeed here. Employees arguably do not deal with their employer on a purely voluntary basis, id. at 863. That is especially true of workers in a declining industry, like passenger railroad service in the 1970s, whose only alternative to dealing with Amtrak was to lose jobs that in many cases they had held for many years. Finally, Amtrak's employees were arguably entitled to rely on the assurance of Congress and the certification by the Secretary of Labor that the contract they accepted guaranteed them "fair and equitable protection" "against a worsening of their positions with respect to their employment." RPSA § 405 (b), (c). Surely, the nonpayment of their contracted-for benefits as a result of Amtrak's bankruptcy would be such a "worsening of their positions." Indeed the employees may have reasonably believed that the United States was directly bound to perform the labor-protection obligations. See n. 24 infra.

[18] A parent should not "launch the subsidiary in business without furnishing the appropriate funds or obligating itself to do so." Powell, op. cit. at 14. If Congress did not wish to fund Amtrak with equity capital sufficient to pay labor protection, it could, of course, have "obligat[ed] itself" by guaranteeing the obligation.

[19] See *Taylor* v. *Standard Gas & Electric Co.*, supra.

[20] *Railway Labor Executives' Ass'n* v. *United States*, 575 F. Supp. 1554 (Sp. Ct. 1983), cert. denied, 104 S. Ct. 1596 (1984); *Hinds* v. *Consolidated Rail Corp.*, 518 F. Supp. 1350 (Sp. Ct. 1981), cert. denied, 454 U.S. 1145 (1982). See also *Pension Benefit Guaranty Corp.* v. *R.A. Gray & Co.*, 104 S. Ct. 2709 (1984); *U.S. Railroad Retirement Board* v. *Fritz*, 449 U.S. 166 (1980).

[21] *Hinds* v. *Consolidated Rail Corp.*, supra.

[22] If relief from labor-protection obligations would enable Amtrak to continue operations (and employment) on the Northeast Corridor while discontinuing all other operations, the situation would be much closer to that held to warrant relief for Conrail. You have informed us, however, that without any Federal funds Amtrak could not conduct profitable or break-even operations on the Northeast Corridor even if relief from the labor-protection obligations triggered by its discontinuance of all other service was available.

[23] *Usery* v. *Turner Elkhorn Mining Co.*, 428 U.S. 1, 15 (1976); *United Transportation Union* v. *Consolidated Rail Corp.* 535 F. Supp. 697 (Sp. Ct.), cert. denied, 457 U.S. 1133 (1982).

[24] As suggested in note 22, supra, a quite different situation would be presented if Congress modified Amtrak's labor-protection benefits in the context of ongoing Amtrak passenger-service operations and for the purpose of making Amtrak more economically viable. That would be much closer to the Conrail situation where modifications have been upheld.

[25] See *Railway Labor Executives' Ass'n* v. *Gibbons*, 455 U.S. 457, 469–71 (1982) (statute that applies to only one bankrupt railroad and its labor-protection obligations violates the uniformity requirement); Regional Rail Reorganization Act Cases, 419 U.S. 102, 160 (1974) (RRRA held not to violate the uniformity requirement because "the Rail Act in fact operates uniformly upon all bankrupt railroads then operating in the United States and uniformly with respect to all creditors of each of these railroads.").

J. Corp. Law 351, 354–55 (1979); 1 Fletcher, op. cit. §§ 41.30, 41.55, 44.1 ("If a corporation is organized and carries on a business without substantial capital in such a way that the corporation is likely to have insufficient assets available to meet its debts, it is inequitable that the stockholders should set up such a flimsy organization to escape personal liability. The attempt to do corporate business without providing any sufficient basis of financial responsibilities to creditors is an abuse of the separate entity and will be ineffectual to exempt the stockholders from corporate debts. It is coming to be recognized as the policy of the law that stockholders should in good faith put at the risk of the business unencumbered capital reasonably adequate for its prospective liabilities. If the capital is illusory of trifling compared with the business to be done and the risks of loss, this is ground for denying the separate entity privilege. It has been stated that a corporation's capitalization is a major consideration of courts in deciding whether a legitimate separate corporate entity was maintained.)".

COVINGTON & BURLING,
Washington, DC, April 25, 1985.

PAUL F. MICKEY, ESQ.,
Executive Vice President, Law and Public Affairs, National Railroad Passenger Corporation, 400 N. Capitol Street, NW, Washington, DC.

DEAR MR. MICKEY: You have asked for our comments on the letter signed for the Comptroller General of the United States ("GAO") to Senator Danforth, dated March 18, 1985, giving GAO's opinion on a number of questions asked by the Senator. We addressed some of the same questions in our letter to you of April 17, 1985.

As GAO recognizes (p. 20), "a legitimate difference of opinion may exist with respect to some, if not all, of our answers", and if litigation followed a complete discontinuance of Amtrak service "it is impossible for us to predict the likely outcome of such litigation with any degree of confidence." We believe, however, that applicable legal principles and precedents make an outcome different from GAO's prediction more likely in the case of Question 1.

QUESTION 1

If the employees of Amtrak or the contract railroads were laid off as a result of discontinuances of railroad passenger service, would the Federal Government be legally or otherwise liable for the payment of the resultant labor-protection costs?

In our April 17 letter we concluded (pp. 14-17) that there is a substantial likelihood that this question would be answered in the affirmative. GAO argues against this result and, subject to the reservations noted above, appears to regard it as less likely than we do.

We agree with GAO's initial conclusions (p. 4) that the United States is not a party to the Basic Agreement between Amtrak and the railroads or to its Appendices C-1 and C-2 (setting forth the labor-protection obligations of the railroads and Amtrak respectively), and that the fact that the creation of these obligations was mandated by statute and by the Secretary of Labor does not, without more, make the United States a guarantor of them.[1]

GAO identifies two arguments that might result in liability of the United States. The first (p. 8) is that Amtrak acted as agent for the United States in entering into the Appendix C-2 agreement and that the United States is therefore bound by it. GAO contends that Amtrak is not generally to be classified as a Government agency, and cites several cases so holding in a variety of contexts; GAO further argues that the Basic Agreement is a private, not a Government, contract. We do not disagree with either proposition, and did not argue to the contrary in our April 17 letter. On the same day that GAO's letter is dated, its conclusion on these points was confirmed by the Supreme Court's opinion in *National Railroad Passenger Corporation v. Atchison, T. & S.F. Ry.*, 53 U.S.L.W. 4285 (U.S. March 18, 1985). See our letter of April 17, p. 4 n.5.

We express no opinion on whether Appendix C-2 is an agreement subject to the Railway Labor Act, 45 U.S.C. § 51 *et seq.*

GAO then addresses (pp. 9-10) the argument that we did make: that the United States would likely be held liable for Amtrak's labor-protection obligations on an alter-ego or piercing-the-corporate-veil theory. GAO appears to make four contentions:

1. Since the United States' control over Amtrak does not make Amtrak an agency or instrumentality of the United States, Amtrak cannot be a "subsidiary or instrumentality" of the United States for the purpose of the alter-ego doctrine.

2. The assertion that Amtrak was undercapitalized by the United States is "a difficult proposition to prove."

3. Since the alleged undercapitalization was open and notorious, the United States should not be held liable to those who voluntarily contracted with Amtrak.

4. United States liability in this instance could mean that the Government could never end subsidies to an organization like Amtrak once they had begun.

We discuss these contentions below.

1. We see no reason why the fact that Amtrak is not a Government agency would deter a court, in appropriate circumstances, from applying normal veil-piercing principles. These principles have been evolved to provide exceptions to the normal rule that distinct entities (such as parent and subsidiary) will be treated as distinct in law. A number of decisions—some involving Amtrak itself—have recognized that the same principles will be applied when the "parent" is a government. See pp. 15-17 of our April 17 letter. The United States' control over, and ownerships of all the voting stock of, Amtrak clearly creates a parent-subsidiary relationship.

The "nexus" between that United States ownership and control and Amtrak's acts on which liability would be founded provides the remaining element necessary to implicate the United States in that liability. Several of the very decisions quoted by GAO recognized that the nexus factor is critical, and declined to pierce the veil only because, after careful factual analysis of the asserted claims, it was determined that the necessary nexus did not exist; that is, that the Government was not responsible for or involved in Amtrak's acts that gave rise to the claim. *See Anderson v. National Railroad Passenger Corp.* (7th Cir., Dec. 6, 1984), Slip. op. (discharge of employee); *Senater v. Amtrak*, 540 F. Supp. (D.N.J. 1982) (train accident); *see also Marcucci v. National Railroad Passenger Corp.*, 589 F. Supp. 725 (N.D. Ill. 1984), (discharge of employee).

Here, of course, the nexus is if provided by the facts that the United States (1) caused Amtrak to operate a losing business, (2) required Amtrak to incur massive contingent labor-protection obligations, (3) failed to capitalize Amtrak in such a fashion that it could meet those obligations, and (4) now threatens to make those obligations due and payable by causing Amtrak's total discontinuance of service. In these circumstances, the very cases cited by GAO would support United States liability for the obligations.

A different conclusion is not warranted, in our opinion, by the language of *Kimbrough v. National Railroad Passenger Corp.*, 549 F. Supp. 169 (M.D. Ala. 1982), in which the court observed that "Amtrak was to be treated as a private, for-profit railroad in regard to its employee relations." GAO argues (p. 6) that it follows that "the United States is not liable to Amtrak employees for any labor-protection payments mandated by the Basic Agreement or the underlying statute, just as the United States would not be liable for similar debts owed by other private railroads to their employees." *Kimbrough*, like *Anderson* and *Marcucci, supra*, involved a claim that Amtrak's discharge of an employee was government action subject to the due-process clauses of the 5th and 14th amendments to the Constitution. There was no allegation, however, that the United States was involved in Amtrak's decision to discharge the employee; thus the nexus requirement was not met. It stretches the decision much too far, we think, to extend its language to Amtrak's labor-protection obligations, given the heavy federal involvement both in the creation of those obligations and in the prospective inability of Amtrak to perform them.

2. GAO does not explain the basis for its statement that "undercapitalization of Amtrak is a difficult proposition to prove." It is undisputed that the United States caused Amtrak to incur contingent labor-protection obligations of $2.1 billion, and that it was entirely foreseeable that these amounts would become due and payable if federal funding of Amtrak ceased, as is now proposed. In these circumstances we think Amtrak was and is clearly undercapitalized with respect to its labor-protection obligations.

In *Matter of Mobile Steel Co.*, 563 F.2d 692 (5th Cir. 1977), cited by GAO, the court defined adequate capitalization as "what reasonably prudent men with a general background knowledge of the particular type of business and its hazards would determine was reasonable capitalization in the light of any special circumstances which existed at the time of incorporation of the now defunct enterprise." *Id.* at 703.

The labor-protection obligations which the United States caused Amtrak to assume would appear to be a "special circumstance" that "reasonably prudent men" would have realized had to be capitalized or guaranteed if Amtrak was to remain solvent in the event of a cessation of federal funding.

---

[1] We do, however, take exception to GAO's implication (p. 4) that labor protection is mandated only by "social-welfare legislation" like the labor-protection obligations applicable to Conrail. Appendix C-2 is a contract. GAO elsewhere recognizes (p. 16) that Amtrak's obligations "were created and currently exist in a contractual context," but apparently believes that the only contract involved was between Amtrak and the railroads, with the employees "being at most third-party beneficiaries" (p. 17). GAO relies entirely on the statement in McLaughlin v. Penn Central Transportation Co., 384 F. Supp. 179, 183-84 (S.D.N.Y. 1974), that Appendix C-1 was not a contract between the former passenger railroads and their employees. What GAO has overlooked is that, while Appendix C-1 was not signed by the railroads and the unions, Appendix C-2 was signed by Amtrak and the unions. The *McLaughlin* case is therefore not relevant.

Mobil Steel also applies another test for undercapitalization in a case where the parent has lent money to the subsidiary and taken a security interest in its property in return: "Capitalization is inadquate if, at the time when the advances were made, the bankrupt could not have borrowed a similar amount of money from an informed outside source." *Id.*

In *Mobile*, the court concluded that this test was not met because the subsidiary had in fact obtained large commercial loans from independent sources. Here, in contrast, it seems clear that Amtrak could not have borrowed from such sources the $3 billion that it obtained in secured loans from its parent, the United States.

It thus appears that both of the *Mobile Steel* tests for undercapitalization are met in this instance.

3. We recognized (April 17 letter, p. 8 n.17) that "it could be argued" that a parent should not be held liable to "those who voluntarily and knowingly contract with an inadequately capitalized corporation." However, courts often pierce the corporate veil even for the benefit of voluntary creditors when there is clear undercapitalization, when the parent has intervened in the transaction in question, or generally where "an inequitable result" would otherwise follow. *See* Douglas & Shanks, "Insulation from Liability Through Susidiary Corporation," 39 Yale L.J. 193, 218 (1929). The "voluntary creditor" argument tends to be successful only when the creditor is sophisticated and has equal bargaining power. "It would seem . . . that many contract creditors are in fact involuntary claimants, in that as a practical matter they are not in a position to select whom to contract with or to familiarize themselves with the financial condition of the corporation they are dealing with." Hackney & Benson, "Shareholder Liability for Inadequate Capital," 43 U. Pitt. L. Rev. 837, 863 (1982). Employees, in particular, are not generally regarded as "voluntary" creditors for this purpose. *Id.* As we noted in our April 17 letter (p. 8, n.17), "[t]hat is especially true of workers in a declining industry, like passenger railroad service in the 1970s, whose only alternative to dealing with Amtrak was to lose jobs that in many cases they had held for many years."

As we also noted (*id.*), "Amtrak's employees were arguably entitled to rely on the assurance of Congress and the certification by the Secretary of Labor that the contract they accepted guaranteed them 'fair and equitable protection' 'against a worsening of their positions with respect to their employment.' RPSA §405(b), (c)."

In these circumstances, a court could well hold that the imposition of liability on the United States is necessary to avoid "an inequitable result."

4. GAO's final argument—that the United States liability would mean that federal subsidies to private entities, once begun, could never be ended—seems inadequately focused on Amtrak's unique situation. Federal subsidies do not normally involve the creation of massive contingent liabilities, such as those here, that will become due and payable only if and when the subsidies cease and that cannot be paid out of the subsidies themselves. Nothing in the argument we have made implies that the United States has any obligation to subsidize Amtrak indefinitely—merely that it cannot walk away from existing obligations that it itself caused to be created without capitalization or guarantee, and on which Amtrak's many thousands of employees have reasonably relied.

There is nothing in the argument that could "substantially undermine the authority of Congress to control Federal expenditures through the authorization and appropriation process" (GAO letter, p. 10). It was Congress itself, of course, that adopted the measures that arguably result in liability of the United States here.

QUESTIONS 2 AND 3

Would Amtrak be liable for the payment of the resultant labor-protection costs, and would any liability be affected if the discontinuance of service was system-wide rather than partial?

GAO concludes (pp. 11-14) that Amtrak itself would be liable for the labor-protection costs and that both that liability and any liability of the United States would not be affected if the discontinuance of Amtrak service was total rather than partial. We agree with these conclusions.

QUESTION 4

Assuming Amtrak was liable for labor-protection costs but received no federal subsidies, how would it pay the costs?

GAO correctly concludes (pp. 14-15) that, unless the United States' claims against Amtrak's estate are equitably subordinated, Amtrak would have "no assets" to pay the labor-protection costs.

It is likewise clear that, even if there were equitable subordination, only a small fraction of the $2.1 billion of labor-protection costs could be paid out of Amtrak's estate. As GAO notes, Amtrak estimates that the liquidation value of the estate would probably approximate $400 million, and that perhaps half of that would be consumed by claims indisputably senior to the labor-protection claims.

GAO regards it as "questionable" whether the federal claims would be subordinated, but does not discuss the issue. We fully set forth, at pp. 5-9 of our April 17 letter, our reasons for concluding that equitable subordination would be proper. Among the best-recognized situations in which a secured claim of a controlling shareholder will be subordinated to unsecured claims (and the lien canceled) is a situation where the bankrupt corporation was undercapitalized and where the controlling shareholder has supplied debt financing in circumstances where equity capital was economically required or where debt financing could not have been obtained from independent sources. We believe these principles rather clearly apply to the Amtrak situation.

QUESTION 5

Could Amtrak and its employees agree without legislation to revise the existing labor-protection arrangements?

GAO concludes (pp. 15-18) that Amtrak and its employees could not agree to amend Appendix C-2 of the Basic Agreement so as to modify or reduce Amtrak's labor-protection obligations. We did not address this question in our April 17 letter, and you have not asked us to address it. We agree with GAO's observation that it seems unlikely that Amtrak's employees would have any incentive to agree to such an amendment in the event of a complete discontinuance of Amtrak's service.

GAO also concludes (p. 16) that a statute amending Amtrak's labor-protection obligations might be unconstitutional without employee consent. GAO relies on the 7th Circuit's decision that was revised in *National Railroad Passenger Corp.* v. *Atchison, T. & S.F. Ry., supra.* For different reasons, we agree that such a statute would probably be unconstitutional if enacted in the context of a complete discontinuance of Amtrak service. See pp. 9-12 of our April 17 letter.

Statutes amending the labor-protection obligations enacted by Congress for Conrail were upheld by the courts on the grounds that Conrail's obligations were not imposed by contract but merely by "social-welfare legislation"; that the obligations had turned out to be many times more expensive than anticipated, and that amendments were reasonably necessary to avoid discontinuance of rail service and consequent injury to employees. None of these factors could be used to justify elimination or reduction of Amtrak's labor-protection obligations in the context of a complete discontinuance of Amtrak's service. The only purposes of such legislation would appear to be to prefer some claimants against Amtrak's estate over others and to avoid liability of the federal government. We believe such legislation would likely be held to violate the due-process clause of the Fifth Amendment to the Constitution and also to violate Article I, § 8, cl. 4, requiring that bankruptcy laws be uniform. *See Railway Executives Ass'n* v. *Gibbons,* 455 U.S. 457, 469-71 (1982).

QUESTION 6

Could a bankruptcy court revise Amtrak's existing labor-protection arrangements?

GAO expresses no opinion on this question, but notes that Amtrak's view is that Appendix C-2 would not be an "executory contract" in bankruptcy and hence that a bankruptcy court would not have the power, under 11 U.S.C. § 365, to revise the labor-protection arrangements. We agree with Amtrak's position.

Yours very truly,

COVINGTON & BURLING,
(By Brice M. Clagett).

Mr. SPECTER. Mr. President, I ask unanimous consent to have printed in the RECORD a summary sheet showing the 1984 State totals which recite the enormous impact of Amtrak in this country, constituting a total of some 20 million riders with 7,236,000 from the State of New York and my State, Pennsylvania, second with a total of 4,504,135 passengers.

There being no objection, the summary was ordered to be printed in the RECORD, as follows:

AMTRAK RIDERSHIP BY STATE

1984 State totals	On	Off	Total
Alabama	45,422	45,527	90,969
Arkansas	11,171	11,021	22,192
Arizona	36,955	39,249	76,204
California	2,099,334	2,084,999	4,184,334
Colorado	127,686	126,028	253,714
Connecticut	704,220	654,690	1,358,910
District of Columbia	1,150,413	1,136,402	2,286,815
Delaware	259,373	266,944	526,317
Florida	394,205	394,051	788,255
Georgia	82,313	80,803	163,117
Iowa	32,088	32,442	64,530
Idaho	24,057	23,923	47,980
Illinois	1,377,171	1,372,741	2,749,912
Indiana	107,217	106,925	214,142
Kansas	25,421	25,287	50,708
Kentucky	5,928	6,425	12,353
Louisiana	124,532	125,548	250,078
Massachusetts	533,720	434,300	868,020
Maryland	589,265	595,523	1,184,788
Michigan	312,703	314,083	626,785
Minnesota	136,934	135,200	272,134
Missouri	210,031	215,821	425,852
Mississippi	69,997	71,367	141,363
Montana	60,580	60,922	121,502
North Carolina	74,659	74,457	149,116
North Dakota	50,695	50,540	101,235
Nebraska	30,257	30,115	60,373

AMTRAK RIDERSHIP BY STATE—Continued

1984 State totals	On	Off	Total
New Jersey	925,653	881,204	1,806,857
New Mexico	36,871	37,321	74,192
Nevada	91,245	101,221	192,465
New York	3,584,879	3,651,379	7,236,258
Ohio	85,388	83,247	168,635

Mr. SPECTER. Mr. President, if the subsidy is cut, the United States will be the only major industrial nation which would be without a major rail system. The dislocation, in all its ramifications, will take an enormous amount of time to chronicle.

Perhaps a few statistics are worthy of some special note. Some 83,000 transit passengers would be thrown out of their regular routes on the lines now between Trenton, NJ, and New York City. Some 50,000 transit passengers would be thrown out of their regular routes on the Southeastern Pennsylvania Transportation Authority, which services the southeastern part of Pennsylvania.

It has been estimated that, in addition, 25,000 Amtrak employees would lose their jobs and there would also be in jeopardy the jobs of some 150,000 other employees who rely upon Amtrak for affected businesses.

There would be further enormous dislocation in the national rail system, because, without Amtrak to pay the cost of some $164 million for servicing the eastern seaboard, Conrail, which now pays $53 million, will have to pick up the balance of that $164 million. The cost of the eastern rail line is now $218 million; and, as I say, Conrail now pays $53 million and would be obligated to pick up the difference. Were that not done, some 200 industries would be adversely affected along that line.

Mr. President, the dislocation to Conrail would further impact very materially on the proposed sale of Conrail, which is now a subject of major controversy; but the bid of Norfolk Southern would have to be revised, and the bids coming in from Morgan, Stanley would have to be revised, and there would be a tremendous dislocation in that particular line.

Mr. President, it should be noted that Amtrak has improved in efficiency, requiring a subsidy of almost 60 percent in 1977, when Amtrak was able to assume a little more than 40 percent of its own cost, to the situation at the present time when Amtrak is able to pay almost 60 percent of its own cost.

The Federal Government, according to Secretary of Transportation Dole, as set forth in Congressional Quarterly, has sunk $11 billion into Amtrak, on the proposition that rail passenger service is vital as a transit link for an industrial society.

Amtrak's assets are of enormous value, at a minimum in the $3 billion range. If Amtrak goes out of existence on September 30, 1985, while the bankruptcy courts move through this complex litigation and entanglement, it will take a very protracted period of time, doubtless years, and those assets will become worthless.

It is not a matter that at some point in the future, someone can come back in and pick up the rail equipment, the locomotives, and the rails and start to operate with this system. As previously quoted from Secretary of Transportation Dole, it is unlikely that anyone would come in to acquire Amtrak.

One other point, and a contention made succinctly in an article by Tom Wicker in the New York Times on May 3 of this year, in responding to the contention of OMB about the $35 per head subsidy which each Amtrak passenger supposedly receives: a devastating rebuttal to that contention was rendered by Mr. Wicker, as follows:

Sixty-five percent of airline revenues are for busines travel; so for each airline passenger, business travel deductions alone provide a subsidy of $33. In 1984, moreover, air-traffic control cost the Federal Government $2.1 billion, or $9 for each of 221 million air passengers; so by young David's irrelevant arithmetic, the Federal subsidy per air passenger was $42.

He refers to Mr. Stockman as "young David."

Mr. President, I ask unanimous consent to have the entire article by Mr. Wicker printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the New York Times, May 3, 1985]

YOUNG DAVID'S TANTRUM

(By Tom Wicker)

David Stockman, the boy genius of the Reagan Administration, threw a tantrum the other day before a Senate subcommittee. If senators did not have "the courage, the foresight, the comprehension" to "pull the plug" on what he called an "irredeemable" Amtrak rail passenger system, he saw little hope for deficit reduction or for avoiding a "whopping tax increase."

There, there, little man. It won't be as bad as all that, if Amtrak survives. Take Elizabeth Dole's word for it.

As Secretary of Transportation, she affirmed last September that she shared the view of Federal Railroad Administrator John H. Riley that Amtrak had made "great strides" toward "modern, cost-efficient intercity rail passenger service"—running in 1985 "more route miles than it did in 1981 at approximately 28 percent lower funding."

Mrs. Dole, far from sharing young David's hysteria about what he cutely called a "mobile money-burning machine," had asked for a $765 million Amtrak subsidy for fiscal 1986. But that was before the youthful Budget Director began to drum his heels.

He and President Reagan squawk frequently about a $35-per-head subsidy that each Amtrak passenger supposedly receives. This prestidigitation requires adding the Amtrak subsidy to the amount that Amtrak business travelers can deduct from their income taxes, and dividing by 20 million passengers; presto! $35 a head.

Young David is so distraught that he apparently forgets some of the other numbers—surely so brilliant a Budget Director knows them—he might be expected to crunch. For example:

Sixty-five percent of airline revenues are for business travel; so for each airline passenger, business travel deductions alone provide a subsidy of $33. In 1984, moreover, air-traffic control cost the Federal Government

$2.1 billion, or $9 for each of 221 million air passengers; so by young David's irrelevant arithmetic, the Federal subsidy per air passenger was $42.

From its ticket revenues—which pay 60 percent of its costs—and subsidy, Amtrak is required to spend $116 million annually to maintain the Northeast Corridor right-of-way, over which also move the freight trains of Conrail (which earned $500 million in 1984) and every rail commuter service from Boston to Washington.

If, as young David urges, Congress pulls the plug on Amtrak, the Government will have to pay $2.1 billion in labor termination costs over the next six years, an obligation inherited from the private railroads; $3 billion in modern locomotives, equipment, specialized shops and Northeast Corridor plant will be scrapped, with little market for salvage; and about 150,000 jobs in affected business sectors will be jeopardized (25,000 railroad employees will be thrown out of jobs).

But the young genius told the senators that few programs ranked lower than Amtrak "in terms of the good they do, the purpose they serve and the national need." Boyish overstatment again—Amtrak carried 20 million passengers last year, while receiving a smaller Federal subsidy (in current dollars) than in 1978; and in the Northeast Corridor 160,000 commuters on various services rode over Amtrak-maintained right-of-way every day.

The Empire State Passengers Association points out that at least 1,200 people board a train daily in Albany, N.Y., alone; and asks, pertinently, who—if Amtrak goes—will pay to operate Penn Station for the great tide of commuters from Long Island and New Jersey into and out of New York City. Killing Amtrak also would nullify the two bond issues New Yorkers have voted for high-speed rail service, with $100 million already invested.

Aside from New York and the Northeast (never high concerns for Reaganites), Amtrak serves 25 American communities (and surrounding regions) that have no air or bus service, 52 more that have no bus service and 94 that have no air service. Almost a million passengers got on or off trains at places without bus service in fiscal 1984.

So young David shouldn't get so wrought up about Amtrak; and returning White House colleagues might calm him with news that the West German Government, planning its infrastructure investments for the next decade, has decided to put 34 billion marks into its railroads and only 28 billion into its highway network. Now that's a grown-up decision.

Mr. SPECTER. Mr. President, it may well be that in seeking the best of rail transit service, there should be a reappraisal of Amtrak across the country. Many will cite the fact that only a few passengers get on and off at some specific stops in this country. But what has to be borne in mind is that those are trains which are en route and that there are many segments of the country which will be left without any service at all.

Mr. Wicker points out that Amtrak serves 25 American communities that have no air or bus service, 54 communities which have no bus service, and 94 which have no air service. Almost a million passengers got on and off trains at places without bus service in fiscal 1984.

It may be that on some lines which are used to a slight extent, there could be a reevaluation of Amtrak and that it might be reduced in due course, leaving the very heavily traveled lines in operation. That would obviously be a more rational way to handle the situation than by an abrupt termination which will lead to the junking of Amtrak and to the trashing of the American passenger rail system.

Mr. President, I ask unanimous consent that the names of Senators HEINZ, ROTH, EXON, PELL, ZORINSKY, MATHIAS, LEVIN, SARBANES, and BYRD be added as cosponsors of this amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DURENBERGER. Mr. President, will the Senator include the name of the senior Senator from Minnesota as a cosponsor?

Mr. SPECTER. Mr. President, I ask unanimous consent that the name of the distinguished senior Senator from Minnesota [Mr. DURENBERGER] be added as an original cosponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SPECTER. Mr. President, I reserve the remainder of my time, and I yield the floor.

The PRESIDING OFFICER. Who yields time?

Mr. CHILES. Mr. President, I yield 2 minutes from the resolution to the distinguished Senator from New Jersey.

Mr. LAUTENBERG. I thank the floor manager.

Mr. President, I am going to vote for the amendment of my colleague from Pennsylvania, but I will do so reluctantly. I have misgivings.

The amendment might save Amtrak from the ax, but not from the knife. It would restore 90 percent of Amtrak's funding and perhaps save a railroad, a vital link in the economy of our country and many States. We need more. It falls short of a freeze; and by falling short, it will force cutbacks that will be felt in my State, and I believe they could be felt in the State of Pennsylvania. The section 403(d) trains we commonly call Clockers that run between Philadelphia and New York could be the first to go. I believe there is also a line between Philadelphia to Harrisburg that could be subject to discontinuance if there are cutbacks.

I have intended to offer an amendment that would restore funding to present levels and then freeze it there, forcing belt-tightening. It would also restore funding for mass transit and for urban development action grants. Our economy depends on an integrated system to move people and goods. There must be continued investment in the future and effective programs to revive the economies of our cities and towns.

Our economy is built on a foundation of roads, water systems, and railroads. If we allow that foundation to crumble, I fear that the economy will tumble down with it. Amtrak is an essential part of our transportation network. It is a network on which cities, regions, businesses, and people depend.

We should not be the only advanced, industrialized nation in the world that lacks a Government-supported national passenger railroad.

We subsidize air travel. We subsidize highway travel.

But the budget before us threatens to abandon the rails; abandoning 500 Amtrak towns and cities; abandoning 20 million Amtrak passengers who would overload the roads and the airlines; abandoning $3 billion of locomotives, equipment, and plant; abandoning our senses because saving $684 million a year in Amtrak subsidy will cost Amtrak over $2 billion in contracted labor protection costs.

This amendment would give us a reprieve for Amtrak but not a pardon. It might save a vital rail link between cities and towns in my State and around the Nation, a link that is important to the economies of these regions and the people who live there.

Reluctantly, I urge support for this amendment and will vote for it, but I believe full restoration is justified.

I thank you.

Mr. DANFORTH. Mr. President, I yield myself 3 minutes in opposition to the amendment.

The PRESIDING OFFICER. The Senator from Missouri is recognized.

Mr. DANFORTH. Mr. President, unfortunately, when we get into the business of creating budgets for the Federal Government, difficult decisions have to be made, choices have to be made, and we do not like to make choices. We would rather make no difficult decisions at all, spend any amount of money on any program we like, make no distinctions between high-priority programs and very marginal programs.

But at a time when we are facing well over $200 billion annual deficits and when the national debt is about to exceed $2 trillion, we must make some priority choices. We must distinguish between what is very important and what would be nice but is not important at all.

Mr. President, under no circumstances could Amtrak be reasonably called an essential ingredient in our national transportation system. It is not essential. Amtrak carries one-quarter of 1 percent of intercity passengers; one-quarter of 1 percent of people who travel between cities travel on Amtrak.

It has been said, "Well, Amtrak is essential to parts of the country, to the Northeast corridor." One-fourth of 1

percent of those who enter Manhattan every day do so on Amtrak, one-quarter of 1 percent. It is not essential to our national transportation picture, or to the Northeast corrider.

Amtrak's cost is very great. We have heard the question raised about the relative subsidy for different modes of transportation provided by the Federal Government. All modes are subsidized to some extent, but there is no real comparison between the Amtrak subsidy and the Government subsidy for other modes of transportation.

We subsidize Amtrak at 23.6 cents per passenger mile. Compare that to our subsidy for air transportation, two-tenths of a penny, or for automobile or bus transportation. Even figuring in the contributions from the highway trust fund, only one-tenth of 1 cent per passenger mile is expended by the Federal Government on automobile and bus transportation. There is no comparision in the subsidy whatever.

The final point I make has to do with the cost of labor protection. This is a point that is made by everyone who advocates continuing Amtrak. They say we are locked into labor protection agreements, therefore we must clasp Amtrak to our breasts forever.

I do not agree with that at all.

First of all, as a legal matter, it is very controversial whether the Federal Government has any responsibility for labor protection. Even if we do, $2.1 billion, which is the estimated future cost of labor protection, should be compared with the $8 billion which it would cost to maintain Amtrak for the next 10 years—4 to 1.

The PRESIDING OFFICER. The Senator has used his 3 minutes.

Mr. DANFORTH. I yield myself 1 additional minute, Mr. President.

The PRESIDING OFFICER. The Senator is recognized for 1 additional minute.

Mr. DANFORTH. Mr. President, furthermore, with respect to labor protection, it should be pointed out that Amtrak's assets have a book value of $3.6 billion. Some of these assets are highly desirable locations in the middle of major cities. There is no reason why the cost of labor protection could not be borne in very large part by a sale of some of the assets which Amtrak holds.

Mr. President, I think that there is no strong, logical argument against terminating the Amtrak subsidy. I think rather it is a matter of something like symbolism, the desire that we have, for emotional reasons, to maintain a railroad on one hand, and the need to cut the deficit and the Federal budget on the other hand. The question is which comes first, our feelings or budgetary necessity?

The PRESIDING OFFICER. Who yields time?

Mr. ARMSTRONG. Mr. President, will the distinguished manager yield 5 minutes to me, please?

Mr. DANFORTH. I yield 5 minutes to the Senator from Colorado.

Mr. ARMSTRONG. Mr. President, I thank the Senator from Missouri for yielding.

A decade and-a-half ago we began this great experiment in passenger railroad subsidy by the Federal Government, and if there is one thing we have shown, it is that the Government does not know how to run a railroad.

The idea was at the outset that if we appropriated $40 million for an experiment, refurbishing a few cars and getting things on track, pretty soon the passenger railroad business would be operating profitably again. That was about $8 billion ago, actually about $9 billion ago, and there is not the slightest sign that passenger railroad service in this country if subsidized by the Government will ever operate on a profitable basis, and indeed, the proponents of Amtrak have dropped that pretense altogether. They no longer even talk about the notion of getting this thing on a profitable or breakeven basis.

Mr. President, railroad passenger travel is a wonderful thing. When I was elected to Congress 12 years ago, my family and I came to Washington on the passenger train. We had my wife and I and my parents and our two kids and 17 pieces of luggage, and it took 2 days, and it was just wonderful. There is a certain ambience about traveling on the train. I have been over the country on the train. It is a marvelous experience. I recommend it.

But I do not think it makes sense for the taxpayers of this country to be required to subsidize this fine experience.

It has been argued here this morning that it is OK to subsidize passenger rail traffic because we subsidize other kinds of transportation. For example, someone said a moment ago we subsidize highway travel. It appears to me that highway travel in this country is about as close as you can get to a user-financed program as anything I can imagine because it is paid for by those who use it by the motor fuel tax.

Someone else said we subsidize airline travel, after all two-thirds of the trips are for business, and those are tax deductible items. To the extent they get a tax deduction for it, somehow, according to this logic, it means we are subsidizing air travel.

If that is true, then everything which is in some way a business expense and thereby becomes tax deductible is indirectly being subsidized by the Federal Government.

But it appears to me, Mr. President, that such a description really tortures the English language and really defies commonsense understanding of what a subsidy is.

What we are talking about is people getting on the train and paying only about a third of the cost of the trip which they are provided, and the rationale for it really has been historically threefold.

First, someday it will be profitable. We know now that is not true.

Second, that it was in some way environmentally more desirable to have train travel, and the General Accounting Office in its study of this matter has shown that is not true, either, that other forms of transportation, including intercity bus, produce less environmental pollution than does Amtrak on a per-passenger-mile basis.

So the last remaining argument in support of federally subsidized passenger rail travel is we cannot be the only nation in the world that does not have such a thing. I mean this is nostalgia.

Suppose one had been around here a few years ago when the stagecoach business was getting ready to go under and said, "Can we be the last country in the world not to have a passenger stage coach industry?"

Surely we are not going to be persuaded by such an argument. Surely there is more to the issue before us than just nostalgia, not going to be the only nation without a passenger railroad service.

In the first place, I do not think that is true. I believe the private sector will provide, in those areas of the country where it makes sense, passenger railroad service, possibly better service than we have now.

I refer to the short-haul areas like the Northeast corridor and maybe even some new areas such as San Diego to Los Angeles to San Francisco or Pueblo, CO, to Fort Collins where there is enough demand, enough traffic to support a for-profit or breakeven operation.

I can see no logic to anyone wanting to go from coast to coast at a cost even after subsidy of twice or three times what it is for an airplane ticket and take 3 days to do it other than just for the sheer pleasure of it, just the sheer experience of the scenery. I do not think Congress should be in the business of paying for that kind of experience.

Finally, Mr. President, we are told that we do not want to leave these communities without other forms of transportation, and there are just not many such communities. I do not believe there is one community in this country—I may be proven wrong on this—but I will bet there is not one community in this country where travelers would be seriously inconvenienced by the lack of Amtrak's service because of the ready availability of highways, intercity motorbuses, and commercial airline service.

Now, we have been told that there are 29 cities that do not have buses

that do have Amtrak. Do you want to know what some of these are? Rockville, MD, is one of them. Rockville, MD, for heaven's sake, has been cited as an example of a city where travelers will be stranded. This is preposterous, I say to my friends.

I am not opposed to passenger railroad service. In some areas it makes sense and where it does private enterprises will provide it.

In closing, Mr. President, let me say that I should disclose my own adverse interest. Amtrak runs right through the heart of my State. In fact, it cuts through Colorado in two places. Passengers in my area benefit from the service. But I just cannot see that it makes sense for people in Mississippi and Alabama and Minnesota and Pennsylvania, and wherever it might be, to pay for this experience for passengers from Lamar or Pueblo who use this service ought to be paying for it. Therefore, I hope this amendment will be rejected.

The PRESIDING OFFICER. Who yields time?

Mr. SPECTER. Mr. President, I yield 5 minutes to the distinguished Senator from Delaware.

Mr. BIDEN. Mr. President, the matter we have before us—the proposed elimination of Amtrak—is a wide-reaching and ruinous proposal built on a weak foundation. The proposal is part of a budget package that does little to try and distribute the effects of spending reduction in anything approaching an equitable manner. In fact, including this proposal in a budget reduction plan appears to be a contradiction.

Ending Amtrak will scrap a huge investment the government just made in the transportation network of this country, and require sizable payments to displaced employees over the next 6 years. There has to be a better way to reduce the deficit than to waste a brand new rail system, incurring huge liabilities for the next 6 years to boot.

I find it hard to believe the administration fully understands the impact the elimination of Amtrak would have on the country. Does it make sense to invest $3 billion in railroad track and equipment, and then give it up for nothing? Does it make sense to include a proposal that will be devastating to many manufacturers in the Northeast as part of a package that is supposed to promote economic activity? Does it make sense to get rid of a transportation means that helps relieve highways and airports that are already overcrowded? While we are supposed to be engaged in deficit reduction actions, does it make sense to consider a proposal that will increase the deficit by more than $2 billion during the next 6 years, and leave our country worse off than when we started?

The administration claims that much of the $3 billion investment could be recovered through the sale of Northeast corridor track and facilities. Frankly, I don't believe this, and I would like to know if there is anyone who has contacted the administration about the possibility of buying the Northeast corridor for that amount, or any amount at all. Even the Heritage Foundation backs away from the assertion that there is a buyer willing to pay $3 billion for Amtrak property. Instead, their report on this proposal states that it makes sense—believe it or not—to "sell that part of the system at a tiny fraction of its book value—or even give it away." Goodbye $3 billion in investments.

This also raises questions about Amtrak liabilities to its employees. Contracts Amtrak inherited from private rail service companies could require over $2 billion in labor protection payments. The adminstration has a neat answer to this problem—it's not their responsibility, it's Amtrak's. Balancing the budget would be a snap if this trick could be used more often. The only hitch is that it probably wouldn't stand up in court. So the Government will have to pay $2 billion over the next 5 years to close down Amtrak, and get nothing in return.

With just these two factors, the Government will have spent over $5 billion on the hope that someone in the private sector will be willing to run a passenger railroad. I don't think this goal is likely to be achieved. Ending Amtrak means taking a multibillion investment, throwing it onto the trash heap, with no passenger train service—private or public—to show for it.

Let me emphasize this last point, which seems to be the subject of some confusion—privately owned rail passenger service is not going to reappear out of Amtrak's grave. Once we close the books on Amtrak, that's it, no more intercity travel by rail in this country. The obstacles to reestablishing national rail service would be too much for anyone to overcome. The agreements that Amtrak has worked out with freight railroad companies could not be replicated. The magic of the marketplace would not be enough to dispell the logistical and legal details that would have to be addressed for rail service to reappear under new ownership.

An end to Amtrak will have an economic impact that goes far beyond rail passengers that are suddenly stranded. Freight railroads—Conrail in particular—use the Northeast corridor lines for a sizable part of their traffic. Making a rather dangerous assumption that the Amtrak-owned line is available after October 1, rail freight users will see their shipping costs jump by as much as $125 million as they are forced to pay a higher share of operating expenses along the corridor.

Actually, I think they would be lucky to get away with just a price increase. A more likely scenario is that they would have no service at all because the Amtrak lines—the only ones that serve many factories in the region—would be tied up in bankruptcy court.

Rail travelers in the Northeast and elsewhere are also expected to find alternative means to get around, presumably the highways or the airlines. I think everyone in this body already knows how overcrowded these choices are. A reasonable response would be to expand these facilities to accommodate more users, but this is a very costly response. The end result is that in 3 to 5 years we end up spending billions because of a decision this year that we wanted to save millions. The lasting deficit reduction goal we had hoped for is wiped out.

Finally, I remember a little less than 2 years ago when Congress had to make some changes in the railroad retirement system because of an imbalance between funds coming in and funds going out. Changes made in the system took into account that there would be some reduction in railroad employment in the future, but not a shock to the system that an end to Amtrak would cause. Serious problems will result in lower unemployment and health benefits to all railroad employees, and the retirement account will be reduced by about $4 billion by 1990. Something would have to give, and it would probably be a combination of another increase in taxes on employees and the railroads, and cuts in retirement benefits. Again, the effects of Amtrak's elimination would ripple through the economy, causing problems that could be avoided.

The Office of Management and Budget has painted a pretty picture of a nation barely noticing when Amtrak ceases to exist. No cost, everyone is still able to get where they want with no problem. It's fairy-tale stuff. It's the end of long distance rail transportation in this country. It's throwing away all the progress Amtrak has made in recent years in improving it's cost recovery, improvements that have cut Federal expenditures for the system by 26 percent since 1981.

Mr. President, cutting the deficit to the extent that the economy demands will require many painful choices to be made. Our responsibility is to distribute those cuts in as equitable manner as possible. The deficit is not going to be eliminated in 1 year, that much is a foregone conclusion. We will be here next year at this same time, working on another deficit reduction package, trying to make further cuts in Federal spending.

This is going to be a long, hard fight, and the only way we are going to succeed at it is, first, to get everyone in

the country involved. Americans have made it clear they will accept cuts in their programs as long as there is a sense of equity to the reductions. When everyone shares, I believe the deficit will be reduced, but more importantly, it will stay reduced. However, an unbalanced attack on Federal programs will only boomerang after several years, with no net progress to show after years of work.

The second ingredient for success in cutting the Federal deficit is that it take a long-term approach. The steps we take today must be consistent with the goals we set for this country 5 and 10 years from now. It does none of us any good to cut programs now that are needed for economic growth in the future, or to throw away investments we have made in the past that are worth keeping. There is a need to cut the Federal budget and deficit this year, next year, and to continue these efforts for years after that. The vital point to remember during budget considerations is that cutting the budget is not an end in itself: we are cutting it to promote economic growth for the long-term. We should not shoot ourselves in the foot by haphazardly cutting or eliminating spending that will come back to haunt us in later years.

An idea that has been questioned by the administration's own Secretary of Transportation; a proposal that is backed by dubious numbers and faulty reasoning; a recommendation that claims to reduce the deficit, but will actually waste billions of dollars—this is the type of budget action Congress has to avoid if it is going to bring the deficit under control in a way that is meaningful and does not have effects we are going to seriously regret in the future.

If the past is any indication, there should be no doubt that further efficiencies will be made in Amtrak's operations, and Federal assistance will decline even further. The best course of action, using any standard of measurement—the deficit, performance records, long-term economic effects—is to continue Amtrak operations. I urge my colleagues to support the national Amtrak system.

Mr. President, let me just speak for a moment about what seems to be a creeping regionalism in this body that I find fascinating. I find my distinguished friend from Colorado, with whom I agree on a number of fiscal matters, asking the rhetorical question, and I suspect my friend from Missouri asked a similar question, although I was not here, and that is: Why should the people of Mississippi pay for the train in Colorado and why should the people from Arkansas pay for passenger service in New York, and so on and so forth?

Well, we really have a fascinating thing that is beginning to develop here. I wonder why the people in Delaware pay for the water that my friends in the Southwest drink? Why in the heck should we do that? Why do they not pay for their own water the way we pay for our water? Why are we going out and subsidizing that glass of water that you drink, when you sit and sip water in Phoenix, AZ, and New Mexico and parts of arid, parched Colorado, as beautiful as it is? Why do we do that silly, old thing? Why are we subsidizing that?

Well, you all do not want us to ride passenger rail service in the Northeast, particularly in the Northeast, which is vital, critical, and essential to our well-being, our fiscal well-being. It is not just the problem of being able to see the grandeur of Delaware as you ride on Amtrak. It is a simple problem. As Amtrak goes, so do many of those systems that move people in and out of the cities of our major Northeastern megalopolis cities.

Now, I really am beginning to wonder whether or not we are seven regions or one country. I am so sick of hearing "Why should the people of * * *." I mean, 4 years ago, we heard, when LAWTON CHILES was asking for help for the Mariel boat lift responsibility that was dropped on Florida, we heard people saying, "Why should we help the people of Florida?"

I will tell you why. We are Americans. That is why we should help. A real simple reason. We are Americans.

The people of Delaware had as much responsibility for the Cubans who Castro dumped on our shores as the Floridians had. The people of Colorado have as much responsibility for making sure the major cities of the Northeast function as we in the Northeast have to see that you all out in Colorado have water to drink and irrigation for those farms that we subsidize.

You do not subsidize my farmers. Why in the heck should I subsidize yours? Why should I ask the taxpayers of Delaware to do that? Because I am an American, that is why.

We have a President engendering this notion that we are somehow seven different nations. If I live in Florida, I have different problems than if I live in Delaware. If I live in Arizona, I have different problems than if I live in Missouri. Thank God I live in Delaware and not those other wonderful places.

But the fact of the matter is I think this whole notion of going into everything we do is destructive to the fabric of this Nation.

Now, if there is waste in Amtrak, then, fine, let us go after the waste. I am not arguing against that notion. And you may assume it is all waste, like I think the notion of seeing to it that we guaranteed that the folks in the Hoover Dam area get their electricity at outrageously low and subsidized rates compared to what we pay in Delaware. I think we should clean that up. I think we should go over the waste and the fraud and the abuse and so on and so forth.

But, quite frankly, everybody keeps talking about passenger rail service that works on its own. Now, I may be wrong—and it will not be the first time I will have been wrong on this floor when I have spoken—But I am not aware of any passenger rail service on a nationwide basis in any country that makes money. I am not aware of any system that provides for drinking water for the entire country that makes money.

What are we?

I ask my friend from Colorado, why should my mother, in Wilmington, DE, subsidize your farmer in Colorado, who gets Government subsidized water to irrigate his fields? I would like the Senator to answer that, if he would be willing to do so.

The PRESIDING OFFICER. The time of the Senator from Delaware has expired.

Mr. BIDEN. I ask unanimous consent that my friend from Pennsylvania would yield me 3 more minutes.

Mr. SPECTER. I yield 3 more minutes to the Senator from Delaware.

Mr. ARMSTRONG. Mr. President, I will respond to the Senator from Delaware that our positions are not as far apart as he might imagine. I certainly think he is correct in pointing out that there is a national interest to be served.

He mentioned the concerns of Floridians about the influx of Cubans and asked would the same logic which I have suggested with respect to Amtrak apply to the situation of the refugees of Cuba. I did not think so. I think that was a national problem, and so I voted, as did the majority of Senators, to fund that.

Mr. BIDEN. Mr. President, I only have 3 minutes. I ask the Senator: Is it a national problem to see to it that the people of Philadelphia can get in and out of that city with a mass transit system? Is that a national problem or just a Philly problem?

Mr. ARMSTRONG. That is a part of a service which I am confident—Philadelphia to New York and Philadelphia to Washington—would be provided by the private sector.

Mr. BIDEN. Since I only have about a minute left, I am confident that in later debate I will point out, hopefully, if we have time, that they could not do it that way. But let us leave that alone.

Again, though, I still want to make this point and reiterate the point time and again. I just want you all to remember that we are all in this thing together.

My friend from Missouri is asking for things that affect Missouri that Delawareans should not have to pay

for on the logic being applied to Amtrak. But we should pay, because the logic we should apply here is how do we make a better and healthier Nation.

I would point out to my friend from Colorado—and I only mention him so much because he is the only one I have heard so far because I was in a committee hearing—I point out to him that it is not merely that we subsidize from a tax side those folks who fly on planes, but my friend from Missouri is going to have to figure out how many new air traffic controllers the Federal Government pays when the Northeast corridor is gone. He is going to have to figure out how many new towers we build, how much more money we put in runways, how much more money we put in subsidizing traffic patterns of those airports.

Mr. ARMSTRONG. Will the Senator yield for a question?

Mr. BIDEN. Yes.

Mr. ARMSTRONG. Why should we subsidize the air traffic? Why should not the people who fly on the airplanes pay for it?

Mr. BIDEN. Why should not the farmers in Colorado who, in fact, irrigate their fields, pay for their own water?

Mr. ARMSTRONG. I think that is a reasonable proposition.

Mr. BIDEN. Good. I want the record to show that the Senator from Colorado believes that the farmers of Colorado should pay all the costs of the water for irrigation. Is that correct?

Mr. ARMSTRONG. Mr. President, it is my view that unless you are talking about a national situation, such as was in Florida, or unless you are talking about real hardship cases where people are simply too poor to be able to do so, that those who benefit from a service should pay for it.

Mr. BIDEN. Let me ask the question.

Mr. ARMSTRONG. That is true whether you are discussing passengers on railroads or airplanes.

Mr. BIDEN. How about farmers irrigating their fields in Colorado?

Mr. ARMSTRONG. Colorado or anyplace else.

Mr. BIDEN. I will introduce an amendment shortly that will in fact see to it that all moneys for irrigation anywhere in this country be——

The PRESIDING OFFICER. The gentleman's time has expired.

Mr. BIDEN. Thank you very much. I thank the President, and I thank my colleagues for yielding.

Mr. HEINZ. Mr. President, it should come as no surprise to anyone in this Chamber that I rise in support of my colleague's amendment to add sufficient funds to the pending budget to restore 90 percent of Amtrak's subsidy. I have consistently stated my belief that this body should not—indeed cannot—reduce the deficit by terminating the Federal Government's aid to Amtrak.

The administration's proposal to eliminate 100 percent of the Amtrak subsidy is a proposal to eliminate Amtrak itself—and eliminating Amtrak is a very expensive proposition. The labor protection costs resulting from the collapse of Amtrak would cost the Federal Government $2.1 billion alone. The various other legal and administrative nightmares associated with bankruptcy guarantee that the total cost to the Government would climb vastly higher. Without subjecting this body to a detailed account of the true costs involved in the administration's proposal, I will go on record as predicting that abolishing Amtrak would, in the final analysis, cost the Federal Government much more than it would save.

Eliminating 100 percent of Amtrak's subsidy doesn't make sense from a business standpoint, but you don't have to be an accountant to support continued funding for rail passenger service. Transportation experts, public officials, and regular citizens have all stated their belief that Amtrak should be given sufficient funding to guarantee its survival.

Transportation experts deplore the administration's Amtrak elimination because they know that, once abolished, this Nation's rail passenger system can never be resurrected. Public officials oppose the move because they believe that Government has an obligation to do for the people what the people cannot do for themselves, and that long-distance rail transportation is an area of human commerce especially deserving of Government support. Regular citizens decry the cut because the existence of a sound intercity rail passenger system is essential to the conduct of their lives.

Mr. President, I do not mean to imply that Amtrak should not be required to make some contribution to the deficit-reduction effort we have undertaken; these are fiscally grim times and everybody must shoulder a portion of the burden. However, the President's proposal to cut 100 percent of Amtrak's budget is simply unfair and unwise. I think many of my colleagues will agree that the measure proposed here today by Senator SPECTER—a 10-percent cut—is a much more reasoned and well-balanced approach. My colleague's amendment will allow us to achieve badly needed budget savings without bringing about the collapse of one of this country's most important assets. Senator SPECTER'S amendment has been greeted warmly by important and diverse sectors of our society, and makes sense from every point of view. I urge my colleagues to support this worthy measure.

Mr. ANDREWS. Mr. President, I rise in support of the Senator's amendment which restores 90-percent funding for Amtrak. To completely eliminate funding for the National Railroad Passenger Corporation, as the President has proposed, ignores the commendable progress that Amtrak has made in reducing costs. It would be one thing if Amtrak had not or could not meet the performance and standard goals set by Congress.

Amtrak, however, has met or exceeded those congressionally mandated revenue/loss criteria. In addition, Amtrak now receives less subsidy—$684 million—than it did 4 years ago. In real terms, since 1981, Amtrak has had a 27-percent reduction in funds provided. If other programs had done as well as Amtrak, we wouldn't have the $200 billion deficits that we face today.

The elimination of Amtrak funds is not a "savings." The cut ignores the fact that Amtrak's labor provisions alone would cost approximately $600 million in fiscal year 1986. That means the taxpayers invest $600 million and receive no service for that investment.

Furthermore, dismantling Amtrak means that we turn our backs on the investment already made on the system. Mr. President, these are capital investments that are now paying dividends.

Finally, this abrupt cut breaks faith with those States and localities which invested their funds to fix stations and make other capital investments to attract Amtrak and its passengers.

Now Mr. President, the administration would have Congress believe that miraculously, on October 1, various entities will pick up certain elements of Amtrak service. I would like to inform my colleagues that the subcommittee has looked into this claim and, to date, there are no takers. Even if one or two States desired to pick up service, the time for legislatures to consider and fund this action is all too short.

Also, the Administrator of the Federal Aviation Administration has testified that the additional 17,500 daily passengers in the already congested Northeast corridor could not be absorbed without great difficulty and considerable additional expense. Anyone who has been stalled in traffic around Washington and New York knows that our highways are not the answer either.

Beyond the Northeast, the administration's funding cut will deprive hundreds of communities who rely on Amtrak service. In the final analysis, Mr. President, what kind of national transportation system will we have when we drop passenger rail service, and leave communities already hard hit by aviation and bus deregulation no real alternative.

Zero funding for Amtrak is not reversible—you cannot easily restart a system that has served over 21,000 em-

ployees and had a fire sale on its 3 billion dollars' worth of equipment.

I have and will continue to diligently review Amtrak's operations as chairman of the Transportation Subcommittee on Appropriations. They will not get one penny more than they need or deserve—but they certainly deserve more than that proposed by the administration—so without hesitation I support the amendment of my good friend and colleague, Senator SPECTER.

Mr. WALLOP. Mr. President, today, I rise in complete support of one very positive provision in the Senate-White House Deficit Reduction Agreement. I am referring to the proposal, that would terminate the Federal Government's subsidy to the National Railroad Passenger Corporation, commonly known as Amtrak.

Some of my friends in the Senate may reall that this is not the first time this Senator from Wyoming has spoken out against continuing the wasteful use of every good American's hard earned money through the Amtrak sieve. On July 15, 1983, virtually the same day Amtrak went thundering out of the prairies of Wyoming, for what is considered a more picturesque view of the Colorado Rocky Mountains, I successfully offered an amendment to the fiscal year 1984 Department of Transportation appropriations bill reducing Amtrak's subsidy by $1.6 million—or the amount Mr. Graham Claytor, Jr., President of Amtrak, claimed the Corporation would save by terminating its service to my State.

My purpose for lending support to this portion of the budget package, as it was during the Appropriations process almost 2 years ago, is to insure that the Federal Government is not only fiscally responsible, but fiscally reasonable. With deficits hovering around the $200 billion mark, this country can no longer afford the luxury of bankrolling a so-called national passenger train that does not come close to serving the rail passenger needs of every State in this Nation. A glance at their route map will show several totally blank States with nonexisting service including Wyoming, Oklahoma, and South Dakota.

Mr. President, when Amtrak abandoned Wyoming almost 2 years ago, it left the State without any passenger train service for the first time in about 100 years. Yet, Wyoming taxpayers have been forced to maintain Amtrak service to other parts of the country for several years now, and I believe that's far too long to pay a public service that is truly not public.

And, making the situation even more insulting, Mr. President, is that while Amtrak left southern Wyoming because it considered our prairies and grasslands not as spectacular as the Colorado Rockies, the same train—the California Zephyr that used to stop and pick up passengers—still streaks through the State not braking or slowing down for man nor beast within our borders. This situation has occurred primarily as a result of unsafe track conditions on the Denver and Rio Grande line through Colorado. As of April 17, the Zephyr has been rerouted 27 times over Wyoming's safer Union Pacific tracks because of mud slides, snow slides, high water, or track washouts.

Not only does this situtation raise concerns about safety conditions of the present route, but it causes me to question how much extra money it really costs Amtrak to reroute the train through Wyoming while simultaneously busing passengers to points in Colorado made inaccessible by Mother Nature. These continuing circumstances seem to illustrate that perhaps a permanent bus route along this stretch would be much safer and a far more economical way to proceed.

Our National Treasury simply cannot afford to underwrite this cushy, well-padded transportation welfare program. More importantly, how can the Federal Government justify to the American people any financial support for the passenger arm of the railroad industry, Amtrak, while it extricates itself from the freight business through the pending $1.2 billion sale of Conrail? Why should the Federal Government continue to support a corporation that has been unable to make a profit in 14 years?

Truly, we should have sold our interest in Amtrak many years ago, had Congress been able to muster the courage, we could have put close to over a decade's worth of Amtrak subsidies, or $10 billion, toward a deficit downpayment. It simply no longer makes fiscal sense to keep handing out $60 subsidy checks to encourage the traveling public to take the train.

Our Nation's transportation system, especially our railroad network, will not collapse without Amtrak. If anything, the traveling public, and perhaps a few enterprising businessmen and businesswomen, would become interested in pursuing more creative and probably more profitable ways of supplying a similar service, or even relying on other modes of transportation such as car, bus, or plane. America can survive without Amtrak. Let us start connecting the bright light at the end of the tunnel with deficit reduction efforts instead of speeding Amtrak locomotives.

AMTRAK MUST BE RETAINED

Mr. PELL. Mr. President, I am happy to join in cosponsoring Senator SPECTER's amendment to restore funding for Amtrak at a 10-percent reduction from the fiscal year 1985 level. This represents a reasonable cutback in Federal spending, and one which Amtrak has indicated it can tolerate, while still preserving the system and its basic service. I urge the Senate to approve the amendment.

With all due respect to the administration's intentions for trimming the deficit, I do believe that in the case of Amtrak its spokesmen have become entrapped in their own rhetoric. The Amtrak subsidy represents a miniscule seven one hundredths of 1 percent of the Federal budget. But the administration's spokesmen have become so intent on making Amtrak the symbol of their designs that they have failed to answer all the essential questions raised by their proposal.

They have failed, most of all, to tell us where Amtrak's 20 million passengers would go if the system were to shut down next October 1. It is not enough to say that we should give each of them a $35 airline ticket. If the displaced passengers were to turn to the airlines, it would cause unmanageable congestion, adding nearly a million passengers a year to National Airport alone. And if they were to turn to the highways, as most of them probably would, the result would be unimaginable chaos, particularly in the Northeast corridor on a snowy day.

The administration spokesmen have likewise failed to take account of statutorily mandated labor protection agreements, the settlement of which would wipe out any savings realized by a partial shutdown, and which in the case of a total shutdown would consume the value of the liquidated assets of the system.

And they have failed to give any consideration at all to the secondary impacts of a shutdown, particularly in the Northeast corridor, where Amtrak maintains the right-of-way and operates signal, dispatching and tower operations not only for its own trains but for other users of the tracks, including commuter services in Maryland, New Jersey, and Pennsylvania, and the freight traffic of Conrail, the Delaware and Hudson system and the Providence and Worcester railroad in New England.

These secondary users presently pay Amtrak some $53 million in fees for these services, but if they had to pick up Amtrak's share of the costs, the net additional cost would be $164 million, which could be a crippling blow to some if not all of the users. One consequence which has received scant consideration is the impact on Conrail, which would have to pick up some $82 million of the additional costs. It seems quite possible that these added annual costs may effect the dynamics of the proposed sale of Conrail to the Norfolk and Sourthern Railroad, to which the administration is so firmly committed.

In Rhode Island, we have a unique situation, also apparently disregarded by the administration, in which $25

million in prior Federal investment in railroad relocation would in all probability be wasted if Amtrak were to be shut down. The project involves the virtual reconstruction of the heart of downtown Providence, and its centerpiece is the relocation of Amtrak's main line from an elevated loop that has long separated the business district from the statehouse to a new below-grade right-of-way, serviced by a new railroad station.

Rhode Island's commitment to this landmark project was based on the good-faith assumption that Federal support of Amtrak service could reasonably be expected to continue. It would indeed be an ironic and wasteful turn of events if that support should now be abruptly withdrawn just as the project is drawing to completion. In this connection, Mr. President, I ask unanimous consent that a letter from the Capitol Center Commission and a resolution of the Rhode Island General Assembly be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

THE CAPITAL CENTER COMMISSION,
Providence, RI, April 26, 1985.

Senator CLAIBORNE DEB. PELL,
Russell Senate Office Building,
Washington, DC.

DEAR SENATOR PELL: The Capital Center Project, as you are well aware, is well underway. Representing the single largest construction project in the history of the state of Rhode Island, it never would have occurred were it not for the significant contribution of the Federal Railroad Administration acting on behalf of the National Railroad Passenger Service Corporation (Amtrak). In their efforts to upgrade the entire northeast corridor, which serves points between Washington and Boston, the city of Providence was the beneficiary of a contribution of over $25 million to the construction of the aforementioned Capital Center Project. The Federal Railroad Administration's contribution funds the relocation of the railroad tracks and the construction of the new railroad station here in Providence.

The present Administration's plans to eliminate the subsidy to Amtrak is the cause for grave concern to the Capital Center Commission. It is important to note that the northeast corridor provides over 40 percent of the revenues which Amtrak realizes annually, and thus utilizes a significantly less percentage of the subsidy presently provided. If in fact some cutback in subsidies is deemed to be essential, it is our hope that an equitable formula will be established so that the northeast corridor may continue to operate at its current levels of service.

Needless to say, it would appear to be indeed ironical if the new railroad station, which is at a 70 percent completion stage, were not to receive the utilization anticipated when this unique construction project/economic development opportunity for the state of Rhode Island was first envisioned.

Sincerely,

ALFRED H. JOSLIN,
Chairman.
CHARLENE B. HALL,
Executive Director.

HOUSE RESOLUTION MEMORIALIZING CONGRESS TO MAINTAIN AT ITS CURRENT LEVEL FEDERAL FUNDING TO AMTRAK

Whereas, President Reagan's proposed budget cuts include the elimination of federal subsidies to Amtrak; and

Whereas, According to the Chief Executive Officer of Amtrak, the loss of federal subsidies would virtually shut down the passenger train system and would lead to high federal costs due to expensive labor settlements; now, therefore, be it

Resolved, That this house of representatives of the state of Rhode Island and Providence Plantations hereby memorializes Congress to maintain at its current level federal funding to Amtrak; and be it further

Resolved, That the secretary of state be and she hereby is authorized and directed to transmit a duly certified copy of this resolution to the Rhode Island delegation in the United States Congress.

Mr. PELL. Mr. President, it seems to me that the administration's failure to take account of so many significant adverse consequences of its proposal with respect to Amtrak simply demonstrates that the proposal is ill-considered and short-sighted in the extreme. For this reason I urge the approval of the Specter amendment.

For the longer range, I believe we are reaching a point where the continuity of rail passenger service as an integral part of our national transportation system should be affirmed as a matter of national policy. Amtrak should not be put on the block every time the Budget Director needs to save a few dollars. We should be prepared to reexamine our expectations as to the economic self-sufficiency of rail passenger service, particularly in view of the fact that virtually all industrialized nations subsidize such service as a matter of course. A rational, integrated transportation policy might well provide regular funding from dedicated sources, such as taxes on fuel used by less cost effective forms of transportaion.

We should keep these possibilities in mind, I believe, as we vote today, hopefully to keep Amtrak in business for the immediate future. Beyond that, there's got to be a better way to run the railroad.

Mr. ARMSTRONG. Mr. President, if the 15 years of Amtrak experience proved anything, it is not only the futility of expecting rail passenger service to be an important transportation mode, but the senselessness of using taxpayer dollars in an effort to make such a system profitable.

Congress thought rail passenger service might still be viable when it created the National Rail Passenger Corporation in 1970. At the time, many railroads had or were proposing to end rail passenger service because the decades of declining ridership had produced an unprofitable situation. At the turn of the decade, trains carried 95 percent of all intercity traffic. Except for the blips during World War I and World War II, it has been all downhill. In 1920, trains still carried 77 percent of all intercity passengers. However, 1936 was the last year trains were able to carry passengers profitably. By 1950, ridership on trains was only 5.6 percent of intercity traffic and today Amtrak carries only three-tenths of 1 percent of intercity traffic.

As a result of this steady decline, many railroads proposed abandonment of such service and after often-heated public hearings, these trains began to slowly disappear from the picture. So Congress rode to the rescue with a Federal subsidy program designed to save the passenger trains. The intent was that with some seed money from Congress to update the system, a new passenger train network could be built which would be self-supporting.

In fact, the original law explicity provides that "the corporation shall be operated and managed as a for-profit corporation."

The intent of Congress in establishing Amtrak was very clear.

One influential Congressman, in announcing his support for the Amtrak bill, said,

It is entirely possible that an alert, imaginative program, thoroughly promoted and publicized, can recreate an acceptable image for railroad passenger travel, and bring this mode of transportation back into profitable use.

One of the original cosponsors of the Amtrak bill reiterated the intent.

Hopefully, new developments in high speed rail technology will enable the National Rail Passenger Corporation to eventually become solvent, and the initial seed money from the Federal government is a worthwhile investment to enable us to find out if rail passenger service can be self-sustaining.

In the Senate, one of the four sponsors of the bill warned at great length against continued operating subsidies. And with those understandings, the bill passed the Senate 78–3, and passed the House by voice vote.

Like so many things in Washington, the promise far outshone the performance. Amtrak has lost money every year of its existence and the cost to the Federal Government has grown 20-fold annually. The total cost of the program to date has been $12.5 billion and another $8 billion is expected to be spent over the next decade. Yet, despite this tremendous amount of money being spent to help a private company provide rail passenger service, less people ride Amtrak today than did even 5 years ago.

One would think Congress could recognize a turkey when it saw one, but as incredible as it may seem, Congress continues to use the taxpayers' money to operate Amtrak.

The budget process provides the appropriate process to reevaluate the need for Amtrak subsidies since it allows us to look at all our national priorities and determine how to allo-

cate our resources. This is especially important considering the predictions of Federal budget deficits in excess of $200 billion.

The subsidy for Amtrak is the largest subsidy for any transportation mode whether the numbers are compared in total funds received, total funds per passenger, or total funds per passenger mile.

In 1984, according to the Congressional Budget Office, essentially all of the net Federal subsidy for intercity passenger service went toward Amtrak.

It must also be understood that while just about all transportation assistance is provided through fees or taxes paid by the users of the transportation mode, Amtrak stands as an exception that is wholly funded directly out of the general revenue fund of the U.S. Treasury that all citizens pay into.

Next, it should be understood that the amount that autos and airplanes pay into their trust funds is greater than the total amount they receive from the Federal Government, according to the latest figures from the Congressional Budget Office. Buses receive a small subsidy equivalent to two-tenths of 1 percent. The subsidy for Amtrak is 17 cents per passenger mile, or 23 cents if improvements on the Northeast corridor are included. This means the Amtrak subsidy is 85 times greater than that for buses.

With the Federal appropriations for Amtrak equaling about $700 million last year and Amtrak providing just under 20 million passenger trips, this means the taxpayers paid on the average $35 dollars for every Amtrak ticket.

Amtrak boasts that it covered 56 percent of its operating costs last year, but it actually covered only 50 percent of its total costs. On some routes operated by Amtrak, it covers only 13 percent of its costs.

Amtrak supporters note how the system has cut its annual appropriations from nearly $900 million in 1981 to a little less than $700 million today and asks why the system is being punished just at the time it was beginning to show improvement. Amtrak should be commended for these improvements, but this does not mean Amtrak makes sense. Most of the reductions have come because of congressional requirements that Amtrak end its least efficient routes. It still requires a $700 million a year subsidy to operate and there is little chance for significantly reducing this amount given the labor intensiveness of a system with labor costs two to three times those of bus and airway systems, high equipment and maintenance costs, little ability to raise fares or increase ridership and the difficulty of Amtrak expanding services without incurring greater costs.

In comparison to the oft-quoted $35 subsidy taxpayers assume for each Amtrak passenger, Amtrak supporters contend the Federal Government is providing an equivalent subsidy per passenger for the airlines. They base this on tax deductions businesses receive for business trips, the use of industrial development bonds to construct airports, and Treasury funds used to finance air traffic control.

First, tax deductions for business travel is not a transportation subsidy. The tax break goes to businesses, not transportation modes. This tax deduction is available for all aspects of business travel including meals, lodging, and so forth. Next, Amtrak has calculated the value of the business tax deduction incorrectly by assuming that all businesses are corporations taxed at the 46-percent corporate rate. Amtrak's numbers do not distinguish among the types of businesses, such as partnerships, that have lower tax rates, and thus receive less benefit from a tax break. Finally, the user determines which mode he will travel on. So, if the person does not choose Amtrak, it is not because one mode is being unfairly subsidized, but that Amtrak does not offer the best means of getting from one place to the next. But 40 percent of Amtrak's riders in the Northeast corridor are business travelers, so this is a tax break available to a substantial number of Amtrak riders.

Second, industrial development bonds are also not specific to any one transportation mode. The use of development bonds involves a decision by local authorities for a project whether it be transportation or not and, if transportation, whether the community wants a new airport or a rail station, or other facility. Again, it is misleading to assume that since $1 billion in bonds were issued by local communities that this represents the value of the subsidy. The tax break to the purchaser of the bond is the extent of the subsidy and it is three hundredieth the value of the bond, according to the Congressional Budget Office.

Last, about half of air traffic control funds are paid out of General Treasury revenues. In aggregate, however, air systems pay more in Federal funds than they receive in Federal expenditures. There are enough funds in the aviation trust fund to assume the full costs of air traffic control and it is only because Congress has decided to distribute the money otherwise that some funds have come out of general revenues. This year's budget assumes the full cost of operating air traffic control for commercial and general aviation will be paid out of the trust funds.

Amtrak supporters also have released numbers to show that road systems received $13.5 billion in non-user fee assistance in 1983. About $11 billion of this is attributed to State and local governments, which has nothing to do with the debate on Federal assistance for Amtrak, and it is certainly not for us to decide how a State or locality will raise its revenues. The remaining $2 billion is attributed to the Federal Government. The bulk of this is general revenue funds used to construct roads. Again, this involves a local decision, but the budget will also end this program in a couple of years. The remainder is roads built in national forests, which the logging companies actually pay for. Finally, a portion of Federal funds are used to construct roads in national parks and on Indian reservations.

The amount of Federal assistance is certainly an important factor, but the mere fact that large sums are spent does not mean the cost is unjustified. We have to assess this cost in terms of Amtrak's role as a national transportation system.

The most telling fact in this regard lies in Amtrak's meager ridership that comprises only three hundredieth of 1 percent of all intercity passenger trips. A little less than 20 million trips are attributed to Amtrak ridership each year, but even this overstates the case, since it includes the many people who commute every day. As already pointed out, this cost per passenger is unparalleled.

Since Amtrak clearly is not the transportation mode that makes America tick, one has to discern whether it fills a particularly important niche in our transportation network that could not otherwise be met.

One contention of Amtrak supporters is to point out cities that do not have alternative transportation. First, it should be pointed out that Amtrak serves only 500 communities across the Nation, while bus service is available in nearly 10,000 communities. A recent list published by Amtrak says that out of its 500 stops, 130 have no air service, 53 have no bus service, and 29 are served by neither. To begin, it should be pointed out that all these cities and towns are accessible by car. Some have no commercial air service, but do have airports. This is the case for the six stops listed in Colorado without air service.

In regard to alternative bus service, the Amtrak list has been scrutinized and found that most of the towns listed without alternative bus service are near towns that do or are part of a larger metropolitan area served by buses. In fact, only four stops are farther than 30 miles from a bus stop. Three of these are within 35 miles of bus stops and the combined population of the four towns is less than 3,000. Finally, the American Bus Association has pledged to provide "adequate, alternative bus transportation" to fill any gaps should Amtrak service

end. I have attached a list at the end of my remarks listing the alternative bus service at the 82 stops Amtrak claims there is no alternative service.

Not only is bus service available to just about every community served by Amtrak, but the bus serves those communities more frequently than Amtrak. In Colorado, for instance, the bus is 16 times more frequent than Amtrak at their similar stops. In Montana, buses are 26 times more frequent; in Arizona, 32 times more, and in Texas, 74 times. Even in the more densely populated areas, the bus stops more often than Amtrak; in California, the bus is nine times more frequent than Amtrak; Illinois, four times more frequent; Pennsylvania, 13 times more frequent; Massachusetts, 10 times; and in New Jersey and New York, the bus is three times as frequent at Amtrak.

Amtrak, however, tries to assert that bus service is somehow complementary to Amtrak and not competitive, as though bus service would somehow disappear if Amtrak service ended. This directly overlooks the 1979 General Accounting Office finding that "there is little question that subsidized Amtrak service has attracted customers that would have otherwise ridden buses." Bus service has declined 10 percent since Amtrak began, and this is particularly detrimental to rural America, since bus is the most important means of public transportation between communities in rural areas. Even in the Northeast corridor, bus service has declined 46 percent since Amtrak started serving the area. In some cases, bus routes have been developed to complement Amtrak, but this is only to survive, since Amtrak's predatory pricing policies have made many routes unprofitable and put many bus companies out of business. The evidence, then, shows Amtrak has hurt bus service, and ending of Amtrak would more than likely increase bus service.

Another Amtrak argument to continue its subsidy relies on the belief that highway and air traffic will become uncontrollably congested in the Northeast corridor. In the portion of the corridor from Washington, DC to New York, over 17,000 trips are taken on Amtrak daily. This seems like a lot, but it should be noted that only 2,700 travel the full distance from New York to Washington, DC. Most are commuters from outlying suburbs into the large cities of Philadelphia, New York, Washington, DC and Baltimore. According to Amtrak's own surveys on the Northeast corridor, 32 percent of the passengers would go by bus if rail service were terminated. This means 100 buses will be needed to carry 5,500 people; 48 percent will go by car or 8,400 people; and 16 percent or 2,800 would go by plane. For air travel, there are currently 2 million extra seats on flights in the Northeast corridor.

To put this in relation to current traffic, 3 million people daily use the roads to get into New York City. Even if all the Amtrak passengers in the corridor were included, their presence would hardly be noticed. The fact is, though, these people are spread throughout the corridor at all the different cities and traveling at different times.

Amtrak also believes its subsidy is justified because it currently covers the bulk of the costs on certain lines in the Northeast corridor that local commuter lines also use, but pay only marginal costs. First, Congress should not fund the National Rail Passenger Corporation as a guise for subsidizing local transit systems. Second, if these local commuter trains are that valuable, then local, State, or regional governments can assume the cost. Amtrak estimates the increased cost to these local lines at $162 million, but half of this amount would have to be assumed by Conrail. Transportation Secretary Dole, in testimony before a House subcommittee, stated that Norfolk Southern understands that as a nonnegotiable part of its purchase of Conrail, it will have to assume this cost.

It would seem then from a cost and purely transportation aspect, Amtrak does not serve a need. But there are still other factors to be considered. Maybe Amtrak is not the least costly or the most efficient or most important transportation mode in the country, but maybe it is helping to provide economic opportunity to the poor, transporting people in an environmentally less damaging manner, helping conserve scarce energy, or assisting in our national defense efforts. Amtrak's supporters would have you believe Amtrak achieves all these laudable objectives.

It is not difficult to view a sleak, rapidly moving train with no exhaust trailing it as the futuristic answer to pollution control. But it is better to view Amtrak in terms of what it does and does not emit as a system and compare that to other modes. The Environmental Protection Agency has forecast pollutants from the different transportation modes for 1990 and found that Amtrak is more environmentally sound only if one compares the amount of carbon monoxide and particulants it puts into the air compared to the auto. In the amount of hydrocarbons, nitrous oxide, and sulfur dioxide, Amtrak is a larger polluter than the automobile. In comparison to the bus and the airplane, Amtrak is a greater polluter in all five categories.

Another proposition is to tout Amtrak as the solution to a future energy crisis. Instead of driving to work and consuming gasoline, we will all just hop into the nearest train at anyone of the conveniently located 500 stops nationwide. This proposition was exposed for what it was when President Carter's Transportation Secretary Brock Adams declared Amtrak an "energy waster." DOT at that time had found Amtrak to be three times less energy-efficient than the bus. To consider rail passenger service an energy-efficient mode is to ignore basic facts about the inherent inability of a rail system to transport people in an energy-efficient manner. Freight trains are efficient because they can carry weight three times the weight of the car trains. A passenger train, on the other hand, has one ton for every passenger even on a train full of passengers. A bus, then, that needs less than ⅓ of a ton to haul each passenger, naturally has the ability to haul people with less energy in most instances.

One instance where Amtrak has proven efficient is the Northeast corridor when, according to the Congressional Budget Office, Amtrak is compared to all the alternative transportation modes, it saves the equivalent of 3½ pints per passenger mile. On all other routes, Amtrak loses 3½ gallons. The system as a whole is a net energy loser, and last year, Amtrak resulted in the additional consumption of 2,000 barrels of oil per day.

If we are to judge Amtrak in terms of energy conservation, we must look at what Amtrak can achieve in this area in comparison to other ways to achieve energy conservation. Amtrak may be able to take advantage of improvements in rail technology and greater use of electrical energy based on nuclear or coal sources to operate trains in the Northeast corridor, but the Congressional Budget Office has found that these savings will represent less than one-hundredth of 1 percent of the Nation's petroleum needs. For each barrel of petroleum saved through improvements to Amtrak, the cost will be $395, and this compares to only $20 that will be required to achieve the same savings by improving automobile efficiency. It is interesting to note that during the energy crisis period from 1974 to 1979, Amtrak did not improve its energy efficiency while the automobile did.

When Amtrak fails to appeal to our sentiments for the environment or dependence on oil imports, its backers raise the flag, bring back memories of World War II and declare its trains will be there to transport the troops when the alarm sounds. They overlook, however, that since WW II, we have built the world's finest air and road systems, in part to diversify and improve our internal transportation network to facilitate rapid mobilization during a time of war. That is why our Nation's highway system bears the

name "National System of Interstate and Defense Highways."

The Amtrak system plays neither a vital role in our defense preparedness, nor does it serve any particular need or do its tracks follow a particularly vital route. Amtrak follows the same routes as freight trains and the quality of those tracks reflect the needs of freight trains, not those of Amtrak. Amtrak has upgraded some tracks to improve tracks for the purpose of making rail passenger service quicker or safer, but they are not improvements that make the system better at transporting troops or equipment during war.

The Department of Defense has identified the tracks in the Nation that are vital to defense, and of these, one-third are on low volume branch lines, but Amtrak's operations are not a factor in the continuation of these lines.

When the surge of nationalism has passed, Amtrak swoops down to the poor and elderly and claims that its service has made travel affordable to the poor. This is a most curious argument, since Amtrak ridership is conspicuously not directed toward low-income persons. According to the Census Bureau, 51 percent of Amtrak's riders have incomes in excess of $30,000 and only 10 percent have incomes below $10,000. This compares with the national averages of 21 percent of the population with income under $10,000 and 37 percent with incomes over $30,000. Twenty percent of bus riders, however, have incomes below $10,000. The medium income of Amtrak riders is $18,000, which is higher than any other mode. The average income of a bus rider is $13,000.

The income disparity between modes is most apparent on the Northeast corridor where 58 percent of the passengers had incomes over $30,000 and where Amtrak's president recently admitted before the Senate Transportation Appropriations Subcommittee that Northeast corridor passengers are "generally orientated toward business."

Of particular importance in regard to rail's ability to help the poor, is the conclusion reached in the 1982 CBO study that "If transportation subsidies are to be channeled specifically toward low-income people, aiding intercity bus service would be more effective than aid to Amtrak."

In regard to other groups that might be considered disadvantaged besides low-income persons, Amtrak again has a conspicuously poor record in relation to the bus, its closest competitor. Intercity buses carry more persons over 65 years of age—13 percent compared to Amtrak's 7 percent; twice the number of persons under 18—36 percent compared to 18 percent of Amtrak's riders; more blacks—20 percent compared to 15 percent for Amtrak; more Hispanics—5 percent compared to 1 percent for Amtrak; 35 percent of bus riders do not have a high school education, and 43 percent do not have college degrees compared to 20 percent and 30 percent of Amtrak's passengers who do not have high school degrees or college degrees respectively; and finally, 60 percent of bus passengers are female compared to 50 percent for Amtrak.

One of the more recent arguments for Amtrak is the number of jobs that would be lost if Amtrak service terminated and the liability this would be for the Government. It's too bad no one ever asked in the beginning how many jobs might be lost in the bus or other industries by subsidizing Amtrak. Jobs lost in the bus industry have no opportunity to receive Federal severance pay and already, 5,000 jobs have been lost in the bus industry since Amtrak's inception. The American Bus Association predicts 25,000 more jobs may be lost if Amtrak continues. Looking in a broader perspective, a standard assumption is to assume that one job is created for every $40,000 to $100,000 of capital invested. Then, if one calculates that the total cost of Amtrak to society by including Federal assistance and the opportunity cost if those funds had been invested in other ways at $17 billion, Amtrak has resulted in the loss of 150,000 to 400,000 jobs.

Nor are the labor protection agreements Amtrak has signed with its employees a liability of the Federal Government. Amtrak is a private corporation, not a Federal entity. This was restated recently by the Supreme Court in National Railroad Passenger Corporation versus Atchison, Topeka, and Santa Fe Railway Co., which said the "Act expressly established the Rail Passenger Corporation as a non-Government entity." Labor protection costs would be funded out of the court-supervised liquidation of assets in full or in part. Congress may decide that the Federal Government has an obligation to protect Amtrak's employee as it has done in recent years for several other railroads. In any event, this is a matter for Congress to decide. If it chooses to do so, Amtrak's liabilities will most likely by one-sixth what they are now. Even if the total costs are $2.1 billion, as Amtrak suggests, it is a one-time expense and far less than paying for Amtrak for each year forever and forever.

Well, at this point, one would think that no reason exists that could possibly rationalize Amtrak's existence. But Amtrak's supporters leave no stone unturned and when it is abundantly clear that Amtrak serves no overriding purpose, Amtrak's supporters say we need it because the Japanese and Europeans have rail passenger systems. Why we should have the need for a rail passenger system just because Japan does is difficult enough to explain, but the rational is even more flimsy when one looks at the transportation needs of Japan, Europe, and the United States. Europe and Japan are smaller areas with denser populations and none of the vast distances with few people like the United States. European cities and regions have not been built uniquely for the use of the car. The roads, except in Germany, are of poorer quality. Auto ownership is below U.S. levels and it has never become the basic transportation mode of the average family. And all those systems run at a loss that must be assumed by the taxpayers in Europe and Japan.

In summary, Amtrak serves no vital purpose, so it's not surprising so few people ride it or that it has never made money. What is surprising is that Congress ever thought it would. The system is in trouble for the same reason stagecoach lines would be in trouble if earlier Congresses has subsidized them in perpetuity—time and technology have passed them by. Since the Model T began to make cars affordable, trains have steadily declined in their usefulness for most Americans. Since 1956, when the first transcontinental jet flight was completed—which is the same year Congress authorized the Interstate Highway System—trains have simply become obsolete for most Americans. And passengers deserted the trains just as quickly as they had deserted stagecoaches generations before. But rather than let technological advances take their course, Congress tried to reverse the inevitable.

As one observer noted, "People like to watch trains but they don't like to ride them, so Amtrak is not providing a system of transportation but a form of kinetic art."

Mr. President, I ask unanimous consent to have printed in the RECORD several editorials and related tables.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the Rocky Mountain News, May 1, 1985]

AMTRAK'S A PICKPOCKET

Indiana Gov. Robert Orr recently told a House subcommittee it is "fanciful" to believe the states will help pay for Amtrak should the government's passenger rail system lose its federal subsidy.

Orr's words carry weight. He's President Reagan's appointee to the Amtrak board representing the nation's governors.

Transportation Secretary Elizabeth Dole had more bad news for Amtrak when she told the same subcommittee that chances of private interests buying into the system are slim to none.

Congress is considering the question since the Reagan administration has proposed ending Amtrak's subsidies. The Carter and Ford administrations also sought to reduce them.

And no wonder. Ridership has fallen in recent years while costs have escalated. The subsidy, at last tally, came to $60 per passenger, which means it would be cheaper for the government to hand out free airplane tickets to some destinations.

Amtrak fans used to argue that a government-run rail system would provide an alternative to the private automobile, thereby conserving energy and reducing environmental pollution. But studies seem to have derailed even these claims.

Finally, they said low-cost passenger trains would increase the mobility of poor people who could not otherwise pay full fare. That has never been convicing, since bus tickets have almost always been less expensive than Amtrak's. On top of that, the Congressional Budget Office estimates that Amtrak travelers tend to have above-average incomes.

Even so, no one has ever explained why the government ought to be in the personal transportation business in the first place, even if it could manage to run the system at a profit.

As it stands, we're not only losing money but doing so by taking it out of the pockets of the poor and middle-income so a relative few of their better-paid neighbors can enjoy the "grandeur" and "gracious service" of travel-by-rail. That's a luxury that is hard to justify.

[From the Chicago Tribune, Feb. 24, 1985]

LEAVE AMTRAK AT THE STATION

(By Stephen Chapman)

Americans have a sentimental attachment to trains. Once the hated symbol of industrialization, they now nourish memories of a simpler age. But nostalgia has no place in the federal budget, particularly when it has a $180 billion deficit, which means Amtrak has no place. Ronald Reagan is the first president to acknowledge that.

Past budgets have trimmed the outlay for Amtrak, the federally financed passenger railroad; this one simply removes it. Reagan would get the federal government out of transporting rail passengers once and for all.

Amtrak's chief function is to illustrate why federal spending is so hard to cut. It adds little to the nation's transportation system, while extracting a handsome subsidy from taxpayers. Few Americans would suffer if Amtrak shut down tomorrow.

But neither do they notice its cost. At $684 million in 1985, it is dwarfed by more expensive programs. Given Amtrak's value as pork barrel, plus the drawbacks of antagonizing the fanatical minority of train buffs, most members of Congress see the possible savings as insignificant.

What do taxpayers get for their dollars? Not much. Only one in 50 travelers takes the train, and they account for just one-third of one percent of all intercity passenger miles. Small wonder: Trains combine the disadvantages of cars [like slowness] with those of airplanes [fixed schedules, lack of privacy].

Amtrak was originally supposed to turn a profit. In fact, since its creation in 1971, the corporation has lost nearly $9 billion. The Office of Management and Budget figures that, left alone, it will lose another $8 billion in the next decade. Amtrak's revenues cover just 52 percent of its costs. Taxpayers cover the rest.

Railroad fans retort that other types of transportation get federal help, too. Indeed they do. Washington provides funds for airport construction and air traffic control, besides helping to pay for the highways used by buses and cars.

But there's a difference. Airlines pay the entire cost of the federal aid, and then some, out of an 8 percent tax on every ticket sold. The airlines subsidize the federal government, not the other way around.

Drivers likewise pay more than their way, through the federal gasoline tax. Though intercity buses and exempt from fuel taxes and from the heavy vehicle tax, the aid is trivial.

A comparison of federal aid isn't flattering to Amtrack. Richard Mudge of the Congressional Budget Office says buses get a federal subsidy of two-tenths of one cent per passenger-mile. Private cars and airlines pay back more than they take. Amtrak gets about 17 cents per passenger-mile. The federal government thus spends 85 times more to transport someone a given distance by train than by bus.

OMB points out that in many cases it would be cheaper to buy all the passengers plane tickets that to run the trains. On the New York-Boston route, Amtrak spends $43 to dissuade travelers from buying a $19 airplane ticket.

Amtrak says the claimed budget savings is illusory, because if it shuts down it will owe $2.1 billion over the next six years to laid-off workers. But it has capital assets that could be sold to defray the cost, and in any case it would cost less to pay off Amtrak's contracts than to keep the trains running.

In some places, particularly the Boston-to-Washington line, passenger trains make a certain amount of sense. On that route, they actually turn an operating profit. Amtrak might operate these trains, along with a few others, even without federal help. If not, some private entrepreneur might take them over. Any service lost would be service that travelers don't want or aren't willing to pay for.

Whatever the cost in nostalgia, that's as it should be. If Congress can't muster the nerve to cut a program as wasteful as this one, it can't hope to contain spending. In an age of fiscal austerity, the traditional charity toward Amtrak is as obsolete as a steam locomotive.

[From the New York Times, Feb. 27, 1985]

THE AMTRAK WORTH SAVING

The Reagan Administration wants to eliminate subsidies for Amtrak, which this year totaled $684 million. That is harsh medicine. But in a time of budgetary restraint, subsidies for the little-used intercity rail service have become increasingly hard to defend.

Happily, the withdrawal of Federal aid does not have to mean the end of passenger service in the densely traveled corridors where trains are really needed. Indeed, once Amtrak is freed of the political baggage that comes with Government subsidies, it might flourish.

Amtrak was created by Congress in 1970 to halt the rapid decline in passenger rail service. It did save the intercity trains and, in time, dramatically improved service. But the turnaround did not come cheaply. About $10 billion has been spent to rebuild and run the sprawling transcontinental system. This year, about $4 in operating subsidies will be needed to match every $6 earned from tickets.

Many reasons have been offered for continuing this subsidy; few bear scrutiny. Contrary to claims by Amtrak's friends, competing transportation systems receive little or no subsidy. Private cars, intercity buses and airlines all pay their own way through taxes and user fees.

Poor people don't depend on Amtrak because they can't afford to travel much. And when they do travel, it's usually by bus. Trains do save energy, but only on a few heavily used corridors and only at exorbitant cost per barrel saved. Train travel is undeniably more romantic or fun, but it's hard to see why this form of recreation should be favored by taxpayers.

The one plausible rationale for subsidy is that train service reduces congestion in densely traveled, short-haul routes like Boston-Washington and Los Angeles-San Diego. Fortunately, these are also the routes that now consume the lowest subsidies per passenger mile. And there's real hope that, left on its own, Amtrak could turn small losses into healthy profits.

Like any public beggar, Amtrak's first priority has always been pleasing Congress. That has locked the railroad into hopelessly unprofitable routes and forced its management to accept overmanning and 19th-century work rules.

Amtrak would probably turn a profit if Congress were to end the subsidies but free the railroad of the obligations to serve hundreds of small towns and to guarantee its workers cushy lifetime jobs. Some experts believe there is so much potential for good rail service that the Boston-Washington corridor could support several unregulated, unsubsidized competitors.

Four years ago Congress gave Conrail, the money-hemorrhaging freight railroad, the choice of shaping up or breaking up. Today a smaller, more productive Conrail is making a profit. It's time, past time, to try the same strategy with Amtrak.

AMTRAK

Amtrak has furnished a list of points that would be without bus or air service which are currently served only by Amtrak. The list follows with comments by each:

1. Berlin, CT—2,000 Pop. Suburb of New Britian with plenty of bus service.

2. Mystic, CT—5,650 Pop. 10 miles from New London with abundant bus service.

3. Northhaven, CT—22,080 Pop. Suburb of New Haven with abundant bus service.

4. Old Saybrook, CT—2,281 Pop. No bus station, but on Greyhound's New London-New Haven route with 14 trips daily.

5. Thompsonville, CT—Pop. not in Rand McNally, but, just 2 miles west of Hartford-Springfield, MA routes with about 40 bus schedules daily.

6. Wallingford, CT— 37,274 Pop. Between Meriden and New Haven with service by Trailways, Greyhound and the Arrow Line.

7. Windson, CT—16,100 Pop. Just off main Hartford-Springfield, MA route which has about 40 buses daily.

8. Windsor Locks, CT—12,190 Pop. Just off main Hartford-Springfield, MA route which has about 40 buses daily.

9. Wildwood, FL—2,665 Pop. 9 miles from Leesburg with multiple daily service by Trailways and Greyhound.

10. Toccoa, GA—9,104 Pop. 9 miles from Hollywood, GA with daily bus service by American Trailways of Georgia.

11. Carlinville, IL—5,439 Pop. 10 miles from Springfield, IL—St. Louis route with multiple daily bus schedules.

12. Kewanee, IL—14,508 Pop. 11 miles off Chicago-Moline route with multiple daily bus service.

13. Alton, IL—34,171 Pop. Suburb of St. Louis, MO.

14. Chillicothe, IL—6,176 Pop. 15 miles from Peoria with abundant bus service.
15. Glenview, IL—30,842 Pop.[1]
16. Ind. Harbor, IN [1]
17. Dyer, IN—9,555 Pop.[1]
18. Whiting, IN—5,630 Pop.[1]
19. Wheeler, IN—600 Pop.[1]
20. Rensselaer, IN—4,944 Pop. Has bus station and Greyhound service several times daily.
21. Creston, IA—8,429 Pop. 28 miles from Osecola, IA with multiple daily service by Greyhound.
22. Maysville, KY—7,983 Pop. Across river bridge from Aberdeen, OH with 6 Greyhound trips daily.
23. South Portsmouth, KY—550 Pop. Across river bridge from Portsmouth, OH with multiple daily Greyhound service.
24. Schriever, LA—500 Pop. Greyhound goes through there every day, Guide Table 430 between Houma and Thibodaux.
25. Brunswick, MD—4,572 Pop. 13 miles to Frederick which is served by Greyhound.
26. Gaithersburg, MD—26,424 Pop. Bedroom community for Washington, DC with subway service 2 miles from Gaithersburg (at Shady Grove).
27. Rockville, MD—43,811 Pop. Bedroom community for Washington, DC with subway service.
28. Bangor, MI—2,001 Pop. 19 miles to Paw Paw which is served by Indian Trails.
29. West Quincy, MO—Pop. not shown in Rand McNally. 2 miles west of Quincy, IL which Trailways Lines, Inc. and Burlington Trailways service.
30. Browning, MT—1,226 Pop. 35 miles west of Cut Bank, MT which is served by Intermountain Transportation Co.
31. Belton, MT—Pop. not shown in Rand McNally. Approximately 55 miles west of Cut Bank, MT which is served by Intermountain Transportation Co. and approximately 50 miles east of Whitefish which is served by Brown Lines, Inc.
32. Metro Park, NJ—Pop. not shown in Rand McNally. In New Brunswick Metroplex—9 miles from downtown, plenty of bus service.
33. Croton-on-Hudson—6,889 Pop. 4 miles to Ossinging which is served by Leprachaun Lines.
34. Rhinecliff, NY—Pop. not shown in Rand McNally. 5 miles to Rhinebeck which is served by Hudson Transit Line (Short Line).
35. Rye, NY—15,083 Pop. 9 miles to New Rochelle which is served by Adirondack Trailways and Greyhound.
36. Fort Edward, NY—3,661 Pop. 4 miles to Glen Falls which is served by Adirondack Trailways and Greyhound.
37. Ft. Ticonderoga NY—Pop. not shown in Rand McNally. 22 miles to Schroon Lake which is served by Adirondack Trailways and Greyhound.
38. Port Henry, NY—1,450 Pop. 23 miles to Elizabethtown which is served by Greyhound.
39. Port Kent, NY—Pop. not shown in Rand McNally. Plattsburg, NY—21,057 Pop. served by Greyhound.
40. Willsboro, NY—950 Pop. 12 miles from Keeseville which is served by Greyhound.
41. Westport, NY—Pop. not shown in Rand McNally. 9 miles to Elizabethtown which is served by Greyhound.
42. Bryan, OH—7,879 Pop. 17 miles to Defiance which is served by Greyhound.

[1] All five are in Chicago-Hammond-Gray-Metro Area.

43. Crestline, OH—5,406 Pop. 9 miles to Mansfield which is served by Greyhound and Trailways Lines, Inc.
44. Hinkle, OR (Pendleton, OR)—14,521 Pop. Hinkle does not show on the map but is near Pendleton which is served by Greyhound.
45. Parkersburg, PA—2,578 Pop. 5 miles from Coatsville which is served by Greyhound.
46. Ardmore, PA—13,600 Pop. 7 miles to downtown Philadelphia, which is served by Capitol Trailways of Pennsylvania, Carl Bieber, Inc. Carolina, Trailways, Greyhound, Martz Trailways, New Jersey Transit, Trailways Lines, Inc.
47. Bryn Mawr, PA—9.500 Pop. 9 miles to downtown Philadelphia which is served by Capitol Trailways of Pennsylvania, Carl Bieber, Inc., Carolina Trailways, Greyhound, Martz Trailways, New Jersey Transit, Trailways Lines, Inc.
48. Connellsville, PA—10,319 Pop. 10 miles to Uniontown which is served by Greyhound.
49. Elizabethtown, PA—8,233 Pop. 17 miles to downtown Lancaster which is served by Greyhound and Trailways.
50. Huntingdon, PA—7,042 Pop. 17 miles to Tyrone which is served by Fullington Trailways and Greyhound.
51. KcKeesport, PA—31,012 Pop. 12 miles to Monroeville and 14 miles to downtown Pittsburgh. Both Cities are served by Blue & White, Fullington Trailways, Greyhound, Trailways and Pittsburgh is also served by Butler Motor, Grove City Bus Line and Lincoln Coach.
52. Middletown, PA—10,122 Pop. 14 miles to downtown Harrisburg which is served by Capitol Trailways of Pennsylvania, Fullington Trailways, Greyhound, and Trailways Lines, Inc.
53. Mt. Joy, PA—5,680 Pop. 11 miles to downtown Lancaster which is served by Greyhound and Trailways Lines, Inc.
54. Malvern, PA—2,999 Pop. 7 miles to King of Prussia, 14 miles to downtown Philadelphia. Both cities are served are by Capitol Trailways of Pennsylvania, Greyhound, Trailways Lines, Inc. Philadelphia is also served by Carolina Trailways, Carl Bieber, Inc., Martz Trailways, Jersey Transit and Trailways Lines, Inc.
55. Overbrook, PA—Pop. not shown in Rand McNally. Suburb of Philadelphia, 9 minutes on Amtrak at 5:44 AM only.
56. Paoli, PA—6,100 Pop. 5 miles to King of Prussia and 19 miles to Philidelphia. Both cities are served by Capitol of Pennsylvania, Greyhound and Trailways Lines, Inc. Philadelphia is also served by Carolina Trailways, Carl Bieber, Inc., Martz Trailways, New Jersey Transit and Trailways Lines, Inc.
57. Whitford, PA—Pop. not shown in Rand McNally. 8 miles from Coatsville, PA with Greyhound service.
58. Wayne, PA—8,900 Pop. 4 miles to King of Prussia, 14 miles to Philadelphia. Both cities are served by Capitol of Pennsylvania, Greyhound and Trailways Lines, Inc. Philadelphia is also served by Carolina Trailways, Carl Bieber, Inc., Martz Trailways, New Jersey Transit and Trailways Lines, Inc.
59. East Greenwich, RI—10,211 Pop. 14 miles from downtown Providence which is served by Arrow Line, Blue & Grey, Bonanza Bus, Brander Bus, and Greyhound.
60. Westerly, RI—Pop. not shown in Rand McNally. 20 miles from downtown New London which is served by Greyhound.
61. Clemson, SC—8,118 Pop. 18 miles from downtown Anderson which is served by Greyhound and Trailways Lines, Inc.
62. Cache Jct., UT—Pop. not shown in Rand McNally. Approximately 10 miles west of Smithfield which Greyhound serves daily.
63. Milford/Cedar City, UT—1,304 Pop. Greyhound and Trailways both serve Cedar City.
64. Delta, UT—1,610 Pop. 49 miles southwest of Nephi and 35 miles morthwest of Fillmore. Greyhound serves Nephi and Fillmore—Trailways serves Nephi.
65. Thompson, UT/Moab, UT—4,793 Pop. 7 miles east of Crescent Junction which is served by Trailways. Trailways also serves Moab, UT.
66. Essex Junction, VT—7,077 Pop. 6 miles from downtown Burlington which is served by Greyhound and Vermont Transit.
67. Lee Hall, VA—500 Pop. 9 miles from downtown Williamsburg and 11 miles from downtown Newport News which are both served by Carolina Trailways and Greyhound.
68. Monroe, VA—400 Pop. 6 miles from downtown Lynchburg—this is the "rail yard" for Lynchburg.
69. Manassas, VA—15,438 Pop. 7 miles from Centreville which is served by Trailways Lines, Inc.
70. Edmonds, WA—27,526 Pop. 12 miles north of downtown Seattle and 13 miles south of downtown Everett. Greyhound and Evergreen Trailways operate between Seattle and Everett through Edmonds in I-5.
71. East Olympia, WA—Pop. not shown in Rand McNally. Suburb of Olympia, WA which is served by Greyhound, Trailways and Gray's Harbor Transportation.
72. Bingen, WA—644 Pop./White Salmon, WA—1,853 Pop. 3 miles north of Hood River, OR which Greyhound serves with 9 daily schedules on I-84.
73. Harpers Ferry, WV—361 Pop. 18 miles from downtown Frederick, MD which is served by Greyhound.
74. Alderson, WV—1,375 Pop. 19 miles from Lewisburg which is served by Greyhound.
75. Hinton, WV—4,622 Pop. 25 miles from Beckley which is served by Greyhound.
76. Martinsburg, WV—13,063 Pop. 20 miles from Hagerstown, MD which is served by Greyhound.
77. Prince, WV—Pop. not shown in Rand McNally. Seasonal summer stop on Amtrak—10 miles from Beckley which is served by Greyhound.
78. Thurmond, WV—Pop. not shown in Rand McNally. 23 miles from Beckley which is served by Greyhound.
79. Sturtevant, WI—4,130 Pop. 7 miles from downtown Racine, WI which is served by Greyhound, Royal Coach and Wisconsin Coach.

Mr. QUAYLE. Mr. President, I support the Specter amendment which calls for a funding level for Amtrak at 90 percent of the current rate over a 3-year period.

We all know that the future of Amtrak is at stake in the serious discussion we are now having on ways to reduce our deficit. I would have preferred a gradual reduction in the Amtrak subsidy over time, but I cannot accept zero funding for Amtrak in one fell swoop as the administration has suggested.

I am suggesting that we put Amtrak on notice that while Congress will support a modest 10-percent reduction in fiscal year 1986, we must also set a realistic timetable for future reductions. In the long run, Amtrak should receive no more subsidy than other modes of transportation: No more than we give the airlines through the air traffice control system and support of airports, or the bus companies through support of highways.

Congress should not only adopt Amtrak's own legislative package, but also additional measures to reduce costs and increase revenues. We must take off the financial burdens placed on the system by Federal legislation. Labor costs, such as benefits for laid-off employees, should not be mandated by statute, but should be negotiated as they are in the truly private sector.

Just like Chrysler, Amtrak must examine all its operations and revamp its system. Those who benefit from Amtrak must partake in rebuilding its future: Passengers must pay economic fares; employees must accept economic wages; management must adopt aggressive policies to generate sufficient revenues.

The Rail Passenger Service Act of 1981 directed Amtrak to enter into agreements with the private sector and undertake initiatives which are consistent with good business practices, designed to maximize revenues and minimize Federal subsidies. It is important to note Amtrak's accomplishments in this regard, particularly the efforts at Beech Grove, IN, where a modernized facility and skilled work force have allowed Amtrak to pursue outside contracts that generate additional revenues. This is the type of initiative that Amtrak must be encouraged to pursue.

I believe that Amtrak has made significant progress, but there is still clearly room for progress. I believe that Amtrak will survive with the proposals I am suggesting. I believe it is important to give Amtrak the tools needed to achieve self-sufficiency without unnecessary impediments.

Mr. CHAFEE. Mr. President, I am pleased to join Senator SPECTER in offering this amendment which restores funding for Amtrak at 10 percent less than the fiscal year 1985 level.

The leadership budget package eliminates funding for Amtrak. This amendment continues funding at a level 10 percent lower than fiscal year 1985, thus adding $616 million in budget authority in fiscal year 1986 and maintaining this level in fiscal year 1987 and 1988.

Amtrak was created in 1970 with the goal of gradually becoming self sufficient. I support efforts to lessen Amtrak's reliance on Federal subsidies. However, from an economic standpoint, now is not the time to end abruptly our commitment to a national passenger rail system. The taxpayer's investment in Amtrak is finally beginning to pay off. Amtrak has become a modern, reliable, and efficient method of transportation. Operating costs have declined 26.6 percent between 1981 and 1985. Revenues are at an all-time high in an extremely competitive environment. The proportion of Amtrak costs borne by passengers has increased from 48 percent in 1978 to 58 percent today. Next year it is projected to be 60 percent. The taxpayer is getting more and better service for the money.

To terminate abruptly Amtrak service would leave the taxpayer with financial obligations in excess of the required subsidy for years. While the Government has invested $3 billion in Amtrak's modernization, any proceeds due to Amtrak's liquidation would be minimal. In addition, approximately 25,000 railroad employees in 44 States would be unemployed. Labor protection liabilities to displaced employees would approximate $2.1 billion over 6 years. The first year liabilities alone would be $684 million, equal to the total Federal outlay for operations.

Dissolution of Amtrak would pose a hardship to those who use the system regularly. Amtrak serves 500 communities and 20 million customers. In my home State of Rhode Island, total 1984 ridership was 416,287. In the Northeast corridor, elimination of Amtrak would pose serious problems for our already congested highways and airports. Ultimately, additional Federal investments would be required for airport and highway construction. Elsewhere, Amtrak may be the only reliable public transportation available. One hundred sixty-one of the communities served by Amtrak have no air service, 52 have no intercity bus service, and 29 have no air or bus service.

A passenger rail system is an integral part of our transportation network. Trains can carry more people more efficiently than any other travel mode. Trains can operate in extreme weather conditions. Trains provide an important alternative to congested highways and airports and lessen America's dependence on oil. Without Amtrak, the United States would be the only developed country in the world without intercity rail passenger service.

Support for Amtrak from the Federal Government should continue. This amendment will restore funding for Amtrak at 10 percent less than its current funding levels, in order to achieve savings and contribute to reduction of the deficit while maintaining Amtrak service.

The administration has insisted that Amtrak should be immediately abolished in order to help reduce the Federal deficit. Others seem ready to increase spending for Amtrak, ignoring the need for restraint in all segments of the budget. This amendment recognizes the need for spending restraint while preserving Amtrak service. We should do everything we can to make Amtrak eventually selfsufficient. However, the overnight termination of Amtrak would not serve the national interest.

I hope my colleagues will join in supporting this amendment.

Mr. DODD. Mr. President, I rise in strong support of the amendment being offered by the Senator from Pennsylvania [Mr. SPECTER] to provide funding for the continuation of Amtrak.

This amendment will provide funding for Amtrak in the upcoming fiscal year at a level equal to 90 percent of the current year's allocation. I want to commend my colleague for offering this proposal.

Along with the Senator from New Jersey [Mr. LAUTENBERG], I had intended to offer an amendment to freeze funding for Amtrak and several other important infrastructure programs at the fiscal year 1985 level. While I feel that our broader approach would have been a better way to proceed, I support this amendment enthusiastically as it may be our only opportunity to signal our displeasure with the absurd notion that the United States should be the only industrial country in the world without a rail passenger system.

I am prepared to support this amendment even though it incorporates a 10-percent reduction below the funding level for the current year. The enormity of the deficit problem confronting this Nation dictates that even popular and important programs must take some reductions.

Mr. President, I see no supportable reasons being put forward for the elimination of this important service. The administration would argue that all taxpayers have no business supporting an enterprise in which all taxpayers do not derive direct benefits. This notion is contrary to the nature of our governmental union and misses the essential point that we cannot divorce Amtrak or passenger rail service from a national transportation network or policy.

On economic grounds, the proposal to terminate Amtrak is shortsighted and I believe would result in a far greater future expenditure of public resources. There is the question of labor protection payment obligations were Amtrak to be abolished. In addition, the Federal Government has invested considerable resources in the infrastructure associated with Amtrak.

In conclusion, Mr. President, I want to again signal my strong support for the continuation of Amtrak funding albeit at a level which could necessitate some service reductions and deferred maintenance. Earlier this year I conducted a hearing in Stamford, CT, on the effects in my State of the administration's proposed budget for transportation programs.

The consensus from all participants was first shock that such a proposal would be offered but, most importantly, a shared recognition on the part of Government officials, business leaders, and passengers that more is at stake here than higher fares or alternative transportation accommodations. When we talk about eliminating Amtrak or other efforts which provide modest levels of support for maintenance of this Nation's infrastructure, we should have clear understanding that we are putting our own economic growth and productivity at risk. When viewed in this larger context, I am confident my colleagues will support this amendment.

Mr. D'AMATO. Mr. President, I rise in support of the amendment offered by my distinguished colleague from Pennsylvania. This amendment would both restore the Federal commitment to fund Amtrak and address our serious concern with the deficit. It provides that Amtrak will receive no increase in funding and will instead absorb a cut of 10 percent from its current level.

In order to be fiscally responsible, it is important that Amtrak, like many other Federal programs, contribute to the effort to reduce the Federal deficit. Under both the administration's budget request and the White House/Senate leadership budget package, Amtrak would have been terminated. I do not agree with either of those plans, or with the Senate Budget Committee proposal which would have made debilitating cuts in funding for our national passenger rail system. It is important to keep Amtrak alive and in accomplishing this goal, we must allow it to be healthy.

The amendment which I will vote for today, provides for a cut of $68.4 million, or 10 percent from Amtrak's fiscal year 1985 level of $684 million in Federal aid. Amtrak has indicated that such a cut would not cripple the railroad, but would certainly require belt-tightening. Amtrak, the National Passenger Rail Corp., employs more than 21,000 workers and 79 percent of its labor force, 17,000 workers, is in the Northeast-Midwest region.

The Amtrak system extends for 24,000 miles and serves more than 20 million passengers a year. On Amtrak's Northeast Corridor route from Washington, DC to New York City, Amtrak carries 47 percent more passengers, 17,500, daily than all the airlines combined. The administration has not been able to explain how all of these passengers could be accommodated by our already crowded airports and highways on this route.

Although the administration has claimed that profitable Amtrak routes could be picked up by combinations of State, local, or private entities, it has not yet met with any parties willing to do so. This budget would simply abandon Amtrak and throw away the billions of dollars of Federal investment in the passenger railroad's infrastructure and rolling stock.

Amtrak is the Nation's sixth largest passenger carrier, only Greyhound, United, Delta, Eastern, and American are larger than it. Amtrak carriers 20 million passengers per year. Although Amtrak provides service in limited markets, its termination would have a significant and, in many cases, disruptive, impact on the people who live and travel in those areas.

In fiscal year 1984 Amtrak recovered $759 million of its $1,359 million of expenses or 56 cents on each dollar. Furthermore, Amtrak is on target to achieve its goal of recovering 58 cents on the dollar in fiscal year 1985. It expects to be able to recover 60 cents on the dollar in fiscal year 1986.

OMB claims that Amtrak riders are subsidized at a cost of $35 per passenger. However, that argument fails to consider the plain fact that nearly

every other mode of transportation in this country is also subsidized. We allocate billions to build and repair our network of interstate highways and federally-aided highways in each State. In addition, we spend billions of Federal dollars to construct and maintain airport runways, other aviation facilities and sophisticated electronic improvements to the air traffic control system.

Besides paying direct Federal subsidies to other modes of transportation, the Government also provides a tax deduction for business travel which costs the Federal Government much more in lost tax revenues than Amtrak's annual subsidy. Of course, business travelers who use Amtrak also benefit from the deduction, but business travelers are encouraged by this tax provision to use more costly air travel for business purposes.

Getting rid of Amtrak is penny wise and pound foolish. Not very long ago this Nation was caught in the stranglehold of a foreign oil crisis. That was only about 10 years ago, but have we already forgotten the hard lessons learned at that time? We have now invested in a passenger rail system that provides the infrastructure to help withstand energy crises which cripple other modes of transportation. Let's not throw away the investment this Nation has made in its passenger rail system. If we do, America will be the only major industrialized nation without a national passenger railroad.

I urge my colleagues to support this amendment.

Thank you, Mr. President.

Mr. SPECTER. Mr. President, I yield 3 minutes to the distinguished Senator from Minnesota.

The PRESIDING OFFICER. The Senator from Minnesota is recognized.

Mr. DURENBERGER. Mr. President, I thank my colleague for yielding.

Mr. President. I rise in support of the Specter amendment and urge its adoption. These are difficult times no doubt, and no Federal program should be overlooked in our quest to reduce Federal spending, but the leadership's proposals to terminate Federal operating assistance for our National Rail Passenger Corporation [Amtrak] are extremely ill-advised.

The annual Federal grant to Amtrak is just as important to its future as business expense deductions are for the future of the auto, airline, and cruise ship industry. If Congress wants to try and create a national transportation policy in this year's budget resolution, then let us get to it. We can add 20 hours to the resolution and debate the merit of the tax deductibility of airfare expenses, depreciation of business automobiles and a host of other tax expenditures. But let us not kill Amtrak and think we have done this country's transportation system a favor.

If the annual payment is withdrawn, cessation of service and the immediate addition of 28,000 employees to the unemployment rolls is a certainty. And the sad thing about it is that the end of Federal payments will not reduce the deficit a bit and could have the Federal Government liable for over $2.1 billion in labor protection agreements.

Mr. President, as you know, Amtrak has been on the defensive since 1979, when President Carter sought to reduce it to a regional carrier. He almost succeeded, but Congress opposed him and he managed to salvage a national system, albeit at a sharply reduced level of funding. From a high of $1.1 billion in fiscal year 1980, Amtrak's subsidy has fallen to $680 million in fiscal year 1985.

For fiscal year 1986, Amtrak had requested the baseline figure of $680 million, a level of funding sufficient to operate the 403 (b) and (d) trains, continue capital improvements and make up for the shortfall in revenue. The President proposed terminating Amtrak, effective immediately. The Budget Committee had proposed a $480 million budget for Amtrak, a level which would require the entire system to shut down.

I believe a middle ground exists between the $480 million contained in the budget resolution and the Amtrak budget request of $680 million. And the amendment offered by the distinguished Senator from Pennsylvania is it. I think Congress could cut out the $60 million we spend on 403(b) trains or could pick up another $70 million by forcing other users of the Northeast corridor to pay a fair share of Amtrak's overhead costs, thus bringing the subsidy need down to about $610 million.

But, after a review of the facts, I think that any cuts below $610 million will cost us more than we save. The problem is that, when Congress created Amtrak, it instituted some fairly attractive labor protection agreements to induce employees to work for the company. The liability for these agreements, which cover 21,000 Amtrak employees and 4,100 employees on other railroads, exceeds $2.1 billion.

The leadership package assumes the Federal Government will not provide Amtrak with the funds to cover it liabilities. If Congress appropriates $610 million for fiscal year 1986, Amtrak could operate a national system and avoid labor protection expenses. If, however, Congress only appropriated $480 million, as the Senate Budget Committee had proposed, Amtrak would file for bankruptcy on October 1, and shut down the system.

The Budget Committee assumed that with a figure of $480 million, Amtrak would lop off all of its non-Northeast corridor trains. This would result in a nominal savings in operating losses of $392 million. However, the labor protection liability created by lopping off the routes would exceed $1 billion, with $360 million payable in the first year. With Northeast corridor costs of $250 million and labor protection costs of $360 million, Amtrak would find itself with costs $130 million over the Budget Committee figure of $480 million. Unable to meet its obligations, Amtrak would be forced to file for bankruptcy and shut down the national route system until enough of its assets were sold to make up the shortfall.

The difference between a zero budget and $480 million is that Amtrak would have to immediately auction off all of its assets and the labor protection liability would jump from $1 billion to $2.1 to $2.4 billion. Amtrak's first year liability would be $645 million, or about what it costs to run the entire national system. Its 25,000 employees would be without a job, and would have to take their $2.1 billion in statutorily mandated protection claims and join all of Amtraks other creditors in bankruptcy court. More likely than not, Amtrak would be forced by the courts to auction off its $3 billion in assets.

Unfortunately, few people are interested in rail passenger cars and the track they run on. Amtrak expects that its cars and track would be liquidated at scrap value and its stations—some of them national treasures—would be sold without regard for their historic of aesthetic value. The proceeds from a sale of Amtrak assets would fall far short of meeting Amtrak's liability to its creditors. More likely than not, the creditors would sue the Federal Government, which is Amtrak's sole stockholder.

And this is where OMR's arguments start to stink a little. The whole case for termination of subsidies rests on the premise that Amtrak, not the Government, is liable for claims against the estate. Congress created Amtrak, required it to offer employees labor protection and told the corporation which routes it had to operate over. For the Government to now turn around, decline responsibility for unfunded liabilities and tell employees and other creditors to take 15 cents on the dollar is a serious breach of faith on the Government's part.

Mr. President, I think we have opened up today one of the more interesting issues that is not going to get covered in this budget debate. That is whether or not there is in this body as we approach the budget issues any sense of national purpose.

I compliment my colleague from Delaware for finally reminding us of the fact of whether it is the Amtrak issue, refugee issue—whatever it is—

that what is totally lost in the discussion of the budget is what are we doing in the Congress of the United States? The Amtrak issue is not an issue of subsidies as much as it is an issue of a national commitment to a transportation system. I would argue with my colleague from Missouri that we even have a national transportation system in this country. I do not believe we do. I think the reality is if you ran out of interest subsidy, tax subsidy, energy subsidies, and if you ran out the way we use import quotas to run up the price of automobiles in this country, I think I would come up with a whale of a lot bigger subsidy for the automobile than he can come up with for rail passenger. But that still is not the point.

The point is in effect that the other subsidies on the other mode of transportation in this country have deprived us of a national rail passenger system that we used to have in this country. In my self-interest, I will also read into the RECORD that I have 272,134 Minnesota riders. I have a $2.1 million annual investment in my State, and 91 residents who are employed by Amtrak. But that is not why I rise on this occasion. I rise on this occasion because it gives me an opportunity to say that when we get past our concept of what is the real Washington Monument in this process, whether it is direct spending, tax spending or some other form of subsidy, maybe we will finally get down to deciding what as a nation is the responsibility of its government, whether that is budget spending, tax spending, or whatever it is. We desperately need to get to that issue. I compliment my colleague from Pennsylvania for raising it and everyone else who participated in this debate and continuing the debate that is going to go long beyond the few minutes we have here this morning.

The PRESIDING OFFICER. The Senator's 3 minutes have expired. Who yields time?

Mr. SPECTER. Mr. President, I am advised that Senator WEICKER is on his way to the floor and wishes to make a statement on this subject on the remainder of time on my side. I suggest that we give our colleague an opportunity to arrive and, if no one else wishes to speak in the interim, I suggest the absence of a quorum and make the request that it be charged——

Mr. BIDEN. Before the Senator yields, will the Senator yield for 30 seconds?

Mr. SPECTER. I do.

Mr. BIDEN. I would like to make the point that what is a national subsidy to some of us is a necessity to others and what is a national subsidy at Grand Junction, MO, is an absolute necessity to others. You watch the train go by. Look at the fields. It is the only way to get to work.

Mr. SPECTER. Mr. President, I ask the distinguished Senator from Missouri if he would be willing to allow a quorum call to run for a few moments, for 5 minutes on his time, to give Senator WEICKER an opportunity to come to the floor.

Mr. DANFORTH. Mr. President, I would very much like to accommodate the Senator from Connecticut and the Senator from Pennsylvania. I have been asked, however, by the leadership to try to expedite this amendment because time is running so short. I wonder if Senator WEICKER would put his statement in the RECORD.

Mr. CHILES. I hope we can move this forward. We have so many people on our side that are afraid they will not have time to even offer their amendments. This amendment has taken a lot more time than I ever expected it to take. We are trying to shorten everything on our side.

Mr. SPECTER. I appreciate that, Mr. President. We were supposed to go on the bill this morning at 10. We did not go on it until 10:20. We have consumed a lot of time. We have a colleague en route from a hearing which he is chairing on health and human services. I think we ought to give him a few minutes to get here. I am advised he is on his way.

The PRESIDING OFFICER (Mr. MATTINGLY). Who yields time? If no one yields time, time runs equally.

Mr. DANFORTH. Mr. President, I yield back the balance of my time.

The PRESIDING OFFICER. The Senator from Pennsylvania has 3 minutes.

Mr. SPECTER. On behalf of the Senator from Connecticut [Mr. WEICKER] who had wanted to be here but who had other commitments on health and human services, I know that he has been eloquent in his articulation of the necessity for the continuation of Amtrak. It provides vital services for his State and a vital service for the Nation. I hope that he can arrive in the intervening time to say at least a few words. I cannot understand our inability to accommodate him. But those are the rules.

By way of very brief rebuttal in the time remaining, I believe I heard the Senator from Missouri say that one quarter of 1 percent ride the system nationally, and also one quarter of 1 percent ride the system in New York. It may have been a slip of the tongue or I may have heard him incorrectly. But in fact he did say that. I think he is in gross error. There are some 58,000 passengers who ride the trains from Trenton, NJ, north to New York, and if you carry that out on a mathematical basis of one quarter of 1 percent represented by 58,000, that would be in excess of 232 million people who travel from New York City each day. I do not think that is so. On this Senate floor, we hear repetitively statistics like one quarter of 1 percent. It is amazing to me where they come from. I have grave doubts about the accuracy of that statistic, but I have no doubt whatsoever about the vital importance of Amtrak to the 20 million people who ride it each year. I think it is a fair assessment that Amtrak is an indispensable segment of the national transit system, and when the distinguished Senator from Colorado asserts that someone will pick up the transit system in the Philadelphia, PA, area, I would refer him to the authority of the Secretary of Transportation Dole, citing in the Congressional Quarterly, that "It is unlikely that anyone would want to acquire Amtrak from the private railroad system." So that if we are to keep Amtrak, this body is going to have to be resolute enough in the assessment of priorities.

I agree with the distinguished Senator from Missouri that it is a matter of priorities and a fair assessment, I would submit, on a national scale.

Mr. WEICKER. Mr. President, I rise to support the amendment before the Senate today which restores Federal funding for Amtrak. Without the Federal assistance proposed in this amendment, Amtrak will be forced to discontinue its service and the United States will be the only industrialized nation in the world without national rail passenger service.

Throughout my career, I have consistently fought for public sector participation in both coordinating and financing railroad service. As a representative in the Connecticut general assembly, I fought to establish a State transportation authority and to provide State funds for the privately owned New Haven Railroad. In the U.S. House of Representatives, I served as chairman of the Public Ground Transportation Committee and repeatedly argued for mass transit funding, as well as the establishment of a coordinated national transportation system. In 1970, when Amtrak was created, I actively fought for the Federal Government to prevent the rapid abandonment of intercity rail passenger service all across the country.

There are those in the administration and here in the U.S. Senate who will argue that the Federal Government should no longer be subsidizing intercity rail passenger service. Amtrak, or at least portions of Amtrak, they will tell you, could and should be run by the private sector. Mr. President, to rely on the private sector for rail passenger service not only ignores history but condemns us to repeating it.

By 1970, a number of railroads in the Northeast and Midwest region of the United States, including the Penn Central which operated the New Haven Railroad in Connecticut, had

declared bankruptcy. Those railroads that were not bankrupt were reporting devastating operating losses and had essentially stopped investing any money in rail and passenger care maintenance. According to the Interstate Commerce Commission, in 1969, railroads experienced a deficit of almost $225 million on passenger service. At that time, over 100 of the approximately 400 passenger trains operating throughout the United States were on the verge of discontinuing their service.

Abandonment of intercity rail passenger service was prevented when Congress passed the Rail Passenger Service Act of 1970 and authorized Amtrak to contract with private railroads to relieve them of passenger service. It is precisely because the private sector was abandoning intercity rail passenger service that Amtrak was created in the first place. We must not place the fate of such a vital service back in the hands of those who nearly caused its demise.

We also cannot and should not rely on the States to cover the cost of lost Federal subsidies. Most States cannot afford to cover the costs. Even if they could, interstate compacts, which would be essential to continue intercity rail service, are difficult to develop and maintain. In the early 1960's, it became so time consuming and difficult to get a tristate railroad compact approved by Connecticut, New York, and New Jersey, that I encouraged the Connecticut State Legislature to establish Connecticut's own transportation authority to ensure rail passenger service in our State. A tristate compact was eventually developed but it took years. It is completely unrealistic to expect that any States, given legislative calendars and the complexities involved with interstate compacts, would have any rail service compacts in place by October 1 of this year, if Federal funding for Amtrak is terminated. If we eliminate Federal funding for Amtrak, Amtrak will not be purchased by the private sector and it will not be taken over by individual States. Mr. President, Amtrak will declare bankruptcy and this country will be left without national intercity rail passenger service.

The administration argues that the American taxpayer should not have to pay a $35 subsidy per Amtrak passenger. In fact, the President has said, in some cases, it would be cheaper to provide Amtrak riders with an airline ticket. Mr. President, the Federal Government subsidizes all modes of transportation in this country. There are hidden and indirect subsidies for automobile drivers. The highway trust fund does not cover all costs related to automobile travel, such as air pollution, parking, law enforcement, emergency repairs, and others.

The revenues from airline tickets certainly do not cover the cost of air travel. When you include the general funds used for operations and the tax expenditures lost due to business expense write-offs, the Federal subsidy to air travelers is approximately $40—$5 more per person than the subsidy for Amtrak.

I do not believe, as busy and as congested as air traffic is today, that the airports and airlines can accommodate all of the Amtrak riders who would be forced to fly rather than take the train, if Amtrak should cease to exist. This is particularly true in the Northeast corridor where approximately 17,500 passengers ride Amtrak between New York and Washington, DC, everyday. Without Amtrak, former rail passengers who do not choose to fly or who cannot afford to fly will be forced to use automobiles as an alternative. I cannot understand, given the energy crisis this country faced in the 1970's, why we would discourage the operation and development of an energy efficient rail service, and, instead, force people to travel by car or airplane.

The elimination of Federal funds for Amtrak can only result in a transportation and energy disaster. It is in our national interest to develop and maintain effective, energy efficient alternatives to automobile and air travel. It is also in our national interest to maintain rail service which can provide immediate mobilization of people and supplies. Amtrak currently works with the Federal Emergency Management Administration [FEMA] and the Army logistics staff at the Pentagon to respond quickly and efficiently should Amtrak be called on to mobilize its resources.

In the past, I have argued for completely nationalizing rail passenger service. While I am not here, today, to argue for nationalizing Amtrak, I am here to urge my colleagues to support the Federal funding essential for Amtrak to continue providing national rail passenger service. When Amtrak was created by the Rail Passenger Service Act of 1970, Congress declared:

> That rail passenger service can help to end the congestion on our highways and the overcrowding of airways and airports; that the traveler in America should to the maximum extent feasible have freedom to choose the mode of travel most convenient to his needs; that to achieve these goals requires the designation of a basic national rail passenger system and the establishment of a rail passenger corporation for the purpose of providing modern, efficient, intercity rail passenger service; (and) that Federal financial assistance as well as investment capital from the private sector of the economy is needed for this purpose. . .

I urge my colleagues to support this amendment so that the national rail passenger service Congress envisioned in 1970 will not disappear in 1986.

AMTRAK

Mr. BYRD. Mr. President, rail passenger service is an essential part of our national transportation system. The Federal Government's role in transportation has long been recognized. During World War II, one area of major concern to General Eisenhower was the lack of a network of highways to reach from one end of the United States to the other on which to move troops and supplies. As a matter of fact, one of General Eisenhower's first actions when he became President was to propose the Interstate Highway System. Thus, the Interstate Highway System was established, recognizing the need for such a network as vital to the national security. Likewise, the Federal Government has recognized its role in transportation in providing support to our air traffic control system.

Just as highways and air travel are essential to our national transportation system, so is our rail system. Indeed, Congress recognized the role of the Federal Government and the importance of rail service when Amtrak was established.

Unlike other forms of transportation, Federal financial support for Amtrak has declined by 25.6 percent since fiscal year 1981; from $893.6 million 4 years ago to $684 million in fiscal year 1985. During this time, Amtrak has consistently improved its ratio of revenues to cost. In 1981 Amtrak's revenue to cost ratio was 48 percent. In 1984 it was 56 percent, and is expected to go above 60 percent in 1986.

Amtrak carries 20 million passengers per year. Many of its passengers prefer the train over all other forms of transportation; to others, the train is the only form of transportation available to them. Of the over 500 communities Amtrak serves, 29 communities have no air or bus service, 52 more communities have no bus service and it is estimated that there will be another 161 communities, which Amtrak serves, that will not have air service upon the termination of the essential air service subsidy. There are fewer and fewer affordable transportation alternatives for rural America.

Rail passenger service is a vital link in our transportation infrastructure. To disrupt rail passenger service would only hurt rural America, which has already suffered from the loss of air and bus service since the deregulation of those industries. If Amtrak service is severely curtailed, what are the alternatives? The Federal Aviation Administration recently testifed before the Senate Appropriations Subcommittee on Transportation that it had no alternative plans to deal with the influx of commuter traffic in the Northeast corridor were rail service to be disrupted. Further, the Interstate Commerce

Commission testified that it had no alternative plans, and indeed, no role in insuring bus transportation for those communities that would no longer be served by Amtrak.

I support funding for Amtrak. The amendment I offered yesterday included full funding for Amtrak. The amendment pending before us reduces funding by 10 percent. In response to questions before the Senate Appropriations Subcommittee on Transportation, Amtrak testified that it could survive and continue most of its present service with a reduction of 10 percent; however, such a reduction would virtually eliminate Amtrak's capital budget and operating and maintenance improvements designed to enhance the quality of service would have to be deferred. This amendment may not be the best approach; however, I intend to support this amendment inasmuch as it is an improvement over the funding reductions presently included in this resolution.

It is worth repeating that Amtrak serves 20 million Americans, including more than 55,000 West Virginians. I do not feel that at a time when Amtrak is making progess in recovering its costs from fares and reducing its dependence on Federal support that we should precipitously withdraw that support. To do so is shortsigthed and needlessly disruptive.

The PRESIDING OFFICER. All time has expired on the amendment.

Mr. SPECTER. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Pennsylvania. On this question, the yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. DANFORTH (when his name was called). Mr. President, on this vote, I have a live pair with the Senator from Maryland (Mr. MATHIAS). If he were present and voting, he would vote in the affirmative. If I were permited to vote, I would vote in the negative. Therefore, I withhold my vote.

Mr. SIMPSON. I announce that the Senator from Virginia [Mr. TRIBLE] and the Senator from Maryland [Mr. MATHIAS], are necessarily absent.

I also announce that the Senator from North Carolina [Mr. EAST] and the Senator from California [Mr. WILSON] are absent due to illness.

Mr. CRANSTON. I announce that the Senator from Nebraska [Mr. EXON] is absent because of illness.

The PRESIDING OFFICER. Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 53, nays 41—as follows:

[Rollcall Vote No. 53 Leg.]

YEAS—53

Andrews	Glenn	Metzenbaum
Baucus	Gore	Mitchell
Biden	Grassley	Moynihan
Bingaman	Harkin	Pell
Boren	Hart	Pryor
Bradley	Hawkins	Quayle
Bumpers	Heflin	Riegle
Burdick	Heinz	Rockefeller
Byrd	Hollings	Roth
Chafee	Inouye	Sarbanes
Chiles	Kennedy	Sasser
D'Amato	Kerry	Simon
DeConcini	Lautenberg	Specter
Dixon	Leahy	Stafford
Dodd	Levin	Warner
Durenberger	Lugar	Weicker
Eagleton	Matsunaga	Zorinsky
Ford	Melcher	

NAYS—41

Abdnor	Gramm	Murkowski
Armstrong	Hatch	Nickles
Bentsen	Hatfield	Nunn
Boschwitz	Hecht	Packwood
Cochran	Helms	Pressler
Cohen	Humphrey	Proxmire
Cranston	Johnston	Rudman
Denton	Kassebaum	Simpson
Dole	Kasten	Stennis
Domenici	Laxalt	Stevens
Evans	Long	Symms
Garn	Mattingly	Thurmond
Goldwater	McClure	Wallop
Gorton	McConnell	

PRESENT AND GIVING A LIVE PAIR, AS PREVIOUSLY RECORDED—1

Danforth, against

NOT VOTING—5

East	Mathias	Wilson
Exon	Trible	

So the amendment (No. 59) was agreed to.

Mr. SPECTER. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. BIDEN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The majority leader.

Mr. DOLE. Mr. President, I am convinced we can finish this matter today, but in order to make a final judgment we need to know how many amendments there are. We are not asking for any amendments. But if there are going to be amendments, I think we are getting down in the point where we are going to have to make some accommodation for those amendments, have very short debate and then have a vote. The votes themselves, if everybody feels compelled to offer one or two amendments, will take a long, long time.

As I indicated last evening, there are Members on both sides who have come to me saying, "How late will it be Thursday night? I have a problem." We would like to try to accommodate those Members, but I must say, if we can finish this tonight, even if it takes until midnight, we ought to get finished.

If it goes into next week, we will be on the resolution all next week and everybody will be offering amendments. So I hope that those who feel they just must offer amendments will let the managers or the leadership on each side know so that we can sequence the amendments and come back to the floor and make some announcement within the next hour of what we propose to do.

Parliamentary inquiry, Mr. President: How much time does remain?

The PRESIDING OFFICER. The majority leader has 1 hour and 8 minutes. The minority leader has 2 hours and 3 minutes.

Mr. DOLE. It is well within 5 hours that this could be completed.

I yield to the distinguished minority leader.

Mr. BYRD. Mr. President, I thank the distinguished majority leader for yielding.

We have talked earlier today about amendments, about reducing time on amendments, and about the possibility of stacking votes. So far as I am concerned, we might reach a time when the Senate will know when the last vote will occur.

My suggestion is that the distinguished majority leader propose that time on amendments, which, under the boilerplate language in the Budget Reform Act, is either 1 hour or 2 hours each, depending upon whether it is an amendment to an amendment or an amendment to the resolution—my suggestion, and I have discussed this with Mr. CHILES, is that we propose an agreement in which no amendment would take more than 30 minutes total on both sides, and there would be no yielding from time on the resolution. That may not carry, but I hope we would make such a request—no more than 30 minutes. On many of the amendments, we can talk to the offerers and get the time down to less than that.

Mr. CHILES. I say to the distinguished minority leader that if we did that, we would want some protection on our side, if they were controlling all time on the amendment on their side.

Mr. BYRD. Absolutely. It would have to be half and half.

I hope we could move the bigger amendments—if I may give them that term—first. Otherwise, we are going to get down to the end of the time and there will be no more time; and then Senators who have been waiting to call up their amendments can call them up and can have a vote, without debate, but that is not what they want.

In the interest of all Senators who have amendments, I hope we try to work in such a way as to let them have some time, also, so that they are not forced to call up their amendments and have them voted on, up or down, without debate.

I will work with the distinguished majority leader. So far as I am concerned, he could make this proposed request right now and outline it, and maybe we would want 2 minutes to run our hotlines.

I think the time is ripe. The anvil is hot. All Senators who have amendments certainly want a little time, and they will be shut out if we do not make this arrangement now.

Mr. DOLE. I thank the distinguished minority leader. I will make that request, but I think in fairness to Senators if I had just some idea, maybe I cannot hit it precisely, of how many amendments there will be, so then we would know how to divide the time.

Mr. DECONCINI. Mr. President, will the majority leader yield?

Mr. DOLE. I am happy to yield.

Mr. DECONCINI. Mr. President, I have an amendment, and I will be glad to settle for 10 minutes on each side. I do not think we will use that much.

Mr. DOMENICI. Let us get a list going.

Mr. DOLE. I will take that deal right now.

What is the amendment? I should ascertain that before I take that deal.

Mr. DECONCINI. It is a sense of the Senate on the WIC program on 1985 funding. I do not think it will take 10 minutes. We will agree now to 10 minutes on each side.

Mrs. HAWKINS. Mr. President, I have an amendment.

Mr. DOLE. Mr. President, let me suggest this. I think we can dispose of Senator DECONCINI's amendment very quickly and maybe accept it. But, as I understand, there are about 20 amendments on that side. Maybe before I propound the request we should take a look at the amendments on each side, and then following the disposition of the next amendment I will propound a request, and I hope that the next amendment will not take more than 15 minutes on a side.

Mr. HART. Mr. President, will the Senator yield?

Mr. DOLE. I yield.

Mr. HART. Mr. President, on a couple of occasions the majority leader in trying to schedule has said——

The PRESIDING OFFICER. Let there be order in the Chamber.

Mr. HART. He has said a vote on final resolution of the budget issue would depend on whether or not he felt he had the votes.

What are the prospects of going through the amendments today and staying here and working and then having the majority leader put the vote on final passage, if you will, over to next week on the grounds he does not have the votes?

I am asking that as a matter of scheduling.

Mr. DOLE. If it is very important and the Senator will give me his vote, we will be in good shape.

Mr. HART. We might have a discussion about that.

Mr. DOLE. Right.

Mr. HART. Barring that, what are the prospects?

Mr. DOLE. I would say the prospects are about 50-50. I am advised that we asked the Vice President to return to the Capitol, if that is any indication. He has been out of Washington on official business, I understand. And we also will be talking to Lisbon, Portugal.

Mr. HART. Are there votes over there?

Mr. DOLE. There is one who would have a veto.

Mr. BYRD. He will have 10 days on that.

Mr. DOLE. So I will try to accommodate the Senator by 3 p.m., but I sort of have the feeling now are going to head for final vote. That could change.

Mr. HART. I thank the leader.

Mr. BUMPERS. Mr. President, will the majority leader yield?

Mr. DOMENICI. Mr. President, if the Senator will yield for just a moment, as I understand it, the next amendment is a Cranston veterans' amendment, and perhaps shortly we can get an agreement on how long it will take.

Could I say to Senators that the distinguished majority leader has indicated he would like to arrange to accommodate amendments. It is very difficult for us to do it unless everyone is willing to get their amendments in to someone so we can start looking at them. I do not need them but someone needs them from both sides.

Could we agree that anyone who has amendments on this side who wishes to be accommodated will get them to me as soon as possible and do the Democrats want them on their side to go to the distinguished manager of the resolution or to the minority leader?

Mr. BYRD. Both.

Mr. DOMENICI. Both.

Mr. BYRD. We are working with our manager and trying to help to get the information he needs. There might be a possibility we could stack votes at some point this afternoon which would hopefully save much more time, at least 15 minutes. The rollcall votes are lasting 20 or 25 minutes.

Mr. CRANSTON. Mr. President, will the Senator yield?

Mr. DOLE. Let me yield first to the distinguished Senator from Arkansas.

Mr. BUMPERS. Mr. President, is it the majority leader's intention in the last waning minutes of this debate allowed on the resolution to offer either an amendment which is essentially a substitute? Is it the intention of the majority leader to offer a substitute, and if so why are we doing these amendments?

Mr. DOLE. That is a good question. I prefer you did not do the amendments.

They may not be in the substitute. I can tell the Senator the one we just completed is not in the substitute.

But Senators are free to offer amendments. Sooner or later we want to dispose of the amendments, and then we will offer a substitute, and that is why I think if we have an opportunity to discuss some of these amendments with the proponents they may be accommodated, or they may not be accommodated, but it would be very helpful to the Senator.

Mr. BUMPERS. It seems to me, as an observation for the majority leader, obviously as to these amendments the size of the vote, for example, is going to determine to some extent whether it goes into the final package or not.

But the other point is that if the majority leader's amendment comes up—for example, Senator BENTSEN and I want to add some money for the immunization program as we feel strongly about it, and I think the majority leader would probably accept that. But if the criteria is going to be determined on how much support there is in the Senate, Senators are going to ask for rollcall votes and try to prove the efficacy of their amendment rather than letting them be accepted.

Mr. DOLE. I say to the Senator from Arkansas, I think we can take care of the problem in the colloquy. I am referring to his amendment.

Mr. BUMPERS. I thank the majority leader.

Mr. CRANSTON. Mr. President, will the majority leader yield?

Mr. DOLE. Mr. President, I wonder if we might reach an agreement for 30 minutes on the amendment to be offered, 15 minutes on each side?

Mr. CRANSTON. I will shoot for 30 minutes. I wish to agree to 40 minutes at this time.

Mr. DOLE. Twenty minutes on each side. The Senator shoots hard.

Mr. CRANSTON. I will do my best to make it a half-hour.

Mr. MURKOWSKI. Mr. President, let us move along. I will agree to 20 minutes equally divided.

Mr. DOLE. Mr. President, I ask unanimous consent for 40 minutes equally divided, 20 minutes each side.

Mr. CRANSTON. Forty minutes, not twenty minutes.

Mr. MURKOWSKI. I think there is some confusion. I was under the impression it was an hour equally divided. We will take the reduced time. I would offer 20 minutes if my colleague, Senator CRANSTON, felt that was reasonable, a total of 40 minutes.

Mr. CRANSTON. Forty minutes apiece. I will do my best to make it 15 minutes apiece by not using it. I do not want to agree to less. I will do my best.

The PRESIDING OFFICER. Is there objection to the request.

Mr. MURKOWSKI. Mr. President, I wish to have a clarification from the Chair.

The PRESIDING OFFICER. Forty minutes equally divided.

Mr. MURKOWSKI. I thank the Chair.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from California is recognized.

AMENDMENT NO. 75

(Purpose: To adjust the budget levels and reconciliation instructions with respect to veterans' programs)

Mr. CRANSTON. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. May there be order in the Chamber.

The majority leader.

Mr. DOLE. Mr. President, I understant we have 20 minutes on each side.

The PRESIDING OFFICER. The Senator is correct.

Mr. DOLE. That does not mean we have to take the 20 minutes on our side; 5 minutes will be sufficient.

The PRESIDING OFFICER. Before the Senator from California speaks, I want the well to be cleared, and I want the staff to get to the rear of the room, and I need there to be order in the Chamber.

The Senator from California.

Mr. CRANSTON. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from California, Mr. CRANSTON, for himself, Mr. MATSUNAGA, Mr. DECONCINI, Mr. MITCHELL, Mr. ROCKEFELLER, Mr. INOUYE, Mr. SARBANES, Mr. KENNEDY, Mr. EXON, Mr. RIEGLE, Mr. LEAHY, Mr. BURDICK, Mr. BINGAMAN, Mr. ZORINSKY, and Mr. HOLLINGS proposes an amendment numbered 75.

Mr. CRANSTON. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

In the pending amendment, do the following:

On page 3, increase the amount on line 12 by $500,000,000.

On page 3, increase the amount on line 13 by $900,000,000.

On page 3, increase the amount on line 14 by $1,100,000,000.

On page 3, increase the amount on line 18 by $600,000,000.

On page 3, increase the amount on line 19 by $1,100,000,000.

On page 3, increase the amount on line 20 by $1,300,000,000.

On page 3, increase the amount on line 25 by $600,000,000.

On page 4, increase the amount on line 1 by $1,100,000,000.

On page 4, increase the amount on line 2 by $1,300,000,000.

On page 4, increase the amount on line 6 by $600,000,000.

On page 4, increase the amount on line 7 by $1,700,000,000.

On page 4, increase the amount on line 8 by $3,000,000,000.

On page 4, increase the amount on line 12 by $600,000,000.

On page 4, increase the amount on line 13 by $1,100,000,000.

On page 4, increase the amount on line 14 by $1,300,000,000.

On page 27, strike out the amount on line 4 and insert in lieu thereof "$27,600,000,000".

On page 27, strike out the amount on line 5 and insert in lieu thereof "$27,100,000,000".

On page 27, strike out the amount on line 13 and insert in lieu thereof "$28,200,000,000".

On page 27 strike out the amount on line 14 and insert in lieu thereof "$27,800,000,000".

On page 27 strike out the amount on line 22 and insert in lieu thereof "$28,700,000,000".

On page 27, strike out the amount on line 23 and insert in lieu thereof "$28,400,000,000".

On page 33, increase the amount on line 2 by $100,000,000.

On page 33, increase the amount on line 3 by $100,000,000.

On page 33, increase the amount on line 11 by $200,000,000.

On page 33, increase the amount on line 12 by $200,000,000.

On page 43, strike out the amount on line 7 and insert in lieu thereof "$292,000,000".

On page 43, strike out the amount on line 8 and insert in lieu thereof "$130,000,000".

On page 43, strike out the first amount on line 9 and insert in lieu thereof "$199,000,000".

On page 43, strike out the second amount on line 9 and insert in lieu thereof "$199,000,000".

On page 43, strike out the amount on line 10 and insert in lieu thereof "$177,000,000".

On page 43, strike out the amount on line 11 and insert in lieu thereof "$253,000,000".

On page 50, strike out the amount on line 18 and insert in lieu thereof "$292,000,000".

On page 50, strike out the amount on line 19 and insert in lieu thereof "$139,000,000".

On page 50, strike out the first amount on line 20 and insert in lieu thereof "$199,000,000".

On page 50, strike out the second amount on line 20 and insert in lieu thereof "$199,000,000".

On page 50, strike out the amount on line 21 and insert in lieu thereof "$177,000,000".

On page 50, strike out the amount on line 22 and insert in lieu thereof "$253,000,000".

On page 52, increase the amount on line 1 by $400,000,000.

On page 52, increase the amount on line 3 by $424,000,000.

On page 52, increase the amount on line 4 by $461,000,000.

Mr. MURKOWSKI. Mr. President, reserving the right to object, and I do not intend to object, but I wish to raise a question.

The PRESIDING OFFICER. The request has already been granted, I tell the Senator from Alaska.

Mr. MURKOWSKI. It involves the proposed amendment. My question is as to the accuracy of the figures in the amendment which I wish to call to the attention of my colleagues at this time.

I do not intend to object to the consideration of the amendment. I will simply point out that there appears to be an understatement in the figures for the budget authority outlay of approximately $100 million in the deficit figure. I simply wish to call that to the attention of my colleague from California.

On the first page of the amendment, lines 6 and 7, there appears to be an understatement of the budget authority of $100 million for 1988; on the second page, lines 3 and 4, an understatement of outlays of $100 million; and on pages 9 and 10, a deficit understatement of $100 million.

I have no objection to the amendment, Mr. President.

Mr. CRANSTON. Mr. President, I ask unanimous consent that if any inconsistency is found, I be permitted to modify the amendment accordingly.

The PRESIDING OFFICER. Without objection, it is so ordered.

BUDGET OR VETERANS' PROGRAMS

Mr. CRANSTON. Mr. President, the purpose of the amendment is to provide for fair, prudent treatment of veterans' programs.

Mr. President, the fiscal year 1986 budget agreement entered into between the Senate Republican leadership and the President is unfair to our Nation's veterans. Even more unfair as the fiscal year 1986 is the Budget Committee's reported resolution. Our amendment would correct these inequities while still providing for a freeze on VA programs at President Reagan's fiscal year 1985 level, plus funding for a cost-of-living adjustment for veterans with service-connected disabilities.

With the compelling need to deal with projected Federal deficits in mind, we are proposing budget levels at the minimum necessary to carry out our Nation's commitment to those who served, and to remedy major deficiencies in the reported resolution.

Overall, our amendment would establish the fiscal year 1986 levels for function 700, "Veterans' benefits and services," at $27.6 billion in budget authority and $27.1 billion in outlays. For the outyears, we propose function 700 totals of $28.1 billion in BA and $27.7 billion in outlays in fiscal year 1987 and $28.7 billion in BA and $28.3 billion in outlays in fiscal year 1988.

Compared to the pending resolution as modified by the full-COLA amendment adopted on May 2, our amendment would add back $500 million in BA and $600 million in outlays in fiscal year 1986, $800 million in BA and $1 billion in outlays in fiscal year 1987, and $900 million in BA and $1.1 billion in outlays in fiscal year 1988.

These totals actually are somewhat less than a "Freeze-Plus-COLA" budget for the VA. Let me stress that again—our amendment is less than a "Freeze-Plus-COLA" budget. Our fiscal year 1986 figures include the fiscal year 1985 function 700 totals in the President's budget—$27.340 billion in BA and $26.850 billion in outlays—with the only addition being $282 million in BA and $280 million in outlays, the amounts needed to provide fully for the cost of a 4.1-percent COLA in service-connected disability compensation benefits in fiscal year 1986, which is $345 million in BA and $310 million in outlays.

Mr. President, I ask unanimous consent that a table providing a subfunction-by-subfunction comparison of our amendment with the Reagan/Senate Republican leadership package as originally proposed and as amended to restore funding for full COLA's in compensation and pension be printed in the RECORD at this point.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

CRANSTON AMENDMENT: FUNCTION 700, VETERANS' BENEFITS AND SERVICES

Subfunction	Reagan/Republican leadership (original)		Reagan/Republican leadership (with COLA add-back)		Cranston		Cranston v. original		Cranston v. with COLA add-back

MEDICAL CARE

Mr. CRANSTON. Mr. President, our amendment would provide for the VA medical care account a funding level that is necessary to maintain the VA health-care system at the programmatic and staffing level for which Congress specifically appropriated funds in fiscal year 1985. Let me stress that this staffing level has just been reconfirmed on April 29 by the House Appropriations Subcommittee on HUD-Independent Agencies.

To retain this congressional approved level for fiscal year 1986 requires $391 million in budget authority and $351 million in outlays more than was recommended by the Budget Committee or by the Republican leadership. The only difference between the recommendations of the Budget Committee and the Reagan/Republican leadership package with respect to the funding level for the medical care account is that the latter package makes one new assumption—that Congress will impose an administration-proposed means test on all non-service-connected disabled veterans seeking VA care. The funding levels are exactly the same in both budget packages.

The levels recommended for the medical care account by the Budget Committee and the Republican leadership would be a devastating blow to the VA health-care system. Faced with those fiscal year 1986 levels, the agency would have no alternative but to deny care to tens of thousands of eligible veterans—approximately 69,000 inpatient episodes of care and 310,000 outpatient visits would have to be eliminated—and to cut its health-care staffing by 8,095 FTEE. This is just in fiscal year 1986 only. This is information provided by the VA's Office of the Chief Medical Director. I did not concoct it.

In order to make these reductions, the VA would have to close many existing wards or other units or even some entire facilities.

The fiscal year 1986 medical care account levels provided for in our amendment—$9.353 billion in budget authority and $9.106 billion in outlays—are only $60 million in budget authority and outlays above the level of the President's very stringent fiscal year 1986 February budget for the medical care account when that level is increased for restoration of the 5-percent civilian pay cut. Neither the Budget Committee, the President, nor the Republican leadership is now supporting that ill-advised proposed pay cut.

That $60-million addition was also supported by six Republican members of the Veterans' Affairs Committee when they signed a March 7, 1985, letter to the chairman of the Budget Committee. This level is the bare minimum needed, in our view, to enable the VA to maintain in fiscal year 1986 the health-care staffing level that the Congress specifically intended be maintained in fiscal year 1985 when it enacted the fiscal year 1985 HUD-Independent Agencies Appropriations Act.

With reference to the Reagan/Republican leadership recommendation and the savings purported to be derived from the imposition of a means test, it was not until April 18 that the administratioin finally submitted proposed means test legislation. Very significantly, in the official transmittal letter, the Administrator of Veterans' Affairs made no representation whatsoever of any specific cost savings. This lack of a cost-savings estimate was no oversight. Indeed, it was well advised for no one can predict with any accuracy that veterans turned away from VA facilities through application of the means test would not be replaced by other eligible veterans. Nor can anyone predict with much ac-

curacy that the costs of implementing the test for veterans, age 65 and older, and the offsetting costs to Medicare would not outstrip any savings resulting from reductions in VA care.

This view was confirmed during an April 23 joint hearing before the House Veterans' Affairs Subcommittee on Hospitals and Health Care and the House Select Committee on Aging. In response to a question about the basis for savings that are being assumed in the White House/Senate Republican leadership package resulting from the enactment of means-test legislation, the VA's Chief Medical Director, Dr. John Ditzler, said that he could not "identify any figure in that cost savings that is familiar or (that he had) seen before." In addition, Dr. Ditzler, when asked how much would be saved in fiscal year 1986 if the proposed means test were implemented, stated, "I would hazard a guess that we may not save anything, but that again is speculative."

Clearly, there is no basis for the administration now to be claiming any savings based on its proposed means test. This is just a smoke screen OMB is trying to use to hide its goal and purpose of slashing the VA Health Care Program and staffing levels.

The bottom line here is that the Reagan/Republican leadership package—like the Budget Committee recommendation—would extract savings from the VA Health Care Program by restricting the resources allotted to it, regardless of whether the means test itself does or does not result in fewer veterans being treated. As I noted a moment ago, both proposals would arbitrarily reduce the amount of VA care provided and the staffing levels at VA facilities. For the administration, which has not provided an estimate showing that any savings would be produced by its means test, to take this approach, is the worst kind of sham—denying needed health care to many thousands of sick and disabled veterans, all the while pretending that nothing of the sort is occurring. If the Senate wants such a result—and let me be clear, beyond any question, that I do not—then it should at least be open and honest about what it is doing.

But, regardless of the lack of validity and substantiation for any claim to savings from the implementation of a means tests, the only way to reduce spending in the VA system is to reduce staffing and inpatient and outpatient treatments.

Mr. President, a moment ago, I described the very serious cuts that the Republican leadership package would make in VA health-care services in fiscal year 1986. This damage inflicted by the Reagan/Republican leadership package would become still more severe in the outyears.

Even if it were assumed that the VA would cancel its current plans for 111 facility activations resulting from construction projects currently underway or planned and scheduled for activation in fiscal year 1987 and fiscal year 1988, the Reagan/Republican leadership levels for the VA medical care account are $230 million less than needed in fiscal year 1987 and $264 million less than needed in fiscal year 1988 to maintain existing VA facilities at the fiscal year 1985 staffing and program levels for which Congress appropriated funds. In fiscal year 1987, the VA would be required to cut another 5,546 FTEE and provide 47,184 fewer episodes of inpatient care and 212,300 fewer outpatient visits. In fiscal year 1988, the VA would have to reduce employment by another 6,213 FTEE's and provide 52,851 fewer inpatient episodes of care and 237,800 fewer outpatient visits. When these reductions are added to the fiscal year 1986 cuts I mentioned earlier, the 3-year totals entail cutting off 19,854 FTEE's, cutting the number of inpatient episodes of care by 169,035, and reducing outpatient visits by 760,100.

Let me mention all of the activations that would likely be canceled so that Senators in those States will clearly know exactly what they are voting for:

NEW ACTIVATION LISTING

[In fiscal years 1987–88]

Alabama:	
Birmingham	Expansion (Clinic, outpatient clinic, administration, education facilities, and seismic reinforcement).
Tuskegee	Renovation of building for lab services.
Arizona:	
Prescott	60-bed nursing home care unit.
Tucson	120-bed nursing home care unit.
Arkansas: Fayetteville	Expansion of Laboratory.
California:	
Fresno	Clinical addition.
Loma Linda	60-bed nursing home care unit.
Long Beach	Relocation and consolidation of hemodialysis.
Do	160-bed spinal cord injury unit and outpatient clinic.
Los Angeles	Ambulatory care clinic.
Palo Alto	Spinal cord injury addition.
San Diego	Spinal cord injury unit and outpatient clinic.
San Francisco	120-bed nursing home care unit and parking facility
Do	Remodeling of buildings 2, 4, and 200.
Sepulveda	Spinal cord injury and recovery renovation.
West LA	Renovation of building for domiciliary facility.
Do	Conversion for 120-bed nursing home care unit.
Do	117-bed nursing home care unit.
Colorado: Grand Junction	Outpatient and clinical addition.
Florida:	
Lake City	Renovation of lab B64.
Do	Outpatient and clinical addition.
Miami	Relocation of radiotherapy.
Do	Renovation of medical intensive care unit and coronary care unit.
Do	120-bed nursing home care unit.
Tampa	Radiation therapy unit.
Georgia: Augusta	Replacement medical center.
Illinois:	
Chicago Lakeside	Crown Point satellite outpatient clinic.
Chicago Westside	Renovation of buildings 11A and 11B (phase 2).
Do	Outpatient addition.
Hines	40-bed spinal cord injury building.
Do	Renovation of 1st floor, B200, lab services (phase 1).
Do	New linear acceleration facility.
Do	120-bed nursing home care unit.
Marion	Dental and medical support.

NEW ACTIVATION LISTING—Continued

[In fiscal years 1987–88]

Indiana: Indianapolis	Radiology oncology treatment.
Iowa:	
Iowa City	Ambulatory care and clinical addition.
Do	Expansion of research animal facility.
Kentucky:	
Lexington	Clinical addition.
Louisville	Clinical and education unit.
Do	Establish 8-bed coronary care unit.
Louisiana:	
Alexandria	Clinical improvement.
Do	120-bed nursing home care unit.
New Orleans	Renovation of surgical intensive care unit.
Do	Renovation of medical intensive care unit and coronary care unit.
Do	Expansion of clinic, outpatient services, education, and research
Shreveport	Renovation of medical intensive care unit and coronary care unit
Do	Ambulatory care building and linear accelerator.
Do	Education addition.
Maine: Togus	Clinical improvement, building 200.
Massachusetts:	
Bedford	Ambulatory care addition.
Boston	Nuclear magnetic resonance imaging.
Brockton	Outpatient addition, research and education, and administration.
Michigan: Ann Arbor	Linear accelerator.
Minnesota:	
Minneapolis	120-bed nursing home care unit.
Do	Replacement medical center (phase 5).
Mississippi: Biloxi	Modernization of various buildings.
Missouri: St. Louis	Research labs.
Nebraska: Omaha	Outpatient clinical addition.
New Hampshire: Manchester	Relocation of radiology and chapel.
New Jersey:	
East Orange	Linear accelerator.
Do	Relocation and consolidation of research and expansion of clinical lab.
Lyons	240-bed nursing home care unit.
New Mexico:	
Albuquerque	New clinical services bed building.
Do	Replacement and modernization of clinical services.
New York:	
Albany	Renovation of clinic.
Bath	Renovation of domiciliary facility.
Bronx	Therapeutic pool.
Brooklyn	Relocation of surgical intensive care unit.
Buffalo	Research building and clinical expansion.
Castle Point	Laboratory addition.
Northport	10-bed surgical intensive care unit.
Do	120-bed nursing home care unit.
North Carolina:	
Durham	Clinical addition.
Do	120-bed nursing home care unit.
Fayetteville	Clinical addition.
North Dakota: Fargo	Clinical addition.
Ohio:	
Cincinnati	Remodel morgue and loading dock.
Do	Renovation of vacated surgical space for research.
Cleveland	Clinical improvements.
Oregon: Portland	Replacement hospital (phase 3).
Pennsylvania:	
Philadelphia	Clinical addition and renovations.
Do	240-bed nursing home care unit.
Pittsburgh	Outpatient clinical addition.
Do	Education and training center.
Wilkes-Barre	Alcohol treatment unit.
Do	Relocation of nuclear medicine.
Puerto Rico:	
San Juan	Ponce satellite outpatient clinic.
Do	120-bed nursing home care unit.
South Carolina:	
Charleston	Clinical addition.
Do	Savannah satellite outpatient clinic.
Columbia	Greenville satellite outpatient clinic.
Tennessee:	
Memphis	Relocation and expansion of surgical intensive care unit.
Mountain Home	Renovation of bed towers.
Murfreesboro	120-bed nursing home care unit.
Texas:	
Amarillo	Addition and renovation of clinical support.
Do	120-bed nursing home care unit.
Big Springs	Renovation of surgery.
Dallas	Expansion of cobalt facility.
Do	Renovation of building B3 for research.
San Antonio	120-bed nursing home care unit.
Temple	408-bed replacement domiciliary facility.

NEW ACTIVATION LISTING—Continued

[In fiscal years 1987–88]

Vermont:	
White Riv. Junc	Expansion of medical intensive care unit
Do	Research and education building.
Virginia:	
Hampton	200-bed replacement domiciliary facility
Richmond	Linear accelerator.
Do	Magnetic resonance imaging.
Washington: Seattle	Replacement hospital (phase 4).
West Virginia: Clarksburg	Clinical alterations and addition.
Wisconsin: Wood	Renovation of building 43 for domiciliary facility.
Wyoming:	
Cheyenne	Expansion and renovation of clinical functions.
Sheridan	Outpatient clinic addition.

If, on the other hand, the VA nevertheless decided to proceed with its current plans to activate new facilities scheduled to come on line in fiscal year 1987 and fiscal year 1988, then the budget under the Reagan/Republican leadership package would fall even further short of being able to maintain existing VA facilities at the fiscal year 1985 appropriated staffing levels. Under that scenario, in fiscal year 1987, the package would require VA health care personnel cuts of 10,997 FTEE's, a reduction of 93,548 inpatient episodes of care, and a 421,000-outpatient visit cutback. In fiscal year 1988, the reductions would be 14,259 FTEE's, 121,298 inpatient episodes, and 545,800 outpatient visits. The 3-year total reductions would produce cuts of 33,351 staff years, 283,845 fewer inpatient care episodes, and 1,276,800 fewer outpatient visits.

These are obviously enormous reductions and they would require correspondingly enormous changes in the VA system. Large number of existing units and several total hospitals would almost certainly have to be shut down. Based on my 16 years' experience working closely with the VA medical system, I believe that the result would almost certainly be that some or all of the 111 planned facility activations would not be brought on line as scheduled.

Mr. President, these would be most destructive cuts, and I challenge the proponents and supporters of this amendment to tell me and our colleagues and our Nation's veterans how they propose that the VA should implement these cutbacks. From what VA medical centers would these employees be taken? Which units, which facilities, which medical centers would be closed? I believe we're entitled to have that information before voting to inflict such extensive devastation on this system.

Let me also stress that our amendment would still force economies in the VA health-care system. It would restore 90 percent of the shortfall in fiscal year 1987 funding needed to maintain the existing system and proceed with the scheduled activations and 71 percent of that shortfall in fiscal year 1988.

The VA health-care system is a vitally important national resource that we must preserve. Not only is it the means by which we meet our very fundamental obligation to provide health care to veterans who are disabled during their service, but the 172-hospital VA system also has a statutory role as the first backup to the Department of Defense health care system in time of war or national emergency. In addition, the VA system plays very vital roles in overall health care personnel education and in medical research. These latter roles are of importance not only to veterans but to the Nation as a whole.

And let's not be misled by talk about reallocation and realignment of resources. There are no savings there—moving an employee or an employee slot, or a dollar, from the Midwest to the Sun Belt does not save any money. If anything, it costs money.

Cutbacks of the magnitude of those proposed in the Reagan/Republican leadership package would savage the system as it now exists and would cripple it in ways that could hamper its ability to provide quality care to our Nation's veterans for years and decades to come. Anyone who thinks I may be exaggerating the impact of these cuts just does not understand the VA health-care system or how it functions.

HEALTH-INSURANCE REIMBURSEMENT

Mr. President, I would like to address the so-called third-party reimbursement proposal. This legislative proposal was mentioned in the VA's budget documents in February but was submitted to the Congress only yesterday. It would require private health insurance carriers to delete from their policies clauses precluding payment for VA furnished care. It would also provide for the VA to obtain reimbursement from these carriers for VA care provided for veterans' non-service-connected conditions.

I am opposed to this proposal. It would do absolutely nothing to improve or increase health care services for veterans. By increasing administrative costs for both the VA and the insurers it would simply add inflationary costs to our Nation's health care bill. I also oppose this proposal because, if no additional VA administrative personnel were added to shuffle the necessary papers—and none are being proposed to be added—it would require the diversion of VA staff from activities relating to furnishing veterans with health care to the redtape involved in billing insurance carriers.

Moreover, there remain numerous unanswered questions about this proposal. The unknowns include, among others, the extent to which non-service-connected veterans receiving VA care have health insurance that would yield any significant payments under such a law, the ability or willingness of the VA to generate billings and to submit to cost-containment reviews which accord with requirements in existing insurance contracts, and the extent to which health insurance premiums would be increased to cover the cost of any claims paid.

In addition, the possibility of realizing any of the receipts that are claimed for this initiative in the first few years after its enactment are extremely remote. Insurance companies are adamantly opposed to a mandate to pay for VA care, when the VA is not subject to the same utilization controls applied to private sector facilities, and serious questions have been raised about the constitutionality of this provision. Insurance companies suggested during hearings before our committee in 1979 that they would not pay these claims unless and until finally ordered to do so by judicial authority. This would likely entail protracted legal proceedings until all appellate remedies are exhausted. Thus, for years to come, the proposal would produce paper savings only and make no real reduction in the deficit.

I am convinced that the only impact of this provision for the VA will be increased costs for the agency. Some costs will result from efforts by the agency to begin to establish the administrative framework, including costly new automated data processing capacity, necessary to process insurance claims—something the agency does not now have. Costs will also result from efforts actually to collect payments from insurance carriers. The collection effort likely will generate additional costs as carriers refuse to honor VA claims, either because the claims do not comply with the terms of the relevant insurance contracts or because the carriers believe the legislation authorizing VA collections is unconstitutional. In either event, it is likely that still further litigation will ensue, generating more expense and leading to further delay in collection efforts.

Also with reference to the issue of the projected savings, the administration has now proposed that the VA implement a means test pursuant to which the VA will actually evaluate the extent to which veterans seeking VA care on the basis of their inability to pay for the needed care do not in fact have sufficient resources. To the extent that veterans seeking care for non-service-connected conditions have health insurance coverage clearly adequate to enable them to obtain care without resulting hardship, a means test should result in their being referred to non-VA facilities for their care—not in the VA providing the care and then collecting funds from the insurance carriers.

Mr. President, there is one final point regarding the issue of health in-

surance reimbursement which I believe needs to be addressed—namely, that enacting such legislation would end the free ride that insurance companies receive when veterans who have paid insurance premiums use the VA health-care system. The essence of this position, which was included in the April 15, 1985, OMB booklet regarding the Reagan/Republican leadership plan, is that somehow insurance carriers are, under current law, receiving a windfall in the form of excess premiums from veteran policy holders. This position is totally inaccurate and misleading. During our committee's very comprehensive hearing in 1979 on health insurance reimbursement legislation—the committee's only hearing to date on this issue—the undisputed testimony was that premiums for health-plan coverage are experience rated, that is, based on an insurer's experience with regard to claims presented, actual payouts, and that, in the absence of insurer payments for care received in VA facilities, no component of the premium is ascribed to the veteran or nonveteran status of the insured. Thus, there is no windfall to the insured to be recovered, no free ride to be ended. Rather, as the testimony at the 1979 hearing indicated and as the GAO recognized in its recent report on this issue, the effect of the enactment of health-insurance reimbursement legislation would be to increase health care premiums. The transfer of the costs of veterans health care from the Federal Government to private insurers would in turn be transferred to health-insurance premium payers.

On February 26, 1985, the General Accounting Office published its fourth report on health insurance reimbursement. Although I believe that this report represents a bona fide effort by GAO to address this issue, I do not believe it really answers the many questions that must be addressed.

I must note that I was not surprised by the GAO's support for legislation to allow the VA to collect from health insurance carriers. This was the GAO's fourth report since 1970 on this issue and each one has reached the same conclusion.

The most fundamental flaw with this most recent report is its failure to come to terms with the fundamental policy issue involved—namely, how is the public interest served by simply transferring the costs of care provided to veterans—with all of the added costs associated with such a transfer—from taxpayers to those who pay health insurance premiums. This transfer between two groups that are made up of many of the same individuals is an unnecessary, inflationary action.

The GAO's analysis of the legal issues involved in this issue was very superficial and conclusory. I will not attempt to predict how the various legal issues will be resolved but I am confident that there will be greater difficulty than GAO suggests.

My final major concern about the recent GAO report concerns possible methodological flaws in the study effort to determine the scope of health insurance coverage among veterans, the basis for all estimates of potential recoveries. Of particular concern was the very significant nonparticipation rate by those selected by the GAO to take part in the survey. Of an original sample of nearly 2,700 veterans, GAO received usable replies from only 1,356 veterans, approximately a 50-percent rate of participation. This low rate of participation raises an important question as to whether the respondents and nonrespondents differ in a significant way and, in fact, the GAO report provides some evidence of this problem. The GAO survey found that 10 percent of the respondents had health insurance whereas, according to other VA data surveyed by GAO, only 6 percent of a sampling of the nonrespondents to the GAO survey had advised the VA that they had health insurance.

The other flaw that results from the methodology used is the GAO's reliance on insurance data from 1982 or earlier. Since the early 1980's, there has been a significant growth in the level of deductible and copayments that individuals with health insurance have to pay. The fact that the GAO report does not reflect this change undoubtedly has produced a significant overestimation of the amount of funds that could be recovered from health-insurance carriers.

VA LOAN GUARANTY FEE

Mr. President, our amendment rejects the discriminatory new tax—in the form of an increase in the VA home loan guaranty fee—that the Republican leadership is recommending be imposed on certain veterans. Under their new proposal for a fee increase, which has not yet been made available in writing, the VA loan guaranty fee—currently 1 percent of the loan amount—would be doubled effective October 1, 1985. Thereafter, as I understand the proposal, the fee would be increased if the need is justified based on an annual study of the loan guaranty program by the Administrator of Veterans' Affairs. I am further advised that the fee could also be reduced on the basis of the annual study. The maximum increase would be to 2.5 percent in fiscal year 1987, 3 percent in fiscal year 1988, 3.5 percent in fiscal year 1989, and 3.8 percent in fiscal year 1990.

How this modified fee-increase arrangement would actually work is not clear. For example, it's not clear whether the fee would increase automatically unless the Administrator determined that an increase was not necessary or whether it would not be increased unless and until the administrator determined that an increase was necessary. Also, how far into the future would the potential need justifying a fee increase be? Would the need be required to be in the upcoming year or could it go on 20 years on down the road?

Other questions I have include what happens to the schedule for the phasing-in of increases if, in a particular year, the fee is not increased. Does that push the whole schedule back 1 year or can the increase skipped 1 year be made up in the following year? Also, how far and when can the fee be decreased? Can it, under this proposal, ever be decreased below 2 percent? If so, could that occur during fiscal year 1986? Can the decreases be by more than 1 percent, and can they reduce the fee to less than the current 1-percent level?

I don't know if there are any answers to these questions. The new proposal has never been set forth definitively and in detail in any administration document of which I am aware.

Mr. President, last year, in response to the need to shore up the VA's loan guaranty revolving fund, which supports the VA Home-Loan Guaranty Program and which was facing a shortfall, the Veterans' Affairs Committee reported and the Senate passed a measure, S. 2391, providing for the deposit of long-guaranty-user-fee receipts into the Revolving Fund—instead of the General Treasury—and increasing the fee from ½ to 1 percent. Such provisions ultimately were enacted in section 2511 of the Deficit Reduction Act of 1984.

According to CBO, the Fund will have no need for an appropriation, or receipts, from a further increased fee at any time during the 5-year period covered in CBO's current projections.

It should also be noted that the VA's direct loan revolving fund will, according to the VA's budget documents, have an unobligated balance of $77.7 million at the beginning of fiscal year 1986, rising to $122.3 million by the close of that fiscal year.

CBO estimates a $50-million margin of direct loan fund receipts over obligations in each of fiscal years 1986 through 1990. According to the VA, that average annual margin would be $38 million over the 5 years.

Under a provision included each year in the HUD-Independent Agencies Appropriations Act, unobligated direct loan fund balances are available for transfer to the loan guaranty fund. The direct loan fund thus provides an additional cushion—of about $250 to $300 million over the next 5 fiscal years—to ensure the solvency of the loan guaranty program.

Mr. President, under these circumstances, I consider any proposal to in-

crease the fee—such as the doubling of it on October 1, which the Republican leadership proposes—as nothing other than imposing a special, new tax on certain veterans in order to help with deficit reduction.

Mr. President, the fee increase proposal would entail a heavy, discriminatory burden principally on Vietnam-era veterans who are in the market for their first homes and in need of exactly the type of assistance that the VA guaranty is intended to provide. According to VA estimates, in fiscal year 1986, 96,800 Vietnam-era veterans—or 44 percent of all veterans expected to use the program—would use their home-loan guaranty entitlement if the fee were not increased.

According to CBO, the proposed doubling of the fee in fiscal year 1986 would result in 16,000 veterans not using their VA loan-guaranty entitlement in fiscal year 1986 alone. About half of these would probably be Vietnam-era veterans. If the fee were to remain at 2 percent through fiscal year 1990, 72,000 fewer veterans would acquire homes using their VA entitlement during the period fiscal year 1986 through fiscal year 1990. If the fee were to be increased to the permissible maximum rates—up to 3.8 percent in fiscal year 1990—the results would be a total of 141,250 fewer veterans over that period using their VA entitlement to acquire homes; again, about half of them would probably be Vietnam-era veterans.

Veterans of World War II and the Korean conflict did not have this obstacle to home ownership and the use of their VA benefits placed in their path when they were the same average age that Vietnam-era veterans now are and when, in as large numbers as Vietnam-era veterans are now, they were seeking to buy homes. Indeed, prior to 1981 when the current fee was imposed at a rate of one-half of 1 percent of the loan amount, the only veterans ever to have paid a fee were post-Korean conflict veterans who did not derive their entitlement to guaranty by virtue of wartime service. Public Law 89-358, enacted in 1966, required that these veterans of peacetime service pay a one-half of 1-percent fee. The fee was subsequently repealed in 1970 by Public Law 91-506.

Thus, lacking any justification in terms of the need to shore up the Loan Guaranty Revolving Fund, I find this proposal highly discriminatory against Vietnam-era veterans.

Indeed, the current 1 percent fee is already discriminatory against Vietnam-era veterans.

The new, doubled discrimination and unfairness would not be just in the form of the possible lost opportunity to own a home; the new tax itself would impose a significant burden on those who do qualify for a VA-guaranteed loan with the increased fee. Assuming the current interest rate on VA loans, 12½ percent, and the VA's average loan amount for fiscal year 1984, $64,300, if the fee were doubled and financed over the life of the loan, the fee-increase alone would cost the veteran about $7 per month, $84 per year, and $2,520 over the life of the loan. It is argued that $84 a year is a negligible additional amount to collect from these veterans. But, I'm sure that many from whom it is to be collected—Vietnam-era veterans who have young families and are seeking to acquire their first homes—would not consider the increase in the fee negligible. They would view it as diminishing what they are able to do for their families—and they would be right.

Moreover, it must be kept in mind that what would be collected from the veteran would be not just the fee increase—but the full, increased fee. What is being proposed is a minimum of a 2-percent fee, which would cost the veteran $165 per year and $4,950 over the life of a 30-year mortgage on the average-size, VA-guaranteed loan. That's a considerable amount, I believe, from anyone's perspective. And, it's a tax that World War II and Korean conflict veterans did not have to pay to use their VA guaranty when they were buying their first homes. It's a substantial, doubly discriminatory tax that would be imposed on veterans and principally on Vietnam-era veterans.

Mr. President, I also note that the Republican Leadership package includes increased revenues based on the assumption that this new tax will actually increase annually from 2 percent in fiscal year 1986 to 2.5 to 3 to 3.5 and eventually to 3.8 percent in fiscal year 1990. Thus, we should also consider the effects of increases above 2 percent. According to CBO, if the fee were so increased by these increments, 141,250 fewer veterans would use their VA guaranty in the 5-year period fiscal year 1986 through fiscal year 1990. CBO estimates that in fiscal year 1990, a 3.8-percent fee would result in 42,000 veterans not using their VA guaranty—42,000 in that 1 year alone. Even without adjusting for inflation in housing prices and based on current interest rates, the cost of a 3.8-percent fee to the veteran using the guaranty in fiscal year 1990 would exceed the cost of a 1-percent fee by $20 per month, $240 per year, and $7,200 over the life of a 30-year mortgage on the average VA-assisted home loan.

In addition, according to CBO, since the increased fee would in most cases be financed as part of the mortgage loan, the VA-fee increase would also produce a rise in the VA-loan foreclosure rate because the length of time during which the veterans would have no equity in the properties would increase. And, according to CBO, it would also mean that the average cost to the VA of a defaulted loan would increase.

Thus, it is extremely difficult to understand how the Budget Committee, the Senate Republican Leadership, and the President—in the face of the CBO analysis and their steadfast adherence to a "no new taxes" approach—can justify imposing this new tax.

Mr. President, a key aspect of this debate over whether the VA loan fee should or should not be increased is whether the Senate is so convinced that OMB is so right in asserting that a fee increase is needed to bolster the revolving fund—and CBO is so wrong in saying it is not—that we should now proceed to double the fee and provide for further increases. In this regard, I am convinced that an examination of the administration's various, ever-changing positions on this issue and its ridiculous assertions regarding the effects of the fee shows beyond any doubt that the administration should be accorded no credibility whatsoever in this area.

The first action of the administration this year was to propose in its fiscal year 1986 budget a fivefold increase in the fee—to 5 percent—effective October 1, 1985. That increase, financed over the life of a 30-year loan, would have added $28 per month to the average VA mortgage-loan payment—a total of $10,080 over the life of the loan. Nevertheless, the administration made the totally ridiculous prediction that that fee increase would not have resulted in one single veteran not using his or her VA guaranty. The exact same number using the guaranty with the fee at 1 percent would use the guaranty if it were increased to 5 percent, the administration contended. On the other hand, CBO predicted that a 5-percent fee would result in 60,500 fewer veterans using the guaranty each year, and internal VA projections are that that fee could effectively bar up to 110,000 eligible veterans in fiscal year 1986 alone.

When in questioning at committee hearings in both Houses, the administration was confronted with massive disbelief, it stuck with its ridiculous prediction. Of course, no one believed it.

As justification for the fee increase, the administration pointed to its prediction that, without the increase, appropriations would be needed to keep the Loan Guaranty Revolving Fund solvent. However, the administration's estimates were that the 5-percent fee would result in collections of $605 million in fiscal year 1986 and $3.5 billion in the 5 years fiscal year 1986 through fiscal year 1960—at the expense of veterans—and that the needs of the revolving fund would be only $405 million in fiscal year 1986 and $1.6 billion over the 5-year projection period, far

less than half of what it estimated it would collect over the 5 years. According to the administration's own figures, by fiscal year 1990, the 5-percent fee would have produced an enormous surplus of nearly $2 billion in receipts over the administration's own projections of the needs of the revolving fund. Who could possibly believe any assertion that the fee increase was being sought in order to keep the revolving fund solvent?

Based on this unbroken string of unbelievable assertions, I find the administration's entire position in this area totally suspect. Plainly, it wishes to raise revenues through the fee—to whatever extent it believes it can get—and it seems willing to do everything necessary to accomplish that objective. Under these circumstances, I do not believe that this fee increase is needed, as the administration asserts, and I don't believe that any impartial observer would either.

Mr. President, I urge my colleagues to reject this new, discriminatory tax by voting for this amendment.

COMPENSATION AND PENSION COLA'S

Mr. President, our amendment would provide for full cost-of-living adjustments, in fiscal years 1986, 1987, and 1988, in VA compensation benefits paid to service-connected disabled veterans and to the survivors of those who die from service-connected causes, and in VA pension benefits paid to needy, non-service-connected disabled and aged wartime veterans and to the needy survivors of wartime veterans.

As presented to the Senate, the Republican leadership/Reagan package applied to the VA's service-connected disability compensation and need-based pension programs the same arbitrary, complex, 3-year COLA-reduction formula it had proposed to apply to Social Security and which the Senate has now rejected. Thus, instead of COLA's at the administration-projected inflation rates of 4.1, 4.3, and 4.1 percent in fiscal years 1986, 1987, and 1988, respectively—on which the Republican leadership/Reagan budget proposal is premised—the President proposes to cut veterans' compensation and pension COLA's by more than half, to only 2 percent, in each of those years.

FAIRNESS TO VETERANS

Major veterans' organizations have stated clearly that if all COLA's are foregone in fiscal year 1986 so should be VA compensation and pension COLA's. Presumably, they would be equally as willing to share in an across-the-board COLA reduction—although perhaps not one that cuts into their COLA's in each of 3 years running. In any event, that is not what the Republican leadership/White House package entailed and, with a full Social Security COLA now approved, that is not what the pending resolution would entail.

Rather, in addition to the fact that the President's package would provide supplemental security income and food stamp beneficiaries with full COLA's in all 3 fiscal years, a full COLA for Social Security would also now be given. But either way, the full compensation and pension COLA's should be provided.

I have heard the argument made with respect to the COLA's for SSI and food stamp beneficiaries that veterans should not feel that the Reagan/Republican leadership package discriminates against them, that they should acknowledge fairness in a policy that enables benefits for welfare recipients to keep pace with inflation while denying such treatment to those who served our Nation in time of war and those disabled in military service.

That argument plays on the conceptual distinction between compensation and pension, which are considered benefits earned through honorable service, on the one hand, and welfare program, such as SSI and food stamps for low-income persons, on the other hand, which are not earned benefits. But, this argument turns the distinction inside out. Veterans' benefits, by virtue of being earned benefits, are more—not less—deserving of favored treatment.

The Reagan/Republican leadership package seemed to consider veterans especially deserving of unfavorable treatment. And now that the Senate has gone on record as supporting full Social Security COLA's, that unfavorable treatment would be aggravated if full COLA's were not provided in compensation and pension benefits.

COMPENSATION

The VA's service-connected Disability Compensation Program has been and should remain a top priority of the Congress. Under this program, benefits are paid to the veteran to replace the average impairment of earning capacity attributed to his or her service-connected disability, and benefits to replace lost earnings are paid to the survivors of those who die from service-connected causes.

In the cases of many seriously disabled veterans, VA compensation is the only source of income.

Based on the administration's projections of inflation, in the case of a 100-percent service-connected disabled veteran, the reduced COLA formula on which the Reagan/Republican leadership package was premised would mean the loss of more than $2,100 over the 3-year period encompassed by this resolution, and over $4,400 in a 5-year period. Assuming a 45-year-old totally disabled compensation recipient lives to be 65, the loss would total almost $29,000 if COLA rates remained at 4 percent after fiscal year 1988.

It has been asserted that the Republican leadership package treats service-connected disabled veterans and the survivors of those who have died from service-connected causes more equitably than did the version reported by the Senate Budget Committee, which would simply have denied them a COLA in fiscal year 1986. The fact is, however, that the Republican leadership package would even more seriously erode the value of compensation benefits than the Budget Committee had proposed.

Based on the administration's projections for Social Security COLA's, as of December 1, 1987, compensation for a veteran with a service-connected disability rated totally disabling would be $420 per year less under the Republican leadership package than it would have been under the Budget Committee's proposal. through the end of fiscal year 1990, the totally disabled compensation recipient would receive $1,044 less under the Republican leadership's COLA reduction proposal than under the Budget Committee's 1-year freeze.

PENSION

In the case of VA pension—a needs-based program as is SSI—the Reagan leadership proposal was to penalize individuals simply by being wartime veterans or survivors of wartime veterans since SSI, as well as Social Security, recipients would receive full COLA's, but VA pensioners would be at the reduced level.

The argument has been made, however, that denying pension recipients, but not SSI recipients, a full COLA is fair because the benefit levels under the new pension program, enacted in 1978 in Public Law 95-588, are significantly higher than SSI benefits. This argument seems to attempt to create the false impression that VA pensioners are fairly well-off and that there is no need for their benefits to keep pace with inflation.

That is just not so.

Veteran-pensioners are truly needy individuals who are either 65 or older or permanently and totally disabled. Those eligibility criteria parallel SSI. The improved VA pension program enacted in 1978 is a very strict needs-based system.

The income standard applicable to a 70-year-old World War II veteran with no dependents is $5,709 per year. If the veteran receives $3,500 per year in Social Security benefits and no other nonpension income, his or her pension would be $2,209 per year—$184 per month.

In the case of a Vietnam-era veteran who is permanently and totally disabled and has a spouse and one child, the income standard is $8,446. This family of three would have only $704—about $235 per person—per month to

live on. Do they not need full protection against inflation?

Can people such as these afford—as the President and the Republican leadership proposed—to suffer a reduction of nearly 7 percentage points in their benefits over a 3-year period? Is that the expression of gratitude and special consideration that the Senate, the Congress, and the Nation intends for those who have answered the call and taken up arms in time of war?

Mr. President, the April 15, 1985, booklet entitled "Senate/Administration Deficit Reduction Plan" provides the following one-line justification for the reductions in COLA's for VA pensioners: "Since pension cap exceeds poverty line, COLA restraint will not result in any veteran falling into poverty." That's one line stating two concepts and both of them are false.

It is simply not true that the pension income standards are above the poverty line generally. In fact, the levels are above the poverty line only in the cases of veterans with no dependents or only one or two dependents. The pension income levels permitted for a veteran with a spouse and two children and all those with more than three dependents are already below the poverty line.

For example, a veteran-pensioner with two dependents in 1984 received $8,160 for the year while the poverty line, determined by the Bureau of the Census, for a family of three was $8,280. Moreover, the VA pension income standards for all surviving spouses are well below the Census Bureau's proverty level figures. For example, the pension provided to a surviving spouse with no dependents in 1984 was $3,695—that's 30 percent below the $5,280 poverty level for a single person for 1 year.

The second part of the justification—that "COLA restraint will not result in any veteran falling into poverty"—is as wrong as it possibly could be. All, I repeat, all veteran-pensioners who are not already below the poverty line and would be affected by the COLA reduction would be pushed down below the poverty line as the result of the Reagan/Republican leadership proposal.

As projected by the Education and Public Welfare Division of the Congressional Research Service, using Social Security trustees' economic assumptions, the 1987 poverty line for one person has been estimated at $6,060 per year; with 2 percent COLA's, the pension in that same year for a veteran with no dependents would be $5,939. Indeed, in 1987, the only veteran-pensioner group that is estimated to exceed the poverty line with 2-percent COLA's are those veterans with one dependent—and only by $31. By 1988, even the veteran-pensioner with one dependent would, as would all other veteran-pensioner groups, fall below the poverty line—the pension level would be $6,058 while the poverty line for a family of two in 1988 is estimated at $6,370.

THE 2-PERCENT GAMBLE IS DEMEANING

Some might try to justify this unfair treatment of veterans by pointing out that the Republican leadership package would guarantee 2-percent COLA's in each of the 3 years even if inflation drops below 2 percent. The odds of that national lottery paying off are as poor as the logic behind that entire jerry-built device.

Veterans deserve fair, equitable, and dignified consideration under the budget. I consider it undignified and demeaning—as well as unfair and inequitable—to our Nation's service-connected disabled veterans to offer them in this budget proposal substantially less than full COLA's in fiscal years 1986, 1987, and 1988 and to try to entice them into accepting such a raw deal by promising to give them 2-percent COLA's in each of those years even if the rate of inflation does not justify those COLA's.

The suggestion that the possibility of unwarranted increases in these veterans' benefits would buy them off is insulting. They're never asked for unjustified COLA's. Who is it who thinks that such increases would be tempting to them?

In any event, it sure didn't work since all the major veteran's organizations support my amendment restoring full COLA's.

Moreover, Mr. President, if one were to assume that, against all odds, the inflation rate in fiscal year 1986, 1987, or 1988 were to fall below 2 percent, why should the Federal Government pay 2-percent COLA's in Social Security and VA compensation and pension rates? If, for example, the actual rate were only 1 percent in these years, the total cost in VA compensation and pension would exceed $100 million per year. The Federal Government would thus be paying out hundreds of millions of dollars with no policy justification for doing so that I can perceive.

Yet, those considered the most needy group of welfare recipients—SSI recipients—would not share in this windfall. Nor would food stamp recipients.

Mr. President, there is one further quirk in the pending resolution without any justification that I can comprehend. In the event that inflation is unexpectedly high in any of the 3 years involved, compensation and pension COLA's would be higher than 2 percent—but the amount of the COLA's would not be based solely on how high the rate of inflation was. Rather, the COLA's would be based on how far off the administration's current estimate of inflation turned out to be.

For purposes of illustration, if the applicable inflation rate were actually 5 percent in each of fiscal years 1986 and 1987, the COLA's would be 2.9 percent in fiscal year 1986 and 2.7 percent in fiscal year 1987. The reason for this difference would be that the administration's estimate of 4.3 percent for fiscal year 1987 would be closer than its 4.1-percent estimate for fiscal year 1986. The question I cannot answer in my own mind is what the size of the error made by an OMB forecaster has to do with sound public policy and with the real needs—for food, clothing, shelter, and other necessities—of the individuals who receive the benefits involved.

Surely, no one expects the inflation rate to be below 2 percent for any of those years; so the so-called carrot is truly misleading.

The pending package seeks to transform the provision of COLA's in these vitally important VA programs into tawdry gambles—tosses of dice that are plainly loaded in the administration's favor with a cynical and totally ill-conceived minimum COLA guaranty thrown in as an illusory sweetner.

What a terrible array of unfair, absured policies this COLA-reduction proposal entails.

The Senate should reject it overwhelmingly and, by so doing, restore a measure of fairness, dignity, and sound judgment to the budget process.

UNSPECIFIED COST-SAVING LEGISLATION

Mr. President, our amendment assumes the enactment of legislation that would achieve cost savings totaling $150 million in BA and $270 million in outlays for fiscal years 1986, 1987, and 1988. This level of legislative cost-savings would both reduce the function 700 totals and be assumed in the reconciliation instructions. This is $120 million more in savings in outlays than the maximum that the Veterans' Affairs Committee Democrats had committed themselves to achieving contingent upon their original budget recommendations being achieved. The greater proposed legislative savings reflects a revised estimate of what could fairly and equitably be achieved in non-service-connected programs if the other features of this amendment were adopted.

RECONCILIATION INSTRUCTIONS

Our amendment would modify the cost-savings totals in the reconciliation instructions to the Veterans' Affairs Committees to reflect the policy assumptions that I have described. Thus, the fiscal year 1986 savings required by the instructions in the resolution as previously amended would be reduced from $858 million in BA and $791 million in outlays to $292 million in BA and $130 million in outlays in fiscal year 1986. The new amount is based on the following changes in the Reagan/Senate Republican leadership's underlying assumptions: First, instead of the assumption that all VA

health care accounts would be capped at subbaseline levels—at the lower of either a freeze level or the President's request for fiscal year 1986—the VA construction, medical administration, and research accounts would be limited in fiscal year 1986 to the levels requested by the President; it assumes that the medical care account would be funded at $60 million more than the President's request—with funding restored for the proposed 5-percent pay cut—in order to maintain the approximately 194,000 FTEE staffing level specified by Congress last July in enacting the VA's fiscal year 1985 appropriations and just reconfirmed last week by the HUD-Independent Agencies Subcommittee of the House Appropriations Committee in marking up a fiscal year 1985 Supplemental Appropriation Act. Measured against the baseline figures for these accounts, the new assumptions would achieve savings of $224 million in BA and $26 million in outlays in fiscal year 1986, instead of the Budget Committee's assumption of $446 million in BA and $220 million in outlays.

Second, in lieu of the assumptions of savings through the enactment of health insurance reimbursement legislation and increases in the VA home loan fee, our amendment assumes savings of $150 million in BA and $270 million in outlays annually over the 3 years through the enactment of as yet unspecified cost-savings legislation.

We accept the assumption of fiscal year 1986 savings of $18 million in BA and $14 million in outlays in VA discretionary programs other than health programs.

Over the 3-year period, fiscal year 1986, 1987, and 1988, our amendment proposes cost-saving totals in the reconciliation instruction to the Veterans' Affairs Committees of $668 million in BA and $582 million in outlays.

VETERANS' PROGRAMS SHARING DEFICIT REDUCTION EFFORTS

Mr. President, as these reconciliation levels we are proposing clearly show, our amendment does not treat veterans' programs as sacred cows—$600 to $700 million in new savings is not peanuts. The Veterans' Affairs Committee has always met its cost-savings responsibilities dutifully. With the active participation of its Democratic members, the committee over the past 4 years has produced new cost-saving laws that will reduce the deficit by $1.6 billion by the end of the current fiscal year and will save over $500 million more in fiscal year 1986.

Those figures are all in addition to the reconciliation savings we are proposing in our amendment.

WITHHOLDING OF RELEVANT INFORMATION

Mr. President, I regret to note that, in presenting to my colleagues relevant data pertaining to our amendment, I am under a significant handicap. That, unfortunately, means that the Senate will similarly be hindered in giving veterans' programs the fair and full consideration they deserve.

In entering into agreement with the Senate Republican leadership, the administration has very substantially changed the positions it took on various VA programs in its original budget submissions. However, it has not provided revisions to the detailed information regarding VA programs that it submitted in February in justification of the President's original budget. At that point, the VA provided 5-volume sets of backup books that contained the information set forth in the Budget itself and the Budget Appendix plus a great deal of additional detail with respect to VA programs and operations under the President's budget.

Now, the Reagan/Republican leadership agreement has rendered the original budget and these backup submissions obsolete with respect to VA Compensation, Pension, Health Care, and Home Loan Guaranty Programs and related administrative operations.

In light of the obvious need for updated information reflecting those changes, I wrote to Administrator of Veterans' Affairs Harry Walters on April 12 to request that he provide revisions of the VA budget documents showing the effects of the changes in the administration's positions. Because I then expected the budget resolution to come before the Senate within several days, I asked the Administator to provide whatever revised data he could by April 18 and to let me know how soon thereafter he could provide the rest.

Having received no response at all, on April 26, I again wrote to the Administrator to renew my earlier request and to urge him, in light of the fact that the fiscal year 1986 budget resolution was already before the full Senate, to provide the needed updates as quickly as possible.

I did not receive any response to either letter until yesterday, when I received a May 7 letter from the Administrator that provided none, absolutely none, of the information that I had requested regarding the impact of the leadership package on the VA. In essence, the Administrator provided only brief descriptions of the leadership package as it applies to VA programs—information made public weeks ago.

Mr. President, I consider it a most regrettable discourtesy—and a disparagement of the important responsibilities of this body with respect to the VA's budget—that no data showing the programmatic and administrative ramifications of the change in the administration's proposals have been provided.

This situation raises a rather obvious question regarding this nonresponsive attitude. What does the Administrator wish to conceal about the impact on the VA of the Reagan/Senate Republican leadership package? Are the outcomes so poor that he is too greatly embarrassed by the shabby treatment afforded veterans by the agreement—obviously imposed upon him—that he wishes to conceal the data from the U.S. Senate so that it might adopt the budget in ignorance of its true impact?

Whatever the answers to those questions—and I am convinced that the agreement is grossly unfair to veterans—we all need to recognize that the administration is playing a shell game. We are all the victims, along with the Nation's veterans and their families, of this great coverup.

This situation is most unfortunate. The Senate deserves whatever relevant information is available regarding the extremely important issues before us. These issues deserve to be decided on their merits, not as the result of tactical advantage.

Mr. President, the administration should not be handed the victory it seeks—the defeat of our amendment—through such concealment tactics. Where there is any doubt—and I submit there is much doubt in every area—as to just how devastating the Reagan/Republican leadership agreement would be to the VA's health care system, the VA Home Loan Guaranty Program, and the Compensation and Pension Program, those doubts should all be resolved against the administration.

If the administration's current proposals are fair to veterans, it should produce the data. Since it hasn't, it should be presumed they are not fair—and I have no doubt, based on the information I do have, that they are indeed unfair.

Mr. President, I ask unanimous consent that copies of my April 12 and 26 letters and the Administrator's May 7 letter be printed in the RECORD at this point.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
COMMITTEE ON VETERANS' AFFAIRS,
Washington, DC, April 12, 1985.

Hon. HARRY N. WALTERS,
Administrator of Veterans' Affairs, Vermont Avenue, NW., Washington, DC.

DEAR HARRY: I am writing in connection with the agreement reached last Thursday, April 4, between the President and the Senate Republican Leadership on the budget for FY 1985 through FY 1988.

Enclosed are excerpts from an April 5 memorandum prepared by the Senate Budget Committee Staff Director summarizing the major provisions of the agreement. As you can see, the memorandum provides very little information on the Veterans' Administration budget. Based on past practice, I do not expect the Budget Committee to provide any further detail, other than appropriations account totals, regarding the VA budget revisions under the

agreement and their impact on VA programs.

In the absence of the VA providing more detailed information, I am concerned that the Senate may proceed to consideration of this budget agreement without benefit of specific information regarding its impact on such matters as caseloads under the affected programs, staffing levels, and various other programmatic effects. Therefore, in order to enable the Senate and the Congress to evaluate the budget agreement into which the President has entered, I request that you prepare the changes to the VA documents submitted in February of this year in connection with the President's FY 86 budget submission that are necessary to show in detail the effects of the agreement on VA programs.

In light of the fact that the full Senate may begin consideration of the first concurrent resolution on the budget for FY 86 (S. Con. Res. 32) during the week of April 22, I urge that you develop this information as quickly as possible. Also, in the interest of expediting submission of the changes, I suggest that you provide them in the form of either revised pages with changes made by hand, wherever that would be practical, or as replacement pages.

In addition, I note that the Presidential agreement will directly affect VA budget authority and outlay levels in FY's 87 and 88, as well as FY 86—both through overall caps on domestic spending in each of FY's 86, 87, and 88 and reconciliation instructions designed specifically to require the Veterans' Affairs Committees to report legislation that would produce certain budget levels for the VA in each of those years. Therefore, I also request that you provide detailed information with respect to the VA budgets for FY's 87 and 88 under the agreement and the programmatic effects—at least in terms of the various caseloads and staffing levels involved.

Please also let me know what effect any overall agreement to reduce the federal workforce through this new budget proposal has on VA staffing levels for FY's 86, 87, and 88.

I look forward to your response to this request and ask that, no later than April 18, you provide me with whatever information is available at that point and a timetable for providing the remainder.

Finally, as you know, I have longstanding concerns regarding the ability of the individual serving as Administrator to participate in and influence budget decisions within the Executive Branch that affect the VA. During your confirmation hearing in December 1982, in response to a question I asked you in this regard, you stated, "I intend to run the Veterans' Administration, and I intend to represent our budget to OMB. It is not going to be the other way around." Also, responding to my question as to whether you could provide assurance that you would be consulted before any Administration revisions are made in the VA budget, you indicated that you could not give such assurances but that being consulted or heard in that regard would "be of high priority" to you. Since the VA's budget has been very significantly revised in the agreement into which the President entered, I ask that you include in your initial response to this letter a description of your involvement in the decision-making processes, insofar as VA programs are concerned, leading up to both the formulation of the Administration's position in the negotiations with the Senate Republican Leadership and the final agreement.

As always, I greatly appreciate your cooperation and assistance with regard to matters of concern to our Nation's veterans and their families.

With warm personal regards,

Cordially,

ALAN CRANSTON,
Ranking Minority Member.

U.S. SENATE,
COMMITTEE ON VETERANS' AFFAIRS,
Washington, DC, April 26, 1985.

Hon. HARRY N. WALTERS,
Administrator of Veterans' Affairs, Vermont Avenue, NW., Washington, DC.

DEAR HARRY: I am writing to follow up on my letter of April 12, 1985, regarding the recent agreement reached by the President and the Senate Republican Leadership on the budget for FY 1986 through FY 1988.

In that letter, I requested detailed information from you on the impact of that budget agreement on Veterans' Administration programs. Specifically, I asked that you provide changes to the VA documents submitted in February of this year in connection with the President's FY 86 budget submission that would show in detail the effects of this budget agreement on VA programs in FY's 86, 87 and 88. Recognizing that you might not have been able to provide all of the information within a few days, I asked that by April 18 you provide whatever information you could at that point plus a timetable for furnishing the remaining information. I am very disappointed that I have not, as of yet, received any response to my request.

Yesterday, the Senate began consideration of the First Concurrent Resolution on the Budget for FY 1986 (S. Con. Res. 32). Without the requested information from you, as the Administrator of Veterans' Affairs, on the White House/Senate Republican Leadership (WH/SRL) agreement, I am concerned that the Senate and the Congress will be denied the kind of specific information needed to understand fully and evaluate fairly what the programmatic effects of the WH/SRL package would be on the VA. Therefore, I am renewing my request and strongly urge you to provide the information, as outlined in my April 12 letter, as quickly as possible.

Also, at a meeting of the Committee on Veterans' Affairs on Tuesday, April 23, the Chairman stated that, on the Administration's initiative, the WH/SRL package had been modified to extend the period over which the VA home-loan guaranty fee would be increased to 3.8 percent and to make any increase above 2 percent contingent upon a determination by the Administrator of Veterans' Affairs, based on annual studies of the solvency of the program, that the increase would be needed in order to keep the program actuarially sound. The Administrator would also have the authority, consistent with the actuarial soundness of the program, to decrease the fee. Under the revised proposal, the fee would double to 2 percent of the loan amount, effective October 1, 1985, and further increases could not exceed 2.5 percent in FY 87, 3 percent in FY 88, 3.5 percent in FY 89, and 3.8 percent in FY 90.

In addition to responding to my request in my April 12 letter regarding your role in the formulation of the WH/SRL package as it affects the VA, please describe your role in the negotiations and the decision-making process that led to this modification in the fee-increase proposal.

In view of the fact that the FY 86 budget resolution is currently before the full Senate, the need for this information is most urgent, and I hope to hear from you at your earliest opportunity.

With warm regards,

Cordially,

ALAN CRANSTON,
Ranking Minority Member.

VETERANS' ADMINISTRATION,
Washington, DC, May 7, 1985.

Hon. ALAN CRANSTON,
U.S. Senate,
Washington, DC.

DEAR SENATOR CRANSTON: Your letter of April 12, 1985 requested specific details on VA programs impacted by the budget agreement reached on April 4, between the President and the Senate Republican Leadership. We have received essentially the same information you have except we also have some information on a budget authority basis. Any analysis prepared is complicated by the fact that the Budget Committee is working from a baseline which is different from the President's Budget.

With respect to budget authority, information received indicates that the amount included for VA programs is $26.7 billion which is $400 million below the President's Budget request. A significant portion of this reduction represents the reduction in cost-of-living allowances in Compensation and Pensions from 4.1% to 2.0%.

The reduction to a 2.0% COLA is consistent with the Committee's proposal to hold the Social Security cost-of-living increase to 2.0%. I support this proposal. As I have always stated, I fully support budget deficit reduction initiatives so long as they are applied consistently and veterans do not take a disproportionate share of the reductions.

The agreement actually reduced the VA housing loan origination fee from the President's Budget level of 5.0% to 3.8%. Also additional receipts are anticipated from the collection of third party reimbursements for non-service-connected care to privately insured veterans. The change in the loan fee should have no impact on budget authority.

With respect to FY 1987 and FY 1988, no attempt is being made to bridge changes from the President's Budget estimate. As you know I testified during the budget hearings that the outyear base totals were plugged numbers. Therefore, any comparison from that base would be meaningless. The FY 1987 and FY 1988 base totals shown in the FY 1986 President's Budget will be renegotiated when the FY 1987 budget process begins with OMB.

Thank you for your continued interest in the budget activities for the Veterans Administration. Please be assured that I will continue to monitor the FY 1986 budget process to ensure that our nation's veterans receive the funding support they so richly deserve.

Sincerely,

HARRY N. WALTERS,
Administrator.

SUPPORT OF VETERANS' ORGANIZATIONS

Mr. CRANSTON. Mr. President, major veterans' organizations have not been fooled by any of the attempts we have seen to portray the Reagan/Senate leadership package as fair to our Nation's veterans. The American Legion, the VFW, the Disabled American Veterans, the AMVETS, and the Paralyzed Veterans of America have all announced—and have steadfastly maintained—their support for our

amendment and have strongly pursued its adoption.

Mr. President, I ask unanimous consent that copies of communications from these organizations in support of our amendment be printed in the RECORD at the conclusion of my statement.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

CONCLUSION

Mr. CRANSTON. Mr. President, for all the foregoing reasons, and others that I will be stating as the debate on our amendment ensues, I urge all of my colleagues—on both sides of the aisle—to vote for our amendment. Essential fairness to our Nation's veterans requires what we are proposing.

EXHIBIT 1

THE AMERICAN LEGION,
Washington, DC, April 19, 1985.

DEAR SENATOR: On April 2 our National Commander, Clarence Bacon, presented to you The American Legion's assessment of proposed funding levels for various Veterans Administration budget accounts in Fiscal Year 1986, in addition to the Legion's belief that congressional treatment of VA spending over the past ten years has demonstrated fiscal restraint. In that letter Commander Bacon expressed concern over pending recommendations to authorize no cost of living adjustment in disability compensation benefits, to eliminate 4,000 VA medical care personnel, to apply a third party reimbursement mechanism for certain VA medical services rendered, and to impose a substantially increased VA home loan user fee.

The American Legion remains convinced that these proposals are unwise, and that they fail when subjected to tests of equity, program integrity, or budgetary good sense. It appears to us that these proposals were developed as a frantic effort to generate short term savings, with no apparent concern for program participants/beneficiaries or long term costs. For example, VA's inability to treat veterans because of reduced medical staffing levels would likely result in a transfer of that treatment obligation to the Medicare program or some other federally-supported health service.

Our analyses of the third party reimbursement and increased user fee recommendations lead us to believe that even the actual short term savings to be derived are much less than those projected. We expect a dramatically reduced participation rate in the home loan program, whether the 3.8 percent fee is imposed at one time or it is phased in over several years. In our opinion, projected savings associated with the reimbursement initiative are based upon an assumption that a substantial number of veterans using the VA hospital system also have private medical insurance. We believe the VA patient population to be almost exclusively without such insurance. We also believe that the expense of establishing an accounting system sufficient to accommodate the reimbursement procedure would further actual savings.

In view of these considerations, The American Legion urges you to support our positions when the FY 86 first concurrent resolution is debated on the Senate floor. Specifically, we request that you (1) approve funding to equitably treat disability compensation recipients, (2) approve funding to reinstate critically needed VA health care personnel, (3) reject the third party reimbursement plan and (4) reject the proposed home loan user fee increase.

Among those amendments which we have had the opportunity to review, we find the one sponsored by Senator Cranston to meet our objectives. We, therefore, encourage you to join with Senators Matsunaga, DeConcini, Mitchell and Rockefeller by cosponsoring the amendment and voting for it on the Senate floor.

Sincerely,

E. PHILIP RIGGIN,
Director, National Legislative Commission.

VETERANS OF FOREIGN WARS OF THE UNITED STATES,
Washington, DC, April 24, 1985.

Hon. ALAN CRANSTON,
U.S. Senate,
Washington, DC.

DEAR SENATOR CRANSTON: The purpose of this letter is to express the views of the Veterans of Foreign Wars with respect to the budget for the Veterans Administration for fiscal year 1986 under Function 700, Veterans' Benefits and Services.

Quite frankly, we cannot in good conscience support any of the Administration's or majority proposals put forth to date. Not the President's proposed budget, not the First Concurrent Budget Resolution, S. Con. Res. 32, and not the Senate/Administration Deficit Reduction Plan.

The only alternative we find acceptable and can support at this time is Amendment No. 24 to S. Con. Res. 32 introduced by the Honorable Alan Cranston.

Therefore, and on behalf of the more than 2 million men and women of the Veterans of Foreign Wars and the 700,000 members of our Ladies Auxiliary, I urge you to support and vote for passage of the Cranston Amendment.

Sincerely,

BILLY RAY CAMERON,
National Commander-in-Chief.

DISABLED AMERICAN VETERANS,
Washington, DC, April 23, 1985.

Hon. ALAN CRANSTON,
U.S. Senate,
Washington, DC.

DEAR SENATOR CRANSTON: Tomorrow the Senate will begin debate on the First Concurrent Budget Resolution for Fiscal Year 1986.

The debate will center on the Senate Budget Committee recommendations and pending amendments thereto, to include the White House/Senate Republican Leadership Compromise Agreement.

Quite frankly, the DAV is adamantly opposed to the recommendations of the Senate Budget Committee and the White House/Senate Republican Leadership Agreement.

Specifically, in terms of veterans' benefits and programs, these proposals:

1. fail to treat service-connected disabled veterans in receipt of VA compensation and widows and orphans in receipt of VA service-connected death (DIC) benefits equally with all other federal beneficiaries in terms of cost of living adjustments;

2. jeopardize the quality of VA health care by reduced funding for medical care and illusionary savings projected from health insurance reimbursement; and

3. require veterans to pay a greater origination fee to use the VA Home Loan Guaranty Program—in other words, require veterans to pay for the privilege of using an earned benefit.

In response to the Senate Budget Committee and White House/Senate Republican Leadership proposals regarding veterans' benefits, Senator Alan Cranston will be offering an amendment to restore funds necessary to treat service-connected disabled veterans and DIC recipients equally with all other federal beneficiaries and to assure quality health care for eligible veterans.

Therefore, on behalf of the more than one million members of the Disabled American Veterans, I strongly urge you to cast your vote in favor of the Cranston Amendment to the First Concurrent Budget Resolution for Fiscal Year 1986.

Sincerely,

CHAD COLLEY,
National Commander.

DISABLED AMERICAN VETERANS,
Washington, DC, May 7, 1985.

Hon. ALAN CRANSTON,
U.S. Senate,
Washington, DC.

DEAR SENATOR CRANSTON: I am aware that you have recently received a number of letters concerning the question of adequate funding for the Veterans Administration.

Apparently, some controversy has evolved regarding the impact the Senate Budget Committee recommendation and the White House/Senate Republican Leadership Agreement would have upon VA medical care in Fiscal Year 1986 and thereafter.

As you know, the President's original Fiscal Year 1986 request for VA medical care was $9.051 billion in outlays which assumed a 5% pay cut and third party reimbursements from private insurance carriers. The White House/Senate Republican Leadership Agreement proposes $8.755 billion in outlays, but assumes no pay cut. However, the agreement does assume substantial savings from implementation of a medical care means test and reimbursements from private insurance carriers. Senator Alan Cranston's amendment proposes $9.128 billion in outlays for VA medical care—which rejects the "so-called" savings from health insurance reimbursements/pay cuts and maintains medical services essentially at the program level appropriated for Fiscal Year 1985.

The simple fact of the matter is that the Senate Budget Committee recommendation and the White House/Senate Republican Leadership Agreement would, if adopted, deal a serious blow to VA medical care. In the final analysis, under either of these proposals there would be significant reductions in VA health care personnel and more eligible veterans would be denied VA health care services in future years.

The VA's own statistics indicate that, at the present time, they are turning away in excess of 20,000 eligible veterans seeking VA health care each month—how many would be turned away this time next year should these proposals be enacted?

Therefore, on behalf of the more than one million members of the Disabled American Veterans, I again strongly urge you to cast your vote in favor of the Cranston Amendment to the First Concurrent Budget Resolution for Fiscal Year 1986.

Sincerely,

CHAD COLLEY,
National Commander.

[Mailgram]

APRIL 30, 1985.

TO ALL SENATORS: On behalf of Paralyzed Veterans of America and our 11,000 catastrophically disabled members, I request your favorable consideration and support for amendment 24 Senate Concurrent Resolution 32.

PVA understands the need to deal with the ever-increasing projected Federal deficits, and amendment 24 sets the VA's budget levels at the minimum necessary to carry out our Nation's commitment to those who served, and to remedy major deficiencies in the reported Senate Concurrent Resolution 32 and in the proposal of the Republican leadership and White House.

This amendment was submitted by the ranking minority member of the Senate Committee on Veterans' Affairs, Senator CRANSTON, who realizes the needs of our Nations veterans.

PVA asks for your support for amendment 24 which realistically addresses the health care needs of America's veterans and provides for an overall freeze on Veterans Administration spending in FY86 at the President's proposed FY85 level, plus funding for a cost-of-living adjustment for veterans with service-connected disabilities.

RICHARD HOOVER,
PVA President.

Mr. CRANSTON. Mr. President, pursuant to the prior unanimous-consent agreement, I send to the desk a modification of the amendment making the changes of $100 million in five figures on the first 3 pages due to differences from adding and subtracting unrounded numbers in fiscal year 1988 only.

The PRESIDING OFFICER (Mr. RUDMAN). The Senator's amendment is so modified.

The modified amendment follows:

In the pending amendment, do the following:

On page 3, increase the amount of line 12 by $500,000,000.

On page 3, increase the amount on line 13 by $900,000,000.

On page 3, increase the amount on line 14 by 1,200,000,000.

On page 3, increase the amount on line 18 by $600,000,000.

On page 3, increase the amount on line 19 by $1,100,000,000.

On page 3, increase the amount on line 20 by $1,400,000,000.

On page 3, increase the amount on line 25 by $600,000,000.

On page 4, increase the amount on line 1 by $1,100,000,000.

On page 4, increase the amount on line 2 by $1,400,000,000.

On page 4, increase the amount on line 6 by $600,000,000.

On page 4, increase the amount on line 7 by $1,700,000,000.

On page 4, increase the amount on line 8 by $3,100,000,000.

On page 4, increase the amount on line 12 by $600,000,000.

On page 4, increase the amount on line 13 by $1,100,000,000.

On page 4, increase the amount on line 14 by $1,400,000,000.

On page 27, strike out the amount on line 4 and insert in lieu thereof "$27,600,000,000".

On page 27, strike out the amount on line 5 and insert in lieu thereof "$27,100,000,000".

On page 27, strike out the amount on line 13 and insert in lieu thereof "$28,200,000,000".

On page 27, strike out the amount on line 14 and insert in lieu thereof "$27,800,000,000".

On page 27, strike out the amount on line 22 and insert in lieu thereof "$28,700,000,000".

On page 27 strike out the amount on line 23 and insert in lieu thereof "$28,400,000,000".

On page 33, increase the amount on line 2 by $100,000,000.

On page 33, increase the amount on line 3 by $100,000,000.

On page 33, increase the amount on line 11 by $200,000,000.

On page 33, increase the amount on line 12 by $200,000,000.

On page 43, strike out the amount on line 7 and insert in lieu thereof "$292,000,000".

On page 43, strike out the amount on line 8 and insert in lieu thereof "$139,000,000".

On page 43, strike out the first amount on line 9 and insert in lieu thereof "$199,000,000".

On page 43, strike out the second amount on line 9 and insert in lieu thereof "$199,000,000".

On page 43, strike out the amount on line 10 and insert in lieu thereof "$177,000,000".

On page 43, strike out the amount on line 11 and insert in lieu thereof "$253,000,000".

On page 50, strike out the amount on line 18 and insert in lieu thereof "$292,000,000".

On page 50, strike out the amount on line 19 and insert in lieu thereof "$130,000,000".

On page 50, strike out the first amount on line 20 and insert in lieu thereof "199,000,000".

On page 50, strike out the second amount on line 20 and insert in lieu thereof "$199,000,000".

On page 50, strike out the amount on line 21 and insert in lieu thereof "$177,000,000".

On page 50, strike out the amount on line 22 and insert in lieu thereof "$253,000,000".

On page 52, increase the amount on line 1 by $400,000,000.

On page 52, increase the amount on line 3 by $424,000,000.

On page 52, increase the amount on line 4 by $461,000,000.

Mr. CRANSTON. Mr. President, I ask unanimous consent that the Senator from West Virginia [Mr. BYRD] be added as a cosponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. INOUYE addressed the Chair.

Mr. INOUYE. Will the Senator from California yield?

Mr. CRANSTON. I yield 1 minute to the Senator from Hawaii.

The PRESIDING OFFICER. The Senator from Hawaii is recognized.

Mr. MATSUNAGA. Mr. President, as a cosponsor of the Cranston amendment, I join the Senator from California in calling for its favorable consideration. As the Senator from California has explained, our amendment would not increase veteran benefits. It would simply restore some of the drastic reductions proposed in the Republican-White House budget resolution, and freeze spending for veterans programs at the current, fiscal year 1985 level.

Of particular concern to me is the fate of medical care for disabled veterans under the proposed agreement between the Republican leadership and the White House. According to the Veterans' Administration [VA] itself, the agreement calls for cuts of $4.7 million in fiscal year 1987 and $8.7 million in fiscal year 1988. Cuts of this magnitude mean that the VA could not continue providing service at the existing level, much less provide the increased services which will be needed in future years due to the aging of World War II and Korean conflict veterans. Indeed, there is every indication that the proposed severe budget cuts will cripple the opening of new VA medical facilities already planned and under construction, and that they may cause the closure of several existing facilities, layoffs of approximately 25,000 VA health care personnel over the 2-year period, and a drastic reduction in both in-patient beds and outpatient visits.

Mr. President, our amendment also rejects a proposal contained in the Republican leadership-White House budget resolution which would require private insurance carriers to delete from their contracts with veterans, provisions precluding payment for care received at VA facilities. Such insurance carriers would then be required to reimburse the VA for care provided to non-service-connected disabled veterans. There are numerous problems connected with this administration-sponsored proposal. For one thing, VA medical facilities are not subject to the same utilization and cost controls applied to private sector facilities. Furthermore, it is not known how many veterans receiving treatment in VA facilities have private health insurance. And, finally, it appears that this requirement would impose tremendous new administrative costs on the VA. Private health insurance carriers have, over the past several years, expressed to Congress their strong opposition to this type of legislation, and it appears that there may even be constitutional problems with the proposal.

Finally, with respect to veterans' health care, Mr. President, I would like to point out that the Republican leadership-White House agreement assumes the enactment of legislation which would impose a means test on all non-service-connected disabled veterans seeking treatment at VA facilities. Although it is claimed that substantial cost savings will be realized from this new rule, no hard proof of such savings has been submitted to the Veterans' Affairs Committee. Indeed, the imposition of a means test might result in higher Medicare costs.

The amendment offered by the Senator from California and myself, along with others, would also reject the proposed increase in fees charged to veterans who use their home loan guar-

anty. The increase is not needed, for information provided by the Congressional Budget Office reveals that the VA's Loan Guaranty Revolving Fund is now solvent, for at least the next 5 years. My colleagues may recall that Congress only recently doubled the fee paid by veterans who use their home loan guaranty from one-half of 1 percent to 1 percent. A further increase to 2 percent as proposed by the administration and Republican Senate leadership is totally unnecessary.

Mr. President, it is ironic that we should be here in the Senate fighting to save benefits provided for veterans even as television brings to us pictures of the solemn observances of the 40th anniversary of V-E Day. This is not time for Congress to renege on the commitments made over the past 40 years to the veterans who sacrificed so much to preserve our American way of life. It is no time to deny medical care, to deny adequate medical treatment to the disabled or sick veteran and it is no time to deny home ownership to his younger counterpart. I strongly urge my colleagues to support the pending amendment, which would assure an adequate level of benefits for veterans.

Mr. MURKOWSKI addressed the Chair.

The PRESIDING OFFICER. The Senator from Alaska.

Mr. MURKOWSKI. How much time do I have?

The PRESIDING OFFICER. The Senator from Alaska has 19 minutes remaining.

Mr. MURKOWSKI. Mr. President I rise to speak against the amendment to function 700: veterans' benefits and services, which has been offered by my esteemed colleague and ranking minority member of the Veterans' Affairs Committee, Senator ALAN CRANSTON. This amendment would add more than $4 billion in outlays between fiscal year 1986 and fiscal year 1988 for veterans' programs over the amounts originally contained in Senate Concurrent Resolution 32, as reported.

The majority of the Senate has already voted to add back a substantial amount of funds—$1.5 billion in outlays for fiscal year 1986–88—to provide a full COLA for both the VA compensation and pension programs for fiscal years 1986, 1987, and 1988, in order to ensure that our Nation's veterans would receive no less than the same full COLA's that beneficiaries of Social Security and other Federal entitlement programs would receive.

The budgetary impact on the veterans' function as a result of the COLA conforming amendment would be an increase in the Federal deficit in fiscal year 1986 by $200 million.

My esteemed colleague, Mr. CRANSTON, now proposes to add an additional $2.1 billion and $2.8 billion in outlays in budget authority to function 700: veterans' benefits and services above the $1.5 billion added back to provide full VA COLAs over the next 3 fiscal years. If we are to act responsibly to reduce the spiraling deficit, we must reject outright this costly proposal. We will never reduce Federal spending if we begin adding back dollars in the amount suggested of my distinguished colleague from California, over and above the compromise already agreed to for the veterans' function. We simply cannot continue to add funds to this function or other functions, if we intend to significantly reduce the Federal deficit this year and to lay the foundation for deficit reduction in the future.

When the Budget Committee reported Senate Concurrent Resolution 32, I had significant reservations regarding some of the proposals for function 700. During the discussions between the Senate leadership and the administration, I expressed my strong reservations, especially in the areas of VA pension and compensation COLA's, as well as the home loan origination fee increase. I am pleased that my concerns were well received and that the Senate leadership/administration compromise subsequently incorporated changes in veterans' COLA's and in the loan guarantee funding fee which took into consideration my objections.

Frankly, I still have reservations about some components of this compromise deficit reduction plan for function 700. However, I am satisfied that as a compromise it has resolved, to a reasonable extent, the major concerns which I had expressed on the original inequitable recommendations included in the resolution as reported. The budget compromise for function 700 was reached after careful deliberation and consultation with myself and others. It incorporates sufficient funding levels to ensure the continuation of quality VA programs and services for fiscal year 1986 and the outyears.

My greatest concern with Senate Concurrent Resolution 32, as reported by the Budget Committee, was the lack of COLA equity within the VA compensation and pension programs and the lack of equitable treatment with regard to other similar Federal entitlement programs. I was also deeply concerned with any recommendation to increase the origination fee on the VA Home Loan Guarantee Program without first examining the entire program in detail with the purpose of identifying and correcting any problems within the program.

The compromise has addressed my concerns in both of those areas. Although the compromise amendment does not completely eliminate the loan guarantee origination fee increase, the rationale for the policy adopted in the compromise is supportable and makes good sense to me. The approval of the amendment offered by the distinguished majority leader, which I cosponsored, has now restored full COLAs for the veterans' and other entitlement programs.

Overall, the compromise agreement, as now amended, would provide $27.1 billion in budget authority and $26.5 billion in outlays for function 700 in fiscal year 1986. This represents an increment of $200 million in budget authority and $200 million in outlays for fiscal year 1986 over the levels provided for in the leadership/White House compromise.

Aside from the COLA issue, there are two additional major components of the compromise agreement for function 700 which differ from Senate Concurrent Resolution 32 as reported, which I wish to address briefly.

First, the compromise would gradually increase the VA Home Loan Program origination fee for guaranteed and vendee loans from 1 to 3.8 percent over 5 years. The annual increments would be provided by statute as follows: 2 percent in fiscal year 1986, 2.5 percent in fiscal year 1987, 3.0 percent in fiscal year 1988, 3.5 percent in fiscal year 1989 and 3.8 percent in fiscal year 1990. The 3.8 percent cap by fiscal year 1990 would be equal to the fee currently charged for FHA mortgage loans. Additionally, the VA would be required to conduct a comprehensive study on the loss rate of the program, and after fiscal year 1986, the Administrator would have the discretion to reduce the origination fee below the statutory rate if the study indicates that the full statutory rate is not necessary.

The compromise would significantly address the immediate solvency problem of the loan guarantee program and would have minimal impact on veteran users of this program. All the existing benefits of the program would continue; that is, no down payment, fully assumable VA loans, interest rates somewhat below market rates, and an exemption for service-connected disabled veterans. The average VA home loan payment on an average VA mortgage of $68,000 would only increase by $7 per month as a result of the recommended 1 percent increase for fiscal year 1986. The fee could be financed over the life of the loan and veterans would still receive the benefit of home ownership through the best mortgage program available to our Nation's veterans, while the increased fees will help keep the loan guarantee fund solvent. The Committee on Veterans' Affairs held an extensive hearing on the VA Home Loan Guarantee Program on May 1, and the committee will continue to look at possible administrative and legislative options to improve the program.

Second, the overall budget totals for VA medical care and medical construc-

tion would not change from the resolution as reported by the Budget Committee as a result of the compromise. The only change would be the added assumption of an income means test for non-service-connected—I emphasize non-service-connected—disabled veterans regardless of age, as a component of reconciliation savings. This means test policy assumption would establish uniform medical care eligibility criteria for all non-service-connected disabled veterans.

Mr. President, historically, the primary mission of the VA health care system has been to furnish care to service-connected disabled veterans and to veterans unable to pay for needed medical care. In 1970, Congress extended eligibility for VA hospital and nursing home care to veterans 65 years of age and older, regardless of their ability to pay.

This change resulted in inequitable treatment of non-service-connected veterans on the basis of age. This means test proposal included in the leadership/White House compromise is intended to overcome this inequity and to enable the VA, for the first time since 1970, to provide all non-service-connected veterans with equal access to VA health care based on medical and financial need, not age alone.

A means test is not a new idea. Public Law 96-330, the Veterans Administration Health-Care Amendments of 1980, established a means test. Those veterans "unable to defray the cost of VA health care" were defined as veterans who are service-connected, receiving VA pensions, or receiving Medicaid. I note for the record that Senator CRANSTON supported this measure at that time.

The Congressional Budget Office projects savings for this proposal. In fiscal yer 1986, there would be net savings of $439 million in budget authority and $361 million in outlays. These figures include an offset for Medicare costs of $79 million in outlays for fiscal year 1986.

There have been several assertions raised by my distinguished colleague, Mr. CRANSTON, about the impact of the budget agreement on the future of the VA's health care system. These are serious charges and we must set the record straight.

First, in his May 1 "Dear Colleague" letter, Senator CRANSTON states—

> The proposed reductions would slash the amount of VA care provided and the staffing levels at VA facilities—by eliminating nearly 70,000 inpatient episodes of care, 300,000 outpatient visits, and more than 8,000 employees.

The VA's Chief Medical Director, Dr. John Ditzler, stated at congressional hearings that the VA budget for fiscal year 1986 is sufficient—I emphasize is sufficient—to meet the health care needs of veterans using the system. After receiving a copy of the Dear Colleague letter, we solicited the views of Dr. Ditzler again on these specific points. We quoted him the projections outlined by Senator CRANSTON and asked him to verify the information. He told us emphatically that these statistics cannot be substantiated.

A second point raised by my colleague is that, "current plans for facility activations resulting from construction projects currently underway or planned and scheduled for activation in fiscal year 1987 or fiscal year 1988," could be canceled or experience serious cutbacks. It is important to note that the word "could" in Senator CRANSTON's predictions has been emphasized in several of the statements made in the Dear Colleague letter. The VA has assured us that currently they have no plans to cut back on any planned activities and that no layoffs will take place. The critical factor in this entire discussion is that the VA acknowledges that it does not plan concretely for outyear facility activations because of the uncertain nature of the congressional budget process. And even if the VA did engage in such planning, which again, they do not, there is always a certain amount of "construction slippage." Projects are delayed again and again, often due to the seemingly endless number of changes made to individual projects throughout the overly lengthy construction planning process.

Mr. President, if a problem does exist for the VA with respect to sufficient staffing needs, it is not a result of any fiscal year 1986 budget action. I as chairman of the Veterans' Affairs Committee, and Senator SIMPSON, our majority whip and chairman before me, have discussed and proposed and attempted to persuade the VA to reexamine the relationship between its construction program and its current services and facilities. We have advocated and even insisted that the VA ensure that its existing facilities are fully staffed and operational before planning or attempting to activate new programs and facilities.

The VA maintains, on the one hand, that it has a working and workable resource allocation program. The "strategic management system" has a planning component, a staffing component, and a resource allocation component. And yet we see, time and time again, that certain facilities do quite well under the resource distribution method and others do not fare quite so well at all. We also know there are VA hospitals which operate at below normal occupancy rates. VA statistics called, Summary of Medical Programs January 1984, provide data on occupancy rates for all hospitals and for each psychiatric, surgical, and medical bed sections. The average occupancy rate for all 172 medical centers is 79.8 percent. This conforms with desirable occupancy rate norms. However, certain facilities have total occupancy rates well below this norm. Twenty VA hospitals have occupancy rates between 60 and 70 percent. Two hospitals have occupancy rates between 50 and 60 percent.

There could be many reasons for this occurrence, some of which may be outside the control of the VA or the individual hospital administrator. And yet, We would be irresponsible in our role if we did not question the advisability of this practice. Is this an efficient use of VA resources? Are there extra beds in the VA health care system and if so, how can anyone possibly suggest that veterans are or will be denied care?

The second important point I wish to raise concerning this issue is to note that a draft General Accounting Office study has found that almost half the VA's hospital days are medically unneccessary. The draft report, yet to be released, found that "43 percent of days that medical and surgical patients spent in VA hospitals in fiscal year 1982 could have been avoided." About 20 percent of the total days were attributable to the absence of efficient management practices at the hospitals while 23 percent were attributable to the unavailability of alternate levels of care. The VA service chiefs in the hospitals agreed with 86 percent of the avoidable days indentified by the consultant.

I can not overemphasize the importance and the relevance of these numbers. The budgetary implications of this review are critical to the issues we are discussing here today.

By establishing more efficient patient management practices, patient stays could be reduced and hospital beds could be freed to serve additional numbers of acutely ill patients. "In so doing", GAO concludes, "VA could meet more of the expected patient demand with existing resources, and avoid constructing at least a part of the expensive hospital facilities it says it may need in the future.

Third, an attachment to the "Dear Colleague" letter that was sent by my distinguished colleague [Mr. CRANSTON], stated:

> The attached letter explains that if the Republican Leadership/White House agreement with respect to VA health-care funding is adopted the VA will very likely be forced to forgo, in fiscal year 1987 and fiscal year 1988, 111 facility or service activations resulting from construction projects currently underway or scheduled for activation in those years.

Each letter then proceeded to list on a State-by-State basis which specific construction projects would not be activated.

Mr. President, I am compelled to respond to these "projections," "assertions," or "speculation," which term is

most appropriate, to defuse any apprehension and/or confusion which these letters may have generated.

At the outset, I will state in no uncertain terms that these facility and project-specific projections which my esteemed colleague states that the VA will not activate within each of my colleagues States are totally unfounded.

The Chief Medical Director of the Veterans' Administration has indicated that these "projections" of foregone activations during fiscal year 1987 and fiscal year 1988 cannot be substantiated by the Veterans' Administration. The VA plans, year by year, for facility activation after the adoption of a Federal budget in order to make specific plans within available resources.

Further, the Senate leadership/White House compromise agreement clearly does not assume any reconciliation savings with the extreme specificity that the letters from Senator CRANSTON would suggest. Rather, the compromise agreement makes only broad policy assumptions to achieve reconciliation savings. These assumptions for VA hospital and medical care include: A freeze on medical construction at the fiscal year 1985 program level, and reforms to medical care through the imposition of an income means test on VA medical care eligibility for all non-service-connected and non-poor veterans, and reimbursement from private health insurers for care provided by VA medical facilities for the treatment of veterans with non-service-connected disabilities. These are merely broad policy assumptions which the authorizing committee may choose to enact in whole, in part, or not at all, in the committee's task of recommending reconciliation savings to meet the target established for the Veterans' Affairs Committee. The reconciliation savings for the Committee on Veterans' Affairs may be achieved by means entirely separate from the assumptions which the compromise agreement has recommended. The ultimate decision on the means of deriving reconciliation savings rests with the authorizing committee—not with the compromise budget package.

Further, there has historically been slippage in the completion dates for VA medical construction projects, which has historically delayed activation of these facilities. Therefore, the outyear activation projections included in Senator CRANSTON'S letters are extremely difficult to project with any reasonable degree of accuracy. It is also significant to take into account that, currently, the VA has an unobligated balance which exceeds $1 billion in its construction program.

The Administrator of the Veterans' Administration has also cautioned at the hearing on the VA's fiscal year 1986 budget held by the Committee on Veterans' Affairs, that:

The outyear numbers for medical care in this budget are plug numbers. They are not meaningful, and national policy decisions must yet be reached. Decisions which will affect the VA; discussions leading to these decisions will be conducted hopefully in the sunlight, including the Veterans' Administration, the Veterans' service organizations and all other interested parties.

Mr. President, veterans' issues are often difficult to discuss in a rational manner because all of us are anxious to ensure that the veterans of our Nation will never doubt for a moment the gratitude of our Nation for their service on our behalf. This debt of gratitude will certainly be paid this year as it always has been in the past and always will continue to be in the future.

As chairman of the Veterans' Affairs Committee, Mr. President, I accept the responsibility to ensure that the VA health care system remains an independent provider of the highest quality health care. Likewise, I accept the responsibility to ensure that all veterans' programs and services continue to be of the highest quality and most appropriate to reflect the needs of eligible beneficiaries.

Within this context, we must work together to provide those benefits and services. But veterans, above all others, will stand up as examples of our most patriotic Americans in saying that they do not want their programs to be set as an example of unrestrained Federal spending. If our economy does not recover, we are weakened as a Nation. And, although this is not a military issue, it strikes at the very core of what keeps us strong and free at home. So, I appeal to the patriotism of my colleagues. I appeal to their sense of responsibility, while I assure them that veterans' programs will be adequately funded by the "leadership" compromise—as amended—and I urge in the stongest possible terms, that they oppose the Cranston amendment.

Mr. President, I have two further observations to make with regard to fairness.

The assertion has been made that under the agreement that VA would be faced with a great dilemma. It could face serious cutbacks and massive reductions in services provided through existing facilities in fiscal year 1987 and fiscal year 1988, or have to cancel its current plans to activate facilities resulting from construction projects.

This is a false dilemma based on erroneous and misleading assumptions. Not one construction project will be delayed or deferred as a result of the agreement. Funding and staffing for facility activations will be provided.

The agreement provides for activation of nearly 2,400 nursing home beds by 1988 and the treatment of over 4,000 additional nursing home patients; and activation of new and expanded outpatient clinics which will accommodate an additional 400,000 outpatient visits in 1988.

The agreement proposes to freeze 1986 funding for the medical care account at the 1985 level, in a program which has experienced over 40-percent real growth in the last 10 years.

So, Mr. President, obviously the program is moving ahead.

Mr. President, the assertion has been made that large numbers of existing units and several total hospitals would almost certainly have to be shut down.

No hospitals will be closed. Further, the agreement fully supports maintenance of existing facilities. The VA has an unobligated balance of approximately $1 billion because of a backlog in VA medical construction projects for which funds have been authorized and appropriated.

The assertion has been made that the 3-year total cutbacks would produce layoffs of 33,000 employees.

No one would be laid off, Mr. President. The VA has an attrition rate of 17 percent per year which results in an annual turnover of over 32,000 employees.

The assertion has been made that the VA would eliminate 70,000 inpatient episodes of care in 1986. CBO estimates that under a means test 85 percent of current VA hospital users will continue to be eligible for care.

Mr. President, I yield to the majority whip, Senator SIMPSON.

Mr. SIMPSON. Mr. President, I thank the chairman of the Veterans' Affairs Committee for the extraordinary work he has done. He takes over one of the toughest jobs in the Senate. I have been there. I know what it is when you get the slings and arrows and the whole load from the various veterans' organizations in the United States. But I certainly hope we will reject this amendment.

It really is quite extraordinary, whether it is going to add $2.2 billion or $2.8 billion or $4.0 billion in 3 years or 4. Whatever the billions—it smacks of the attitude that we have not done anything for the veterans of the United States.

Mr. President, that is what just grinds me right down to the nub. We will spend 27 billion bucks-plus on the veterans of the United States of America during this year. I am a veteran. I served for 2 years in Germany. I am very proud of that. There are many in this body who have served and those who have given pieces of their anatomy for their country—BOB DOLE, STROM THURMOND, DAN INOUYE, LLOYD BENTSEN, MARK HATFIELD, AL CRANSTON, and many more. For heaven's sake, we have done more for the veterans of the United States than any other group within our society. What we are trying to do here is give heavy

dollars to the service-connected disabled veteran and go to some degree of means testing for the non-service-connected and the non-combat veteran. That is my view. That is what I am up to. You walk up to a guy on the street and say, "What should we do for the veterans of the United States?" And he says, "Anything it takes." And then you say, "Do you know that millions of them never left the United States, never served over 1 year and don't know a mortar tube from either end and yet draw every single benefit that a combat veteran draws?" They are surprised by that. Who wouldn't be?

That is the way it is. Millions of them may have been injured by something that happened while looking for a case of lemon extract in the mess tent to finish off a 3-dayer—and injured on furlough or other activity—and they have been drawing a green check for 20 years. That is reality.

So what we are trying to do is deal with a little reality. I will tell you what gets me, as one of the guys who has been laboring in this area. It is almost as if nowadays, if you are a veteran, you are somehow one of the disadvantaged in our society. I will tell you that embarrasses and offends me, absolutely offends me—that if you are a veteran, you are somehow disadvantaged. How did we ever get to that point? We got here because of some absolutely extraordinary system where we just ladle out the bucks and then we say, "If you don't vote for that, you are antipatriotic, you are antiveteran, you are everything worse." Bosh. And it keeps coming. They keep cranking it out in the bowels of this system through these staffs, through extraordinary novelty and adventurism, a lot of it from guys who feel guilty because they never served in the U.S. Armed Forces. That is a tedious, ponderous, pathtic process.

And I admire deeply what the VFW does. I am a lifetime member of the Veterans of Foreign Wars. I am a member of the American Legion, a member of Amvets. I know what they do. I greatly admire them. But they have a need to get their membership up, and the way they do it is to pretend that every veteran in America is disadvantaged. And that is a pretty poor way to do business. I tire of it. I think the rest of us should tire of it. But watch out when it comes to a vote. And I know how that goes, too.

Hospital construction, why you cannot even find how they build veterans hospitals. They do not have a list. They do not have a memory bank. They know not what they do with regard to construction. They just erect one for a former House chairman or a former Senate chairman. At least they have never named one for AL CRANSTON or me. I do not think we are going to make it.

That is where we are with the veterans' budget. They have 150 different data processing systems over there and they do not even know which button to press to get the information on construction.

Well, obviously, Mr. President, you see a person who is no longer the chairman of the Veterans' Affairs Committee, I've been there on the parade ground when they played the retreat at night. But I sure want to share with you that we are headed for some awful tough times in the United States of America when we think that every veteran who ever served this country—in war or peace is "disadvantaged."

Boy, that is not the way this old cowboy feels. It was the greatest privileage and honor of my life. They gave me the GI bill, GI life insurance, and I do not even remember them telling me that when I signed up. Is that not strange? Now, when you sign up, you have to get a list from your Government as to what it is that you get, what benefit handle you get your hand on when you join the U.S. Armed Forces. It is a duty and a responsibility and an honor. It is not a slot machine.

I thank the Chair.

Mr. DECONCINI. I am pleased to be an original cosponsor of the amendment being offered to the budget resolution by the distinguished ranking member of the Senate Veterans' Affairs Committee, Senator CRANSTON, which will restore crucial funding for certain programs administered by the Veterans' Administration.

I take my responsibilities as a member of the Senate Veterans' Affairs Committee very seriously and believe that we have an obligation to honor the commitments we have made to those who have served the Nation honorably during their military service. The budget resolution before us today does not, in my opinion, honor the commitments we have made to our veterans, nor does it meet the test of equity and fairness.

There are a number of reasons why I believe the resolution before us merits modification vis-a-vis the veterans of this Nation. First, the funding levels provided for VA health care are simply inadequate to meet projected needs and would seriously impair the VA's ability to provide comprehensive and quality health care to eligible veterans, as mandated by Congress. In addition, the projected savings to be realized through the adoption of the budget resolution are, at least in part, illusory. For example, the administration is projecting significant savings to be realized through the imposition of a means test for non-service-connected disabled veterans and for veterans over age 65. Yet, there is no data to support the projected savings. In fact, the directors of the three Arizona VA medical centers have reached the same conclusion I have—that little, if any savings would be realized from a means test since veterans who are ineligible under the test will simply be replaced by those who are eligible. The implementation of a means test for veterans over age 65 would simply force veterans to seek health care through the Medicare system which is more costly than VA care. Shifting costs from one Federal health care program to another makes no budgetary sense. If we are serious about reducing the budget deficit, then it is incumbent upon us not to use phony assumptions. But even if the projected budget savings were realistic, it is patently unfair to balance the budget in this high priority area of veterans' health care.

In light of the magnitude of the proposed cutbacks in VA health care, it is estimated that fiscal year 1986 staffing levels at VA medical facilities will be reduced by 8,000 employees, inpatient stays will be cut by 70,000 and outpatient visits will be slashed by 300,000. In the outyears, the funding reductions will have ever more serious consequences. The enormous cutbacks in funding for the outyears of the budget could be achieved in only one of two ways: By canceling plans for VA facility activations or by proceeding with those activations and making even larger reductions in services provided through existing facilities. If, in fact, the VA opts to cancel scheduled facility activations, two critically needed facilities in Arizona would be affected: a 60-bed nursing home care unit in Prescott, and 120 bed nursing home care unit in Tucson. The potential cancellation of similar activations nationwide should be a matter of serious concern to every Member of this body.

A second issue addressed in this amendment is the proposed fee increase for veterans who participate in the VA Home Loan Guaranty Program. Whether that fee is increased to 2 percent or to 3.8 percent or is phased in over a 3-year period, it still represents a discriminatory tax on veterans no matter how it is disguised. The loan guaranty revolving fund is currently solvent and CBO projects that no appropriation will be needed for at least 5 years. So, this proposal cannot be described as a spending reduction measure. It is a tax, pure and simple.

The VA Home Loan Guaranty is one of the most often used benefits by veterans. If the fee is increased, it will impair the ability of many veterans to purchase a home, especially those from the Vietnam era. It has been 10 years since the last American troops were removed from Vietnam and the wounds from that divisive conflict have finally begun to heal. Now is not the time to reopen those wounds and

undermine the process of reconciliation. But that is exactly what will occur if the fee increase proposal is adopted.

Mr. President, there is no more patriotic group of Americans than our veterans. They stand willing to share in the pain of reducing our Federal deficits. But the proposals incorporated in the budget resolution are not fair and I fully understand and share the veterans' opposition to it.

Mr. President, I commend Senator CRANSTON for proposing his amendment and I urge my colleagues to support it.

Mr. BUMPERS. Mr. President, I want to take this opportunity to express my strong support for Senator CRANSTON's budget amendment to restore the necessary funding levels and fairness to important veterans' programs. I believe that these changes are vital if we are to carry out our Nation's commitment to those veterans.

The fiscal year 1986 budget agreed to by the White House and the Republican leadership is blatantly unfair to veterans. No one is more concerned over the serious implications of the staggering deficit than I am, and I have made some extremely difficult decisions and cast some equally difficult votes. I have voted for both the Chiles/Hollings budget freeze proposal, which, had it been enacted, would have achieved a balanced budget by 1989. I also voted for the Byrd proposal, which would have treated veterans fairly and would have achieved substantial budget savings. Undoubtedly, many difficult decisions remain as we seek to restore the economy, and no program will or should be excluded from contributing its fair share to these efforts. However, it is inexcusable to expect the thousands of brave men and women who honorably served our country to bear such an inequitable share of the budget cuts.

Mr. President, I support each of the important provisions of this amendment because I believe they provide fair treatment of veterans and are consistent with our efforts to control spending. Spending would be frozen at those levels provided for fiscal year 1985, plus cost-of-living adjustments would be provided that are consistent with those which have been allowed for other Federal beneficiaries. I want to emphasize my belief that all benefit recipients are entitled to equal treatment, and this amendment affirms that equal treatment. The amendment also rejects the proposed increase in the VA home loan guarnty fee from 1 to 3.8 percent. I strongly oppose that discriminatory increase. It simply imposes an unfair tax on a select group, primarily first-time home buyers, and almost quadruples the fee after it has recently been doubled already. This increase is unnecessary for the solvency of the fund and should be rejected.

Mr. President, I am also particularly supportive of another provision of this amendment, which restores veterans health care programs to the levels provided in fiscal year 1985. The severe cuts proposed in the Republican budget package would be absolutely devastating to the delivery of health care for thousands of veterans throughout our Nation. Over 28 million veterans live in the United States. Of these, 4.6 million are 65 or older. The aging veteran population is rapdily increasing, and will number over 9 million by the turn of the century. Over 1 million of them are over 75, and that number is also rapidly increasing to over 4.5 million by the year 2005. This group has the greatest health care needs. In Arkansas alone, there are over 271,000 veterans, and of those, over 240,000 received care through a VA medical facility during fiscal year 1984. The VA's own records indicate that thousands of eligible veterans seeking health care are turned away each month now due to lack of facilities. Under these conditions, it is preposterous to think that severe cuts in the spending levels for health care would not be detrimental to providing adequate levels of service.

Another provision of the amendment rejects the idea that private insurance carriers should be required to pay for VA-provided care. Many extremely important and complex questions about the implications and effects of such a change remain unanswered, and therefore, such a policy change should never be considered without the benefit of complete investigation by the authorizing committees involved, which has not been carried out in the case.

Finally, Mr. President, this amendment recognizes the need to reduce spending, and includes a provision which provides for the enactment of legislation to achieve a real savings of $50 million in budget authority and $90 million in outlays in each of the next 3 years. This represents a significant effort toward our economic goal of reduced spending, and ultimately, a balanced Federal budget.

I am proud to give my support to Senator CRANSTON's amendment to correct the inequities in the proposed budget package. I want to urge my colleagues to join me in this important effort and to stand up for our Nation's veterans by voting to support the passage of this amendment. This amendment is not a budget buster. It is sensible, it is modest, and it is fair.

Mr. KENNEDY. Mr. President, I rise in strong support of this amendment offered by my distinguished colleague Senator CRANSTON.

This amendment ensures that fair and equitable treatment is provided to veterans' programs and to the thousands and thousands of men and women who have served their country.

This amendment does not ask for a large increase for VA programs. It merely calls for a freeze on these programs at President Reagan's fiscal 1985 level. It provides the bare minimum necessary to maintain the VA programs and our Nation's commitment to those who served.

The veterans of this country are willing and ready to help fight the dangerous budget deficit that now exists. But they should not be asked to shoulder more than their share of this burden. Already in each veteran's lifetime, they have been asked to help their country by going to war to protect our liberty. There should be no hesitation on our part in maintaining the integrity of the programs that serve our veterans.

Mr. President, yesterday we celebrated the 40th anniversary of V-E Day and honored the commitment and courage of the thousands and thousands of Americans who fought in World War II. And today, our honor and thanks must be shown by actions and not just words.

Our veterans answered their country's call for help without questioning. We have a responsibility to listen to them when they call on our Government. Our commitment to our veterans is a hollow one if we cannot ensure fair and equitable treatment and I urge my colleagues to vote yes on this amendment to restore the unfair cuts proposed in the budget resolution.

Mr. GLENN. Mr. President, I rise to support the amendment offered by my colleagues, Democratic members of the Senate Veterans' Affairs Committee. In essence, this amendment is a freeze at the fiscal year 1985 level for veterans benefits and services with only the addition of a COLA for veterans pensions and compensation on par with the COLA's approved by this body earlier for all entitlement programs.

Mr. President, we all recognize the pressing need for budget responsibility as we face today's unprecedented deficits. Yet I cannot be a party to deficit reduction at the expense of our Nation's veterans. The amendment before us freezes the function 700 medical care account at the fiscal year 1985 appropriated level, and rejects reductions based upon anticipated savings from a new means test the administration seeks to impose on our older veterans. The amendment rejects a new tax on veterans in the form of an unwarranted increase in the VA Home Loan Guaranty Program user fee. Congress increased this fee last year and thus assured the solvency of the revolving fund for several years to come at least. The new requested fee increase is thus not needed to maintain the Home Loan Guaranty Program but merely a revenue-producing measure imposed solely on the veterans, and in particular those of the Vietnam era. The amendment further rejects questionable savings assumptions based on the requested enactment of third-party reimbursements for VA medical care.

We are not seeking costly new programs or vastly increased funding for the Veterans' Administration. Rather I believe we are acting responsibly in freezing the VA budget at current levels, even in the vital medical care area where demand is increasing as our veteran population ages. The only increase provided is for COLA's for recipients of pensions and compensation. This is only equitable since all other entitlement recipients will receive such COLA's.

We owe our freedom and our independent way of life to the sacrifices of America's veterans—men and women who answered the call to duty and served with honor. In recognition of that debt we have an obligation to protect and maintain the benefits they earned. As a veteran of 23 years in the Marines I know that the costs of war can never be accurately measured and they do not end with the cessation of hostilities. These costs should not be discounted by budget-cutting bureaucrats and must not be written off during times of peace.

Only peace and freedom are worthy of the exertions and sacrifices our veterans have made. Those of us who live free and secure as a result of these sacrifices owe more than a debt of thanks, we have a moral obligation to provide continuing care and comfort to America's veterans. Thus I urge my colleagues to join me in supporting a fair and responsible budget for veterans programs.

Mr. MURKOWSKI. Mr. President, how much time do I have?

The PRESIDING OFFICER. Who yields time?

The Senator from California.

Mr. CRANSTON. Mr. President, I want to emphasize a final point.

The PRESIDING OFFICER. Will the Senator suspend?

To answer the question of the Senator from Alaska, there is 1 minute remaining on his time.

Mr. MURKOWSKI. I thank the Chair.

Mr. CRANSTON. Mr. President, I want to emphasize a point to my colleagues regarding the amendment to provide full COLA's in veterans' compensation and pension, along with military and civil-service retirement benefits, which was so preemptorily proposed by the distinguished majority leader last Thursday and adopted by a vote of 80 to 18. The adoption of that amendment does not provide any real assurance that the Senate-passed version of the budget will provide full COLA's for the VA programs. Clearly, last Thursday's amendment was proposed only in light of the vote, on the day before, to grant full COLA's to Social Security beneficiaries. Equally clearly, the Republican leadership is now working to assemble a new budget package from the wreckage of the Reagan/Republican leadership plan.

In the words of the majority leader, they're trying to put humpty-dumpty together again. When and if they do, the new plan could well entail a freeze or other form of restraint on Social Security COLA's. And if that occurs I feel certain that veterans who were dealt back in only after full COLA's were agreed to for Social Security will be dealt back out when a freeze or reduction in Social Security COLA's are proposed again as part of a final package.

Mr. President, our amendment has an entirely different background and an entirely different premise. We are proposing full COLA's for VA compensation and pension apart from and independent of what is proposed or adopted with respect to Social Security. We believe that, in the absence of across-the-board, equitable reductions or freezes in all COLA's, compensation and pension recipients should be entitled to full COLA's. Thus, when the Budget Committee recommended full COLA's for supplemental security income, food stamps, and non-service-connected VA pension, but not for service-connected disability compensation, we submitted our amendment to provide for full COLA's for compensation.

When the Reagan/Republican leadership package proposed to subject VA compensation and pension benefits, along with Social Security, to 3 years, more than 50-percent cuts in COLA's, but to continue to grant full COLA's for SSI and food stamp, welfare recipients, we took the position that, as a matter of fairness to veterans, full COLA's should be provided to both compensation and pension recipients.

Therefore, Mr. President, the real vote, the meaningful vote on COLA's for VA compensation and pension beneficiaries will occur on this amendment. This amendment is not a me-too addendum to a successful Social Security amendment that may well be undone and which, at this very moment, the Republican Senate leadership is seeking to undo.

Our amendment is a veterans' programs amendment that stands on its own, separate from Social Security. Thus, the real test of support for VA compensation and pension COLA's is on this amendment, and I urge all of my colleagues to show their support for these COLA's, for fairness for disabled veterans, by voting for our amendment.

Mr. President, I have a number of points I want to raise in addition to those I made in my earlier statement.

MEANS TEST SAVINGS

First, I want to respond to the claim that the enormous cuts in VA health care proposed by the Reagan/Senate Republican leadership package would be achieved simply by denying care for certain non-service-connected disabilities of veterans who can afford to obtain care in non-VA facilities. This is an unfounded claim. Indeed, it is one that even the administration has not made.

I have previously noted the administration's official position—both in the letter transmitting the draft means test legislation and in testimony on April 23 before the House Committee on Veterans' Affairs—that the proposal would not produce measurable savings. In fact, the VA chief medical director's testimony asserted that the means test proposal was not being put forward as a cost-saving proposal.

Therefore, any assertions that the cuts in VA health-care funding would be absorbed simply by turning away veterans who would not pass the means test contradicts the administration's established, official position.

The theory that the means test would yield hundreds of millions of dollars of savings is just that—a theory. But, the dollars proposed to be taken out of the VA are not theoretical dollars. The health-care personnel cutbacks that would occur would not be theoretical either. Nor would the great reductions in the capacities of VA medical facilities that would inevitably follow be other than all too real.

These are all realities that would occur under the proposed budget levels. Compared to the staffing levels and caseloads that the VA would maintain in fiscal years 1986, 1987, and 1988 if it were to continue operating its existing facilities and carry out its plans for new activations in those years, the Reagan/Senate Republican leadership plan would require a staffing reduction of over 33,000 employees and patient-care cutbacks of over 280,000 hospital admissions and nearly 1.3 million outpatient visits in these 3 years.

And does anyone believe that these cutbacks would be reversed after fiscal year 1988?

Mr. President, we're asked to approve these cuts, and to enforce them as part of the caps on discretionary appropriations, because of a totally untested, entirely speculative theory. That theory is based on the possibility that the means-test proposal submitted to Congress less than 3 weeks ago and on which our committee has not yet held hearings would justify those enormous cuts. I once again emphasize: the administration did not claim such savings when it submitted the proposal. And the VA's chief medical director clearly disavowed such savings in the only congressional hearings, those conducted in the other body, that have been conducted.

Mr. President, I am sure that all Senators can recognize that reliance on this theory is a very, very bad risk to which sick and disabled veterans should not be subjected.

Mr. President, I also wish to comment on the CBO analysis of the means test that has been referenced. Although I certainly believe that the CBO effort represents a good faith at-

tempt to predict the impact of a means test, I am not persuaded as to its accuracy or overall validity.

First, it is not a formal cost estimate, and it has not been signed by the director of the CBO or even by the head of the CBO division concerned. It is only staff analysis of the proposed means test and an admittedly highly speculative analysis at that.

The analysis and a covering memorandum contain the following statements attesting to its preliminary, speculative nature:

On page 3 of the cover memo, it is stated, "the results of the analysis are sensitive to some data limitations, particularly the lack of sufficient information about veterans' out-of-pocket medical expenses."

On page 7 of the cover memo, it is stated, "it is important to note that the findings in this analysis could be overstated because they assume complete implementation of the means test."

Page 9 of the analysis contains the following statement: "[A]ll of the results are based on VA hospital users—sampled during the sample year 1979, and may not always reflect the characteristics of future VA users."

Page 12 of the analysis states, "note . . . that the small number of aged veterans in the sample precludes reliable estimates for that population."

These are just examples of the reservations stated in the staff analysis and cover memo. I would also note that the analysis does not take into account the exclusion from the means test of the 2.3 million Vietnam veterans who may have been exposed to agent orange or the 250,000 veterans who participated in nuclear weapons testing whose disabilities may be related to their exposure to those hazards. This is over 2½ million eligible veterans.

Likewise, the analysis ignores totally the administration's proposed authority to waive the means test in order to avoid hardship. It seems reasonable to me to expect that the waiver authority would be exercised in cases involving extraordinarily expensive care and that those cases would have an impact on any cost savings.

Second, it is clear that the CBO staff informal analysis is, at best, a prediction and, as with any prediction, may prove to be wide of the mark. Making up-front reductions in medical-care funding in an amount equal to the predicated savings is plainly not justifiable from the standpoint of fairness to veterans.

Third, Mr. President, the most fundamental flaw in the CBO analysis is the complete failure to address the issue of whether there are veterans waiting to gain access to the VA but who have been denied care because of a lack of resources. This issue—the so-called replacement question—goes to the very core of the CBO analysis. If there are no veterans to replace veterans displaced from VA care by the means test, then there may be some validity to the estimate. If, however, there are eligible veterans who will take the place of veterans denied care, as the VA has asserted there are, then much of the projected savings is illusory. There are different viewpoints on this question and very few hard facts. However, the failure, in the CBO analysis, even to acknowledge the possibility of other veterans who may be seeking VA care is a very serious flaw in my mind. We have asked that the flaw be corrected.

We did so in an April 30 letter to the director of CBO, Dr. Rudolph Penner, from the chairmen and ranking minority members of the House and Senate committees. However, in a May 3, 1985, letter, CBO advised that it would not be able to produce the necesary analysis until May 10, at the earliest.

The other problem I have with the CBO analysis is that nowhere does it translate the projected dollar savings into the reductions in VA staffing and health-care capacity that will have to accompany the assumed caseload reductions. This omission can create the impression that the savings will appear as if by magic. But the only way to save money in the VA medical care account is to cut back staff and resources. That point must be understood in the context of the upcoming vote.

In the final analysis, the means test is an unknown and the CBO informal analysis is just an unofficial staff prediction and a highly speculative one at that. Placing reliance upon it to make drastic cuts in VA health care would be most irresponsible and patently unfair to veterans.

MEANS TEST AND FAIRNESS

Mr. President, it has been asserted that the proposed means test and particularly the application of the means test to veterans age 65 and older is necessary in order to be fair to veterans under age 65. I am quite puzzled by the references to the fairness of such an action to veterans under age 65. There has been no official estimate yet produced showing any savings resulting from the means test.

As I have previously noted, the position stated by the administration in the letter officially transmitting its means test proposal and in its testimony before the House Committee on Veterans' Affairs is that the proposal would not—would not—produce measurable savings. The administration has not produced a detailed cost estimate showing which veterans would be denied care by the VA under the means test.

The only written analysis of the administration's means test that has been produced—an April 22, 1985, CBO memorandum—estimates that, through fiscal year 1990, for every veteran age 65 or older who would be excluded from care, three veterans under age 65 would be turned away. I fail to see any greater fairness to younger veterans in that result than they receive under current policies.

Much more importantly, however, I am certain that the administration's inappropriate use of the proposal in the context of this resolution—that is, to cut deeply into funding for the VA medical care system—is grossly unfair to veterans of all age groups.

Mr. President, I want my colleagues to be absolutely clear about this last point: Any savings claimed for a means test can come only from the VA maintaining fewer beds and less outpatient capacity and employing fewer staff in order to provide fewer episodes of care. Reductions in funding for VA medical care cannot be accomplished with mirrors. To reduce outlays, there must be a reduction in health-care staff and capacity. And my colleagues can be assured that the assumption underlying the Reagan/Senate Republican leadership agreement that a means test will produce large-scale savings in VA health care means large-scale cuts both in VA health-care personnel and in the numbers of veterans provided care.

MAY 6 DEAR COLLEAGUE LETTER

Mr. President, on May 6, the chairman of the Veterans' Affairs Committee sent out a "Dear Colleague" letter seeking to refute my May 1 "Dear Colleague" letters, in which I shared with all Senators information regarding the massive adverse impact on the VA health-care system that would result from the Reagan/Republican leadership package.

The chairman enclosed with his May 6 letter, a letter he had obtained from the Administrator of Veterans' Affairs, Harry Walters.

I want to comment on both letters.

Administrator Walters in his letter admits, I am pleased to note, that the data in my May 1 letter were obtained from the VA inexplicably, however, he erroneously characterizes the questions posed to the VA by the Veterans' Affairs Committee's minority staff as "hypothetical questions dealing with the magnitudes of varying budget scenarios." As evidenced by the answers the VA provided and I shared with all Senators—the questions did not deal with "varying budget scenarios." The questions related precisely to the funding levels underlying the function 700 totals in the Reagan/Republican leadership package; and the question asked was simply: "What would the VA have to do if it were given those funding levels in its medical care account?" Also, the questions were hypothetical only in the sense that any question asking what an agency would do if confronted with certain budget cuts is hypothetical.

Next, Administrator Walters stated, "It appears that numbers, based on hypothetical situations and making very significant and unfounded geographic-specific assumptions, are being

shared with the Senate. In my May 1 letter, I reported that, for the VA to proceed with planned VA activations in fiscal years 1987 and 1988 within the stringent limitations of the Reagan/Republican leadership budget levels would have required the VA to cut staffing at its existing facilities by over 25,000 FTEE in those years. By not proceeding with those activations, the VA would be able to reduce its personnel losses at existing facilities by nearly 14,000 FTEE. Therefore, I made the logical point, based on these factors, that the VA might well elect to cancel or postpone many of its planned activations. That was and is my judgment. I stand by it."

Mr. President, the most disappointing part of Administrator Walters' letter was the incredible admission "that the VA has not developed specific geographic facility or personnel impact analyses of resources that may be made available either in—fiscal year 1986—or the outyears except for those based on the President's original fiscal year 1986 budget request." And the Administrator went on to state, "All outyear numbers are plugged numbers in that no detailed analysis has been developed to either support or deny them."

Mr. President, what excuse can there possibly be for the administration not developing information to enable itself, the Congress, and the public to understand what this administration is proposing in the Reagan/Republican leadership plan? When this administration proposes a comprehensively revised budget plan, why does it feel no responsibility to know—and to explain—what the impact will be on the Nation's veterans? Does it even care?

What is clearly evident here is a conscious effort not to know and not to inform. The attempt is being made to put the truth and the facts off limits to the Senate of the United States. That is why my April 12 and 26 letters to Mr. Walters urgently requesting detailed information regarding the impact of the Reagan/Republican leadership package on VA programs have been totally—totally—ignored. The only response I ever received was a May 7 letter providing absolutely none of the information I had requested.

Fortunately, Mr. President, this embargo on the truth has not been entirely effective. My informal request, through committee staff, for information on the impact of the leadership plan produced some data—and I presented all of those data to my colleagues. Some truth, at least, did emerge.

Mr. President, regarding Senator MURKOWSKI's May 6 "Dear Colleague" letter, in my May 1 letter I shared with all Senators the information that I had obtained from the Office of the VA's Chief Medical Director on the effects of the leadership package on VA medical care. Senator MURKOWSKI has presented no data to contradict what I provided.

What exactly does Senator MURKOWSKI's letter present to us? The answer is that his May 6 letter gave us one monumental set of contradictions and nonsequiturs. Please review that letter closely. In the second paragraph he restates Administrator Walters' unusual claim that the administration has not analyzed the resources that would be available under his own President's plan.

Having forcefully made the point that nothing is known, Senator MURKOWSKI's letter goes on to make broad sweeping claims—that funding and staff for facility activations will be provided to the VA, that all construction will proceed on schedule, and that not one employee will be laid off as a result of the Reagan/Republican leadership plan. Clearly, these are the assertions that are without foundation. This letter itself claims that the analyses necessary to support such assertions have not been done. If the analyses do not exist, how can the assertions be made?

This is self-contradiction in its purest form.

Moreover, the letter raises the issue of funding levels for new construction projects and provides assurances about two major replacement facilities a year being provided for in the administration's long-range plans. First, no question has been raised—certainly not by me—about the funding of construction projects out of the construction account. The question has been whether there would be adequate funds in the medical care account to provide staffing needed to activate the construction projects that are scheduled to come on line.

I have done all that I could do to discover what impact the deep, deep cuts in VA health-care funding would have on veterans' health care. Despite the administration's concerted effort that has now come to light not to know or learn the truth and even to try to keep it from escaping, we were successful in learning the outlines of the utter devastation that would befall the VA's health-care system if the Reagan/Republican leadership package were implemented. All Senators now have that information.

LAYOFFS

As I have stressed several times, the figures—including those which relate to the reduction in the number of health-care employees—that I have cited were provided by the VA in response to the request by the minority staff for information on the impact on VA medical care of the funding levels in the Republican leadership/White House Agreement. Those figures are accurate and no evidence has been produced to the contrary. Nor has Chairman MURKOWSKI offered any evidence to support the assertion in his May 6 "Dear Colleague" letter that "not one employee will be laid off" the Republican leadership proposal is adopted.

Clearly, the leadership agreement assumes significant reductions in funding for the medical care account in each of the next 3 fiscal years.

Equally clearly, such reductions must involve a reduction in the number of overall staff—a total reduction of over 33,000 F.T.E.E. through fiscal year 1988 compared to what the VA says it needs in order to maintain staffing levels at its existing facilities and bring planned activations on line.

The argument is now made that not one employee will be laid off because the staffing reductions can be achieved through an employment freeze and normal attrition. That argument won't wash.

Although there is turnover among VA health-care employees—frequently as a result of the availability of higher wages in the private sector—which, through a freeze on new hires, could result in some reduction in overall staffing, it is simply not possible to rely on attrition alone to accomplish the massive reductions that would be required. Attrition is a very imprecise tool and cannot be expected to yield reductions in the type or grade level or in the geographic areas of the employees whose jobs would be proposed for elimination. On the basis of my over 16 years of experience with the VA Health-Care System, I am absolutely confident that a reduction of the size involved in this debate absolutely cannot be made in a system as complex and interrelated as the VA Health-Care System without substantial layoffs. That point must be understood before Senators vote on the pending amendment.

ACTIVATIONS

Mr. President, I want it to be very clear that neither I nor committee minority staff were the ones to first raise the issue of canceling or postponing new facility activations in fiscal year 1987 or fiscal year 1988. The Office of the VA's Chief Medical Director raised that issue in the first instance.

This is how the issue came up. Committee minority staff asked the Chief Medical Director's Office to provide information as to what the VA would have to do if it were given the medical care account levels that are provided for in the Reagan/Republican leadership plan. In response to that question, the VA provided two alternative ways in which it could deal with the cutbacks. One way involved going ahead with planned activations in fiscal year 1987 and fiscal year 1988 and taking all of the cuts in existing facilities. The other approach presented to us by the VA was to cancel all of the fiscal year 1987 and fiscal year 1988 planned activations and thereby minimize the cutbacks in existing fa-

cilities. I then passed that information along to all Senators.

That, Mr. President, is how the activation issue arose. We did not raise it or even mention it at all until after committee minority staff received that VA response. It was brought up by the Office of the VA's Chief Medical Director as a possible means for dealing with the devastating cutbacks that the Reagan/Republican leadership package would require.

SOLVENCY OF LOAN GUARANTY REVOLVING FUND

Mr. President, it's asserted that the increase in the VA loan guaranty fee is necessary to ensure the solvency of the Loan Guaranty Revolving Fund.

In this regard, I want to stress again that the Congressional Budget Office has estimated that there is no need—I repeat, no need—for any appropriations to the Loan Guaranty Revolving Fund. No need now and no need in the future, through at least 1990.

Congressional Budget Office takes this position based on its assumptions that in fiscal year 1986 and later years the VA will continue—at the rate it experienced in fiscal year 1984—to sell properties it obtains as a result of foreclosures and to sell on the secondary market its portfolio of vendee loans. There is good reason to give full credence to the Congressional Budget Office's assumptions.

In a February 28, 1985, memorandum, Congressional Budget Office points out that in fiscal year 1984 the VA sold 46 percent of the vendee loans in its portfolio. However, the VA's budget estimates are based on it selling only 30 percent of its portfolio in fiscal year 1986. With respect to properties obtained through foreclosures, although the VA sold 56 percent of the real property in its inventory in 1984, it estimates that it will sell only 40 percent in fiscal year 1986.

The decline in these figures is at the heart of the matter. If the VA were simply to maintain the rates of sales it achieved in fiscal year 1984 and is achieving thus far in fiscal year 1985, the revolving fund would remain solvent and there would be no need for appropriations or a fee increase.

The dispute here involves the administration's claim that the rates of both types of sales will fall off precipitously, and I have seen no factual justification for it. To the contrary, the facts—as well as the judgment of the Congressional Budget Office—clearly indicate that those rates can be maintained or exceeded. They show that the administration's claim that the VA lacks the ability to keep up its sales of properties and loans is just another one of its deceptions designed to make us believe that there is some dire need to take action to shore up the solvency of the revolving fund.

Indeed, the VA itself has just expressed a much rosier picture of its capacity to continue to make these sales at or above the current rate. At a hearing last week, the VA testified,

> We have been able to make encouraging progress with our property sales results during 1984 and expect to accelerate sales further during 1985 to reduce our inventory and to minimize the demands on the loan guaranty revolving fund.

Mr. President, the Agency itself says they expect to do better in fiscal year 1985 than in fiscal year 1984. Yet, the OMB-approved budget documents stated exactly the opposite.

The VA testified that, during the first half of fiscal year 1985, it has sold 37 percent more properties than it did in the first half of fiscal year 1984. In March alone, the Agency experienced the highest monthly sales figure since September 1966. Sales of properties this past March represented 12 percent of the total property inventory for the VA. Agency officials testified that, based on the experience of the first 6 months of fiscal year 1985, they expect to sell "over a billion dollars in property by the end of fiscal year 1985."

Mr. President, this means that the VA will sell properties for $100 million or more in excess of what the President's fiscal year 1986 budget documents estimated for fiscal year 1985. That means $100 million more in offsetting collections for the revolving fund in fiscal year 1985 alone.

Mr. President, there's no reason to believe—as OMB Director Stockman would have us believe—that the VA is letting up in its efforts to maintain this selling record. The VA is letting up in its efforts to maintain this selling record. The VA has taken a series of steps designed to promote sales such as placing extra emphasis on sales in field stations with the greatest inventory, bonuses and sales commissions for hard-to-sell properties, discounts for cash, the payment of reasonable loan discount points, and auctions of properties in areas with difficult inventory problems.

Moreover, as CBO points out in its memorandum, the declines in interest rates and in unemployment rates projected by both CBO and OMB would serve to bring more potential buyers into the real estate market and, thus, make VA's property holdings easier to sell in fiscal year 1986 and later years than they were in fiscal year 1984.

Thus, Mr. President, the administration's claim that the fee increase is needed to ensure the revolving fund's solvency is unfounded. It's no more true than is OMB's ridiculous claim that increasing the fee from 1 to 5 percent would prevent no veterans from using their VA loan guaranty entitlement. Both claims are false.

The truth is that it is not necessary to increase the fee to ensure the solvency of the Loan Guaranty Program. That's only an administration ploy designed to hide its real agenda—the placing of this unfair discriminatory tax on veterans, principally Vietnam-era veterans, as an illegitimate means to reduce the deficit.

Mr. President, there is another point I would also like to make.

REBUTTAL RE USE OF PRESIDENT'S FISCAL YEAR 1985 FIGURES

Mr. President, about the figures that the Reagan/Republican leadership package assumes for the increase in the VA loan guaranty fee from 1 to 2 percent in fiscal year 1986, to 2.5 percent in fiscal year 1987, and to 3 percent in fiscal year 1988. According to my best information, CBO would project those cost savings as $157 million in fiscal year 1986, $228 million in fiscal year 1987, and $223 million in fiscal year 1988—$608 million over the 3 years. However, it is my understanding that, over the 3-year period, the leadership package claims total savings of $73 million more. Moreover, it is my understanding that the leadership package assumes that a 3-percent fee in fiscal year 1988 will produce just as much in budget savings as a 3.8-percent fee?

How could that be so?

PAST APPROPRIATIONS AND TRANSFERS TO LGRF

Mr. President, in past years funds were transferred from the direct loan revolving fund to the loan guaranty fund in order to keep the program solvent. That is no well-kept secret. Our committee set forth these and other facts regarding the program in our report on S. 2391 in March of 1984. Also, I am sure that many Senators are aware of the appropriations made to the revolving fund in the past 2 years.

But that does not in any way change the facts regarding the present—and that is that CBO says, as I have pointed out, that the revolving fund will not need an appropriation or the receipts from an increased fee in order to remain solvent through fiscal year 1990.

Mr. President, before last year, there was no 1-percent fee that was deposited in the revolving fund, sales of VA foreclosed properties were often sluggish, and in too many instances, the VA acquired properties when it should have paid off the guaranty instead. All of these factors created a drain on the revolving fund.

We have now established a 1-percent fee and taken other steps to correct the situation. Based on CBO's analysis, we have been successful. I'm certain that there is more that could be done to improve the program and I want to be helpful in that regard. But, clearly the one thing we do not have to do is increase the fee.

I want to be sure that my colleagues are aware of some of those who oppose the fee increase—the National Home Builders Association, the Mortgage Bankers of America, the American

Legion, the Veterans of Foreign Wars, the Disabled American Veterans, the AMVETS, the Paralyzed Veterans of America, the Non-Commissioned Officers Association, and the Vietnam Veterans of America.

CONCLUSION

Mr. President, I have been, for all of my 16 years in the Senate, either the chairman—for 12 years—or the ranking minority member for the last 4—of the subcommittee or full committee with jurisdiction over the VA health-care system. In 1970, we had a big veterans vote to add $125 million for VA health care. It carried overwhelmingly and was the beginning of a decade-long effort to equip the Veterans' Administration to provide first quality, modern medical care to veterans, especially those veterans returning from the Vietnam war for whom in 1970 the Veterans' Administration was woefully prepared.

Now, this amendment is all that stands between David Stockman and his determination to reverse our progress and returning staffing levels back toward where they were 15 years ago. I feel no sense of exaggeration whatsoever in saying that this is the most important veterans issue vote in the U.S. Senate in 15 years. The veterans of America know it and every Senator should know it.

I regret deeply that this effort has been given a partisan tone. Veterans issues have rarely been partisan ones. But I don't want a bipartisan approach to veterans issues if it means seeing the VA health-care system run over by the OMB steamroller and doing nothing about it.

I sought in every way I could to reach an accord with the other side on this amendment, but the only way to achieve a bipartisan approach would have been for me to stand by—in so-called bipartisan fashion—and allow America's veterans to be defeated without a fight. I chose and I choose to fight to defend them just as they fought to defend this country.

I do so proudly.

Here we are today, 1 day after V-E Day and 2 days after the anniversary of the end of American involvement in the Vietnam war. Last night, we celebrated our World War II victory in the majority leader's office. As the distinguished leader said last night in extending an invitation to all of us, we gathered then in honor of the veterans who answered when their country called.

Saying these things is often easy. But honoring our commitments is not always so easy.

I urge my colleagues to put aside partisan concerns.

I urge my colleagues to reject the lockstep of party discipline and vote the way they know is right and fair to keep faith with America's veterans.

A vote for this amendment is a vote no Senator will ever regret making.

The PRESIDING OFFICER. The time of the Senator from California has expired. The Senator from Alaska has 1 minute remaining.

Mr. MURKOWSKI. I thank the Chair. I thank my colleague, the Senator from California.

I should like to point out that during this debate I have attempted to make the point that the veterans of this country will continue to be treated fairly under this proposed budget which has been described in great detail.

I thank the majority whip for his reference and reinforcing statements with regard to the obligation of this country in meeting the needs of veterans. I think what we have to do is to recognize that the needs of veterans are changing, but the responsibility does not change.

As evidenced by the Budget Committee and my colleagues on the Veterans Committee on the Republican side, we are committed to maintaining the high quality of services that have been afforded the veterans of this country. We feel certain that the VA will work with the proper intent in increasing the efficiencies within the organization, so that the quality of service that has been provided for so long will continue.

The PRESIDING OFFICER. The time for debate on the amendment has expired. The yeas and nays have not been ordered.

Mr. DOMENICI. Mr. President, I move to table the amendment, and I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion to table the amendment. On this question the yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. SIMPSON. I announce that the Senator from Maryland [Mr. MATHIAS] is necessarily absent.

I also announce that the Senator from North Carolina [Mr. EAST] and the Senator from California [Mr. WILSON] are absent due to illness.

Mr. CRANSTON. I announce that the Senator from Nebraska [Mr. EXON] is absent due to illness.

The PRESIDING OFFICER. Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 49, nays 47, as follows:

[Rollcall Vote No. 54 Leg.]

YEAS—49

Abdnor	Cochran	Denton
Armstrong	Cohen	Dole
Boschwitz	D'Amato	Domenici
Chafee	Danforth	Durenberger
Evans	Kassebaum	Roth
Garn	Kasten	Rudman
Goldwater	Laxalt	Simpson
Gorton	Lugar	Stafford
Gramm	Mattingly	Stevens
Grassley	McClure	Symms
Hatch	McConnell	Thurmond
Hatfield	Murkowski	Trible
Hawkins	Nickles	Wallop
Hecht	Packwood	Warner
Heinz	Pressler	Weicker
Helms	Proxmire	
Humphrey	Quayle	

NAYS—47

Andrews	Ford	Melcher
Baucus	Glenn	Metzenbaum
Bentsen	Gore	Mitchell
Biden	Harkin	Moynihan
Bingaman	Hart	Nunn
Boren	Heflin	Pell
Bradley	Hollings	Pryor
Bumpers	Inouye	Riegle
Burdick	Johnston	Rockefeller
Byrd	Kennedy	Sarbanes
Chiles	Kerry	Sasser
Cranston	Lautenberg	Simon
DeConcini	Leahy	Specter
Dixon	Levin	Stennis
Dodd	Long	Zorinsky
Eagleton	Matsunaga	

NOT VOTING—4

East	Mathias
Exon	Wilson

So the motion to table the amendment (No. 75), as modified, was agreed to.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the motion was agreed to.

Mr. DOMENICI. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DOLE. Mr. President, I hope this is some indication that maybe these amendments will be less and less desirable as we get into the afternoon. It is still my hope that we can conclude action on this package at a relatively early hour. But, again, it is difficult to know precisely because I am not aware of all of the amendments.

Does the Senator from Florida have an amendment?

Mrs. HAWKINS. I have an amendment.

Mr. DOLE. Can the Senator agree to 10 minutes for each side?

Mrs. HAWKINS. Twelve.

Mr. DOLE. The Senator from Florida may have 12 minutes and I will take 8 minutes.

Mr. President, I ask unanimous consent that there be 20 minutes on the amendment, 12 to the proponents and 8 to the opponents.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 77

(Purpose: To restore funding for the school lunch program for each of the fiscal years 1986, 1987, and 1988 to the level of funding provided for the program for fiscal year 1985)

Mrs. HAWKINS. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Florida (Mrs. HAWKINS), for herself, Mr. BOSCHWITZ, Mr. KENNEDY, Mr. BOREN, Mr. SARBANES, Mr. KERRY, Mr. FORD, Mr. DODD, Mr. RIEGLE, Mr. ROCKEFELLER, Mr. HOLLINGS, Mr. BYRD, and Mr. LEVIN, proposes an amendment numbered 77.

Mrs. HAWKINS. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

In the pending amendment, do the following:

On page 3, increase the amount on line 12 by $400,000,000.

On page 3, increase the amount on line 13 by $600,000,000.

On page 3, increase the amount on line 14 by $800,000,000.

On page 3, increase the amount on line 18 by $400,000,000.

On page 3, increase the amount on line 19 by $600,000,000.

On page 3, increase the amount on line 20 by $800,000,000.

On page 3, increase the amount on line 25 by $400,000,000.

On page 4, increase the amount on line 1 by $600,000,000.

On page 4, increase the amount on line 2 by $800,000,000.

On page 4, increase the amount on line 6 by $400,000,000.

On page 4, increase the amount on line 7 by $1,000,000,000.

On page 4, increase the amount on line 8 by $1,800,000,000.

On page 4, increase the amount on line 12 by $400,000,000.

On page 4, increase the amount on line 13 by $600,000,000.

On page 4, increase the amount on line 14 by $800,000,000.

On page 24, increase the amount on line 2 by $400,000,000.

On page 24, increase the amount on line 3 by $400,000,000.

On page 24, increase the amount on line 12 by $500,000,000.

On page 24, increase the amount on line 13 by $500,000,000.

On page 24, increase the amount on line 22 by $700,000,000.

On page 24, increase the amount on line 23 by $700,000,000.

On page 33, increase the amount on line 2 by $100,000,000.

On page 33, increase the amount on line 3 by $100,000,000.

On page 33, increase the amount on line 11 by $100,000,000.

On page 33, increase the amount on line 12 by $100,000,000.

On page 37, decrease the first amount on line 11 by $403,000,000.

On page 37, decrease the second amount on line 11 by $375,000,000.

On page 37, decrease the amount on line 12 by $529,000,000.

On page 37, decrease the amount on line 13 by $520,000,000.

On page 37, decrease the first amount on line 14 by $676,000,000.

On page 37, decrease the second amount on line 14 by $666,000,000.

On page 44, decrease the amount on line 10 by $403,000,000.

On page 44, decrease the amount on line 11 by $375,000,000.

On page 44, decrease the second amount on line 12 by $529,000,000.

On page 44, decrease the amount on line 12 by $520,000,000.

On page 44, decrease the amount on line 13 by $676,000,000.

On page 44, decrease the amount on line 14 by $666,000,000.

Mrs. HAWKINS. Mr. President, on behalf of myself, Senators BOSCHWITZ, KENNEDY, BOREN, SARBANES, KERRY, FORD, DODD, BURDICK, RIEGLE, ROCKEFELLER, HOLLINGS, and LEVIN, I am offering an amendment to eliminate the proposed cut in Federal support for child nutrition programs currently assumed in the budget resolution.

The original budget resolution as reported by the Committee on the Budget presumed a cut of $700 million in child nutrition for 1986 alone and substantially higher levels for 1987 and 1988. The Senate leadership-White House budget plan reduced this cut in child nutrition to $375 million in fiscal year 1986, $520 million in fiscal year 1987, and $666 million in fiscal year 1988. The Senate leadership-White House plan, the plan before us today, is an improvement over the original proposal, and I give them credit. However, in reviewing the extent of prior cuts to the program, and the effects of these proposed cuts, I firmly believe that our children cannot withstand further cuts in their nutritional programs.

You will remember that the Reconciliation Act of 1981 reduced Federal support for child nutrition by almost 30 percent or a full $1.5 billion. This was one of the steepest cuts contained in the entire reconciliation package. During that 1981 round of cuts—which I supported—our child nutrition programs comprised less than one-half of 1 percent of the Federal budget, yet they shouldered approximately 4 percent of the total savings enacted. In short, the child nutrition cut enacted in 1981 was about 10 times greater than an across-the-board freeze.

Now, I say that is enough. We have done enough to child nutrition programs. I know they do not vote. I know they do not have a PAC. But I must tell you that we cannot have these huge cuts from the National School Lunch Program.

Mr. President, in the pending budget resolution, most of the child nutrition cuts are assumed from the National School Lunch Program. Specifically, the cut would eliminate 100 percent of the Federal cash support paid to schools for meals served to children from families with incomes over $19,700. Nineteen thousand dollars sounds like a lot of money. But if you have four or five children and you are a single parent, I do not know how you manage breakfast and dinner, let alone lunch.

Proponents of this cut, and opponents of our amendment, would have us believe that the cut simply eliminates subsidies to "upper-income children." I have heard that for a week. This is absolutely not true. In point of fact, the aid we are discussing (No. 4 of the National School Lunch Act) is not a subsidy to "upper-income children." Indeed, it is neither a grant nor a transfer payment to individuals at all.

Under this program, schools and institutions, not individual children, are provided 12 cents in Federal support for each meal served which meets USDA nutritional guidelines. The money goes to the school or daycare center and is used to support the basic infrastructure of the school lunch program at the local level. The Federal assistance which would be eliminated under the budget proposal, goes to help defray these costs which must be met for any child, rich or poor, to receive a school lunch. This Federal assistance is the "carrot" that attracts local communities throughout the country to participate in the National School Lunch Program.

According to the American Association of School Administrators, the Chief State School Officers, the American School Food Service Association, national PTA, and other experts in the field, if this financial assistance were removed we could expect to see thousands of schools throughout the United States forced from the National School Lunch Program. In its recent survey, the National School Board Association discovered that 29 percent of the districts questioned would discontinue lunch programs if the Federal reimbursement was eliminated. An additional 9 percent maintained that continuation of the program without Federal payments for full-price lunches is questionable. A second poll by the American Association of School Administrators indicated that an incredible 41 percent of responding school districts would be forced to drop the Federal School Lunch Program. Conservatively, we could expect between 3 and 5 million children and 5,000 to 6,000 schools to drop out of the National School Lunch Program if these cuts are not restored. When this occurs, all children in the community, including poor children, lose access to the program.

The prediction made by these respected national organizations should not come as a surprise to any of us. If you eliminate 100 percent of the Federal cash incentive for doing something while simultaneously retaining the cost of meeting Federal verification guidelines, documentation requirements, Federal audits, and other regulations, common sense dictates that many schools will drop from the program.

Let me clarify that I am not predicting that all schools will be forced from the program. Schools with a high percentage of free and reduced price

school lunches will be able to stay in it. But in those communities where only 10, 20, or 30 percent of the students participating in the National School Lunch Program are currently receiving a free or reduced price lunch, it is reasonable to assume that many of these schools will not longer have the financial incentive to stay in the program. These schools would be losing all of their Federal cash support attributable to the vast majority of their children participating in the program.

Advocates of these cuts may claim that the schools can simply raise their lunch prices to cover the loss of Federal assistance. On its face it appears reasonable, but on further review it has dire consequences. The problem here is even if we assume every school remained in the program—and we know they will not—USDA studies indicate that for every 1-cent increase in lunch prices, there is almost a 1-percent decrease in school lunch participation by our children. So that is a 12-percent drop out even if all the schools stayed in the program. And when these kids drop out of the program, who knows what they will eat instead, if anything at all.

Mr. President, going far beyond the debate over how many students would be forced from the program, there is a more central policy question of where the program is headed under this budget proposal.

I think we all should understand the history behind the enactment of the National School Lunch Program of 1946. This act was passed immediately after the Second World War because we discovered that too many draftees failed their physicals because of childhood diseases suffered as a result of inadequate nutrition. Since its enactment in 1946, it has always been the congressionally mandated goal of this program to serve the nutritional needs of all children. This act was never intended as a welfare program aimed exclusively at poor children. Passage of the cuts assumed in the budget resolution would not only eliminate millions of students and thousands of schools from the program, it would change the very nature of the program. We should not allow this longstanding national nutritional program designed for all American children to become just another social welfare program for the poor.

If we were to enact the proposed budget cut, we would fundamentally change the character of the program and how it is viewed by local school boards all across the country. School administrators who are currently pleased to have health, education, and nutritional programs operating within the school facility will not appreciate operating a welfare or income security program to the public.

It is interesting to note, Mr. President, that when this cut was first proposed in 1981, it was referred to as terminating subsidies to "nonpoor" students. By 1982, it had become the proposal to eliminate the "middle income" school lunch subsidy. Now, in 1985 it is being referred to as the "upper income" subsidy. I do not know about your State, but in the State of Florida, a family of four earning less than $19,700 is not considered upper income. I do not know how they pay their utility bills. But who are these children who participate in the National School Lunch Program anyway? They are the population at large—of all races, financial resources, et cetera—our children. The vast majority of the students participating in the National School Lunch Program who are not receiving a free or reduced price lunch, have family incomes between $20,000 and $40,000—just like the population as a whole.

I have heard people say, "Why shouldn't we cut a child with a $250,000 in family income? Why shouldn't we take away their 12-cent subsidy?" The short answer is that they do not, and they should not receive a subsidy. First of all, the subsidy does not go to the child. It goes to the school, day care facility, or the drug rehabilitation facility where they are going to school, or the juvenile abuse center where they are being sheltered and fed. It does not go to the child, it goes to the facility. And the truly high-income individuals whose children attend expensive, private schools were already eliminated in 1981 when we already eliminated private schools with tuitions above $1,500.

So what exactly are we talking about? We are talking about the only Federal Child Nutrition Program that provides some small benefit to middle-income children in the hope of serving all children—which the budget proposal would eliminate. We would be transforming a successful nutrition and health program into a welfare program which would ultimately not even serve poor children effectively.

In south Florida, I have seen time and time again, elderly individuals who qualify for the Food Stamp Program who opt not to participate because of the stigma of the program. Likewise, it is not surprising that many educators believe that if the National School Lunch Program became a welfare program serving only poor kids, even these children would be reluctant to participate in the program. Imagine for a moment the trauma of a child who must face the stigma of saying "Yes, my parents are poor," or is considered somehow different because he stands in line and participates in the school lunch program. The health and well-eing of our children is too high a price to pay.

Mr. President, this proposed budget cut would not only harm the nutritional health of children in public schools but it would also hurt the nutritional well-being of our young children in family day care centers as well. At present, the Child Care Food Program is the single largest source of Federal support for family day care centers. While the budget proposal which imposes a means test for children in family day care centers may appear reasonable at first glance, it would be, in truth, be devastating to our family day care centers. It would, in fact, virtually eliminate family day care from the Child Care Food Program. Day care centers are still struggling from the 1981 cuts and as a result, are offering 34 percent fewer meals, 74 percent less variety of foods, and have laid off staff. They cannot afford further cuts. If a full-scale means test were imposed, administrative costs would jump 32 percent substantially exceeding reimbursements. Sponsoring organizations estimate that 63 percent of our child care homes would drop out of the program. Eighty-four percent said they would be forced to raise rates and would thus lose some children to cheaper day care or some children would be left at home because parents could not afford the increase. As the Children's Defense Fund notes, "given the enormous public concern with protecting children in child care settings from abuse and improving the quality of child care, it is ironic that the administration proposes a policy that would force most family day care providers underground and out of sight."

This amendment will also ensure that quality school lunches remain available to children in juvenile drug abuse centers, temporary shelters, halfway houses, and other institutions caring for our children. These kids are our "forgotten children" who are among the highest nutritionally at risk of all and require a proper diet in order to have a chance. We should not hurt them further.

Mr. President, all children deserve an adequate diet and these child nutrition programs are the surest method to ensure they receive one. Only 3 years ago the Department of Agriculture released the most comprehensive study yet completed on the National School Lunch Program. The Department found the program to be nutritionally important to students in all income categories. The report states:

> The superiority of school lunch is reflected in higher daily intake of nutrients for the general school age population and for all population subgroups that were examined.

In other words, children eat more and eat better because of the school lunch and day care feeding programs. It is for this reason that I am deeply

concerned about the real effects of this budget proposal. In addition Senators should be reminded that the National School Lunch Program is not only a popular program with a proven track record of success, but it also encourages the domestic consumption of nutritious agricultural commodities, products our farmers have grown. This not only helps us rid our stockpiles of surplus agricultural commodities, but helps build proper eating habits for our children. Thus, this program helps our children, our farmers and our very future.

Mr. President, let me summarize what I have stated today. In 1981, I supported the cuts in child nutrition and other programs because I felt it necessary to get this country back on its feet. This year however, I think we have gone too far. We are not talking about subsidies and programs which help corporations, interest groups, and others who can fend for themselves—we are talking about child nutrition programs—food for our children. If we impose these cuts on the school lunch and day care feeding programs, we risk preventing thousands of schools and millions of children from receiving the proper nutrition they need for their health and well-being. This program has and continues to serve its purpose well—providing nutritious and well-balanced meals to all children.

This is not a partisan issue and never has been. Many of our colleagues recently received a letter in support of this amendment from the former Republican leader of the Senate, Senator Hugh Scott. He closes his letter by saying:

As we all know, hungry children cannot learn. Let us not return to the days when poor children could not afford a school lunch and sat by and watched as other children enjoyed their lunch.

Senator Scott's summary is a fitting one for my feelings. I urge the adoption of my amendment and ask for the yeas and nays.

The PRESIDING OFFICER (Mr. DENTON). Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. DOMENICI addressed the Chair.

The PRESIDING OFFICER. The Senator from New Mexico is recognized.

Mr. DOMENICI. I yield myself 2 minutes. I compliment the distinguished Senator from Florida on her remarks and have great admiration for the former U.S. Senator, Senator Scott. I would mention that I believe he is a lobbyist for the American School Food Service Association. I would expect him to support the program. Basically they are a fine outside group supporting her amendment. Let me suggest that whenever we suggest changing a program like this, some people claim it is the end of the world. They claim that there is just no question about the ends to which we are effecting nutrition in our country through these changes. Well, the truth of the matter is that in this leadership package, only change recommended is a 12-cent subsidy for the nonpoor children who now get a 12-cent subsidy for school lunch. What children are these? These children are from households, with incomes 185 percent above poverty and from families with an average income of $33,000.

I really could stop there and just ask the U.S. Senate if our Nation with a $200 billion to $250 billion deficit and undergoing a major effort to reduce it to help everyone—including these families with $33,000 incomes—so that they are all going to have jobs and so their children can have jobs—if as part of a package we cannot ask these families to pay the 12 cents which the American people are now paying as a subsidy, then I frankly do not know if we can ever cut the deficit. I do not know that we could ever justify reducing the deficit under any circumstances.

I want to answer one other question. Every time we talk about the school lunch program, those who run the programs come up here and tell us, "Well, we understand a 12-cent subsidy is not bad, but we are going to lose the whole program because so many children will stop using it that we are going to close our cafeterias all over the country because these young children, instead of paying 12 more cents are going to stop buying lunches, and we will close the program down.

Mr. President, we heard that the last time when we had a slight change. The cafeterias did not close down. We do not believe they are going to close down this year, either. We believe the parents are going to find it is a great program and they will pay the 12 cents and if the schools themselves are subsidizing the programs, they are going to keep it going.

This is a small savings, $1.6 billion in outlays out of a package we are trying to put together of $300 billion. I think we ought to do it.

I am sure there are excesses for everything and justifications for everything in the budget, but I just wonder when we are ever going to find policies that we cannot afford to pay for any longer.

I yield whatever time we have remaining to the distinguished Senator from North Carolina [Mr. HELMS], the chairman of the Agriculture Committee.

Mr. HELMS. Mr. President, I have the greatest respect and admiration for the distinguished Senator from Florida [Mrs. HAWKINS], but we have leaned over backward to be fair. What we are talking about, as Senator DOMENICI said, is the subsidy for school-children from families who clearly are not poor, by any reasonable definition.

Mr. President, may I have the Senators' attention?

Mr. DOMENICI. Yes, indeed, Mr. President.

Mr. HELMS. We have not touched the poor children, have we?

Mr. DOMENICI. That is correct, Mr. President.

Mr. HELMS. Nor have we touched the so-called middle-income children receiving reduced-price lunches?

Mr. DOMENICI. That is correct, Mr. President.

Mr. HELMS. Mr. President, what we are talking about is about $400 million this year, $500 million next year, $600 million the next, of add-on to the deficit to pay the 12 cents for affluent children, if you want to use the word "affluent." I know of no credible testimony in the Agriculture Committee to indicate that any cafeterias have been closed down as a result of the modest correction we made in 1981. But for 12 cents from families at—is it 180 percent?

Mr. DOMENICI. 185 percent, Mr. President.

Mr. HELMS. 185 percent of poverty, I do not think that is too much to ask, Mr. President. The question is, Are we going to draw the line, are we going to try to save money, are we going to expect the people who are able to pay to pay for the school lunches and other nutrition programs? I think that is a fair proposition.

Child nutrition programs are an important, and large, part of the Department of Agriculture. Over $5 billion of the Department's budget is spent in this area—$3 billion for the School Lunch Program and over $2 billion for the school breakfast, child care food, summer, and WIC programs.

Significant budget restraint is proposed in this area within the President's fiscal year 1986 budget.

A reduction, rather than total elimination, of the subsidy to nonpoor families is contained within the Taxpayer Protection Plan, the Senate/administration agreement on the budget.

Mr. President, I am certainly aware that child nutrition programs are popular; indeed, they are popular with the Senator from North Carolina. But we all have some real soul searching to do this year about what we can afford—in these programs and other programs.

Perhaps it would be helpful to have a clear understanding of exactly what the income eligibility criteria and reimbursement rates are for the School Lunch Program.

The Federal Government provides reimbursements to schools for lunches served to all children under three types of categories based on family income. Children from families with incomes under 130 percent of poverty—the same eligibility level as exists

for the Food Stamp Program—are served a lunch at no cost to the student, a so-called free luch.

Students from families with incomes between 130 and 185 percent of poverty are classified as reduced-price students because they receive a lunch for only a minimal charge—currently with a maximum charge of 40 cents. Students from families with incomes over 185 percent of poverty receive a lunch for which they typically pay about 92 cents. However, a Federal reimbursement is still provided.

The following table outlines the estimated new income eligibility criteria for each of these categories beginning July 1, 1985, as compared with 100 percent of the poverty level.

INCOME ELIGIBILITY STANDARDS FOR FREE AND REDUCED-PRICE LUNCHES IN THE SCHOOL LUNCH PROGRAM

[July 1, 1985–June 30, 1986]

Family size (185 percent level)	OMB poverty income level, 1985 [1]	Free meal eligibility (130 percent of poverty level)	Reduced price eligibility of poverty
1	$5,250	$6,825	$9,713
2	7,050	9,165	13,043
3	8,850	11,505	16,373
4	10,650	13,845	19,703
5	12,450	16,185	23,033
6	14,250	18,525	26,363
7	16,050	20,865	29,693
8	17,850	23,205	33,023
Each additional person	+1,800	+2,340	+3,330

[1] Federal Register, volume 50, March 8, 1985, page 9518. Estimates for 130 and 185 percent of poverty computed by Susan Schillmoeller, Education and Public Welfare Division, Congressional Research Service, Library of Congress, April 4, 1985.

Reimbursement rates are indexed annually on July 1. Following are the reimbursement categories and the levels in effect beginning July 1, as reported by the Congressional Research Service of the Library of Congress:

Section 4 "basic assistance"—a flat per-meal reimbursement which is the same for all income categories (estimated to be 12.5 cents per meal effective July 1).

Commodity assistance; a flat per-meal reimbursement which is the same for all income categories (estimated to be 12.25 cents effective July 1).

Section 11 "special assistance"—differing amounts available only for free and reduced-price lunches (estimated to be 118.5 cents for free and 78.5 cents for reduced-price, effective July 1).

The projected basic rates for all Federal subsidies at each income category are as follows:

Projections of per-meal reimbursements [1]
July 1, 1985–June 30, 1986

[In cents per meal]

Free	143.25
Reduced-price	103.25
Paid	24.75

[1] Source: Congressional Research Service.

The fact of the matter is that the Federal Government will spend about $700 million annually to subsidize lunches to schoolchildren who are from families well above the poverty line, indeed, above 185 percent of the poverty line—which amounts to almost $20,000 for a family of four. About 75 percent of such families have incomes over 250 percent of poverty, or over $26,000 for a family of four. The average income is $33,000.

I am troubled, however, by this fact—that while the average family receiving benefits from the school lunch subsidy to paying students has an income of $33,000, the average taxpayer supporting this and other Federal programs has an income of $25,000 or so. Frankly, I find it difficult to rationalize continuing a policy which taxes citizens in expectation of spending their tax dollars on programs to support programs for those with considerably higher income—and a greater ability to pay, out of their own pockets, for the benefits from this and certain other programs.

Mr. President, I have wondered how many of the present Federal programs could be started, or enacted, now if this year were the year they were being initially proposed—knowing what we do about the size of the deficit. Frankly, I do not think many of these programs would be begun under these circumstances. We would come to the conclusion, in my judgment, that we simply cannot afford many of these programs—even though they may have done a great deal of good, even though they are popular with our constitutents, and so forth. Similarly, it seems we simply must give greater scrutiny in determining whether we can afford to continue some of these programs.

The School Lunch Program is generally a fine program. It has served the Nation well. My primary concern is whether we—as a nation with a $200 billion annual deficit—can continue to spend hundreds of millions of dollars for schoolchildren who are not poor by anyone's definition. We will still be spending well over $2 billion annually for those who are poor and additional millions for those who are somewhat above poverty.

The Senate/administration compromise is a reasonable approach to reduce overall spending, and one which I hope this Senate will accept.

I have heard many of the arguments from supporters of the School Lunch Program. They claim that the program will come to some ruinous end. They claim that hundreds of schools and thousands of students will drop out of the program. And, underneath it all, they fear for the loss of their jobs in operating the School Lunch Program.

With all due respect to my friends, I have heard these same arguments—sometimes used almost as scare tactics—before. They said similar things in 1980 and 1981. We adopted major changes anyway, and the program has not only survived, but thrived. The overall objective then, and now, was to retarget Federal benefits to the poor.

The Congress has demonstrated in 1980 and 1981 that we can make major reductions in spending for child nutrition programs without demolishing the programs. We can make careful, selective reductions this year without doing damage to the operation of these programs.

I support the overall leadership package, including what I believe to be the reasonable reductions proposed in the School Lunch Program. Neither the administration, nor the leadership, is trying to terminate, or otherwise undermine, the School Lunch Program. We are trying to find specific ways to achieve overall budget reductions.

If we fail to make these reductions now, more severe changes may be necessary in this and other programs in the future.

Opponents of the compromise should address themselves squarely not only to the specific child nutrition proposals, but also to the budget context in which they must be considered. For this is the context in which we, as Senators, must evaluate these proposals. It would be wonderful if we could consider child nutrition programs in a vacuum. I would prefer that the overall Federal fiscal picture did not require economy measures. However, we must deal in the realistic budget context that faces us.

The point also needs to be made that even with the savings included in the resolution, significant expenditures will continue for nonpoor children.

The resolution proposes to eliminate the existing 12 cents per meal for nonpoor children—those with incomes over 185 percent of poverty.

However, the 12 cents in commodity assistance will continue.

Additionally, the Department of Agriculture has supplied about 10 to 12 cents per meal for all children in bonus commodities under discretionary authority of the Secretary.

Thus the elimination of support proposed in the resolution is only one-third of that provided under the present program.

Let me comment just briefly on the ramifications of reinstating a means test for the day care home portion of the Child Care Food Program. The situation here has changed dramatically.

In 1980, at the time the means test was eliminated, approximately two-thirds of the children were from families with incomes below 185 percent of poverty. It was argued that inasmuch as most children were at the low or fairly low end of the economic spectrum, administrative simplification would warrant an elimination of the means test.

However, in two audits conducted by the Department of Agriculture and the Office of Inspector General of the Department of Agriculture, it is now clear that this distribution has shifted

significantly. Now rather than two-thirds under 185 percent of poverty, about two-thirds are above 185 percent of poverty.

There has been an increase in the number of participants as well as the distribution, meaning that enormous new costs have been associated with the large influx of nonneedy children participating in this federally subsidized program.

I ask unanimous consent that the following table outlining the distribution be printed at the conclusion of these remarks.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

FREE, REDUCED PRICE, AND PAID INCOME CATEGORIES WITHIN FAMILY GROUP DAY CARE HOMES

[In percent]

	1980	1982
Free (below 130 percent)	44	25
Reduced price (130 to 185 percent)	24	11
Paid (above 185 percent)	32	64

Mr. HELMS. Mr. President, action is clearly needed to curb these trends. The reinstatement of the means test—as assumed in the resolution—is exceedingly reasonable.

In conclusion, Mr. President, there is nothing more important that we could do for America's children—of all income levels—than to reduce overall Federal spending. For if we fail to do so, it will be these same children who will be the citizens and taxpayers of the future who will bear the enormous costs of today's exorbitant spending—even that done in their name.

As much as I respect the able Senator from Florida and agree with her 99 percent of the time, I must regretfully differ with her on this amendment and I must oppose it.

I thank the Senator from New Mexico for yielding to me.

Mrs. HAWKINS. Mr. President, in response to statements that have been made, information provided to me shows that over 2,000 public schools did close their school lunch program after the cuts in 1981, and this is a much deeper cut per meal than we made in 1981. I daresay that the figures I am talking about on the proposed closings are accurate and that we should consider again that the original intent of the law was to see that our young people got adequate nutrition during their growing years so they could then be physically fit to serve in the military. At a time when we are increasing military expenses and there are dire emergencies around the world and we are looking to our teenage children. I think it is very appropriate that we consider this cut, we restore this cut, if nothing else to stop the proliferation of these handy-dandy machines that give whatever you want of junk food that will probably take their place in the schools.

Mr. HELMS. Mr. President, how much time remains on this side of the aisle?

The PRESIDING OFFICER. Two minutes remain to the opponents.

Mr. HELMS. Mr. President, I think the Senator from Florida may have misunderstood me. I said closing the cafeterias as a result of the action in 1981.

Sure, there have been cafeterias closed, but let me tell the Senator why they have closed. It is not because of any adjustment in the cost of programs, but because of declining school enrollments, because of school consolidations, because of the elimination of high-tuition private schools—those with tuition charges over $1,500 per year—and because we tightened income eligibility verification.

Those cafeterias—sure, they have closed. But I contend that not from any credible testimony that has been given. Can we conclude that there have been any cafeterias closed just because these children in the so-called upper-income category of the three groups listed have been required to pay more toward their own lunches—which, by the way, cost about 92 cents apiece.

I say to the Senator that I admire her motives, but I do not think the facts justify her amendment. Again, I must reiterate that I cannot support it.

● Mr. KERRY. Mr. President, I stand before you to support an amendment being offered by my distinguished colleague from Florida, Senator HAWKINS. Her amendment will restore funding to essential child nutrition programs; programs that are critical to our children's health, growth and development. Senator HAWKINS' amendment will fund the School Lunch, School Breakfast and Child Care Food Programs at current service levels over the next 3 years.

The White House/Republican leadership compromise budget, on the other hand, will eliminate these vital nutrition subsidies for children from families of four whose earnings exceed $18,870 a year. This reduction will not only prove devastating to our children's nutritional needs, but the entire programmatic system as well.

For example, in my own State of Massachusetts, the School Lunch Program serves approximately 550,000 students every year. If cut, however, an estimated 91 school districts would be forced to abandon this successful program. It will no longer be economically feasible for schools to participate due to the fact that upper-income payments often support the cost of the total School Lunch Program. In Massachusetts alone, these cuts will translate into approximately 225,000 children being forced out of the program. A recent survey in Massachusetts concluded that 17,000 children are undernourished throughout my State. Undoubtedly, no Member of this Congress would like to witness or even shoulder the responsibility for an increase in that number.

Nationally, the statistics are even more devastating. Since 1981, when Congress enacted deep cuts in child nutrition programs, an estimated 2.5 million children were dropped from the School Lunch Program; close to 700,000 low-income children are no longer served, and an estimated 2,700 schools have had to end their programs. In addition, numerous studies have concluded that hunger among children is rampant throughout America.

Mr. President, the key to our future is through a major investment in our children. The truth is, children lose when Congress cuts these critical programs that are essential to their full development. Unable to vote or register their opinion in government, our children and their needs must be one of the most important responsibilities of this Congress. It is for these reasons, Mr. President, that I urge my colleagues to support this amendment.●

● Mr. BOSCHWITZ. Mr. President, I rise today in support of, and to cosponsor, Senator HAWKINS child nutrition amendment.

The President's budget and the Senate Budget Committee recommended $700 million in savings in child nutrition next year. The bulk of the savings would come as a result of eliminating the school lunch subsidy to the "paying child." As you know, current law under section 4 requires the Federal Government to pay schools 12 cents in cash and 12 cents in commodities for each school lunch served. Additional subsidies are given under section 11 for meals served to children from needy families—below 185 percent of poverty. A family of four with an income less than $19,600 will be below 185 percent of poverty next year. The rest of the savings would come from a freeze in cost-of-living adjustments for all child nutrition programs and means testing the family day care home participants in the Child Care Food Program.

With my support, the White House Senate leadership budget package reduced those cuts to $400 million. Those savings would be achieved by eliminating the cash subsidy to the paying child—but leaving the commodity subsidy in place—and means testing the family day care home participants in the Child Care Food Program. But I think even these cuts go too far and would not allow the School Lunch Program and the Child Care Food Program to operate effectively and feed hungry children.

Why should the section 4 subsidy to middle and upper-income families not be cut? First, look at the history of the School Lunch Program. Although during the 1930's and early 1940's there was some early assistance for School Lunch Program operations in an effort to dispose of surplus commodities, the major legislation governing the School Lunch Program was the National School Lunch Act passed by Congress in 1946. The National School Lunch Program got off the ground right after World War II because there was a significant degree of nutrition health problems that resulted in people being turned down for the draft. Dr. Thomas Parran, the Surgeon General of the U.S. Public Health Service, testified before the Senate Agriculture Committee in hearings on school lunch and the draft in May 1944. He testified about a study conducted in Hagerstown, MD that showed that 70 percent of children who had fair or poor nutrition, 10-12 years later were not accepted by the Selective Service. General Hershey, the head of the Selective Service, testified that probably half of all men rejected for the draft were rejected because of poor nutrition in childhood. Based on this testimony, and the timing of the legislation establishing the School Lunch Program, it is clear that the National School Lunch Program was begun, at least in part, to ensure that we would have healthy and able-bodied citizens capable of defending out country. That need is no less compelling today.

Second, eliminating paid-lunch subsidies will result in a reduction in participation in the School Lunch Program. According to the Department of Agriculture there is a correlation of 0.8 percent participation reduction for each 1-cent reduction in the paid lunch subsidy. Eliminating next year's projected 12.5 cents in cash subsidies for paid lunches would mean a 10-percent reduction in participation. This means 1.17 million children dropping out of the School Lunch Program. These figures do not even take into account schools that may stop participating in the School Lunch Program if the paid subsidy is eliminated. Consequently, even more children would lose the School Lunch Programs benefits—low-income children—if schools decide to drop the School Lunch Program. According to the Congressional Research Service, the decline in schools participating in the School Lunch Program after paid lunch subsidies were partially reduced in 1982 suggests that total elimination of cash subsidies would almost certainly result in some schools dropping the program. What's the result if children and schools drop the School Lunch Program? For every child not participating we lose the opportunity to ensure that that child is getting at least one nutritious meal per day. We lose the economies of scale that allow School Lunch Programs to be run economically and efficiently with higher participation.

Third, means testing the family day care home participants in the Child Care Food Program would be an administrative nightmare that will cause many day care providers to go underground. The Child Care Food Program is the carrot that keeps many day care providers licensed and ensures they are properly trained and caring for children in a safe environment. This nutrition program is the key component of the Federal Government's support for day care and should be maintained.

The policy issue can be reduced to a simple question: "Does the Federal Government have a role in ensuring that children receive nutritious meals and consequently assist the nutritional health of all children?" My answer must be yes. I believe the Federal Government has an obligation to prepare today's children to be tomorrow's strong, healthy, and well-educated citizens.●

● Mr. BOREN. Mr. President, I am pleased to join my colleague, Senator HAWKINS, in offering this amendment. The Senate Republican leadership-White House budget plan calls for a $400 million reduction in child nutrition funding during fiscal year 1986, and a $1.8 billion cut over 3 years. The majority of the savings are derivative from the School Lunch Program by the elimination of support provided for meals served to paying children.

There are those who believe we should eliminate support to students who are in the paid category; that is, those from families with incomes above $19,600. If it were as simple as having these students pay the full cost of a lunch at current prices, perhaps we would want to do this. The ramifications of the present proposal, however, are far from this. Decreasing the amount of support to schools leaves many schools with few options: To raise the prices dramatically to recover the lost income or to drop out of the School Lunch Program altogether. This is particularly the case in those institutions which have a high percentage of paying students. As one can imagine, the impact of increased prices will be that fewer students will be able to afford a hot lunch.

Dropping out of the School Lunch Program entirely will leave many needy children without the means to have lunch at all. When a school is forced from the National School Lunch Program, all children, including poor children, lose access to the program. The so-called high income subsidy is in reality a grant-in-aid to schools for the support of the basic infrastructure of the School Lunch Program, not a transfer payment to individuals.

The School Lunch Program is very important to all children. A 1982 Department of Agriculture study on the School Lunch Program found it to be nutritionally important to children in all income categories. It states that "the superiority of the school lunch is reflected in higher daily intake of nutrients for the general schoolage population and for all the population subgroups that were examined." The fact is simply that hungry children do not learn. To not provide all our children with a hot lunch adequate to meet minimum nutritional standards would be very shortsighted on our part.

Under the original proposal to reduce child nutrition funding by $700 million, the Congressional Research Service estimated that 7.3 million children and approximately 17,900 schools were at "risk of dropping from the program." The American School Food Service Association estimates with the elimination of the paid subsidy, 3 to 5 million children and 5,000 to 6,000 schools will be forced from the National School Lunch Program.

We have, in the past 4 years, already cut the School Lunch Program substantially. The Omnibus Reconciliation Act of 1981 reduced child nutrition funding by approximately one-third. While the child nutrition programs represented less than one-half of 1 percent of the total Federal budget, they shouldered 4 percent of the cut enacted as part of the Omnibus Reconciliation Act. We do not need to cut this program any further.

Mr. President, I urge my colleagues to support this amendment. None of us should ever apologize for supporting the School Lunch Program. There may be waste in other programs; food stamps, for example, may be diverted to other purposes and the children may never get the good meals which they need at home. At least under this program, we know that the children who need it get a balanced and nourishing meal. If cuts have to be made, they should be made in other programs which are more subject to abuse and not in this one.●

● Mr. KENNEDY. Mr. President, I rise in strong support of the amendment being offered by my distinguished colleague from Florida, Senator HAWKINS. This amendment is critical to the well-being of millions of young children across our country and it deserves particular attention by every Member of the Senate.

This amendment will provide the programs under the Child Nutrition and School Lunch Act with current services funding over the next 3 years. The Republican leadership/White House compromise budget plan would cut these programs by almost $1.8 billion over the next 3 years. I would

hardly call the President's budget plan before us today a fair compromise when he is compromising the health and well-being of millions of our children.

For those of my colleagues who may not remember, in 1981 the Omibus Budget Reconciliation Act reduced child nutrition funding by 33 percent. Even though child nutrition programs represent only one-half of 1 percent of the total Federal budget, these programs shouldered a 4-percent cut in 1981, one of the deepest cuts of the needs-based Federal programs that year.

There have been consequences to the cuts enacted 4 years ago. Over this period of time, 2.4 million children have dropped out of the School Lunch Program. Some of this drop can be attributed to declining school enrollment, however, a full 2 million of these children lost school lunch services because of President Reagan's cuts. Over half of these 2 million schoolchildren who no longer receive school lunch are poor. Participation in the School Breakfast Program has declined by 380,000 children since 1981. Over 60 percent of this decline represents low-income children who now must remain hungry during the school day.

Since 1981, Congress has worked hard to, at the very least, maintain funding for these important services. President Reagan is asking schoolchildren to bear an unfair burden for the next 3 years so that the budget deficit which he created can be reduced. I believe that the critical budget situation can be solved, but not at the expense of young children.

This year President Reagan and the Republican leadership in the Senate propose to eliminate the Federal support to schools for meals to children who do not live below 185 percent of the poverty line; freeze the reimbursement for free and reduced-price meals thus forcing schools to absorb the cost of food price inflation; and impose a means test for children in family day care homes who participate in the Child Care Food Program. These changes all together would guarantee that between 3 to 5 million children and 5,000 to 6,000 schools will drop out of the lunch and breakfast programs and many more very young Americans will lose their meals and snacks in family day care homes.

We have evidence that the child nutrition programs work. A recent USDA study indicates that the School Lunch Program improves the nutritional intake of children in all income categories.

I would like to remind my colleagues that the National School Lunch Program is a food and nutrition program aimed at improving the health of all children, not just poor children. The act was established in 1946 as a measure of national security to safeguard the health and well-being of all the Nation's children. As a matter of fact, Mr. President, section 4, the so-called middle-income subsidy has been in place since the law's inception. It wasn't until the early 1970's that funds for free and reduced-priced meals for poor children were added.

Finally, Mr. President, the most compelling evidence we have of the critical need for restoration of child nutrition funds is the devastating increase in the number of poor children in our country over the past few years. The most recent census statistics show us that now, one in every four children under the age of six lives in poverty. Both Census and GAO tell us that the number of low-income children in school went up over the past 4 years, and, the total number of Americans living in poverty has increased over 9 million or 35 percent since 1979, the largest increase since poverty has been recorded.

These statistics are not new, but it seems that the White House has yet to become acquainted with them. It is clear that the President has yet to become acquainted with the millions of children who are poor and who go to school hungry in this Nation. If we do not fight for these children in Congress today, we will all become acquainted, each and every one of us, with the devastating effects that these cuts will have on our next generations and the future of America.

I urge my colleagues to invest in our children and our future by adopting this amendment.●

● Mr. DOMENICI. Mr. President, the Senate-White House agreement assumes spending in the child nutrition program of $3.7 billion in fiscal year 1986, and $11.6 billion over the fiscal year 1986–88 period.

The agreement assumes that upper-income cash subsidies—but not commodities—paid to schools and institutions for children from higher-income families would be eliminated, and the COLA would be temporarily restrained.

In an era of $200 billion dollar yearly budget deficits, the Nation simply cannot afford to subsidize the nonneedy.

The proposal would not affect free meal recipients, and reduced price meal recipients would pay no more than 40 cents per lunch as under current law.

The nonpartisan Congressional Budget Office estimates that no more than 2 percent of free and reduced-price meal participants—about 240,000 children—would lose access to school lunch as a result of the changes, and that number may be as low as 36,000 children.

Similar claims of massive participation reductions in 1981 proved unfounded. More children received free meals in 1985 than in 1981. Meal reductions were due to declining enrollments, school consolidations, and elimination of high-tuition private schools.

The budget maintains Federal spending for needy children while eliminating support for upper-income children.

About 12 cents in daily subsidies for nonneedy children would be eliminated.

These children—from households above 185 percent of poverty—are from families with average incomes of $33,000 who can afford to pay an extra 12 cents a day.

The school lunch program will maintain its integrity.

Free and reduced price support represents 85 percent of Federal dollars provided in the School Lunch Program.

The average school would lose 6 percent of its funds, but predominately low-income schools would lose almost no funds.

School lunches would still be a bargain. They are cheaper and more nutritious than fast food and other lunches.

The cost of producing a school lunch increased 7 percent between 1979 and 1984. But the index used to adjust child nutrition subsidies increased by 32 percent in the same period.

In family day care homes that participate in the child care food program, a family income test would be reinstated as part of the effort to eliminate subsidies to the nonneedy.

In this program, all children receive a free meal, but about 65 percent of the participants are upper-income children—from households above 185 percent of poverty.

Since day care home providers already must pass a means test to qualify their own children for the program, this would not be a new and unfamiliar requirement.●

CHILD NUTRITION IN THE UNITED STATES

Mr. DECONCINI. Mr. President, I am pleased to support the amendment being offered by my distinguished colleague, Senator HAWKINS, to restore funding for child nutrition programs for the next fiscal year. The restoration of funding is necessary to maintain adequate school breakfast and lunch programs, prenatal and infant nutrition programs for our Nation's children.

During the past 4 years a series of significant cuts have been made in programs for the elderly, poor, the homeless, and hungry. I have always believed that every human being has a right to the basic resources necessary to sustain a dignified and productive life, and that all of us in society have the responsibility to protect that right. A hungry man, woman, or child

is not positioned to realize his or her full potential.

Hunger is widespread today in every region of this Nation, and there is compelling evidence that hunger is associated with infant mortality, low birth weights and other adverse health conditions. Throughout this country, in the cities, towns, and rural areas, you can observe human hunger and poor health in soup kitchens, school lunch rooms, homes, clinics, and feeding sites for the elderly. Hunger has returned to America and is increasing daily, but it can be decreased and its consequences moderated. The extent of hunger today has a direct correlation to the recent cuts in our Federal programs.

The most dramatic fact about hunger today is that it has managed to return so quickly and is growing at such a rapid rate. Starting in 1982 and continuing throughout 1983-84, compelling evidence has revealed that a large number of our American citizens are going without the necessary food to keep them alive and healthy. The stories and reports from television and researchers are reminiscent of the Great Depression, when soup kitchens fed family after family. The researchers soon learned that many of the hungry were the result of our society's economic and technological changes.

In 1982, the Centers for Disease Control reported in its national nutrition surveillance survey of over 400,000 children some very discouraging information. It revealed that some 8.5 percent of the children under age 6 were stunted, and about 7 percent were anemic. If these rates are applied to the national population of low-income children, it would mean that more than 500,000 American children under the age of 6 are likely to be malnourished.

From this standpoint, can we as a nation afford to cut our Federal nutrition programs and jeopardize our pedicatric population? It's very clear to this Senator that malnutrition is a serious problem in these United States. It seems that we can respond to an outbreak of a disease from an unknown etiology, which has no relationship to Government programs, economic policies or politics, but it seems that the Reagan administration cannot or will not respond to hunger, whose rise can be traced to cuts in the programs that prevent it.

Mr. President, this amendment is our commitment to nourish the children of our Nation to build a better tomorrow. As the late Dr. Martin Luther King, Jr., stated, "* * * let them say that I tried to feed the hungry". I commend the distinguished sponsors of this amendment and urge its adoption.

Mr. DOMENICI. Mr. President, is there any time remaining on the amendment?

The PRESIDING OFFICER. The Senator from Florida has 1 minute.

All time has expired on the part of the opponents.

Mrs. HAWKINS. Mr. President, I yield back my time.

Mr. DOMENICI. I move to lay the amendment on the table, Mr. President. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion to table.

The yeas and nays have been ordered. The clerk will call the roll.

The legislative clerk called the roll.

Mr. SIMPSON. I announce that the Senator from Maryland [Mr. MATHIAS] is necessarily absent.

I also announce that the Senator from North Carolina [Mr. EAST] and the Senator from California [Mr. WILSON] are absent due to illness.

Mr. CRANSTON. I announce that the Senator from Nebraska [Mr. EXON] is absent because of illness.

The PRESIDING OFFICER. Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 36, nays 60—as follows:

[Rollcall Vote No. 55 Leg.]

YEAS—36

Abdnor	Helms	Proxmire
Armstrong	Humphrey	Quayle
Cochran	Kassebaum	Roth
Denton	Laxalt	Rudman
Dole	Lugar	Simpson
Domenici	Mattingly	Specter
Garn	McClure	Stevens
Goldwater	McConnell	Symms
Gorton	Murkowski	Thurmond
Gramm	Nickles	Trible
Hatch	Packwood	Wallop
Hecht	Pressler	Warner

NAYS—60

Andrews	Durenberger	Leahy
Baucus	Eagleton	Levin
Bentsen	Evans	Long
Biden	Ford	Matsunaga
Bingaman	Glenn	Melcher
Boren	Gore	Metzenbaum
Boschwitz	Grassley	Mitchell
Bradley	Harkin	Moynihan
Bumpers	Hart	Nunn
Burdick	Hatfield	Pell
Byrd	Hawkins	Pryor
Chafee	Heflin	Riegle
Chiles	Heinz	Rockefeller
Cohen	Hollings	Sarbanes
Cranston	Inouye	Sasser
D'Amato	Johnston	Simon
Danforth	Kasten	Stafford
DeConcini	Kennedy	Stennis
Dixon	Kerry	Weicker
Dodd	Lautenberg	Zorinsky

NOT VOTING—4

East	Mathias
Exon	Wilson

So the motion to lay on the table was rejected.

The PRESIDING OFFICER. The question recurs on the amendment. The yeas and nays have been ordered.

Mr. DOMENICI. Mr. President, I yield myself a half a minute on the resolution.

Will the distinguished Senator from Florida agree to our accepting the amendment and vitiating the yeas and nays?

Mrs. HAWKINS. Certainly.

Mr. DOMENICI. Mr. President, I ask unanimous consent that the yeas and nays be vitiated.

Mr. BYRD. Mr. President, reserving the right to object.

Mr. President, I remove my reservation.

The PRESIDING OFFICER. Without objection, it is so ordered.

The question is on agreeing to the amendment of the Senator from Florida.

The amendment (No. 77) was agreed to.

AMENDMENT NO. 79

(Purpose: To freeze function 450 (Community and Regional Development) at fiscal year 1985 levels, and to preserve rural housing programs of the Farmers Home Administration at reduced levels)

Mr. SASSER. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The bill clerk read as follows:

The Senator from Tennessee [Mr. SASSER] for himself, Mr. RIEGLE, Mr. SPECTER, Mr. STENNIS, Mr. HART, Mr. GORE, Mr. ROCKEFELLER, Mr. BURDICK, and Mr. HOLLINGS proposes an amendment numbered 79.

Mr. SASSER. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

In the pending amendment, do the following:

On page 3, increase the amount on line 12 by $5,100,000,000.

On page 3, increase the amount on line 13 by $5,300,000,000.

On page 3, increase the amount on line 14 by $6,300,000,000.

On page 3, increase the amount on line 18 by $2,200,000,000.

On page 3, increase the amount on line 19 by $4,100,000,000.

On page 3, increase the amount on line 20 by $5,400,000,000.

On page 3, increase the amount on line 25 by $2,200,000,000.

On page 4, increase the amount on line 1 by $4,100,000,000.

On page 4, increase the amount on line 2 by $5,400,000,000.

On page 4, increase the amount on line 6 by $2,200,000,000.

On page 4, increase the amount on line 7 by $6,300,000,000.

On page 4, increase the amount on line 8 by $11,700,000,000.

On page 4, increase the amount on line 12 by $2,200,000,000.

On page 4, increase the amount on line 13 by $4,100,000,000.

On page 4, increase the amount on line 14 by $5,400,000,000.

On page 5, increase the amount on line 3 by $3,100,000,000.

On page 5, increase the amount on line 10 by $3,800,000,000.

On page 5, increase the amount on line 17 by $4,000,000,000.
On page 15, increase the amount on line 8 by $2,500,000,000.
On page 15, increase the amount on line 9 by $1,500,000,000.
On page 15, increase the amount on line 11 by $2,400,000,000.
On page 15, increase the amount on line 17 by $2,600,000,000.
On page 15, increase the amount on line 18 by $2,200,000,000.
On page 15, increase the amount on line 20 by $2,500,000,000.
On page 16, increase the amount on line 1 by $3,000,000,000.
On page 16, increase the amount on line 2 by $2,600,000,000.
On page 16, increase the amount on line 4 by $2,600,000,000.
On page 18, increase the amount on line 8 by $2,600,000,000.
On page 18, increase the amount on line 9 by $700,000,000.
On page 18, increase the amount on line 11 by $700,000,000.
On page 18, increase the amount on line 17 by $2,500,000,000.
On page 18, increase the amount on line 18 by $1,700,000,000.
On page 18, increase the amount on line 20 by $1,300,000,000.
On page 19, increase the amount on line 1 by $3,000,000,000.
On page 19, increase the amount on line 2 by $2,500,000,000.
On page 19, increase the amount on line 4 by $1,400,000,000.
On page 33, increase the amount on line 2 by $200,000,000.
On page 33, increase the amount on line 3 by $200,000,000.
On page 33, increase the amount on line 11 by $300,000,000.
On page 33, increase the amount on line 12 by $300,000,000.

Mr. DOMENICI. Mr. President, will the Senator yield for a request on time?

Mr. SASSER. I yield.

Mr. DOMENICI. I wonder if the distinguished sponsor of the amendment would agree to 15 minutes on his side and up to 15 minutes in opposition?

Mr. SASSER. Yes; that will be agreeable.

Mr. DOMENICI. I so ask unanimous consent.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOMENICI. I thank the Chair, and I thank the distinguished Senator.

Mr. SASSER. Mr. President, the amendment that Senator RIEGLE, Senator STENNIS, and I are offering today is designed to reinforce the Federal Government's commitment to economic and community development of our Nation.

We are joined in this effort by cosponsorship on the part of Senators SPECTER, HART, GORE, ROCKEFELLER, BURDICK, and HOLLINGS, in addition to Senator RIEGLE and Senator STENNIS.

The amendment that we offer effectively protects those economic development programs which are contained in budget function 450. Namely, the urban development action grant program, the community Development Block Grant Program, the Appalachian Regional Commission, the Economic Development Administration, and TVA.

The amendment also preserves the Farmers Home Administration Rural Housing Programs at a level which amounts to a 25-percent reduction in 1986.

The amendment that we offer is consistent with the notion of spending restraint embodied in the spending freeze proposals which, I submit, are gaining support from both sides of the aisle. Our amendment, however, would bring spending in both functions 370, Commerce and Housing Credit, and 450, Community and Regional Development, below the freeze level, thus realizing even greater deficit reduction.

What is rejected here are the proposals advanced in the so-called White House/Republican leadership package to abolish many of the economic and community development programs which have been essential to the growth and development of areas of this country which otherwise would not have benefited from the economic recovery.

These programs are designed to benefit communities regardless of political ideology or orientation. Poverty, squalor and hopelessness are not the sole province of any one particular party. Local officials, both Republicans and Democrats, liberals and conservatives, have made good and efficient use of these moneys furnished by these programs over many years.

Earlier this year I held budget hearings across my State on the proposed elimination of these programs and the impact this would have on the local economy. The testimony I received from local officials only served to reinforce what I had already expected: Namely, that there is overwhelming bipartisan support for these programs which cut across both political and ideological lines.

The second major component of this amendment addresses the proposed elimination of Farmers Home Administration Rural Housing Programs. These programs have served the needs of almost 2 million families and the elderly since 1949. Farmers Home has been the only source of mortgage credit in many of our rural areas with over 500 rural counties without a federally chartered savings and loan.

The National Association of Home Builders estimates that the elimination of new housing production in rural housing programs could generate the loss of close to $1 billion in Federal, State, and local taxes and the loss of over 80,000 jobs.

I must stress that the amendment which we are offering does result in significant savings from the CBO baseline. Over the next 3 years, the savings from this proposal will amount to some $8.6 billion. Although the amendment does call for additional funding above the so-called Rose Garden Two Compromise, it must be realized that the compromise calls for outright elimination of several of these programs, a prospect we find both unrealistic and undesirable.

APPALACHIAN REGIONAL COMMISSION

Early in the 1960 Presidential campaign, John F. Kennedy came face to face with the poverty and despair which characterized the region of this country known as Appalachia. This region essentially covers 13 different States stretching from New York to Mississippi.

Appalachia has been isolated both physically and culturally for generations. This isolation has particularly handicapped the young, limiting education, health care and the opportunity to find jobs. These limits helped perpetuate an outmigration of youth from the region, a sort of "brain drain", which only exacerbated the poverty, misery, and despair endemic to the eon.

I think the best description of the prevailing hopelessness which engulfed the region is contained in chapter 1 of the 1964 Report of the President's Appalachian Regional Commission: The report states that:

> Graphs and Tables can hardly relate the acutely personal story of a child in a remote valley, his horizon of opportunity limited to the enclosing hills; nor the despair of his father, who, idled by forces beyond his control and seeing no prospects of future employment, must live month in and month out with the vision of that child repeating his own history.

This report paved the way for the submission and ultimate passage of legislation establishing the Appalachian Regional Commission in 1985, just a little over 20 years to this date.

The act's stated purpose was to assist the region in meeting its special problems, to promote its economic development, and to establish a framework for joint Federal and State efforts toward providing the basic facilities essential to its growth and attacking its common problems and meeting its common needs on a coordinated and concerted regional basis.

The ARC has been the quintessential embodiment of the public/private partnership concept. From an institutional perspective, ARC has blended local, State, and national perspectives in its policy and program decisions.

The ARC decision process involves each governmental level in a unique way. Cooperation among numerous Government agencies at all levels as well as various segments of the private sector form the basis for effective implementation of this essential economic development program.

ARC's accomplishments over the past two decades are many, and one need only travel throughout the

region to see with their own eyes the benefits which communities have reaped from the program. Each time I travel through the upper east region of Tennessee, I only need to look around me: Highways built with ARC money which have provided access to previously isolated communities; the Tri-Cities Airport which opens up the Johnson City-Kingsport-Bristol communities to the outside world; educational institutions such as East Tennessee State University and vocational schools; health centers, sewer and water treatment projects, public buildings, and industrial parks. I could go on and on.

But with all that we have accomplished, there is still much work to be done. ARC has had a tremendous impact upon the region but it is unrealistic to suppose that 20 years of work could wipe out generations of neglect.

Appalachia still lags behind the rest of the country economically on the average, and certain parts of the region remain severely depressed. Small business investment companies in Appalachia still have less than 1 percent of the $818 million in private money held in the United States. The need to keep abreast of the rapidly changing job market and the shift to a service-oriented economy require that education and training needs in the region be kept up to date. Thus, continued partnerships among business, government, and education will be essential.

In sum, the Appalachian Regional Commission represents the sort of public/private partnership which ought to be the mainstay of the "new Federalism." It has enjoyed bipartisan support in the past and I sincerely hope that my colleagues will continue to support this concept in the future.

Mr. President, I ask unanimous consent to have printed in the RECORD an editorial from the Bristol Herald Courier/Virginia Tennessean of April 14, 1985, entitled "ARC's mandate not yet filled."

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

ARC's MANDATE NOT YET FULFILLED

Former Rep. W. Pat Jennings of Virginia's Ninth District has a paternal interest in the fate of the Appalachian Regional Commission. He was a member of Congress when the ARC was established and knows firsthand what it has meant to Southwest Virginia and Upper East Tennessee.

In the context of his remarks in Bristol Thursday night at the annual meeting of the Mount Rogers Planning District Commission, it would, indeed, be "absolutely absurd" to abolish the ARC. "Absurd," that is, to deny assistance to struggling Americans while "spending money on underdeveloped countries . . . that won't help themselves."

Mr. Jennings also demonstrated that it is easier to be a former congressman than an incumbent. In order to save the ARC, he said, along with other federally-funded programs, it will be necessary to raise taxes.

The former congressman's comments came at a time when the ARC is facing a phase-out as part of congressional (and Reagan administration) efforts to bring deficits down and get a handle on the mushrooming federal debt. Moreover, questions grow concerning how much, if anything, the federal government should do in the name of economic development.

Few programs have proved themselves as well as the ARC. Since its inception in the middle 60s, the number of Appalachian citizens living in poverty has declined 50 percent; the region's infant mortality rate has declined 50 percent, thanks to improved health care; the number of Appalachian residents who have completed high school has increased from 33 percent to 57 percent; nearly 400 health clinics and 2,000 miles of highway have been constructed. All this has been done with financial and planning assistance from the ARC.

For all this, the principal question is not *whether* the ARC should be abolished but *when*. The answer is "not now," and not in the near future. Much remains to be done.

The task of the moment is, or ought to be, one of determining what that "much" consists of: Roads? Health facilities? Water and sewer systems? Only when this information is available can Congress make a reasoned judgment on *when* the ARC will have fulfilled its mandate.

It should be abolished sometime—but it should be done slowly, not precipitately. To do otherwise, in Mr. Jennings' words, would be "absolutely absurd." Our government's hand-of-help should be extended first to Americans.

Mr. SASSER. Mr. President, I move to the Economic Development Administration.

ECONOMIC DEVELOPMENT ADMINISTRATION

Another program that I would like to focus on is the Economic Development Administration. EDA is similar to ARC in its orientation but its mandate was specifically more focused upon economic development. EDA was conceived as a depressed area agency with a largely rural focus and had a supply-side orientation aimed at reducing costs to potential investors as a means of attracting industry and creating jobs. It was to provide a stimulus to selfsustained growth in the private sector, not simply to effect income transfers to the long-term unemployed.

Given this mandate, it is always perplexing to me that this administration, with its stated objective of strong economic growth, is not reluctant in the least to eliminate successful programs which promulgate the very objectives the administration seems to hold so dear.

The EDA goal of promoting sound, long-range economic planning at all levels of government is a necessary corollary to the supplyside aid to infrastructure development that constitutes the bulk of EDA programs.

But just as important as the planning function, is the conceptual embodiment of the State/local/Federal partnership of public and private interests inherent in the Economic Development Administration programs. Truly, success can be measured in these programs by the involvement of local elected officials and citizens in them. By this standard, EDA is genuinely a success story.

EDA funds create permanent, private-sector jobs. In my own State of Tennessee, these programs have created more than 60,000 jobs since the inception of the Economic Development Administration in 1965. These jobs not only improve the economy of the State, but they improve the state of the economy.

COMMUNITY DEVELOPMENT BLOCK GRANT PROGRAM

The primary objective of the Community Development Block Grant Program, as outlined in section 101 of the Housing and Community Development Act Amendments of 1974, is to assist in "the development of viable urban communities, by providing decent housing and a suitable living environment and expanding economic opportunities, principally for reasons of low and moderate income."

The range of activities which have been undertaken to accomplish these goals include: the construction and improvement of roads; parking facilities and community centers; rehabilitation and repair of public buildings; planning; land acquisition and clearance; and social services. These activities form the bedrock of the basic infrastructure of many of this Nation's communities.

The social and economic stratification that led to the need to create the Community Development Block Grant Program is likely to continue and worsen with each cut in this valuable program. Thus, it is imperative that at the very least we maintain a freeze in this program at the current funding level for 1 year.

URBAN DEVELOPMENT ACTION GRANT PROGRAM

Once again, we find the administration attempting to put to rest this highly important and effective Community Development Program. The UDAG Program represents the single-most prominent example of the concept of public and private cooperation in rebuilding and developing America's communities.

The program is designed to attract investment to distressed cities for projects that will create long-term jobs. The program leverages roughly $6 in private capital for every $1 in public investment. Over the past 4 years, the program has created some 232,000 jobs and has generated local tax revenues exceeding $270 million.

There has been a great deal of discussion over the past year involving changes in the funding formula because of weighted measures which distinctly favored certain regions of the country over others. I am pleased to say that just yesterday, after 8 months of bargaining and negotiation, Sena-

tors RIEGLE, GRASSLEY, D'AMATO, HEINZ, and myself announced agreement on a formula change which hopefully will address the inequities which have been present over the past several years. Thus, we have put the formula controversy behind us. It is now our responsibility to save the program.

FARMERS HOME ADMINISTRATION RURAL HOUSING PROGRAMS

Contained in the White House/Republican leadership compromise is a proposal to completely eliminate the Farmers Home Administration rural housing programs. These programs are targeted to low and very low-income people who would not otherwise be able to afford housing.

This proposal simply makes no sense at this time. Rural poverty is on the rise. Today, 3½ million rural households live in poverty.

Under the FmHA section 515 Multifamily Program, almost 75 percent of the tenants have incomes below $6,000. Under the section 502 single family programs, legislation mandates that 40 percent of all funds must go to borrowers with incomes of 50 percent of the area median or less.

Further, the economic recovery has simply passed many rural areas in this country by. The Deputy Under Secretary of Agriculture for Small Towns and Rural Development recently advised a delegation of rural housing officials that rural areas have not benefited from the national economic recovery at the same rate as the national average.

The reductions contained in this budget amendment are deep relative to the problems encountered in rural America. However, they are a far cry from the abandonment advocated by the Reagan administration. We should keep a keen eye on the budget deficit, but we must not close our eyes to rural America.

The Senators from Mississippi and Michigan have additional remarks on the specifics of the amendment, and I yield at this time to the distinguished senior Senator from Mississippi.

The PRESIDING OFFICER. The Senator from Mississippi is recognized.

Mr. STENNIS. Mr. President, let me first say to my colleagues that the subject matter of this amendment is something about which I have personal knowledge and have been familiar with the problems that caused these segments and departments of the Government to be created for the purpose of bringing aid and assistance. I have been familiar with these facts all these years. They apply to an area where I was born and reared and have lived there all my life. So I do know the facts in connection with the problem.

Mr. President, take this Federal rural housing problem, the need, and let me discuss what we are going to do about it.

In spite of things that might not look perfect about it, I think it has been one of the great programs for America. Things have now moved to a higher price that cannot be met by these lower-income people. The banks as a whole now do not made enough money out of these loans to justify the added cost of the help and supervision that they would have to hire.

Now, the resolution proposes that there be a 2-year moratorium, that the program be suspended, and then passed over to another department of Government which means they do not now offer a solution, or a substitute therefor. It is just a matter of skipping and losing this time, and we will be right back where we started, and I think that even though the Farmers Home Administration may have some weak points, this housing program has been one of their best and it serves an absolute need.

There is no way to get along without the housing. There is no way to avoid the cost of it, which is really excessive. But the big thing is that nearly all of the principal sum of this money is paid back. The subsidy comes as a part of the interest, but by a relatively small part of that interest.

So that is the real answer. That is the real answer to the whole question.

Now, unfortunately here when we are trying to pump down figures lower and lower, it adds up a good bit, even though we are just asking that 75 percent of the program be included within this amendment.

So I think we are dealing here with an absolute—I know we are—the absolute necessity that this program serves the purpose that as a whole they are getting first-class houses built, they are getting value received for the money, and a great part of this money is going to be paid back by the owner, together with a good portion of the interest.

I just happened to run across the figures here that showed we are about proposing now to take this program for our own people, take it out, with the moratorium, and then we do not know what after 2 years, and that will be a total amount of $1.2 billion. That includes the housing which is most of the money which runs the bill up.

But we are running now the economic aid in the bills this year for South American countries, and I do not fight these aids, as long as the amounts are reasonable, runs a total to $980 million.

This same budget resolution is going to give in economic aid $980 million the first year, this year, and at the same time cut out entirely on a 2-year basis this program that does not cost much more for low-income people and where the money is going to be paid back. Those dwelling houses do bring fair prices when they are sold.

I have had contract, also, with some of the staffs of these economic development services. They are highly competent people and serve with credit.

I know some of the personnel with TVA. They have as fine a staff on technology and any other matter as you can find. Their advice and counsel is splendid. They know what a factory needs. They are just as good as you find anywhere. And I have made a point to come in contact with them, not just preparing for this statement, but have observed them for over a period of years.

So I think this package that is put together here—I do not blame anyone personally for leaving these items out, but I think largely, with all deference, the proposal to leave them out was made by someone who did not know the facts and did not know the need.

And generally I voted for the low figure here in all of this bill. I am interested in seeing a sound bill pass and willing to make some hard votes to try to get what I think is a sound bill. But I tell you now, our compass is off. We are off the job in these relatively little programs when we go to cancel them out or abolish them in order to lower the money figures in the bill.

Now someone said, "Well, if a fellow can't get a job there in that community, if he lives where he cannot get a job, he better just go somewhere else even if he has to walk."

Well, I will tell you that is not a real answer. That is not a real answer for the people down there that have lived there for generations. I personally know them. They have lived there for generations and that is not an American answer to be giving them—"Well, you just get out and go somewhere else and try to get a job somewhere else." I do not want them to tell me that, and I am not going to leave. And there are a whole lot of them that feel that way.

They are working people. They worked hard and they earned their way. We just must not go off and leave them. They do not have funds to build a dwelling house. But they are worthy and we must not desert them now. The building of the house creates jobs at the time, and serves the area well indeed as a dwelling house for a worthy industrial worker needed for small industrial plants in the area.

Mr. SASSER. Mr. President, I thank the distinguished Senator from Mississippi. His words today are very convincing, I think, to all our colleagues. Over the period of his most remarkable career in this body, he has seen how these programs can enhance the quality of life of those regions of our country which suffer from a relatively low per capita income.

Mr. President, I ask unanimous consent that Senator SARBANES and Senator BYRD be added as cosponsors.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SASSER. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. SASSER. Mr. President, I yield to the distinguished Senator from Michigan and then to the Senator from West Virginia, [Mr. ROCKEFELLER].

Mr. RIEGLE. I thank the Senator from Tennessee for yielding and for his leadership on this issue.

I want to acknowledge the remarks of the Senator from Mississippi, who is as fine a man that has served in this body and loves this country and understands the long history of this country. I think he understands the needs in rural America perhaps better than anybody else in this body. When he comes in today to speak with such feeling about what he has seen and what the needs are and to make an appeal that we not tear rural America apart and just toss people to the four winds, I think he speaks from a depth of knowledge that I hope the Senate will weigh very carefully. He speaks the truth in terms of what our testimony has shown before the Banking and Housing Committee and what people from across the country have come to say to us about it.

I want to say one other thing with respect to the UDAG Program. We have worked for months on a bipartisan coalition, to revise fundamentally the UDAG formula so that it is fairer and so that it is available to finance projects in every community across this country. The other day we had a press conference with Senator GRASSLEY, Senator D'AMATO, and Senator HEINZ, and Republican and Democratic Members of the House joining us, Senator SASSER and myself, to indicate that we have reached an agreement on how to change the UDAG formula to meet the objections that have been raised in the past.

So I can say that we now have a revised way to implement that program, which I think will do a great service to the country and where all Members will find that they can feel good about in the targeting formula.

But, finally, the basic human needs and the basic infrastructure needs in this country do not go away. They are there and we have to meet them. Eventually they convert themselves to human needs. When the Senator from Mississippi, looking out over a long lifetime and many years of distinguished service in this body, comes in and says that in his view these programs, small as they are, are vital, they met vital needs, I think that is as powerful a statement as we have had by anyone on any of the amendments that have been offered thus far. I am pleased to join with him today and I appreciate his leadership.

Our amendment would avoid a drastic loss of funding for vital development of urban and rural communities. It would retain the UDAG Program that has enabled the Nation's most severely distressed cities to rebuild their economic foundations. It would retain rural housing programs that increase homeownership and rental opportunities in rural areas and provide decent shelter for farm workers. It would continue a national commitment to local communities through the CDBG Program.

UDAG

Under our amendment spending for the UDAG Program would remain at the fiscal year 1985 level. The administration proposes to eliminate the UDAG Program in fiscal year 1986; however, the UDAG Program has proven that the Federal Government can act in a timely and sensitive way to reinforce private sector initiatives that strengthen local economies.

Since it was enacted, UDAG has demonstrated solid results. Over 2,400 UDAG projects are projected to create or maintain 484,000 permanent new jobs; 55 percent of those jobs are slated for low- and moderate-income persons.

UDAG has stimulated almost $7 in private investment for every Federal dollar. That's a total of 21 billion private investment dollars that UDAG has generated in just a few years. That's a real success story in private sector-Government cooperation.

Conservative estimates place savings in the form of increased taxes and reduced transfer payments at $991 million per year, compared to an annual appropriation of $440 million.

UDAG is clearly a program that is working extremely well. It helps locate new industry in areas where there is need. It creates jobs. It makes fuller use of the Nation's enormous investment in existing roads, water and sewer systems and other infrastructure.

UDAG aids distressed communities that do not have the capacity to solve their problems entirely on their own. UDAG projects in recent years have concentrated funds on projects in the most productive sectors of the economy. They have helped shift the economic base of distressed cities from declining industries to those holding the most promise for the future.

Some Senators have stated that their support for the UDAG Program was weakening during the last year because the new project selection system put a number of their communities at a disadvantage in the competition for funding.

I am pleased to report to my colleagues that during the last 9 months, Senators D'AMATO, SASSER, GRASSLEY, and HEINZ have worked with me to come up with an effective and fair solution to this problem. We now have a bill that should end this controversy.

Our bill is a major accomplishment, and it demonstrates that UDAG continues to have strong, bipartisan support in the Senate. Our effort has involved Senators from both parties, from all regions of the country, and who represent both sides of this issue.

We have developed legislation that improves local negotiations and gives all eligible cities a fair chance to have outstanding projects approved. The bill retains key aspects of the UDAG Program, such as the national competition and targeting on the most distressed cities.

It is clearly in the national interest to maintain the UDAG Program at its current funding level to address the important needs of our Nation's distressed cities.

RURAL HOUSING

Our amendment also provides critical funding for rural housing programs administered by Farmers Home. These programs provide the badly needed assistance in rural areas and small towns to increase homeownership and to provide decent shelter for farm workers. In addition, they increase rental opportunities in rural areas for the elderly, handicapped, and low-income families.

As a nation we continue now, as in the past, to have a need to help Americans in rural areas to upgrade their housing. Our amendment recognizes the need to reduce the Federal deficit and proposes that lending authority for FmHA rural housing programs be reduced by $300 million from the fiscal year 1985 level.

Yet, the budget plan now before the Senate would cancel new construction and rehabilitation programs and replace them with a voucher program that relies on existing rental units. That simply is inappropriate for rural communities. The incidence of inadequate housing in rural areas is twice that of metropolitan areas.

This budget plan as it now stands would eliminate home ownership loans and home repair loans and grants. But 2 million rural households live in substandard housing and many rural areas have historically suffered a shortage of credit. These families need assistance if they are to achieve decent living conditions.

The administration wants to transfer Farmers Home programs to the Department of Housing and Urban Development which does not have the expertise, the resources, or the staffing structure to deal with the needs of rurals areas. Indeed, HUD programs are already slated for substantial cutbacks under administration proposals. The effect of such a shift will be the virtual elimination of rural housing programs.

COMMUNITY DEVELOPMENT

Our amendment also freezes funding for the Community Development Block Grant Program [CDBG] and rural development programs at their current funding levels. CDBG helps communities improve living conditions for low- and moderate-income families, reduce slums and urban blight, and meet the urgent needs that threaten their health and welfare. Rural development programs enable rural areas to develop water and waste disposal facilities, community fire protection forces, and other essential community facilities.

The budget plan now before us would cut these programs and reduce their effectiveness and targetting. Our amendment would only maintain these programs at their current funding level so they may continue to help local communities in every part of our country to meet the basic needs of our citizens.

Mr. President, the amendment my colleagues and I offer today provides only that which is essential if we are to maintain the integrity of community development and housing in our cities and our rual areas. It would allow us to continue meeting important national objectives. I urge my colleagues to support the amendment.

Mr. SASSER. I yield to the distinguished Senator from West Virginia and then to my distinguished colleague from Tennessee.

The PRESIDING OFFICER. Under the previous agreement, all time for the proponents of the resolution has expired.

Mr. SASSER. Mr. President, I ask unanimous consent that we have 2 minutes off the resolution.

Mr. DOMENICI. Reserving the right to object, you do not need unanimous consent to get time off of the resolution. The distinguished Senator from Florida can yield the time.

Mr. SASSER. Will the distinguished Senator from Florida yield us 2 minutes off the resolution?

Mr. CHILES. I yield 2 minutes to the Senator from Tennessee.

Mr. ROCKEFELLER. Mr. President, it is a privilege to cosponsor and actively support the amendment of the able Senator from Tennessee [Mr. SASSER] which preserves in substantial part the Federal Government's commitment to economic and community development activities and rural housing.

As Senators know, the pending proposal establishes a freeze level of funding for function 450 of the budget resolution, of which the major program areas are the Economic Development Administration, the Appalachian Regional Commission, community development block grants, urban development action grants, and Small Business Administration disaster assistance. The amendment also includes the Farmers Home Administration Rural Housing Loan Program but with a cut of 25 percent.

Mr. President, these programs have been successful in stimulating jobs, growth, and the establishment of needed public facilities and for the improvement of the quality of life for people in my State of West Virginia and throughout our Nation. They are critical elements in the efforts of our communities to design and implement effective economic development activities. They are an investment in the future of our Nation. To back away from our commitment to these economic and community development programs now—to eliminate them—would be shortsighted and irresponsible.

Federal assistance for economic and community development is still urgently needed by many, many towns and cities throughout our country, particularly in those areas which have been bypassed by economic recovery.

Mr. President, I was Governor of the State of West Virginia for 8 years up until the middle part of this January. I can say, in supporting the various programs in this amendment, that, of all the Federal programs that I and other Appalachian Governors dealt with, there was none that came close, in terms of efficiency, cost effectiveness, and productivity, to the Appalachian Regional Commission.

This amendment restores a certain amount of hope and integrity to some parts of the country that have not recovered, in terms of economic factors, as rapidly as other parts.

On the other hand, the amendment offers hope for development and jobs throughout the country, as well as in Appalachia. I strongly support this amendment. I congratulate the able Senator from Tennessee for his leadership in this matter and would urge my colleagues to support the amendment.

Mr. GORE. Mr. President, I wish to compliment my senior colleague from Tennessee for his outstanding leadership, energy, and determination in bringing this amendment to the Senate.

The PRESIDING OFFICER. The Senator from Tennessee has not been granted any time.

Mr. SASSER. Mr. President, I yield the balance of my time to the Senator from Tennessee.

The PRESIDING OFFICER. The time for the proponents of the resolution has expired.

Mr. CHILES. Mr. President, I yield 1 minute off the resolution to the Senator from Tennessee.

Mr. GORE. Mr. President, I wish to compliment my senior colleague from Tennessee for his determination and energy in bringing this amendment to the Senate. It is clearly needed.

Let me just say in the few seconds that I have that 6 months from now you may see this body falling all over itself to come up with ideas for stimulating the economy in areas that have rising unemployment. Here are programs already in place that are designed to do precisely that. They are working.

Some cuts are involved here, but the main part of the programs are continued. Let us not be so shortsighted as to miss the storm clouds on the horizon. The signs of a growth recession are clearly evident. Many parts of the country already are not participating in the recovery that has been so strong. We ought to keep these programs active and vital. We ought to keep them on the books. We ought to keep them doing the job they were designed to do.

This amendment maintains the Federal Government's commitment to economic and community development while restraining spending in these essential programs below the freeze level in order to realize even greater reductions than the freeze proposals which have gained broad bipartisan support.

In the interests of time, rather than recite the provisions of this amendment which my colleague, the senior Senator from Tennessee, has articulated, I wish to point to some specific examples of the need for a continued commitment to economic and community development in this Nation.

Just yesterday I received a stack of cards from the 70 workers at Spartex Industries in Sparta, TN, a small factory which turned a community development block grant into jobs. The cards read, "I got my job thanks to Federal programs that work * * * Please keep America working." My staff called and talked to the plant manager to let him know about this amendment. He said the workers had organized their own campaign, had the post cards printed down there and passed them out among themselves so they could let their Senators know that at least one Federal program was working.

Mr. President, I have held over 100 open meetings in every county in Tennessee since I was elected to the Senate in November, and I can say without equivocation that the workers at Spartex are the lucky ones. In virtually every country in the State, particularly in the rural counties, I am met by groups of men and women who just lost their jobs at the shoe factory or the textile mill. The economic recovery simply is not reaching many rural, traditionally less developed regions of the country, and there is very real suffering as a result. The economic and community development programs protected by this amendment are vital to helping attract new industry to replace those jobs lost when the shoe factories and textile mills close.

The rural areas of America also have unique housing problems which are addressed by the programs of the Farmers Home Administration. Farmers Home is often simply the only source of mortgage credit in rural counties, and there is, indeed, a need for new, adequate shelter in rural areas. In my home county, I understand that a Farmers Home financed multifamily unit which is being built already has a long waiting list of senior citizens seeking apartments.

The Appalachian region of America, rural and mountainous for the most part, still has particular needs resulting from centuries of isolation and neglect. An example of the unique transportation needs of the region came to light recently. On March 5 of this year, a tunnel on Interstate 40 in North Carolina between Asheville and Knoxville, TN, was blocked by a landslide. As a result, a tremendous flow of traffic was diverted to U.S. highways 23 and 25-70, extremely narrow and winding roads through some of the highest mountains east of the Rockies. While one lane of I-40 is now open, the tunnel is not expected to open fully until December, and travelers are experiencing serious delays and dangerous conditions. Currently, Highway No. 23 is part of corridor B of the Appalachian Regional Commission Highway Program, and if this program were allowed to continue, as it would under this amendment, one day there could be an alternate route across this portion of the Southern Appalachians.

Mr. President, these are but a few of the reasons I am cosponsoring and strongly urge that my colleagues support this amendment.

Mr. DOMENICI addressed the Chair.

The PRESIDING OFFICER. The Senator from New Mexico.

Mr. DOMENICI. As I understand, we have 10 minutes in opposition to the amendment.

The PRESIDING OFFICER. Fifteen minutes.

Mr. DOMENICI. I yield 5 minutes to the Senator from New Hampshire, the chairman of the subcommittee that has jurisdiction over about half of these programs.

Mr. HUMPHREY. Mr. President, I hope that we are going to see some discipline here today. The Budget Committee has recommended terminating at long last the Economic Development Administration, the Appalachian Regional Commission, and the developmental programs of the Tennessee Valley Authority.

With respect to the EDA, that program has not been reauthorized now for several years. Its purpose is to create jobs but it does so very inefficiently and at very great expense.

When the program was first created, 12 percent of the communities in our country qualified. Today, 85 percent of the communities in our country qualify as distressed areas. Can anyone really make the case that 85 percent of our Nation's communities are distressed areas? This shows how this program has grown into nothing but a very large and wide trough in which communities feed at the expense of other communities who do not benefit by the program.

We have to have some discipline. We have to cull out some of these losers. These are among the biggest of the losers. We want to create jobs. We have to cut the deficit. If we want to bring prosperity to those areas which truly are distressed, then we have to bring down interest rates and keep the economy healthy so that jobs can be created. It simply does not work to throw money into these kinds of programs.

With respect to the Tennessee Valley Authority, may I point out to my colleagues that the residents of the States served by the TVA even under the Budget Committee's recommendations will still be receiving subsidy of sorts because the Budget Committee recommendations bear in no way upon the generation of electricity by those facilities—TVA facilities—in those States. In other words, the States in the region are still benefiting by direct and indirect subsidies in the form of rather low-cost electricity rates. That will continue as is. I do not think it is justified, frankly, but that will continue as is even under the Budget Committee recommendation as written.

What the Budget Committee, on the other hand, has proposed is to eliminate the funding not for the electrification programs but instead for the developmental programs. The programs of generating electricity will still remain.

As for the Appalachian Regional Commission, Mr. President, there have been many, many efforts to terminate that program. It was retained in my view largely as a measure of respect for Senator Randolph. But it is time that we terminated that program. Billions of dollars have been poured into the region. We simply cannot afford it. We have to have some discipline. These are programs that can be dispensed with. They are special-interest programs for communities which benefit. There are special-interest programs for States and regions which benefit. We have spent tons and truckloads of money on them. It is time that we wrapped them up. The present existing economic emergency, fiscal emergency, is just the excuse we need. If we have the discipline, finally we should stop pouring money into these troughs at which special interest groups feed.

Mr. GORE. Mr. President, will the Senator yield?

Mr. HUMPHREY. Mr. President, if I have any time remaining I yield it back to the distinghished Budget Committee chairman.

Mr. DOMENICI. Let me say, Senator, we only have a few minutes in opposition. We cannot yield off our time. We will be finished shortly, and perhaps the floor manager on your side can yield time. I am sorry. We are under very severe time restraints.

The PRESIDING OFFICER. (Mr. CHAFEE). Who yields time?

Mr. DOMENICI. Mr. President, I thank the distinguished Senator for his remarks.

How much time does the Senator from New Mexico have?

The PRESIDING OFFICER. Ten minutes.

Mr. DOMENICI. Mr. President, I listened to the debate. I really do not believe anybody can be serious about the Appalachian Regional Commission and EDA. With all respect to everyone here, those programs are long gone. Let me tell you how far gone they are. They have not even been authorized by the U.S. Congress for 3 years. That means that the committee that takes all relevant testimony, goes out into the country, and says do we really need EDA and Appalachian Regional Commission as a broad national program, has not even passed a law saying it exists. The truth of the matter is that without an authorization, the Appropriations Committee put some money in. I could spend my whole time explaining to the Senate why they are irrelevant programs to economic development, but suffice it to say that they never end. They started out applying to a little group. Then Appalachia was a little piece of the country. Now we have out there bits and pieces of a program that really accomplish very little if anything for economic prosperity.

I also suggest to whomever discussed the issue here that we will be putting these programs back in place sometime. I guess they had in mind when we have a big economic turndown we will put them back. I guarantee you if we have a big economic turndown, this kind of program will not be put back. It does not do any good. On the other hand, the very reason we might have a big economic turndown is because this amendment adds $10.4 billion in outlays to the deficit. We have had amendments for $1 billion, we have had them for $2 billion, we have had them for $4 billion, and other than Social Security and pensions this is the big budgetbuster—$10.4 billion in outlays out of the Federal deficit for EDA, and Appalachian Regional Commission. Under this proposal we could not even get a 10-percent cut in the community development block grant—10 percent. This amendment puts it back up to full funding.

Then UDAG, this amendment would not even take the cut in UDAG. This puts it back up to full funding, because the proponents believe that since about 13 cities have received about 95 percent of UDAG, it is a major economic development tool for this country. Half of the country does not get any UDAG. They seem to be making it. I propose that we save $9 billion on rural housing because the Congress directly funds and finances rural housing as if there are no banks around, nor any development companies around. The Congress just decided way back there that Farmers Home would be the banker, the planner, and so we put tax dollars into every rural house under this program—$60,000 a house in taxpayers' money; $9 billion over 3 years, and the proponents of this amendment will not even reform it. They only want to cut it 25 percent.

So make no bones about it. For those who are worried about our country's economic future, unless they think it is totally unrelated to the black cloud of deficit that hangs over, if that is irrelevant, then of course they can vote for this. If you think that black cloud of deficit is relevant, then just ask yourself: Do you support reinstating each one of these programs in these kinds of times? Do you support a positive vote today when we have not had EDA on the books for 3 years. The Appropriations Committee funded it without an authorizing committee even approving it. Cannot we take 10 percent in savings in the Community Development Block Grant Program? It is only 4 years old. Some States are just beginning to use it. Then last but not least, cannot we save over 25 percent on a $9 billion program through Farmers Home for direct total funding at huge, huge below-market interest rates, maybe 8, 9 percent under interest rates for each and every house?

Mr. President, I yield back the balance of my time.

The PRESIDING OFFICER. The question is on the amendment.

Mr. GORE addressed the Chair.

Mr. DOMENICI. I move to table the amendment, and ask for the yeas and nays.

Mr. CHILES. I yield 1 minute to the Senator from Tennessee.

The PRESIDING OFFICER. The Senator from Tennessee has 1 minute.

Mr. GORE. I want to thank the colleague from Florida.

I wanted to make four very brief points in response to some of those that were just made. No. 1, the statement was made that the electricity rates in the TVA region are subsidized by the Federal Government. I want to make it clear that they are not. This question has been studied in depth on numerous occasions. TVA and its ratepayers are paying back year after year after year all of the money that was originally put into TVA as a start-up expense back in the 1930's. There is no subsidy on electric rates in the TVA region.

Second, the statement was made that programs like the Appalachian Regional Commission, UDAG, EDA do not do any good.

I submit to my colleagues that this argument simply will not wash because there is example after example of economic growth that has resulted from these programs.

Third, the point has been made that these programs have not been authorized. Mr. President, if we took that approach, a great deal of the Federal Government would come to a grinding halt this afternoon, if we stopped everything that is not authorized. That is the way this process has been working around here for the last several years.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. DOMENICI. Mr. President, I yield myself 30 seconds.

Mr. President, EPA has done a marvelous job over the past 4 years. It has added $8.4 billion to the Federal deficit by making loans and grants. My best estimate is that 55 percent of them are delinquent today.

I move to lay the amendment on the table and ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from New Mexico to lay the amendment on the table.

The yeas and nays have been ordered. The clerk will call the roll.

The bill clerk called the roll.

Mr. SIMPSON. I announce that the Senator from Maryland [Mr. MATHIAS], is necessarily absent.

I also announce that the Senator from North Carolina [Mr. EAST] and the Senator from California [Mr. WILSON], are absent due to illness.

Mr. CRANSTON. I announce that the Senator from Nebraska [Mr. EXON], is absent because of illness.

The PRESIDING OFFICER. Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 52, nays 44 as follows:

[Rollcall Vote No. 56 Leg.]

YEAS—52

Abdnor	Dole	Humphrey
Andrews	Domenici	Kassebaum
Armstrong	Durenberger	Laxalt
Bentsen	Evans	Lugar
Boren	Garn	Mattingly
Boschwitz	Goldwater	McClure
Bradley	Gorton	Murkowski
Bumpers	Gramm	Nickles
Chafee	Hatch	Nunn
Chiles	Hatfield	Packwood
D'Amato	Hawkins	Pressler
Danforth	Hecht	Proxmire
DeConcini	Heinz	Quayle
Denton	Helms	Roth
Rudman	Symms	Warner
Simpson	Thurmond	Weicker
Stafford	Trible	
Stevens	Wallop	

NAYS—44

Baucus	Harkin	Melcher
Biden	Hart	Metzenbaum
Bingaman	Heflin	Mitchell
Burdick	Hollings	Moynihan
Byrd	Inouye	Pell
Cochran	Johnston	Pryor
Cohen	Kasten	Riegle
Cranston	Kennedy	Rockefeller
Dixon	Kerry	Sarbanes
Dodd	Lautenberg	Sasser
Eagleton	Leahy	Simon
Ford	Levin	Specter
Glenn	Long	Stennis
Gore	Matsunaga	Zorinsky
Grassley	McConnell	

NOT VOTING—4

East	Mathias
Exon	Wilson

So the motion to lay on the table was agreed to.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the motion was agreed to.

Mr. DOMENICI. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DOLE. Mr. President, I think we are demonstrating that many Members would like to get on with this and not tear apart what may be left in any package. This is a very significant vote. So I hope we could move quickly on the remaining amendments.

I understand that we are now ready to take up another package, the so-called KGB package. I wonder if we can get a short time agreement on it.

Mr. CHILES. I think we can agree to 20 minutes to a side.

Mr. DOLE. Mr. President, how much time remains?

The PRESIDING OFFICER. The majority leader has 43 minutes. The minority leader has 3 hours and 17 minutes.

Mr. DOLE. I ask unanimous consent that there be 40 minutes, equally divided, on the KGB amendment.

Mr. BYRD. Mr. President, reserving the right to object—

I remove my reservation.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 80

Mr. GRASSLEY. Mr. President, I send an amendment to the desk.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Iowa [Mr. GRASSLEY] proposes an amendment numbered 80.

Mr. GRASSLEY. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

In lieu of the language, insert the following:

That the Congress hereby determines and declares that the concurrent resolution on the budget for fiscal year 1985 is revised and replaced, the first concurrent resolution on the budget for fiscal year 1986 is established, and the appropriate budgetary levels for fiscal years 1987 and 1988 are set forth.

(a) The following budgetary levels are appropriate for the fiscal years beginning on October 1, 1984, October 1, 1985, October 1, 1986, and October 1, 1987:

(1) The recommended levels of Federal revenues are as follows:

Fiscal year 1985: $736,200,000,000.
Fiscal year 1986: $792,700,000,000.
Fiscal year 1987: $864,300,000,000.
Fiscal year 1988: $952,500,000,000.

and the amounts by which the aggregate levels of Federal revenues should be increased are as follows:

Fiscal year 1985: $0.
Fiscal year 1986: $0.
Fiscal year 1987: $0.
Fiscal year 1988: $0.

and the amounts for Federal Insurance Contributions Act revenues for hospital insurance within the recommended levels of Federal revenues are as follows:

Fiscal year 1985: $44,800,000,000.
Fiscal year 1986: $50,900,000,000.
Fiscal year 1987: $56,100,000,000.
Fiscal year 1988: $61,200,000,000.

and the amounts for Federal Insurance Contributions Act revenues for old-age, survivors, and disability insurance within the recommended levels of Federal revenues are as follows:

Fiscal year 1985: $186,200,000,000.
Fiscal year 1986: $200,400,000,000.
Fiscal year 1987: $216,800,000,000.
Fiscal year 1988: $248,000,000,000.

(2) The appropriate levels of total new budget authority are as follows:

Fiscal year 1985: $1,054,600,000,000.
Fiscal year 1986: $1,080,100,000,000.
Fiscal year 1987: $1,160,900,000,000.
Fiscal year 1988: $1,255,700,000,000.

(3) The appropriate levels of total budget outlays are as follows:

Fiscal year 1985: $949,500,000,000.
Fiscal year 1986: $979,800,000,000.
Fiscal year 1987: $1,041,400,000,000.
Fiscal year 1988: $1,106,900,000,000.

(4) The amounts of the deficits in the budget which are appropriate in the light of economic conditions and all other relevant factors are as follows:

Fiscal year 1985: $213,300,000,000.
Fiscal year 1986: $187,200,000,000.
Fiscal year 1987: $177,100,000,000.
Fiscal year 1988: $154,400,000,000.

(5) The appropriate levels of the public debt are as follows:

Fiscal year 1985: $1,849,700,000,000.
Fiscal year 1986: $2,101,000,000,000.
Fiscal year 1987: $2,354,000,000,000.
Fiscal year 1988: $2,607,400,000,000.

and the amounts by which the statutory limits on such debt should be accordingly increased are as follows:

Fiscal year 1985: $25,900,000,000.
Fiscal year 1986: $251,300,000,000.
Fiscal year 1987: $253,000,000,000.
Fiscal year 1988: $253,400,000,000.

(b) The Congress hereby determines and declares the appropriate levels of budget authority and budget outlays, and the appropriate levels of new direct loan obligations, new primary loan guarantee commitments, and new secondary loan guarantee commitments for fiscal years 1985 through 1988 for each major functional category are:

(1) National Defense (050):

Fiscal year 1985:
(A) New budget authority, $292,600,000,000.
(B) Outlays, $252,000,000,000.
Fiscal year 1986:
(A) New budget authority, $292,500,000,000.
(B) Outlays, $269,700,000,000.
Fiscal year 1987:
(A) New budget authority, $320,800,000,000.
(B) Outlays, $289,200,000,000.
Fiscal year 1988:
(A) New budget authority, $351,700,000,000.
(B) Outlays, $313,300,000,000.

(2) International Affairs (150):

Fiscal year 1985:
(A) New budget authority, $24,200,000,000.
(B) Outlays, $17,800,000,000.
Fiscal year 1986:
(A) New budget authority, $23,500,000,000.
(B) Outlays, $17,800,000,000.
Fiscal year 1987:
(A) New budget authority, $23,000,000,000.
(B) Outlays, $17,900,000,000.
Fiscal year 1988:
(A) New budget authority, $23,500,000,000.
(B) Outlays, $18,000,000,000.

(3) General Science, Space, and Technology (250):

Fiscal year 1985:
(A) New budget authority, $9,100,000,000.
(B) Outlays, $8,700,000,000.
Fiscal year 1986:
(A) New budget authority, $8,800,000,000.
(B) Outlays, $8,700,000,000.
Fiscal year 1987:
(A) New budget authority, $9,000,000,000.
(B) Outlays, $8,800,000,000.
Fiscal year 1988:
(A) New budget authority, $9,300,000,000.
(B) Outlays, $9,000,000,000.

(4) Energy (270):

Fiscal year 1985:
(A) New budget authority, $1,900,000,000.
(B) Outlays, $6,900,000,000.
Fiscal year 1986:
(A) New budget authority, $7,900,000,000.
(B) Outlays, $7,300,000,000.
Fiscal year 1987:
(A) New budget authority, $7,700,000,000.
(B) Outlays, $7,200,000,000.
Fiscal year 1988:
(A) New budget authority, $7,300,000,000.
(B) Outlays, $6,800,000,000.

(5) Natural Resources and Environment (300):

Fiscal year 1985:
(A) New budget authority, $12,600,000,000.
(B) Outlays, $13,000,000,000.
Fiscal year 1986:
(A) New budget authority, $13,000,000,000.
(B) Outlays, $13,000,000,000.
Fiscal year 1987:
(A) New budget authority, $13,300,000,000.
(B) Outlays, $13,000,000,000.
Fiscal year 1988:
(A) New budget authority, $13,600,000,000.
(B) Outlays, $13,200,000,000.

(6) Agriculture (350):

Fiscal year 1985:
(A) New budget authority, $24,800,000,000.
(B) Outlays, $21,000,000,000.
Fiscal year 1986:
(A) New budget authority, $20,400,000,000.
(B) Outlays, $17,700,000,000.
Fiscal year 1987:
(A) New budget authority, $20,800,000,000.
(B) Outlays, $19,800,000,000.
Fiscal year 1988:
(A) New budget authority, $20,900,000,000.
(B) Outlays, $20,200,000,000.

(7) Commerce and Housing Credit (370):

Fiscal year 1985:
(A) New budget authority, $12,600,000,000.
(B) Outlays, $5,600,000,000.
Fiscal year 1986:
(A) New budget authority, $9,700,000,000.
(B) Outlays, $5,200,000,000.
Fiscal year 1987:
(A) New budget authority, $10,300,000,000.
(B) Outlays, $5,800,000,000.
Fiscal year 1988:
(A) New budget authority, $10,700,000,000.
(B) Outlays, $7,700,000,000.

(8) Transportation (400):

Fiscal year 1985:
(A) New budget authority, $29,300,000,000.
(B) Outlays, $26,000,000,000.
Fiscal year 1986:
(A) New budget authority, $29,900,000,000.
(B) Outlays, $28,100,000,000.
Fiscal year 1987:
(A) New budget authority, $30,800,000,000.
(B) Outlays, $29,600,000,000.
Fiscal year 1988:
(A) New budget authority, $31,800,000,000.
(B) Outlays, $30,500,000,000.

(9) Community and Regional Development (450):

Fiscal year 1985:
(A) New budget authority, $8,400,000,000.
(B) Outlays, $8,700,000,000.
Fiscal year 1986:
(A) New budget authority, $8,000,000,000.
(B) Outlays, $8,300,000,000.
Fiscal year 1987:
(A) New budget authority, $8,300,000,000.
(B) Outlays, $8,500,000,000.
Fiscal year 1988:
(A) New budget authority, $9,200,000,000.
(B) Outlays, $8,700,000,000.

(10) Education, Training, Employment, and Social Services (500):

Fiscal year 1985:
(A) New budget authority, $31,600,000,000.
(B) Outlays, $30,300,000,000.
Fiscal year 1986:
(A) New budget authority, $31,300,000,000.
(B) Outlays, $31,000,000,000.
Fiscal year 1987:
(A) New budget authority, $32,400,000,000.
(B) Outlays, $31,500,000,000.
Fiscal year 1988:
(A) New budget authority, $33,300,000,000.
(B) Outlays, $32,300,000,000.

(11) Health (550):

Fiscal year 1985:
(A) New budget authority, $33,600,000,000.
(B) Outlays, $33,500,000,000.
Fiscal year 1986:
(A) New budget authority, $35,900,000,000.
(B) Outlays, $35,700,000,000.
Fiscal year 1987:
(A) New budget authority, $38,600,000,000.
(B) Outlays, $38,200,000,000.
Fiscal year 1988:
(A) New budget authority, $41,400,000,000.
(B) Outlays, $40,900,000,000.

(12) Medical Insurance (570):

Fiscal year 1985:
(A) New budget authority, $71,800,000,000.
(B) Outlays, $65,200,000,000.
Fiscal year 1986:
(A) New budget authority, $81,700,000,000.
(B) Outlays, $69,500,000,000.
Fiscal year 1987:
(A) New budget authority, $90,800,000,000.
(B) Outlays, $76,700,000,000.
Fiscal year 1988:
(A) New budget authority, $94,700,000,000.
(B) Outlays, $86,200,000,000.

(13) Income Security (600):

Fiscal year 1985:
(A) New budget authority, $163,100,000,000.
(B) Outlays, $128,800,000,000.

Fiscal year 1986:
(A) New budget authority, $157,500,000,000.
(B) Outlays, $121,000,000,000.
Fiscal year 1987:
(A) New budget authority, $166,300,000,000.
(B) Outlays, $126,300,000,000.
Fiscal year 1988:
(A) New budget authority, $174,800,000,000.
(B) Outlays, $132,300,000,000.
(14) Social Security (650):
Fiscal year 1985:
(A) New budget authority, $195,500,000,000.
(B) Outlays, $189,300,000,000.
Fiscal year 1986:
(A) New budget authority, $207,400,000,000.
(B) Outlays, $194,900,000,000.
Fiscal year 1987:
(A) New budget authority, $225,500,000,000.
(B) Outlays, $206,100,000,000.
Fiscal year 1988:
(A) New budget authority, $266,100,000,000.
(B) Outlays, $220,400,000,000.
(15) Veterans Benefits and Services (700):
Fiscal year 1985:
(A) New budget authority, $27,200,000,000.
(B) Outlays, $26,300,000,000.
Fiscal year 1986:
(A) New budget authority, $27,000,000,000.
(B) Outlays, $26,500,000,000.
Fiscal year 1987:
(A) New budget authority, $27,300,000,000.
(B) Outlays, $27,000,000,000.
Fiscal year 1988:
(A) New budget authority, $27,800,000,000.
(B) Outlays, $27,600,000,000.
(16) Administration of Justice (750):
Fiscal year 1985:
(A) New budget authority, $6,500,000,000.
(B) Outlays, $6,300,000,000.
Fiscal year 1986:
(A) New budget authority, $6,700,000,000.
(B) Outlays, $6,700,000,000.
Fiscal year 1987:
(A) New budget authority, $6,900,000,000.
(B) Outlays, $6,800,000,000.
Fiscal year 1988:
(A) New budget authority, $7,000,000,000.
(B) Outlays, $7,000,000,000.
(17) General Government (800):
Fiscal year 1985:
(A) New budget authority, $5,700,000,000.
(B) Outlays, $5,800,000,000.
Fiscal year 1986:
(A) New budget authority, $5,900,000,000.
(B) Outlays, $5,800,000,000.
Fiscal year 1987:
(A) New budget authority, $6,000,000,000.
(B) Outlays, $5,800,000,000.
Fiscal year 1988:
(A) New budget authority, $6,200,000,000.
(B) Outlays, $6,100,000,000.
(18) General Purpose Fiscal Assistance (850):
Fiscal year 1985:
(A) New budget authority, $6,400,000,000.
(B) Outlays, $6,400,000,000.
Fiscal year 1986:
(A) New budget authority, $6,500,000,000.
(B) Outlays, $6,500,000,000.
Fiscal year 1987:
(A) New budget authority, $6,800,000,000.
(B) Outlays, $6,700,000,000.
Fiscal year 1988:
(A) New budget authority, $7,100,000,000.
(B) Outlays, $7,000,000,000.
(19) Net Interest (900):
Fiscal year 1985:
(A) New budget authority, $129,700,000,000.
(B) Outlays, $129,700,000,000.
Fiscal year 1986:
(A) New budget authority, $141,300,000,000.
(B) Outlays, $141,300,000,000.
Fiscal year 1987:
(A) New budget authority, $152,400,000,000.
(B) Outlays, $152,400,000,000.
Fiscal year 1988:
(A) New budget authority, $156,800,000,000.
(B) Outlays, $156,800,000,000.
(20) Allowances (920):
Fiscal year 1985:
(A) New budget authority, $300,000,000.
(B) Outlays, $300,000,000.
Fiscal year 1986:
(A) New budget authority, $0.
(B) Outlays, $0.
Fiscal year 1987:
(A) New budget authority, $1,500,000,000.
(B) Outlays, $1,600,000,000.
Fiscal year 1988:
(A) New budget authority, $3,300,000,000.
(B) Outlays, $3,500,000,000.
(21) Undistributed Offsetting Receipts (950):
Fiscal year 1985:
(A) New budget authority, −$32,400,000,000.
(B) Outlays, −$32,400,000,000.
Fiscal year 1986:
(A) New budget authority, −$34,800,000,000.
(B) Outlays, −$34,800,000,000.
Fiscal year 1987:
(A) New budget authority, −$37,600,000,000.
(B) Outlays, −$37,600,000,000.
Fiscal year 1988:
(A) New budget authority, −$40,700,000,000.
(B) Outlays, −$40,700,000,000.

RECONCILIATION

SEC. 2. (a) Not later than June 30, 1985, the committees named in subsections (b) through (e) of this section shall submit their recommendations to the Committees on the Budget of their respective Houses. After receiving those recommendations, the Committees on the Budget shall report to the House and Senate a reconciliation bill or resolution or both carrying out all such recommendations without any substantive revision.

SENATE COMMITTEES

(b) The Senate Committee on Agriculture, Nutrition, and Forestry shall report (1) changes in laws within its jursidiction which provide spending authority as defined in section 401(c)(2)(C) of the Congressional Budget Act of 1974, sufficient to reduce budget authority and outlays, (2) changes in laws within its jurisdiction other than those which provide spending authority as defined in section 401(c)(2)(C) of the Act, sufficient to achieve savings in budget authority and outlays, or (3) any combination thereof, as follows: $430,000,000 in budget authority and $430,000,000 in outlays in fiscal year 1986, $446,000,000 in budget authority and $446,000,000 in outlays in fiscal year 1987, and $462,000,000 in budget authority and $462,000,000 in outlays in fiscal year 1988.

(c) The Senate Committee on Armed Services shall report changes in laws within its jurisdiction which provide spending authority as defined in section 401(c)(2)(C) of the Congressional Budget Act of 1974, sufficient to achieve savings of $0 in budget authority and $539,000,000 in outlays in fiscal year 1986, $0 in budget authority and $742,000,000 in outlays in fiscal year 1987, and $0 in budget authority and $773,000,000 in outlays in fiscal year 1988.

(d) The Senate Committee on Finance shall report (1) changes in laws within its jurisdiction which provide spending authority as defined in section 401(c)(2)(C) of the Congressional Budget Act of 1974, sufficient to reduce budget authority and outlays, (2) changes in laws within its jurisdiction other than those which provide spending authority as defined in section 401(c)(2)(C) of the Act, sufficient to achieve savings in budget authority and outlays, or (3) any combination thereof, as follows: $0 in budget authority and $8,608,000,000 in outlays in fiscal year 1986, $0 in budget authority and $11,758,000,000 in outlays in fiscal year 1987, and $0 in budget authority and $12,306,000,000 in outlays in fiscal year 1988.

(e) The Senate Committee on Governmental Affairs shall report (1) changes in laws within its jurisdiction which provide spending authority as defined in section 401(c)(2)C) of the Congressional Budget Act of 1974, (2) changes in laws within its jurisdiction other than those which provide spending authority as defined in section 401(c)(2)(C) of the Act, or (3) any combination thereof, sufficient to achieve savings in budget authority and outlays as follows: $0 in budget authority and $725,000,000 in outlays in fiscal year 1986, $0 in budget authority and $971,000,000 in outlays in fiscal year 1987, and $0 in budget authority and $992,000,000 in outlays in fiscal year 1988.

(f) The Senate Committee on Veterans' Affairs shall report (1) changes in laws within its jurisdiction which provide spending authority as defined in section 401(c)(2)(C) of the Congressional Budget Act of 1974, sufficient to reduce budget authority and outlays, (2) changes in laws within its jurisdiction other than those which provide spending authority as defined in section 401(c)(2)(C) of the Act, sufficient to achieve savings in budget authority and outlays, or (3) any combination thereof, as follows: $449,000,000 in budget authority and $404,000,000 in outlays in fiscal year 1986, $553,000,000 in budget authority and $552,000,000 in outlays in fiscal year 1987, and $575,000,000 in budget authority and $573,000,000 in outlays in fiscal year 1988.

HOUSE COMMITTEES

(g) The House Committee on Agriculture shall report (1) changes in laws within its jurisdiction which provide spending authority as defined in section 401(c)(2)(C) of the Congressional Budget Act of 1974, sufficient to reduce budget authority and outlays, (2) changes in laws within its jurisdiction other than those which provide spending authority as defined in section 401(c)(2)(C) of the Act, sufficient to achieve savings in budget authority and outlays, or (3) any combination thereof, as follows: $430,000,000 in budget authority and $430,000,000 in outlays in fiscal year 1986, $446,000,000 in budget authority and $446,000,000 in outlays in fiscal year 1987, and $462,000,000 in budget authority and $462,000,000 in outlays in fiscal year 1988.

(h) The House Committee on Armed Services shall report changes in laws within its jurisdiction which provide spending authority as defined in section 401(c)(2)(C) of the Congressional Budget Act of 1974, sufficient to achieve savings of $0 in budget authority and $539,000,000 in outlays in fiscal year

1986, $0 in budget authority and $742,000,000 in outlays in fiscal year 1987, and $0 in budget authority and $773,000,000 in outlays in fiscal year 1988.

(i) The House Committee on Energy and Commerce shall report (1) changes in laws within its jurisdiction which provide spending authority as defined in section 401(c)(2)(C) of the Congressional Budget Act of 1974, sufficient to reduce budget authority and outlays, (2) changes in laws within its jurisdiction other than those which provide spending authority as defined in section 401(c)(2)(C) of the Act, sufficient to achieve savings in budget authority and outlays, or (3) any combination thereof, as follows: $0 in budget authority and $2,355,000,000 in outlays in fiscal year 1986, $0 in budget authority and $3,190,000,000 in outlays in fiscal year 1987, and $0 in budget authority and $3,620,000,000 in outlays in fiscal year 1988.

(j) The House Committee on Post Office and Civil Service shall report (1) changes in laws within its jurisdiction which provide spending authority as defined in section 401(c)(2)(C) of the Congressional Budget Act of 1974, (2) changes in laws within its jurisdiction other than those which provide spending authority as defined in section 401(c)(2)(C) of the Act, or (3) any combination thereof, sufficient to achieve savings in budget authority and outlays as follows: $0 in budget authority and $725,000,000 in outlays in fiscal year 1986, $0 in budget authority and $971,000,000 in outlays in fiscal year 1987, and $0 in budget authority and $992,000,000 in outlays in fiscal year 1988.

(k) The House Committee on Veterans' Affairs shall report (1) changes in laws within its jurisdiction which provide spending authority as defined in section 401(c)(2)(C) of the Congressional Budget Act of 1974, sufficient to reduce budget and outlays, (2) changes in laws within its jurisdiction other than those which provide spending authority as defined in section 401(c)(2)(C) of the Act, sufficient to achieve savings in budget authority and outlays, or (3) any combination thereof, as follows: $449,000,000 in budget authority and $404,000,000 in outlays in fiscal year 1986, $553,000,000 in budget authority and $552,000,000 in outlays in fiscal year 1987, and $575,000,000 in budget authority and $573,000,000 in outlays in fiscal year 1988.

(l) The House Committee on Ways and Means shall report (1) changes in laws within its jurisdiction which provide spending authority as defined in section 401(c)(2)(C) of the Congressional Budget Act of 1974, sufficient to reduce budget authority and outlays, (2) changes in laws within its jurisdiction other than those which provide spending authority as defined in section 401(c)(2)(C) of the Act, sufficient to achieve savings in budget authority and outlays, or (3) any combination thereof, as follows: $0 in budget authority and $8,608,000,000 in outlays in fiscal year 1986, $0 in budget authority and $11,758,000,000 in outlays in fiscal year 1987, and $0 in budget authority and $12,306,000,000 in outlays in fiscal year 1988.

APPROPRIATIONS

SEC. 3. (a) It shall not be in order to consider any measure making appropriations in the Senate or House of Representatives, if the enactment of such bill or resolution, as recommended by the respective Committee on Appropriations, would cause the aggregate total budget authority for function 050, National Defense, to exceed $293,300,000,000 in fiscal year 1986; aggregate total budget authority to exceed $321,500,000,000 in fiscal year 1987; and aggregate total budget authority to exceed $352,500,000,000 in fiscal year 1988.

(b) It shall not be in order to consider any measure making appropriations in the Senate or House of Representatives, if the enactment of such bill or resolution, as recommended by the respective Committee on Appropriations, would cause the aggregate total budget authority for nondefense discretionary activities to exceed $152,000,000,000 in fiscal year 1986; aggregate total budget authority to exceed $159,100,000,000 in fiscal year 1987; and aggregate budget authority to exceed $167,200,000,000 in fiscal year 1988.

(c) The provisions of subsection (a) or (b) of this section may be waived or suspended in the Senate by a majority vote of the Members voting, a quorum being present, or by unanimous consent of the Senate.

MISCELLANEOUS PROVISIONS

SEC. 4. If the Congress has not completed action by October 1, 1985, on the concurrent resolution on the budget required to be reported under section 310(a) of the Congressional Budget Act of 1974 for fiscal year 1986, then, for purposes of section 311 of such Act, this concurrent resolution shall be deemed to be the concurrent resolution required to be reported under section 310 of such Act.

SEC. 5. It shall not be order in the House of Representatives or the Seante during fiscal years 1986 and 1987 to consider any bill, resolution, or amendment, except proposed legislation reported in response to reconciliation instructions contained in this resolution, authorizing new direct loan obligations or new loan guarantee commitments unless that bill, resolution, or amendment also provides that the authority to make or guarantee such loans shall be effective only to such extent and in such amounts as are contained in appropriation acts.

SEC. 6. It is the sense of the Congress that the previous distinction between "unified budget" and "off-budget" spending be ended, and that budget authority and outlays for the so-called "off-budget" agencies be included in the budget totals.

SEC. 7. (a) The Senate finds that—

(1) the existing tax structure of the United States distorts economic activity, leading to an inefficient use of national resources and a weakening of our domestic economic vitality and competitive posture in international markets;

(2) the relative tax burdens among various taxpayer categories are manifestly unfair insofar as they arise from differences in the capabilities of taxpayers to take advantage of complicated tax laws;

(3) the ability of the Federal Government to plan and conduct rational fiscal policy is frustrated by elaborate schemes to avoid taxation and the unintended effects of tax incentives and penalties;

(4) progressive erosion of voluntary compliance threatens the fiscal integrity of our public finances and the confidence of our citizens in the Federal Government's capacity to govern; and

(5) a number of plans, each designed to simplify and reform the Tax Code, have been before the Congress for a time sufficient to allow for extensive analysis and evaluation.

(b) It is therefore the sense of the Senate that tax reform should be adopted as soon as possible, and that it should incorporate the following principles and objectives:

(1) efficiency and responsiveness to market conditions in the economic activities of American businesses and consumers;

(2) simplicity of structure and lower marginal tax rates;

(3) a fair and equitable distribution of the tax burden among all taxpayers, with relief for those below the poverty level, and incentives to bring them into the work force;

(4) a broader tax base, with deductions essential to avoid genuine hardship or to protect the economic security of the American people; and

(5) increased incentives for work, saving, and investment.

SEC. 8. It is the sense of the Senate that because the Senate requires timely reporting of legislative action on spending bills, and because the Senate requires continual control over the budget, the Director of the Congressional Budget Office shall issue a weekly report during periods when the Senate is in session detailing and tabulating the progress of congressional action on bills and resolutions providing new budget authority and changing revenues and the public debt for a fiscal year, including, but not limited to the requirements set forth in Public Law 93-344, section 308(b).

Mr. GRASSLEY. Mr. President, I yield myself 6 minutes; and if I come to the end of that, 1 more minute, and at the end of that I will yield the floor to my colleagues who are helping.

Mr. President, we are about to wheel the Federal budget into the operating room for surgery. It is one of the few times in recent memory when surgery would not be preceded by diagnosis.

Our would-be surgeons of the budget are armed with a handsaw and a cleaver. It reminds me of a Marx Brothers' movie: chasing a howling patient around the room, meat cleaver drawn and cocked, ready for assault.

This year's Rose Garden II was at the opposite extreme from last year's. Last year's Rose Garden budget waved a weak wrist at the deficit problem. Total spending reductions were only $16 billion.

This year's Rose Garden II was a search and destroy mission; for all, that is, but defense, and we moderated that a little with an amendment I offered which was adopted last week. The Senate has now countered that mission by voting, amendment by amendment, to raise that compromise, in most instances, to a freeze in 1986 at the 1985 level.

Constituencies became polarized because of the approach taken in this budget compromise. The imbalance of the plan was clearly visible: 7 percent growth for defense, only 2 percent growth for Social Security, and outright elimination of many domestic programs.

It is not an exaggeration to claim that fairness and equity were not salient traits of the compromise budget.

I suppose there are different ways, intellectually, to go about long-term budget control.

However, the approach taken by those who crafted the Rose Garden

budgets, as well intentioned as that might have been, is not the way to go about doing things.

Clearly, we have discovered this these last 2 weeks. If the original package had been more equitable from the start, the opportunity for substantial savings would still be with us.

The pendulum approach to budgeting we have seen the last 2 years, which swings from lenient to austere, is counterproductive to the stated goal of budget control. Instead of producting deficit reduction, it produces confusion, polarization and inaction.

The record on deficits in recent years bears this out. The only prescription for long-term deficit control is to first build a consensus for agreement, and then reestablish and execute policy accordingly.

Consensus cannot be found without the perception of fairness as a point of departure. The compromise budget never contained that quality. That is why it has fallen apart to some extent. If we had attempted to build a plan from the original budget resolution, we would have done much better.

It is not true, as some have argued, that long-term control of the budget depends on eliminations of many programs. Long-term control depends on our ability to plan competently over time, especially in any current year; and it depends on our ability to forge a consensus, without which our efforts are doomed to fail.

If we had frozen the Federal budget 2 years ago, as I had then proposed, and again last year, as I proposed, and as we voted on the floor of the Senate, the fiscal year 1986 baseline deficit would be only $108 billion instead of $227 billion.

We could have established the moral authority for deficit reduction last year and the analytical authority for further reduction this year and in the future.

Instead. we have lost much ground. Last year, we ignored the problem, and this year, to compensate, we are taking wild swings at a now critically ill patient.

I will not take a back seat to anyone on both desire and action to reduce Federal deficits and spending. I have done them with consistency. I have proposed an across-the-board budget freeze for each of the last 3 years, and we are now doing it in this document.

But equally important as the bottom-line savings is the manner in which those savings are assumed. If $50 billion, or $60 billion or even $70 billion are shown as savings on paper, they are still only paper savings until we crack the code on how to get that much savings through Congress.

And I submit to you, Mr. President, that the only way to get any substantial budget-savings package through Congress—that the only way to crack the code—is to create an environment of shared sacrifice, not a campaign of survival of the fittest.

Mr. President, as leaders of the Senate, we of the majority party are approaching this long-term deficit problem the wrong way.

The objective may be noble, but the means, and therefore our ability to accomplish the objective must be questioned.

Fairness and self-sacrifice are the only true means by which leadership can be established and progress begun. Further progress would depend on systematic and reasoned analysis of the entire Federal budget.

I hope the Senate has learned a valuable lesson this year: that the perception of shared sacrifice is a necessary condition for change, and that is applicable to the budget as well as many other things.

I offer now, with my colleagues Senator KASSEBAUM, Senator BIDEN, and Senator BAUCUS, the fairest possible budget for fiscal year 1986. It is a 1-year, across-the-board budget freeze. It would freeze all discretionary budget authority, including defense. It would freeze all pay, all benefits, all COLA's and all reimbursements. And it would freeze farm price supports as well, just in case any of you are in doubt because I am from an agriculture State.

This plan would save over $40 billion in fiscal year 1986. It is the same plan we offered last year and which we should have passed last year. It is the plan which the Senate has agreed to so far this year, amendment by amendment.

I am truly fearful that unless an across-the-board freeze is established as a first step in the process, progress to reduce future deficits will be greatly impaired.

I hope the Senate will adopt this across-the-board freeze this year so we can move on at once to the more critical area of long-term budget control of the Federal budget.

I see my colleague from Delaware who has been so helpful on this, and I yield 5 minutes to him.

Mr. BIDEN. That will be plenty.

The PRESIDING OFFICER. The Senator from Delaware.

Mr. BIDEN. Mr. President, I urge my colleagues to support a 1-year budget freeze as an alternative to the Republican leadership budget proposal. Because the President/leadership budget proposal that is before us now—either in its original or in its presently amended form—is not the best choice. And I doubt that it can be satisfactorily amended in piecemeal fashion here on the floor.

The best choice, in my view, is a real budget freeze that stops the growth of Federal spending and stops the growth of deficits. It is my hope that the Senate can unite around the only bipartisan budget proposal that will be offered—the 1-year budget freeze sponsored by Senators GRASSLEY, KASSEBAUM, BAUCUS, and myself.

Ever since our deficit problem was created in 1981, Congress has sought to tame the deficits by reshaping Federal policies and priorities. The result has been damage to our economy, to our international trade position, and to many individuals who relied on stable Federal policies. In terms of deficit reduction, our policies over the past 4 years can only be termed a disaster.

Let us look at the results of those policies for a minute.

In each year since 1981, the Senate, and the Congress, have acted to try to reduce deficits. However, a review of the results of those actions is not encouraging. Deficits have risen steadily—or perhaps dramatically would be a more descriptive word.

In the first budget resolution for fiscal year 1982 the deficit was estimated to be $37.7 billion. As it turned out, the actual deficit that year was $110.6 billion.

For the fiscal year ending September 30, 1983 the budget estimated a deficit of $103.9 billion, yet the actual deficit at year end was $195.4 billion.

For the next fiscal year, 1984, the budget assumed a deficit of $160 billion but the final deficit was $175.4 billion, somewhat better than the previous 2 years.

The current fiscal year is not finished, of course. But the results of the fabled Rose Garden plan appear to leave much to be desired. When the fiscal year 1985 budget was prepared, the deficit was estimated to be $181.2 billion. The Senate Budget Committee has now reestimated that to $212.9 billion.

In the light of those dismaying results, this year the Senate should adopt a simple, enforceable budget program that will halt the upward climb of deficits. If we can do that it will be more than has been accomplished in deficit reduction over the last 4 years.

The right way to do that is a 1-year budget freeze such as the one I am offering with my colleagues, Senators GRASSLEY, KASSEBAUM, and BAUCUS. Why is a budget freeze the right way? There are at least five good reasons.

First, freezing fiscal year 1986 programs at fiscal year 1985 levels will also freeze deficits. In fiscal year 1986 the deficit will be $187.1 billion, a healthy reduction below the estimated fiscal year 1985 level of $212.9 billion. And with just a 1-year freeze deficits will continue to decline to $154.4 billion by fiscal year 1988.

Second, this desirable result is relatively easy to accomplish. It can be done quickly. All it takes is a simple bill. By comparison, the complexities of the reconciliation process required

under the pending measure are staggering. It will require months. This freeze can be put in place in weeks. Our economy and our financial markets need the certainty of an adopted budget program rather than the mere promise of one.

Third, a budget freeze is an understandable solution to our budget dilemma, one that everyone can understand and support. There is no need to evaluate every Federal program in an effort to decide which ones go and which ones stay. They are all frozen.

Fourth, a budget freeze is fair. It treats every program alike. And it treats all beneficiaries alike. There are no cost-of-living adjustments—none for defense and none for other programs. No programs are terminated either. There are no permanent policy changes, but the reduced deficits extend far beyond the 1 year of the freeze.

And finally, the budget freeze allows time to review carefully our budget priorities. In the committees of the Senate and the House we can examine each program. We can weigh their merits and demerits. We can sunset those whose accomplishments are not worth the price. We can keep those which provide basic, necessary services. We can develop a budget plan which, though painful, will have broad acceptance.

All of these are sound reasons for adopting a budget freeze rather than the proposal that is now before us. In particular, I am concerned that it is proposed that we shape and adopt a plan, here on the Senate floor, that will determine the scope and content of Federal activities for years to come.

The plan that is before us, Mr. President, is not a carefully thought out document. It is not the result of deliberation by all of the committees of the Senate. It is not even the result of a mark up by the Budget Committee. It is a plan that was put together in secret negotiations not open to many of us. It will be tested and trimmed here on the floor in just a few days without benefit of the expertise of our colleagues working in committee.

In that connection, let me pose a few rhetorical questions to my colleagues.

Is it the recommendation of the Finance Committee that we begin a new policy of reducing cost-of-living allowances for Social Security by 2 percentage points? What will be the effects of this on the recipients? How many people will be pushed below the poverty line if we take this action? How does this policy affect the financial condition of the Social Security fund over the years? Is this to be a permanent policy? And how will this policy affect others who will be impacted by it—primarily Federal retirees and veterans?

Have the appropriate committees recommended the termination of the 20 or so programs that will disappear under this plan? Does the Small Business Committee recommend terminating SBA? And what will the effects on small business be? Does the Senate Banking Committee recommend the termination of UDAG? What will be the effect on cities' economic base if this program is eliminated? Or does the Banking Committee recommend an end to mass transit subsidies? And what will that do to the economic fabric of our cities, to say nothing of the riders who depend upon mass transit? Does the Finance Committee recommend the end of Federal revenue sharing? What will be the effects on local property tax rates and on local services of such a move?

These and many other questions apparently are to go unanswered if we adopt the President's proposal. Yet these are important questions. They will affect the direction of our Nation for decades. I know it will be said that the final legislation will be written in and reported by those committees to which I have referred. But they will be doing it on the instruction of the Senate. The legislation reported will not necessarily reflect the considered judgment of those committees. It will reflect the reality that the Senate has ordered the committees to make the cuts. I guarantee there will be little talk about the desirability of the program changes or the impacts upon the economy or on people.

Mr. President, this is the wrong way to make our budget priority decisions—and we all know it. Let's freeze Federal spending, and let's freeze the deficits, and then make considered judgments as to what should be done next.

In addition, Mr. President, my support for a freeze is based on the difficulty that will be encountered in passing the President's latest deficit reduction plan. Passing it requires invoking the arcane procedures of reconciliation after both Houses have passed a budget. That will take time, months and months of it.

Perhaps more important, the highly controversial nature of the proposals assures that much time will be needed to carry out the budget reduction plan, if, indeed, it can ever be put in place.

Because, Mr. President, each of us has reasons for not wanting the proposal to be adopted in its present form.

There is controversy about the defense budget which is virtually the only item in the budget—other than our $140 billion in interest payments, of course—that is allowed to grow. Do we really intend to give Social Security recipients a COLA minus 2 percent, but give defense a COLA plus 3 percent, as provided in the original plan?

There is controversy about the proposal to change our present policies regarding cost-of-living increases that have served millions of Americans so well. Do we really want to start a new system that would give an adjustment for inflation that is smaller than the growth in inflation? That is where this budget proposal is leading us. Does anyone really believe that the leadership has given up on that proposal just because it was defeated once here on the floor?

There is controversy about proposals to raise taxes. While the President says he will not raise taxes, his user fees are nothing but tax increases in disguise. We all remember that the term revenue enhancement was invented by this administration to disguise a tax increase. Now they are using the term user fee for the same purpose.

There is controversy in the proposal to terminate 20 Federal programs and to prune severely many others. These are decisions that have serious economic and social impacts in each State. I know that in Delaware the proposal to terminate revenue sharing and force up property tax rates is a very serious matter. I know that the idea of terminating passenger rail service, which is a mainstay of the Delaware economy, is a matter of great concern. I am sure that each of my colleagues has similar issues in his or her State that are equally controversial.

These are not matters that can be settled quickly—nor should they be. Our decisions will affect the growth and prosperity of America for the rest of this century. They will change the lives of all our citizens.

What we need is a budget that can be put in place quickly. Prompt action is what is needed to restore the confidence of the financial markets; to help interest rates to ease even more; to begin gradually to restore balance among currencies; and to begin the long task of reducing our trade deficit. These are all things that should not wait. We need to move quickly and decisively.

We can do that with a budget freeze. A freeze will provide a quick signal to the country that Congress is acting on the deficit issue. Yet we will not risk hasty program decisions.

The so-called leadership plan has been amended significantly here on the floor. While the changes may have made it marginally better, it is still a most unsatisfactory proposal.

What is more important, none of us knows what the leadership will offer next. It could literally be almost anything. And then there will be no choice. I urge all my colleagues to make their choice now and adopt the 1-year budget freeze that is before us now.

Mr. President, I will be somewhat more blunt than my colleague from

Iowa. Let us take a look at where we are now. We all have a perfect plan. I thought that the Hollings-Chiles plan, which would have brought us to a balanced budget in 1990, was the best thing we could do. I believe there are things we could do to the freeze to make it a better package. Had I a magic wand and I could wave it, I would do a number of things beyond this freeze.

But the fact of the matter is after 12 years, going on 13 years in this place, I understand gridlock when I see it, and the fact of the matter is the same rationale applies this year as applied last year when Senators KASSEBAUM, GRASSLEY, BAUCUS, PRYOR, and others offered this proposal, and that is we all had a better idea. Senator KASSEBAUM might like some programs to go up, as would I, at the rate of inflation. You might like defense to go up at the rate of inflation. I would like not to freeze COLA's.

There are a lot of ways we could fix this. But the fact of the matter is if we keep going the way we are, we are going to end up here with a partisan result that will not fly and become law. BOB DOLE, our leader, may get 50 votes for Dole II. But where does it go? Where does Dole II go? We are going to end up with a second concurrent resolution because we will not have a first concurrent resolution; we are going to end up down the line in the same spot we are now.

This is not the best answer in a pure sense. But it is the single best political answer in a nonpartisan sense. It does what we should be doing here, solving problems and not creating problems. This begins the process of solving problems. It only gets us deficit reduction of about $40 billion, which is not as high as the leadership package says it gets. It is not as high as CHILES says it gets. It is not as high, and so on. But it is the only realistic thing. Everyone can live with this and those of you who may be slightly more timid souls than some of us, and that is a self-serving comment, fear not; you can in fact vote for this and not worry about retribution from your community. The American people are fair. They are fair, and if they are all in the barrel, they will all get in. What they do not like is the selective placement in the barrel that is going on here.

How can we justify emasculating mass transit or agriculture or day care centers, whatever we do, and move through with massive tax cuts, corporations not paying taxes, and so on? How do you do that?

There are three problems we face here, and it must be obvious to all of us, as the chairman of the Budget Committee knows well.

One is we are split as a body on Social Security COLA's; two, we are split as a body on defense; and, three, we are split as a body on revenues.

Ultimately there may be able to be enough whips cracked and arms broken on the other side, as I hope any good majority would be able to do, to produce a product, and we will walk out of here for 5 minutes and say, "Well, the Senate did something."

I am willing to bet anyone in here whatever the Senate does on this will not in fact be the ultimate product that in fact comes about as national policy.

So why do we not get about the business of stopping this phenomenal erosion in our economic and financial security as a nation and take the next year to have a year-long debate about what the priorities should and should not be? And they must include something more than a single-year freeze.

But if one more of my colleagues tells me, as they told me the last 2 years, "BIDEN, yours is only 1 year and we have 3 years," when have we ever met the target that we set on anything we have passed for the second or third or fourth or fifth year out? Why do we not stop kidding one another?

And I would respectfully suggest that my time is up.

The PRESIDING OFFICER. The Senator's surmise is right.

Mr. GRASSLEY. I yield 3 minutes to the Senator from Montana.

The PRESIDING OFFICER. The Senator from Montana is recognized for 3 minutes.

Mr. BAUCUS. Mr. President, what has concerned me the last couple of weeks as we have debated the budget is that most of the discussion on the floor of the Senate, most of the discussion in caucuses, and most of the discussion in private conversations, has not seen the forest for the trees. Almost all of the discussion has been: what are we going to trade off, what against what? Social Security against defense? Amtrak against rural housing? What is it going to be? What is the politics? Who is going to win, what political party? Everybody has a hidden, or not so hidden, separate agenda; motives are mixed.

Very little of the discussion has been about the core of the problem namely, gigantic budget deficits which essentially are borrowed time—we are living on borrowed time in this country—and which are a main cause of our equally abysmal trade deficits.

Almost everyone agrees that unless this country gets its house in order, unless we very significantly reduce the Federal budget deficit, unless we very significantly reduce the trade deficit, the price we are going to have to pay to put it all back together again—next year, or the second or third year after—will be far more costly than the price we should pay today to get the Federal budget deficit down. Our trade deficit is due in large part to the overvalued dollar which in turn is tied to the Federal budget deficit.

Today I just want to focus on one feature of the amendment before us. The amendment has many terrific features, including its across-the-board nature. Every group is treated evenly, every group is treated the same way. The freeze brings us all together.

However, the point I really want to emphasize in the short time I have now is that this is a bipartisan approach.

When Senator KASSEBAUM and Senator GRASSLEY first began to think about this, they thought, "Well, let's make it truly bipartisan, let's get an equal number of Democrats and Republicans on this proposal."

They talked to Senator BIDEN and to me: two Republicans, two Democrats. They made this proposal truly bipartisan.

Then we looked to try to add other cosponsors, again on a bipartisan basis, one from one party, one from the other.

Why did we do that? We did that because we recognized and we fervently believed—and we still feel that we have a tremendous problem on our hands. If we are going to solve that problem we have to do it, Republicans and Democrats together.

We are not going to be able to reduce the budget deficit; we are not going to be able to reduce the trade deficit; we are not going to be able to do the things America has to do to begin to compete in the world internationlly—and restore our faith in the future—unless we come together as a country. That means both parties must come together.

That is one reason why we worked to keep this bipartisan. It is also why we chose a truly across-the-board approach—no sacred cows, everybody in this together. Mr. President, no proposal is perfect, But this proposal unites us instead of dividing us. I urge its adoption.

Mr. GRASSLEY. Mr. President, I yield 1 minute to the Senator from Illinois.

The PRESIDING OFFICER. The Senator from Illinois has 1 minute.

Mr. DIXON. Mr. President, because of the limited time, let me read quickly from a USA Today editorial entitled "Freeze Every Dime of Federal Spending." It reads as follows:

> This new budget was a good try, for it showed President Reagan is willing to horse-trade, even on defense. But this compromise should be scrapped.
>
> It should not pass because it is unfair. It would give the Pentagon, awash in reports of waste and profiteering, an increase. But it would force middle-income people, senior citizens, collegians and farmers to make sacrifices.
>
> Instead, the President and Congress must follow the hard but fair course. They must adopt an across-the-board freeze on every dime of federal spending, including defense.

A freeze would break the spend-spend-spend cycle and put a $62 billion dent in the deficit.

A freeze would squeeze everyone, from senior citizens to defense contractors. But, as USA Today has editorialized for months, it would be fair: It's easier to sacrifice if everyone does his part.

Mr. President, I ask unanimous consent that the editorial in support of fairness and equity be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOMENICI. Mr. President, I object. Did the Senator get agreement on that? I think the editorial is unfair, but other than that I do not object.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

FREEZE EVERY DIME OF FEDERAL SPENDING

Suppose you were banking at one of those automated teller windows and a computer glitch allowed you to withdraw more money than was in your account.

Maybe you'd be cautious at first, taking only enough unearned dollars for a bag of groceries or a new coat. Still, the lure would be irresistible to withdraw more and more.

You wouldn't get away with it for long, of course. But the federal government has been getting away with it for years. As President Reagan said last week, the feds have been spending money as if they had a "magic money machine."

Now we are close to $2 trillion in debt. Interest on that debt alone is projected to be $155 billion this year. And what are we doing to pay it off? Absolutely nothing. It's been years since we lived within our means. In 1986, we plan to spend $227 billion more than we take in.

On Tuesday, the Senate is scheduled to vote on a compromise budget, supported by President Reagan, to reduce that $227 billion deficit by $52 billion.

It is not an easy budget to swallow.

While allowing defense spending to grow by 7 percent—3 percent above inflation—it would eliminate 17 federal programs, including the Job Corps, the Small Business Administration and Amtrak. It would cut Medicare, student aid and farm-price supports. And Social Security's cost-of-living hike would be cut roughly in half, to 2 percent.

Despite the president's dramatic televised plea for voters to embrace this budget, Senate Republicans couldn't muster the votes for it last week.

This new budget was a good try, for it showed President Reagan is willing to horse-trade, even on defense. But this compromise should be scrapped.

It should not pass because it is unfair. It would give the Pentagon, awash in reports of waste and profiteering, an increase. But it would force middle-income people, senior citizens, collegians and farmers to make sacrifices.

Instead, the president and Congress must follow the hard but fair course. They must adopt an across-the-board freeze on every dime of federal spending, including defense.

A freeze would break the spend-spend-spend cycle and put a $62 billion dent in the deficit.

A freeze would squeeze everyone, from senior citizens to defense contractors. But, as USA TODAY has editorialized for months, it would be fair: It's easier to sacrifice if everyone does his part.

If a family unwisely borrowed too much and was forced by law to pay its bills, it could start by freezing everyone's allowance so more income could go to the creditors.

Now the federal government must do the same. It must freeze its spending and start living within its means. This nation must finally learn what every family already knows: There is no "magic money machine."

Mr. GRASSLEY. Mr. President, I yield the balance of the time to the Senator from Kansas.

The PRESIDING OFFICER. The Senator from Kansas has the balance of the time available.

Mrs. KASSEBAUM. Mr. President, we have now consumed almost 50 hours on this resolution. Despite the eloquence of those who have spoken about the need for deficit reduction, we are no closer to that goal now than we were 50 hours ago.

We are at an impasse. The reason for that impasse is obvious. We all want deficit reduction—that's the good news. The bad news is that we all want to do it our own way.

Every Member of this body could write a budget plan that reduces deficits. Some days it appears that every Member has. Unfortunately, no Member of this body has been able to produce a budget that can achieve consensus support

Mr. President, all of the packages represent an honest attempt to meet the challenge of deficit reduction. A challenge—I might add—that is greatly complicated by an ever-present undercurrent of partisan politics.

Two hundred billion dollar deficits are formidable enough obstacles to overcome in the best of circumstances. But, when one has to attempt to reduce them while fending off partisan rhetoric about tax increases, defense cuts, and Social Security breaches of faith, the task becomes impossible. Personally, I would just as soon not raise taxes, delay COLA's, or freeze defense. But, to get deficits under control, I am willing to do all three. Over the past 2 weeks I have voted to do all three.

I have voted for major budget proposals offered by both parties. I supported the White House-Republican leadership plan. I supported the Chiles-Hollings plan. I have voted for plans containing taxes and for plans with no taxes. I have voted for COLA freezes and 2 percent COLA guarantees. I voted for the Hollings plan in committee, and I voted for the Domenici plan that the Budget Committee sent to the floor.

Mr. President, contrary to all appearances, I am not confused. In fact, my thinking on the subject of deficits is quite clear. I know they must be reduced, and I realize the chances of that happening from a partisan plan are remote. That is why I am cosponsoring the pending amendment.

The KGB freeze, as it has come to be known, suffers from a number of problems—partisanship, however, is not one. KGB is opposed by everybody who is anybody in either party. The Republican leadership opposes it. The Democratic leadership opposes it. The President opposes it. Howard Baker didn't like it, and Vice President Bush has been ready for 2 years to vote against it. Any plan that can generate that much bipartisan agreement can't be all bad.

Mr. President, we have tried a number of approaches thus far in this debate and failed. We are not going to reach $52 billion in deficit reduction.

KGB will not save $52 billion. I will be the first to admit that. This plan will not achieve the level of savings found in the Dole-Domenici plan, the Byrd plan, or the Chiles-Hollings plan. I submit, however, that since none of those plans are going to pass, that attacking KGB for inadequate savings is a rather weak charge. Inadequate as compared to what?

The plan that the Senators from Montana, Delaware, Iowa, and I are offering does two things. It provides a basic framework for holding spending in check while we deliberate over structural spending reforms—and it saves $40 billion while so doing.

If we had adopted the KGB freeze last year, the current deficit would be lower than the one we are trying to achieve for 1986. If we do not adopt it this year, we will have again missed a golden opportunity to take the logical first step toward structural spending reform.

There is not much that we need to add to this debate that has not been made here a year ago, except we are that much further in debt. Certainly what I think is enormously important is to find the best deficit reduction package that is the most equitable and that has bipartisan support. I think it is crucial for a final resolution of the problem that we all acknowledge that we have.

We have almost used up 50 hours of debate. We have gone through a number of different packages, all of which, on the whole, I have supported. And I certainly believe that it is not just a lack of confusion, Mr. President.

I would also say that what I believe is absolutely essential is a bipartisan approach and one that is equitable. I think that is accomplished with the 1-year budget freeze, which does say that if we are not able to accomplish the structural reforms this year, which we have not been able to do, then we are putting everyone on notice that indeed that is coming. There are, as the Senator from Delaware [Mr. BIDEN] has said, a number of different approaches we could have taken but it seemed best at this point to offer the simplest and most equitable one across the board. And I would urge serious consideration of this first

step which I think is an important one.

The PRESIDING OFFICER. Who yields time?

Mr. DOMENICI. Mr. President, how much time do I have remaining in opposition?

The PRESIDING OFFICER. The Senator has 20 minutes remaining.

Mr. DOMENICI. Mr. President, I will make a few remarks, then I am going to yield to the chairman of the committee shortly.

I understand the Senator from Idaho has a question.

Mr. SYMMS. Mr. President, I just wanted to ask the chairman a brief question.

Mr. DOMENICI. This is off my time.

Mr. SYMMS. The Senator knows this budget thing inside out, but it appears to me that this so-called fairness really does not get rid of anything. We still have all of the programs left in place, is that not correct?

Mr. DOMENICI. The Senator is correct.

Mr. SYMMS. So there is nothing actually done away with? We just go on and expand the welfare rolls and reduce the defense and say that you have frozen the budget.

Mr. DOMENICI. The Senator is correct.

Mr. President, I yield myself 3 minutes. Let me first compliment those who have worked not only this year but for a couple of years in an effort to put this freeze package together. I know that many of you have even been judging your concept of what is fair against this and it has been very difficult from time to time for you to look at other proposals because obviously you assume that it is extremely fair going in.

I would just like to make a few points. After complimenting you, I hope you do not win. First of all, let me just say for those who have voted on defense issues, this is a serious, serious vote. We are in the final throes of finishing up the budget. I do not suggest that anybody votes on these kinds of things in anything other than a serious manner. But this is very serious.

Let me compare some defense things. The distinguished senior Senator from West Virginia offered a package. It got a lot of votes, over 40. So we can put a little comparison in. His amendment has defense growing at 1 percent over inflation. So everybody ought to know this is 5 percent less than that. This is no growth, meaning not even inflation. So for comparison, it is 5 percent more of a defense reduction than what the distinguished minority has.

Mr. GRASSLEY. Will the Senator let me clarify on that point?

Mr. DOMENICI. I am pleased to yield.

Mr. GRASSLEY. The Senator is correct as far as growth, but in outlays we will still be spending $13 billion more next year than this year.

Mr. DOMENICI. There is not any question that defense spends out from budget authority, but the future defense of our country is based on budget authority. I am merely talking about, comparing the distinguished minority leader's defense number, this is 5 percent lower.

Now we brought out a package with a 3-percent growth and we had a very heated debate and by a two-vote margin the Senate voted to bring it down to zero.

Now let us compare that zero in the first year with this. This is 4 percent lower than that zero in the first year.

I only say that because I do not know that we all understand the freezes the same way. Some people say we are talking about a defense freeze and we were using no growth, zero. This freeze is a literal freeze in budget authority which does not provide any growth, which is 4 percent less than what the distinguished minority leader offered.

Now let me give you another couple of comparisons. It may be fair to freeze every one Federal program. Some people might think that. But 60 percent of all the savings in this budget are out of the defense of this country.

Now that may be fair when one looks at the freeze. I am just not so sure it is the right thing to do. I cannot believe that we can look out there at the defense needs of our country, at this huge, huge litany of programs that we have everywhere else, and say it is fair to take 60 out of defense and 40 out of all the rest.

Now it does have a very, very good feature. I have complimented them many times on it. It has brought into the limelight one particular issue. It freezes cost-of-living indexes. That has been voted on a couple of times here. It does that. Now, that may be fair.

I happen to think it is fair if you have a major deficit package. I will tell you I am not so sure it is fair when you do not cut anything out of any other program in the Government. I am not saying that this does not freeze the rest of it. But, frankly, there are so many arguments about fairness, I wonder, if you are going to freeze the cost-of-living for pensioners, if you cannot find some programs in this Government that you could get rid of in exchange for asking them to sacrifice. I happen to think there are about 25 billion dollars' worth of programs that should be eliminated or reformed before you ask seniors to accept a freeze.

Having said that, I do with all sincerity compliment the sponsors. In particular, I compliment those who have focused on defense in the past few years. I think they have helped. But I really do not think we can justify at this point in our development of our national defense a negative for growth in defense. I do not think it is fair to take 60 percent out of defense. I do not think it is fair for senior citizens and all the other pensioners to freeze them and to treat all the rest of the other programs of our Government on par.

Last but not least, it will not do the job. I am not arguing that a $40 billion would not be great. But, frankly, when you only do this and do nothing else, you really leave a rather substantial deficit in place. I do not know that I would ask for a freeze unless I was prepared to do a lot more than this in terms of structural changes.

I would be pleased to yield to my good friend, the chairman of the Armed Services Committee, Senator GOLDWATER.

The PRESIDING OFFICER. The Senator from Arizona.

Mr. GOLDWATER. I thank my friend from New Mexico.

The Senator from Iowa very correctly pointed out the other day that a few months ago when we first started working on this budget problem—I think 2 days after the election—I believed in the freeze because I considered a freeze to be an across-the-board freeze. I attended the first meeting. I continue to attend meetings, and it became very obvious to me that there was no way you could freeze this budget because everybody has their little selfish items. We watched Amtrak win today. We watched food lunches win today. I am not saying they might not be needed. But if you are going to cut the deficit, we are all going to have to make some sacrifices. I have some responsibilities.

I am chairman of the Armed Services Committee. I happen to believe that the first responsibility we have in this body and the other body is the defense of our country. You may say, oh, it is adequate. We have more than we need. I will admit we have the finest armed services at this particular moment than we have ever had in my memory. That goes back longer than I like to even think about. But is we cut this budget 4 percent and the House is now looking at zero, zero, zero, we have no bargaining position to begin with when I take this bill, if we ever get around to passing it, over to the House for our conference. We start out with no position to bargain from.

It is very easy to say freeze. It is very easy to say let us take this money out of defense. Let us finance everything else that everybody in this Chamber wants for more food stamps, more support for the farmers, more this and more that. Let us continue on soaking 50 percent of the American taxpayer so the other 50 percent do not have to worry. I believe in welfare. But I do not believe in the welfare state. I do

not believe in cutting up the defense of this country just in order to finance the particular likes that each one of us might have. Many things that I would like to see contained in this budget I have already voted against, and I will continue to vote against them. But I beg of my colleagues, take a hard look at this. This freeze might have worked had we started out with it. It is not going to work now where you do not freeze everything. When you are taking 60 percent of all the anticipated cuts out of the defense budget, and we have inflation growing at a normal rate now of around 3.5 percent—maybe a little more next year because some people are talking our economy into a worse condition—I do not like to think of trying to provide the defense of this country with the needs they have to have and fail to do it.

I just remind my colleagues of an obligation we have in the Middle East. We have no treaty. But we have promised Israel to come to her defense if she needs it. Can we do it? We cannot hardly do it with the equipment we have today. We have to build a new transport called the C-17. You cut this budget, there will be no C-17. We have no way to get troops; we have no way to get equipment into that part of the world. We built our defense, I think, not wisely, but we built it on the possibility of war on the plains of Europe. I want to remind my colleagues that we have responsibilities around this world where we do not have the equipment that we need to fight around this world.

Do not cut our defenses 60 percent. I will admit we can cut defenses. I said that in the first meeting I went to. We can. And we have. The budget that the Armed Services Committee voted out was a cut in defense. But how far are we going to go? I do not want to see our boys wind up with just bows and arrows. We went through that once. We got the hell beat out of us.

Please, take a hard look at this. It sounds great. Freeze everything. But oh, do not freeze the things that I want in my home State. That is what is going to kill us if we do not make up our minds that saving this country is a lot more important than saving our own pet little projects.

Mr. BIDEN. Mr. President, will the Senator from Iowa yield 10 seconds? Can we find the Senator from Iowa? [Laughter.]

Mr. DOMENICI. Mr. President, how much time do I have?

The PRESIDING OFFICER (Mr. SYMMS). The Senator from New Mexico has 16 minutes.

Mr. DOMENICI. I yield 10 seconds.

Mr. BIDEN. Mr. President, I understand why my distinguished friend, the chairman of the Armed Services Committee, may be confused.

The PRESIDING OFFICER. The 10 seconds has expired.

Mr. BIDEN. You are a heck of a guy. [Laughter.]

Will the Senator yield 10 seconds?

Mr. DOMENICI. I am pleased to.

Mr. BIDEN. None of the amendments that we passed, Mr. Chairman, are in fact attached to this freeze. This is in fact a total freeze.

The PRESIDING OFFICER. Who yields time?

Mr. DOMENICI. I think we are ready to vote shortly.

I think there is one other notion that I should speak a minute on. There are so many ideas of what is fair that it is pretty difficult to express the concept. I have been home recently, and I am sure all my friends here in the Senate have. People say if the budget package is fair, I will be for it. And my good friend, a member of my committee, who, I dearly respect, Senator GRASSLEY, says a freeze is fair. But I would like to make this point. A freeze of all programs when that plan ends up with 60 percent of savings out of defense, and freezing the pensions for all the people in this country, assumes one thing further. It assumes that all programs are created equal, that all the policies are the same, the same in need, the same in urgency, and the same in our Government's responsibility to do what it must. Frankly, I think when you ask that kind of question, a freeze of this type fails in fairness because I do not think all the programs are the same. I do not think they have an equal objective or approach.

I say that my friend, the distinguished Senator, who has been working hard on this forever and is on the Budget Committee along with the good junior Senator from Kansas, who also worked hard on this have a different notion. They think maybe you cannot save much more, and you ought to get on with saving this much. I just do not believe that. I do not say it is not a good idea. But I think we can save more. In that context, they have an idea that simplicity is a virtue here. It may be. It may be that we cannot do any more. Maybe this kind of freeze has with it that added characteristic. But, frankly, I think this is a year to do a lot more. I urge the Senate not to adopt the freeze amendment, which is the full substitute that is before us.

I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. DOMENICI. I have how much time remaining?

The PRESIDING OFFICER. The Senator has 9 minutes remaining.

Mr. GRASSLEY. Mr. President, will the Senator give me 1 minute to respond to a point that you were not wrong about, but that I would like to comment on?

Mr. DOMENICI. I yield 1 minute to my friend, Senator GRASSLEY.

Mr. GRASSLEY. Mr. President, we would not say that all programs are created equally and that is not the issue, although I do not find fault with the point the Senator made. It is a point of starting with shared sacrifice as a necessary first step to getting the show on the road to get the budget deficit down. We have always thought in terms of bringing people together as opposed to a budget the Senator presents, which we thought actually kind of divided people. In this period of time, when we need real austere approach that is even going to have to go further down the road a few years than what the Senator suggested we do, it is better that we try to reprioritize the budget at the same time as we bring down the overall level of expenditure.

Mr. LEVIN. Mr. President, I will vote against the Grassley amendment, embodying the so-called KGB freeze, because it will not bring about significant deficit reduction over the next 3 years and because it does not ask everyone to fairly share in the burden of deficit reduction.

The KGB freeze, unlike the Chiles-Hollings package which I supported, does not put us on a realistic glidepath toward a balanced budget in the foreseeable future. This glidepath is essential if we are to ask people in this Nation to endure the sacrifices of deficit reduction. Otherwise, their efforts will have been in vain, and the future requests for sacrifice, which would be inevitable, would risk falling on less and less responsive ears. Passage of the KGB freeze would put off the day when we have to make multiyear budget plans and would result in those plans requiring more painful medicine than they would have had to if we had acted earlier.

In addition, the KGB plan does not require the degree of shared sacrifice necessary to make it acceptable or fair. Under the KGB plan, Social Security recipients are required to give up their cost-of-living adjustments, for 1 year and many of those recipients will be thrown into poverty. There is not even a provision in the plan for softening the impact of this COLA freeze. At the same time, there is no provision in the KGB plan for enacting a more effective minimum tax on profitable corporations and wealthy individuals, who are now using the tax code to avoid paying anything in taxes. A budget plan which asks for sacrifice from senior citizens and so many others, but does not take steps to tighten up the Tax Code as it applies to these profitable corporations and wealthy individuals, is unbalanced and unsupportable.

There is a budget package offered which provides a responsible and bal-

anced way to dramatically reduce the deficit by 1990. This was the Chiles-Hollings package, which I support. I hope that we will consider something along its lines again before we conclude our deliberations on the budget.

Mr. PRYOR. Mr. President, I am pleased to be a cosponsor of the pending amendment, and I hope it will be adopted by the full Senate. This amendment, Mr. President, is the best way to solve our budget problems, and will give us time to develop long-term solutions to the budget problems we're now facing.

Mr. President, this amendment is simple. It is equitable. It tells everybody and every program in the Federal budget: "We've got serious budget problems, and in an effort to get the deficits down, we're going to freeze your program for the next year." This freeze is across the board; no one or no program is exempt. For this reason, Mr. President, it is the best way to attack the problem, and it will then allow us to spend the next year developing real, long-range solutions to get the horrible budget deficit under control.

Some people argue that this is the wrong way to go. My answer to that, Mr. President, is that under this plan everybody is included. Therefore, it's equitable. Next, we've got to do something. Every other proposal to date that's been considered on the floor has gone down to defeat. The so-called leadership package was adopted, but then was amended to the point where nobody knows what's in it now. So, as a practical matter, Mr. President, all of the other budget alternatives have been defeated.

I have supported the concept of a 1-year across-the-board budget freeze each of the last 2 years. While we haven't won, I think the time has certainly come for this idea. It just seems to me, Mr. President, that if we're ever going to get these deficits of $200 billion down to manageable levels, and levels that won't literally mortgage the future of this country, we're going to have to do it with shared sacrifice. That's what this amendment is all about. Everybody helps. Therefore, the country will be better off.

This budget amendment is only for a 1-year freeze. But, this 1-year tourniquet will provide us some breathing room to get our budget back on the right track. We're running out of time, Mr. President, and the pending amendment is the best solution offered to date.

I commend my colleagues, the Senator from Kansas [Mrs. KASSEBAUM], the Senator from Iowa [Mr. GRASSLEY], and the Senator from Delaware [Mr. BIDEN] for their efforts. I hope we will prevail in this effort, and I urge my colleagues to join in supporting this amendment.

Mr. PELL. Mr. President, I have voted for a 1-year freeze on Federal Government spending. I have done so primarily to indicate my conviction that the Federal Government deficit must be reduced.

I have voted for this across-the-board freeze as an alternative to the administration's proposal which proposes to reduce the Federal deficit by destroying or decimating programs that are of proven worth and that contribute significantly to our strength as a nation.

Most importantly, this budget freeze amendment would bring to a screeching halt the runaway increases in defense spending. It would freeze defense spending at the current level with no adjustment for inflation. It would force the Defense Department to eliminate unneeded weapons systems, and stop the wasteful practices in Government defense contracts. Defense spending increases have added immensely to our budget deficits during the past 4 years. Freezing that spending would be good for our Nation.

Although I have voted for this budget freeze, I have very serious reservations about the effect of the freeze on Social Security benefits. I believe it is basically unfair to freeze Social Security benefits. Social Security is financed by separate payroll withholding taxes, and those taxes are paid to be used for Social Security, including cost-of-living adjustments, and not to reduce the Federal Government deficit. If I had my way, I would not freeze Social Security benefits.

In addition, this across-the-board freeze has other serious flaws. While freezing Government spending programs, it would permit the continued burgeoning growth of tax expenditures that add billions of dollars to the deficit each year and permit profitable corporations and well-off individuals to escape their fair share of taxes. In addition the freeze permits continued spending on wasteful farm subsidy programs at a very high level.

In my view, the administration budget uses deficit reduction as an excuse to attack and destroy good and effective Government programs with which the administration simply disagrees. Indeed, this administration would propose slashing of such programs as student aid, Amtrak, and Social Security even if the Government were running a surplus.

For all of its flaws, the spending freeze proposal at least focuses on deficit reduction as the primary objective, without attacking good, essential and proven Government programs. And it does have a major advantage in firmly halting the runaway growth in defense spending that has contributed so much to the escalating Federal deficits.

Mr. GRASSLEY. Mr. President, it has become apparent that Congress and the administration has lost some needed perspective with regard to our agriculture budget. Too many people are focusing on the costs, which represent a symptom of a depressed farm economy, and perhaps a symptom of an inadequate farm program. Too much focus is on the cost, and virtually no attention is being paid to the causes for the cost.

Worse yet, instead of addressing the means to correct these causes, some want to take a simplistic approach correcting the symptom. In short, their answer is to slash the agriculture budget with no care as to the economic turmoil that it will bring. They aren't concerned about the impact of these meat ax cuts on the economic fabric of an already struggling farm sector.

Just why are farm program costs high? It's simple, everyone knows that under our commodity price support programs, as farm market prices fall below a certain set level, Government expenditures increase. These expenditures amount to a safety net for farmers; they do not guarantee profits. As an example, in 1984 it cost Iowa corn growers an average of $2.99 to produce a bushel of corn if he can average 115 bushels per acre. During that same year, the average market price was $2.97, so the farmer who did not sign up for the program would have lost 2 cents per bushel. If the farmer was signed up for the program, he could have been assured $3.03 per bushel, a 4-cent profit. Of course that profit would have been offset by the losses associated with the requirement to set aside a percentage of his acreage.

So you see, at best, our farm programs provide a mere safety net. This should dismiss any ill-conceived impressions some might hold that American farmers walk away from the U.S. Treasury with billions of dollars in their pockets as they laugh their way to the bank. So, who does benefit from our farm program expenditures? It benefits those who depend upon agriculture directly or indirectly for their jobs. In Iowa, that's about 4 out of 5 jobs. Nationwide, 20 percent, or 23 million jobs depend upon agriculture. Twenty-three million workers in America are depending upon American farmers staying in business. These 23 million workers understand that if farmers stay in business, they will spend about $135 billion worth of goods and services produced by our urban work force.

That's where the billions of dollars of farm program price supports are going. This money keeps these 23 million employed. It goes to the employees of machinery manufacturers, chemical and seed companies, the landlords, the banker, the grocery

store, the local mechanic. When farmers are at best breaking even with our price support programs, it is easy to figure out who benefits from what money that does come from the U.S. Treasury.

Washington can ill-afford to think of our farm programs in terms of a small percentage of farmers scattered throughout the country. We are talking about the backbone of our Nation's economy.

Who benefits from our farm programs? Not just a few million farmers, but 20 percent of our work force.

So the question is, Who is subsidizing whom?

There is yet another side of this farm subsidy issue worth exploring. Americans enjoy the safest, most nutritious diet in the world. And they spend less than 16 percent of their disposable income on food. Compare this to the 60 or 70 percent of disposable income that consumers from other parts of the world must spend.

For every dollar spent for food consumed at home, the farmer receives a meager 33 cents. And for every dollar spent away from home on food, the farmer only gets about 15 cents. In short, of the $332.2 billion spent by U.S. consumers for American food, only 27 percent went to our farmers.

Where does the bulk of it go? That 73 percent goes to the middle-man costs of transportation, labor, packaging, energy, and a number of other areas.

So who benefits by keeping farmers in business? Consumers benefit. Consumers benefit by this safety net we call farm programs. Consumers benefit by the billions that have been spent on farm programs.

What happens if we slash our farm program budgets. Unfortunately, if we end up with a new 4-year farm bill with programs similar to what we have now, we will probably see this safety net for farmers weakened. And remember what I pointed out earlier, the average corn farmer in Iowa, according to Iowa State University figures, is only breaking even now. Many are being forced out of business.

If we have to weaken that safety net, tens of thousands of additional farmers will be forced out of business. With them will go those jobs which depend upon a viable agriculture. In the Midwest, it will mean a major disruption in our entire economic fabric.

Now let's get back to the question of the high cost of our farm programs. Remember, its when our farm markets are weakened that Government costs increase. So what has happened to our markets?

Much of the stage was set by the Soviet grain embargo. In 1980 alone, the Soviet grain embargo cost America 310,000 jobs, $3 billion in personal income, and over $11 billion in national output.

But it also encouraged our foreign competitors to increase their farm production base. Through this increased base, along with worldwide bumper crops, our farm markets have weakened.

Add to this, the unfair trade practices and subsidies of our competitors. These subsidies squeeze American farmers out of foreign markets, which further weakens our domestic farm markets and ultimately triggers higher cost to the Government through farm program supports.

And what about the strong dollar? Our strong dollar also weakens our domestic markets because it destroys our ability to sell our grain overseas. During Senate Budget Committee hearings, Secretary Block stated that he estimated that the strong dollar cost us roughly $3 to $4 billion in farm export markets. Who pays for this? This $3 to $4 billion either comes out of the pocket of the American farmer, or it comes out of the U.S. Treasury.

In short, the strong dollar is increasing the costs of our farm programs. Not only the strong dollar, but also unfair trade practices and subsidies, ill-advised U.S. policies like the Soviet grain embargo, and a number of other factors have forced market prices down and thus farm program costs up.

Now, here is the irony. Some of our officials have suggested that the strong dollar is good for the United States. They say that it has attracted foreign money which helps pay for our budget deficits and spending.

It is good for America, but it is bad for the farm program budget. The strong dollar, and a number of other factors completely out of the control of American farmers, is causing high costs for our farm program costs. And what losses our Treasury doesn't cover, comes directly out of the pockets of our farmers.

In short, farmers are sacrificing their profits so that the strong dollar can help out the rest of the country.

And what is the farmers' reward? They are asked to sacrifice even further. They are told their income must be slashed even further, that many must be forced out of business.

The powers that be in Washington are not interested in correcting the reasons for the farm problems or high costs of farm programs. They aren't focusing on getting the dollar down. They aren't forcing our trade negotiators to shed their images as paper tigers to force our competitors to play fair. They aren't interested in protecting farmers from the misguided policies of our own Government.

Instead, they're focusing on one thing—slash those farm programs. They make it sound appealing. They say that all that money fills the pockets of the rich farmers and that it only encourages farmers to produce more and more. They couch their arguments as if all the blame should be on the farmer, and they say we should take away the farmers safety net.

In fairness, I should point out that one of the best things that could be done to help American farmers would be to reduce interest rates and to reduce the strength of the dollar. We are told both will be accomplished by reducing our budget deficits. And so the argument goes that farmers therefore should be willing to pitch in to help reduce the budget deficits—it will be good for farmers.

I agree that it will be good for farmers, but who will it help if it means pulling the safety net from underneath these farmers? How many farmers will be asked to go out of business while they wait for interest rates to fall and exports to increase? How many of the 23 million farm related urban jobs have to be lost?

Again, I ask, who is subsidizing whom? When all the money farmers make goes toward production costs—to employ 23 million Americans—to keep consumer food prices down to a minimum—who is subsidizing whom?

Let me suggest, that if it isn't clear to my colleagues what the answer is to this question, I assure them that it is abundantly clear to their constitutents—urban and rural alike.

The 65 percent of Americans polled in January by the New York Times and CBS News, who stated that it was a bad idea to cut farm aid as a way to trim the Federal deficit, know who is subsidizing whom.

And they care enough to know farmers are in trouble and need help. A February, 1985, ABC News/Washington Post poll found that 61 percent realize farmers are worse off than most Americans; 82 percent believe that the Government should give special assistance to these farmers.

If Americans understand who is subsidizing whom, why can't this Congress and this administration figure it out?

I hope that my colleagues will take this information into account, and I hope it will broaden their perspective about our agriculture budget problems.

Let me just close by saying, American agriculture stands at the crossroads. What we do with this budget, and what we do with the new 4-year farm bill, will mean all the difference in the world.

Let me suggest that we need the maximum amount of flexibility possible, in terms of budget constraints, under which we can draft a farm bill. If Congress can develop a less costly farm bill that provides farmers the support they desperately need, then let Congress develop it. But we cannot afford to have cuts forced upon us at this critical time.

It is for this reason that I have supported freezing the agriculture budget as part of an across-this-board budget freeze. And when that failed, I have supported the least possible cuts in agriculture. It's a matter of equity, fairness, and for many of our farmers and AG labor force, it's a matter of survival.

Mr. DOMENICI. Mr. President, I thank the Senator. I just would say again, not by way of being disagreeable, because I have the greatest respect for the Senator from Iowa, but any notion of shared sacrifice has at least an overtone or a connotation that you start with the same kind of program or the same kind of need or the same kind of responsibility, then you ask for a sacrifice. I return to the fact that you do not have shared sacrifice when you have programs that are very, very different and yet you are treating them all alike by freezing them. I do not think that is shared sacrifice.

I yield back the rest of my time.

The PRESIDING OFFICER. All time has been yielded back. The question is on agreeing to the amendment. The yeas and nays have been ordered. The clerk will call the roll.

The legislative clerk called the roll.

Mr. SIMPSON. I announce that the Senator from North Carolina [Mr. EAST] and the Senator from California [Mr. WILSON], are absent due to illness.

Mr. CRANSTON. I announce that the Senator from Nebraska [Mr. EXON], is absent because of illness.

The PRESIDING OFFICER. Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 27, nays 70—as follows:

[Rollcall Vote No. 57 Leg.]

YEAS—27

Andrews	Dixon	Matsunaga
Baucus	Dodd	Mattingly
Biden	Gore	Melcher
Bingaman	Grassley	Pell
Boren	Harkin	Pryor
Boschwitz	Hollings	Simon
Bumpers	Humphrey	Trible
Burdick	Kassebaum	Weicker
DeConcini	Kasten	Zorinsky

NAYS—70

Abdnor	Hart	Murkowski
Armstrong	Hatch	Nickles
Bentsen	Hatfield	Nunn
Bradley	Hawkins	Packwood
Byrd	Hecht	Pressler
Chafee	Heflin	Proxmire
Chiles	Heinz	Quayle
Cochran	Helms	Riegle
Cohen	Inouye	Rockefeller
Cranston	Johnston	Roth
D'Amato	Kennedy	Rudman
Danforth	Kerry	Sarbanes
Denton	Lautenberg	Sasser
Dole	Laxalt	Simpson
Domenici	Leahy	Specter
Durenberger	Levin	Stafford
Eagleton	Long	Stennis
Evans	Lugar	Stevens
Ford	Mathias	Symms
Garn	McClure	Thurmond
Glenn	McConnell	Wallop
Goldwater	Metzenbaum	Warner
Gorton	Mitchell	
Gramm	Moynihan	

NOT VOTING—3

East	Exon	Wilson

So the amendment (No. 80) was rejected.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. HATCH. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The Senate will be in order. Senators in the aisles will cease conversations.

Mr. DOLE. Mr. President, I inquire how much time remains on the resolution.

The PRESIDING OFFICER. The majority leader has 25 minutes remaining, and the minority leader has 3 hours.

Mr. DOLE. Mr. President, that is the point I want to make. There are 3 hours and 25 minutes. That would take us to about 7 o'clock. But we have rollcall votes that do not count against that time, plus amendments to be offered at the expiration of that time.

It is still my hope to conclude action on this measure today. So again I implore my colleagues who have amendments they do not have to offer to see if we can figure some way of covering it in a news release, without offering the amendment, and let us do it that way. [Laughter.]

I think the general thrust around here is to try to finish at a fairly early time.

I understand that the next amendment is to be offered by the distinguished manager of the bill on the minority side, Senator CHILES. Is there a time agreement on that amendment?

Mr. CHILES. Fifteen minutes on a side.

Mr. DOLE. Mr. President, I ask unanimous consent that there be 30 minutes on the Chiles amendment, evenly divided.

The PRESIDING OFFICER. Is there objection?

Mr. COHEN. Mr. President, reserving the right to object, I have been waiting all afternoon to offer an amendment. Does the majority leader have a sequence of amendments?

Mr. DOLE. The last amendment came from this side, and this amendment will be from the other side.

Mr. COHEN. The Senator started to have an alternation?

Mr. DOLE. We started that yesterday. [Laughter.]

Mr. COHEN. Is it fair to presume that we will alternate back?

Mr. DOLE. I understand that the Senator from Maine may have an amendment, and we want to take it up before the time runs out.

Mr. COHEN. Immediately after the Chiles amendment.

Mr. DOLE. That is fine with me.

The PRESIDING OFFICER. Is there objection to the request of the majority leader? The Chair hears none, and it is so ordered.

AMENDMENT NO. 81

Mr. CHILES. Mr. President, I send an amendment to the desk.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Florida [Mr. CHILES] for himself, Mr. LEVIN and Mr. KERRY, proposes an amendment numbered 81.

Mr. CHILES. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

In the preceding amendment, make the following changes:

On page 3, increase the amount on line 11 by $300,000,000.

On page 3, increase the amount on line 12 by $3,300,000,000.

On page 3, increase the amount on line 13 by $2,900,000,000.

On page 3, increase the amount on line 14 by $3,200,000,000.

On page 3, increase the amount on line 17 by $300,000,000.

On page 3, increase the amount on line 18 by $1,300,000,000.

On page 3, increase the amount on line 19 by $3,200,000,000.

On page 3, increase the amount on line 20 by $3,400,000,000.

On page 3, increase the amount on line 24 by $300,000,000.

On page 3, increase the amount on line 25 by $1,300,000,000.

On page 4, increase the amount on line 1 by $3,200,000,000.

On page 4, increase the amount on line 2 by $3,400,000,000.

On page 4, increase the amount on line 5 by $300,000,000.

On page 4, increase the amount on line 6 by $1,600,000,000.

On page 4, increase the amount on line 7 by $4,800,000,000.

On page 4, increase the amount on line 8 by $8,100,000,000.

On page 4, increase the amount on line 11 by $300,000,000.

On page 4, increase the amount on line 12 by $1,300,000,000.

On page 4, increase the amount on line 13 by $3,200,000,000.

On page 4, increase the amount on line 14 by $3,400,000,000.

On page 4, increase the amount on line 23 by $200,000,000.

On page 5, increase the amount on line 5 by $200,000,000.

On page 5, increase the amount on line 12 by $200,000,000.

On page 5, increase the amount on line 19 by $200,000,000.

On page 19, increase the amount on line 12 by $300,000,000.

On page 19, increase the amount on line 13 by $300,000,000.

On page 19, increase the amount on line 17 by $200,000,000.

On page 19, increase the amount on line 21 by $3,200,000,000.

On page 19, increase the amount on line 22 by $1,200,000,000.

On page 20, increase the amount on line 2 by $200,000,000.

On page 20, increase the amount on line 6 by $2,600,000,000.

On page 20, increase the amount on line 7 by $2,700,000,000.
On page 20, increase the amount on line 11 by $200,000,000.
On page 20, increase the amount on line 15 by $2,500,000,000.
On page 20, increase the amount on line 16 by $2,800,000,000.
On page 20, increase the amount on line 20 by $200,000,000.
On page 32, increase the amount on line 17 by $100,000,000.
On page 32, increase the amount on line 18 by $100,000,000.
On page 33, increase the amount on line 2 by $300,000,000.
On page 33, increase the amount on line 3 by $300,000,000.
On page 33, increase the amount on line 11 by $600,000,000.
On page 33, increase the amount on line 12 by $600,000,000.
On page 42, decrease the first amount on line 6 by $3,254,000,000.
On page 42, decrease the second amount on line 6 by $1,159,000,000.
On page 42, decrease the amount on line 7 by $3,621,000,000.
On page 42, decrease the amount on line 8 by $3,246,000,000.
On page 42, decrease the first amount on line 9 by $4,016,000,000.
On page 42, decrease the second amount on line 9 by $3,966,000,000.
On page 45, decrease the amount on line 21 by $3,254,000,000.
On page 45, decrease the amount on line 22 by $1,159,000,000.
On page 45, decrease the first amount on line 23 by $3,621,000,000.
On page 45, decrease the second amount on line 23 by $3,246,000,000.
On page 45, decrease the amount on line 24 by $4,016,000,000.
On page 45, decrease the amount on line 25 by $3,966,000,000.
On page 52, increase the amount on line 1 by $3,200,000,000.
On page 52, increase the amount on line 3 by $2,500,000,000.
On page 52, increase the amount on line 4 by $2,400,000,000.

The PRESIDING OFFICER. Will all staff personnel and Senators clear the aisle, so that we may hear the Senator from Florida?

Mr. CHILES. I thank the Chair.

Mr. President, I send this amendment to the desk on behalf of myself, Senator BRADLEY, Senator PELL, Senator KENNEDY, Senator MOYNIHAN, Senator SARBANES, Senator ROCKEFELLER, Senator LAUTENBERG, Senator HOLLINGS, Senator BYRD, and Senator DODD.

I yield myself 2 minutes, Mr. President.

Mr. President, the amendment represents an investment in the future.

Investments in education and training programs certainly are vital to our economic growth and the funding here would be for programs which give our children and workers the skill they need in an increasingly competitive market.

Under the leadership plan, funding for many of these programs would be frozen at the 1985 levels, and because these programs are dependent on Federal funds, a funding freeze would actually cause cutbacks in either the participation or the service levels.

As a consequence of a funding freeze, participation in Head Start could fall by as many as 20,000 children. Another 200,000 children could be dropped from compensatory education programs for the disadvantaged.

I think it is imperative that we extend the funding and expand it for our math, science, and foreign language programs.

Certainly that program, which we established with great fanfare last year, was to counter the underinvestment in those critical skills.

We know that our declining test scores have revealed weakness in many of our math and science preparations. We know what the Japanese, and the Germans, and our competitors in the free world are doing. For example, they graduate twice as many engineers in Japan as we do. About 15 percent of the American high school students study a foreign language, down from about 24 percent in 1965. And yet those are the skills we need as we try to increase our trading base.

The amendment also provides adequate funding for the Pell Grant Program.

I thank the Senator, and I now yield 3 minutes to the distinguished Senator from Rhode Island [Mr. PELL].

Mr. PELL. Mr. President, the real strength of our Nation is not the weapons of destruction——

Mr. KENNEDY. Mr. President, could we have order so we may hear the Senator from Rhode Island?

The PRESIDING OFFICER. The Senator from Massachusetts is correct. The Senator from Rhode Island will please suspend and time will not be charged.

The Senate will not move forward until we can get some order. Will those Senators conversing in the middle aisle please cease conversation and those staff people, also.

The Senator from Rhode Island.

Mr. PELL. Mr. President, I thank you, and I thank my friend from Massachusetts.

Mr. President, the real strengths of our Nation are not the weapons of destruction, or the machines of construction, or the gold in Fort Knox. The real strength of our Nation is the sum total of the education and the character of our people. Our weapons are of no use until we have people who can operate them.

If ever there was a capital investment, it is investment in the education of our people, and this is where I think we should not be niggardly.

In this regard the Chiles amendment does its best to remedy the situation we find ourselves in today.

Mr. President, I rise in support of the Chiles amendment, of which I am proud to be a cosponsor. For the education of our young people, this is a most important amendment, and I would strongly urge my colleagues to support it.

It would, first, provide a very modest inflation adjustment for the Pell Grant Program. This increase would amount to just about 5 percent. It is an increase, however, that is vitally necessary if this program, the bedrock of our Federal student aid efforts, is to continue serving the almost 3 million needy students nationwide who today receive Pell grants.

Second, for the chapter I program, we are proposing a very small inflation adjustment, also of approximately 5 percent. This program, which currently serves about 4.6 million children nationwise, has never had sufficient funding to serve more than one-third of all eligible children. Our amendment would simply enable the program to continue serving the number of children already in the program.

Third, for the Guaranteed Student Loan Program, our amendment would achieve savings of about $150 million in fiscal 1986. These are savings that can be achieved through administrative changes in the law, and, most important, are changes we believe can be made without adversely affecting the ability of deserving students to obtain loans under this important program.

Finally, for all other education programs, for the arts and humanities endowments and for the Institute of Museum Services, our amendment would freeze funding for fiscal 1986 at fiscal 1985 levels. This would protect the Impact Aid Program by preserving needed payments to B children, those children whose parents either work or live on Federal installations.

Mr. President, this is a very reasonable amendment. It produces savings, asks sacrifices, and provides only very modest increases for aid to needy children and students who need our help most. I strongly urge its passage.

Mr. CHILES. Mr. President, I yield 2 minutes to the distinguished Senator from New Jersey [Mr. BRADLEY].

The PRESIDING OFFICER. The Senator from New Jersey is recognized for 2 minutes.

Mr. BRADLEY. Mr. President, I rise today to join my colleague, Senator CHILES, in offering an amendment which would restore funding for a variety of critical education, training, employment, and social service programs. I am concerned that many of the program cuts proposed in the President's budget would most harshly affect those who have already suffered from reductions in Federal program spending—our children, our unemployed youth and adults, and our elderly citizens.

We need to preserve educational opportunity for economically and educationally disadvantaged youth. This year marks the 20th anniversary of

two programs which have proven particularly successful in assisting such children to reach their potential level of intellectual development—the Head Start and Chapter I Programs. Neither program has ever been funded at levels necessary to provide services to even a majority of eligible children. The present budget proposal would allow inflation to further limit the number of children being assisted by these programs. I simply cannot support further cuts to a program such as Chapter I, whose funding has already been reduced in real terms by nearly 20 percent since 1980. The result of these cuts has been a reduction in the number of children being served by between 500,000 and 700,000. Our amendment restores funding to the baseline for both Head Start and Chapter I.

Mr. President, we all know that Federal aid to higher education is as good as any investment we can make to keep our leadership position in the world. The budget proposal before us, however, would place significant barriers between hundreds of thousands of students and their chance for a higher education. These cuts fly in the face of the realities of contemporary life which demand a better educated citizenry and work force. We must oppose these cuts. Our amendment funds the Pell Grant Program at its baseline level and restores the other student financial assistance programs to the their actual fiscal year 1985 level. Furthermore, it reduces spending in the Guaranteed Student Loan Program by about $700 million over 3 years; this can be attained by administrative reforms and tighter collection methods.

This amendment also protects several programs serving our Nation's elderly citizens. Baseline funding is provided for the Community Service Employment for Older Americans Program and the Administration on Aging, the latter includes nutrition programs for the elderly.

This amendment also provides additional funding for programs which give our youth and our workers the skills they will need in an increasingly complex and competitive world market. Funds are added for the establishment of older worker training programs and a national commission on labor market conditions, as well as for math, science, and foreign language education programs. Many of my colleagues may recall that I introduced an amendment last year to supplement funding for the math/science program. That amendment was approved by the Senate but lost in conference.

Finally, these ends can be reached in a manner which still results in 3-year savings of $4.1 billion.

Mr. President, this amendment is a very clear one, and offers very clear choice. It is an amendment that says the future of our country is dependent on the quality of our education and that, indeed, the Federal Government has a role in that process.

I know that there are Senators in this body who do not believe this. I know that there are Senators in this body who believe the Federal Government has impeded educational efforts by its attempt to insist that those who are less privileged have the same opportunity to learn as those who are more privileged.

I simply disagree most profoundly with those in the body who hold this point of view.

I happen to think that the success of the chapter 1 program over the last 20 years—and we just celebrated its 20th anniversary a few weeks ago—is testament to the fact that if you devote attention to the child, no matter what that child's income level is, if you provide remedial education teachers for the child, and if you reach the child so that he or she tries to excel, the program can succeed in allowing all children in this country, no matter what their economic level, to have the opportunity to fly as high as their abilities will allow them.

This amendment says we must keep that commitment to the children of this country and to the future of our country. This Nation's most valuable capital is its human capital. I strongly support this amendment and urge that we adopt it.

Mr. CHILES. Mr. President, I yield 3 minutes to the distinguished Senator from Massachusetts [Mr. KENNEDY].

The PRESIDING OFFICER. The Senator from Massachusetts is recognized.

Mr. KENNEDY. Thank you. Mr. President.

Mr. President, I welcome the opportunity to join my friend and colleague from Florida, Senator CHILES, in urging the Senate to accept this amendment.

This amendment proposes to freeze most education programs while providing some inflationary adjustment for certain means-tested programs.

The budget process is an attempt by Congress to set priorities for Federal spending. In my view, education is as important as any area of the Federal budget. Investment in education is sound economic policy, good defense policy and just plain commonsense.

Mr. President, although the education budget has been increased in recent years, when adjusted for inflation, spending for education has actually decreased by 12 percent. As a proportion of total Federal budget outlays, education decreased from 2.4 percent to 1.7 percent between 1980 and 1985, with elementary and secondary education's share falling from 1.03 percent to .68 percent. In spite of our rhetoric calling for partnerships in education, the Federal share of total expenditures for education in this country has declined from 10.8 percent in 1980 to 8.3 percent in 1985.

Mr. President, if we were to make up for all of the inflationary increases in the last 3 years, it would require $3.2 billion just to restore the elementary and secondary education to its 1980 buying power.

This amendment, as I have previously stated, is a small and prudent effort to provide inflationary adjustments for certain means-tested programs.

Inflationary increases are absolutely essential for some education programs. In the chapter 1 program, as Senator CHILES has pointed out, the number of children served dropped from 5.4 million in school year 1979-80 to 4.7 million in school year 1982-83. With the increases Congress has appropriated in recent years, the number of children served by chapter 1 is still below 5 million, less than 40 percent of those eligible.

Without this amendment, we would see significant reductions in those numbers of children who would benefit from the title I program, and I think we should deal with that particular issue in question as well as with the Guaranteed Student Loan Program. With an inflation rate of 5 percent, 295,000 fewer children will be served by this program.

Inflationary adjustments for Pell grants will only begin to address the needs for student aid. When adjusted for inflation, Pell grant assistance has declined nearly 20 percent since 1980. The Chiles amendment proposes to save $150 million in the Guaranteed Student Loan Program. These savings are achieved through administrative changes making unnecessary the need to deny student loans to needy students.

An inflationary increase is absolutely essential in the area of handicapped education. With an inflation rate of 4.3 percent, level funding represents a real loss of $1.3 million.

To address the needs for sustained labor force development, this amendment proposes a partial increase for the Job Training Partnership Act [JTPA]. It also preserves the Job Corps and WIN Programs and proposes a $100 million increase in the funding of math-science programs to insure a continued investment to meet tomorrow's demands for trained personnel.

The Senator from Rhode Island the distinguished Senator PELL, has pointed out the importance of this amendment in the areas of the arts and humanities.

This amendment would freeze funding next year at the 1985 levels and provide for a 3-percent growth in subsequent years This funding is critical if we are to maintain responsible and

responsive Federal programs for music, literature, dance, the Nation's museums and scholarly research.

All of these programs are essential to our Nation's educational and cultural advancement.

I urge my colleagues to join me in supporting this essential amendment.

Mr. CHILES. I yield 1 minute to the distinguished Senator from West Virginia.

Mr. BYRD. Mr. President, I am pleased to cosponsor this amendment.

I have often made the observation to my constituents in West Virginia, to other concerned citizens, and to my colleagues in the Senate that I believe education is the first line of our country's national defense. Just as we at the Federal level recognize the need to invest resources to ensure our Nation's defense by military means in case that should ever become necessary, so, too, I believe we must invest in education.

Mr. President, the so-called White House-Republican compromise proposal before us badly shortchanges education. It is true that it is somewhat more generous toward elementary and secondary education than was the committee resolution: rather than cutting a number of these programs below 1985 levels, the White House-Republican compromise proposal generally funds programs at 1985 appropriations levels. However, the Republican proposal provides no allowances for inflation in any education programs. This will adversely affect up to 600,000 elementary and secondary students nationwide who now benefit from these programs.

Higher education programs are dealt a severe blow by the White House-Republican compromise proposal. It proposes to reduce budget authority for student aid programs in fiscal year 1986 by $686 million, by $844 million in fiscal year 1987, and by $877 million in fiscal year 1988. These reductions are to be achieved by cuts in the Pell Grant Program and campus-based assistance programs. In addition to these cuts, the Republican proposal reduces the Guaranteed Student Loan Program by $150 million. Clearly, the magnitude of these cuts will mean that the ability of our student assistance programs to provide accessibility to a quality education for American students—the underlying philosophy of the programs—will be vastly diminished.

Needless to say, there is no room in this Republican budget for any strengthening of Federal education efforts, no matter what is needed in this time of educational crisis, and no matter how modest a proposal we may wish to make, given overall budget deficit realities.

The amendment we are offering now will remedy these significant shortcomings. It will protect all education programs from serious cuts and it will further protect critical programs from the bite of inflation.

Just as I view education to be of paramount importance to our Nation's future defense capabilities, I also view it as critical to our Nation's continued economic growth and competitiveness. With each passing year, as I watch our Nation losing ground in the world's economic marketplace and as I read of our students' and our school's performances on international comparative academic measures, I am more and more drawn to this conclusion. The President's Commission on Industrial Competitiveness, likewise, makes the following observation:

> Our Nation's universities and schools have a vital role to play in revitalizing America's competitiveness * * *. Without strong educational institutions, the United States will not be able to capitalize on our key potential strengths in technology and human resources.

It is imperative that we do all we can, at all levels of government—local, State, and Federal—to provide the inspiration, guidance, innovative ideas, tools, and funding necessary to reverse the slide toward mediocrity in our students and in our schools that has been documented in the many analyses and reports on the situation of our education system during the past 3 years.

Local and State levels already have begun massive reforms of their education systems, and they have vastly increased their education funding levels as a result. Citizens all around the country have responded by approving tax increases to pay for the reforms. Clearly, State and local government officials, working together with their constituents, realize that it is wise and judicious—in fact, it is imperative—to increase our investment in education.

We here must not turn our backs on these efforts. We must not decrease our Federal efforts just at the time other levels of government are making difficult spending decisions and asking their voters to approve tax increases in order to make up for years of inadequate attention to educational needs.

Even though the Federal share of the total spending for elementary and secondary education—local, State, and national—is small (in recent decades never more than 10 percent), it is critical. Educators from my own State of West Virginia have deluged me with documentation of what cuts in Federal efforts will mean to their ability to provide the education programs that they believe are necessary and that the parents of their students demand. Higher education officials in West Virginia—I have heard from virtually every college and university in the State—have also documented for me the efforts that cuts in student aid programs will have on their institutions and their students.

I am sure my colleagues have received similar communications from their States. The message is clear and it is strong.

The President heard that message last year, as he was beginning his campaign for reelection. He proposed, for the first time since his election in 1980, a budget that did not severely decrease, but in fact slightly increased, Federal education spending. The Congress responded by giving the President more than he requested—because his new budget still was inadequate. Then the President campaigned around the country telling the voters that spending for education had increased in his administration.

The President was able to do this because we in Congress have consistently rejected his efforts to decapitate Federal education programs.

Today, once again, we will try to remedy a clearly inadequate education proposal.

Yesterday, I offered a proposal which, in its education section, would have provided slightly more generous increases for education than does this amendment. That proposal, while receiving the overwhelming support of my colleagues on this side of the aisle, was defeated.

The pending amendment is modest, of necessity, because of the need to restrain spending. But it, too, will allow for some strengthening of our efforts, while guaranteeing sustained program funding for critical Federal education programs which, without this funding, would experience cutbacks in services and caseloads.

I believe this is the minimum investment we can afford to make. There are few more important tasks before us than again making America's educational system No. 1 in the world. Today's students hold our future in their hands. They are the workers, inventors, business executives, soldiers, and statesmen of tomorrow. Only if our educational system is second to none can we assure that they will have the skills they need to keep America strong and free, and on the cutting edge of technological change. We must not fail to meet the challenge of setting a new standard of excellence in our schools. It is a challenge we can meet if all of us who have a stake in the future—not only parents, teachers, and students, but also the Federal, State and local governments—come together in common purpose and dedication.

I commend the distinguished ranking Democratic members of the Budget Committee for offering this amendment. I am pleased to join him as a cosponsor, and I urge my colleagues to support the amendment.

The PRESIDING OFFICER. Who yields time?

Mr. GORTON. Mr. President, I yield myself 2 minutes on this proposal.

Mr. President, I rise to oppose this amendment, not because of any quarrel with the distinguished Senator from Florida on the value of each and all of the programs in which he proposes increases but simply on the ground that this will be damaging to the economy as a whole. The greatest single favor which we can provide for young people in the United States of America is a sound and growing economy. To reach that sound and growing economy we have asked for relatively equal sacrifices across the board from the beneficiaries of almost every single Federal spending program.

The proposal which is before the Senate now which this amendment seeks to modify does precisely that. It provides for a freeze level for these educational and related programs at the 1985 level. In turn, that 1985 level represented a very substantial increase, considerably more than the amount of inflation over 1984. So each of them has been treated generously during the course of the last couple of years and each of them is treated generously with respect to other programs in the budget we have before us now.

This is not an inexpensive amendment. It will add $8.3 billion in budget authority and just under $7 billion in actual outlays over the course of the next 3 years, something in excess of 2 percent of the entire reduction in the budget deficit which we seek.

The educational programs for the students of the United States and the other allied programs to this will be best served by a strong and a growing economy. That strong and growing economy, in turn, will best be served by fiscal discipline which applies to everyone and to all programs across the board.

Mr. CRANSTON. Mr. President, I rise to support the amendment of the Senator from Florida [Mr. CHILES] who has served those of us on this side of the aisle so ably as the ranking Democrat on the Budget Committee.

He is quite correct to say that this amendment is an investment in our children, in our workers, our college students, and, indeed, in our future.

The issue is one of priorities, not budgetary numbers. But in long-range terms, this investment in our future capacities will pay off in rich dividends for our society, our economy, and our Federal budget.

The issue is education, the training of the next generation, the retraining of those whom technology has passed by.

I urge my colleagues to vote "Aye."

● Mr. LAUTENBERG. Mr. President, I am pleased to join with my colleagues Senators CHILES, BRADLEY, KENNEDY, PELL and others in cosponsoring this amendment to place funding for education and training programs for fiscal year 1986 at the same level as 1985 and to make modest cuts in administrative costs for guaranteed student loans.

This amendment rejects the cuts proposed by the Republican leadership and provides inflation protection in programs which are targeted to disadvantaged students. Compensatory education for disadvantaged children, Head Start, and Pell grants will be funded at the baseline or inflation adjusted level in order to prevent reductions in the number of students who are served. The impact aid part B program, which provides assistance for schools with students of parents who work on Federal property, will be retained. Cuts in the guaranteed student loan progam, such as family income caps and aid limitations, are rejected.

Mr. President, the strength of our Nation lies in our youth. Our ability to compete in the international economy in years to come, our ability to continue as a nation of opportunity for all, and to advance together as a nation, is dependent on the education provided our young people.

Providing more money for education is by no means the only answer to difficulties in education today. However, the clear Federal role in education, as it has evolved over the last 20 years, since the passage of the Elementary and Secondary Education Act of 1985, has been to increase the access to quality programs for all children and to improve equity in those programs. We must not turn our back on that role in the guise of deficit reduction.

The Republican budget proposal for chapter I, compensatory education for disadvantaged children, would require cutting services and participation by 200,000 children. These cuts come on top of deep cuts already imposed over the last 4 years. The success of chapter I in raising the achievement of poor children has been well documented. To deny its benefits to such a large number of children would be a tragedy which would reverberate throughout our society for many years. Similarly, the Head Start proposal would reduce participation by 20,000 children. We should not be slamming the door of opportunity in the faces of these young children.

Higher education, too, is an important stepping stone to a decent future. Federal financial aid has been essential for many students. Grants and loans, as well as earnings from jobs, have made it possible for many young people to attend college who otherwise could not have afforded to do so. The Republican leadership package would make cuts in these essential aid programs. The independent colleges and universities have estimated that the proposed limitation on the cost of attendance eligible for assistance would result in over 350,000 students losing aid. Almost one quarter of those would be students from families with incomes of $10,000 or less. This is not an equitable proposal. It does not promote any desirable public policy. Instead it hastens the day when once again higher education is the province of the very rich alone.

Mr. President, this is a good and important amendment. I urge its adoption. We owe it to our future.

Mr. SARBANES. Mr. President, I rise in support of this amendment to restore funds for education and employment and training programs.

I am deeply concerned that while we seek to reduce the Federal deficit, we do not undermine economic growth by reductions in investments in our most valued resources; our young people and our workers. I am also very concerned that those citizens least able to afford it, that is, our youth, the elderly, the handicapped, have been continually asked by this administration to make disproportionate sacrifices when considering the Federal budget. This amendment, which I have joined in sponsoring, would provide protection for those programs in which a budgetary freeze would mean a reduction in current services or participation levels. Further, it would provide additional funds for programs which enable our young people and hard-working Americans, to acquire the skills they need to successfully compete in an increasingly competitive world market.

I am especially concerned that should this amendment be defeated, educational opportunities would be denied to many citizens throughout the country. Over the past 4 years, education programs have taken more than their fair share of cuts and, in my view, it is imperative that we do not allow further cuts in these vitally important programs. This amendment would restore all education programs to fiscal year 1985 funding levels and allow means tested discretionary programs to move to the current services level.

The administration/Republican compromise would place significant barriers between hundreds of thousands of students and higher education by cutting deeply into the financial aid packages of many students currently receiving Federal assistance. The amendment I am cosponsoring would freeze most higher education programs at last year's funding levels, make administrative cost savings in the Guaranteed Student Loan Program, and allow a modest inflation increase for the Pell Grant Program which is directed at the most needy students.

Federal aid for education and employment and training programs is a sound investment in our country's future. I urge my colleagues in the Senate to join with me in adopting this amendment.

The PRESIDING OFFICER. Who yields time?

Mr. CHILES. Mr. President, how much time does the Senator from Florida have remaining?

The PRESIDING OFFICER. The Senator from Florida has 4 minutes remaining.

Mr. CHILES. Mr. President, I yield myself 2 minutes.

Mr. President, yesterday we heard debate characterizing the amendment we had as something marking the difference between the parties, because we had talked about some revenues in our package and the other side had not. I really think this amendment establishes the difference between the two attitudes, because here we are talking about a willingness to do something for the future.

What would have happened in the 1960's if John Kennedy had said:

Well, the Russians are moving ahead of us but it doesn't make any difference. The only thing we better worry about is a shared sacrifice. So we are going to cut back on education. We are not going to provide any money for higher education. We are not going to provide any money for going forward.

Where would we be today? We are enjoying the standard of living we have today because we invested some money back in the 1960's. If we fail to make the same investment now, I think we will be damning our children for the future.

The argument is that a good economy is the only thing we can leave them. How do we get a good economy? We get a good economy, I think, by training sufficient engineers, training people in math and science so they will be able to keep up with the competition in the surging world. If we do not invest today, we will not make the grade tomorrow.

We also talked about the moderate cuts that we are asking of people and that, it may be a moderate reduction in education, but this function also contains job training. And we literally see in the package before us cuts of millions of dollars in job training which suggests to those in search of better skills, "There is no hope for you out there. If you need training or retraining, we will forget about you and we are not going to do anything. We are going to turn our backs on you."

Again, I think we do care. We recognize that we are revamping our technology. We are changing totally the basis upon which we go forward.

I now see that the Soviets have a plan for exploring the planets. American scientists were shocked to find out the Soviets are going to Venus and they are going to Mars. And they are going with great sophistication and great quantities of money. They are saying they know something about science. They know not just to start it and stop it every 2 weeks. That seems to be something we have not learned.

The PRESIDING OFFICER. Who yields time?

Mr. HART. Will the Senator yield for a question?

Mr. CHILES. How much time do I have remaining?

The PRESIDING OFFICER. The Senator has 1 minute.

Mr. CHILES. Mr. President, Senator HART is a cosponsor of the amendment. I failed to indicate that at the beginning.

I ask unanimous consent that Senator EXON be also added as a cosponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HART. Mr. President, the Senator from Florida and those sponsors of this amendment have laid out the case, I think, as well as it can be laid out.

Let me just ask what I think is a primary question. Does the Senator from Florida think it is possible for this country to offer economic opportunity for the young people of this Nation and for the unemployed people of this Nation and for those who want to enter the work force and for this country to become economically competitive in the world marketplace in the 1980's and 1990's without increased investment in education and training?

Mr. CHILES. I think not. I think certainly not without increased investment.

Without this amendment, we are cutting 20,000 children off the histc ic program. We are cutting 200,000 plus off of compensatory education. I think it is fine to go out there and say, "That is part of the shared sacrifice."

I think that would be a very, very sorry mistake for us to make.

Mr. HART. I thank the Senator.

Th> PRESIDING OFFICER. The time of the Senator has expired.

Mr. GORTON. I yield back the balance of my time.

Mr. CHILES. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. All time having been yielded back, the question is on agreeing to the amendment of the Senator from Florida [Mr. CHILES]. The yeas and nays have been ordered and the clerk will call the roll.

The legislative clerk called the roll.

Mr. SIMPSON. I announce that the Senator from North Carolina [Mr. EAST] and the Senator from California [Mr. WILSON] are absent due to illness.

Mr. CRANSTON. I announce that the Senator from Nebraska [Mr. EXON] is absent because of illness.

The PRESIDING OFFICER (Mr. GRASSLEY). Are there any other Senators in the Chamber who wish to vote?

The result was announced—yeas 47, nays 50, as follows:

[Rollcall Vote No. 58 Leg.]

YEAS—47

Andrews	Ford	Matsunaga
Baucus	Glenn	Melcher
Bentsen	Gore	Metzenbaum
Biden	Harkin	Mitchell
Bingaman	Hart	Moynihan
Boren	Hawkins	Pell
Bradley	Heflin	Pryor
Bumpers	Hollings	Riegle
Burdick	Inouye	Rockefeller
Byrd	Johnston	Sarbanes
Chiles	Kennedy	Sasser
Cranston	Kerry	Simon
DeConcini	Lautenberg	Specter
Dixon	Leahy	Stennis
Dodd	Levin	Zorinsky
Eagleton	Mathias	

NAYS—50

Abdnor	Grassley	Nunn
Armstrong	Hatch	Packwood
Boschwitz	Hatfield	Pressler
Chafee	Hecht	Proxmire
Cochran	Heinz	Quayle
Cohen	Helms	Roth
D'Amato	Humphrey	Rudman
Danforth	Kassebaum	Simpson
Denton	Kasten	Stafford
Dole	Laxalt	Stevens
Domenici	Long	Symms
Durenberger	Lugar	Thurmond
Evans	Mattingly	Trible
Garn	McClure	Wallop
Goldwater	McConnell	Warner
Gorton	Murkowski	Weicker
Gramm	Nickles	

NOT VOTING—3

East	Exon	Wilson

So the amendment (No. 81) was rejected.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. DOMENICI. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DOLE. Mr. President, may we have order?

The PRESIDING OFFICER. The majority leader has called for order.

The Senate will be in order.

Mr. DOLE. Mr. President, let me indicate that I understand the Senator from Maine will offer an amendment and then we shall get back to that side.

Mr. BYRD addressed the Chair.

The PRESIDING OFFICER. The Senate minority leader.

Mr. BYRD. Mr. President, I yield myself time from our time on the resolution.

Mr. President, I ask the distinguished majority leader the question as to when he will be in a position to lay down his substitute. I understand there is a substitute No. 2 or whatever the number, but he does have a substitute which he will offer.

Mr. DOLE. That is correct, Mr. President.

Mr. BYRD. Mr. President, during the afternoon, the distinguished majority leader has indicated from time to time that he would like to finish action on his pending substitute and he has also indicated that when he said "Finish," "That means we win."

The substitute that is on line A, page 58 of the book, "Senate Procedure," is the substitute that was adopted a few days ago by a 50-to-49 vote. We are rapidly winding down the overall time limit of 50 hours.

I do not know how many minutes the distinguished majority leader has yet, but under 50, I think, and I think we have a little under 3 hours on this side. But the time is rapidly winding down and Senators on both sides of the aisle are offering amendments to the Dole package that was adopted some few days ago by that vote of 50 to 49.

Now the distinguished majority leader will have another package. I do not know what is in the package. I am not sure anyone on this side knows what is in the package. Unless we know what is in the package, we do not know how to offer amendments to it and if it is not before the Senate, we cannot offer amendments to it. So I ask the distinguished majority leader if he would consider calling it up so Senators will know what is in it, so we will know how to offer amendments to it if we wish to. Perhaps we might not want to offer amendments to it. Perhaps we would just vote up or down on it.

I yield to the distinguished majority leader for his response on my time.

Mr. DOLE. Mr. President, let me respond by indicating that we are working on a modification of the original package. It is my understanding that it is going to take care of some of the amendments that have been proposed and at the appropriate time, the substitute modification would be offered. It is still open to amendment. If it were adopted, as the distinguished minority leader knows, we would start all over. I had also hoped that everybody would call their amendments up and we have a vote on them up or down. That would clear the decks for at least one vote on a deficit reduction plan, perhaps without a lot of additional amendments.

We are getting down to—a parliamentary inquiry, Mr. President.

The PRESIDING OFFICER. The Senator will state it.

Mr. DOLE. What is the time remaining?

The PRESIDING OFFICER. Fifteen minutes on the majority side and 2 hours and 40 minutes on the minority side.

Mr. DOLE. So we are getting down to, counting rollcalls, maybe 3 or 4 hours to when we are both 0 to 0 in time remaining.

Mr. BYRD. Mr. President—did the distinguished majority leader wish to continue?

Mr. DOLE. Mr. President I cannot think of anything else to say.

Mr. BYRD. It is the first time I have found the distinguished majority leader to be speechless.

Mr. President, if Senators will look in their book titled "Senate Procedure" at page 58—and I think it is important to do this—they will find that we have been offering amendments, perfecting amendments, to the Dole package that was adopted by a vote of 50 to 49. That Dole package is on line A. We can continue to offer perfecting amendments to that package or someone might offer a substitute. The substitute would be on line B.

I ask the distinguished majority leader, will his amendment in the form of a package be a perfecting amendment or will it be a substitute? If it is a perfecting amendment, it will not be open to amendment at that point. If it is a substitute amendment, Senators may continue to offer perfecting amendments to the pending line A, the pending Dole package, which has been amended, dismantled to a very considerable extent.

I think it is about time we had the Dole No. 2 package before the Senate. I think this is a reasonable request to make. Otherwise, Senators will continue to utilize time and offer amendments to a package which has already been riddled and which may, in the final analysis, be wiped out by the second Dole package.

My distinguished friend, the majority leader, has said quite rightly that if his package No. 2 is adopted, it can still be amended. That is true.

That is true, but time is running out. And when the 15 minutes that remains on the majority side and the circa 2 hours that remain on our side are used up, we are at the end of the road and all we can do is call up amendments—not debate them—and vote on them.

I hope the Senate is not put into a position of having to vote on the Dole II package with all time having expired and without knowing what is in the package. And so I express the hope that the distinguished majority leader will indicate, No. 1, whether his amendment is going to be a perfecting amendment or whether it is going to be a substitute, and perhaps call it up, let us see what it is, rather than being forced at the end to have the Dole package II revealed after the shadows of the evening have fallen and the curtain of night has been drawn. I hope that he could have the amendment called up now and vote up or down in 30 minutes or vote in an hour but at least we would see the amendment, at least we would have some time in which to develop amendments to it, substitutes perhaps, but otherwise once the time has run out we stand here virtually without any arms at all, not knowing what is in the package, then it is offered, no more time on it and we have no opportunity to write amendments to it.

I think that is a very reasonable request, and it would assure the distinguished majority leader that we would act on his amendment this afternoon. As I say, the distinguished manager on our side, Mr. CHILES, has indicated he would be willing to vote within 30 minutes after that package is up, or make it an hour. I offer to hear the response of the distinguished majority leader on our time.

Mr. DOLE. I did not know that the other side had that concern. I will certainly consider it carefully. I was under the impression that we were going to sequence amendments. That is how I understood the conversation that occurred about 11 or 11:30 a.m. We have been trying to do that, going from one side to the other, on big amendments, important amendments, to see where the sentiment is in the Senate.

Our amendment would be technically a perfecting amendment. We would like to vote on it. But if it were adopted, of course, it is subject to amendment.

Mr. BYRD. Without any time.

Mr. DOLE. Right.

Mr. BYRD. Unless it were adopted within, say, the next hour and we on our side have an hour or an hour and a few minutes remaining. But I hope we will not be into that circumstance. Could the distinguished majority leader indicate whether or not the Dole II amendment provides any increase in defense expenditures over and above the inflation factor? Is it 0-3-3? Is it 1-3-3 such as I had in my budget?

Mr. DOLE. Zero-3-3, 1-year COLA freeze, and a number of things that I think the distinguished Senator from West Virginia will find very attractive.

Mr. BYRD. The Senator from Kansas.

Mr. DOLE. I do not think there is any secret that there are some Senators on our side who think it ought to have more for defense, some think less. It is very difficult, as we have all found out, to put together a package that will last for more than a couple hours. So we have made some accommodations. We understand the concerns of many Senators, and we hope to have a chance to describe the package. I think the package is going to have bipartisan appeal. Maybe you cannot vote against it if you have all been bound in caucus or something to defeat any Republican proposal. But beyond that, I think it has a lot of appeal. We could describe that in detail at the appropriate time, but I think it is still about a $300-billion package. What is it the first year?

Mr. DOMENICI. About 53, 56.

Mr. DOLE. $53 billion, $56 billion the first year. There are some cuts that go beyond a freeze, but I think overall it is a package that deserves support.

We have modified some areas. There could be a modification with Amtrak, could be a modification with the Job Corps, could be a modification with SBA, so it is very, very attractive. I just hope it is attractive enough.

Mr. BYRD. The distinguished majority leader has spoken of a binding caucus. May I assure the majority leader that we do not have binding caucuses on the Democratic side, and there has not been a binding caucus in decades and decades and decades.

But may I say just once more to the distinguished majority leader, I hope that he will reveal his package, call it up and let us see what is in it while we do have a little time in which to modify it, amend it, or whatever, so that the Senate does not find itself at the last minute confronted with a brandnew package and not knowing what the contents are, not having any time for debate, and having to vote on that package without such knowledge, not having any time left on amendments.

I hope the distinguished majority leader will consider doing that and, if he does, as far as I am concerned, I believe we folks on our side would be willing perhaps to vote up or down on the amendment, 30 minutes from now, if the distinguished majority leader will offer his amendment.

Mr. DOLE. Let me indicate again to the distinguished minority leader that I certainly will seriously consider his suggestion. It is still my hope that we finish today. If there are still 22 so-called serious amendments, some on each side—we have a lot of work remaining. Some of these amendments I think we can deal with without going to a rollcall. We certainly will consider the minority leader's recommendation and I will try to get back to the Senator as quickly as I can. I am not certain when that will be.

Mr. BYRD. I thank the distinguished majority leader. May I say—I do not want to belabor the point—if we have 22 amendments to offer—say we only offer 3 or 4—we are offering them to a package that already has been dismantled and riddled and full of holes and they, if adopted by the Senate to that package, would be wiped out by the distinguished majority leader's second package.

So I hope all Senators will consider this on both sides of the aisle. I think we have a right to be able to offer amendments without offering them in the dark and without offering them without debate. I think the American people are entitled to that kind of consideration as we legislate on matters that will impact in many ways very seriously on millions of people in this country one way or the other. I thank the distinguished majority leader, and I yield the floor.

AMENDMENT NO. 82

(Purpose: To increase funds for rural housing)

The PRESIDING OFFICER. The Senator from Maine is recognized.

Mr. COHEN. Mr. President, I sent to the desk an amendment on behalf of myself, Mr. ANDREWS, Mr. BUMPERS, Mr. MITCHELL, Mr. LEAHY, Mr. ROCKEFELLER, Mr. BINGAMAN, Mr. JOHNSTON, Mr. GORE, and Mr. EXON, and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The bill clerk read as follows:

The Senator from Maine [Mr. COHEN], for himself, Mr. ANDREWS, Mr. BUMPERS, Mr. MITCHELL, Mr. LEAHY, Mr. ROCKEFELLER, Mr. BINGAMAN, Mr. JOHNSTON, Mr. GORE, and Mr. EXON, proposes an amendment No. 82.

Mr. COHEN. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

In the pending amendment, do the following:

On page 3, increase the amount on line 12 by $3,100,000,000.

On page 3, increase the amount on line 13 by $3,700,000,000.

On page 3, increase the amount on line 14 by $3,500,000,000.

On page 3, increase the amount on line 18 by $1,500,000,000.

On page 3, increase the amount on line 19 by $1,700,000,000.

On page 3, increase the amount on line 20 by $1,700,000,000.

On page 3, increase the amount on line 25 by $1,500,000,000.

On page 4, increase the amount on line 1 by $1,700,000,000.

On page 4, increase the amount on line 2 by $1,700,000,000.

On page 4, increase the amount on line 6 by $1,500,000,000.

On page 4, increase the amount on line 7 by $3,200,000,000.

On page 4, increase the amount on line 8 by $4,900,000,000.

On page 4, increase the amount on line 12 by $1,500,000,000.

On page 4, increase the amount on line 13 by $1,700,000,000.

On page 4, increase the amount on line 14 by $1,700,000,000.

On page 5, increase the amount on line 3 by $2,300,000,000.

Mr. COHEN. Mr. President, the amendment I am offering is going to restore funding of the Farmers Home rural housing programs at 80 percent of the fiscal year 1985 spending level with a subsequent phase-in of a loan guarantee program.

Mr. DOMENICI. Will the Senator yield for a request with reference to the time?

Mr. COHEN. I yield to the Senator from New Mexico.

Mr. DOMENICI. I do not know how much time we have left—a very small amount.

Mr. COHEN. Mr. President, I indicated that this would probably take a half-hour equally divided.

The PRESIDING OFFICER. Fifteen minutes for the majority, 2 hours 37 minutes for the minority.

Mr. DOMENICI. I have no objection to 15 minutes, if it is all right with the Senator. Can we make that request?

Mr. COHEN. Fifteen minutes on each side.

Mr. DOMENICI. That is what I am requesting.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. COHEN. Mr. President, the amendment I am offering will restore funding to the Farmer's Home Administration rural housing programs at 80 percent of fiscal year 1985 levels and with a subsequent phase-in of a loan guarantee program.

The White House/Senate leadership budget package under consideration today assumes the complete termination of all new program authority for rural housing administered by Farmers Home. It also assumes the immediate transfer of rural housing programs to the Department of Housing and Urban Development, with no corresponding increase in funds and no evidence that HUD can effectively operate a rural housing program.

This proposal is fundamentally unfair to the thousands of poor families across this Nation who live in substandard housing in rural areas, who face a unique set of obstacles in their search for shelter, and who remain isolated from stable financial markets. By terminating housing assistance to the low- and very-low income family in less-populated regions of the country, this budget proposal denies help to the most needy. My aim, and that of many of my Senate colleagues, is to ensure the continuation of this essential program at more modest funding levels, in keeping with our need for fiscal responsibilty.

Mr. President, there is a book written by Carolyn Chute entitled "The Beans of Egypt, Maine." It is about poverty. It is about poor people, how they live, and what kind of pain they have to endure. This book is being read by thousands of people across the country. We have to ask the question, why? I assume it is more than mere curiosity about the poor. I think it is because the American people basically care about what happens to the poor people of this Nation. They do not believe, as some officials, apparently, in this administration recently suggested to the handicapped, that they should be left to work out their adversity and seek some sort of spiritual reconciliation with their Maker, without any assistance from their fellow citizens.

The administration seeks to eliminate the housing program now being served by FHA and transfer it to HUD, with no new funds.

Why do we have a HUD program and a Farmers Home program? HUD is primarily concerned with problems associated with urban living. The Farmers Home program is primarily directed and devoted to programs dealing with rural people. There are different needs. We have different needs in our society.

People in rural areas who are poor and below the poverty level have less income, have less assets, have less borrowing capacity, have local banks with less lending capacity, have less existing housing stock to choose from, have fewer rental units to pick from, have fewer single family units, and they have lower vacancy rates.

The problems associated with rural housing need special attention and should not be fused into one massive program administered by an essentially urban-directed agency.

I notice what kind of premium we place on home ownership in this country. The President is talking about submitting some sort of flat tax or modified tax, some fair tax proposal, to come before this body in the near future. Every tax proposal that has been talked about and proposed, flat or modified, includes what? A deduction for interest payments on home mortgages. That is because the American people still treasure that dream of owning a home.

If we allow the administration proposal, worked out with the Republican leadership, to stand as is, what we are saying is that it is still home ownership for those who can afford it, but no more home ownership for the poor people of this country. They are not going to be entitled to move into single family dwellings. Maybe they can go into some moderate rehabilitation units or rental units with multifamily housing, but no more single-family home ownership for poor people. I do not think that is a statement the U.S. Senate wants to go on record in favor of.

Mr. President, I point out that my amendment would save $3.7 billion in current funding levels over the next 3 fiscal years. It will cost something. It will also cost some $4.5 billion over the next 3 years. If you want to save money, you can terminate any program. If you want to do equity, this is an amendment to vote for, to preserve an opportunity for the rural poor people in this country to have decent housing, be it rental or home ownership.

The demand for rural housing is demonstrated time and time again across this Nation, and the needs that this program meets are obvious to anyone familiar with rural areas. The 1980 census data shows that more than 2.1 million rural families still live in substandard housing nationwide. Almost half of those families are below the poverty level. Over 2.6 million rural households with incomes of less than $10,000 annually pay more than 35 percent of their income for shelter. Of that number, 1 million pay up to 60 percent. Clearly, the need exists for a housing program geared toward the rural poor, and Farmers Home has met that need for over 30 years, providing over 2 million rural households with decent housing, both single family and rental, since 1949.

According to the General Accounting Office, the average income of Farmers Home home loan borrowers is $11,400, and in FmHA rental housing projects, tenants' average income level is $8,000 per year. FmHA has been successful at meeting the needs of those who benefit most from such assistance. And there is no evidence to indicate that the demand for such assistance has diminished in any way.

In the State of Maine, for instance, there are 2,600 applicants for Farmers Home rental housing and a 1-percent vacancy rate in such projects. In addition, there are approximately 1,500 approved applications pending for home loans under the Section 502 Program. The vacancy rate statewide for single family homes is less than 2 percent.

In addition to these important statistics, it is essential that we keep in mind the lending practices in rural areas, where financial institutions have a third less lending capacity, measured by per capita savings, than their urban counterparts. In addition, the GAO found that 83 percent of FmHA home loan applicants had less than $5,000 in assets. These circumstances combine to create stringent borrowing difficulties for the less advantaged rural household, and Farmers Home programs are designed to fill this gap. In some rural counties, an adequate lending institution does not exist, and where none does, it is often not disposed to approve home mortgages for the lower income members of our society.

However, there may be areas of the country in which the private sector can assume a greater share of financing of home loans for lower income households. To this end, my proposal envisions a phase-in in fiscal year 1986 of a Loan Guarantee Program for single family housing. By assuming loan guarantees through private lenders for approximately 7,000 units in the first year, we will be able to determine the feasibility of increased participation of local financial markets in single family home loans made to the poor.

By targeting assistance to those households with annual incomes of 80 percent or less of the area median income, rural housing will continue to be made available to those most in need, and further targeting of home loans will ensure that the very low income benefit from the existing programs. FmHA loans will remain available only after private lending opportunities have been exhausted, maintaining the agency as a lender of the last resort.

There are those who will argue that Farmers Home should not be in the lending business whatsoever, that

there is enough existing housing out there to meet current demand, that we do not need to build new homes in rural areas. Without getting deep into a discussion which more properly belongs within the purview of the Banking Committee, I will only state that these arguments are based on a vacancy rate of 10 percent that is not substantiated by the 1980 census data. That information reveals a vacancy rate of 2.1 percent in rural areas. This is a major discrepancy, and it has made a world of difference in this instance because the administration's arguments for termination are based largely on this statistic. I, for one, cannot support a Rural Housing Program that depends largely on an existing housing/voucher system when the vacancy rate in Maine for single family homes is 1.7 percent.

In many rural areas, it is not feasible to depend purely on existing rental housing. The effectiveness of a Voucher Program depends on the availability of standard housing in rural areas. Overall, the stock of housing in rural areas, particularly for rental units, is largely inadequate. A recent study by the Congressional Research Service stated that the incidence of substandard rental housing in most rural areas is two to three times higher than that of a single family dwelling. In addition, the number of physically inadequate rental housing units in rural areas is twice as high as that in urban areas.

Beyond this, there are few large rental units available in rural areas for family housing. The General Accounting Office found that 60 percent of Farmers Home home buyers consisted of households averaging more than two persons, and the majority were households of three or more persons. There is simply not the stock of standard rental housing in rural areas to meet the needs of poor families through a voucher program.

In rural areas, it is unrealistic and unfair to expect a poor family to "shop around" for rental housing with a voucher in hand and find it in every instance. In addition, it is not always feasible to rely solely on the construction of rental units in the more isolated, less populated towns in rural areas. There need to be sufficient numbers of qualified applicants to make a rental construction program feasible and economical. In smaller towns, such conditions do not exist. In addition, Farmers Home requires all rental projects to include a central water or sewage system, preferably both, which do not exist in many isolated areas of the country. Yet if a rural family is in need of adequate housing, we cannot simply tell them to move away from their hometown and job in the hope of finding rental housing. We must take a good look at conditions in rural areas and not simply depend on a phantom vacancy rate figure in the determination of program structure. My proposal therefore envisions the continuation of the section 502 home loan program with a gradual shift to loan guarantees.

I think there needs to be some reform of our rural housing programs to ensure a greater efficiency in their administration. Recent GAO testimony before the Banking Committee contained a number of findings related to program efficiency that can improve the use of limited Federal dollars. These findings include better outreach efforts by Farmers Home to the very low income households and those living in substandard housing, the reduction of housing costs, an extension of the mortgage period, and the encouragement of borrowers to refinance their loans with private credit. We need to fully explore these issues and see that they are implemented into law in some fashion. In addition, we should study the question of availability of existing housing in rural areas in order to determine the most effective rural housing program. We need to keep in mind, however, the most important finding included in the GAO testimony: That there is still significant need for housing among low-income rural households.

I cannot accept the notion that simply because there is some room for reform we should eliminate the program. I suppose from some people's point of view, this constitutes the ultimate kind of reform. But I don't consider it a reasonable approach if our goal is to provide decent housing in rural areas. On the other hand, if our aim is to deprive the rural population of the opportunity to live in decent homes, then it should be stated up front. We shouldn't hide behind a proposal to shift rural housing programs to HUD, whose record on providing housing assistance to rural areas is by no means a stellar one. In fact, HUD doesn't even keep statistics on its allocations to Farmers Home service areas.

It is important to keep in mind the distinction between rural areas served by Farmers Home and nonmetropolitan areas served by HUD, which are often erroneously substituted for one another. Nonmetro areas lie outside metropolitan statistical areas [MSA's] and may include cities of up to 50,000 residents. Farmers Home service areas include towns of up to 20,000 residents outside of MSA's and of up to 10,000 residents within MSA's if the area is rural in character. Unfortunately, we don't have HUD statistics on its service to rural areas, but we do know that its nonmetro allocations amounted to only 18 percent of its total housing assistance in 1983. These figures lead me to seriously question HUD's ability to adequately serve the rural poor, particularly when it is faced with its own budgetary restrictions.

In order to best serve the rural low-income population, we need to maintain a housing program in the Farmers Home Administration. If we act responsibly today and over the next few months, we can fashion a cost-effective rural housing program that meets the unique needs of our rural population and reduces Federal expenditures at the same time.

Should my amendment be approved, we would be saving about $3.7 billion in outlays over 3 years, a significant reduction by any standard. At the same time, my amendment will provide funds for approximately 65,000 units of housing, both rental and single family, for disadvantaged rural families. In addition to increasing the stock of housing in rural areas, this proposal creates over 80,000 construction jobs.

I do not believe the burden of deficit reduction should be borne by our essential Federal programs, and providing shelter for the poor should certainly be considered one of those programs. Of the 60 program reforms and terminations included in this budget package, the savings achieved through the termination of Farmers Home rural housing programs constitute fully 5 percent of deficit reduction projections for fiscal year 1986. The proposal also constitutes half of the projected savings in fiscal year 1986 of all domestic programs slated for elimination. This can in no way be construed as a fair way of handling our deficit reduction efforts.

I think such a proposal places a disproportionate share of the deficit reduction burden on the millions of rural people across this country who cannot afford decent housing and who look to their local Farmers Home offices for assistance. Changes in the program's effectiveness can certainly be made, but to deny such assistance to the needy in the name of savings is not fair.

I urge my colleagues to support this amendment and ensure the continuation of worthwhile rural housing programs.

Mr. GORTON. Mr. President, will the Senator yield?

Mr. COHEN. I yield.

Mr. BUMPERS. Mr. President, who yields time for the proponents?

The PRESIDING OFFICER. The Senator from Maine controls the time.

Mr. GORTON. Mr. President, I rise to support the amendment to restore funding for rural housing offered by my distinguished colleague, the Senator from Maine.

I support this amendment, knowing fully that it adds back substantial budget authority and outlays to the budget resolution. Because this amendment appears to be a substan-

tial add-back, I want to take just a few minutes to make clear what the steps are that this amendment proposes to reduce the cost of the program, and why the remaining add-back is justified.

In the first place, the amendment proposed by the Senator from Maine begins with a 20 percent across-the-board cut in the various rural housing assistance programs, followed by a 2-year freeze on those programs. So the amendment does make very significant cuts below the level of a baseline—indeed, even below the level of a freeze, in this program.

I want to emphasize to my colleagues that the apparent deficit reduction in the leadership package which arises from termination of the rural housing assistance programs is largely illusory, and arises because of a peculiarity in the Federal budget. Under the Federal budget, the principal of direct loans made is counted as an outlay, just as if it were an expenditure for current expenses. Now obviously this is an anomaly; a reasonable budgeting system should distinguish between loans and expenditures. But ours doesn't, and the leadership proposal has exploited this anomaly to make the deficit reduction from termination of rural housing assistance look much larger than the true net improvement in the Federal fiscal situation. In other words, it is true that the measured deficit is reduced. But not all deficit reduction is created equal, and it is important that my colleagues recognize that just as the improvement in the fiscal situation represented by termination of the rural housing programs is overstated, so also is the deleterious effect of this proposed add-back overstated by the measured deficit numbers.

Nonetheless, Senator COHEN has, wisely, I believe, borrowed a page from David Stockman's book in proposing further that the direct lending rural housing programs be phased out, and replaced by private sector, federally guaranteed loans with subsidized interest rates. This results in being able to achieve a substantial portion of the administration's proposed deficit reduction. I would note that in costing out his amendment, the Senator from Maine made very specific assumptions, as of course he must, about which programs would be converted from direct lending to subsidized interest payments, and at what rate. But it will ultimately be up to the Banking Committee to make structural changes in the program. I believe there may be the possibility to achieve even further deficit reduction by a faster phase-in of the new structure, or by applying to programs to which the Senator from Maine did not assume it would be applied in his cost estimates. But as I say, this is for the Banking Committee to decide, and I am simply stating for the record that I intend to look for further savings wherever possible, regardless of the assumptions used by the Senator from Maine in costing his proposal.

But finally, Mr. President, the main point here is that our decision about rural housing assistance should not be made based on accounting debates or detailed discussion of the program's structure. The fundamental question for us to decide now is simply whether we wish to preserve a Federal program to provide assistance to rural housing. On this score, the answer certainly must be "yes." The programs of the Department of Housing and Urban Development, well-intentioned as they are, simply cannot be assumed to be adequate to cover also the needs of our rural sector, especially at a time when the HUD programs are also being cut. I have visited Farmers Home Administration housing assistance projects in Washington State, and am impressed at what the program is accomplishing. At least in my State, I know we have a well-run program that is filling a vital need.

Mr. President, I intend to vote yes on this amendment, and I urge my colleagues to do the same.

Mr. COHEN, Mr. President, I yield 5 minutes to the Senator from Arkansas.

Mr. BUMPERS. Mr. President, I thank Senator COHEN for offering this amendment.

A moment ago, we voted on UDAG, EDA, and some other programs. There were about six programs included in that vote.

I wanted to eliminate some of those programs, even though rural housing and EDA, both of which I strongly support, were in there. This is one of those times when we have to accept the balance of give-and-take.

I know that the Senator from Mississippi, Judge STENNIS, shares my commitment to this rural housing. He was a cosponsor of the amendment because of that. But for those in this body who may not come from rural States and do not understand the plight of the rural poor and their housing, all I ask is that they listen to a few of these statistics.

First, in 1985, this year, these housing funds will create more than 100,000 jobs in rural America, so that helps the employment rate—1.4 jobs for every housing unit.

Second, for every dollar we spend in this program, we generate $5 in additional income in rural areas.

Third, more than 2 million homes in the South have been upgraded and improved under this program since 1949.

Fourth, the average income of those who qualify for this low-cost housing in rural areas is less than $8,000 a year, and the poverty level is barely under $10,000 a year. These rural houses go to people with less than $8,000 a year in income.

There are more than 500 counties in this countries which do not have a savings and loan office of any kind, but there is hardly a county in any State that does not have a Farmers Home Administration office in it. In my State of Arkansas, for example, we have seven counties that do not have a savings and loan, but every county in my State does have a Farmers Home Administration office in it.

In my State, by the end of 1984, we had constructed 32,630 units under the direct loan program of the Farmers Home Administration, and 1,524 of those loans were made in 1984 alone.

Also, by the end of 1984, 1,702 loans had been made for the development of low-income, multifamily rental units.

Mr. President, in closing, let me say that everyone in this body, I suppose, has his or her own definition of what traditional values mean, or what the traditional values are that we cherish and that we ought to promote in the U.S. Congress and in the Senate. But I want to say one thing: If trying to provide housing for the poorest of the poor in rural America, whose income is less than $8,000, is not a traditional value, there are no traditional values in this country.

The problem I had with the President's package from the very beginning—and I mean this in no partisan way or in denigration of the President—is that it appeared to me that it was terribly discriminatory against rural States and rural areas of this country. The farm program is literally an "adieu farmer" program.

I would rather not cut rural housing in the amount this amendment would cut it, but I am opting for what I think is the very best we can get under the circumstances.

I applaud the Senator from Maine for giving everybody here a chance to extract rural housing from the amendment which many people voted against a moment ago, including me. I think this is essential for the future of the economy and for the social structure of this country.

I yield back such time as I have remaining.

Mr. COHEN. Mr. President, how much time do I have remaining?

The PRESIDING OFFICER. Does the Senator from Maine yield time?

Mr. COHEN. How much time do I have remaining?

The PRESIDING OFFICER. Five minutes.

Mr. COHEN. I yield 2 minutes to the Senator from Maine.

The PRESIDING OFFICER. The Senator from Maine.

Mr. MITCHELL. Mr. President, I rise as a cosponsor of the amendment offered by my colleague from Maine, Senator COHEN, and commend him for

his initiative in this area. The amendment is intended to restore funds to the housing programs operated by Farmers Home Administration.

Farmers Home is, in many rural areas, virtually the only source of financing for affordable housing. And rural housing remains one of the Nation's most urgent priorities.

This amendment will restore funding for rural housing at a level 20 percent below the fiscal year 1985 spending level, and freeze the level of loan authority. It is a cost conscious effort to ensure a minimal amount of funding for rural housing consistent with the need for fiscal restraint in every budget area.

Housing credit was scarce in rural America until the late 1960's and the consequences were highly visible. Substandard housing was the rule, not the exception, in much of rural America. A large scale attack on rural housing blight has been mounted by FmHA since 1965. Over 1 million new or modernized family-owned homes and 250,000 new apartment units have been built in rural communities since then. About a third of these apartment units serve the need of the elderly for low cost rental housing.

The need for decent rural housing still exists. In Maine alone 639 new rental units were built in 1984. Despite this level of construction, most rental projects have only one or two vacancies per year and a waiting list of 2 years of more.

The administration and the Republican leadership package say that rural housing programs must be eliminated. This is, in my judgment, short sighted and false economy. If we allow existing units to deteriorate, the future costs of repacement will far outweigh the current cost of rehabilitation. In many rural areas FmHA is the only source of available credit for young families. Home ownership is central to the promise of America. Decent housing is essential in rural areas as in every other part of this country. A commitment to quality housing for the people of this country was made by the people and this Congress nearly a half century ago.

Great strides have been made but much remains to be done. This proposal would reduce spending for rural housing by 2.3 billion from current levels over 3 years. It provides the bare minimal amount necessary to continue the commitment to housing for people in rural areas, consistent with the fiscal restraints necessary under existing circumstances.

I urge my colleagues to support this amendment. It will help the rural elderly to find a decent place to live; it offers the opportunity for rural Americans to bring their homes up to livable standards; it will help young people achieve the American dream of home ownership.

Thank you, Mr. President, and I thank my colleague from Maine and commend him for his initiative.

The PRESIDING OFFICER. Who seeks recognition?

The Senator from New Mexico.

Mr. DOMENICI. I yield 5 minutes to myself.

Mr. President, I hope my friend from Maine knows that it is not easy for me to get up here and argue against every amendment that puts money back into our compromise and it is not easy for me to get up and talk about programs that have been argued about here for the last 10 or 15 minutes with an awful lot of passion with reference to their objectives and goals.

I would not be here if we did not have an enormous deficit.

But let me tell you there is a lot of misunderstanding about this program.

I first commend the distinguished Senator for saving some money. He cut the program back about 20 percent.

I hope before we are finished that we can do better and clearly I hope to talk with the distinguished Senator from Maine about doing better than we have and yet supplying as much or more housing for rural America as we now supply.

First of all, the whole change in the Federal Government involvement in housing over the last 10 or 15 years as evidenced by Fannie Mae and all the other programs is to set up situations where we help finance housing.

One of the most interesting things is that because we had this program and because it was under Farmers Home Administration, and I hope any program we put back in stays under Farmers Home, but somehow or another because it was there it missed the whole change toward the Federal Government getting out of direct loans and getting into some kind of guarantee program or some kind of voucher program where you could supply people with either financing or the wherewithal to rent or to buy on long term like everyone else does. Somehow it escaped here.

So everyone should know that what we have in this program is the Federal Government totally financing in a direct way rural houses as if there were no banks around, as if there were no lending institutions around, while, as a matter of fact, only in a very small percentage of the counties of this country today are we void of banking systems, of savings and loan institutions, and the like, that could very well finance housing.

But for every one of these homes the full dollar comes right out of the taxpayers' pocket, and we finance over the long term with taxpayers' money in toto.

That is why this program costs $9 billion over the next 3 years when for $9 billion of Federal money we are financing literally many, many times more homes through VA, FHA, and all the other programs through which we finance homes.

So what we were trying to do and what we will continue to try to work with the distinguished Senator from Maine and others who are interested, we will try to move this program, not away from housing in rural America, but toward a modernization of the financing mechanisms so that the taxpayer does not pay for the homes in toto other than in those counties where we do not have a banking system. For the rest of them we will provide some assurance that there will be homes, finance them in a more orderly manner, or supply some other alternative means of assuring those homeowners.

I will put in the RECORD the statistics about available housing in rural America that could be rented. It is startling. There is a huge supply but for 10 or 15 percent of the counties of this country. There are houses that could be rehabilitated that people could occupy in rural America, but we do not have a program to fix them up and rent them nor a voucher system to put people in.

There is a rehabilitation program where you could go into rural America, remodel the homes and then give people 15-year-long lease arrangement where they could pay for it, live in good housing with the American taxpayer paying a very small fraction of what you are paying now.

I would just state for purposes of comparison, and I hope we have a chance to work on this before we are finished, we could keep the 180,000 units of housing that are going into rural America, and operate part of it out of HUD, part of it out of Farmers Home. We could keep that goal and we could have vouchers for rental houses of about $50,000, we could provide an additional program to rehabilitate 10,000 of those houses if we did not have enough housing stock and then provide the poor people with vouchers to live in them. Then we could provide 10,000 units of rental units and 10,000 single family dwelling for those counties that need it. My estimate is that you could do all of that for $1.78 billion.

And we are going to vote here in a while to keep it almost at $9 billion, all in the name of supplying housing to rural America, all in the name of supplying it to the poor people in rural America when, as a matter of fact, many of the poor people who will get the housing I am describing do not even qualify for Farmers Home single family ownership houses.

So I understand that this is a very emotional issue, that there will be some dispute no matter what is said, no matter how many times we meet,

no matter how many times we discuss it.

I am firmly convinced you can save between $6 and $7½ billion in the next 3 years and provide rural America with as many or more houses as they are getting now, some single family construction, leave it all under Farmers Home as we want it to be because they are close to the people, and I hope that we have a chance to work on that with the distinguished Senator from Maine and others who are interested.

I am prepared to answer any questions anyone might have.

I do compliment the Senator for cutting the program 20 percent, but I do submit to you it will not cause any reform. It will still be the same program as we described it, totally, terribly inefficient. It takes an awful long time to help anyone and is extremely costly in comparison to what we could do in other ways.

How much time does the Senator from New Mexico have remaining?

The PRESIDING OFFICER (Mr. DURENBERGER). The Senator has 6 minutes remaining.

Mr. STENNIS. Mr. President, will the Senator yield me 2 minutes? I am in favor of the amendment.

Mr. COHEN. Mr. President, how much time do I have remaining?

The PRESIDING OFFICER The Senator has 3 minutes remaining

Mr. COHEN. Mr. President, I yield 2 minutes to the Senator from Mississippi.

Mr. STENNIS. I thank the Senator.

Mr. President, I take quite seriously anything that the Senator from New Mexico represents to this body, but I believe there is error somewhere here. I have spoken briefly this afternoon about rural housing. It seems to me as though he is including in his remarks a great many that I would not classify as rural housing. I am thinking primarily of the individual dwelling house, an abode for a family, that is being paid for by the owner, the one who lives in it; a dwelling house that finally yields, it may change hands, but it finally yields a good part of the original cost. It is paid back to the Federal Government.

Now, I really could not find any figures that I thought were dependable on that score. But I know it is a very appreciable part of the original investment. It is a subsidy to some degree on the interest that they have to pay.

But this matter, with all deference to the Senator, is an altogether different proposition here that we are talking about of that individual dwelling house and the ownership that is with the one who makes the original contract and he pays back the purchase price.

The PRESIDING OFFICER. The Senator's 2 minutes have expired.

Mr. STENNIS. I thank the Senator again for yielding to me.

The PRESIDING OFFICER. Who yields time?

Mr. DOMENICI. Mr. President, I do not have much time on the resolution or anywhere, but I will yield a couple of minutes to the Senator from Maine.

Mr. COHEN. Mr. President, I just have a couple of comments to make.

Mr. President, as has been indicated on the floor, there are some Members of this body who urged me to seek a freeze at the current level. We talked about a freeze all afternoon. Some said, "Why not a 10-percent reduction to show we were really committed to reducing the deficit?"

I proposed even going further over the advice of the rest of my colleagues, saying, "Let's go as deep as 20 percent."

I will even go further than that. I will even propose a phasein of what Mr. Stockman and the administration wants, and that is to move from direct financing by Farmers Home to a loan guarantee program which picks up $3.7 billion over the next 3 years.

But one of my major objections to what the Senator from New Mexico has proposed is they want to go to a direct guarantee loan program today, not phased in. We have had some experience in the past showing it does not necessarily work that way.

If you are from a very rural, very impoverished area, you may not be able to take a voucher and say, "I would like to move into that house." There may not be a home there. There may not be a bank to give you a loan guarantee.

So, let us try it on a transition basis. Let us take 10 percent and 20 percent the year after and phase it in. At least we would have an opportunity to see whether this program will work.

And we have the GAO. The GAO said there are problems with the efficiency of Farmers Home. Fine. We admit that. Why do we not take the recommendations of GAO? That is why we have that organization, to give us recommendations.

The GAO did not recommend to eliminate the program. They did not recommend to put it over to HUD. They said that we can do better with better outreach programs. We can have more targeting of this particular program. We can do a number of things.

But we totally ignored that. Let us eliminate that program because of a philosophical objective of saying no more single family homeownership for the poor.

If you talk about fairness in this particular program, 5 percent of all the deficit reduction comes out of one program right here. Five percent of all the money we are talking about comes out of here. It is 50 percent of all the cuts that we are making in the domestic program that comes out of this one program. How is that for fairness? That is really fair.

But we have the number of $8 or $9 billion in deficit reduction, and that makes it fair, according to calculations of the administration.

Mr. President, I think that the issue is pretty clear. If you want to continue the goal of providing some decent housing for the poor people of this country who live in the rural areas, then you will support the amendment. If you are opposed to that, then you will vote against it.

Mr. President, I ask unanimous consent that Senator RIEGLE be added as a cosponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LEAHY. Mr. President, I rise in support of the amendment of the Senator from Maine.

The need for rural housing is well documented. The Farmers Home Administration [FmHA] rural housing programs are often the only means by which rural low-income families and the elderly are able to afford safe, adequate, and sanitary housing.

FmHA rural housing provides the housing safety net for the rural poor. The overwhelmingly majority of tenants assisted under the section 515 program have incomes below $6,000. Under the section 502 program, more than a third of the families had incomes below $10,000, the average income is $11,400. The law requires that all those assisted under section 502 must be low income and 40 percent of section 502 funds go to families with very low incomes.

Eliminating rural housing assistance would have a devastating impact on my State of Vermont. Last year 476 low-income families were able to buy decent housing under the 502 subsidized home ownership programs. An additional $4 million was provided to Vermonters for rental assistance. Under present interest rates and market conditions, the FmHA rural housing programs are the only source of loan money for these low-income Vermonters.

Much has been made of the use of rental vouchers in rural areas. The fact is that across our Nation adequate rural rental housing is in short supply. According to the Congressional Research Service, the incidence of poor quality rental housing in rural areas is significantly higher than that of rental housing in urban areas or owner occupied housing overall. We continue to need the rural housing production program administered by FmHA.

If you do away with FmHA administered rural housing assistance, disadvantaged rural people will have nowhere else to turn. The problem of unsanitary and unsafe housing may not be as easily identifiable in rural areas as it is in urban areas, but I can assure you that it exists. Travel the back

roads of Vermont with me and you will find it.

Low income rural people deserve the opportunity to buy or rent adequate housing. This amendment would continue the efforts begun under President Franklin Roosevelt to provide adequate shelter for those who are illhoused. I strongly support the amendment.

Mr. CRANSTON. Mr. President, I support Senator COHEN's amendment to Senate Concurrent Resolution 32, the first concurrent resolution on the budget for fiscal year 1986. This amendment would reestablish the rural housing programs that the budget resolution would eliminate.

Senate Concurrent Resolution 32 would abolish all new construction activity for the rural housing programs that the Farmers Home Administration operates. In addition, this resolution would transfer the responsibility of providing housing in rural areas to HUD. In the future, HUD would be required, under its housing voucher program, to allocate one-half of all new section 8 and section 202 units to rural areas. As a result, low-income families in both urban and rural areas would receive only one-half of the assistance they receive currently.

Senator COHEN's amendment is a pragmatic response to the twin objectives of maintaining rural housing programs and of reducing the budget deficit. His amendment would reestablish the rural housing programs that the Farmers Home Administration operates, but it would reduce the fiscal year 1985 funding levels of these programs by a total of 25 percent. As a result, my colleague's amendment would save the Federal Government $513 million in fiscal year 1986.

I support this amendment on rural housing. In 1985, California should receive almost $122 million in rural housing assistance, which will assist developers to construct about 10,000 single family and multifamily housing units for low-income families. My colleague's amendment would allow low-income families in California to continue to benefit from rural housing programs in fiscal 1986.

Over the last few years, rural housing programs have absorbed their fair shares of funding reductions to decrease the budget deficit. Between 1980 and 1985, the number of units assisted under the rural housing programs have decreased by 30 percent. If rural housing programs were eliminated, then the Federal Government would be asking low-income Americans to bear an unfair portion of budget cuts.

I believe the Federal Government has a responsibility to work with the private sector to ensure that all Americans have access to adequate, affordable housing. Since my colleague's amendment would protect this beneficial relationship by reestablishing rural housing programs, I urge the Senate to pass this amendment.

● Mr. LEVIN. Mr. President, I supported the amendment offered by the distinguished Senator from Maine and urge my colleagues to do likewise. The amendment would make a cut of 20 percent in rural housing programs administered by the Farmers Home Administration. This is not a small sacrifice—especially when one considers that these programs have already been reduced by as much as 30 percent by inflation. However, the amendment does leave these important programs in existence unlike the proposed budget. The budget would eliminate the Farmers Home Administration programs and shift responsibility for rural housing to the Department of Housing and Urban Development with no commensurate accommodation in that department's budget. This is in effect a massive cut to both the rural and urban housing programs. The Department of Housing and Urban Development has already sustained large cuts and will have to scale down its current efforts in urban areas. If rural programs are added to HUD's responsibilities it is unlikely that they will be handled as effectively as they were under FmHA.

This is an important point. When we talk of eliminating the Farmers Home Administration housing programs, we are talking about eliminating some of the most efficient, well managed, and productive of government programs. These programs are insured loans, not grants, and the section 515 Rental Housing Program, for example, has a default rate of less than 1 percent. A default rate of less than 1 percent is better than most commercial lending institutions. The FmHA offices are there in the rural communities. Their district offices know the towns and can provide the necessary oversight, continuity, and efficiency—things which HUD would not be able to duplicate. In addition, most HUD programs assume an existing stock of rental housing—something which does not exist in most rural areas.

There is certainly a need for rural housing programs. As the Congressional Research Service points out, there are over 2 million rural American households which are illhoused, many without proper plumbing or kitchen facilities. Many of those in need of rural housing assistance are senior citizens of fixed incomes.

Our Nation's rural areas are already dealing with farm failures and unemployment. Elimination of the FmHA rural housing programs would be an unfair sacrifice from already overburdened regions. The amendment is a reasonable approach to reducing the deficit without completely abandoning this program.●

Mr. COHEN. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The Senator from New Mexico has 3 minutes remaining.

Mr. DOMENICI. Mr. President, the distinguished Senator from Maine is fully aware of my feelings. I did not approach this program with the idea that I have some philosophical or ideological bent against supporting housing in rural America in any special way like direct loans. That does not strike my conscience as being something that is wrong.

Quite to the contrary, I have proposed that we continue part of it. In fact, in my statement a while ago I mentioned 10,000 units in transition. Frankly, as I said before, I will not support anything that does not assure rural America 180,000 dwellings a year that people that now qualify for these homes can either own or occupy and for literally thousands who do not even qualify for this kind of direct home financing could qualify for.

Mr. COHEN. Will the Senator yield for a question?

Mr. DOMENICI. Yes.

Mr. COHEN. I believe the Senator indicated 180,000 units for rural housing. I believe that really includes all the housing in the HUD Program.

Mr. DOMENICI. That also includes the HUD housing that is nonmetropolitan.

Mr. COHEN. And the metropolitan.

Mr. DOMENICI. And the metropolitan units. The Senator is correct. That is including what we have there now. The Senator is correct.

But we are not trying to have less housing in rural America, less units available, in any proposal you are trying to work out with the Senator from New Mexico.

Mr. COHEN. Could I inquire, is the Senator suggesting that he favors a gradual phasein of the loan guarantee program?

Mr. DOMENICI. I do not know what "gradual" means. Sure, I favor moving into it in a way that makes sure that we are indeed supplying the housing while we get away from almost exclusively using tax dollars for direct financing without banks for the housing.

Mr. COHEN. That is exactly what the Senator from Maine and others are proposing; namely, a gradual phase-in of the guarantee loan program as opposed to direct financing to see if it works, so we can examine it on a yearly basis, plus a fairly substantial reduction from 85,000 units to 65,000 units on rentals and home ownership. That is a pretty good reduction to take.

Mr. DOMENICI. I am confident we could work out something that we would not have to spend much money on and do just as good by the rural American people who are using these or I would not be here arguing with the Senator.

The PRESIDING OFFICER. All time has expired on the amendment.

Mr. DOMENICI. Mr. President, I yield myself 30 seconds on the resolution.

I am confident that the Senate is going to accept this amendment. I am not prepared to. I think it is a mistake because I think we can do much better.

But I hope we can continue to talk about the subject because I think we can indeed provide housing at a much lower cost than the amount contained even in the amendment and certainly more than is in the present program.

The PRESIDING OFFICER. All time having expired, the question is on agreeing to the amendment of the Senator from Maine [Mr. COHEN]. The yeas and nays have been ordered and the clerk will call the roll.

The legislative clerk called the roll.

Mr. SIMPSON. I announce that the Senator from North Carolina [Mr. EAST] and the Senator from California [Mr. WILSON] are absent due to illness.

Mr. CRANSTON. I announce that the Senator from Nebraska [Mr. EXON] is absent because of illness.

The PRESIDING OFFICER. Are there any other Senators in the Chamber who wish to vote?

The result was announced—yeas 47, nays 50, as follows:

[Rollcall Vote No. 59 Leg.]

YEAS—47

Andrews	Gorton	Metzenbaum
Baucus	Grassley	Mitchell
Biden	Harkin	Moynihan
Bingaman	Hart	Murkowski
Boren	Hawkins	Pryor
Bumpers	Heflin	Riegle
Burdick	Hollings	Rockefeller
Byrd	Inouye	Sarbanes
Chiles	Johnston	Sasser
Cohen	Kennedy	Simon
Cranston	Kerry	Specter
D'Amato	Leahy	Stafford
Eagleton	Levin	Stennis
Ford	Long	Stevens
Glenn	Matsunaga	Zorinsky
Gore	Melcher	

NAYS—50

Abdnor	Goldwater	Nickles
Armstrong	Gramm	Nunn
Bentsen	Hatch	Packwood
Boschwitz	Hatfield	Pell
Bradley	Hecht	Pressler
Chafee	Heinz	Proxmire
Cochran	Helms	Quayle
Danforth	Humphrey	Roth
DeConcini	Kassebaum	Rudman
Denton	Kasten	Simpson
Dixon	Lautenberg	Symms
Dodd	Laxalt	Thurmond
Dole	Lugar	Trible
Domenici	Mathias	Wallop
Durenberger	Mattingly	Warner
Evans	McClure	Weicker
Garn	McConnell	

NOT VOTING—3

East	Exon	Wilson

So the amendment (No. 82) was rejected.

Mr. DOLE. I move to reconsider the vote by which the amendment was rejected.

Mr. DOMENICI. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BYRD addressed the Chair.

The PRESIDING OFFICER. The minority leader is recognized.

Mr. BYRD. Mr. President, may we have order in the Senate?

The PRESIDING OFFICER. The Senate will be in order. Senators will clear the well and return to their seats. Staff will clear the aisles. Senators will kindly clear the well.

The Democratic leader is recognized.

Mr. BYRD. Mr. President, I ask unanimous consent that the time required for getting order in the Senate not be charged to anybody.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BYRD. I ask unanimous consent, Mr. President, that there may be a 10-minute discussion at this point between the distinguished majority leader and myself without the time being charged to the resolution.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BYRD. Mr. President, we are in this peculiar situation. How much time remains for this side?

The PRESIDING OFFICER. There are 2 hours and 16 minutes remaining on the Democratic side.

Mr. BYRD. May I say to my colleagues on both sides of the aisle that out of the total of 50 hours which was on the resolution at the beginning, we only have a little over 2 hours left. All of it is on this side of the aisle. If the other side calls up an amendment, then the other side is entitled under the act to half of the time on that amendment but that half will come out of the time on this side. We are also confronted with the dilemma which results from the distinguished majority leader—and I am not wanting to quarrel or cast any reflection; I could not if I wanted to, and I would not if I could, but we are in the situation here now where we do not know what the contents of the package are which Mr. DOLE will later offer at some point. We do not know what the contents are except for the two or three items which the distinguished majority leader revealed to us just a little earlier in the evening. So at some point when time is exhausted on this side in a little more than 2 hours from now we will be in this situation: No debate can occur except by unanimous consent on this resolution or on any amendment that is called up. If the distinguished majority leader calls up his package amendment at that time, there is no time for debate thereon. He cannot even explain to us on this side or to his colleagues on that side what the contents of the package are, nor would we be in a position to offer amendments to that package until it is before the Senate. So here we are in a situation where we are offering amendment after amendment to the Dole package that was adopted by a vote of 50 to 49 a few days ago and which has by now become riddled and dismantled almost beyond the point of recognition.

So, Mr. President, that is the dilemma. I ask the distinguished majority leader if he would be willing to offer his package now so that we can see it, because as it is, every amendment that is being adopted is later going to be wiped off if the next substitute package is agreed to. So actually we are not only giving our time and burning up our time but we are wasting time. So, Mr. President, I wonder if the distinguished majority leader would call up his package now and let the Senate begin to debate it and amend it and with the understanding that 30 minutes from the time the amendment is laid before the Senate—or 1 hour, whatever—we vote on the distinguished majority leader's amendment.

If he would not be willing to do that, would he put the Senate in recess so that the time we have remaining will not be running? We need that little bit of time if we hope to offer any meaningful amendments to the package that we can all understand, because we soon will not be able to explain the contents of an amendment.

Would the distinguished majority leader be willing to do one of two things: One, put the amendment before the Senate and let us debate it and begin to amend it, and have a vote on adoption, up or down, of that amendment, say, at 6:30 p.m. today? Or, second, if he would not be willing to do that, would he put the Senate into recess until such time as he is willing to put his amendment before the Senate, so that we could all see it, read it, understand it, debate it, and amend it if we can?

Mr. DOLE. As to the first request, the vote on the amendment by 6:30, if it survived, there would be no additional amendments then?

Mr. BYRD. No, we are not saying that. We are entitled, in any event to offer amendments to that package. If it is agreed to, it still can be amended. There would be no time for debate of any amendment.

I assume that if the amendment is called up, we would have some time and perhaps could offer one or two amendments and be ready to vote. But we would be willing to vote at 6:30 p.m. today.

Under the Budget Reform Act, that package, even if adopted, would be open to amendment without debate.

Amendments could be called up and voted on.

Mr. DOLE. As I understand, there are amendments pending right now that Members are willing to offer, and I am not quite ready to offer the perfecting amendment. We are working on it.

I do not really believe that the original amendment has been riddled. Only one amendment has been adopted today, and that was on nutrition.

Mr. CHILES. Amtrak.

Mr. DOLE. And Amtrak. A $10 billion amendment was defeated, a $7 billion amendment was defeated, and a $4.5 billion amendment was defeated; and there were bipartisan votes on all those. So I think there is a fairly strong feeling that we are working our will.

One reason we are a little reluctant to trot out the perfecting amendment is that we are trying to reflect the views of some of the votes on the Senate floor. My view is that if you lose nutrition by 2 to 1, you should go back and take a look at the package, and we are going to do that and maybe make a modification. If you lose Amtrak by 12 votes, some would say if we were to reconsider it we might have 50 votes. You go back and take a look at Amtrak. Maybe you do not terminate it. Maybe there is another way to address it.

It is not that we are trying to gain any unfair advantage, but we have amendments on this side that I understand Members are prepared to offer. We would like to proceed with those. I know that the statute provides that the time runs against the remaining time of the distinguished minority leader. I assume that we can get consent to have additional time, but I would prefer not to do that at this time.

Mr. CHILES. What about the recess?

Mr. DOLE. As long as we have amendments on this side that Members want to offer, I do not know why we should go into recess. I should like to finish the measure this evening. There are a number of requests that we do so.

We had hoped to have a vote on the perfecting amendment by 9 p.m., and then it is open to further amendment.

I must say that we did not see the package of the distinguished minority leader until 10 minutes after it was offered, and I am willing to match that or better. In fact, we are prepared not only to give the distinguished minority leader the language, but also a summary of the proposal. I think there was some indication earlier today to some Members on both sides of the highlights of the package, and I am prepared to give that to the distinguished minority leader at this time.

Mr. BYRD. The distinguished majority leader talks about how the minority leader did not reveal the contents of his amendment until 10 minutes before it was offered. This situation is different.

Once that amendment was offered, we had equal time to debate it. Half of it came from our side, and half from the majority leader's side. But here we are confronted with the situation in which the distinguished majority leader, once the time has run on this side of the aisle, can call up his amendment, and we cannot debate it. All we can do is try to amend it, with no talk on either side, and vote. In the meantime, we are shooting at a package which has already been amended several times.

I was not just referring to one or two amendments adopted today, but amendments to that package were adopted several days ago. So it has been amended serveral times.

I hope the majority leader will move to put the Senate into recess until he is ready to call up his amendment, so that we will have some time to debate that particular amendment when it is called up.

I ask the distinguished majority leader if he will recess until, say, 6:30, call up his amendment, and we can vote on it 30 minutes thereafer.

Mr. DOLE. I might make a counterproposal: that when we call up the perfecting amendment, we obtain unanimous consent that there be debate on the perfecting amendment, notwithstanding the time situation, for a period of 40 minutes or 1 hour equally divided.

Mr. BYRD. Let us set the time now.

Mr. DOLE. The time it is going to be called up?

Mr. BYRD. The time it is going to be called up, and the time for a vote on it.

Mr. DOLE. The minority leader was concerned that the time would run out, and if time ran out before the amendment were offered, we would ask unanimous consent that there be an hour of debate.

I am not prepared to say precisely when I would offer the perfecting amendment because, very honestly, much depends on how the amendments that are pending are disposed of. We have about 11 amendments on this side. I hope they are not all offered. I do not know how many are on the other side.

Mr. BYRD. I say to the distinguished majority leader that we are ready to quit offering amendments prior to action on the distinguished Senator's package No. 2. No more amendments. Just call up the Senator's amendment, take 30 minutes on it, equally divided, or 40 minutes, or 1 hour equally divided, and vote on the amendment. No more amendments before the distinguished Senator calls up his amendment. And it is a perfecting amendment. He just said so. That means that it cannot be amended until it is adopted.

Mr. DOLE. Perhaps we could suggest the absence of a quorum for a few minutes. [Laughter.] I will check with my Parliamentarian.

Seriously, I would prefer not to have a recess, and I would prefer not to offer the amendment now. I prefer to go ahead. We have amendments pending. Let them be debated quickly and stack some votes and have 10-minute rollcall votes starting about 6:30; then, when the time has expired, offer the amendment and agree to an hour of debate, 30 minutes on each side.

The PRESIDING OFFICER. The leadership will be advised that the 10 minutes allotted for the uncounted time is expired.

Mr. BYRD. I thank the Chair.

Mr. President, I also point out that before any Senator on that side can get time for debate, we have to yield him time or withhold it. If the Senator on that side wishes to stand up and offer an amendment, he can do so, and the time will run equally both sides, chewing up our remaining time. If he does not offer an amendment, then he cannot debate unless we yield him time.

I do not want to get into that kind of a situation. I hope the majority leader would recess the Senate for, say, 1 hour, call his amendment up when we come back in after that hour, and take 30 minutes or an hour and vote up or down. There will be no amendments from this side at this point to the package that will be wiped out in all likelihood by the second Dole package.

Mr. DOLE. The only problem I see with that is if in fact, and I am not certain whether there are votes to adopt the perfecting amendment, but if it were adopted, then we could start this all over again. It would be an hour and—how much time is remaining?

The PRESIDING OFFICER. Two hours and fifteen minutes.

Mr. DOLE. We could offer 25 amendments in 2 hours and 15 minutes. In any event in this way you would be able to discuss what you were offering and someone might be persuaded by that.

But I know the minority leader. We can delay a number of ways here. But I am not prepared to offer the perfecting amendment or to announce or to indicate a precise time when we would be prepared to do that.

Mr. BYRD. Mr. President, I wish to make it clear we are not suggesting that we will not call up amendments, if we get to that point. When the distinguished majority leader calls up his package and it is acted on, then we may be constrained to offer some amendments. Right now, we are willing to delay the offering of any amendment if the majority leader will place his package before the Senate,

let all on both sides take a look at it, scrutinize it, and study it, and offer amendments to it and vote on that package within 1 hour, 45 minutes, or 30 minutes.

Mr. CHILES. We are using our time right now.

Mr. BYRD. Yes.

Mr. DOLE. I do not have any time to use.

Mr. CHILES. We are using our time.

Mr. BYRD. Mr. President, I ask unanimous consent, and I apologize to the majority leader for doing this, but this is a situation that not only impacts against this side and its responsibility and duty and right to offer amendments to the vehicle that the Senate will be voting on at some point rather than to this faceless amendment that has been adopted by a vote of 50 to 49. I ask unanimous consent that the Senate stand in recess for 1 hour and that upon the reconvening of the Senate the distinguished majority leader be recognized to call up his package No. 2 amendment.

Mr. DOLE. Mr. President, I object.

The PRESIDING OFFICER. Objection is heard.

Mr. DOLE. Mr. President, we are not unmindful of the concerns of the distinguished minority leader and I want to indicate——

Mr. BYRD. Mr. President, all the time is coming from this side. I will yield to the distinguished majority leader. How much time does he want?

Mr. DOLE. One minute.

Mr. BYRD. Two minutes.

The PRESIDING OFFICER. The majority leader is recognized for 2 minutes.

Mr. DOLE. The majority leader would indicate to all my colleagues that, you know, we want to finish this tonight. We are prepared to make that effort. I can say in all honesty I am not certain whether we have the votes to prevail or not. On that basis and under those circumstances I think it is better that we continue offering amendments if the Members on this side could be recognized. The last amendment came from this side. I assume the next amendment, in logic, would come from the minority side. But I would hope we would be permitted to offer amendments. I will return to my office immediately, continue to work on the perfecting amendment, which is fairly near completion, but I do not think I should indicate at this time the precise time we will offer it and then have a lot of time following for other amendments to be offered.

I still believe we can debate the amendment if time has expired and maybe reach some agreement with the distinguished minority leader on an amendment process if the time had expired. I am not trying to shut out amendments. In fact, we can offer amendments right now.

Mr. KASTEN. Mr. President, will the minority leader yield 1 minute?

Mr. BYRD. No, I do not yield for that purpose. If the distinguished majority leader has a minute or so, then he can yield.

The PRESIDING OFFICER. The minority leader is correct. There are 30 seconds remaining on the time yielded to the majority leader.

Mr. DOLE. Those 30 seconds I am happy to yield.

Mr. KASTEN. Mr. President, I suggest maybe we can start working out of this. I wish to remind Senators that we have an amendment that has two Republican sponsors but has three Democratic sponsors on refugees. We have already come to a kind of tentative agreement of 10 minutes on each side, and it has a strong kind of bipartisan effort, and it would be 20 minutes from now we would have a vote. That might be one way to use the time.

The PRESIDING OFFICER. The time yielded by the minority leader to the majority leader has expired.

Mr. BYRD. Mr. President, we are faced with this situation now. Time is running. Under the 50 hours time is running against our side.

So, Mr. President, I ask unanimous consent that the Senate stand in recess for 30 minutes.

Mr. DOLE. Mr. President, I object.

The PRESIDING OFFICER. Objection is heard.

Mr. BYRD. I apologize to the distinguished majority leader for making that request. Ordinarily, the majority leader has the power and the duty to set the schedule of the Senate, and I would not have made such a request except because of the extenuating circumstances.

Mr. DOLE. Mr. President, let me say to the distinguished minority leader I understand that perfectly, I think.

The PRESIDING OFFICER. Who yields time?

Mr. SYMMS addressed the Chair.

Mr. BYRD. Mr. President, I do not yield time and I apologize to the distinguished Senator.

Mr. President, I ask unanimous consent——

Mr. SYMMS. Mr. President, I send an amendment to the desk.

Mr. BYRD. I do not yield for that purpose.

The PRESIDING OFFICER. The minority leader has the floor.

Mr. BYRD. Mr. President, I ask unanimous consent that there be a 10-minute time limitation on any amendment to be equally divided beween the two sides until——

Mr. CHILES. One hour.

Mr. BYRD. All right, for 1 hour.

Mr. JOHNSTON. Mr. President, reserving the right to object, are those votes going to be stacked?

Mr. CHILES. We can stack them during the hour.

Mr. BYRD. We can stack them all to occur during the hour.

Mr. CRANSTON. I wish to suggest a shorter time than 10 minutes on each side. There are 10 or 11 amendments on that side, 12 or 13 on this side which eventually will be offered. That will consume all the time. At the rate of 10 minutes we will not have any time remaining.

I suggest that it be not more than 5 minutes evenly divided on each side.

Anyone who has an amendment can certainly explain it with the help from others in 2½ minutes, and then we will have time to reserve for future consideration of future matters brought before the Senate.

Mr. BYRD. Mr. President, I put that in the form of a request and with the additional provision that amendments must be germane and relevant to the resolution.

Mr. SYMMS. Mr. President, I object.

Mr. BYRD. And that this amendment terminate at the end of 1 hour.

Mr. SYMMS. I object.

The PRESIDING OFFICER. Is there objection?

Mr. SYMMS. I object.

The PRESIDING OFFICER. Objection is heard.

Mr. SYMMS addressed the Chair.

The PRESIDING OFFICER. The Senator from Idaho.

Mr. SYMMS. Mr. President, I send an amendment to the desk.

Mr. CRANSTON. May I ask a question of the Senator from Idaho?

Mr. BYRD. Mr. President, I do not yield for that purpose.

Mr. DOLE. Mr. President, would the distinguished minority leader yield to me?

Mr. BYRD. I yield to the distinguished majority leader for how long——

Mr. DOLE. One minute.

Mr. BYRD. For 1 minute for a statement only or a question.

Mr. DOLE. Mr. President, in my view the original proposal for 5 minutes on a side for the next 1 hour is satisfactory.

I do not know if we will use 5 minutes on a side. But that could dispose of at least six amendments, if there are six amendments out there, serious amendments.

I would hope the distinguished minority leader might renew that request and I hope we might accept that request.

Mr. BYRD. Mr. President, I ask unanimous consent that during the next 1 hour Senators may offer amendments that are germane and relevant, with the time limitation of no more than 10 minutes to be equally divided and that rollcall votes be stacked to occur at the end of that hour; that the first rollcall be a 15-minute rollcall and that the successive amendments be limited to 10 minutes on a rollcall; and that the Chair, when the 10 minutes are consumed and when the 15

minutes are consumed on the amendments respectively, that the Chair announce the vote and that there be no additional time for Senators who may be absent.

The PRESIDING OFFICER. Is there objection?

Mr. BYRD. The rollcalls will be 10 minutes, except for the first one.

Mr. KENNEDY. Mr. President, reserving the right to object, and I do not want to object. I would like to ask whether it is the understanding of the minority leader that at the end of that period of time the majority leader then is going to lay down the new alternative. Is that the understanding? Is that part of the unanimous-consent agreement or not?

Mr. BYRD. I would like to add that. I am just hoping that the distinguished majority leader, out of the goodness of his heart and the realization that these are very reasonable requests, will have his package ready to offer.

Mr. KENNEDY. Mr. President, I have been ready, willing, and able, as the leader knows, to offer amendments on this proposal for a number of days. I understand there are Members on both sides prepared to do likewise.

I would not want to, by not objecting, suggest that at the end of the hour that that is going to be the end of any possibility of offering amendments.

Mr. BYRD. That will not end the possibility of offering amendments.

Mr. KENNEDY. And also have an understanding that we are going to be able to get rollcall votes on those amendments, as well.

Mr. BYRD. We could get rollcall votes on them.

Mr. KENNEDY. I have no objection.

Mr. DOLE addressed the Chair.

The PRESIDING OFFICER. The majority leader.

Mr. BYRD. Mr. President, I have the floor and I yield to the distinguished majority leader.

Mr. DOLE. Mr. President, I reserve the right to object. It seems to me the one problem, on reflection of this, is we are going to have a lot of votes on a lot of amendments, and I assume they will come in any event at the end of the process. Now they will come with 5 minutes of debate on each side. We could have as many as six votes. Then there still is another hour left, and that would be 12 votes. I assume that when the time expires, there could still be 12 votes.

It seems to me we have been making pretty good progress without an agreement. Even though I suggested earlier this might provide some relief for Members who have amendments, I think I shall object.

The PRESIDING OFFICER. Objection is heard to the request of the Democratic leader.

Mr. BUMPERS addressed the Chair.

Mr. BYRD. Mr. President, I yield—how much time does the Senator need,

Mr. BUMPERS. Mr. President, I reserve the right to object.

Mr. BYRD. An objection has already been made.

Mr. President, I move that the Senate stand in recess for 30 minutes, and I ask for the yeas and nays.

The PRESIDING OFFICER. Is there sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. BYRD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The Clerk will call the roll to ascertain the presence of a quorum.

The assistant legislative clerk called the roll, and the following Senators answered to their names:

[Quorum No. 7 Leg.]

Abdnor	Gore	Metzenbaum
Andrews	Gorton	Mitchell
Armstrong	Gramm	Moynihan
Baucus	Grassley	Murkowski
Bentsen	Harkin	Nickles
Biden	Hart	Nunn
Bingaman	Hatch	Packwood
Boren	Hatfield	Pell
Boschwitz	Hawkins	Pressler
Bradley	Hecht	Proxmire
Bumpers	Heflin	Pryor
Burdick	Heinz	Quayle
Byrd	Helms	Riegle
Chafee	Hollings	Rockefeller
Chiles	Humphrey	Roth
Cochran	Inouye	Rudman
Cohen	Johnston	Sarbanes
Cranston	Kassebaum	Sasser
D'Amato	Kasten	Simon
Danforth	Kennedy	Simpson
DeConcini	Kerry	Specter
Denton	Lautenberg	Stafford
Dixon	Laxalt	Stennis
Dodd	Leahy	Stevens
Dole	Levin	Symms
Domenici	Long	Thurmond
Durenberger	Lugar	Trible
Eagleton	Mathias	Wallop
Evans	Matsunaga	Warner
Ford	Mattingly	Weicker
Garn	McClure	Zorinsky
Glenn	McConnell	
Goldwater	Melcher	

The PRESIDING OFFICER. A quorum is present.

The question is on agreeing to the motion of the Senator from West Virginia. On this question, the yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. SIMPSON. I announce that the Senator from North Carolina [Mr. EAST], and the Senator from California [Mr. WILSON] are absent due to illness.

Mr. CRANSTON. I announce that the Senator from Massachusetts [Mr. KENNEDY] is necessarily absent.

I further announce that the Senator from Nebraska [Mr. EXON] is absent because of illness.

The PRESIDING OFFICER. Are there any other Senators in the Chamber who wish to vote?

The result was announced—yeas 45, nays 51, as follows:

[Rollcall Vote No. 60 Leg.]

YEAS—45

Baucus	Ford	Melcher
Bentsen	Glenn	Metzenbaum
Biden	Gore	Mitchell
Bingaman	Harkin	Moynihan
Boren	Hart	Nunn
Bradley	Heflin	Pell
Bumpers	Hollings	Proxmire
Burdick	Inouye	Pryor
Byrd	Johnston	Riegle
Chiles	Kerry	Rockefeller
Cranston	Lautenberg	Sarbanes
DeConcini	Leahy	Sasser
Dixon	Levin	Simon
Dodd	Long	Stennis
Eagleton	Matsunaga	Zorinsky

NAYS—51

Abdnor	Gramm	Murkowski
Andrews	Grassley	Nickles
Armstrong	Hatch	Packwood
Boschwitz	Hatfield	Pressler
Chafee	Hawkins	Quayle
Cochran	Hecht	Roth
Cohen	Heinz	Rudman
D'Amato	Helms	Simpson
Danforth	Humphrey	Specter
Denton	Kassebaum	Stafford
Dole	Kasten	Stevens
Domenici	Laxalt	Symms
Durenberger	Lugar	Thurmond
Evans	Mathias	Trible
Garn	Mattingly	Wallop
Goldwater	McClure	Warner
Gorton	McConnell	Weicker

NOT VOTING—4

East	Kennedy
Exon	Wilson

So the motion that the Senate stand in recess for 30 minutes was rejected.

AMENDMENT NO. 83

(Purpose: To add additional funds for Federal impact aid under the Act of September 30, 1950 (Public Law 874, 81st Congress))

The PRESIDING OFFICER. The majority leader is recognized.

Mr. DOLE. I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The bill clerk read as follows:

The Senator from Kansas [Mr. DOLE], for Mr. ABDNOR, proposes an amendment numbered 83.

Mr. DOLE. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

Mr. BYRD. Mr. President, I object for the moment, most respectfully.

The PRESIDING OFFICER. An objection is heard.

The amendment is as follows:

In the pending amendment, do the following:

On page 3, increase the amount on line 12 by $200,000,000.

On page 3, increase the amount on line 13 by $200,000,000.

On page 3, increase the amount on line 14 by $200,000,000.

On page 3, increase the amount on line 18 by $100,000,000.

On page 3, increase the amount on line 19 by $100,000,000.

On page 3, increase the amount on line 20 by $200,000,000.

On page 3, increase the amount on line 25 by $100,000,000.

On page 4, increase the amount on line 1 by $100,000,000.
On page 4, increase the amount on line 2 by $200,000,000.
On page 4, increase the amount on line 6 by $100,000,000.
On page 4, increase the amount on line 7 by $200,000,000.
On page 4, increase the amount on line 8 by $400,000,000.
On page 4, increase the amount on line 12 by $100,000,000.
On page 4, increase the amount on line 13 by $100,000,000.
On page 4, increase the amount on line 14 by $200,000,000.
On page 19, increase the amount on line 21 by $200,000,000.
On page 19, increase the amount on line 22 by $100,000,000.
On page 20, increase the amount on line 6 by $200,000,000.
On page 20, increase the amount on line 7 by $100,000,000.
On page 20, increase the amount on line 15 by $200,000,000.
On page 20, increase the amount on line 16 by $200,000,000.
On page 42, decrease the first amount on line 6 by $187,000,000.
On page 42, decrease the second amount on line 6 by $148,000,000.
On page 42, decrease the amount on line 7 by $188,000,000.
On page 42, decrease the amount on line 8 by $174,000,000.
On page 42, decrease the first amount on line 9 by $209,000,000.
On page 42, decrease the second amount on line 9 by $205,000,000.
On page 45, decrease the amount on line 21 by $187,000,000.
On page 45, decrease the amount on line 22 by $148,000,000.
On page 45, decrease the first amount on line 23 by $188,000,000.
On page 45, decrease the second amount on line 23 by $174,000,000.
On page 45, decrease the amount on line 24 by $209,000,000.
On page 45, decrease the amount on line 25 by $205,000,000.
On page 52, increase the amount on line 1 by $200,000,000.
On page 52, increase the amount on line 3 by $200,000,000.
On page 52, increase the amount on line 4 by $200,000,000.

Mr. BYRD addressed the Chair.

The PRESIDING OFFICER. The Democratic leader is recognized.

Mr. BYRD. I yield myself 2 minutes on the amendment.

Mr. President, I ask the distinguished majority leader if it would be possible to cut the time, say, to 10 minutes, to be equally divided, on this amendment, and then vote on the amendment.

Mr. DOLE. I am prepared to make that request.

Mr. BYRD. I will be happy to yield to the distinguished majority leader for that purpose.

May I ask one further question while I have the floor: The distinguished majority leader made a proposal earlier, and I wonder if he would make it again. It had to do with laying down his amendment tonight and having an hour of debate on it and then voting on it. Am I correct?

Mr. DOLE. That is correct.

Mr. BYRD. Would the distinguished Senator require that the 2 hours and 2 minutes which we did have on this side be utilized for the calling up of amendments during that 2 hours and prior to the hour in which he would lay his amendment before the Senate?

Mr. DOLE. That would be my hope, that then we would have an hour on the amendment, and it would be subject to amendment after that.

As I indicated to the distinguished minority leader, if someone felt strongly about an amendment, that they were being shut out and not able to debate it, I would be prepared at that time to propound a request that if there were an amendment on that side or this side, to get a little time for those amendments. Obviously, I prefer no amendments at all.

Mr. BYRD. I want to make sure I understand.

Is the distinguished majority leader saying he would propound a request that upon the expiration of the 2 hours plus that is on this side, he would lay down his amendment, that we would have 1 hour on that amendment, equally divided, and then vote on the amendment, and that it will all occur today?

Mr. DOLE. The only part I have some trouble with is about that vote.

Mr. BYRD. Well, the distinguished majority leader is honest and forthright, and we admire that.

Suppose we go ahead with the 10 minutes on this amendment and vote on it. In that time, the distinguished majority leader could talk with his colleagues and with us, if he would like, and be prepared, I hope, to offer a request that would see the Senate debate his amendment this evening for an hour, and then vote up or down today.

Mr. DOLE. Let me explore that. I assume that there will be a rollcall vote on this amendment. We will have about 25 minutes.

Mr. President, I ask unanimous consent that the time on this amendment be limited to 10 minutes equally divided.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BYRD. I thank the distinguished majority leader.

The PRESIDING OFFICER. Who yields time?

Mr. DOLE. I yield 5 minutes to the distinguished Senator from South Dakota.

Mr. ABDNOR. Mr. President, in fiscal year 1982, pursuant to the Omnibus Reconciliation Act of 1981, funding for impact aid was reduced more than 40 percent. In contrast, other major education programs sustained a 7- to 10-percent cut. Even though we have succeeded in restoring program funds by some $200 million in the last 2 years. The fiscal year 1985 appropriations level for this program is still more than 10 percent less than that provided in fiscal year 1980.

Last year Congress reaffirmed its support for impact aid by reauthorizing the program for 4 years at a higher level of funding. The measure approved by Congress and signed into law by the President also continued support for category "B" students. Now, under the budget proposal before us, federally impacted schools are facing a further cutback of 22 percent, with the assumption that category "B" and impact aid construction will be eliminated entirely.

Is this fair? Once again, impact aid is being asked to take the lion's share of the cuts. While other elementary and secondary education programs are being frozen, federally impacted school districts are being asked to absorb a 22-percent reduction. Since impact aid is current-year funded, this reduction will be felt during the next school year. And let me remind my colleagues that 1985-86 teacher contracts have already been renewed in most, if not all, of the 50 States.

Mr. President, though the overall Federal role in education may be open to some debate, I believe the Federal Government has an undeniable responsibility to assist school districts in replacing the revenue lost due to Federal activity.

Most of my colleagues acknowledge the need to provide continued support for category "A" students—those whose parents both work and live on Federal property. But there is a great deal of confusion over category "B" students—those whose parents either work or live on Federal property, but not both.

In my own State of South Dakota, we have an SAC installation. Military dependents attend the Douglas School System which, before the base was built consisted of about a dozen students who attended classes in a 1-room schoolhouse. Now enrollment is near 2,500, and that number may grow to more than 3,000 as the B-1 bomber program is phased in over the next 2 years. At present, 65 percent of those enrolled are "A" students, about 14 percent are "B" children. Since there is not sufficient housing on base, virtually all the new students will be "B" students. The vast majority of these will live in trailers clustered around the base—the school system receives about $50 per year in property tax on each of these trailers.

Also, due to the Soldiers and Sailors Relief Act, most of the military families stationed at Ellsworth and other installations throughout the United States, are not legal residents of the States in which they are based. Thus, they do not pay State and/or local income tax, personal property tax, and so on. Further, many of these families

shop on base, thereby avoiding paying any State and/or local sales tax, not to mention the fact that they are not contributing to the local economy to the same extent as do their private sector counterparts.

Let me issue a word of caution to any of my colleagues who may believe that support for category "A" students is not threatened. The budget drafters have assumed that $152 million reduction in budget authority will result in the elimination of category "B" payments and impact aid construction. However, since this assumption is not binding, we may end up funding these components of the program at the expense of category "A" or another education program.

Mr. President, the present administration and the Congress have scaled back the impact aid program. The amount of support provided for category "B" children is—at a maximum—one-third of what it used to be. If we agree to even further reductions in impact aid, we will be pulling the rug out from under the local schools which serve the children of our service men and women—at far less cost to the Federal taxpayer than Department of Defense schools.

No more than 8 months ago, the President signed a measure which reauthorized impact aid, including category "B" payments. The distinguished ranking member of the Subcommittee on Education, Arts and Humanities, Senator PELL, and 42 of our colleagues joined me in the effort to restore funding for this vital program. I urge my colleagues to stand by this commitment to our Nation's federally impacted schools and vote to restore necessary funding for impact aid.

Mr. President, I have waited some time for the opportunity to offer this amendment. I think it is absolutely imperative that this amendment be adopted.

My colleagues have heard me make a case for impact aid numerous times over the past several years.

Last year, the distinguished ranking minority member of the Subcommittee on Education, Arts, and Humanities, Senator PELL, and 42 of our colleagues joined me in an effort to reauthorize impact aid, including category "B" payments, and we succeeded in doing so.

Less than 8 months ago, the President signed a measure which reauthorized the Impact Aid Program for 4 years at a higher level of funding.

However, now, under the Senate-White House package, federally impacted schools, which have already taken more than their fair share of cuts, are again being asked to take an additional cutback category "B" and construction assistance. I do not think this is fair. Once again, impact aid is being asked to take more than its fair share of the cuts.

The program is for the welfare and the betterment of our young people who attend school in areas where tax revenue is limited due to Federal activity. We are talking about providing a basic educational program for these students. This program puts a chair under a child and a book in his hand. If this program is cut, basic services to thousands of students will be threatened.

Under the Soldiers and Sailors Relief Act, the Federal Government has exempted military personnel. We have from many State and local taxes. The proposal before us freezes other elementary and secondary education programs at the fiscal year 1985 appropriations levels. I want to emphasize this point. But that is not the case with impact aid. And impact aid is every bit as important.

The leadership has now offered to restore about half the cut in impact aid but half is not enough. We are talking about providing a basic program for Native Americans, military dependents, and children who reside in federally subsidized housing for whom we have a responsibility. I do appreciate the fact that the leadership has attempted to address the problem by restoring half the cuts but anything less than a freeze will not be sufficient—and it will not be fair.

I remind my colleagues that as per pupil costs increase, so do impact aid entitlements. Thus, even if we freeze the program at the fiscal year 1985 level we will still create hardships in many federally impacted districts. A 10½-percent cut may cause serious disruption in many more federally impacted schools.

Mr. President, we may debate the extent to which the Federal Government should provide financial support for education. With respect to impact aid, the Federal Government has an undeniable responsibility to compensate local school districts for revenues lost due to Federal activity.

It seems ironic to me that despite the unique justification for impact aid, we find that it is always expected to absorb more than its fair share of the cuts.

I urge my colleagues to stand by our commitment of last year to our Nation's federally impacted schools and vote to restore necessary funding for impact aid.

Mr. FORD. Mr. President, will the Senator yield for a question?

Mr. ABDNOR. I yield.

Mr. FORD. Does this cover category "B"?

Mr. ABDNOR. Yes, my amendment restores funding for category "B."

Mr. FORD. Will the distinguished Senator add my name as a cosponsor of his amendment?

Mr. ABDNOR. I will be happy to do so.

Mr. President, I ask unanimous consent that the names of the following Senators be added as cosponsors: Mr. FORD, Mr. PELL, Mr. BOREN, Mr. BAUCUS, Mr. SARBANES, Mr. MELCHER, Mr. DECONCINI; Mr. MOYNIHAN, Mr. BINGAMAN, and Mr. EXON.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ABDNOR. I thank the majority leader for yielding.

Mr. PRESSLER. Mr. President, I support the impact aid budget amendment and commend my distinguished colleague for proposing it. We have worked together in Congress for years to maintain this essential program.

Impact aid is vital to my home State of South Dakota. I am deeply concerned by the persistent attempts to eliminate part B payments to impacted schools. Those attempts are the first step toward the total elimination of the Impact Aid Program.

Many schools in South Dakota and many other States across the country desperately need impact aid funds. Yet, every year we go through the routine process of battling administration proposals to eliminate payments for B students.

These repeated threats of major budget cuts impose havoc on the administrators, teachers, and students at schools receiving impact aid dollars. Once again we must restore the part B funding for impact aid.

There are over 50 federally impacted school districts in my home State of South Dakota which receive Federal funding. Many of these schools are located on or near Indian reservations. Those of you who have visited any of South Dakota's Indian reservations know first hand the necessity for continued impact aid funding. The reservations are the most economically depressed areas of our Nation. I cannot comprehend slashing dollars which educate Indian children.

My colleague and I have been through many impact aid budget battles in the past, and I am sure we will face many more in the future. But I urge all of our colleagues to support the Impact Aid Program once again for the sake of all the children who attend schools in federally impacted areas. This is a clear case of Federal responsibility.

Mr. KENNEDY. I regret that I am unable to support the amendment offered by my distinguished colleague from South Dakota to restore funds for the Impact Aid "B" Program.

Mr. President, let me say that I am, and for many years have been, a strong supporter of the Impact Aid Program. The Federal Government Has a continuing obligation to provide financial assistance to schools on which it has placed a burden. Impact aid goes to school districts which serve children of parents employed of Fed-

eral or Indian property or where there is a sudden and substantial increase in school enrollments as a result of Federal activities.

Section 3(b) authorizes payments for children who reside on Federal property or whose parents work on Federal property or are in the uniformed services. In the last Congress, we reauthorized this program, after it was scheduled to be phased out by the end of fiscal year 1984, under the provisions of the Omnibus Budget Reconciliation Act of 1984.

The Impact Aid B Program goes to school districts serving children whose parents live or work on Federal property. Thus, in many cases, those school districts receive local and State tax revenues from parents not living on the Federal facility. Under fiscal year 1985 appropriations, school districts receive only 60 percent of B already making the transition away from the B program.

These are difficult times in which difficult choices must be made. I have made the difficult choice to vote against the continuation of this program.

Mr. President, I realize that many school districts will suffer some hardship as a result of the termination of the B program, including a number of disticts in my State. I am hopeful that the States will provide additional assistance to those areas. In Massachusetts, I understand that the Governor's education reform package will go a long way to address those needs. I urge the States to respond similarly to assist schools that may be affected by elimination of this program.

Mr. NICKLES. Mr. President, if each Member of the Senate had to take a quiz on what A and B students are, chances are most of us would say that that's what we want our kids to be and what we wish we had been—A and B students. In that respect, I want to commend the Senator from South Dakota and a handful of others in the Senate who have some understanding of the Impact Aid Program. It is certainly not an easy one to understand. Stated simply, however, it is a program established by Congress to reimburse school districts for tax dollars that are lost because of the presence of federal property in that district. Land on which a military base or Indian reservation sits is not producing any taxes for that district but is producing children for the school system to educate. Thus, a burden is placed on that district. Starting back in 1950, Congress understood that the Federal Government has a legitimate role in reimbursing schools for this lost revenue.

I am pleased to support the amendment by Senator ABDNOR which maintains the B students for the next 3 years. As my colleagues know, the budget resolution assumes savings which would occur if B students were no longer funded in the program. Although the assumptions are not binding—meaning Congress would not have to implement this particular proposal if they chose to achieve the savings through other programs or changes—the actual savings are mandated by the package which is before us today. The amendment by Senator ABDNOR would change the figures mandated in the budget resolution so that no savings are gained through the elimination of the B students in the Impact Aid Program. The budget package had assumed a $527 million savings with the shutdown of the B program in impact aid.

The proposal that is before us would impose a 34-percent cut on the Impact Aid Program. Elimination of the B category—which represents those students whose parents work but do not live on Federal property—would devastate many school districts. Not only would this mean the loss of $527 million in B payments to schools, but it would also mean the loss of some A payments as well. To receive any impact aid funds from the Federal Government, a school has to show that 3 percent or more of its students are impacted, that is, their parents live and/or work on Federal property. To come up with that 3 percent, B's have been included in that count. Some school districts who receive a significant amount of A payments risk losing the whole pot of A and B money if the Federal Government decides that B students should no longer exist. In Oklahoma, elimination of the B students will mean a loss of $1.3 million in A payments alone, and another $1.7 million lost in B student payments. All together, this would mean a loss of about $3 million to the State of Oklahoma if B students are terminated. The point is, this is not just of concern to B States. This will affect almost all States that receive any impact aid money, be it in the form of A or B payments.

The Impact Aid Program is one which has already undergone substantial cuts in the last several years, particularly with regard to the B payments. If we are going to talk about everyone taking their fair share of the cuts, then impact aid is certainly one program which has taken its share of the reductions in spending. In 1980, the program was funded at $792 million. The next year, the program was funded at $706 million, a 10-percent cut. Then, an additional 10-percent cut was taken in 1982. Only in the last 3 years has there been any increase in the Impact Aid Program, and even that is only a restoration of $127 million when reductions since 1980 have totaled $255 million. The amendment before us today would still leave the Impact Aid Program short of what it was in 1980 by $68 million.

I would like to close my arguments supporting this amendment by stating that it is my belief that the Impact Aid Program is one of the most proper and legitimate functions of the Federal Government. There is absolutely no way for local school districts in Oklahoma to recover the revenues which are lost from the presence of Federal property. Our military bases and Indian lands are quite substantial in value and size. Although Federal property is the main drawing card for the bulk of the population in those areas, it is the very reason why no taxes are garnished to pay for those additional children which enter the school system. Surely, the compensation of school districts for this Federal presence is a legitimate function of the Federal Government.

The PRESIDING OFFICER. Who yields time?

Mr. ABDNOR. Mr. President, we go through this every year. I think we all know the issue. I could stand here and give a long dissertation, but it is not necessary.

The Federal Government should certainly provide financial assistance to local schools in impacted areas. We will be negligent if we refuse to do so. I urge all Senators to remember that in the past this program has had tremendous support. Once again, I think it is worthy of support, and I urge my colleagues to support my amendment.

Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. BYRD. Mr. President, who has control of time in opposition to the amendment?

Mr. DOMENICI. I do.

The PRESIDING OFFICER. The Senator from New Mexico, if he opposes the amendment.

Mr. DOMENICI. I oppose the amendment.

Mr. CHILES. I thought the unanimous-consent agreement was 5 minutes to that side and 5 minutes to this side. We are under a unanimous-consent agreement now.

Mr. DOMENICI. Somebody deserves 5 minutes to speak in opposition. It was 5 minutes on each side. If the Senator wants 5 minutes, I will give him 5 minutes, so long as I have 5 minutes in opposition. That means 15 minutes instead of 10. It is all right with me.

Mr. CHILES. What is the unanimous-consent agreement?

The PRESIDING OFFICER. The agreement simply specified 10 minutes, evenly divided, and that means between the mover of the amendment and the manager of the bill, if he is opposed to the amendment.

The Senator from New Mexico.

Mr. DOMENICI. I will use only 2 minutes. This has happened to me two or three times already, so I do not want to keep the Senator from Florida from speaking in favor of it.

Mr. President, this will add about $391 million in new expenditures to the proposal before the Senate.

This is impact aid part B. We have been trying to get rid of it not for a few years but since Dwight Eisenhower was President of the United States. We do not seem to be able to do that.

I would say that in 1984 we began to restrain this program in a reasonable manner and things were working quite well. I do not know what happened in 1985, but there seemed to be some more money around somewhere, so it was up beyond the 1984 level, which seemed to be satisfactory with everyone.

We have proposed to the distinguished Senator that this matter could be resolved at the 1984 level of funding, which is $246 million out of the $391 million.

That is what we think is a fair settlement of this case, and it would adequately take care of the students.

The distinguished Senator and our good friend insists on full funding at the 1984 level.

Many programs of the Federal Government are not going to be fully funded in this budget. We think this is one that we should begin to cut back.

So I repeat, we are more than willing to go to the 1984 level, which is about three-quarters of the way from taking the program and zeroing it out to the level that the distinguished Senator desires.

That can be redone by the appropriators to focus it on the most needy areas of the country.

It just seems to this Senator if we are not willing at this time to at least stay on the 1984 path, which was beginning to restrain and target the money, then obviously we are back fully funding.

The PRESIDING OFFICER. The Senator's time that he yielded to himself has expired.

Mr. DOMENICI. Mr. President, I yield the remainder of the time to the distinguished Senator from Florida.

Mr. CHILES. I yield the 3 minutes back.

Mr. CHAFEE. Mr. President, will the Senator yield?

Mr. DOMENICI. Does the Senator yield it back to the Chair or——

The PRESIDING OFFICER. Who yields time?

Mr. DOMENICI. I do not believe I yielded back all the time. I thought the Senator wanted to speak. I only spoke for 2 minutes and I was giving the Senator 3 minutes of my time.

Mr. CHILES. The Senator gave it to me. I was giving it back.

Mr. DOMENICI. I understand.

I was trying to be nice. The Senator wants to hurry this clock up.

Does the distinguished Senator desire to speak?

Mr. CHAFEE. I wish to ask a question of the Senator from New Mexico.

Mr. DOMENICI. I yield to the Senator.

The PRESIDING OFFICER. The Senator from Rhode Island is recognized.

Mr. CHAFEE. Mr. President, it is my understanding that under the B people living off the bases who, therefore, are in houses that are paying taxes or else they are paying rent and the landlord is paying taxes to the local community, that is a typical B situation, is it not?

Mr. DOMENICI. The Senator is correct.

Mr. CHAFEE. So that is not a case of children living on a base going to the local school and thus the parents of the students paying no taxes. That is not the situation.

Mr. DOMENICI. The Senator is correct. That is part A which we are not touching.

Mr. CHAFEE. We are not touching the A's; only dealing with the B's whose parents in some form, either through paying rent to the landlord or through home ownership themselves are paying taxes.

Mr. DOMENICI. The Senator is correct.

Mr. ABDNOR. Mr. President, will the Senator yield?

Mr. DOMENICI. I yield.

Mr. ABDNOR. I would like to comment on that.

Yes, some parents of so-called B children pay some property tax, or rent housing from those who do. But as I stated previously, under the Soldiers and Sailors Relief Act, these same families are not subject to many other State and local taxes.

If we taxed those folks as we do their private sector counterparts, we would not have need for category B payments. But Federal Government precludes State and local governments from doing so.

Under the Soldiers and Sailors Relief Act, military personnel may be legally domiciled in a State other than that in which they are based. Thus, they do not pay State or local income tax. They do not pay personal property tax. And, since they do their shopping in the commissaries on the base, they do not pay State and/or local sales tax, nor do they contribute to the local economy.

The airbase in my State is out in the country. Before the base was built, it consisted of a one-room schoolhouse. Many of the families stationed at Ellsworth live in small trailer homes and they pay only a minimal property tax.

Let us not have the Soldiers and Sailors Relief Act. Let them pay the taxes like everyone else.

Mr. DOMENICI. Mr. President, how much time do I have remaining?

The PRESIDING OFFICER. Fifteen seconds.

Mr. DOMENICI. Mr. President, I think we could solve some of the problems. We could move the base. Then there would not be so much a burden.

But in any event, I really believe we are making a very excellent proposal. I am sorry my friend cannot accept it.

We are ready to vote.

The PRESIDING OFFICER. All time has expired.

The question is on agreeing to the amendment of the Senator from South Dakota. On this question, the yeas and nays have been ordered and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. SIMPSON. I announce that the Senator from North Carolina [Mr. EAST] and the Senator from California [Mr. WILSON], are absent due to illness.

Mr. CRANSTON. I announce that the Senator from Missouri [Mr. EAGLETON] is necessarily absent.

I further announce that the Senator from Nebraska [Mr. EXON] is absent because of illness.

The PRESIDING OFFICER. Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 47, nays 49, as follows:

[Rollcall Vote No. 61 Leg.]

YEAS—47

Abdnor	Hart	Murkowski
Andrews	Hawkins	Nickles
Baucus	Heflin	Nunn
Biden	Heinz	Pell
Bingaman	Hollings	Pressler
Boren	Inouye	Pryor
Bradley	Johnston	Riegle
Bumpers	Kerry	Sarbanes
Burdick	Lautenberg	Sasser
Chiles	Levin	Specter
D'Amato	Long	Stennis
DeConcini	Mathias	Stevens
Dodd	Matsunaga	Trible
Ford	Melcher	Warner
Glenn	Mitchell	Zorinsky
Gore	Moynihan	

NAYS—49

Armstrong	Gorton	McConnell
Bentsen	Gramm	Metzenbaum
Boschwitz	Grassley	Packwood
Byrd	Harkin	Proxmire

Domenici	Laxalt	Thurmond
Durenberger	Leahy	Wallop
Evans	Lugar	Weicker
Garn	Mattingly	
Goldwater	McClure	

NOT VOTING—4

Eagleton	Exon
East	Wilson

So the amendment (No. 83) was rejected.

Mr. DOMENICI. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. STEVENS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 84

(Purpose: to restore the revenue forgone appropriation for nonprofit groups and preferred mailers to Congressional Budget Office baseline levels in fiscal years 1986, 1987, and 1988 with the exception of national publications using the second class, in-county rate)

Mr. METZENBAUM. Mr. President, on behalf of myself and Senators BURDICK, RIEGLE, SARBANES, MATSUNAGA, BYRD, EAGLETON, PROXMIRE, ROCKEFELLER, INOUYE, KERRY, KENNEDY, ZORINSKY, and FORD, I send an amendment to the desk, and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Ohio [Mr. METZENBAUM], for himself and Senators BURDICK, RIEGLE, SARBANES, MATSUNAGA, BYRD, EAGLETON, PROXMIRE, ROCKEFELLER, INOUYE, KERRY, KENNEDY, ZORINSKY, and FORD, proposes an amendment numbered 84.

Mr. METZENBAUM. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 3, increase the amount on line 12 by $313,000,000.

On page 3, increase the amount on line 13 by $2,027,000,000.

On page 3, increase the amount on line 14 by $601,000,000.

On page 3, increase the amount on line 18 by $313,000,000.

On page 3, increase the amount on line 19 by $2,027,000,000.

On page 3, increase the amount on line 20 by $601,000,000.

On page 3, increase the amount on line 25 by $313,000,000.

On page 4, increase the amount on line 1 by $2,027,000,000.

On page 4, increase the amount on line 2 by $601,000,000.

On page 4, increase the amount on line 6 by $313,000,000.

On page 4, increase the amount on line 7 by $2,340,000,000.

On page 4, increase the amount on line 8 by $2,941,000,000.

On page 4, increase the amount on line 12 by $313,000,000.

On page 4, increase the amount on line 13 by $2,027,000,000.

On page 4, increase the amount on line 14 by $601,000,000.

On page 15, increase the amount on line 8 by $298,000,000.

On page 15, increase the amount on line 9 by $298,000,000.

On page 15, increase the amount on line 17 by $1,905,000,000.

On page 15, increase the amount on line 18 by $1,905,000,000.

On page 16, increase the amount on line 1 by $366,000,000.

On page 16, increase the amount on line 2 by $366,000,000.

On page 32, increase the amount on line 17 by $15,000,000.

On page 32, increase the amount on line 18 by $15,000,000.

On page 33, increase the amount on line 2 by $122,000,000.

On page 33, increase the amount on line 3 by $122,000,000.

On page 33, increase the amount on line 11 by $235,000,000.

On page 33, increase the amount on line 12 by $235,000,000.

On page 41, decrease the amount on line 19 by $1,359,000,000.

On page 41, decrease the amount on line 21 by $366,000,000.

On page 49, decrease the amount on line 5 by $1,359,000,000.

On page 49, decrease the amount on line 7 by $366,000,000.

On page 52, increase the amount on line 1 by $817,000,000.

On page 52, increase the amount on line 3 by $856,000,000.

On page 52, increase the amount on line 4 by $894,000,000.

Mr. METZENBAUM. Mr. President, I ask unanimous consent that the time on this amendment be limited to 10 minutes—5 minutes for the proponents and 5 minutes for the opponents.

Mr. ARMSTRONG. Mr. President, reserving the right to object, before we enter into that unanimous-consent agreement, can we first have order in the Chamber? Second, can we note the subject matter of the amendment?

The PRESIDING OFFICER. The Senator is correct. There will be order in the Chamber.

The Chair could not hear the unanimous-consent request. So perhaps both the amendment and the unanimous-consent request can be repeated.

Mr. METZENBAUM. Mr. President, I ask unanimous consent that the time on this amendment be limited to 5 minutes under my control, and 5 minutes under the control of the distinguished chairman of the Budget Committee.

The PRESIDING OFFICER. Is there objection?

Mr. DOMENICI. Mr. President, reserving the right to object, I am going to ask that my time, which I might have in opposition, be under the control of the distinguished senior Senator from Alaska, Senator STEVENS. I ask that there be 5 minutes on this side to Senator STEVENS, and 5 minutes to the proponent.

The PRESIDING OFFICER. Is there objection?

Mr. BYRD. Mr. President, reserving the right to object, will the distinguished Senator add to his request that upon the expiration or yielding back of the time, that a vote will occur——

Mr. METZENBAUM. I do, indeed.

Mr. BYRD. On the amendment, without any intervening debate?

Mr. METZENBAUM. Included in the 10 minutes unanimous-consent request, immediately thereafter, I ask unanimous consent that there will be a rollcall, and the yeas and nays will be added without any intervening time or action.

Mr. DOMENICI. Reserving the right to object, and I might object——

The PRESIDING OFFICER. The Chair advises the Senator may not provide in a unanimous-consent request that there be a rollcall vote.

Mr. BYRD. I did not ask that. Did the Chair misunderstand me?

The PRESIDING OFFICER. The Senator from Ohio.

Mr. METZENBAUM. Mr. President, I included that as a part.

Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there an objection to the unanimous-consent request?

Mr. BYRD. Mr. President, reserving the right to object, I do not want to quarrel with anyone or take time. But unless we provide for a vote immediately without any intervention whatsoever, there could be a quorum call, there could be debate on something else, and there could be a motion to go into executive session or whatever. So may we have that added?

Mr. DOMENICI. I object.

Mr. BYRD. If the Senator wishes to table that, he may so move.

Mr. DOMENICI. I just object. We have 5 minutes on each side.

The PRESIDING OFFICER. Objection is heard.

Mr. DOMENICI. We have been doing it very nicely. That is enough for us.

The PRESIDING OFFICER. The 5 minutes to each side was part of the original request, and that has been objected to as well.

Mr. DECONCINI. Have the yeas and nays been ordered?

The PRESIDING OFFICER. The yeas and nays have not been ordered.

Mr. METZENBAUM. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. METZENBAUM. Mr. President, it is my understanding that the manager of the bill attempted to get 5 minutes limitation on each side with the understanding that thereafter there would be no intervening activity, and that due to the fact that the yeas and nays have been asked for, that we will proceed to a vote. I again repeat that request, and I am not certain why my friend and colleague from New Mexico would object to that because I thought that was the way we were proceeding.

Mr. DOMENICI. I object.

The PRESIDING OFFICER. Objection is heard.

Mr. METZENBAUM. I understand, then, there is no time limit.

The PRESIDING OFFICER. The Senator from Ohio has 30 minutes under his control on this amendment, and the Senator from New Mexico has 30 minutes.

Mr. METZENBAUM. Mr. President, this amendment will restore $817 million to the Postal Service to continue reduced rates for charities, religious organizations, small newspapers, most of which are in rural areas, libraries and free mail for the blind.

Mr. DOMENICI. Will the Senator yield so that I might indicate to the Chair that I designate the distinguished Senator from Alaska to control the time in opposition?

Mr. METZENBAUM. At the conclusion I will be glad to.

My amendment would not continue the current postal subsidy for major national for profit magazines like Newsweek, People, Time, and U.S. News.

Mr. President, the budget before us makes deep cuts in health care programs, child welfare programs, housing programs, education programs, all of the social service programs which serve the poor, the infirm, the young and the elderly living in this country.

The President has called upon the voluntary organizations to pick up the slack. He has said to them, "Will you please pitch in and do that which Government is not doing?"

Unless we restore the postal subsidy to keep reduced mail rates for nonprofit organizations, we will be saying to these very same voluntary organizations that, "You will have to help balance the budget of this country."

I say to the Members of the Senate there is no logic to this. There is no logic in trying to balance the budget on the backs of the voluntary organizations of this country. The budget before us eliminates the postal subsidy for nonprofit groups. This is the worst kind of penny-wise pound-foolish approach to budget balancing.

I ask, does it make sense to balance the budget by making the American Association for Retired Persons pay an additional $6.5 billion in additional postal rates, or the American Lung Association an additional $6 million?

Mr. DOLE. Will the Senator yield to me?

Mr. METZENBAUM. Without losing my right to the floor, I do.

Mr. DOLE. I would like to propound a unanimous-consent request on this amendment that there be 10 minutes equally divided. Will the Senator agree?

Mr. METZENBAUM. From this point on, yes.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. DOMENICI. Mr. President, I designate Senator STEVENS to handle the time in opposition.

Mr. METZENBAUM. The Salvation Army will be charged $2,600,000 if they lose the subsidy; the March of Dimes, $7,800,000; the National Catholic Development Conference, $39 million; the National Easter Seal Society, $5.25 million, and all church groups of all denominations will be losing their postal subsidy.

Mr. President, striking the postal subsidy will send postal rates for nonprofit groups through the roof.

I would point out that the issue is simple. Without this amendment mail costs for nonprofit groups would increase by more than 100 percent, for small newspapers the rates would skyrocket by as much as 300 percent—and those are the rural newspapers that are so active in so many areas—and rates for libraries would increase by at least 75 percent.

Mr. President, how much time does the Senator from Ohio have remaining?

The PRESIDING OFFICER. The Senator has 4 minutes 40 seconds remaining.

Mr. METZENBAUM. I yield 3 minutes to the distinguished Senator from North Dakota.

Mr. BURDICK. Mr. President, I rise in support of the amendment which my colleague from Ohio and I are offering concerning the issue of revenue foregone.

As many of you know, the President, in his budget package, has called for the virtual elimination of this funding. I cannot agree with such a plan and if past indications are any measure of how the Senate feels today, most of you cannot agree to it either. As I have said before, at a time when the administration is calling on nonprofit organizations to pick up where Federal funding is leaving off in terms of assisting the poor and disadvantaged of our country, it makes no sense at all to eliminate the means by which these groups are able to help these people. By this, of course, I mean the postal subsidy. I would be hard pressed to identify a group which is more representative of vital public interests than the nonprofit mailing community. Health care, medical research, aid to the truly needy, education, our libraries, the arts, veterans affairs—these are just a few of those that I could name that are dependent in large measure on nonprofit mail and, of course, the revenue foregone subsidy which allows this to be possible.

The Metzenbaum-Burdick amendment restores $817 million to the fiscal year 1986 budget. Even this amount of funding will result in increases between 20 and 40 percent to many of the mailers in question. So, to those of you who might say that everyone must sacrifice—there is sacrifice here too. However, the President's plan would have resulted in increases as high as 276 percent in some cases. Our proposal is a fair one. The President's was not.

Easter Seals would rather use their limited resources to buy a wheelchair for an elderly patient than pay doubled or tripled postage costs. The March of Dimes would rather send out 1,000 letters on preventing birth defects than just 500 letters. The Disabled American Veterans would rather provide a veterans' child with a college scholarship than pay increased postage costs with its funds. These are the kind of direct services that we are talking about here that will be sharply curtailed if the President's budget proposal in this area is allowed to stand. These services exist in each Member's State. I urge all of you to think about this very carefully and I urge you to give Senator METZENBAUM and myself your support.

The PRESIDING OFFICER. Who yields time?

Mr. STEVENS. Mr. President, I yield myself 4 minutes.

Mr. President, I recommended to the majority leader and the distinguished Senator from New Mexico, the chairman of the Budget Committee, an amendment to the package that they were working on that would restore the funding for the purpose of insuring subsidies to small rural newspapers, to the blind and handicapped, libraries, school classroom publications, and social, philanthropic, religious, and cultural organizations. That would require roughly $100 million added to the budget. But it would still mean that we would be saving $700 million in fiscal 1986 and over $2 billion in the 3-year period.

I urge that Members oppose this amendment. We need to do something about the problem that is involved.

Let me point out that in terms of the comments that have just been made, that the cost of third class, nonprofit mailing was $450 million in 1984. It is projected to be $717 million this year, and will be well over $1 billion in 1987. It is increasing at the rate of 50 to 60 to 70 percent a year.

We must do something about this. Our committee, the Governmental Affairs Committee, and the subcommittee I chair, the Post Office and Civil Service Subcommittee, are prepared to make recommendations and offer legislation to curtail the abuses of this.

Let me tell the Senate just the other day as I was thinking about this, I got a mailer from one of my own associations, an alumni association. It was a letter sent at a subsidized rate that urged me to take a cruise to the fjords of Norway. This was an expensive tour that, had I taken it, would have contributed some money to the alumni association.

This is the kind of mailing that is destroying the whole purpose of providing some subsidy to legitimate organizations. We are prepared to do that. We are prepared to establish a procedure for the Postal Rate Commission to adjudicate and approve the legitimacy of organizations to use nonprofit rates and determine whether quesion-

able mailings should be paid for by the ratepayers. We propose that a portion of the current subsidy be passed over to the Postal Service budget over a period of time.

That concept is not new. It has also been suggested by the former regional postmaster and member of the U.S. Postal Service Board of Governors, William Sullivan, who has supported the idea from his position. It is something that I think is required to be done. The Postal Service budget now is in excess of that of AT&T and it has no community service portion. All we propose is that the Postal Service ratepayers do in fact subsidize to a certain extent some of the mailings that are involved to the same extent that the ratepayers of AT&T have subsidized some of the users of the telephone system of our country for many years.

It is an idea whose time has come, Mr. President, and I am convinced that it can be done and be done in a way that will, in fact, contribute to the reduction of our national deficit.

I think that the Metzenaum-Burdick amendment is one that we have faced annually, the same concept of restoring money rather than trying to deal with the problem. The rapid increase in the demand for this subsidy absolutely requires that Congress do something to prevent its continued increase. If my colleagues do not believe me, they should look in their own incoming box for the mailings they are getting from universities or other alumni associations they belong to and see the way these mailings are being abused.

The PRESIDING OFFICER. The Senator has used most of his time.

Mr. STEVENS. Mr. President, do I have 1 minute left?

The PRESIDING OFFICER. The Senator is correct; fifty seconds.

Mr. NUNN. Mr. President, will the Senator from Alaska yield for a brief question?

He does not have time.

Mr. STEVENS. I am constrained to yield to my good friend.

Mr. NUNN. I am wondering if he is going to have another amendment that will add back some money to take care of this problem or is he arguing against the Metzenbaum amendment?

Mr. STEVENS. I am arguing against this amendment on the basis that I have been assured that the package that comes out here will contain the directions I have just mentioned, to restore $100 million so we can take care of this problem in fiscal year 1986. We have the commitment of the Governmental Affairs Committee that it will bring to the Senate changes in existing law that will effect the modernization I have mentioned, putting into the Postal Service budget a portion of this cost. So the cost to the taxpayers will be reduced in two ways: first, through the $700 million savings involved in the package and second through the transition that I have suggested.

Mr. METZENBAUM. Mr. President, on the $100 million suggested by the distinguished Senator from Alaska, I point out that if that amendment were adopted, it would mean that those taxpayers who use the Postal Service across the country would be called upon to pick up the subsidy of about $771 million. It is a cross-subsidy they are talking about.

As a matter of fact, I should point out that for rural newspapers, if that amendment is adopted, their rate would go up 154 percent; second-class, nonprofit groups, which means veterans magazines, church bulletins, and religious publications would go up 100 percent; classroom publications would go up 300 percent. Salvation Army, Crippled Children's Society, United Cancer Society——

Mr. STEVENS. Mr. President, maybe the Senator did not understand me. What he is saying is absolutely wrong.

Mr. METZENBAUM. Mr. President, I insist that I be given the additional time——

The PRESIDING OFFICER. The Senator from Ohio has the floor. He did not yield.

Mr. METZENBAUM. Third-class mail rates would go up 100 percent and fourth-class library mailing rates would go up by at least 75 percent.

Mr. President, if Senators do not vote for this and they take the $100 million that is in the Republican package, it means everybody across the country is going to be called upon to pay higher rates and rates for the very organizations I have mentioned, including rural newspapers, will have to go up the amounts I have indicated.

I ask unanimous consent that Senators BINGAMAN and HOLLINGS be added as cosponsors.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STEVENS. Mr. President, is there any time remaining?

The PRESIDING OFFICER. There is no time remaining on the amendment.

Mr. STEVENS. I move to lay the amendment on the table.

The PRESIDING OFFICER. The question is on agreeing to the motion.

Mr. STEVENS. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Alaska to lay the amendment on the table. The yeas and nays have been ordered. The clerk will call the roll.

The bill clerk called the roll.

Mr. SIMPSON. I announce that the Senator from North Carolina [Mr. EAST] and the Senator from California [Mr. WILSON] are absent due to illness.

Mr. CRANSTON. I announce that the Senator from Nebraska [Mr. EXON] is absent because of illness.

The PRESIDING OFFICER (Mr. ABDNOR). Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 51, nays 46—as follows:

[Rollcall Vote No. 62 Leg.]

YEAS—51

Abdnor	Grassley	Nickles
Armstrong	Hatch	Packwood
Boschwitz	Hatfield	Pressler
Chafee	Hawkins	Proxmire
Cochran	Hecht	Quayle
Cohen	Heinz	Roth
D'Amato	Helms	Rudman
Danforth	Humphrey	Simpson
Denton	Kassebaum	Specter
Dole	Kasten	Stafford

Dixon	Levin	Zorinsky
Dodd	Long	
Eagleton	Matsunaga	

NOT VOTING—3

East	Exon	Wilson

Mr. DOLE. Mr. President, I move to reconsider the vote by which the motion was agreed to.

Mr. WALLOP. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DOLE. Mr. President, I understand that the distinguished Senator from Wisconsin is prepared to offer an amendment, and then the Senator from Massachusetts has an amendment.

AMENDMENT NO. 85

(Purpose: To fully fund Revenue Sharing in 1986, and to continue the program at a lower level in the outyears)

Mr. KASTEN. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The bill clerk read as follows:

The Senator from Wisconsin [Mr. KASTEN] proposes an amendment numbered 85.

Mr. KASTEN. Mr. President, I ask unanimous consent that reading of the amendment will be dispensed with.

Mr. BYRD. I object.

The PRESIDING OFFICER. Objection is heard. The amendment will be stated.

The bill clerk proceeded to read the amendment.

Mr. KASTEN. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

Mr. BYRD. Mr. President, I object only for the reason that the amendment is only two pages in length.

The PRESIDING OFFICER. Objection is heard.

The clerk will read the amendment.

The bill clerk continued with the reading of the amendment.

Mr. KASTEN. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

The amendment is as follows:

In amendment number 43 as amended,

On page 3, line 13, increase the number by $2,400,000,000.

On page 3, line 14, increase the number by $2,600,000,000.

On page 3, line 19, increase the number by $1,800,000,000.

On page 3, line 20, increase the number by $2,600,000,000.

On page 4, line 1, increase the number by $1,800,000,000.

On page 4, line 2, increase the number by $2,600,000,000.

On page 4, line 7, increase the number by $1,800,000,000.

On page 4, line 8, increase the number by $4,400,000,000.

On page 4, line 13, increase the number by $1,800,000,000.

On page 4, line 14, increase the number by $2,600,000,000.

On page 31, line 14, increase the number by $2,300,000,000.

On page 31, line 15, increase the number by $1,700,000,000.

On page 31, line 22, increase the number by $2,300,000,000.

On page 31, line 23, increase the number by $2,300,000,000.

On page 33, line 2, increase the number by $100,000,000.

On page 33, line 3, increase the number by $100,000,000.

On page 33, line 11, increase the number by $300,000,000.

On page 33, line 12, increase the number by $300,000,000.

On page 40, line 17, increase the number by $1,676,000,000.

On page 40, line 18, decrease the second number by $2,287,000,000.

On page 47, line 13, decrease the number by $1,676,000,000.

On page 47, line 14, decrease the second number by $2,287,000,000.

Mr. DOLE. Mr. President, will the Senator yield?

Mr. KASTEN. I yield.

Mr. DOLE. Mr. President, I ask unanimous consent that there be 10 minutes on the amendment, equally divided.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senate is not in order. The Senate will be in order.

Mr. DOMENICI. Mr. President, will the Senator yield?

Mr. KASTEN. I yield.

Mr. DOMENICI. Mr. President, I designate the distinguished Senator from Oregon, the chairman of the Finance Committee, to handle time in opposition.

Mr. KASTEN. Mr. President, I ask unanimous consent that the names of the following Senators be added as original cosponsors of the amendment: the Senator from Pennsylvania [Mr. HEINZ], the Senator from Tennessee [Mr. SASSER], the Senator from Kentucky [Mr. FORD], and the Senator from Michigan [Mr. RIEGLE].

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. KASTEN. Mr. President, today I am offering an amendment to continue funding general revenue sharing for fiscal years 1987 and 1988. As we all know, the leadership compromise assumes that revenue sharing will be fully funded in 1986, and terminated thereafter.

I believe that this is a mistake. Since its inception in 1972, general revenue sharing has been a hallmark of good government: Providing flexibility to solve specific needs in the community, allowing local supervision, and promoting accountability. In fact, it is the first and foremost example of new federalism—essentially, the first block grant.

That is why my amendment would assume full funding for revenue sharing at the current level of $4.6 billion in fiscal year 1986. And, it would assume that revenue sharing continue in 1987 and 1988 at a level of $2.3 billion in each year.

I offer this amendment because I believe that it is essential that revenue sharing continue beyond 1986. This is especially important since the assumption that revenue sharing end after 1986 is part of the reconciliation instructions. I fear that once the reconciliation takes effect, efforts to reauthorize the program next year will be all the more difficult. It is essential that here and now, we demonstrate our support for continuing the program.

I am aware, however, about the effect an amendment calling for full funding for 3 years would have on the deficit. That is why this amendment assumes that the program be continued at half the 1986 level of $4.6 billion.

Mr. President, there are a number of arguments raised against revenue sharing. Since time is short, I ask unanimous consent to have printed in the RECORD a paper entitled "Common Misperceptions About Revenue Sharing." I believe that this paper does a good job of addressing the concerns some have about the program.

There being no objection, the paper was ordered to be printed in the RECORD as follows:

COMMON MISPERCEPTIONS ABOUT REVENUE SHARING

The federal government has no revenue to share.

The program was started by President Nixon in 1972 when the federal government had a deficit of over $23 billion. It is not intended to give away non-existent revenues, but as a means to allow fiscally distressed state and local governments to share from a broader and more equitable revenue base. In 1979, when the state share was eliminated and revenue sharing was cut by one-third, the deficit was slightly over $27 billion. Since that time, there has been no adjustment for inflation; yet the federal deficit this year is projected to be over $200 billion. The need for revenue sharing has not changed. The need to share revenues is, if anything, stronger than in 1972.

Local governments can increase taxes or cut non-essential services to make up for cuts in revenue sharing.

Most local governments have done both a number of times over the last four years to compensate for the recession and cuts in federal assistance. Most are now restricted from increasing local taxes by state legislation. Others like Benton Harbor, Newark, and Detroit already have local tax rates that are so much higher than surrounding communities that to increase taxes more would drive individual and corporate taxpayers out. For many local governments, taxes would have to be increased over 30 percent to make up for the loss of General Revenue Sharing.

How about cutting non-essential services? Benton Harbor has 5 public works employees left. Should they stop repairing broken water mains, clearing snow from the streets, responding to less than violent crimes, non-life-threatening fires? Should local governments, as one Congressman suggested, close their public libraries? The difficulty is that the local governments in the most serious fiscal condition have already been forced to reduce essential services—in many American communities there simply are no more property taxes that can be raised on non-essential services to be cut.

States and local governments have enormous surpluses, while the federal government has an enormous deficit.

States and local governments in this country are required to balance their budgets; they cannot have deficits. Because so many tightened up during the recession, those which have participated in the economic recovery are in better fiscal condition today. According to 1983 census figures, cities now provide 74 percent of their own revenue, while the federal share has declined sharply and the state share has dropped. Thus, by aggregating all state and local governments together—blending the most wealthy suburban jurisdictions with poorer central cities and rural areas—and presuming that real per capita spending by state and local governments will not change, as the U.S. Treasury assumed in an initial study—one would assume that all states and local governments are running surpluses. But using more realistic assumptions, revised Treasury numbers demonstrate that even at the aggregate level, a surplus is unlikely. On the individual level, that means that many states and localities will experience severe hardships if revenue sharing is cut in particular, poorer jurisdictions will suffer the most as statistics show they receive proportionately more in Revenue Sharing dollars.

General Revenue Sharing is costly and inefficient. In order to provide funds to Jurisdictions with less than 60 percent of the U.S. per capita income, it distributes 98 percent of its funds to Jurisdictions above this level.

To say this is to say that none of America's 50 largest cities should be eligible for the program. Sixty-two percent of the funds do go to jurisdictions with capita income less than the national average, while 93 percent goes to those with per capita income less than 125% of the national average.

While no allocation formula can be perfect, a chief attribute of General Revenue Sharing is its targeting of the funds at communities with the greatest needs. The per capita amount of Revenue Sharing funds distributed to jurisdictions increases as their per capita income declines. In revenue sharing the poor do get more. The jurisdictions with incomes only 30 percent of national average receive 78 percent more revenue sharing than the national average. The attached graph more clearly demonstrates this targeting.

General Revenue Sharing is not really important; it provided only 2.5 percent of local expenditures in 1983.

This figure ignores two factors: the diversity of jurisdictions receiving funds and second, the legal ability to raise replacement revenue. A more accurate yardstick for evaluating the effect of revenue sharing cuts is to compare it with the amount of local raised taxes.

While on an average basis General Revenue Sharing is equal to 7.4 percent of local taxes for cities, in Arkansas it is 29.8 percent and in Mississippi 21.6 percent.

Mr. KASTEN. Mr. President, the application of GRS funds has rightly been left to community leaders. Unlike the tunnel vision often exhibited by Congress, local governing officials have 20/20 vision when it comes to recognizing the needs of their own communities. The secret to general revenue sharing is that of assisting local governments, without the interference of Federal regulators or lawmakers.

I believe revenue sharing is more critical now than it has ever been. There is no free lunch in passing on to local governments more of the burden for funding public services and projects. The elimination of this vital program would immediately result in huge increases in property taxes and sharp cuts in basic public services. I do not think that is the intent of this administration or this Congress.

The closer to home you get, the louder the facts speak. General revenue sharing makes up the lion share of our cities, towns, and villages' ability to support basic, necessary services. In Wisconsin, for example, the $108 million that Wisconsin counties, cities, and the towns will receive in fiscal year 1986 in Federal revenue sharing will be invested in police protection, youth employment, health care, housing, libraries, fire protection, assistance for the elderly, nutrition aid for kids, road repairs, jail improvements, aid for the disabled, mass transit and other transportation needs. Can we really afford to turn our back on these programs?

I ask the distinguished Members of this body: Where can you get a better return on your Federal tax dollar? Where can you pinpoint the need, and provide such ready assistance? Where can you bypass the bureaucracy's share when allocating Federal funds on such a large scale? Under my amendment, general revenue sharing will continue to be a viable solution to grassroot problems.

The much touted surplus of State and local governments simply do not exist to warrant the termination of GRS. By the most generous assessment of national income and product accounts, State and local governments combined have a surplus equal to 1.9 percent of expenditures. By the standards of Wall Street bond rates, a 5-percent surplus is needed by local governments to meet cash flow and contingency requirements. Who will make up the difference?

Local governments in Wisconsin do not have funds available to replace lost GRS payments. The fiscal condition of local governments has been extremely fragile throughout the 1980's, even with some help from the economy. Little, if any, improvement can be expected next year because of rapidly growing service demands and a slowdown in revenue growth.

General revenue sharing helps to balance or reduce local property taxes and user fees. Consider what would happen if revenue sharing were terminated? Cities would have to replenish their allotment of GRS payments from local property taxes. According to the National League of Cities survey, the tax rate increases required would range from 50.7 percent in cities of under 10,000 population, to 23.1 percent in cities over 100,000.

In Wisconsin's Milwaukee County, for example, continued use of general revenue sharing has held property tax in line and has allowed Milwaukee County to maintain direct property tax support. In fiscal year 1985, this resulted in the amount of $17.7 million in medical assistance; $300,000 for youth employment; and $400,000 to match the Federal 50 percent pass-through for the Economic Assistance Administration and $9.8 million for mass transit.

Mr. President, I wish to set the record straight about general revenue sharing. Revenue sharing is as essential today as it was 10 year ago. Present general revenue sharing [GRS] funding at $4.6 billion per year has remained the same, however, since 1977. This means less buying power for the same amount of dollars.

Mr. President, my amendment speaks to the need to return tax dollars to the taxpayers back home. General revenue sharing has played a major role in reversing the power curve in Washington, DC, to the benefit of local government and local taxpayers.

From the smallest to the very largest of our Nation's cities, general revenue sharing is top priority. Because GRS is targeted toward fiscal distress for both urban and rural cities, its formula is based upon local relative tax effort and income. Thus, the poorer a community and the greater the effort that community makes to respond to its own needs, the larger the amount of the revenue sharing grant.

I urge the Senate to support my amendment to retain funding of general revenue sharing at $2.3 billion for fiscal years 1987, 1988, half that of present funding. The very recognition of this fact led the Congress in 1983, by a vote of 381 to 35 in the House and 87 to 6 in the Senate, to reauthorize the program through fiscal year 1986. At the signing ceremony for the reauthorization, President Reagan said: "The Federal Government never spent money more wisely than by devoting it to revenue sharing."

Mr. President, we should do no less now to protect revenue sharing, even at these reduced levels. I urge the Senate to weigh carefully the merits of general revenue sharing before voting, by fiat, to eliminate this crucial program.

This amendment assumes a commitment to extend revenue sharing to 1987 and 1988, but reduced by 50 percent. I think that is fair and equitable. I believe that the local governments and communities need this money. They have been depending on it, and it should not be eliminated immediately.

I yield 1 minute to the Senator from Tennessee [Mr. SASSER].

Mr. SASSER. I thank the distinguished Senator from Wisconsin.

Mr. President, I rise today to support the amendment offered by the distinguished Senator from Wisconsin.

The amendment would effectively ensure the continuation of this efficient and effective program beyond 1986.

The amendment is in keeping with the need for spending restraint and in fact accomplishes significant savings from a freeze level in the next 3 years.

This amendment would envision $4.6 billion in savings over the next 3 years.

Mr. President, my colleague from Pennsylvania [Mr. HEINZ] and I have legislation pending which would reauthorize the program for the next 5 years. The legislation currently has 20 cosponsors.

The Senate has time and again expressed its support for this important program. On September 21, 1983, the Senate voted overwhelmingly to continue the program through 1986. The vote was 87 to 6.

Thus, it is clear that this program has enjoyed substantial bipartisan support over the years at both the local and the Federal level. There is good reason for this.

The General Revenue Sharing Program is the most efficiently administered and prudently used grant program in the history of the Federal Government.

Less than two-tenths of 1 percent of general revenue sharing funds are used to administer the program. Over the past 6 years, the number of personnel working in the Office of Revenue Sharing has actually declined by one-third.

It is also an enormously successful and popular economic and community development program. Local officials of all political persuasions and ideologies attest to this fact.

Earlier this year I held field hearings throughout the State of Tennessee in an attempt to examine the impact of economic and community development budget cuts on local communities. Witnesses included city mayors, county executives, developers, and experts in the field of regional development. Both Republican and Democratic officials alike testified to the importance of and necessity for Federal aid in the maintenance of essential public services.

In the face of funding cutbacks and a no-growth mentality, revenue sharing remains as the sole, reliable source of assistance for local governments nationwide.

General revenue sharing funds are used to pay for services which range from police and fire protection, to hospitals, to highways, to education.

Now the administration has proposed eliminating this program a full year ahead of its reauthorization expiration. A recent study by the U.S. Conference of Mayors shows that if the program is eliminated, 60 percent of the cities that responded would be forced to cut capital improvements, 48 percent would cut public safety, 32 percent would cut human services, 15 percent would cut health services, and 14 percent would cut sanitation.

Other casualties would include cutting street and building maintenance, education programs, downtown development efforts, and transit.

Testimony presented at budget hearings I held in Memphis in March show conclusively that elimination of mass transit operating subsidies, as advocated by the administration, would at best raise bus fares in that city to $2 per ride, at worst, these cutbacks could conceivably close down the Memphis transit system altogether. The ripple effects of such action would reverberated throughout the downtown economy, effectively making the downtown district a veritable ghost town. The loss of general revenue sharing funds would only exacerbate and compound an already deteriorating situation.

In another instance, the loss of urban development action grant funds, as advocated by the administration, coupled with a loss of general revenue sharing, would seriously undermine investment in many of our cities, particularly those cities that have already been disadvantaged by the currently skewed UDAG funding formula. Most of these cities lie outside the so-called Rust Belt of the Northeast and Midwest. Without revenue sharing, these cities would be unable to make the types of improvements necessary to attract investment.

The loss of general revenue sharing funds would simply shift the tax burden on to the local governments. In the aforementioned Conference of Mayors study, 68 percent of the cities responding said that some type of local tax increase would be necessary to maintain an adequate level of services: 43 percent said that user fees would be increased; 40 percent would increase property taxes; 5 percent would increase sales taxes; 3 percent would increase income taxes.

Other remedies included increased franchise taxes, permits, and fines, utility taxes, license fees, business taxes, and hotel taxes.

Fully 94 percent responded that they did not anticipate State aid to pick up the slack.

In my home State of Tennessee, county and municipal governments have already increased taxes over a 10-year period by 127.9 percent. Last year, revenue sharing payments represented nearly 6 percent of total taxes collected by these governments.

There are 334 municipalities in Tennessee. Nearly 90 percent of them have populations of less than 10,000. For these small municipalities, nearly all of them, general revenue sharing is the only direct Federal grant they receive.

These figures are indicative of the importance of the General Revenue Sharing Program and this importance is reflected in the more than 39,000 local governments nationwide. We are not seeking to expand the program but merely to maintain it at the current level. No more, no less. General revenue sharing is genuinely a part of the Federal fiscal safety net for small communities. These funds should be viewed as an investment in our future. To curtail the Government's commitment to this future would be unwise and counterproductive. I urge my colleagues to support the ammendment to freeze general revenue sharing at the current level.

Mr. KASTEN. Mr. President, how much time remains on our side?

The PRESIDING OFFICER. Two minutes and a second.

Mr. KASTEN. I yield 1 minute to the Senator from Kentucky.

Mr. FORD. I thank the distinguished Senator from Wisconsin.

Mr. President, I rise in support of this amendment. General revenue sharing has proven to be one of the most effective and efficient mechanisms for targeting Federal assistance to city and county governments. These funds support vital services such as police and fire protection, aging programs, and water and sewage projects.

Local officials are well aware that revenue sharing will not be around forever. But, they are concerned that they be given time to replace these revenues. The President's original budget would have terminated revenue sharing at the end of fiscal year 1985, 1 year before the current authorization would expire. I strongly opposed that recommendation. Then the Senate Budget Committee reported their bill with the assumption that the program would be phased out over 2 years with 50 percent of the appropriation spent in each year. I did not feel that this proposal gave the cities enough time to adjust to the loss of funds. Finally, the Republican leadership plan would fully fund the program in 1986 and terminate it thereafter. This approach is equally devastating.

It has been estimated that if revenue sharing were eliminated, and local governments replaced these funds with property tax revenues, such taxes would have to be raised by an average of 25 percent. It is doubtful that most cities could do that with a 1-year notice. A 1985 survey by the National League of Cities revealed that 30 percent of the cities responding raised property taxes in 1984; 18 percent raised sales taxes; 24 percent raised business taxes; and 39 percent raised user fees. It is simply unrealistic to believe that cities and counties will be able to find the funds to replace revenue sharing dollars.

I have been preaching to the local officials in Kentucky for some time now that they should not put revenue sharing funds into reoccurring expenses. I am afraid that my words fell on deaf ears and the reality of the situation is that cities and counties in Kentucky use these funds in just that manner to provide vital services. For example, the city of Mayfield, KY, receives about $330,000 in revenue sharing. When revenue sharing first began, the city passed an ordinance providing that these funds could only be used to partially fund the salaries of police officers and firefighters. Revenue sharing dollars are used for no other purpose in Mayfield. I think the effect of the Republican leadership proposal, to terminate revenue sharing, on Mayfield is obvious—the citizens of this community will have less fire and police protection. And I would bet that

most, if not all of my colleagues, have a Mayfield in their State, too.

I had intended to offer an amendment to gradually phaseout revenue sharing over a 5-year period, at reduced funding beginning in fiscal year 1986. My amendment would have cut revenue sharing funds by 10 percent in fiscal year 1986, and gradually eliminated the program at the end of 1990. I decided not to offer that amendment because I found that the thing local governments fear more than the termination of revenue sharing, is the possibility that the program will be tampered with in fiscal year 1986. There is a great deal of concern that revenue sharing not be subjected to reconciliation instructions which might give those who oppose the current program the opportunity to change the distribution formula or impose cuts even deeper than those recommended by the Senate Budget Committee. I respect these concerns, and so will not offer my amendment.

This amendment, however, avoids these problems by fully funding the program in fiscal year 1986. More importantly, it goes further to allow the Senate to go on record supporting a phase out of these funds as opposed to an abrupt termination. It will still be very difficult for cities and counties to make up a 50-percent loss of funds. But they will have 2 years to do it. We simply cannot expect our local officials to continue to bear the cuts in domestic spending for community service and economic development programs, and then pull the rug out from under them by wiping out the revenue sharing program on a 1-year notice. Our cities and counties are not naive; they accept that revenue sharing is on the way out. They simply ask that we give them time to adjust and replace these funds. I think that is very little to ask.

Mr. President, we must give our cities and counties a chance to stand on their own. I urge my colleagues to support this amendment.

Mr. President, we are looking at almost devastation in some of the counties in this country. We need to give them some time to be able to phase out revenue sharing and to phase in some local tax base. Under the circumstances, if we eliminate revenue sharing on September 30, 1986, those counties and those cities will not have an opportunity to make up that difference.

All we are doing is asking for 50 percent in the year of 1987 and 50 percent in the year 1988.

Each Senator just has to go back to his own State, to his own community, and see how important revenue sharing is to those counties and to those communities.

I encourage my colleagues. This is not much to ask. This is not much to ask to see that those counties have an opportunity to at least find a new tax base to do those things that they want to do locally, new roads, new sewer, new water, those things that these communities need and do not now have the money to do it with.

So let us not cut them off abruptly. Let us just extend it for a couple more years.

Mr. KASTEN. Mr. President, I ask unanimous consent to add the Senator from New York [Mr. MOYNIHAN] as an original cosponsor of the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

The PRESIDING OFFICER (Mr. HECHT). The Senator from Oregon is recognized.

Mr. PACKWOOD. Mr. President, this amendment adds back about $4 billion in spending budget.

I might respond directly to the argument of the Senator from Kentucky. Clearly the cities would like to continue revenue sharing, the counties would like to continue revenue sharing. Everybody wants to continue everything. That I understand.

I posed to the cities and counties when we were considering this in the Finance Committee whether they would rather have full funding of revenue sharing through September 30, 1986, which is what is in the budget provision, or rather they would as soon cut it in half now and extend it for a year or two beyond September 30, 1986.

They said very clearly the first choice, of course, was to keep it. Their second choice, if it is going to be cut, is they would rather have full funding through September 30, 1986, and then have it fully terminate because they indicated they would have enough time to get ready for the phaseout if we gave them full funding for a year and a half, and that is what we are doing.

There is no point in adding back $4 billion in the budget for money when we are giving them a year and a half to phase out.

I yield 1 minute to the Senator from New Hampshire.

Mr. HUMPHREY. Mr. President, I wish to tell my colleagues something very funny. In 1972 when revenue sharing was enacted, it was enacted on the basis of projections showing the Federal Government would be running surpluses for years to come. In that time we have not run a surplus in even one year.

During those 12 or 14 years of the existence of the program we have now spent $78 billion on revenue sharing.

Revenue sharing goes to some of the wealthiest communities in America. That is really adding insult to injury.

Let me just tick off a few.

There is Hunters Creek in Texas which I am told is the wealthy suburb, I believe, of Houston. The per capita income there is $40,000 a year. They get revenue sharing. Palm Beach, FL, per capita income $32,000, they get revenue sharing. Beverly Hills, CA, Bloomfield Hills, MI; Arlington County, VA, on and on; Grosse Pointe, MI. Everybody gets a piece.

Mr. FORD. Mr. President, if the Senator will yield for a question, what about Pikeville or Smiths Creek, or some other place?

Mr. HUMPHREY. I am sorry. I would love to yield time but do not have it.

Mr. PACKWOOD. Mr. President, how much time remains on our side?

The PRESIDING OFFICER. Three minutes.

Who yields time?

Mr. PACKWOOD. Mr. President, I yield another 30 seconds to the Senator from New Hampshire, and then a minute to the Senator from Oklahoma.

Mr. HUMPHREY. I am not ready yet.

Mr. PACKWOOD. I yield to the Senator from Oklahoma a minute now.

The PRESIDING OFFICER. The Senator from Oklahoma is recognized.

Mr. NICKLES. Mr. President, I rise in opposition to the amendment by my good friend from Wisconsin, and others, to add back $4.6 billion in 1987 and 1988 for revenue sharing.

Quite frankly, we do not have any revenue to share. We should call this program deficit sharing, because the Senator from New Hampshire is exactly correct. Ever since this program began we have had deficits. So not only does it cost $4.6 billion, and that is the cost of this amendment, an additional deficit increase of $4.6 billion, but also we will have to borrow the money, so we are going to be talking about 10 percent on top of that for about $460 million per year to fund this program as well.

I think the time is now for if we are ever going to say no, we cannot afford a program, this is one we cannot afford.

I hope we will defeat the amendment.

Mr. PACKWOOD. Mr. President, I yield 30 seconds to the Senator from New Hampshire.

The PRESIDING OFFICER. The Senator from New Hampshire.

Mr. HUMPHREY. Mr. President, some of our colleagues who favor the amendment would have us believe the cities are declining in revenue. The fact of the matter is recent statistics during the last 2 years or so show that most cities are running surpluses.

Here we are being asked to send checks to the cities and municipalities of America when most of them are running surpluses.

The PRESIDING OFFICER. The time has expired.

Who yields time?

Mr. PACKWOOD. Mr. President, I say again the cities and counties were given an option as to whether they would as soon terminate revenue sharing fully on September 30, 1986, but be fully funded through that period or have it cut in half now and continued for an extra 1½ years after September 30, 1986. They opted for what the Budget Committee did, 18 months of full funding, which will give them ample time to get ready for the termination of the program.

I, therefore, urge the defeat of this amendment.

Mr. GORE. Mr. President, as the ranking minority member of the Subcommittee on Civil Service, Post Office and General Services, I believe that the issue we are addressing, the revenue forgone program, is one of the more humanitarian and worthwhile programs within the U.S. Government's postal functions.

The groups and organizations that will be affected by these cuts are not our usual conception of a special interest group. The list includes all of the well known charitable organizations in our society. I would name only a few: The Salvation Army, the National Easter Seal Society, the March of Dimes, the American Cancer Society, CARE, Save the Children. And this is only to mention a few. Countless other nonprofit entities, including hospitals, halfway houses, and others would feel the bite of elimination of the revenue forgone subsidy.

I find it ironic that a major tenet of this administration has always been that the private sector charities should shoulder more of the burden of caring for the more unfortunate members of our society. Such a notion may have some merit. But I fail to see how the administration can justify adding to the burdens of these longstanding charitable organizations by reneging on a subsidy which we have provided for many years now.

I want to just briefly describe the magnitude of the impact that eliminating this program would have on our charities. At St. Jude's Children's Hospital in Memphis, the Nation's largest children's cancer research institute, the administrative costs of their fundraising would be increased by some 20 percent with this proposal. The National Easter Seal Society alone would see its costs raised by some $5.5 million, raising their fundraising costs by 33 percent. This shortfall can only serve to reduce the flow of dollars to support their activities, or diminish the valuable services they provide.

While many parts of our society are going to have to bear the burden of budget reductions, I think this is one place we ought to leave alone. Every dollar spent by these charitable organizations is one less that need be spent by the Government to care for the unfortunate. Therefore I believe it is not sound logic to cripple their fundraising efforts by eliminating their postal subsidy. I urge my colleagues to support the amendment by the gentleman from Ohio and the gentleman from North Dakota, and restore funding for the revenue forgone program.

Mr. HEINZ. Mr. President, As my colleagues know, I was an early opponent of the administration designs to precipitously and unwisely terminate funding for the General Revenue Sharing Program. For this reason I am pleased to join Senator KASTEN in cosponsoring this amendment to preserve the General Revenue Sharing Program, albeit at reduced levels, for at least the next 3 years. This amendment would add sufficient moneys to the budget to fund GRS at $4.6 billion for 1986, and $2.3 billion cash for fiscal year 1987 and fiscal year 1988.

Mr. President, the General Revenue Sharing Program provides support for an enormous range of activities, including capital expenditures for transit, economic development, community centers, and police and fire facilities. Operating programs benefiting from Federal revenue sharing funds include downtown revitalization projects, Meals on Wheels, Community Health Care for the Elderly and the Disabled, and fire and sanitation services.

The General Revenue Sharing Program is important to all cities, in all regions of the country. Revenue sharing funds represent approximately 7 percent of local revenues. If the administration is allowed to abolish this program after 1986, it would take an average 2-percent increase in local property taxes to replace the funds currently provided. In the Commonwealth of Pennsylvania, a survey of local governments found that revenue sharing funds account for 16.7 percent of the average local budget. Replacing revenue sharing funds with property tax revenues in Pennsylvania would require an average increase of 62 percent. For nearly 94 percent of Pennsylvania municipalities responding to the survey, revenue sharing is the only direct source of Federal funds.

Mr. President, GRS is clearly a significant stone in the fiscal foundation of our towns, cities, counties, and States. If adopted, the amendment proposed by Senator KASTEN and I will guarantee that no one will lose GRS funds overnight and that program participants everywhere will be given a reasonable chance to reduce their dependence on this program.

No Senator, myself included, believes that GRS should be exempted from deficit-reduction efforts; these are times of grim fiscal realities. However, the administration's proposal to go from full-funding to zero-funding in the space of one fiscal year represents a cold turkey crash diet with potentially disastrous effects. The amendment put forward this evening to gradually reduce the size and scope of the Revenue Sharing Program is a much wiser and more balanced approach. I urge my colleagues to support this amendment.

FEDERAL REVENUE SHARING

Mr. BYRD. Mr. President, I support the continuation of revenue sharing—even, if necessary, at a reduced level.

While I agree that we must find a means to balance the budget and, in order to do so, we must eliminate those programs that have not fulfilled their expected function and that are not as essential as others, the General Revenue Sharing Program is not one of these. The General Revenue Sharing Program has worked and it has worked well.

The General Revenue Sharing Program began in 1972 under the Nixon administration. It is based on the concept that the Federal Government is best equipped to collect taxes and redistribute them through a form of entitlement to local governments. It is based on a fair and equitable formula and takes into account such factors as population, local tax effort, and per capita income. The program was not designed to reward local governments that are derelict in their duty, and it does not work that way. The formula assures that those local governments that try their best to provide adequate services will be assisted by the program.

Local revenue sharing funds may be used for any legal purposes under State and local laws. In West Virginia, they are typically used for public facilities such as water and sewer systems, courthouse and municipal office building construction, nursing home construction, construction of low to moderate income family housing, and public service employment. Since the program's implementation, my home State has received almost $708 million.

From the beginning, the concept of the program was to strengthen State and local governments, and to allow the approximately 39,000 recipient jurisdictions to make the decisions about the expenditure of these funds. Through the process of local citizen participation hearings, local governments learn the needs of the local communities and citizens have an opportunity to influence how those expenditures are to be made. This reflects a philosophy quite similar in some respects to that often voiced by the present administration, which has supported the idea of moving authority for many Government functions from that Federal level to the State and local levels.

In anticipation of receipt of these funds each year, local governments across the country traditionally have included these moneys in their projected budgets for such essential com-

munity services as police and fire protection. More and more this continues to be the case because local governments have had their tax bases diminished by recession, at a time when local programs for assistance were being pressured by the demand for increased services to the unemployed and disadvantaged.

Given the fiscal faced by many of our local governments, I do not believe we can simply cut the program off at the end of fiscal year 1986, as the White House Republican leadership proposal seeks to do.

We must, at the least, allow those local governments sufficient time to generate, insofar as they can, sufficient funding to take care of local needs. Given the increasing demands on our local governments which diminishing Federal funding alternatives are forcing on them, this will not be an easy task to accomplish.

Revenue sharing has enjoyed bipartisan support throughout its existence. It was proposed originally by a Republican President and enacted by a Democratic Congress. President Reagan has in the past given his unequivocal support to the program. It is the only program that provides Federal assistance to virtually every local government in the Nation. It was worked and it has worked well, and it deserves to be retained in an effective form.

Mr. KASTEN addressed the Chair.

The PRESIDING OFFICER. All time has expired.

Mr. KASTEN. Mr. President, I did not yield back the remainder of my time.

The PRESIDING OFFICER. The Senator used his time in making a unanimous-consent request.

Mr. FORD addressed the Chair.

The PRESIDING OFFICER. The Senator from Kentucky.

Mr. FORD. Mr. President, is it in order to add a cosponsor to this amendment?

The PRESIDING OFFICER. It is by unanimous consent.

Mr. FORD. Mr. President, I ask unanimous consent that the distinguished Senator from West Virginia [Mr. BYRD] be added as a cosponsor.

The PRESIDING OFFICER. Without objections, it is so ordered.

Mr. KASTEN. Mr. President, my amendment will assume full funding for general revenue sharing at the current level of $4.6 billion in fiscal year 1986. In 1987 and 1988, revenue sharing would continue at a level of $2.3 billion, or at half the current level.

General revenue sharing has been a hallmark of good government: Flexibility to address specific needs, local supervision and accountability.

Unlike the tunnel vision often exhibited by Congress, local governing officials have 20/20 vision when it comes to recognizing the needs of their own communities.

The elimination of this vital program would immediately result in huge increases in property taxes and sharp cuts in basic public services. I don't think that's the intent of this administration or this Congress.

GRS makes up the lion share of our cities, towns, and villages ability to support basic services. In Wisconsin, for example, the $108 million that Wisconsin will receive in fiscal year 1986 will be invested in police protection, health care, libraries, road repairs, jail improvements, mass transit, youth employment, housing, fire protection, assistance for elderly, nutrition aid for kids, and aid for the disabled.

Sixty-two percent of general revenue funds do go to jurisdictions with per capita income less than the national average, while 93 percent of GRS funds go to those with per capita income less than 125 percent of the national average.

I ask the Members of this distinguished body: Where can you get a better return on your Federal tax dollar? Where can you pinpoint the need, and provide such ready assistance?

The much touted surplus of State and local governments simply do not exist to warrant the termination of GRS. These entities are required to balance their budgets; they cannot have deficits. By the most generous assessments of national income and product accounts, the combined surplus of State and local governments is equal to 1.9 percent of expenditures.

Revenue sharing is as essential today as it was 10 years ago. Present GRS funding at $4.6 billion per year has remained the same since 1977. This means less buying power for the same amount of dollars.

I urge the Senate to support my amendment to retain funding of general revenue sharing at $4.6 billion in 1986, and at $2.3 billion for fiscal years 1987 and 1988.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Wisconsin.

Mr. PACKWOOD. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Wisconsin. On this question, the yeas and nays have been ordered, and the clerk will call the roll.

The asssistant legislative clerk called the roll.

Mr. SIMPSON. I announce that the Senator from North Carolina [Mr. EAST] and the Senator from California [Mr. WILSON] are absent due to illness.

Mr. CRANSTON. I announce that the Senator from Nebraska [Mr. EXON] is absent because of illness.

The PRESIDING OFFICER. Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 43, nays 54, as follows:

[Rollcall Vote No. 63 Leg.]

YEAS—43

Andrews	Hart	Melcher
Biden	Hatch	Metzenbaum
Bradley	Heflin	Mitchell
Bumpers	Heinz	Moynihan
Burdick	Hollings	Pryor
Byrd	Inouye	Riegle
Cohen	Johnston	Rockefeller
Dixon	Kasten	Sarbanes
Eagleton	Kerry	Sasser
Ford	Lautenberg	Simon
Garn	Leahy	Specter
Glenn	Levin	Stennis
Gore	Long	Zorinsky
Grassley	Mathias	
Harkin	Matsunaga	

NAYS—54

Abdnor	Durenberger	Nickles
Armstrong	Evans	Nunn
Baucus	Goldwater	Packwood

Cochran	Humphrey	Simpson
Cranston	Kassebaum	Stafford
D'Amato	Kennedy	Stevens
Danforth	Laxalt	Symms
DeConcini	Lugar	Thurmond
Denton	Mattingly	Trible
Dodd	McClure	Wallop
Dole	McConnell	Warner
Domenici	Murkowski	Weicker

NOT VOTING—3

East	Exon	Wilson

So the amendment (No. 85) was rejected.

Mr. DOMENICI. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. PACKWOOD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 86

(Purpose: To add funds to the Medicare program sufficient to avoid additional cost-sharing for Medicare beneficiaries and to phase out rather than immediately eliminating the double adjustment for teaching hospitals)

Mr. KENNEDY. Mr. President, I send an amendment to the desk on behalf of myself and Mr. CHILES, Mr. BYRD, Mr. BAUCUS, Mr. RIEGLE, Mr. SARBANES, Mr. MATSUNAGA, Mr. GLENN, Mr. METZENBAUM, Mr. MOYNIHAN, and Mr. BRADLEY, and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The bill clerk read as follows:

The Senator from Massachusetts [Mr. KENNEDY], for himself, Mr. CHILES, Mr. BYRD, Mr. BAUCUS, Mr. RIEGLE, Mr. SARBANES, Mr. MATSUNAGA, Mr. GLENN, Mr. METZENBAUM, Mr. MOYNIHAN, and Mr. BRADLEY, proposes an amendment numbered 86.

Mr. KENNEDY. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Total New Budget Authority:
On page 3, increase the amount on line 12 by $200,000,000.
On page 3, increase the amount on line 13 by $500,000,000.
On page 3, increase the amount on line 14 by $900,000,000.
Total Budget Outlays:
On page 3, increase the amount on line 18 by $900,000,000.
On page 3, increase the amount on line 19 by $1,300,000,000.
On page 3, increase the amount on line 20 by $2,200,000,000.
Deficit:
On page 3, increase the amount on line 25 by $900,000,000.
On page 4, increase the amount on line 1 by $1,300,000,000.
On page 4, increase the amount on line 2 by $2,200,000,000.
Public Debt:
On page 4, increase the amount on line 7 by $100,000,000.
On page 4, increase the amount on line 8 by $400,000,000.
Statutory Debt Limit:
On page 4, increase the amount on line 13 by $100,000,000.
On page 4, increase the amount on line 14 by $300,000,000.
Medical Insurance (570):
On page 22, increase the amount on line 16 by $200,000,000.
On page 22, increase the amount on line 17 by $900,000,000.
On page 22, increase the amount on line 24 by $400,000,000.
On page 22, increase the amount on line 25 by $1,200,000,000.
On page 23, increase the amount on line 7 by $600,000,000.
On page 23, increase the amount on line 8 by $1,900,000,000.
Net Interest (900):
On page 33, increase the amount on line 2 by $100,000,000.
On page 33, increase the amount on line 3 by $100,000,000.
On page 33, increase the amount on line 11 by $300,000,000.
On page 33, increase the amount on line 12 by $300,000,000.
Senate Committee on Finance:
On page 40, decrease the first amount on line 16 by $1,000,000,000.
On page 40, decrease the amount on line 17 by $1,413,000,000.
On page 40, decrease the second amount on line 18 by $2,187,000,000.
House Committee on Energy and Commerce:
On page 46, decrease the amount on line 10 by $1,000,000,000.
On page 46, decrease the second amount on line 11 by $1,413,000,000.
On page 46, decrease the amount on line 13 by $2,187,000,000.
House Committee on Ways and Means:
On page 51, decrease the first amount on line 7 by $1,000,000,000.
On page 51, decrease the amount on line 8 by $1,413,000,000.
On page 51, decrease the second amount on line 9 by $2,187,000,000.

Mr. KENNEDY. Mr. President, I am happy to request a time limitation, if the majority leader wishes.

Mr. DOLE. Will 15 minutes overall, 7½ on each side, be adequate?

Mr. KENNEDY. That is fine.

Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. DOLE. Mr. President, I ask unanimous consent that the time on the amendment of 15 minutes be equally divided.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOMENICI. Mr. President, I designate the distinguished chairman of the Finance Committee as the manager of the bill in opposition.

The PRESIDING OFFICER. Who yields time?

Mr. KENNEDY. Mr. President, this is an amendment that was initially drafted by the Senator from Florida, Senator CHILES, myself, and the minority leader, Senator BYRD.

Mr. President, does the initial proponent of the amendment want to make an opening comment?

Mr. CHILES. Mr. President, I thank the Senator from Massachusetts.

I really wanted to just say to the Senator from Massachusetts that this mark which we have, and the amendment, before us now is the mark that passed the Budget Committee unanimously. Every Senator in the Budget Committee voted for this particular mark. It was a mark that I proposed in the Budget Committee, and every member on both sides of the aisle agreed. I think it was one of the few unanimous votes that we had. It is interesting to note, at that time, in effect, I was complimented by the majority side on the basis that we saved money off of the providers, but protected the beneficiaries under this.

As I say, I hope we can get a unanimous vote here tonight as we did in the Budget Committee. I compliment the Senator from Massachusetts.

The Chiles plan rejects these increases in Medicare beneficiary out-of-pocket costs. Will not penalize Medicare beneficiaries for increases in health care costs, instead directing efforts to contain costs at the source; continues efforts at health care cost reduction and strengthening the Medicare trust fund by freezing providers for 1 year.

Republicans on the Budget Committee applauded the Medicare amendment as fiscally responsible before it was passed by a vote of 20 to 0. From the markup transcript:

Mr. GORTON. "The Chiles mark . . . may be about as much below a freeze as Senator Boschwitz's and mine were, so . . . I think I may be inclined to vote with Senator CHILES."

Mr. DOMENICI. "I compliment Senator Chiles . . . because there will be some real savings that will have to occur under his mark, and that is not an easy one to do . . . "

ISSUE: HOSPITAL CUTS

The Republican leadership plan freezes payments to hospitals for 1 year—but then goes beyond that and cuts another $600 million in 1986; the additional cuts are $3 billion over 3 years.

These cuts are not cutting into profit margins of prosperous hospitals—they are the cuts that could force public hospitals to close their doors. Most of this additional cut would come from a 50-percent reduction in the "indirect teaching adjustment." This is now used to compensate hospitals that take care of more than their fair share of Medicare beneficiaries and poor people who have no insurance and cannot pay for care at all. Public hospitals, county hospitals, and large teaching hospitals have to absorb the costs of poor people refused by other hospitals.

The Republicans claim that the "indirect teaching adjustment," without justification, was doubled over what it previously was when the new Medicare reimbursement system was enacted 2 years ago. It pays for some of the costs of hospital interns and residents. But the change was made then specifically to adjust for large indigent caseloads until a better formula could be found. The prospective reimbursement legislation ordered the administration to find a way to make a better adjustment, but the administration has so far refused.

Using this indirect teaching adjustment is not the best proxy for indigent care and keeping public hospitals from closing their doors, but we can't cut it out completely until we find another way.

Republicans expressed great concern about this issue in the Budget Committee, but they voted to cut out the payments. There is detailed report language in the budget resolution reported out of committee on this problem put in by Senators DOMENICI, GORTON, and QUAYLE as well as Democats. Senator DOMENICI and other Republican Senators expressed great concern about more and more hospitals dumping poor patients on public hospitals because of cutbacks by Medicare and private insurance. Senator DOMENICI said we would include language to express the committee's concern—and "hopefully somebody can find a way to do that." But the report has no teeth. With this cut in the resolution there is no way that could be done. There is no room for any adjustments.

The Chiles plan assumes that there will be a 1-year freeze on hospital reimbursements—even though the congressionally appointed prospective payment assessment commission has recommended that there is an increase of 2.5 percent in hospital reimbursement rates for next year. Under the plan, hospital payments under Medi-

care would still be reduced by $2 billion in 1986, −$9.3 billion over 3 years. That is a big enough cut.

It would have the same effect on the Medicare hospital insurance trust fund as the Republican leadership plan. Savings are still sufficient to ensure that the trust fund will be able to make payments well into the mid to late-1990's.

Because we know that the "indirect teaching adjustment" is not necessarily the best measure of taking care of the indigent care problem, the Chiles plan assumes that some additional savings will be made: −$200 million in fiscal year 1986, as opposed to −$600 million in the Republican plan. Even though this is still a cut on top of a freeze for hospitals, it allows room for the Finance Committee to make more appropriate adjustments.

The new prospective payment system for hospitals has already resulted in Medicare savings of several billion dollars. This would not have happened without the cooperation of hospitals. But the new system is not even yet fully implemented, and further adjustments will have to be made. A freeze is already tough medicine to take right in the middle of a transition to a new payment system. We could destroy the progress we have already made by going too far this year.

The Chiles plan is supported by the American Hospital Association. This is a good example of the kind of cooperation we have been getting from most hospitals on the tough issue of reducing Medicare outlays.

Medicare has already been cut by $40 billion over the last 3 years.

Mr. President, I ask unanimous consent that the following be printed in the RECORD at this point:

A "Dear Colleague" letter explaining in detail amendment provisions;

Letters of support for the amendment from leadership council of 18 organizations with 21 signers, the American Hospital Association, and the National Association of Counties;

A chart showing Medicare beneficiary out-of-pocket liability under current law and under White House proposed increases; and

A study of "The Financial Burden of Out-of-Pocket Spending by the Elderly, 1985," prepared by the Center for Health Policy Studies.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
COMMITTEE ON THE BUDGET,
Washington, DC, April 19, 1985.

DEAR COLLEAGUE: When the budget resolution reaches the floor during the week of April 22, I will offer an amendment to restore funding for medicare cuts which would increase medicare beneficiary out-of-pocket costs. My amendment would also lessen the impact of proposed cuts to hospitals which go well beyond a freeze.

This is the same amendment I offered in the Budget Committee on March 7 during markup of the original budget resolution. My plan was discussed and endorsed by almost all of the Republican members of the Committee. The Committee unanimously agreed to my proposal by a vote of 20-0.

Later, with little discussion of changes, a very different medicare budget was voted out of Committee. Now, the White House-Republican Leadership endorsed budget for medicare would make cuts of $3.8 billion in 1986, $18.1 billion over three years. Of the $18.1 billion, almost $5 billion, or 28 percent of the total medicare cuts, would come directly from increased charges to medicare beneficiaries.

My amendment, without hurting beneficiaries, would still leave significant medicare savings: $2.6 billion in fiscal year 1988, $11.7 billion over three years.

I hope you will join with me on the floor to restore the original medicare mark agreed upon by the Budget Committee.

Sincerely,

LAWTON CHILES.

CHILES AMENDMENT: RESTORATION OF MEDICARE CUTS

Medicare beneficiaries are already required to pay significant amounts for their medicare coverage. As the attached tables shows, even under current law, there are steady increases each year. The budget resolution would increase medicare premiums and deductibles and levy a new co-payment for home health services. It would also delay eligibility for new retirees. The proposed increases in out-of-pocket costs would affect virtually all 36.2 million social security and medicare beneficiaries.

Monthly medicare premiums, which are automatically deducted from social security checks, are now based on a payment equal to 25 percent of total medicare Part B program costs. Under the budget resolution proposal, the total charges for premiums would increase by two percent per year until they reached 35 percent of program costs by 1990. Today, the premium cost to beneficiaries is $186 per year. Under the budget resolution plan, the annual premium charge would reach $299 by 1988 and $416 by 1990. My amendment would keep the premium increases at the lower level scheduled under current law. By 1990 they would still be under $250 per year.

The budget resolution plan would also increase the annual medical insurance deductible paid by medicare beneficiaries from its current level, $75 per year, to $92 by 1990. My amendment would keep it at $75.

The budget resolution plan would add a new charge for visits in the home by nurses and home health aides under the medicare home health program. Today there is no co-payment for these visits because we want to encourage home care instead of hospital care. The budget resolution proposes to charge a per-visit amount equal to one percent of the cost of a day in the hospital for every visit after 20 visits a year. In the first year, the new charge would be $4.80 per visit. By 1990, the new charge would be $6.25 per visit. Almost 40 percent of medicare beneficiaries who use home health services, over 450,000 people, would be affected by this proposal. Almost 230,000 beneficiaries would have new annual charges of well over $100 a year just in the first year. For those in most need of home health services (almost 60,000 medicare beneficiaries needed more than 100 visits in 1982) average annual charges would be as high as $630 in 1986, reaching $820 by 1990. My amendment would eliminate this provision from the budget plan.

The budget resolution plan would delay initial medicare eligibility by one month, cutting almost $250 million in 1986. My amendment would also eliminate this provision. It has been proposed by the Administration, and rejected by Congress, in each of the last three years.

The budget resolution plan would freeze medicare payments for one year for all hospitals, physicians, and other providers. In addition to a freeze, however, the budget proposal makes significant additional hospital cuts—$600 million in fiscal year 1986, over $3 billion over three years. My amendment would modify these additional cuts, reducing them to $200 million in fiscal year 1986 and $1.8 billion over 3 years. No matter how the higher cuts would be achieved, reductions of this magnitude in addition to a freeze would guarantee that hospitals would be immediately faced with actual reductions in medicare payments from the current year. The new prospective payment system for hospitals has already resulted in medicare savings of several billion dollars. This would not have happened without the cooperation of hospitals. But the system is not even yet fully implemented, and further adjustments will still have to be made. I have great concerns about disrupting the progress we now are making on restructuring the whole medicare hospital payment system.

LEADERSHIP COUNCIL OF
AGING ORGANIZATIONS,
Washington, DC, May 8, 1985.

DEAR SENATOR CHILES: We are writing to urge your support for two amendments that are extremely important to the health of older Americans and poor Americans of all ages. These are (1) an amendment by Sens. Chiles, Kennedy, Byrd and others that would restore cuts that directly harm Medicare beneficiaries and (2) one by Sens. Kennedy, Rockefeller, Riegle and Matsunaga that would restore Medicaid funding to current services levels and partially compensate for cuts in a number of categorical health programs.

Medicare beneficiaries would still suffer major losses under the resolution currently under consideration. We cannot describe that harm with precision, because the "savings" projected in the amendment adopted last week are not tied to any specific cuts. But we know that the cuts approved were the same size as those tied to an earlier package of cuts discussed approvingly by the Senate Republican Leadership. Those are (1) an increase in the Part B premium to cover 30% of program costs by 1990 (instead of 25% today); (2) indexing the Part B deductible beginning in 1987 and (3) delaying coverage until the first day of the month after the person turns 65.

The magnitude of the Part B premium increase is still staggering. Compared with current law, it would rise by 1990 to $30.40, instead of $21, an increase of 45%! That is not as precipitous as the increase included in some earlier plans, but most of the harm would remain.

As to the other cuts envisioned by the package as it now stands, the Part B deductible increase would simply shift costs from the program to the beneficiary. The delay in coverage serves no policy purpose but to save money, and leaves tens of thousands of older Americans each year exposed to potentially ruinous health care expenses.

These may not be the exact cuts that need to be made if the package remains unchanged. But whatever cuts are substituted

would have to be at least as severe, or they would not generate sufficient savings.

The Chiles-Kennedy-Byrd amendment would prevent these cuts, and is virtually identical to provisions approved unanimously last month during Senate Budget Committee deliberations.

The Kennedy-Rockefeller-Riegle-Matsunaga amendment would restore $2.6 billion of cuts in Medicaid, discretionary health and health manpower programs over the next three years. Even after the floor amendment passed by the Senate last week, cuts in Medicaid in the package now before the Senate exceed those included in the Senate Budget Committee plan. Medicaid has already suffered $4.7 billion in cuts over the last four years. Older and younger poor people who are fortunate enough to be covered by Medicaid—and only half of them are covered—risk reduction in benefits or loss of eligibility. Just as would the Medicaid cuts, further reductions in discretionary health programs would almost assuredly increase the 35,000,000 Americans who are now shut out of the health care systems altogether.

The Kennedy-Rockefeller-Riegle-Matsunaga amendment would protect against these inhumane cuts.

We urge your support for these two measures which, taken together, can help preserve the already inadequate level of care available to older people and poor people of all ages in this country.

Thank you for your consideration.

Sincerely,

American Association of Homes for the Aging; American Association of Retired Persons; Asociacion Nacional Por Personas Mayores; Association for Gerontology in Higher Education; Gray Panthers; National Association of Area Agencies on Aging; National Association of Foster Grandparent Program Directors; National Association of Mature People; National Association Meal Programs; National Association of RSVP Directors, Inc.; National Association of Senior Companion Project Directors; National Association of Retired Federal Employees; National Association of State Units on Aging; National Caucus and Center on Black Aged, Inc.; National Council of Senior Citizens; National Council on the Aging, Inc.; National Interfaith Coalition on Aging; Older Women's League; Retired Members Dept./ United Auto Workers; The Viller's Advocacy Associates; American Society on Aging; National Association of Nutrition and Aging Services Programs.

AMERICAN HOSPITAL ASSOCIATION,
Washington, DC, April 19, 1985.

Hon. LAWTON CHILES,
U.S. Senate,
Washington, DC.

DEAR SENATOR CHILES: On behalf of the American Hospital Association's 6,100 member institutions and 38,000 personal members, I am writing in support of your amendment to restore funds for Medicare to the First Concurrent Resolution on the Budget for Fiscal Year 1986. The Resolution as currently written is unacceptable because it proposes reductions in Medicare spending that go well beyond a freeze, and that would result in significant reductions in payments to certain hospitals.

The AHA recognizes the importance of reducing the federal deficit and is willing to do its share. However, reductions in Medicare proposed in S. Con. Res. 32, on top of the more than $20 billion in cuts in Medicare enacted by Congress since 1981, will once again place the burden of reducing federal spending upon the nation's 30 million elderly and the health care institutions that serve them.

Your amendment will lessen the impact on hospitals of a freeze on Medicare payments, particularly those that serve as referral centers and treat the most complex cases. Under the budget resolution as currently written, hospitals receiving education-based payments would have to spend reserves, cut services, and eliminate more than 25,000 staff, or shift costs to the private sector. Because institutions receiving these payments are an important source of referral care in their states and communities, the availability of their referral services to many beneficiaries could be jeopardized seriously by artificially imposed reductions in payments.

Hospitals have responded strongly and positively to the incentives of the new prospective pricing system and saved the Medicare system several billion dollars over the past two years. We continue to believe that a freeze on Medicare payments to hospitals threatens the successful, complete implementation of this system. However, in view of the alternatives, your amendment presents the best hope for fair and equitable treatment of hospitals in the FY 1986 budget.

Sincerely,

JACK W. OWEN,
Executive Vice President.

NATIONAL ASSOCIATION OF COUNTIES,
Washington, DC, May 3, 1985.

Hon. LAWTON CHILES,
U.S. Senate, Washington, DC.

DEAR SENATOR CHILES: The National Association of Counties shares the concerns of Congress about reducing the deficit and, therefore we support an overall freeze on fiscal year 1986 expenditures, exempting means tested entitlement programs that serve the neediest. County governments also share the same concerns about the financial stability of the Medicare Trust Fund, and as major purchasers and financiers of health care, we strongly support efforts to contain health care costs.

However, we believe that equity, fairness and the long term impacts of proposals must be carefully considered. Therefore, we are concerned about proposals to cut funding under Medicare for graduate medical education programs that provide subsidies to hospitals for indirect and direct teaching costs.

Without these teaching programs public hospitals and others who serve as a health care safety net for the poor and elderly will no longer be able to attract or retain the high quality medical staffs that enable them to meet the growing proportion of needs for both the sponsored poor (Medicaid) and particularly, the unsponsored poor. The National Association of Public Hospitals data indicate that the direct and indirect teaching adjustments now contribute an average of $1.6 million a year to their member teaching facilities, a majority of which are county owned. This loss in revenues would require immediate and substantial service reduction, jeopardizing access to quality health care for millions. Many other hospitals across the country would also be affected in their ability to continue providing free care to the needy.

Counties, nationwide, not only own many of these hospitals, but provide billions of dollars in charity care to hospitals regardless of ownership. County governments who spend over $25 billion on health care, have, increasingly seen more uninsured and indigent patients, and have needed to depend upon their own and other hospitals to share the expense of their care.

It should come as no surprise that counties, as financiers and providers of last resort for the nation's poor and elderly are deeply concerned about potential reductions in direct and indirect teaching support under Medicare given the following trends:

subsidies for care to the unsponsored poor are falling increasingly out of step with demand;

competitive forces are stimulating an increasing shift of "unprofitable" patients to county facilities;

increasingly Medicaid reimbursements are inadequate in terms of rates and coverage for both inpatient and outpatient care;

impacts of national rates under the Medicare PPS Program are uneven and inadequate and will soon be combined with a potential freeze on DRG reimbursement and loss of the capital pass-through;

HCFA continues its unwillingness to recognize the unique needs of "disproportionate share" facilities;

there is a potential loss to the nation's counties of $4.6 billion in general revenue sharing funds, which in many counties are entirely earmarked for health services;

there are negligible opportunities for cost-shifting other than to the local tax base with a minimal percent of our patients covered by private insurance.

We urge you to support any efforts to lessen cuts in the indirect teaching adjustment under Medicare and to ensure that any Medicare reduction or freeze proposals exempt facilities treating a disproportionate share of poor people.

Sincerely,

PHILIP B. ELFSTROM,
President.

BACKGROUND ON MEDICARE BENEFICIARY OUT OF POCKET COSTS

	Past		Current		Projected			
	1975	1980	1985	1986	1987	1988	1989	1990
CURRENT LAW

Part B deductible (increase per year)				3	6	9	13	17
New annual deductible			75	78	81	84	88	92

[1] No copayment or deductible.
[2] 20 percent of approved charges. Beneficiaries are also liable for any charges in excess of the "approved" amount. In 1982, this excess amount, on average, was 24 percent of the total charge. Stated another way, the beneficiary then paid 44 percent, on average, of total charges. This differential is affected by a freeze on reimbursement amounts paid to physicians and other Part B suppliers; if the "approved charge" amount is not increased, as is the case in a freeze, it is assumed that many providers would nevertheless continue to increase charges with the total difference added to the beneficiary liability. Between 25 and 50 percent of total savings realized from provider freezes under Part B could be passed on to beneficiaries if no provisions are made in law to discourage actual charge increases.
[3] Under current law, Part B premium charges are based on an amount which would be equal to 25 percent of total Part B program costs. As total Part B program outlays go up, or are cut back, estimated premium amounts also increase or decrease. Current law premium estimates in this chart, as well as proposed premium increases, assume the same proposed cuts in total Part B outlays.

Financial Burdens of Out-of-Pocket Spending by the Elderly, 1985

(Judith Feder, William Scanlon, and Marilyn Moon)

At 7.4 percent of all federal outlays, Medicare has become a prime target for efforts to control the federal budget. One strategy to reduce federal spending for Medicare is to increase the amount elderly citizens contribute to its financing—primarily by raising premiums. The Reagan administration has proposed raising the Medicare Part B premium over time, so that in 1990 that premium would finance 35 percent of Part B expenses, compared to the 25 percent it now finances. Relative to other proposals to raise the elderly's contributions, the proposed premium increase has several advantages. It spreads the new financing across all beneficiaries, not just people who use care; therefore involves relatively small dollar amounts per person ($70 annually) if fully applicable in 1984, and is simple to implement.

Unfortunately, this proposal's equal treatment of all elderly raises serious questions of fairness. All elderly are *not* financially equal, and this proposal would burden the lower income elderly far more than the better off. The average expenses on medical care by the elderly, already absorb a share of income that can be considered "catastrophic." While the better-off elderly may be able to contribute more to their medical care financing, even relatively small increases in charges to lower income elderly exacerbate financial burdens that are already extreme.

Health insurance is generally considered inadequate if it leaves insured people open to the risk of catastrophic expense, typically defined as expense exceeding 10 to 15 percent of income. In 1984, elderly citizens spent an average of 13.3 percent of income on medical care. That figure clearly falls in the catastrophic range and does not even include spending on nursing home care, which all by itself is catastrophic for most people who use it.

Averages, however, disguise the variation that occurs among the elderly. The poorer elderly experience far greater burdens than the better off (Table 1). More than a quarter of the elderly with incomes less than $5,000 spent 18.3 percent of their incomes on medical bills in 1984, compared to less than four percent for the small proportion of elderly with incomes above $20,000.

Proposals to increase the elderly's contributions to Medicare-financing would exacerbate these burdens, hurting the poorest the most. Had Part B premiums equalled 35% rather than 25% of costs in 1984—as the administration proposes for 1990—the poorest elderly's out-of-pocket spending would have risen over 2 percentage points to reach over 20 percent of income. Increased premiums would raise spending for the most wealthy elderly only 0.6 percentage points, to 4.4 percent of their incomes.

Private insurance that supplements Medicare does not mitigate the greater burdens on the lower income elderly (Tables 2 and 3). Lower as well as higher income elderly purchase Medigap policies. But even with these policies people with incomes less than $10,000 face out-of-pocket burdens that are two-and-half times greater (as a percent of income) than those of people with incomes greater than $10,000.

Not surprisingly, out-of-pocket burdens are greatest among the sick. If an elderly person needs to use the hospital (and more than a fifth do, every year), burdens are enormous (Table 4). Elderly people who used the hospital spent almost 20 percent of their income out-of-pocket, compared to 11.6 percent by people who did not need a hospital stay. Again, this average disguises the discrepancy in burdens across income groups. Hospitalized people with incomes below $10,000 spent 22.7 percent of their income out-of-pocket, compared to 12.1 percent spent by people with incomes above $10,000.

TABLE 1.—OUT-OF-POCKET SPENDING AS PERCENT OF INCOME FOR MEDICARE BENEFICIARIES, BY INCOME

Income	Current benefits [1]	Expenses [2]	Proportion of elderly
Less than $5,000	18.3	20.6	27.7
5,001 to 10,000	14.0	15.9	42.2
10,001 to 15,000	9.2	10.5	16.1
15,001 to 20,000	7.6	8.7	8.0
More than 20,000	3.8	4.4	6.0
Less than 10,000	15.7	17.8	70.0
More than $10,000	7.7	8.8	30.0
All incomes	13.3	14.9	100.0

[1] Out-of-pocket spending under current benefits.
[2] Out-of-pocket spending with part B premiums increased to 35 percent of part B expenses.

TABLE 2.—OUT-OF-POCKET SPENDING AS PERCENT OF INCOME FOR MEDICARE BENEFICIARIES, BY INSURANCE COVERAGE

Income	Spending	Proportion of elderly [1]
Medicare only	10.1	16.9
Medicare and Medicaid	9.7	15.7
Medicare and private insurance	15.1	63.1

[1] Proportions do not sum to 100 percent, due to exclusion of the elderly who are not covered by Medicare.

TABLE 3.—OUT-OF-POCKET SPENDING AS PERCENT OF INCOME FOR MEDICARE BENEFICIARIES, BY INCOME AND INSURANCE COVERAGE

Income	Spending	Proportion of Elderly [1]
Medicare only:		
Less than $10,000	11.4	13.7
More than $10,000	4.6	3.2
Medicare and Medicaid:		
Less than $10,000	10.0	14.5
More than $10,000	[2] NR	[2] NR

Marital status:			
Married	55.1	49.6	52.5
Widowed	34.7	38.6	37.6
Average income	$9,523	$5,134	$10,311
Average age (years)	72.5	73.5	73.4

[1] Elderly spending more than 25 percent of income out-of-pocket.

Mr. KENNEDY. Mr. President, how much time remains? Mr. President, I yield myself 4 minutes.

The PRESIDING OFFICER. The Senator from Massachusetts.

Mr. KENNEDY. Mr. President, this amendment is designed to protect 30 million elderly and disabled Medicare beneficiaries against the unfair cuts in the Republican budget package. We went part way toward restoration of these cuts last week—and now we have the chance to finish the job.

This year is the 20th anniversary of the passage of Medicare. It is ironic that at the end of two decades, this budget package proposes to break the promise of one of the most successful social programs ever enacted.

We know that the original promise of Medicare has already been seriously eroded by runaway inflation and by harsh budget cuts already enacted into law.

The budget package before the Senate will take $9.6 billion out of the pockets of elderly and disabled Medicare beneficiaries over the next 5 years. These proposals are bad enough, but it is even worse that they come on top of deep cuts already enacted in the Reagan years that will take $11.5 billion from beneficiaries over the same period. As a result of the package now before us, plus budget cuts already enacted, America's senior citizens will have to pay an unacceptable $21.1 billion more for health care between now and 1990.

At the present time, Medicare covers less than half the health care costs of the elderly. America's senior citizens will be forced to pay an average of $1,800 this year out of their own pockets to purchase the health care they need. That $1,800 represents fully 15 percent of their total income—the same percentage they had to pay for health care in the dark days before Medicare was enacted.

We have heard a great deal in this debate about the administration's opposition to a tax increase. But in fact the premium increase is a tax that makes senior citizens pay more for Medicare. A tax by any other name is still a tax, even if it masquerades as a premium increase. Let there be no mistake—the Republican leadership package on the budget imposes a tax increase on Medicare that will make every elderly American pay over $100 more each year for the benefits they now receive.

Under current law, the annual part B premium is scheduled to rise from $186 today to $252 in 1990. That 1990 level is already $77 higher than it would be without the Reagan premium increases enacted in the past 4 years. Now the Republican leadership package wants to rub salt in the wound, by raising the part B premium to $364 in 1990. That is a new tax of another $112, on top of the $77 tax already enacted.

We all know that large numbers of the wealthiest corporations in America are paying no tax at all. More than half of America's 250 largest corporations paid no tax in at least 1 of the last 3 years, despite profits of $57 billion. But here, the Republican double standard comes into play. They say they oppose a tax increase—and then they offer a plan to tax 30 million elderly Americans by making them pay more for Medicare.

The Senate has already expessed its determination to preserve the Social Security COLA increase. But the true effect of the Medicare provision in the Republican package will be a back door cut in the very COLA we are trying to save. By 1990, the increased Medicare premium under the Republican proposal will eat up 40 percent of the Social Security COLA. And for the 15 million beneficiaries below the median Social Security benefit, the Medicare premium increase will absorb 60 percent of the COLA, and drive many elderly beneficiaries below the poverty line.

The leadership budget package is also objectionable because it delays Medicare eligibility by 1 month—from the first day of the month in which the beneficiary turns 65 to the first day of the month after the 65th birthday.

Over the next 5 years, this proposal will cost the elderly $1.5 billion. When the Finance Committee brought this idea to the Senate last year, their own figures indicated that 160,000 elderly beneficiaries would suddenly become vulnerable to uninsured illness during the month that their eligibility was delayed.

Two years ago, Congress recognized that it is wrong to raise the age of eligibility for Social Security. We should recognize today that it is wrong to raise the age of eligibility for Medicare.

Finally, the Republican budget contains another misguided provision that will penalize teaching hospitals under Medicare. Current law is designed to compensate these hospitals for the legitimate additional costs not recognized by the DRG system that they experience because of their commitment to provide health care. Precipitous elimination of this provision is unfair, and will only jeopardize the essential charitable care that these institutions now provide.

The issue before us on Medicare is the same one we faced on Social Security. Does Congress intend to keep the Nation's promise to care for the elderly in their retirement years? Social Security and Medicare are the twin pillars of dignity and security for 30 million senior citizens. I urge this Congress to honor the solemn commitment America has made—and to keep these pillars strong.

The PRESIDING OFFICER. The time of the Senator has expired.

Who yield time?

Mr. MATSUNAGA. Will someone yield me time?

Mr. KENNEDY. How much time remains?

The PRESIDING OFFICER. One minute remains.

Mr. KENNEDY. I yield 30 seconds to the Senator from Hawaii.

Mr. MATSUNAGA. Mr. President, as a cosponsor, I rise in strong support of the amendment offered by the Senator from Florida [Mr. CHILES] and the Senator from Massachusetts [Mr. KENNEDY].

Mr. President, I voted in favor of the earlier Packwood amendment No. 50 to reduce some of the Medicare and Medicaid cuts included in the budget package now before the Senate. We voted 93 to 6 last Friday, May 3, 1985, to approve the amendment of the chairman of the Finance Committee. I believe this vote demonstrates the concern of the Members of this body regarding the need to reduce the increase in out-of-pocket costs to the elderly; however, it goes only part of the way.

Over the past 4 years, major reforms have been made in the Medicare Program. The prospective payment system [PPS] has been implemented for reimbursing hospitals for the treatment of Medicare patients—fundamentally overhauling the Medicare part A reimbursement system. This and other changes in Medicare should be allowed to take effect before being undermined by yet another round of major Medicare cuts. Medicare cost containment measures have been enacted, many of which have added to the health care expenses of beneficiaries.

Mr. President, we should all be seriously concerned about the proposed cuts that directly affect our Nation's elderly beneficiaries. Although the home health copayments and part B deductible increase have been eliminated and the part B premium increase has been moderated by the amendment we passed last week, the budget package before us still retains proposals which require additional beneficiary cost sharing. Some of these proposals, such as the delay in eligibility and the increase in part B premiums, have been rejected repeatedly by this body.

Mr. President, the pending amendment takes us further down the road toward protecting beneficiaries from even higher out-of-pocket costs. It should be remembered that in 1984, Medicare paid about 45 percent of the elderly's medical bills. Senior citizens now pay an average of nearly $2,000 annually for needed health care. Fur-

thermore, there are many gaps in Medicare coverage. To cite a few examples: There is no protection against catastrophic expenses; there is no coverage for prescription medicine; there is limited coverage for long-term care; and there is a serious coverage deficiency relating to occupational therapy services, which hopefully can be ameliorated if S. 723, a bill which I introduced, is enacted into law.

While we need to control expenditures, the burden must not be unfairly borne by those who can least afford to bear it. Out-of-pocket expenses by older Americans for health care have actually increased in recent years. According to the House Select Committee on Aging, such expenses represented 15 percent of their mean income in 1984—up from 12 percent in 1977, and about the same percentage as in 1966 when Medicare was first established. High Medicare Program outlays are caused primarily by the rapid escalation of medical costs and by demographic trends. These systemwide cost inflation problems must be addressed in a comprehensive and lasting manner that is fair to beneficiaries.

Mr. President, I urge my colleagues to support the pending amendment.

Mr. PACKWOOD addressed the Chair.

The PRESIDING OFFICER. The Senator from Oregon.

Mr. PACKWOOD. Mr. President, it is understandable why this amendment is offered by my good friend from Massachusetts, the leading proponent of national health insurance in this body. What he wants to do is load every conceivable cost that he can onto the Federal Government. Take a look at the package we have. It is a $16.3 billion reduction over 3 years in a program that is going to cost $268 billion; $268 billion more we are going to spend. And you tell me we cannot find savings of $16.3 billion?

He mentioned beneficiaries. Let us look at where the $16.3 billion comes from freezing prospective payments to hospitals, freezing nonparticipating physicians, freezing chemical laboratory fee schedules, and on and on and on. A relatively slight amount comes out of the beneficiaries. When the initial package came here, a fair portion more in terms of Medicare and Medicaid came out of the beneficiaries. We have taken care of the great bulk of that problem.

At the moment, the so-called part B premiums for hospitals costs $15.50 a month now. If we do not change the law at all, they will pay $19.50 in 3 years. This says you will pay $3 a month more.

Second, he talks about the part B, $75 payment of physicians. We index it. It is hardly something that is going to bankrupt anybody.

Then he talks about the delay of eligibility, something that has overwhelmingly passed the Finance Committee twice.

Most people retire at 62. You are not eligible for Medicare until you are 65. between 62 and 65 they are indeed at risk.

His amendment, this bill or the present Medicare system does not take care of them. They find private insurance some place.

For those who do work until they are 65 and retire today on the 15th of the month, they become eligible for Medicare on the 15th of the month.

But interestingly, 90 percent of the people who are employed in this country who have health insurance, and that is almost everybody, 90 percent have a clause that covers them for 30 days after retirement.

So what is happening is Medicare is picking up this cost that could be paid for by their private companies.

Those are the three beneficiary positions that we slightly touch, roughly $1.5 to $2 billion the best we can figure out of a $16.3 billion package in total expenditures of $280 billion.

If we cannot find those kinds of savings in this kind of a program, there are no kinds of savings that can be found in any kind of a program.

Mr. President, I yield the floor.

Mr. KENNEDY addressed the Chair.

The PRESIDING OFFICER. The Senator from Massachusetts.

Mr. KENNEDY. Mr. President, when we passed Medicare some 20 years ago we passed it with the understanding that we were not going to penalize the senior citizens for the failure of this body or the national administration to deal effectively with health care cost control. If the health care costs went up or if we got into a deficit, we were not going to put those costs on the backs of the elderly people.

But, Mr. President, nothing the Senator from Oregon said has challenged that they are going to have to pay $21 billion more if this plan is enacted in combination with the Reagan cuts already enacted.

Mr. President, I ask unanimous consent that a statement by the Senator from Minnesota be printed in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD as follows:

Mr. DURENBERGER. Mr. President, if I may reply to the amendment of the distinguished Senator from Masachusetts, I will start, as I always do under these circumstances, with my compliments to the Senator for his sensitivity to the issues involved and for his long and distinguished record and commitment.

I agree with a lot of the things he said. I come to different conclusions, however, which I rise now to strongly present my opposition to his amendment.

Clearly, the first thing I agree with is the statement he made after he explained his charts to us. That is the whole issue that we are dealing with today in the middle of reconciliation looks to America like a budgetary issue of balancing the deficit on the backs of elderly Americans. In reality, it is a much larger issue that we desperately need to deal with, and we ought to make it the No. 1 issue before this Congress when we return in January.

Let me start out with one minor clarification. Before I came to the floor, I was informed that the Senator had additional remarks and made reference to the Finance Committee package as the Republican package. If I am correct in that information, I certainly want the record to show that on passage of this package of medicare amendments, the vote in the Finance Committee was 20 to 0, a unanimous bipartisan agreement.

With regard to the premium provisions which are part of the Senator's amendment, the vote was 17 in favor and 3 opposed. Among the three opposed, one was Republican and the other two Democrats.

Mr. President, let me make a couple of general remarks, again by way of clarification.

The medicare program is composed of two separate programs. Part A of medicare covers inpatient hospital services and is a statutory earned right benefit. Part B, on the other hand, is an optional supplemental insurance program that covers physician and limited outpatient services.

Senator Kennedy's amendments deal only with part II of medicare, the premium-related issues and his other amendment that deals with physician fee freezes. I want to emphasize that what we are talking about here is part B, the doctor portion of medicare. And I think most of our colleagues understand that there is some difference between these two programs besides the kinds of services they cover and their respective costs.

Part A, the hospital insurance program, is often referred to as an entitlement program. Part A is funded entirely out of the medicare trust fund, which is, as we all know, paid for by a payroll tax on all employed persons in this country.

When we talk about the problems that medicare is facing, when talk about the big red cliff we are starting to slip off of on the Senator's chart, we are talking about part A of medicare—the hospital expense portion of the program. And this is the program that is costing you and me 1.3 percent of our payroll today.

These amendments, however, do not address the financial instability of the hospital insurance trust fund. They only pertain to part B, which was designed to be an elective health insurance program for the elderly. It was originally designed to provide outpatient doctor and medical services at less expenses than could be provided in the private insurance market. In that respect, I think we ought to look at if as an insurance program.

Part B is financed entirely from general tax revenues. It is not payroll specific. We do not have an alcohol tax, a cigarette tax, or some other kind of dedicated tax going into this fund. It is the general revenue fund which pays a significant portion of is cost.

From the beginning of this program, to keep it in the context of traditional insurance, the decision was made that half of part B program costs would be borne by the Government and half of the program costs would be borne by the person buying the insurance.

But things have changed since 1965. What has changed about this particular insurance program is that we have largely done nothing about controlling the percentage that you and I, were we 65 or older, contribute to the total of these program costs.

That particular percentage has been slipping back and back to where it got back to the point, in the last few years, where it totaled something slightly less than 25 percent of those program costs. The Government's share, on the other hand, the part that comes out of our general tax dollar, is the proportion of these costs that has been getting larger and larger, So, when you look at the Senator's charts, you see inflation rising and hospital costs rising. And the Government's share of part B program costs is picking up a large share of these inflation cost increases. The beneficiary's contribution to program costs has been staying pretty level, while the general taxpayers have been bearing the burden of health care inflation.

That is a point that I shall try to deal with in more specific terms, but let me go back and make a general comment that fits into the general context of who is bearing this cost burden. The hard defense for medicare is that unless we have elderly parents, as the Senator and I and many of the people in this room have, there is a presumption that when we talk about the elderly, we are talking about an impoverished part of our population. So when the Senator says we are loading more and more of the burden of inflation on the elderly, you have the picture of the bag lady on the streets of New York sinking under the weight of medicare. But I guess that just "ain't necessarily so," Mr. President. My mother and father are not sinking under that load. Yes, it is a load, but they manage to provide the capacity to deal with it. Claude Pepper, I am sure, has the capacity to deal with it on the kind of income he takes in.

But there are a lot of people who cannot afford to carry this load, and yet we charge millionaires and the poor the same amount to purchase coverage under part B of medicare. This is not, however, the place to debate that issue. But that is why I have introduced legislation that reduces part B premiums for the poor and requires those that can afford it, to contribute a greater share of their income to the costs of the part B program. Hopefully, next year, we will be ready to debate his issue.

The Senator also indicated that all of these people are not the cause of the problem and therefore, why should we penalize them? I think it is a fair statement to say that we cannot blame my mother for the facts on those charts. But she has contributed. And so have all the rest of our moms, and so have you and I, Mr. President. We have all, in one way or another, contributed to the growth of our Nation's health care costs.

As employers, we have given people something called health insurance and it is not health insurance anymore; it is a free ride on the health care system. It is a ride that says it does not cost you anything to get sick in this country. Medicare agreed to pay Barney Clark $200,000 to experiment with an artificial heart. He had the opportunity to experiment because he smoked 2½ or 3 packages of cigarettes every day for 25 years. But there are no penalties for unhealthy lifestyles. Only rewards: If you smoke, we shall take care of you.

There was a recent Tax Court decision where a man had emphysema. It was so bad, his doctor told him he had to get exercise to help his breathing. The doctor suggested swimming so he built a swimming pool next to his house and the Tax Court let him take $25,000 off his taxes for that pool.

Now he got the emphysema because he smoked three or four packs of cigarettes a day. We all contribute to the rise in health care costs. I can tell you about my visits to the orthopedist because I had this pain in my back and if I had taken better care of myself, would I have run up that bill? We can all tell stories about how, in one way or another, we all contribute to this problem.

I think what the Senator from Massachusetts has been at for a number of years and what I have been at for a lesser number of years is recognizing that fact and trying to deal with it. Today I feel we are not in agreement as to how to deal with it.

I believe in making people face up to the financial consequences of their actions. We are contributing in part to this recognition through copayments and deductibles. Particularly when we get to the part here on the part B deductible. Although it costs you an extra 3 or 4 percent each year, to go into the hospital, it also is an incentive to find out from your doctor if maybe he could do it at the clinic rather than send to the hospital. So does it hurt to have a $75 bill that goes up to a $79 bill and then an $83 bill just to say, "Hey, Doc, do I really have to go into the hospital?"

So, in part, what the Finance Committee is proposing, even though it may look as though we are, in the words of the Senator, loading more of the burden of inflation on the elderly, is that whether you are young, old, middle-aged or whatever, it is appropriate for all of us to be part of the solution to the problem of increasing health care costs. It is incumbent upon us here not to load the whole financial burden for solving this problem on any one section of the population.

What has the Finance Committee done over the last 4 years or proposed that we do here in the Senate? The so-called medicare savings, the savings from the growth in medicare—where has that burden fallen? Without the provisions in the Finance Committee proposals, 56 percent of the so-called savings, the cuts in medicare, would be on hospitals; 22 percent would be on beneficiaries, 8 percent on physicians, and the balance on all other providers. So, in other words, 22 percent would be on beneficiaries and 78 percent would be on the providers out there—the hospitals, the doctors, the nursing homes, and so forth.

If you adopt the committee provisions, the Senator is correct that, to a degree, a part of that burden is somewhat larger for the beneficiaries. It goes from 22 percent to 28 percent. But still, Mr. President, 72 percent in the last 4 years, or over a 4-year period of time, is being pressed on the provider. So on an equity basis, if you will, I support this small increase. Regardless, three-fourths of the cuts in medicare have been loaded on what has been up until recently a basically cost insensitive provider system: the hospitals, the doctors, the nursing homes, and so forth.

To look at the per capita, from the standpoint of the individual, per capita out-of-pocket costs in 1984 for health care will equal 15 percent of an older person's average income. That is the same as in 1966 before medicare was fully implemented. So, as a percentage of my mom's income, what she has to pay out in health care out-of-pocket expenses today is the same as it was in 1966. But assuming she was a recipient in 1966, what does she have today that she did not have then? I shall just name a few things and this is not all inclusive: kidney dialysis, artificial hips, coronary by-pass surgery, CAT scans, and a variety of other things out there that prolong her life, enriching her life, providing opportunities for her that were not there for the same percentage of her income almost 20 years ago.

According to some experts who recently testified at a conference the House Ways and Means Committee held on the future of medicare, about 30 to 50 percent of hospital cost increases today can be attributed to improvements in treatment and technology.

Now, there is no doubt about the fact that elderly in this country are getting more under medicare today than they were in 1966. One sure way to contain costs is to limit available treatments to what they were in 1966, but I am not going to ask that of my mother and I do not think that is fair to ask of anybody in this country. All we are asking is that the elderly bear a share of the cost of these extraordinary medical advances, most of which benefit people 65 and older.

If we fail, Mr. President, to contain medicare costs, it hurts everybody, including the beneficiaries. The depletion of the medicare trust fund imperils the benefits that senior citizens depend on, and a deficit fueled by growing medicare costs drives interest rates higher and higher for everybody.

Without the medicare changes contained in the committee amendment, the cost of the program will increase by approximately 12.2 percent between 1985 and 1986. Even with the modest changes, we suggest the rate of growth will still be 10.8 percent.

The easiest answer for containing medicare costs is for Government to simply pay hospitals and physicians less. That was, I think, the reference of the Senator from Massachusetts to the old hospital cost containment legislation that we had on this floor back in 1979 and 1980. The theory is just to regulate away health care cost increases, but, unfortunately, Mr. President, it just is not that simple. If hospitals do not get enough money, what do they do? They ration services. It is inevitable. That has happened in Great Britain, and I could probably haul out a lot of examples of it.

The best way to contain costs is through a balanced approach such as that we believe is contained in the Finance Committee bill, an approach that encourages efficiency and discourages unnecessary utilization. Beneficiary cost sharing is a very important element of an efficient medicare program as it is a necessary element of any health insurance program.

The idea of cost-sharing, as I indicated earlier, is to deter unnecessary utilization and thereby to dampen the spiraling health care costs as we have demonstrated by studies time and time again. The most comprehensive study to date found that higher copayments do deter unnecessary utilization. While that study did not include the elderly, it demonstrates what we all know, and that is that free care leads to increased use of medical services.

Under the medicare program, for example, between 1971 and 1980, the average number of home health visits per 1,000 enrollees, which requires no cost-sharing increased by 297 percent. So it is not unreasonable to ask our senior citizens to share to a degree on the cost of medical care. Their share is manageable. The majority of people, 57 percent of the noninstitutionalized elderly in 1980, had out-of-pocket ex-

penditures of less than $200. Ninety-four percent had out-of-pocket expenditures of less than $1,000. The median of all out-of-pocket expenditures was a mere $153.

Reform of beneficiary cost-sharing is needed but not in the form that these amendments take. What is needed is catastrophic expenses protection, protection medicare beneficiaries do not now have. A medicare patient in the hospital for 150 days could under present law incur $13,000 in out-of-pocket expenses. That, Mr. President, is unreasonable, and it is for that reason I have introduced legislation to provide beneficiaries with catastrophic expense protection.

Just a couple of comments, Mr. President, specifically about the part B premium. The President, just before we came back to this effort this year, had specifically requested that we make every effort not to place an unreasonable burden on beneficiaries. As a result the original Finance Committee proposal, which was to increase the part B premium to 35 percent of program costs, passed by a majority vote and a bipartisan vote, was thereafter modified. The final proposal now holds the premium at 25 percent of program costs.

As I indicated earlier, part B premiums were originally designed to cover 50 percent of program costs but has now slipped below 25 percent. The committee is merely proposing that we, as an insurance program, hold it to 25 percent of program costs. If permitted to revert to current law, the premium would represent only 18 percent of program costs for the elderly by the year 1989.

Over the last 10 years, beneficiary part B premiums have increased 94 percent while the Government contribution to the costs of part B, as we illustrated earlier, have increased by over 275 percent. When compared to other cost indices for the same time period, part B premium increases have fared well.

The part B premium has gone up 94 percent. The cost of transportation has gone up 142 percent, the cost of housing has gone up 135 percent, and the elderly average cash benefit from social security has been increased 155 percent. So the income from social security has gone up 155 percent, and the cost of other things that the elderly depend on like housing and transportation has gone up more than has the percentage of income the elderly contribute to the part B premium.

I would remind you again, Mr. President, that only one-third of the cost of the medicare programs is in part B. The other two-thirds, $44 billion in fiscal 1984, is in part A, the hospital part, where there are no contributions other than the deductible for the first day in the hospital and some other deductible later on in the stay.

Insurance premiums increase as the cost of care increases. Availability of more and better services has contributed to the rising cost of health care. If part B only covered the services it covered when the program was enacted, we could easily keep the premium costs to a minimum. So when we say that Government's part B expenses have increased 275 percent over 10 years, we are really saying that the taxpayer's expenses have gone up. Are we now going to tell working Americans that they not only have to shoulder the burden of their own health insurance premium increases, they not only have to share the burden of increased expenses for part A but also an increasing share of an insurance program for elderly Americans that has in it no test for means?

Mr. President, I conclude with some remarks about the Senator's proposal to index the part B deductible. I think he said. If I heard him correctly that the reason for the amendment is to overcome the Finance Committee proposal which has the effect of preventing people who are most in need of doctor care from receiving such care.

Well, let me give you some numbers for the record. First, the Finance Committee proposal is for 3 years only. Second, the 1981 Reconciliation Act increased the part B deductible by 25 percent from $60 to $75. Prior to this amendment, the deductible had remained at $60 since 1972. And you can go over and look at the Senator's chart if you want to know what happened to the cost of services under part B since 1972, but the deductible stayed at $60 until we moved it to $75.

Since 1981, benefit payments have increased by an additional 80 percent. Between 1972 and 1981, benefit payments per enrollee increased by 250 percent. Since 1981, per enrollee payments have increased by an additional 56 percent, and they are expected to continue to increase by 13 percent a year for fiscal year 1988, at which time the average benefit payment per enrollee could exceed $1,130.

The deductible was intended to reflect a portion of program costs, and it failed to do so because it has been fixed too long too low. The real value of the deductive will continue to erode if no increase is put in place. Will this prevent people from going to see a doctor?

In 1985, the deductible was increased by $3 a year, or less than 4 percent, while part B costs are expected to increase by 16 percent. In 1986, it would go up to $82; that is a $4 increase. In 1987, it would go up to $86; that is a $4 increase or a 4 percent increase.

Mr. President, I know there are others who want to speak to the issue, particularly the chairman of the Finance Committee. I will conclude, perhaps, where I started, with my compliments to the Senator from Massachusetts for these annual or semiannual visits we pay to the floor on this subject and the growing frustration on the part of each of us that, this body—and I suppose that means this country—cannot raise the burden of the cost of health care to the level where it might be the No. 1 issue when we return here in January.

The Senator from Massachusetts and I have somewhat differing views on how to solve that problem, but they seem to be getting closer and closer all the time. In 1979, when he was fighting for hospital cost containment, Dick Gephardt and I were talking about choice and competition. Now, Gephardt is talking to me and the Senator from Massachusetts, which I assume means that, somehow or other, I must be leaning from my direction toward the middle and the Senator from Massachusetts may be leaning from his direction toward the middle.

I hope that the help that he and others on both sides of the aisle have given on prospective payments on expanding that in the future, on competitive medical plans, on providing realistic State waivers such as he has in Massachusetts for peer review, for taking a look at catastrophic and the problems of long-term care, which helps to raise that issue, for dealing with the poor, dealing with the issues of high tech, issues of medical education, issues of capital, on which there is very little difference among us—I hope that we can continue that part of the process, even though we disagree here today about the impact that small additional cost-sharing for the beneficiaries of this system may have on their access to the system.

The reality is that the things I have just talked about—the move to prospective payment, changing the way we think and the way providers think about the way they deliver health care—are very significant. Moving to vouchers is very significant.

A lot of the reform we have engaged in sort of behind the scenes, without this elaborate debate, has changed the system, and it is starting to work. The estimate that the actuaries for the medicare trust fund have today as to how much that trust fund is going to pull in for the next year is actually $6.5 billion less than they had anticipated last year. That is not because we cut money out of the fund. It is because there is that kind of reform taking place in the delivery system.

I suggest, Mr. President, that in part, that is due to the fact that each of us, as purchasers of health care, is more sensitive to our role in that purchase decision. Also, we are more sensitive to the role that our health itself plays in those figures. For that reason, I will urge my colleagues to oppose the Senator's amendment.

I think each of the proposals we have made has been sensitive. It has had a purpose to it that is different from just balancing the budget on the backs of beneficiaries. I do not think it is overly burdensome toward any one group of people or any one institution who all contribute in one way or another to the problem.

The Finance Committee says it should be 25 percent to the beneficiary, 75 percent to the provider. It seems to me that that is a pretty equitable distribution of the burden of reform in this process.

Mr. President, I yield the floor.

Mr. DECONCINI. Mr. President, I strongly support the amendment offered by Senator Kennedy to eliminate the provisions in the Finance Committee bill which would increase the part B premium and part B deductible for medicare beneficiaries.

Mr. President, I share all of my colleagues' concerns over the long-term solvency of the medicare system, but I do not believe the complexities of the problem can be resolved in a piecemeal fashion, nor do I believe that those least able to afford it—medicare beneficiaries—should be asked to shoulder a disproportionate share of the burden.

Under the Finance Committee bill, the part B premium will be increased to an amount necessary to cover 25 percent of program costs. This will cause the current premium rate of $175.20 annually to almost double by 1990. If Senator Kennedy's amendment is adopted, the premium will increase by no more than the increase in the social security COLA, thereby insuring that medicare beneficiaries will not have to expend an increasing proportion of their limited incomes on health care.

It is important to note that the elderly already spend an average of $1,500 per person, or $1 in every $7 of their incomes, on medical care each year. Much to the amazement of many Americans, medicare only covers approximately 40 percent of the elderly's medical care expenses. The burden on medicare beneficiaries would clearly be exacerbated if the Finance Committee bill is adopted.

Senator Kennedy's amendment would also eliminate the provision of the Finance Committee bill which would increase the medicare part B deductible from the current level of $75 a year to $82 a year by 1990.

While this increase is not large, it is symbolic in the eyes of medicare beneficiaries, many of whom fear that health care, even with medicare, may soon be beyond their reach. I cannot in good conscience support any action which would make their fear a reality.

Mr. President, the Finance Committee bill contains provisions which amount to $9 billion in medicare cuts. Of this amount, beneficiaries will be required to contribute $3.7 billion while physicians will contribute only $1.5 billion and hospitals $1.4 billion. This, in my view, is neither a balanced approach to medicare reform, nor is it an equitable solution. All components of the health care delivery system should share proportionately in solving medicare financial woes. Beneficiaries should not, once again, be asked to contribute the largest portion of the reductions incorporated in the Finance Committee package.

The bottom line, it seems to me, is whether health care in this country is a right or a privilege. If it is a right, as I believe it is, then we should not participate in any action which may put that care out of the reach of the millions of our senior citizens. We should not place our senior citizens in a situation where they are going to have to choose among adequate food, shelter or health care. I, therefore, intend to vote for the Kennedy amendment and urge my colleagues to support it.

Mr. KENNEDY. Mr. President, I ask for 1 more minute or we will have a lot of whereas clauses in the rest of my amendments to take up some time.

Mr. CHILES. I yield 1 minute off the resolution.

Mr. KENNEDY. Mr. President, I would like to read into the RECORD what Senator DURENBERGER, the chairman, said last year when this issue was before us.

Just a couple of comments, Mr. President, specifically about the part B premium. The President, just before we came back to this effort this year, had specifically requested that we make every effort not to place an unreasonable burden on beneficiaries. As a result the original Finance Committee proposal, which was to increase the part B premium to 35 percent of program costs, passed by a majority vote and a bipartisan vote, was thereafter modified. The final proposal now holds the premium at 25 percent of program costs.

Mr. President, this proposal before us is that identical proposal modestly funded back to 30 percent. The President evidently thought it was burden to the elderly last year. I just wonder whether our senior citizens are safe only in election years.

The PRESIDING OFFICER. The time of the Senator has expired.

The Senator from Oregon.

Mr. PACKWOOD. Mr. President, when this program started in 1965 under the so-called part B premium, the beneficiaries were going to pay 50 percent of it.

Mr. President, they now pay about 25 percent. The initial package had them paying 35 percent; the Durenberger-Heinz-Chafee-Packwood amendment cuts that to 30 percent—not 50 percent, which is where we said they should be when we started the program.

I yield to my friend from Texas.

Mr. GRAMM. Mr. President, I thank the Senator for yielding.

When the program started in 1965 and was signed into law, the President said at that time that part A was only going to cost 25 cents per month per person. Now it is $176.50. When my mama signed on to the program, she was paying 50 percent of the premiums. We are debating whether she is going to pay 30 percent of the premiums in 1990.

To talk as if we are denying benefits to people under the reform of this program is a great misstatement of the facts. Medicare is easily one of the most generous benefits that has ever been granted. All we are trying to do here is hold the program in the black, trying to make responsible changes.

The primary thrust of this proposal is to try to institute cost control. I think it is irresponsible to try to add back money that can be saved, that should be saved, for the working people of this country.

I thank the Senator for yielding.

MEDICARE BENEFICIARIES SHOULD NOT HAVE THEIR BENEFITS CUT

Mr. RIEGLE. Mr. President, I rise to support the amendment being offered by Senator KENNEDY to strike the out-of-pocket increases contained in the leadership package. This amendment will restore the cuts being proposed in the Reagan/Republican leadership budget compromise plan. I believe that the Reagan administration's attack on Medicare represents a major shift of direction which threatens to reverse two decades of progress made in improving access to health care services for the elderly and the disabled.

In every year since this administration has been in office, there has been major legislation adopted which has deeply cut into the Medicare Program. Medicare spending was reduced by $15 billion in Reagan's first term. These cutbacks would have exceeded $30 billion if Congress had not balked and refused further reductions. The House Ways and Means Committee has recently costed the Medicare cutbacks through 1988. It is estimated that without further changes in the law, close to $45 billion will be cut from the program by 1988.

Medicare is again being scrutinized for additional spending cuts to help finance the President's ballooning budget deficits. The Reagan/Republican leadership compromise budget plan calls for an additional reduction of $4 billion in fiscal year 1986, and $18.4 billion over the next 3 years. These savings will come not only from providers, but from beneficiaries once again. The compromise package calls for an increase in both the part B—supplemental medical insurance—premiums and the part B deductible. There is also a provision for the institution of a copayment for home health care services. Each change represents an increased cost to the elderly.

It is estimated that the out-of-pocket expenses for the elderly in 1984 was $1,500 for health care and is estimated to increase to $5,000 by the year 2000. The amount that seniors now pay for out-of-pocket health care expenses is equivalent to what was paid prior to the creation of the Medicare Program.

This amendment will restore those additional cuts to beneficiaries which have been included in the Reagan/Republican leadership compromise package. This amendment will prevent the increase in the part B premium which the plan would increase from 25 percent to 35 percent of program costs. It would also prevent the increase in the part B deductible. In addition, this amendment would prohibit the initiation of a home health care copayment. Finally, it would eliminate the provision which would have delayed Medicare eligibility for 1 month after one's 65th birthday.

Mr. President, I urge all of my colleagues to join us in rejecting the increases in the out-of-pocket costs for our Nation's seniors and disabled persons.

Mr. HEINZ. Mr. President, last week I joined with the distinguished chairman of the Finance Committee in offering an amendment which substantially reduces the proposed out-of-pocket costs for health care services paid by Medicare beneficiaries.

Today we are faced with another amendment which, it is claimed, is necessary to eliminate any cost increases beyond current law to elderly Medicare beneficiaries. It will also reduce deficit reduction even further. While the intent of the amendment is praiseworthy and something I unhesitatingly support, the amendment offered by the distinguished Senators from Florida, Massachusetts, and West Virginia, either overshoots the mark or is entirely unnecessary to protect senior citizens. It is therefore fiscally irresponsible.

Before discussing the relative merits of the Chiles/Kennedy/Byrd amendment, it is important to review what the Senate has already done to relieve the burden on Medicare beneficiaries when it enacted an amendment I cosponsored with Senator PACKWOOD. That amendment, which was aimed totally at reducing cost sharing by beneficiaries, would save a total of $16.3 billion over the next 3 years out of a total anticipated Medicare expenditure of $216 billion, or about 7½ percent. Virtually all of this relatively modest savings can and should be achieved by holding down payments to providers—Mr. President I emphasize

providers not beneficiaries—and eliminating waste, fraud, and abuse.

The amendment we passed last week retained the full participation of physicians and hospitals in the effort to control Medicare costs while at the same time eliminating major cost-shifting onto beneficiaries. First, the amendment eliminates the copayment on Medicare home health visits, which in effect, would have been a tax on the sickest and most frail citizens. At a time when patients are being discharged from hospitals sicker and quicker under the new payment system, this amendment assured that we would not be making it even more difficult for them to receive urgently needed medical care at home.

Second, our earlier amendment also eliminated the increase in the part B deductible, and slowed the rise in the part B premium to a reasonable level. It also reduced the cut in direct medical education funds in those hospitals that tend to provide much of the care to the poor and uninsured.

Moreover, Mr. President, our amendment provided substantial protection to the Medicaid eligible population—our poorest citizens—by eliminating the proposed "cap" and by reducing proposed cuts by nearly $1 billion. A "cap" would have changed the very nature of the Medicaid Program and would have jeopardized our fundamental commitment to low-income persons. I am speaking of older Americans in nursing homes, SSI recipients and AFDC families. We cannot turn our backs on persons who most need and deserve some protection. Our amendment acknowledged the commitment of this body to protect the truly needy.

The Chiles/Kennedy/Byrd amendment would increase the deficit by approximately $4.6 billion. The proponents of this amendment claim that their primary purpose is to relieve the burden on the Medicare beneficiary. But even if my contention that the savings required by the Packwood amendment can be obtained without any extra financial burden on beneficiaries proves to be an inaccurate prediction, this amendment does much more than that. It would, for example, add back to the budget over one-half billion dollars for payments to hospitals by allowing an additional one-quarter percent adjustment over the hospital market basket in fiscal years 1987 and 1988.

Mr. President, I am sympathetic to the concerns of those hospitals, especially the large inner-city and small rural institutions, which are being badly squeezed by the new prospective payment system. We must ensure the financial viability of these institutions so that essential care continues to be provided to the most needy of citizens of our cities and towns.

While a few hospitals may be financially strapped, I also know, however, that most hospitals are faring quite well under the new Medicare system. In fact, the American Hospital Association just released data indicating that in 1984, the hospital industry showed its healthiest bottom line in 20 years. Specifically, the data indicate that the hospital industry's margin—the revenues left after paying expenses—increased to 6.2 percent in 1984. This is 1.1 percent higher than in 1983, and the highest figure since the AHA began tracking the statistic in 1963. This means that for the proprietary hospitals, profits were up over last year; for the nonprofit hospitals, this means additional revenues were available to plough back into capital expenses or future operating costs. While this statistic should not, in itself, be the sole criterion by which to set Medicare's hospital payment rates, it does suggest that most hospitals are faring well enough to pull some additional weight in this major deficit reduction effort.

Let me say at this point, Mr. President, that I address my colleagues as someone who is proud of my record as an advocate for America's older citizens. I have great respect for my colleagues on the other side of the aisle who argue that their amendment is needed to protect the elderly. But I yield to no one when it comes to defending older Americans and fighting against unfairly burdening them in the interests of deficit reduction.

Last week, I voted to eliminate the proposed 3-year reduction in the Social Security cost-of-living adjustment. I did so because the proposal in the budget resolution was bad policy and it was unfair. I believe that many of this Nation's elderly are willing to do their part to help bring down the deficit and will support a balanced plan that includes some financial sacrifice on their part as long as it protects the needy and those with low incomes. But it is inappropriate to ask them to accept a multiyear reduction in their COLA's which would have forced more than 600,000 persons into poverty.

Our efforts to reduce budget deficits must protect older Americans from excessive increases in out-of-pocket costs. Let's be clear why. Today, the elderly are paying in excess of $1,500 each year for health care. This means that they are paying the same percentage of their income as they did before Medicare was enacted.

For a number of Americans, $1,500 may be affordable. But it's not affordable to an elderly widow trying to get by on the average Social Security benefit of $400 a month.

Some will argue that the lowest income elderly receive additional support through in-kind benefits, such as food stamps, Medicaid, and housing subsidies. It is true that these essential programs allow some of the elderly to keep their heads above water.

Unfortunately, however, many elderly poor are not eligible for participation or are not enrolled in these programs. These are the most vulnerable citizens who fall through the cracks.

There is a common misconception, for example, that the elderly poor are all protected by Medicaid and any changes in Medicare will not affect them. But today, there are over 2 million older Americans who are below the poverty line—roughly $5,000—who are not covered by Medicaid. On top of that, there are an additional 6.2 milion elderly without Medicaid coverage who have incomes below $10,000 per year. Together, this represents 40 percent of all noninstitutionalized Medicare beneficiaries.

It is this group, Mr. President, that we must protect. If we had not enacted the Packwood amendment, many older Americans, including the poor and near-poor, would have been forced to pay an additional $200 out-of-pocket in health care costs each year by 1990. This surely would have forced many of them to forgo other needs in order to pay for their essential health care services. For those teetering on the edge of poverty, there is no margin for absorbing additional costs.

Some would argue that our amendment did not go far enough in reducing the burden on beneficiaries. Let me say, as a member of the Senate Finance Committee, I am confident that we can achieve additional savings to reach the Medicare savings target in order to avoid further burdening elderly beneficiaries. For example, if we were to implement a mandatory second surgical opinion program, we could save the Medicare Program $500 million or more, while reducing unnecessary surgery and saving lives. In addition, by eliminating waste and abuse in the health care industry, we could save the Federal Government millions of dollars each year. In the case of pacemakers alone, we could save $96 million a year, if we just required the pacemaker industry to make good on its warranties. There may be as much as $500 million per year costs to Medicare—and unnecessary health risk to seniors—because of unneeded pacemaker surgery and implantations.

Mr. President, given the task before us—to get the deficit under control—I do not believe that the Chiles/Kennedy/Byrd amendment is fiscally responsible. If we don't get our fiscal house in order this year, I am convinced that we are in real danger of losing control of the deficit crisis. Interest payments on the national debt are the fastest growing part of the Federal deficit—the cost of servicing the debt is growing faster than defense and it's grow-

ing faster than any entitlement program. That means that we're closing out policy options for the future, and leaving our children and grandchildren with the responsibility of paying for our extravagance.

Mr. President, we have already taken a significant step toward protecting elderly beneficiaries and the poor. If times were different, perhaps we could afford the Chiles/Kennedy/Byrd amendment, even though it is not necessary to protect beneficiaries given the other means we have to save costs. But in this current climate, this amendment is an unnecessary expenditure which we simply cannot afford. If we cannot cut unnecessary costs here how can we say "no" to equally unnecessary spending in the other 94 percent of the Federal budget. We need to cut unnecessary spending in the Pentagon and every other agency. I believe we can do this without hurting people, lowering our aspirations, or jeopardizing our national defense, but we cannot do anything if we vote for each attempt to add unjustifiable costs to the budget. I therefore urge my colleagues to vote no on the Chiles/Kennedy/Byrd amendment.

Mr. BRADLEY. Mr. President, I rise as a cosponsor of the amendment offered by my colleagues from Massachusetts [Mr. KENNEDY] and Florida [Mr. CHILES] to reduce the Medicare and Medicaid cuts included in the budget now before us.

Mr. President, one of the most important parts of this amendment is to strike the increases in the Medicare premium and the deductible. The budget originally assumed that the Medicare premium paid by the elderly will be increased from 25 percent to 35 percent of total program costs. This would more than double the premium—from the current figure of $15.50 a month to about $36 a month by 1990. And this is on top of the doubling of the premium that has already occurred since 1980. It is my understanding that the amendment we adopted last week reduced the increase from 35 percent to 30 percent of costs. But even still this level represents a doubling of the premium by 1990.

Unless we amend this budget, Mr. President, the elderly will be forced to pay an additional $700 between now and 1990 for their health care. This is simply unfair.

It must be kept in mind, Mr. President, that health care now takes as much of older Americans' median income as at the inception of the Medicare program. On average, Medicare beneficiaries pay an estimated $1,500 per year in out-of-pocket medical costs—almost 30 percent of their total health bill. This trend, combined with increasing health costs, is forcing many elderly Americans on fixed incomes to make hard choices between health care and necessities like food and shelter.

Mr. President, the amendment also eliminates further cuts in Medicaid. The budget originally assumed that a cap would be placed on the Medicaid Program. The effect of this cap would be to turn this program into a block grant, thereby significantly reducing over time the health care protections in current law. In New Jersey, this proposal would result in a $64 million loss of reimbursement for care provided under the Medicaid Program. This will present a severe strain on the State's budget and on hospitals' capacity to provide health care for the poor. In addition, the Medicaid cap jeopardizes implementation of the New Jersey "Medically Needy" Program, which has the potential of serving 100,000 low income children and 100,000 low income elderly. While the amendment that we adopted last week eliminated the cap, the budget still assumes over $1 billion in 3 years savings for Medicaid. This amendment eliminates all further cuts in Medicaid.

In addition, Mr. President, this amendment provides modest increases in reimbursements for doctors who participate in Medicare and reduces the level of cuts by $0.7 billion over the next 3 years for medical education. We all know that savings can be made in reimbursements for providers. But the proposal before us simply goes too far. My biggest concern is that many teaching hospitals and medical schools have a very high indigent care caseload. We simply cannot turn our backs on these institutions. This amendment provides sufficient funding to enable medical schools and teaching hospitals to continue their current commitments especially their commitment to the poor.

The final component of this amendment deals with home care benefits. The budget before us would impose cost-sharing on Medicare home health services after the 20th day of care. This would seriously hurt the capacity of home care providers to provide quality of care, since 1½ million Medicare beneficiaries currently use home health services each year, and approximately 500,000 need more than 20 visits. If the proposal is enacted, beneficiaries exceeding the 20-day limit will have to pay an average of $130 extra for home health services in 1986, and approximately $300 extra by 1990. The sickest beneficiaries—the 61,000 people who need more than 100 days of home care in any given year—would have to pay almost $400 in home health copayments next year under the proposal and more than $500 by 1990. This amendment deletes the administration proposal to enact a home care copayment.

Mr. President, I am firmly committed to reducing this intolerable deficit. But we cannot ask the elderly and poor families to shoulder such an unfair burden of the savings to the Federal Government. This amendment modestly reduces that burden. It needs to be kept in mind that even if this amendment is adopted, the Medicare Program will still be cut by roughly $12 billion over the next 3 years. I therefore urge may colleagues to support this amendment.

Mr. PACKWOOD. Mr. President, if no one else wishes to speak, I am prepared to vote.

Is all time used on the other side, Mr. President?

The PRESIDING OFFICER. All time has expired.

Mr. PACKWOOD. I am prepared to yield back on this side.

The PRESIDING OFFICER. All time has expired.

Mr. PACKWOOD. I move to lay the amendment on the table. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion to lay the amendment on the table. The yeas and nays have been ordered. The clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. SIMPSON. I announce that the Senator from North Carolina [Mr. EAST] and the Senator from California [Mr. WILSON] are absent due to illness.

Mr. CRANSTON. I announce that the Senator from Nebraska [Mr. EXON] is absent because of illness.

The PRESIDING OFFICER [Mr. ANDREWS]. Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 51, nays 46—as follows:

[Rollcall Vote No. 64 Leg.]

YEAS—51

Abdnor	Hatch	Nunn
Andrews	Hatfield	Packwood
Armstrong	Hecht	Pressler
Boschwitz	Heinz	Proxmire
Chafee	Helms	Quayle
Cochran	Humphrey	Roth
Danforth	Kassebaum	Rudman
Denton	Kasten	Simpson
Dole	Laxalt	Stafford
Domenici	Long	Stennis
Durenberger	Lugar	Stevens
Evans	Mathias	Symms
Garn	Mattingly	Thurmond
Goldwater	McClure	Trible
Gorton	McConnell	Wallop
Gramm	Murkowski	Warner
Grassley	Nickles	Weicker

NAYS—46

Baucus	Eagleton	Matsunaga
Bentsen	Ford	Melcher
Biden	Glenn	Metzenbaum
Bingaman	Gore	Mitchell
Boren	Harkin	Moynihan
Bradley	Hart	Pell
Bumpers	Hawkins	Pryor
Burdick	Heflin	Riegle
Byrd	Hollings	Rockefeller
Chiles	Inouye	Sarbanes
Cohen	Johnston	Sasser
Cranston	Kennedy	Simon
D'Amato	Kerry	Specter
DeConcini	Lautenberg	Zorinsky
Dixon	Leahy	
Dodd	Levin	

NOT VOTING—3

East Exon Wilson

So the motion to lay on the table was agreed to.

Mr. BYRD. Mr. President, I yield myself 1 minute.

Earlier, the distinguished majority leader, I believe, had indicated that he would like to see amendments come along and be acted upon and possibly with agreements of 10 minutes or so on each, and that in the meantime he would attempt to develop his package to the point that he could lay it before the Senate and perhaps get an hour equally divided on that package.

At least four amendments have been called up and voted on. I wonder if the distinguished majority leader could give us a progress report—if progress has been made—on the situation at the moment.

Mr. DOLE. First of all, there is progress. They are now drafting the amendment. I understand that it takes about an hour and a half total, and they have been at it for about 50 minutes. So I would think that after the next vote I would be in a position to advise the minority leader.

Mr. BYRD. We have 67 minutes remaining, as I understand it. Is it still the distinguished majority leader's intention to call up his amendment this evening, get an hour for debate on it, equally divided, and vote on the package?

The PRESIDING OFFICER. The time allotted to the minority leader has expired.

Mr. BYRD. I yield myself 1 more minute.

Mr. DOLE. That is my present intention.

Mr. BYRD. OK. We will wait. I am sure the distinguished majority leader will give us a progress report when he can.

AMENDMENT NO. 87

Mr. SYMMS. Mr. President, I send an amendment to the desk.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Idaho [Mr. SYMMS] proposes an amendment numbered 87.

Mr. SYMMS. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

In the pending amendment, do the following:

On page 3, decrease the amount on line 12 by $1,600,000,000.

On page 3, decrease the amount on line 13 by $1,100,000,000.

On page 3, decrease the amount on line 14 by $900,000,000.

On page 3, decrease the amount on line 18 by $600,000,000.

On page 3, decrease the amount on line 19 by $800,000,000.

On page 3, decrease the amount on line 20 by $900,000,000.

On page 3, decrease the amount on line 25 by $600,000,000.

On page 4, decrease the amount on line 1 by $800,000,000.

On page 4, decrease the amount on line 2 by $900,000,000.

On page 4, decrease the amount on line 6 by $600,000,000.

On page 4, decrease the amount on line 7 by $1,400,000,000.

On page 4, decrease the amount on line 8 by $2,300,000,000.

On page 4, decrease the amount on line 12 by $600,000,000.

On page 4, decrease the amount on line 13 by $800,000,000.

On page 4, decrease the amount on line 14 by $900,000,000.

On page 16, decrease the amount on line 20 by $1,000,000,000.

On page 16, decrease the amount on line 21 by $600,000,000.

On page 17, decrease the amount on line 4 by $1,000,000,000.

On page 17, decrease the amount on line 5 by $700,000,000.

On page 17, decrease the amount on line 13 by $700,000,000.

On page 17, decrease the amount on line 14 by $700,000,000.

On page 33, decrease the amount on line 2 by $100,000,000.

On page 33, decrease the amount on line 3 by $100,000,000.

On page 33, decrease the amount on line 11 by $200,000,000.

On page 33, decrease the amount on line 12 by $200,000,000.

On page 38, increase the first amount on line 10 by $1,630,000,000.

On page 38, increase the second amount on line 10 by $621,000,000.

On page 38, increase the amount on line 11 by $1,096,000,000.

On page 38, increase the amount on line 12 by $705,000,000.

On page 38, increase the amount on line 13 by $729,000,000.

On page 38, increase the amount on line 14 by $763,000,000.

On page 41, decrease the amount on line 17 by $4,000,000.

On page 41, decrease the amount on line 19 by $15,000,000.

On page 41, decrease the amount on line 21 by $29,000,000.

On page 47, decrease the first amount on line 12 by $4,000,000.

On page 47, decrease the amount on line 13 by $15,000,000.

On page 47, decrease the second amount on line 14 by $29,000,000.

On page 49, increase the first amount on line 17 by $1,630,000,000.

On page 49, increase the second amount on line 17 by $621,000,000.

On page 49, increase the amount on line 18 by $1,096,000,000.

On page 49, increase the amount on line 19 by $105,000,000.

On page 49, increase the first amount on line 20 by $729,000,000.

On page 49, increase the second amount on line 20 by $763,000,000.

On page 52, decrease the amount on line 1 by $1,600,000,000.

On page 52, decrease the amount on line 3 by $1,000,000,000.

On page 52, decrease the amount on line 4 by $700,000,000.

Mr. DOLE. Mr. President, will the Senator yield?

Mr. SYMMS. I yield.

Mr. DOLE. I wonder if we might agree on a time limitation of 5 minutes on a side.

Mr. SYMMS. I say to the distinguished majority leader that it is going to crowd me to explain this in 5 minutes.

Mr. DOLE. Seven and a half minutes, and two and a half minutes to the Senator from Florida.

Mr. SYMMS. I will do the best I can.

The PRESIDING OFFICER. Is there objection to a limitation of 7½ minutes to the Senator from Idaho, and 2½ minutes to the Senator from Florida? The Chair hears none, and it is so ordered.

Mr. SYMMS. Mr. President, this amendment incorporates all but one of the mass transit funding proposals included in the President's original budget package. That package proposed a 3-year saving of $9.024 billion in budget authority and $4.234 billion in outlays for urban mass transit assistance. Under the President's plan, these savings would be achieved by discontinuing discretionary grants and operating assistance, reducing the level of formula capital grant assistance and expenses for research and administration, freezing grants for Washington Metrorail construction, and funding the remaining transit projects substituted for interstate projects from the highway trust fund.

My amendment is the administration's original mass transit funding proposal with the exception of DOT's plan to fund transit substitute projects out of the highway trust fund. The Congressional Budget Office estimates that over a 3-year period—1986–88, my amendment would save $8.240 billion in budget authority and $3.848 billion in outlays, as compared with current assistance levels for urban mass transit programs. When compared with the savings projected for the same 3-year period under the compromise budget, my amendment provides additional savings of $3.269 billion in budget authority and $2.041 billion in outlays. These spending reductions represent a significant share of current Federal expenditures on mass transit programs, and I believe this amendment deserves the favorable consideration of all Senators who are truly interested in cutting Federal spending.

Mr. President, I reserve the remainder of my time.

The PRESIDING OFFICER. The Senator from Florida.

Mr. SYMMS. Mr. President, if the Senator from Florida does not wish to comment, I will go on and make a couple further explanations about this.

The PRESIDING OFFICER. The Senator from Idaho.

Mr. SYMMS. Mr. President, I think it would probably be appropriate to

call this the Dole amendment. Of course, I am not talking about the distinguished majority leader, but I am talking about the distinguished Secretary of Transportation, and I will give you a couple of quotes of what Mrs. Dole said about this.

Reasons to support Urban Mass Transportation Administration [UMTA] funding cuts:

In order to make the necessary budget cuts, we in Congress must reconsider the role of the Federal Government in all areas of the economy. Transportation Secretary Dole said recently that such considerations played an important role in the development of this year's transportation budget proposal. The administration's budget, she said:

". . . emphasizes the proper role of the federal government. At this time, more than ever before, we must focus on truly national needs, and leave local matters to state and local authorities . . . Mass transit is a clear example of a local matter best addressed by local management, local decision making, and local financing."

Capital investment and operating decisions are made at the local level, but the full weight of decisions among alternatives is not borne by local decisionmakers when they know that much of the cost will be paid by the Federal Government. Federal subsidies have the effect of artificially and inefficiently increasing supply and demand at the expense of competing nonsubsidized modes of transportation.

Federal assistance has encouraged the creation of transit agencies that are often local monopolies which exclude private competition.

My amendment would discontinue funding for discretionary grants. These grants have helped build unnecessary and costly transit systems.

So I think the Secretary of Transportation is quite right in what has happened. We are getting in a situation where we are starting many more of these projects around the country than we will have funding to finish, and I think that it is interesting to note just, for example, some of the things that have happened.

Miami's billion dollar rapid transit system now serves about 15,000 riders per day. That is just slighty more than 10 percent of the original forecast. As it has worked out, it would have been cheaper to give each rider $66,000 and called it quits. It would have saved the taxpayers a lot of money and probably had negligible impact on the traffic in the greater Miami area.

Most federally funded systems cost between $50 and $100 million per mile, while the San Diego light rail surface system—which was constructed without Federal assistance—cost only $6 million per mile.

So I think if the local people in the country can make a decision—they too are Federal taxpayers—if they can build their own railroad system, their own mass transit light rail system for $6 million a mile without the Federal imposition of Federal regulations, bureaucracy, and so forth, to comply with, as opposed to $100 million a mile, I think it makes a lot of sense to do what the Secretary of Transportation originally had asked for, and we could make certain savings for the taxpayers.

These grants, with up to a 75-percent Federal share, have artificially increased the demand for expensive new heavy rail systems.

New subway systems do not, as proponents claim, cost effectively save energy, reduce pollution, or lessen auto traffic.

Energy consumption, pollution, and traffic congestion can be much more effectively reduced through alternatives such as buses, carpooling, and company vanpools supported by dedicated high-occupancy lanes and company-sponsored vanpool parking.

I appeal to my colleagues.

How much time do I have remaining?

The PRESIDING OFFICER. Two minutes and ten seconds remaining.

Mr. SYMMS. Mr. President, I will do the best I can in 2 minutes. There is a lot of information here that I am sure my colleagues are anxiously waiting for me to share with them.

Federal subsidies for local operating assistance should be terminated.

Federal operating, subsidies have distorted service decisions and substituted for increases in local fare box revenues, allowing real user costs to decline.

From 1977 to 1983, State and local taxpayer assistance increased 195 percent, while passenger revenue increased only 50 percent. Meanwhile, inflation was about 55 percent and operating costs increased 90 percent.

Of total Federal operating assistance, about $2.0 billion has been used for wage increases beyond the cost of living, $1.5 billion has been absorbed by lower productivity, $2.0 billion has been used to keep fares artificially low, and only $1.0 billion has been used to provide extra service.

Federal operating subsidies reduce the anticipated costs to localities of operating new, expensive systems, thereby increasing demand for federally subsidized new systems.

The level of formula-based capital assistance should be reduced.

As long as the Federal Government continues to collect the penny gas tax for transit improvements, Congress will have a responsibility to manage and distribute those revenues. Equity dictates that this national tax be distributed nationally, through a formula-grant program.

Grants for Washington metrorail construction should not be extended beyond the current authorization.

Other reasons to support UMTA funding cuts include: From 1970 to 1980 the use of public transit decreased from 8.9 percent to 6.4 percent of total worktrips taken—a 28-percent decrease in the relative use of public transit. At the same time, Federal support grew 2,150 percent.

Mass transit operating subsidies are not primarily a low-income benefit.

The 1977 National Person Transportation Survey indicates that there are clearly more public transportation passengers who are not poor, defined as incomes above $10,000—about 77 percent—than who are poor—23 percent.

Transit subsidies primarily benefit the nonpoor by subsidizing costly peak-period transit service, suburban, long-haul service, expensive rail service, and flat fares—prevalent in 67 percent of transit properties—all of which overwhelmingly benefit the nonpoor commuter.

I believe this amendment makes a great deal of sense, both fiscally and politically. In an era of $200 billion plus deficits, it is difficult to rationalize one's support for a program: whose annual subsidy is $400 per passenger—or $600 per commuter—and growing—by comparison, annual food stamp assistance is about $500 per recipient; which is more expensive than many available transportation alternatives, and which has been unsuccessful in changing the intracity transportation habits of the Nation.

Opponents of the administration's original transit funding proposal have argued that cutting the operating assistance subsidies will have a devastating impact on transit projects around the country. In his recent letter to Members of Congress, UMTA Administrator, Ralph Stanley, suggests that these cries of incredulity and impending doom heard from transit groups and some public officials have no basis in fact. Mr. Stanley notes that while reductions in Federal transit assistance would have an impact on the budgets of local transit authorities and State transportation departments, the impact would be mitigated by the existence of other funding sources and a significant cushion of unobligated funds remaining in transit accounts around the Nation. "There are alternative funding strategies," Mr. Stanley says.

When States have over $7.5 billion in budget surpluses. Also, recent studies demonstrate that private sector contracting can save 20 to 60 percent in operating costs and, in many cities, businesses are joining together to help fund needed transit improvements.

Mr. Stanley continues:

Most importantly, I wanted to inform you that approximately $1 billion in as yet unused Federal transit funds are left over from previous years' appropriations providing a built-in funding cushion. For areas be-

tween 200,000 population and 1 million, the amount of operating assistance carryover is equivalent to 67 percent of the fiscal year 1985 operating assistance cap. In areas between 50,000 and 200,000 population, the amount of operating assistance carryover is equivalent to 163 percent of their fiscal year 1985 operating assistance cap. In other words, for these smaller areas on the average, over 1½ year's worth of operating assistance has not been utilized without considering the fiscal year 1985 funds which have since been made available.

This amendment would not "pull the rug out from under the Nation's transit systems," as some have claimed about the Administration's original proposal. As Mr. Stanley's letter indicates, a tremendous amount of operating assistance funds remain in transit accounts around the Nation, and there are other funding sources which could be tapped for transit and other programs which State and municipal officials deem to be of importance.

Moreover, this amendment would save Federal taxpayers nearly $4 billion over the next 3 years. When I returned to Washington this year, I thought budget cuts of this size and importance would be our first order of business. I believed then, as I do now, that we have a responsibility to present and future generations of Americans to do something about these horrendous deficits. We will have taken a long stride toward fulfillment of this responsibility when the management and financing for programs of local importance are returned to State and municipal officials. I believe that mass transit is such a program and the management, decisionmaking, and financing of mass transit systems should be left in the hands of local authorities. I urge my colleagues to give this amendment their serious consideration since it involves significant reductions in Federal spending and it speaks to the question which should be posited at every juncture in this budgetary debate, namely: What is the proper role of the Federal Government in the lives of American citizens and the economic and political affairs of State and local governments. My amendment provides a clear answer to this question as it pertains to mass transit programs, and I urge my colleagues to give the amendment their full support.

Mr. D'AMATO. Mr. President, I rise in opposition to an amendment offered by my distinguished colleague from Idaho, Senator SYMMS, which would cut about 70 percent of the Federal funding for mass transit. This amendment is analogous to the administration's original budget proposal for the Urban Mass Transportation Administration. Its impact on our Nation's mass transit systems would be absolutely devastating.

As we consider Senate Concurrent Resolution 32 on the Senate floor today, I would like to point out that this amendment is similar to the Department of Transportation's original budget request except for DOT's plan to fund transit substitute projects out of the highway trust fund. My distinguished colleague has seen fit to omit that portion of the administration's budget request designed to create some competition between highway trade-in and transit trade-in projects for limited discretionary and formula highway substitute funds. DOT's rational for that provision was to achieve savings by omitting $250 million in separate transit trade-in funds. The plan was to combine both highway and transit trade-in projects in the same account of the highway trust fund and add $100 million to the account to cover this addition. However, my learned colleague from the State of Idaho would rather not share any additional highway funds with States that depend on transit even though its effect would reduce the deficit.

The Transportation Department had requested $24.7 billion of budget authority for fiscal year 1986, a $3.8 billion (13 percent) reduction from its fiscal year 1986 budget level. The lion's share of that cut, $2.75 billion (72 percent), is derived from crippling reductions in funding for the Urban Mass Transportation Administration. I find this amendment, incorporating the bulk of the DOT proposal, to be both unworkable and outrageous.

Lack of Federal transit funds will make it extremely difficult for the Nation's millions of transit riders to get to work and school and to carry on their daily lives. Many people, particularly the poor, elderly and handicapped, often have no other transportation alternatives. Without a viable network of affordable transportation services, we will rob many individuals of their freedom of movement. The ability to get to work or school and to take care of one's own needs, brings with it self-reliance and personal dignity. These values are lost when we force people to become virtual prisoners in their own homes.

General tax revenue funding of transit, based on statutory formulas, would be terminated by this amendment. In fiscal year 1985 $2.5 billion was appropriated for this vital program. Operating assistance, funded during fiscal year 1985 at $875 million, would be abruptly cutoff. All transit funding would be derived from the one penny of Federal gasoline tax dedicated to transit. The $1.1 billion currently authorized for this program would be distributed on a formula basis. Gas tax funds would no longer be distributed on a discretionary basis, but would be allocated as a formula capital program which could not be spent on new construction.

The sweeping changes in the transit program included in this amendment would affect the ability of virtually all the Nation's public transit systems to offer adequate service. The American Public Transit Association [APTA] has surveyed 152 transit systems which carry 75 percent of the Nation's transit riders, as well as 63 transit-related businesses which employ over 40,000 workers, in order to determine the impact of DOT's budget proposal. Their findings directly apply to the amendment before us: APTA found that 30 systems might be forced out of business; 88 percent will have to cut service dramatically; and more than 8 in 10 will be forced to raise fares so high as to discourage ridership. In addition, the budget cuts would wipe out an estimated 203,000 jobs and $8 billion in private business revenues.

I am concerned that this amendment would force transit to bear the brunt of belt-tightening measures in a manner disproportionate to other programs that have either been frozen or increased. The Federal Government has made a tremendous investment in public transit. Without adequate funds, sorely needed maintenance and rehabilitation work will be further deferred and there will be an even more rapid decline in service and safety.

In 1982, passage of the Surface Transportation Assistance Act [STAA] provided a formula for cuts in operating assistance. Transit agreed to "bite the bullet" by agreeing to cuts of 20 percent, 10 percent, and 5 percent. In fiscal year 1984, $875 million was available for operating assistance—an overall cut of 16 percent from the 1982 level. Despite the cooperation of transit in absorbing this cut, attempts were made again last year to slash the program by 38 percent to $545.5 million with a total phaseout by 1989. Congress rejected that proposal and funded the program at $875 million for fiscal year 1985.

APTA's survey reveals that transit fares would have to rise substantially in 82 percent of the transit systems. Nearly one-quarter, mostly small systems, predicted increases of 90 percent or more. Half predicted increases of 50 percent of more. These increases would occur on top of a national average base fare of 60 cents. Although Federal operating assistance comprises a relatively small share of the New York City Metropolitan Transportation Authority's total budget, it is essential to many small transit systems which may be forced to shut down without it.

Capital assistance is so severely limited under this amendment that APTA's survey results indicate that over 70 percent of the Nation's transit systems would be forced to forego the purchase of new buses. This is made even more significant by the fact that over 30 percent of the Nation's bus fleet is past its useful economic life of 12 years. The New York MTA would

receive a devastating cut of about $285 million in capital assistance, in addition to the loss of $108 million of operating funds. Such a reduction would mean the further deferral of vital repair and rehabilitation work on the 81-year-old system. This work is necessary not only to improve service, but for safety.

I am shocked at the thinking behind this effort which echoes the administration's belief that, "funding of local transportation is not an appropriate role for the Federal Government since benefits accrue locally." Passage of the STAA, with its creation of the mass transit account in the highway trust fund, was a clear reaffirmation of Congress' commitment to a Federal role in the Nation's transit program. Furthermore, there are many federally assisted projects of direct benefit only to one part of the country or to one particular city or area. The cornerstone of our Federal system of government is that we address and promote the varying needs and strengths of the different States for the greater good of the Nation. We must not become insensitive to the needs of sister States because eventually we will harm the Union itself.

Finally, I am concerned that this amendment would not provide any new funds for UMTA's Research, Traning and Human Resources Program. Rather, $24.6 million in unobligated balances from the fiscal year 1984 appropriation would be deferred to fund the program in fiscal year 1986. During fiscal year 1985, $51 million is available for use in this program which includes vital funding for safety grants used to fight transit crime; $15 million was earmarked for transit safety and security in last year's appropriations bill. At last year's UMTA budget hearing, I asked UMTA Administrator Ralph Stanley if he would place a greater emphasis on safety and security and he agreed to do so. How will this be possible without any new funds? During the State of the Union Address, President Reagan said:

> Of all the changes in the past 20 years, none has more threatened our sense of national well-being than the explosion of violent crime. One does not have to have been attacked to be a victim. The woman who must run to her car after shopping at night is a victim. The couple draping their door with locks and chains are victims, as is the tired, decent cleaning woman who can't ride a subway home without being afraid.

It is my belief that the Federal commitment to transit will rise above the policy behind this amendment as well as the DOT budget proposal. A 70-percent reduction in a program that is vital to so many States is not reasonable. The administration has recognized the problem of crime on our subway systems, we must now be responsive to our duty to help preserve the Federal investment made in those systems. In addition, Congress must act to ensure that the other parts of the transit program remain intact. It is by creating safer, more reliable and efficient transit systems that we are able to increase ridership and to provide needed revenues.

The Budget Committee has recently voted to slash mass transit funding by 25 percent. Although this is better than the devastating 70-percent cut envisioned by this amendment and the administration's budget proposal, it is still far too high and will damage the integrity of the program. I have introduced a bill, S. 352, that would permit an additional $900 million to be spent on transit grants over a 3-year period. These funds are now available from revenues accruing from the one penny of gas tax dedicated to mass transit. Public mass transit is not receiving the full benefit of that tax because of artificially low authorization ceilings in the program. Thus, I think it is even unfair to suggest that transit take a 25-percent cut. What really needs to be done to fulfill our promise to transit is to raise the authorization ceiling on the program to match the actual revenues collected. If, in the effort to reduce the deficit, we must control spending on transit, as well as on other domestic programs, then I believe the best approach would be simply to freeze transit funding at current levels.

I urge my colleagues to defeat this amendment.

Thank you, Mr. President.

The PRESIDING OFFICER. The Senator from Florida.

Mr. CHILES. Mr. President, my understanding is this amendment is a cut of almost $2 billion a year more than the Dole amendment in all of the mass transit functions.

So if you like the Dole amendment or the President's amendment, you will love this. If you do not, then you probably should be put on notice.

I yield back the remainder of my time.

Mr. SARBANES. Mr. President, will the Senator yield a moment?

Mr. CHILES. I yield.

Mr. SARBANES. I think it should be clear that this amendment would absolutely decimate the mass transit program.

Mr. CHILES. I think it is decimated already. I guess you could say this is a mass decimation.

Mr. SARBANES. This is an annihilation of the mass transit program.

Mr. CHILES. Yes.

I yield back the time.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Idaho.

Mr. SYMMS. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Idaho.

On this question, the yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. SIMPSON. I announce that the Senator from North Carolina [Mr. EAST] and the Senator from California [Mr. WILSON] are absent due to illness.

Mr. CRANSTON. I announce that the Senator from Nebraska [Mr. EXON] is absent because of illness.

The PRESIDING OFFICER (Mr. MURKOWSKI). Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 25, nays 72, as follows:

[Rollcall Vote No. 65 Leg.]

YEAS—25

Abdnor	Hatfield	Proxmire
Armstrong	Hecht	Roth
Denton	Helms	Simpson
Dole	Humphrey	Stennis
Domenici	Laxalt	Symms
Garn	Long	Thurmond
Goldwater	McClure	Wallop
Gramm	Nickles	
Hatch	Pressler	

NAYS—72

Andrews	Ford	McConnell
Baucus	Glenn	Melcher
Bentsen	Gore	Metzenbaum
Biden	Gorton	Mitchell
Bingaman	Grassley	Moynihan
Boren	Harkin	Murkowski
Boschwitz	Hart	Nunn
Bradley	Hawkins	Packwood
Bumpers	Heflin	Pell
Burdick	Heinz	Pryor
Byrd	Hollings	Quayle
Chafee	Inouye	Riegle
Chiles	Johnston	Rockefeller
Cochran	Kassebaum	Rudman
Cohen	Kasten	Sarbanes
Cranston	Kennedy	Sasser
D'Amato	Kerry	Simon
Danforth	Lautenberg	Specter
DeConcini	Leahy	Stafford
Dixon	Levin	Stevens
Dodd	Lugar	Trible
Durenberger	Mathias	Warner
Eagleton	Matsunaga	Weicker
Evans	Mattingly	Zorinsky

NOT VOTING—3

East	Exon	Wilson

So the amendment (No. 87) was rejected.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. HATFIELD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DOLE. Mr. President, I understand the next amendment will come from the distinguished Senator from New Jersey, Senator BRADLEY. I wonder if we might agree at this time to reduce the time for rollcalls from 15 minutes to 10 minutes. Mr. President, I make that unanimous-consent request.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 88

(Purpose: To maintain revenues by preserving the rate of tax currently imposed upon cigarettes, to add additional funds for function 570 (Medical Insurance), and to reduce the deficit)

Mr. BRADLEY. Mr. President, I send an amendment to the desk for myself and Mr. BINGAMAN, Mr. ROCKEFELLER, and Mr. BUMPERS, and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The bill clerk read as follows:

The Senator from New Jersey [Mr. BRADLEY], for himself, Mr. BINGAMAN, Mr. ROCKEFELLER, and Mr. BUMPERS, numbered 88.

In the pending amendment, do the following:

On page 2, increase the amount on line 9 by $1,500,000,000.

On page 2, increase the amount on line 10 by $1,700,000,000.

On page 2, increase the amount on line 11 by $1,700,000,000.

On page 2, increase the amount on line 15 by $1,500,000,000.

Mr. BRADLEY. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 2, increase the amount on line 16 by $1,700,000,000.

On page 2, increase the amount on line 17 by $1,700,000,000.

On page 3, increase the amount on line 12 by $80,000,000.

On page 3, increase the amount on line 13 by $280,000,000.

On page 3, increase the amount on line 14 by $1,070,000,000.

On page 3, increase the amount on line 18 by $80,000,000.

On page 3, increase the amount on line 19 by $280,000,000.

On page 3, increase the amount on line 20 by $1,070,000,000.

On page 3, decrease the amount on line 25 by $1,420,000,000.

On page 4, decrease the amount on line 1 by $1,420,000,000.

On page 4, decrease the amount on line 2 by $630,000,000.

On page 4, decrease the amount on line 6 by $1,420,000,000.

On page 4, decrease the amount on line 7 by $2,840,000,000.

On page 4, decrease the amount on line 8 by $3,470,000,000.

On page 4, decrease the amount on line 12 by $1,420,000,000.

On page 4, decrease the amount on line 13 by $1,420,000,000.

On page 4, decrease the amount on line 14 by $630,000,000.

On page 22, increase the amount on line 16 by $180,000,000.

On page 22, increase the amount on line 17 by $180,000,000.

On page 22, increase the amount on line 24 by $480,000,000.

On page 22, increase the amount on line 25 by $480,000,000.

On page 23, increase the amount on line 7 by $1,270,000,000.

On page 23, increase the amount on line 8 by $1,270,000,000.

On page 32, decrease the amount on line 17 by $100,000,000.

On page 32, decrease the amount on line 18 by $100,000,000.

On page 33, decrease the amount on line 2 by $200,000,000.

On page 33, decrease the amount on line 3 by $200,000,000.

On page 33, decrease the amount on line 11 by $200,000,000.

On page 33, decrease the amount on line 12 by $200,000,000.

On page 40, decrease the first amount on line 16 by $180,000,000.

On page 40, decrease the amount on line 17 by $480,000,000.

On page 40, decrease the second amount on line 18 by $1,270,000,000.

On page 40, line 19, add the following new sentence: "The Senate Committee on Finance shall report changes in laws within the jurisdiction of the committee sufficient to increase revenues as follows: $1,500,000,000 in fiscal year 1986; $1,700,000,000 in fiscal year 1987; and $1,700,000,000 in fiscal year 1988.".

On page 46, decrease the amount on line 9 by $180,000,000.

On page 46, decrease the amount on line 10 by $180,000,000.

On page 46, decrease the first amount on line 11 by $480,000,000.

On page 46, decrease the second amount on line 11 by $480,000,000.

On page 46, decrease the amount on line 12 by $1,270,000,000.

On page 46, decrease the amount on line 13 by $1,270,000,000.

On page 51, decrease the first amount on line 7 by $180,000,000.

On page 51, decrease the amount on line 8 by $480,000,000.

On page 51, decrease the second amount on line 9 by $1,270,000,000.

On page 51, line 10, add the following new sentence: "The House Committee on Ways and Means shall report changes in laws within the jurisdiction of the committee sufficient to increase revenues as follows: $1,500,000,000 in fiscal year 1986; $1,700,000,000 in fiscal year 1987; and $1,700,000,000 in fiscal year 1988.".

Mr. BRADLEY. Mr. President, there is a serious problem with the first budget resolution. The budget contains two revenue proposals. The first assumes that the cigarette tax will be cut in half next year.

Mr. DOLE. Will the Senator yield?

Mr. BRADLEY. Without losing my right to the floor, yes.

Mr. DOLE. I wonder if I could ask unanimous consent that there be 10 minutes equally divided on this amendment.

Mr. HELMS. I cannot agree with the request at this moment.

Mr. FORD. I would like to have more time.

Mr. DOLE. Twenty minutes equally divided?

Mr. HELMS. Mr. President, I ask for 10 minutes on each side.

Mr. CHILES. Five minutes on this side and ten minutes on that side.

Mr. FORD. I beg to differ with my leader, but this amendment deserves more time.

Mr. DOLE. Why do I not suggest, if satisfactory to Senator BRADLEY, 15 minutes and 5 minutes, for a total of 20 minutes.

Mr. CHILES. Can we do it for 10 minutes?

Mr. HELMS. Five and 15 would be all right.

Mr. FORD. That is all right.

Mr. DOLE. Twenty minutes divided 5 minutes for the proponents and 15 minutes for the opponents.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BRADLEY. Mr. President, I yield myself 4 minutes.

Mr. President, there is a serious problem with the first budget resolution that I believe must be remedied. The budget contains two major revenue proposals. The first assumes that the Federal cigarette tax will be cut in half next year. The second assumes that the elderly's premiums for Medicare will roughly be doubled. This strikes me as a wrong set of priorities. In an effort to reverse these priorities, I am offering this amendment to strike the increase in the Medicare part B premium and insert in its place a continuation of the current cigarette tax.

Mr. President, the first part of this amendment strikes the Medicare premium increase. The budget assumes that the Medicare premium paid by the elderly will be increased from 25 percent to 30 percent of total program costs. This would double the premium—from the current figure of $15.50 a month to about $30 a month by 1990. And this is on top of the doubling of the premium that has already occurred since 1980.

It must be kept in mind, Mr. President, that the part B premium is only one component of the elderly's health care bill. Health care now takes as much of older Americans' median income as at the inception of the Medicare Program. On average, Medicare beneficiaries pay an estimated $1,500 per year in out-of-pocket medical costs—almost 30 percent of their total health bill. This trend, combined with increasing health costs, is forcing many elderly Americans on fixed incomes to make hard choices between health care and necessities like food and shelter.

Mr. President, the second part of the amendment freezes the tobacco tax at its current level. The Tax Equity and Fiscal Responsibility Act of 1982 increased the exercise tax on cigarettes from 8 cents per pack to 16 cents for the period from January 1, 1983, to September 30, 1985. Next fiscal year, under current law, the tax will fall back to 8 cents per pack.

The cigarette tax has declined significantly in real terms over the decades. The tax stood at 6 cents per pack in 1919 and was raised to 8 cents in 1951. The 16-cent Federal tax currently represents less than 20 percent of the current average market price per pack, significantly less than the 37

percent of the price that the 8-cent tax represented when it was set in 1951. Reducing the tax to 8 cents per pack, as under current law, would mean that the tax would represent less than 10 percent of the cost per pack, nearly a 75-percent reduction compared to the 1951 level.

Virtually all of the scientific evidence indicates that the cost of smoking—in terms of dollars and lives—is large. Smoking deaths exceed 300,000 annually, and smoking contributes to 30 percent of the over 400,000 annual U.S. deaths due to cancer. About $14 billion a year is spent on medical care for smoking related diseases, and over $25 billion a year in lost earnings is attributable to morbidity and premature mortality from smoking related diseases.

Cigarette smoking increases Federal costs as well. One study indicated that about 6 percent of Federal Medicare and Medicaid expenditures go for treating victims of smoking and roughly 12 percent of Social Security Disability Insurance recipients are on the rolls due to smoking related diseases.

Mr. President, it is absurd to reduce taxes on a product that has caused major increases in recent years in health care costs while at the same time significantly increase the premiums paid by the elderly for their health care. I agree that we need to take action to reduce the deficits, but, in this process, we need to get our priorities in order. The budget now before us does not meet my list of priorities.

This amendment, Mr. President, is no budget buster. Holding the cigarette tax at 16 cents per pack will generate about $5 billion in additional revenues over the 1986–88 period. Holding the Medicare premium to 25 percent rather then 30 percent of costs will lose about $2 billion in revenues. Adoption of this amendment will still reduce the deficits more than the budget now before us by roughly $3 billion over the next 3 years.

Two final points, Mr. President.

First, some argue that the amendment continues a tax increase—it does not. It holds the tax at 16 cents, rather than cutting it in half.

Second, others argue that the amendment earmarks the extra revenue to the Medicare trust fund. The amendment does not earmark the revenues to Medicare—it remains silent or this issue.

I urge my colleagues for their support of this amendment.

I reserve the remainder of my time.

I ask unanimous consent that a statement showing organizations supporting this amendment be printed in the RECORD.

There being no objection, the list was ordered to be printed in the RECORD, as follows:

American Heart Association.
American Lung Association.
American Cancer Society.
American Medical Student Association.
Adventist Health Network.
American College of Chest Physicians.
American Public Health Association.
American Association of Dental Schools.
Center for Science in the Public Interest.
American Diabetes Association.
Children's Defense Fund.
Association for Schools of Public Health.
National Tax Equity Association.
American Association of Retired Persons.
American Association of State and Territorial Health Officials.
American Nurses Association.
Association of Junior Leagues.
American Association of Respiratory Therapists.
American Academy of Pediatrics.
American College of Osteopathic Pediatricians.
National Perinatal Association.
American Society of Internal Medicine.
American Council on Science and Health.
National Board, YWCA of the USA.
American College of Cardiology.
American Nephrology Nurses' Association.
National Alliance of Senior Citizens, Inc.
National Council on Smoking and Health.

Mr. KENNEDY. Mr. President, this amendment will maintain part B premium and cigarette taxes at current levels.

This amendment should be acceptable to everyone in this House. This amendment does not increase the deficit. Indeed, it reduces it. But more important, it protects our senior citizens from the most onerous, unfair Medicare proposal in this Republican package.

The part B premium would double by 1990 to over $360 if allowed to rise to 30 percent of program costs as proposed in this package. The premium has already doubled since 1980. If this amendment is enacted, the increase in the part B premium compared to curent law will take a full 40 percent of the average 1990 Social Security COLA and a full 60 percent out of the COLA for the 15 million beneficiaries below the median benefit. The total burden on the elderly as a result of the current proposal would be a whopping $8 billion over the next 5 years.

It is ironic that an administration that refuses to raise taxes on wealthy corporations is eager to raise taxes on 30 million senior citizens and disabled Medicare beneficiaries.

The elderly now pay as large a percent of their income for health care as they did when Medicare first began. Even if no further Medicare benefit cuts, the burden health care costs placed on our elderly will continue to rise.

I urge my colleagues to support our senior citizens and disabled Medicare beneficiaries by adopting this amendment.

The PRESIDING OFFICER. The majority leader.

Mr. DOLE. Mr. President, in 1982, Congress enacted the 8-cent per pack increase in cigarette taxes with a sunset date of September 30, 1985.

I remember hearing a lot of radio commercials that year how we were taxing the average American. I remember the distinguished Senator from Ohio, Senator METZENBAUM, briefly mentioned how we raised taxes on cigarettes.

The sunset date was included because we thought the tax increase was necessary, but extraordinary, and recognized that cigarette taxes were a traditional source of revenue for the States. It may be that the additional Federal excise tax on cigarettes will be extended at some point, but my colleagues should be aware of recent developments on the State level.

The point I would make is that a number of States have moved in on the theory that this would be sunset.

Alaska, Iowa, Kansas, Mississippi, and South Dakota have recently passed legislation to increase their cigarette taxes no matter what happens at the Federal level.

Arizona, Maryland, Montana, New Mexico, and Utah have passed additional cigarette taxes contingent on a drop in the Federal tax rate. Mississippi also has a contingent 8-cent-a-pack increase in addition to a noncontingent 7-cent increase.

Massachusetts, New Jersey, Ohio, Pennsylvania, and Texas have pending legislation to increase their cigarette taxes.

In addition, California, Colorado, Florida, Illinois, Minnesota, Missouri, Nebraska, Nevada, New Hampshire, Oklahoma, Oregon, and Rhode Island have legislation pending which would increase their cigarette taxes if the additional 8 cents sunsets at the Federal level.

Vermont has legislation pending which is contingent at the Federal rate in the State senate and not contingent at the State house.

The point of this description is that, in a large number of States, cigarette smokers will find that cigarette taxes will not be reduced, no matter what we do at the Federal level.

If we extend the 8-cents-a-pack tax, we will be raising the price of cigarettes for many individuals because State taxes will also be increased. In other States, extending the Federal tax will deny States revenues that they have planned to receive.

It may be that somewhere down the line the tax will be extended, but I again remind everyone this is a budget resolution so I suggest this is not the appropriate time.

I yield to the distinguished Senator from Oregon, chairman of the Finance Committee, and the remainder of the time to be equally divided between the Senator from Kentucky and the Senator from North Carolina.

Mr. PACKWOOD. Mr. President, I will oppose this amendment without judging what I will do later this year

when the issue of the cigarette tax comes before us. Clearly, it will. No doubt, there will be an effort to continue it or to stop it.

My friend from New Jersey says this is not an earmarking of a tax. It is a suggestion of a tax and a suggestion of forgoing of the Medicare revenues that we have just voted to save.

I understand the two are not related. It is just an unusual coincidence that they happen to come together in this same amendment and be suggested at the same time.

So I will simply oppose this at the moment, realizing full well that the merits and the substance of the issue of the cigarette tax will be before this body again long before the cigarette tax expires in October.

Mr. HELMS. Would the Senator from Kentucky like to proceed?

Mr. FORD. Very well.

The PRESIDING OFFICER. The Senator from Kentucky.

Mr. FORD. I thank my distinguished friend from North Carolina for giving me a minute.

Let me agree with the distinguished Senator from Oregon and the distinguished Senator from Kansas. We have gotten into the overtones of the cigarette tax as a health question. That is not what we have here.

The distinguished Senator from New Jersey is attempting to fix a tax and designate that to a certain area.

We have not done that in the past. We have had a trust fund for highway building. We have had a trust fund for airport development. We have had a lot of things. But we have never designated a tax to a certain program. That will be refuted, but you just have to look at the bill and how the cigarette tax is applied to the Medicare-Medicaid, or whatever, and that the tax then is extended. So you have double problems as they relate to the piece of legislation.

I say, Mr. President, before this is over, I want the Parliamentarian to be in the posture of answering some questions for me as it relates to this legislation. I shall talk with him later on.

One item I would like to bring up is that most of the States are being devastated by this budget. They are looking forward to having additional income from this cigarette tax offset cuts in the budget. It will never go off; the question is whether you want to keep it here at the national level or you want to keep it at the local level or give your States an opportunity to replace it. That merely is a question that my colleagues will have to answer, whether they want a tax, set a precedent to designate a tax for a certain item within the budget. I do not think we want to do that.

Mr. President, we have lost 4 percent of cigarette sales, which cost $1 billion a year. Keep adding the tax on and the Senator at some point wins by eliminating the ability to keep this program. When we lose the program, then they are going to use all the tobacco they want, cigarettes are going to be cheaper, all those things they are fighting about and beating the drum and carrying the flag for here today are going to go down the drain because they try to impose a harsher and harsher tax on this product.

Mr. President, I do not know how much time I have left of the 5 minutes I had. I would like to yield to my colleague, if I may. How much time do I have left?

The PRESIDING OFFICER. The Senator from Kentucky has 3 minutes.

Mr. FORD. I yield to my distinguished colleague 2 minutes and the distinguished Senator from Tennessee [Mr. GORE] 1 minute. Then I would like to make a parliamentary inquiry.

Mr. McCONNELL. Mr. President, I thank my distinguished colleague from Kentucky and I also appreciate the remarks of the chairman of the Finance Committee with regard to the appropriateness of this particular tax at this particular time.

Mr. President, I must oppose this amendment seeking to make permanent the current 16 cents Federal excise tax on each pack of cigarettes. As all of us recall, even those who were not here, it was Senator HELM's amendment to the Tax Equity and Fiscal Responsibility Act of 1982 that calls for the tax to be lowered back to its original 8 cents per pack beginning October 1, 1985.

I am sure the proponents of this legislation have good intentions, but there are three primary reasons why I will be forced to respectfully disagree with them on this amendment.

First, this amendment proposes a tax increase. Although it may be tempting to suggest that the amendment would freeze the existing 16 cents per pack cigarette excise tax, it is critical to remember that one-half of the 16 cents is a temporary surtax enacted in 1982 and scheduled to sunset this year. The Budget Committee, in its effort to maintain existing revenue law, quite properly assumed that the sunset would take place this year as promised by Congress in 1982.

Second, I do not believe this budget resolution is the proper place to make such a change in the Federal cigarette excise tax. This is a matter that falls under the jurisdiction of the Senate Finance Committee, and they should at least be afforded the opportunity to take the spending and reduction targets established by this resolution and do whatever they see fit on the cigarette tax issue. This is my understanding of how the overall budget process is intended to operate.

Third, consumers of tobacco products already bear an inordinate share of taxes imposed by all levels of government. Smokers paid Federal, State, and local governments a record $9.3 billion in tobacco taxes for the year ending June 30, 1984. The amount, levied on 28.5 billion packs, was an increase of $1.5 billion over the previous year and was more than three times the amount received by tobacco farmers for their 1984 crop.

The Federal cigarette excise tax raised $4.7 billion in this 12-month period. The amount was a $1.3 billion increase over the previous year's collections. Tobacco has been taxed by the Federal Government since 1863. The first State cigarette tax was imposed by Iowa in 1921. Over the past 121 years, tobacco taxes have generated more than $164 billion in revenue. I do not know of any other commodity that is as overtaxed as tobacco.

It is also my strong feeling that the regressive nature of cigarette excise taxes causes them to affect most adversely those who can least afford them—the working people of this country. Excessive cigarette taxes are an undue hardship to the 55 million Americans who choose to smoke, as well as the 276,000 family farmers who depend on tobacco for their livelihoods and the 50,000 workers who earn their living in tobacco manufacturing.

In conclusion, this amendment proposes a tax increase. This is an issue that should be decided by the Finance Committee, and tobacco is already overtaxed. I urge my colleagues to oppose this legislation.

Mr. President, I yield to the distinguished chairman of the Agriculture Committee.

The PRESIDING OFFICER. The Senator from North Carolina.

Mr. HELMS. Mr. President, I yield 1 minute to the distinguished Senator from Idaho [Mr. SYMMS].

Mr. SYMMS. I thank the distinguished chairman for yielding.

I might say, Mr. President, that I come from a State where many of the residents in my State do not smoke, but no matter how you look at it, this is a tax increase if this amendment is put into the budget. If we want to have a budget without tax increases, we cannot accept this amendment.

On the other side of the coin, in my view, with the strength we must exercise as Members of the Senate, if we are going to have a budget package that is ever going to achieve fiscal sanity in this country, we have to make some very hard votes and reduce some Federal programs, which we have done here and will do when this budget finally passes. And I hope it does pass.

At that point, in my view, the cigarette tax should be left as a State prerogative and let the States make those decisions. I do not believe it is incumbent upon the U.S. Senate to sit here and decide we are going to tax ciga-

rettes to determine how much people smoke.

I do not happen to be a smoker, but I think it is wrong to impose taxes for that purpose. Also, it would be an excellent place to allow States, local governments, and municipalities to pick up some badly needed revenue if they have to have it for local control; let them decide it and keep us out of it.

Mr. President, I say we should defeat this amendment.

Mr. HELMS. Mr. President, how much time is remaining, please?

The PRESIDING OFFICER. The Senator from North Carolina has 5 minutes remaining.

Mr. HELMS. Mr. President, I yield 2 minutes to the distinguished Senator from South Carolina [Mr. THURMOND].

Mr. THURMOND. Mr. President, I rise in opposition to this amendment. I was under the impression that it was understood that the current cigarette tax would return to 8 cents per pack at the end of this fiscal year, and there would not be any question about it. I am surprised it has been brought up now.

Personally, Mr. President, I do not smoke. I think it is harmful to smoke. On the other hand, however, there are people who are going to smoke, just like there are people who are going to drink.

Given this, why would we want to have tobacco shipped in here from other countries when we can produce it ourselves? If we put this tax on it, we are only going to put thousands of little farmers out of work, and are going to destroy, to a large extent, the benefit we get in the balance of trade that comes from tobacco trade.

Tobacco already is heavily taxed. For the year ending June 30, 1984, $9.3 billion in tobacco taxes were paid on the Federal, State, and local levels. This was an increase of $1.5 billion over the previous year. Of the total of $9.3 billion, $4.7 billion went to the Federal Government.

Many States have already imposed a cigarette tax in anticipation of the Federal excise tax returning to 8 cents per pack on October 1985 pursuant to the Tax Equity and Fiscal Responsibility Act of 1982.

Increasing the cigarette tax will put greater pressure on the manufacturers to import cheap, foreign-produced, subsidized tobacco, which, as I said, will put thousands of little farmers out of business. It hurts American tobacco farmers and worsens the balance of trade.

Mr. President, I hope this amendment will not pass. It is not in the best interest of the economy of this country and it would be a great mistake, I think, to pass this amendment.

Mr. HELMS. Mr. President, I believe the Senator from New Jersey is mixed up. His statement on his amendment does not fit the amendment. He talked about the designation, where the receipts from the tax will be applied. I ask the Chair, inasmuch as the Senator from New Jersey did not provide a copy of the amendment beforehand, does his amendment designate a tax?

The PRESIDING OFFICER. The amendment contains reconciliation instructions both to the Committee on Ways and Means and the Committee on Finance to raise revenue specifically, but it does not and cannot say where.

Mr. HELMS. That is correct, so the statement of the Senator from New Jersey was a non sequitur.

His amendment does not, indeed cannot, designate how revenues will be raised or where the revenue is to be applied.

Furthermore, Mr. President, the majority leader was absolutely correct: The Senate, indeed the Congress, made a good-faith commitment to the States and localities in 1982. It voted to sunset in 1985 the increase in tax voted that year. As a result of that, many States have imposed a cigarette tax contingent upon the good faith of the Congress of the United States. And here comes the Senator from New Jersey saying, "Oh, well, we are going to raise the tax."

That is going to cut the States off from their tax. The problem is that already revenue sharing has been discarded by the Senate in this budget resolution. At least we ought to leave something to the States if we meant what we said in 1982.

In any case, Mr. President, this is not a tax bill, this is a budget resolution. Other Senators have told of the tax consequences, so I shall not deal with that. But I am saying that it is bad precedent—even if the Senator from New Jersey had read the right statement with his amendment—it is bad precedent to start designating where tax revenues will go, particularly in a budget resolution.

Mr. President, how much time remains on both sides?

The PRESIDING OFFICER (Mr. PRESSLER). The Senator from Kentucky has 1 minute, the Senator from New Jersey has 1 minute, and the Senator from North Carolina has 1 minute.

Mr. HELMS. Mr. President, I reserve the remainder of my time.

Mr. FORD. Mr. President, I yield the remainder of my time to the Senator from Tennessee.

Mr. GORE. Mr. President, I thank my colleague for yielding.

I oppose this amendment for a slightly different reason. I think the Senator from New Jersey has what is basically a good idea. The health consequences of smoking are beyond argument, in my opinion. It is the single largest cause of disease and death in the United States. There is also, however, a severe crisis among tobacco farmers involving a program that does not have any taxpayers' funds in it. There are delicate negotiations underway right now involving the health groups, the tobacco industry, the companies and the growers, and this attacks the 8 cents, which no one really expects to stay down at this level; it will go up eventually. But it is one of the elements in the agreement which eventually will result. This should be done, but it should be done as part of a package later this year that will not only provide revenue for Medicare and health research but will also save the tobacco program.

The PRESIDING OFFICER. The Senator's time has expired.

Who yields time? If neither side yields time, it runs equally.

Mr. FORD. Mr. President, the doubling of the cigarette excise tax in 1982 was followed by a drop in cigarette sales.

According to the USDA, since 1983, when the tax was initiated, cigarette output fell 4 percent and has never recovered. For every 1 percent of the market, there are roughly $268 million of retail sales—includes excise tax. Therefore, this 4-percent drop caused a total reduction in sales of over $1 billion annually.

Some would proclaim this drop in cigarette production caused the major cigarette manufacturers to lose money. Nothing could be further from the truth; management of these companies simply began cutting costs to maintain their profit levels.

I bring to your attention this fact because an increase in the cigarette tax will not affect the companies profits because they will again turn to an area whereby they can save the most money * * * they will turn to the small tobacco family farmer for their savings, small tobacco farmers who operate the 101,000 farms in my State alone.

In 1981 and 1982, before the imposition of the excise tax squeezed operating costs of the cigarette manufacturers, the companies used 463 and 444 million pounds of burley respectively, which is grown in my State of Kentucky. By 1983, only 388 million pounds of domestic leaf was being used, almost a 17-percent drop, a direct reduction in the income to my farmers.

However, the wisdom of this congressional body reduced my farmers' income in another manner; we demanded the Tobacco Price Support Program be operated at no cost to the taxpayers. Yet, we provided no flexibility in the operations of the program to account for a sudden drop in use. The provisions of the no-net-cost program, you may remember, was to require farmers to pay into a fund to provide for any potential losses to the government that may occur—the

result—farmers are going to pay 30 cents per pound, up from 1 cent per pound in 1982.

The tobacco farmer in Kentucky simply cannot withstand this drastic reduction of income: 72 percent of Kentucky's tobacco farmers depend on tobacco for a least 50 percent of their gross income, while 76 percent of Kentucky's tobacco farmers have annual net farm income of less than $10,000, with 47 percent having total family farm and off-farm income of less than $20,000.

The Kentucky tobacco farmer is strongly attached to farming and is reliant to it as a vocation; 44 percent of all farmers in Kentucky have less than a high school education. Tobacco production in my State of Kentucky was worth over $900 million providing direct and indirect benefits or almost $2.5 billion or 3 percent of the gross State product of Kentucky.

Failing to remove the excise tax will only continue to force the manufacturers to find ways of reducing domestic consumption of tobacco, hence reduce the benefits of tobacco production to the State of Kentucky. Every time we reduce tobacco production 1 percent in my State, 1,183 jobs are lost or about a $24 million decrease in the value of Kentucky's total State product.

Kentucky is the largest producer of burley tobacco and any move to extend the doubling of the excise tax will have a substantial effect on the economy of our State. Over the last 2 years, during the time the cigarette tax has been doubled to 16 cents, there has been a loss of 12,500 jobs.

Continuing the 16-cent tax on cigarettes will significantly impact State and local governments which is recent years have come to increasingly rely on excise taxes for more revenue.

We have reached the point of diminishing returns. As consumer sensitivity to higher prices increases, the revenue potential of more tobacco excise taxes rapidly diminishes. At a time when the States are being squeezed fiscally due to Federal budget cuts, it would be particularly disruptive to further erode this important State revenue base.

Because excise taxes are inherently regressive, the burden of the continued tobacco excise tax falls unevenly. This tax has a much greater impact on low- and middle-income taxpayers, the same taxpayers who are currently funding the Federal deficit. Low- and middle-income taxpayers pay a greater percentage of their total income in excise taxes.

At a time when Congress is looking to simplify the Tax Code and reduce the tax burden on lower and middle income taxpayers, continuing the 16-cent cigarette tax does the exact opposite. If we are serious about providing tax relief to these taxpayers, and if we are sincere in our desire to design a tax system that falls evenly on all, then this amendment is the wrong way to go. Not only does this proposal continue to hit low and middle income taxpayers disproportionately, it does so in the same patchwork way that we have been condemning. Perhaps the best way to address reducing the Federal deficit by taxes is to get on with tax simplification legislation. I am sure we can find a more progressive and fair tax that will produce even greater revenues than the cigarette tax. Rather than taxing the low- and middle-income taxpayer, perhaps we should look to General Dynamics and other corporations to simply pay their fair share of taxes and then there will be no need to continue this regressive tax on those in our society who can least afford it.

The tobacco industry, and those who of their free will have chosen to smoke, bear an unfairly heavy tax burden. The Federal excise tax, in combination with State and local excise and sales taxes on cigarettes, amount to 35 percent of the average national retail price of the product. By comparison, the excise taxes on gasoline averages 25 percent of the retail price.

Mr. President, I urge my colleagues to reject this amendment.

Mr. BRADLEY. Mr. President, how much time remains on the side of the Senator from New Jersey?

The PRESIDING OFFICER. One minute.

Mr. BRADLEY. I yield myself 30 seconds.

Mr. President, this amendment simply increases revenues by $5 billion by assuming that the cigarette tax stays where it is today. It also increases the expenditure level for the budget function that includes Medicare. This restoration in funding eliminates the doubling of the Medicare premium. That, Mr. President, is the tradeoff.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. BRADLEY. That is, in summary, what this issue is all about.

Mr. DOLE. Mr. President, does the Senator yield back the remainder of his time?

Mr. BRADLEY. I would say to the majority leader I am prepared to simultaneously yield back the remainder of my time if the distinguished Senator from North Carolina is so prepared.

Mr. DOLE. I do not care. The clock is running.

Mr. HELMS. Mr. President, this Senator assumes he has something in the neighborhood of a minute.

I repeat that this is a matter for the Finance Committee to handle, not a Senator on the floor at 2 minutes past 10 o'clock in the evening.

Senator PACKWOOD has stated it correctly; it is a matter for the Finance Committee to consider after hearings have been held and the equity of the proposition analyzed. But to come in with an amendment that refutes the actions of this Congress in 1982 is not only unfair, it is not consistent with the way the Senate operates.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. HELMS. If I have time, I yield it back.

Mr. DOLE. Mr. President, I move to table the amendment and I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk called the roll.

Mr. STEVENS (when his name was called). On this vote I have a pair with the distinguished Senator from North Carolina [Mr. EAST]. If he were present and voting, he would vote "yea." If I were at liberty to vote, I would vote "nay." I withhold my vote.

Mr. SIMPSON. I announce that the Senator from North Carolina [Mr. EAST] and the Senator from California [Mr. WILSON] are absent due to illness.

Mr. CRANSTON. I announce that the Senator from Nebraska [Mr. EXON] is absent because of illness.

The PRESIDING OFFICER. Are there any other Senators in the Chamber who wish to vote?

The result was announced—yeas 49, nays 47, as follows:

[Rollcall Vote No. 66 Leg.]

PRESENT AND GIVING A LIVE PAIR, AS PREVIOUSLY RECORDED—1

Stevens, against.

NOT VOTING—3

East Exon Wilson

So the motion to table the amendment (No. 88) was agreed to.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the motion to lay on the table was agreed to.

Mr. CHILES. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BYRD. Mr. President, I yield 1 minute to the distinguished majority leader.

The PRESIDING OFFICER. The majority leader is recognized.

Mr. DOLE. Mr. President, how much time is remaining?

The PRESIDING OFFICER. Thirty-seven minutes.

Mr. DOLE. Mr. President, as far as I can determine on this side, there are no additional miscellaneous amendments, and I will now see if our amendment is drafted.

Are there amendments on the Democratic side?

Mr. CHILES. Yes.

Mr. DECONCINI. Mr. President I have an amendment.

Mr. CHILES. Can the Senator cut it down to 5 minutes equally divided?

Mr. DECONCINI. Ten minutes equally divided.

I will take 8 minutes equally divided.

Mr. CHILES. Eight minutes equally divided.

I propound that unanimous-consent request.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 89

(Purpose: To express the sense of the Senate with respect to the apportionment of funds for the WIC program)

Mr. DECONCINI. Mr. President, I send to the desk an amendment and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Arizona [Mr. DECONCINI], for himself, Mr. CRANSTON, Mr. DODD, Mr. KERRY, Mr. MITCHELL, Mr. KENNEDY, Mr. BIDEN, and Mr. CHAFEE, proposes an amendment numbered 89.

Mr. DECONCINI. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of the pending amendment, add the following:

SEC. . It is the sense of the Senate that the amount of budget authority and outlays set forth in this concurrent resolution for the functional category of Income Security (600) for fiscal year 1985 are sufficient to ensure that $1,500,000,000 is apportioned among the States to carry out the Special Supplemental Food Program authorized by section 17 of the Child Nutrition Act of 1966 (commonly referred to as the WIC program); and it is assumed that the Office of Management and Budget should therefore release and apportion to the States the full amount of $1,500,000,000, which was appropriated for the WIC program for fiscal year 1985 since—

(1) Public Law 98-473 provided that, in carrying out the WIC program, funds shall be apportioned to the States based on an annual appropriation level of $1,500,000,000;

(2) the Conference Report on H.R. 5743 (H. Rept. 98-1071), the Agriculture, Rural Development and Related Agencies Appropriation Act, 1985, which was incorporated in Public Law 98-473, expresses the conferees' intent that the WIC program be carried out in such a manner as to fully obligate the $1,500,000,000 appropriated by Public Law 98-473 for such program for fiscal year 1985;

(3) such Conference Report also explicitly stated that any action to allocate funds inconsistent with a full-year appropriation level of $1,500,000,000 for the WIC program would be an improper withholding of funds; and

(4) the Office of Management and Budget has not made available to the Department of Agriculture for distribution to the States the full amount of funds intended by congress to be allocated to the WIC program in any of the first three quarters of fiscal year 1985, and has not made funds available for such program during such quarters at the rate intended by the Congress.

Mr. DECONCINI. Mr. President, I offer this amendment on behalf of the Senator from California [Mr. CRANSTON], the Senator from Connecticut [Mr. DODD], the Senator from Massachusetts [Mr. KERRY], the Senator from Maine [Mr. MITCHELL], the Senator from Massachusetts [Mr. KENNEDY], the Senator from Delaware [Mr. BIDEN], and the Senator from Rhode Island [Mr. CHAFEE]. This amendment is very straightforward. It states that Congress appropriated $1.5 billion for the Special Supplemental Food Program [WIC] for fiscal year 1985 and expresses the sense of the Senate that the Office of Management and Budget [OMB] should immediately release and apportion to the States the full amount that should have been disbursed based on an annual appropriation level of $1.5 billion.

Mr. President, I know that the distinguished majority leader, Senator DOLE, and the distinguished chairman of the Appropriations Subcommittee on Agriculture and Rural Development Senator COCHRAN, have repeatedly and persistently communicated with the Director of the Office of Management and Budget, David Stockman, to release the full amount of money that Congress intended to be allocated to the WIC Program for fiscal year 1985.

I commend them for their efforts, but Mr. Stockman has let their requests fall on deaf ears.

This amendment is intended to send a clear signal to Mr. Stockman that the Senate is tired of OMB's attempts to circumvent the will of Congress.

Let me briefly explain what has happened with the funding for the WIC Program.

The continuing resolution for fiscal year 1985, Public Law 98-473, which incorporates the funding for the Department of Agriculture appropriated $1.5 billion for the WIC Program.

The $1.5 billion was appropriated in two amounts: $1.254 billion for the period October 1-August 1, 1985, and $246 million for the remainder of the fiscal year, contingent upon the submission of a budget request for this second amount.

However, Congress mandated, in the statute, that the appropriated funds were to be apportioned at the full $1.5 billion annual rate. The conference report (H. Rept. 98-1071) accompanying the fiscal year 1985 Agriculture appropriations bill, which was folded into the continuing resolution, states that it is the conferees' intent that the WIC Program be carried out in such a manner as to fully obligate the $1.5 billion and that any action to allocate these funds inconsistent with a full-year appropriation level of $1.5 billion will be an improper withholding of funds for fiscal year 1985.

While OMB may have a legislative loophole to jump through, the intent of Congress with regard to the WIC Program could not be more clear. But OMB does not appear to have received the message. Let us take a look at how they have apportioned the WIC funds over the first three quarters of the fiscal year.

Instead of apportioning $375 million each quarter, which is one-fourth of the annual $1.5 billion appropriation, the following amounts have been allocated to the States: First quarter, $353,894,250; second quarter, $365,000,000; third quarter, $370,000,000 for a total of $1,088,894,250.

The total for the first three quarters is $1,088,894,250 or $36,105,750 less than the amount that should have been made available to the States for this period as the Senate and the House of Representatives directed in the public law.

As a result of the withholding of the full quarterly apportionments, a disproportionately large amount of the $1.254 10-month appropriation—$163,567,417—is being made available in July. Since the States cannot possibly use all of the July funding in 1 month, there will obviously be a large amount of money to carry over into the August-September period.

As a result, the administration has submitted a budget request for $169,295,000 for the final 2 months of the fiscal year, which is far short of the $246 million Congress intended.

Finally, Mr. President, it must be pointed out that the full amount that OMB is making available for the WIC

Program in fiscal year 1985 is $1.424 billion or more than $76 million less than Congress appropriated.

Mr. President, because OMB has not made available to the States the full amount of funding Congress appropriated for the WIC Program, it is estimated that more than 230,000 women, infants, and children may not be served by the program.

The WIC Program serves low-income pregnant and nursing women and their children who are nutritionally at risk.

It is one of the most effective programs ever enacted by Congress, and it is cost-effective.

It has a proven track record in decreasing the long-term social, health, and economic costs associated with inadequate prenatal and infant nutrition.

This Senator finds it unconscionable that OMB would deliberately attempt to circumvent the will of Congress with regard to funding for this program and deprive thousands of low-income women and children of basic nutritional needs.

Mr. President, I urge all of my colleagues to support this amendment to underscore their commitment to the WIC Program.

Mr. CHAFEE. Mr. President, I rise today in support of the amendment offered by the Senator from Arizona [Mr. DECONCINI]. The WIC Program has proven enormously effective in battling malnutrition among women, infants, and children, and it is important that Congress assure full funding for this program, at the $1.5 billion level already appropriated for the current fiscal year.

Congress was clear in its intent that the WIC Program be funded at $1.5 billion in fiscal year 1985. Now we must act to urge that these funds be made available, or face the consequences of malnutrition in expectant mothers, newborns, and children under the age of 5—consequences that last a lifetime.

If no action is taken, the WIC Program will face a shortfall of approximately $70 million, with the result that 250,000 nutritionally at-risk women and children will be removed from the rolls.

For some WIC recipients, it is already too late. At least eight States have already begun to remove mothers and their children from the rolls; three more have started cutting back on the amount of food they provide. Nearly all States are drawing up plans right now to take people off the program. The medical problems associated with malnutrition are already in the making, and are irreversible. We can act now, or pay a very high price later.

I urge my colleagues to join me in supporting this resolution.

Mr. HOLLINGS. Mr. President, I am pleased to join as a cosponsor of the amendment offered by the distinguished Senator from Arizona. As one who worked to create the Woman, Infants, and Children Special Feeding Program, and who has consistently supported the fine work this outstanding program does, I commend my colleague for bringing this amendment to the Senate's attention. What the administration has done in operating this program should not be tolerated. Moneys that Congress has appropriated for the operation of the program have been withheld and over 200,000 eligible recipients under the program have been denied its important benefits. Every study I've ever seen indicates that we save $3 or more in reduced care costs for every $1 we spend on this program. It's a winner and one this body should readily endorse. I urge my colleagues to join with me in passing this amendment.

Time being short, I will not have the opportunity to make a long statement detailing the value of the program. Let me concur with the remarks of my colleague from Arizona. And, Mr. President, I ask that a editorial appearing in the New York Times on Saturday, May 4 be inserted in the RECORD.

The article follows:

WOMEN, CHILDREN AND CRUEL THRIFT

In 1972 Congress created a food program called WIC, for Women/Infants/Children, to improve the diet of poor pregnant and nursing women and young children certified by physicians to be at nutritional risk. The worst thing that's ever been said about WIC is that it is unable to include all those who need its help. If the Administration is sincere about maintaining a social safety net, then it would have to include poor, malnourished mothers and babies.

Why then is the Administration so consistently hostile to WIC? There's little room here to find much of that oft-touted trio—waste, fraud and abuse. Eight of every ten WIC dollars go for prescription foods like infant formula and fortified cereals. Most of the rest goes for screening, blood tests and nutrition counseling. Nonetheless, the Administration has remained at continual loggerheads with Congress over paying for the program, and even now refuses to release part of the money already appropriated for this year.

The Administration is stretching 10 months' funding to cover 12 months, cutting WIC short by about $70 million. That doesn't sound like much, until one recognizes that the entire cut is concentrated into a few weeks at the end of the fiscal year. The fruit of such thrift is already clear. WIC is supposed to include children under age 5. In New Mexico, it is no longer possible to cover children over 18 months. Local agencies in Maine, after having dropped 300 people from the program in March, were told to cut 1,000 more. Arkansas says it will have to cut 3,600. In March, there were 16,300 New Yorkers on waiting lists. In coming weeks, thousands now enrolled in the program will have to be dropped. All told, as many as 250,000 of WIC's 3.1 million recipients could be affected.

It's starting to sound like the Nixon Administration's notorious efforts to impound money that Congress ordered spent for social programs. In this case a House subcommittee has already called for the missing money, in the big supplemental appropriations bill. But that will take weeks to work its way through Congress.

Can't this wait a few weeks? The answer is another question: Can't the unborn children of malnourished pregnant women wait a few weeks? For some WIC participants, it is already too late. The medical problems attendant on poor nutrition are now in the making. The Administration, so eager to celebrate the "Right to Life," has the power and the duty to release all the WIC funds immediately. If not, the House and Senate appropriations committees, will have to order it to do its duty, to Congress and to conscience.

The PRESIDING OFFICER. The Senator's 8 minutes have expired.

Mr. DECONCINI. Mr. President, I yield back the remainder of my time.

Mr. President, I ask unanimous consent that the Senator from South Carolina [Mr. HOLLINGS], the Senator from Texas [Mr. BENTSEN], and the Senator from Oklahoma [Mr. BOREN] be added as cosponsors.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BOSCHWITZ. Mr. President, I wonder, if the Senator from New Mexico on this side would agree to accepting the amendment, whether or not the Senator from Arizona would be agreeable to vitiating the yeas and nays.

Mr. DECONCINI. Mr. President, the Senator from Arizona would be more than happy to have a 10-minute rollcall vote, if that would be the wish of the leadership.

Mr. BOSCHWITZ. Mr. President, I believe all the rollcalls are now 10 minutes.

Mr. DECONCINI. I did not know that. I apologize.

Mr. BOSCHWITZ. This side is willing to accept the Senator's amendment, in the interest of time, at 10:30 at night, if the Senator would be willing to vitiate the yeas and nays.

Mr. DECONCINI. No, I am not.

Mr. BOSCHWITZ. We yield back the remainder of our time.

The PRESIDING OFFICER. All time is yielded back. The question is on agreeing to the amendment of the Senator from Arizona [Mr. DECONCINI]. The yeas and nays have been ordered and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. SIMPSON. I announce that the Senator from North Carolina [Mr. EAST] and the Senator from California [Mr. WILSON] are absent due to illness.

Mr. CRANSTON. I announce that the Senator from Nebraska [Mr. EXON] is absent because of illness.

The result was announced—yeas 97, nays 0, as follows:

[Rollcall Vote No. 67 Leg.]

NOT VOTING—3

East	Exon	Wilson

So the amendment (No. 89) was agreed to.

Mr. DECONCINI. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. DOLE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 90

(Purpose: To restore funding for Amtrak, urban mass transit programs, and Urban Development Action Grants (UDACs) for each of the fiscal years 1986, 1987, and 1988 to the levels of funding provided for such programs in fiscal year 1985)

Mr. LAUTENBERG addressed the Chair.

The PRESIDING OFFICER. The Senator from New Jersey.

Mr. DOMENICI. Mr. President, I ask unanimous consent that on this amendment the time be held to 5 minutes, and equally divided.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. LAUTENBERG. Mr. President, I thank the floor manager.

Mr. President, I send an amendment to the desk on behalf of myself and Senators DODD, MOYNIHAN, WEICKER, KENNEDY, BAUCUS, RIEGLE, LEVIN, KERRY, SARBANES, BRADLEY, and ROCKEFELLER, and I ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from New Jersey [Mr. LAUTENBERG], for himself, Mr. DODD, Mr. MOYNIHAN, Mr. WEICKER, Mr. KENNEDY, Mr. BAUCUS, Mr. RIEGLE, Mr. LEVIN, Mr. KERRY, Mr. SARBANES, Mr. BRADLEY, and Mr. ROCKEFELLER, proposes an amendment numbered 90.

Mr. LAUTENBERG. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

In the pending amendment, do the following:

On page 3, increase the amount on line 12 by $2,000,000,000.

On page 3, increase the amount on line 13 by $2,500,000,000.

On page 3, increase the amount on line 14 by $2,900,000,000.

On page 3, increase the amount on line 18 by $800,000,000.

On page 52, increase the amount on line 4 by $2,900,000,000.

Mr. LAUTENBERG. Mr. President, I yield myself 2 minutes out of the 2½ minutes allowed to me.

Mr. President, my amendment provides for a freeze at fiscal year 1985 levels of Amtrak, mass transit, and urban development action grants for fiscal years 1986, 1987, and 1988.

Mr. President, over the next 3 years, these programs would account for one-half of 1 percent of Federal spending—outlays—but under the so-called compromise budget they would bear three times their share in deficit reduction.

Mr. President, the Urban Development Action Grant Program has made the difference between urban decay and urban revival by making it possible for development that can swing a city around. By leveraging private investment with public money, the

UDAG program has spurred over 2,400 developments in close to 1,100 cities involving $26 billion in private investment. And that private investment yields $990 million a year in tax revenues and reduced transfer payments.

It is a proper role for the Government to continue the development of the urban economy throughout the country.

Our towns and cities need mass transit, as much as the rural housing and water resources and hydroelectricity that are integral to the economies and welfare of other regions of the country. Mass transit assistance is critical to move people to and from work in the densely populated cities, counties, and States of our Nation. Without mass transit aid, other transportation arteries clog, and the economic heart of the areas dependent on these mass transit services will falter.

Mr. President, that is why we need these programs funded at the freeze level for the current year. In fact, what it amounts to is a reduction, a reduction for inflation.

This body has already voted to restore 90-percent funding for Amtrak resulting in a 10-percent cut from Amtrak's current budget, which, in fact, is more like a 14-percent to 15-percent cut because of inflation. This is on top of the 26-percent cut that Amtrak has already experienced since 1981.

Mr. President, the president of Amtrak, Graham Claytor, testified before the Senate Transportation Appropriations Subcommittee this year that Amtrak is moving as fast as it can to increase its revenue-to-cost ratio. In 1978 Amtrak's revenue-to-cost ratio was 48 percent. In 1985 it increased to 58 percent. In the fiscal year 1986 budget Amtrak submitted to Congress, the ratio assumed is 60 percent. Mr. Claytor testified that he was attempting to move toward covering two-thirds of Amtrak's costs within the next 5 years.

To my colleagues I would say: do not force further cuts on Amtrak now, when it is moving in an orderly fashion, toward more self sufficiency by increasing its ridership and instituting efficiencies. Let us take Amtrak at its word and freeze this year—in a real cut of 5 percent or so—and reexamine this issue next year.

In sum, Mr. President, the amendment we offer would do three things:

It would save Amtrak.

It would save mass transit assistance.

And it would save UDAG.

I urge my colleagues to support the restoration of these important investments in our economy. I urge adoption of the amendment.

Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. LAUTENBERG. Mr. President, I ask unanimous consent that the Senator from West Virginia, Mr. BYRD, be added as a cosponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DANFORTH addressed the Chair.

The PRESIDING OFFICER. The Senator from Missouri is recognized.

Mr. DANFORTH. Mr. President, I yield myself 30 seconds.

Earlier today we debated the question of Amtrak. Forty-one Senators voted against the Specter amendment. The issue before the Senate now is whether Amtrak is such a first priority in this country that it should play absolutely no role in reducing the size of the deficit. My answer to that question—and I trust the Senate's answer—is no.

The PRESIDING OFFICER. who yields time?

Mr. DANFORTH addressed the Chair.

The PRESIDING OFFICER. If neither side yields time——

Mr. LAUTENBERG. Mr. President, I ask unanimous consent that Senator ROCKEFELLER be added as a cosponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. RIEGLE. Will the Senator yield?

Mr. LAUTENBERG. I yield.

Mr. RIEGLE. Mr. President, I rise in support of the amendment offered by my colleague Mr. LAUTENBERG, to include the Urban Development Action Grant [UDAG] Program in the first concurrent budget resolution.

The UDAG Program has proven that the Federal and local governments can act in cooperation with the private sector to strengthen the economies of our Nation's most distressed cities.

UDAG is clearly a program that is working extremely well. It helps locate new industry in areas where there is the greatest need. It creates jobs. It makes fuller use of the Nation's enormous investment in existing roads, water and sewer systems and other infrastructure.

Since it was enacted, UDAG has demonstrated solid results. Over 2,400 UDAG projects are projected to create or maintain 484,000 permanent new jobs; 55 percent of those jobs are slated for low- and moderate-income persons.

UDAG has stimulated almost $7 in private investment for every Federal dollar. That's a total of $21 billion private investment dollars that UDAG has generated in just a few years. That's a real success story in private sector-government cooperation.

Mr. President, some Senators have expressed concern that the UDAG project selection system, which HUD adopted just over a year ago, puts a number of communities at a disadvantage in the competition for funding. I believe we have found a way to solve that problem in a way that will reinforce broad support for the UDAG Program across the country.

The problem was created at the end of 1983 when HUD implemented a new project selection system because demand for UDAG began greatly to exceed the funds available. As a result, eligible cities that have relatively low measures of distress came to feel that they are unable to get a grant no matter how strong a project they submit.

I understand that concern. I am sympathetic to it. And a number of Senators went to work with me over the last 9 months to come up with an effective and fair solution. That effort has involved Senators from both parties, from all regions of the country, and who represent cities on both sides of this issue.

Mr. President, we have recently completed work that should finally put this controversy to rest.

We have a way to significantly strengthen the UDAG Program. We have a way to improve local negotiations and to give all eligible cities a fair chance to have outstanding projects approved.

The bill would retain important aspects of the UDAG Program that have made it so successful, such as the national competition and targetting on the most distressed cities. It would not change the type of projects that a city may submit for the competition.

I am confident that we can enact this major reform soon and remove any question the UDAG funding should continue at the level provided in this amendment.

This amendment is vitally important to the Nation's cities.

UDAG projects are expected to contribute $491 million in annual tax revenues to hard-pressed local governments. At the end of 1983, local governments were already receiving $63 million annually in additional revenues as a result of UDAG projects. Repayments of loans made with UDAG funds have provided an additional $45 million.

At the end of last year, UDAG projects would produce almost 93,000 housing units, approximately one-third of which are for low and moderate income persons.

The UDAG Program generates more fiscal benefits in the form of increased revenues and reduced transfer payments than it costs. Conservative estimates place the increased Federal, State, and local revenues and cost savings at $991 million per year, compared to an annual appropriation of $440 million. Clearly UDAG has helped to build a solid new economic foundation in a number of hard-

pressed cities across the Nation. And it has done so while maximizing the return on scarce Federal dollars. Such a successful Federal program should not be eliminated.

In my own State of Michigan, the UDAG Program has allowed communities to help themselves in partnership with the private sector and with a minimum of Federal direction, red-tape, and bureaucracy. Since 1978, nearly 50 Michigan communities have received over $314 million from the Federal Government and over $2.5 billion from private investors for UDAG projects. Over 63,000 Michigan jobs have been created or saved.

I strongly support UDAG as an important and proven tool that enables private investors and local governments to carry out projects that help develop the economies of the Nation's most distressed cities. I urge my colleagues in the Senate to support the amendment.

Mr. BYRD. Mr. President, I support funding for mass transit. This program is extremely important to small, rural States, and it has become even more important since bus deregulation. With bus deregulation, bus lines such as Trailways and Greyhound have been terminating service in States such as West Virginia. Communities, with the assistance of mass transit funding, have been able to establish transit services.

As a matter of fact, the Interstate Commerce Commission, recognizing that the private sector is not coming forward to fill the gap, is advising local communities to avail themselves of the funding available from the Urban Mass Transit Administration.

In my State of West Virginia, there are 12 transit companies; of those 12, 5 communities—Charleston, Clarksburg, Huntington, Parkersburg, and Wheeling—have enacted excess property tax levies to support their transit companies.

Should operating assistance be eliminated, I am advised that many of these companies will have to close down.

I have heard from many West Virginians who use the bus to get to work, to the doctor, to the grocery store—many of the riders are poor and many are elderly.

I support this amendment and would hope that my colleagues would also.

Mr. KASTEN. Mr. President, I rise to voice my support for the Lautenberg amendment, particularly the portion dealing with the Department of Housing and Urban Development's Urban Development Action Grant Program.

Since the program's inception in 1978, Wisconsin has benefited greatly from the UDAG Program. Fifty-two projects totaling seventy-five million dollars have been approved, 8,600 new jobs have been created, and a tremendous amount of spinoff projects have resulted. In my opinion, no Federal grant program has contributed more in stimulating economic growth in Wisconsin than the UDAG Program.

UDAG's have also been successful in forging a partnership between private and the public sector. In fact, the private sector has invested nearly a half a billion dollars in Wisconsin communities. Hand in hand these two sectors of our society have been successful in redeveloping and revitalizing Wisconsin.

Mr. President, as we all know, Wisconsin is the 16th largest State and has ranked near the bottom in the receipt of Federal funds. The UDAG Program is different. Wisconsin has received its fair share. This is a result of a strong desire by Wisconsin communities to enhance their economic stability.

Mr. President, I am very much aware of the criticism that has been leveled against the Urban Development Action Grant Program. Some of it is well founded; some of it is misleading. In Wisconsin we are proud of the fact that UDAG funds are being used as the program was intended. I would like to brag a little bit about Wisconsin's success in this area. In 1979, the city of Milwaukee received a $12.5 million UDAG for the development of a mall in downtown Milwaukee, 800 new jobs were created, several spinoff projects have resulted, but more importantly downtown Milwaukee is alive and kicking and is a viable place to do business once again. The same story can be told in Wausau and in Stevens Point. Mall projects in these two cities have turned dilapidated areas into financial goldmines. The Wausau project has exceeded all financial expectations and the same is expected in Stevens Point. Office buildings in Milwaukee and La Crosse have brought new industry into these cities and created new employment opportunities. These are just a few of the success stories in Wisconsin. UDAG works, and it should be continued.

Elimination of the UDAG Program will not only have a profound affect on Wisconsin but the entire country. Let's review the facts. Since 1978, 2,434 projects have been approved, 1,070 cities have benefited, $3.7 billion obligated, $21.1 billion invested by the private sector in our communities, and 483,780 new jobs created, not to mention the hundreds of thousands of jobs retained and construction jobs added. These figures are impressive. How can we afford to eliminate a Federal program which has done so much for this country in revitalizing our communities and creating needed jobs?

I am confident that without the UDAG Program, many future development projects will no longer be feasible and our urban communities will see a decline in economic growth. I challenge my colleagues to carefully review the impact UDAG has had on their States and I believe they will come to the same conclusion that I have.

Mr. President, I am opposed to eliminate this program. I believe it has been too valuable to this country and should be continued. Economic growth is the backbone of our society. Without the UDAG Program many of our communities will lack the sufficient resources to encourage revitalization in our cities.

The PRESIDING OFFICER. The Senator from Missouri.

Mr. DANFORTH. Mr. President, we did debate Amtrak earlier today. Senator SPECTER offered an amendment which was adopted. The effect of the Specter amendment was to cut Amtrak by 10 percent a year over the next 3 years.

I think the arguments were pretty well made earlier today about the significance of Amtrak. Amtrak is not in the central part of our transportation system. It carries one-quarter of 1 percent of the intercity transportation. Even in the Northeast corridor, people arriving in Manhattan every day, one-quarter of 1 percent of them are transported by Amtrak.

As I said earlier, I think the issue before us now is whether or not we are willing to make even a 10-percent cut, but whether Amtrak is so precious to us, such a high priority, that it will not play any part whatever in the reduction of this deficit.

The business of passing a budget resolution is the business of setting priorities. I think that is the issue before us now. It is the relative priorities of either reducing the deficit or keeping this very nice accessory of the past, which is Amtrak.

I would urge the Senate to defeat the amendment of the Senator from New Jersey.

Mr. LAUTENBERG. Mr. President, these programs play a vital role in the development of economic opportunity in our cities, and in the maintenance of an efficient and effective transportation network. They should be preserved.

The PRESIDING OFFICER. The time of the Senator has expired.

The majority leader.

Mr. DOLE. Mr. President, I move to table the amendment and I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Kansas. The yeas and nays have been ordered and the clerk will call the roll.

The legislative clerk called the roll.

Mr. SIMPSON. I announce that the Senator from North Carolina [Mr. EAST] and the Senator from California [Mr. WILSON] are absent due to illness.

Mr. CRANSTON. I announce that the Senator from Nebraska [Mr. EXON] is absent because of illness.

The PRESIDING OFFICER. Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 57, nays 40, as follows:

[Rollcall vote No. 68 Leg.]

YEAS—57

Abdnor	Goldwater	Murkowski
Armstrong	Gore	Nickles
Bentsen	Gorton	Nunn
Bingaman	Gramm	Packwood
Boren	Grassley	Pressler
Boschwitz	Hatch	Proxmire
Bumpers	Hatfield	Pryor
Chafee	Hawkins	Quayle
Chiles	Hecht	Roth
Cochran	Helms	Rudman

Dodd	Leahy	Weicker
Eagleton	Levin	Zorinsky
Ford	Mathias	
Harkin	Matsunaga	

NOT VOTING—3

East	Exon	Wilson

So the motion to lay on the table amendment No. 90 was agreed to.

Mr. DOMENICI. Mr. President, I move to reconsider the vote by which the motion to lay on the table was agreed to.

Mr. CHILES. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 73

(Purpose: To add funds for the Summer Youth Employment Program, part B of Title II of the Job Training Partnership Act)

Mr. CHILES. Mr. President, I yield to the Senator from Illinois, but I ask unanimous consent that the time on the amendment of the Senator from Illinois on summer jobs be 4 minutes equally divided.

Mr. DOMENICI. Four minutes equally divided. I have no objection.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DIXON. Mr. President, I have amendment 73 at the desk. I ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The bill clerk read as follows:

The Senator from Illinois [Mr. DIXON] proposes an amendment numbered 73.

Mr. DIXON. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 3, increase the amount on line 12 by $160,000,000.

On page 3, increase the amount on line 13 by $160,000,000.

On page 3, decrease the amount on line 14 by $160,000,000.

On page 3, increase the amount on line 19 by $144,000,000.

On page 3, increase the amount on line 20 by $160,000,000.

On page 4, increase the amount on line 1 by $144,000,000.

On page 4, increase the amount on line 2 by $160,000,000.

On page 4, increase the amount on line 7 by $144,000,000.

On page 4, increase the amount on line 8 by $304,000,000.

On page 4, increase the amount on line 13 by $144,000,000.

On page 4, increase the amount on line 14 by $160,000,000.

On page 4, increase the amount on line 14 by $160,000,000.

On page 19, increase the amount on line 21 by $160,000,000.

On page 20, increase the amount on line 6 by $160,000,000.

On page 20, increase the amount on line 7 by $144,000,000.

On page 20, increase the amount on line 15 by $160,000,000.

On page 20, increase the amount on line 16 by $160,000,000.

On page 42, increase the amount on line 6 by $160,000,000.

On page 42, increase the amount on line 7 by $160,000,000.

On page 42, increase the amount on line 8 by $144,000,000.

On page 42, decrease the first amount on line 9 by $160,000,000.

On page 42, decrease the second amount on line 9 by $160,000,000.

On page 45, decrease the amount on line 21 by $160,000,000.

On page 45, decrease the first amount on line 23 by $160,000,000.

On page 45, decrease the second amount on line 23 by $144,000,000.

On page 45, decrease the amount on line 24 by $160,000,000.

On page 45, decrease the amount on line 25 by $160,000,000.

On page 52, decrease the amount on line 1 by $160,000,000.

On page 52, decrease the amount on line 3 by $160,000,000.

On page 52, decrease the amount on line 4 by $160,000,000.

Mr. DIXON. Mr. President, this amendment restores the fiscal year 1985 level of funding for the Summer Youth Employment Program.

The budget authority for title II B of the Job Training Partnership Act in the budget resolution we are addressing is at its lowest level in many years. This program has been funded at the $825 million level since fiscal year 1984, and should be continued at that level.

Last year, my colleagues may recall, major cities in this country would have experienced deep cuts in the program, due to a number of factors. I sponsored an amendment to add $100 million to the program, bringing funding to $825 million in order to partially restore the cuts which would have taken place last summer. That amendment was adopted by unanimous consent and accepted by the House of Representatives. Although the funds were not received by some cities when their programs began, funds were utilized, and there is no justification to cut the program so severely.

Mr. President, we are not requesting an increase, either real or inflation adjusted, for this program. We are requesting a freeze at the 1984 level. The program has provided critically needed funds to young people who need these jobs.

Unemployment among our young people continues to be a major problem across this land. Unemployment has not decreased by 19 percent. Why then should funding for this program be reduced by that amount?

Just as the major cities of this country were cut drastically last summer, such a situation will exist with a $160 million cut in funds for the summer of 1987, which is when the fiscal year 1986 funds will be used. The intention of the Congress has been to fund this program at a consistent level for the past two summers. It just does not make sense to impose a cut of such magnitude for two summers from now.

If it eventually is the decision of this body to level fund this program in the summer of 1987, there would be no budget authority to do so. In fact, there would not even be enough budget authority to fund the program at the preamendment level from last year, which was $725 million. The budget assumption at this point is $665 million.

The city of Chicago has utilized this program in exactly the way that was intended. The mayor's office of employment and training has collaborated with the Carson, Pirie, Scott organization, which is a major department store in Chicago, as well as many other private companies. Their participation is encouraging because it will provide a needed link with the private sector in creating jobs for young people.

This is a very important step in the development of the Summer Youth Employment Program, and one which should not be taken lightly. Private sector initiatives were the goal of the Job Training Partnership Act, and this is a wonderful example of the successful attainment of that goal.

The Congress has upheld the level of funding for this program as recent-

ly as April 24, when the President's rescission of the additional $100 million which was appropriated last year was not sustained.

The Department of Labor has reported that last summer's funds were not spent completely. There are very good reasons for that. First, it is good management to carry over 10 percent of the funds for the following year. This program is forward funded, but often the money is not distributed until June, and there are a great many things to be done in preparation for the summer program. Jobs don't just happen, and young people need to submit applications. Those preparations take staff and the funds are used for that purpose.

Last year's supplemental funds of $100 million were not received by the various localities until the summer program had already begun. My amendment first passed the Senate by unanimous consent on April 5, 1984. It was part of a bill which contained funds to assist the Contras in Nicaragua, and the House and Senate and White House were at odds for several months. The President finally signed the bill containing the funds on July 2, 1984—well into the summer. Over a month of the summer had passed before the funds were available.

At least 86 percent of the funds were spent, and an additional 10 percent were carried over for this year, leaving about 4 percent unexpended, due to the late start up. That isn't a bad record, given the circumstances.

The Appropriations Committees of both Houses agreed that we shouldn't have that kind of delay again this year, and included the additional funds. Without the amendment we seek today, there would not be adequate budget authority to provide this effective and proven level of funding.

This amendment has the enthusiastic support of a number of diverse groups—the National League of Cities, the U.S. Conference of Mayors, the City of Chicago, 70001, the National Alliance of Business, the AFL-CIO and the National Youth Employment Coalition.

The concerns of many interested organizations and individuals center on two factors: First, these young people need these jobs, in many instances to help support their families or pay for their schooling; second, the peacefulness of a community can be easily disrupted by a combination of factors including lots of young people with time on their hands, who also suffer feelings of despair because they have no money and little hope of finding work. This program has kept these kids off the streets and out of trouble. A 19-percent cut will mean that fewer people can be served, and more will be idle. This is a small price to pay to provide a start for needy young people. The alternative, in terms of lack of job experience for these teenagers, is a situation which could well impair their ability to find work as adults.

This program is important, not only for the future summers for which we are now planning, but for the future lives of kids who need a chance. They have faith in this system of government, and if we turn our backs on them now, it will have an effect on their future confidence in all of us.

Mr. President, last year, with the $100 million cut, it would have cut summer employment in Chicago 47 percent, in Birmingham 32 percent, in San Francisco 37 percent, in Indianapolis 39 percent, in Baltimore 32 percent, in Grand Rapids, MI, 41 percent, in Minneapolis 38 percent, in St. Louis 37 percent, in Newark, NJ, 59 percent, in Cleveland 42 percent, in Pittsburgh 45 percent, and in Dallas 40 percent, but this year it will be worse.

In the summertime, when the weather is hot, these kids will be on the streets without jobs. This is an amendment that will be remembered in every major city in America by every kid who needs a job. I earnestly solicit the support of the membership for a modest amount of money, $160 million, to keep kids working and out of mischief in the summertime in all of the major cities of America.

Mr. KENNEDY. Mr. President, I support this amendment. Unemployment among our Nation's young people continues to be a serious problem. Youth unemployment is more than twice the national unemployment rate and minority teens fare much worse in the job market.

Even more alarming are the numbers of these young people who've completely given up looking for work. While one in two white teenagers has a job, only one in three Hispanic youth and just one in five black youngsters are employed.

The administration's answer to this national disgrace is to cut back or eliminate programs that are working and replace them with a program that won't.

Lowering the minimum wage for all teenagers in the summer is unlikely to create any new jobs for the hundreds of thousands of youngsters without work.

Summer Jobs is exactly the kind of program we ought to be supporting. It benefits disadvantaged youngsters living in inner cities by giving them the choice to work when school is out.

Without the chance to participate in the Summer Jobs Program, these youngsters would have virtually no chance for employment. The jobs just aren't there. And lowering the minimum wage won't change that.

I think we should be strengthening and improving this program, not cutting back. We should require these youngsters to participate in education during the summer months so they don't lost the skills they've gained during the school year, and fall further and further behind when they return to classes in September. And I will be introducing legislation to make this a requirement.

I want to commend my colleague from Illinois for his leadership on this issue and I urge my colleagues to vote for the Dixon amendment.

The PRESIDING OFFICER. Who yields time?

Mr. HATFIELD. Mr. President, I am ready to yield back the remaining part of the time on this side of the aisle.

The PRESIDING OFFICER. Does the Senator from Illinois yield back his time?

Mr. DIXON. Mr. President, I yield back my time.

Mr. HATFIELD. Mr. President, parliamentary inquiry. Has all time been yielded back?

The PRESIDING OFFICER. All time has been yielded back.

Mr. HATFIELD. What is the question before the body?

The PRESIDING OFFICER. The amendment of the Senator from Illinois.

Mr. HATFIELD. Mr. President, I move to table the amendment of the Senator from Illinois and ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion to table the amendment of the Senator from Illinois.

The clerk will call the roll.

The bill clerk called the roll.

Mr. SIMPSON. I announce that the Senator from North Carolina [Mr. EAST] and the Senator from California [Mr. WILSON] are absent due to illness.

Mr. CRANSTON. I announce that the Senator from Nebraska [Mr. EXON] is absent because of illness.

The PRESIDING OFFICER. Are there any other Senators in the Chamber who wish to vote?

The result was announced—yeas 62, nays 35, as follows:

[Rollcall Vote No. 69 Leg.]

YEAS—62

Abdnor	Gorton	Murkowski
Andrews	Gramm	Nickles
Armstrong	Grassley	Packwood

NOT VOTING—3

East	Exon	Wilson

So the motion to table the amendment (No. 73) was agreed to.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the motion was agreed to.

Mr. HATFIELD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 91

Mr. LEVIN. Mr. President, I send an amendment to the desk on behalf of Mr. DIXON, Mr. BINGAMAN, Mr. SIMON, and myself, and I ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Michigan [Mr. LEVIN], for himself and others, proposes an amendment numbered 91.

Mr. LEVIN. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 2, increase the amount on line 9 by $1,500,000,000.

On page 2, increase the amount on line 10 by $1,700,000,000.

On page 2, increase the amount on line 11 by $1,700,000,000.

On page 2, increase the amount on line 15 by $1,500,000,000.

On page 2, increase the amount on line 16 by $1,700,000,000.

On page 2, increase the amount on line 17 by $1,700,000,000.

On page 3, decrease the amount on line 25 by $1,500,000,000.

On page 4, decrease the amount on line 1 by $1,700,000,000.

On page 4, decrease the amount on line 2 by $1,700,000,000.

On page 4, decrease the amount on line 6 by $1,500,000,000.

On page 4, decrease the amount on line 7 by $3,200,000,000.

On page 4, decrease the amount on line 8 by $4,900,000,000.

On page 4, decrease the amount on line 12 by $1,500,000,000.

On page 4, decrease the amount on line 13 by $1,700,000,000.

On page 4, decrease the amount on line 14 by $1,700,000,000.

Mr. CHILES. Mr. President, I ask unanimous consent that the time on this amendment be 6 minutes, equally divided.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. LEVIN. I yield myself 2 minutes.

Mr. President, this amendment will continue the cigarette tax at the present level, with the resulting $4.9 billion over 3 years going to deficit reduction. Unlike the problem which some saw with the Bradley amendment, the revenues here are not earmarked for a spending program.

They are applied to deficit reduction. There is no tax increase here. We just continue a current tax and cut the deficit.

The legislative history of the current tax is that it was set in 1982 at 16 cents a pack up from 8 cents a pack, because the projected deficit in 1985, people felt, would be $60 billion and would, therefore, be manageable; it could thereby be reduced back to 8 cents. But, as a matter of fact, the deficit in 1985 is $213 billion and let me repeat that.

We assumed the deficit would be $60 billion. That was the basis of our action. It is now $213 billion.

Do we really want to add to our deficit woes by $5 billion over 3 years by cutting the cigarette tax in half? That is the issue.

All we have to do is keep the present cigarette tax where it is and we cut the deficit by $5 billion over 3 years.

If we are serious about deficit reduction, we are not going to cut the cigarette tax in half. Instead, we will keep it where it is and apply the proceeds—that is the intention here—to deficit reduction.

Mr. DIXON addressed the Chair.

Mr. LEVIN. Mr. President, how much time do we have remaining?

The PRESIDING OFFICER. One minute and five seconds.

Mr. LEVIN. I yield a minute to my friend from Illinois.

Mr. DIXON. Mr. President, I want to support the statement by my friend from Michigan. I think it is inconceivable that at a time when we are considering these serious budgetary constraints we would pass up the opportunity to make available over the next 3 years $5 billion to reduce the budgetary deficit.

Now, in my own State the general assembly is waiting right now to increase the tax by 8 cents and put it in the Illinois general revenue fund that already has a surplus.

We are dealing with a $200 billion deficit and I think it would be outrageous if we shrink from the opportunity to add $5 billion to the Treasury. I earnestly solicit the support of the membership.

Mr. President, I will not take much of the time of the Senate because I believe the issue is very simple—whether we should effectively cut cigarette taxes or not.

We all know the history of the cigarette tax. It was last increased in 1982 from 8 cents to 16 cents. That increase doubled the tax, but it should be remembered that it was at the 8 cent level for over 30 years. Inflation clearly did much, much more than double during that period.

The 1982 increase, however, is currently scheduled to expire on October 1 of this year. If the Senate does nothing, therefore, it will have effectively approved a 50-percent cut in cigarette taxes.

Think of that! The Federal budget deficit will exceed $200 billion this year. We are currently considering budget proposals that make devastating cuts in programs vital to rural America, to our cities, to our children, to the poor, the homeless, and the elderly. And yet the budget now before us somehow assumes there is room to cut the tax on tobacco.

Now I understand the need to rein in the growth of Federal spending, Mr. President, and I am not about to try to make the President's day by proposing any tax increases. The Federal deficit must be cut and we must cut spending to do it.

I think it is an absolute outrage, however, to cut the Federal excise tax on cigarettes in this situation. I simply cannot believe that the Senate believes lower cigarette taxes are more important than education for our children, than help for our farmers, than mass transit for our cities, or for a great variety of other important, reasonable, and absolutely necessary Federal programs that already been greatly cut over the last 4 years. I simply cannot believe it.

My distinguished colleague from Michigan, Senator LEVIN, and I are offering the Senate a chance to say "it ain't so." Our amendment does nothing more than add back into the revenue assumptions in the budget the amount that continuing the cigarette tax at 16 cents would provide—$1.5 billion in fiscal 1986 and $1.7 billion per year thereafter. Frankly, I think that is the least we should do. The evidence and sound public policy argue for doing much more.

I have not mentioned the health issues involved, but there are also important health reasons not to cut cigarette taxes. Cigarettes do cause cancer; there is no doubt of that, and there is no doubt what that means. Let me briefly point out that we are requiring new, stronger labeling requirements on cigarettes, and that these tougher labels will go into effect on October 1. The Senate has been capable of some remarkable contortions in the few years I have been a Member, but I can't believe the Senate would want to try this one: To toughen labeling requirements and cut taxes on the same day.

There is a lot more that could be said. There are numerous sound reasons for opposing a cigarette tax cut that I have not even mentioned. It

would take much more time than Senator LEVIN and I have under the current procedural situation to do any of them justice.

Let me just say to conclude, Mr. President, that now is not the time to cut the taxes of any industry. We cannot afford it. And now is particularly not the time to cut the cigarette tax, given the deep cuts we are being forced to make on the spending side.

Make no mistake about it. A vote against this amendment is a vote to cut the cigarette tax. A vote for this amendment, on the other hand, is not a vote to increase it, rather it is merely a vote to maintain it at its current level. I will tell my colleagues quite candidly that I would not like to go back to Illinois and tell my constituents that I had to cut programs and even eliminate programs that provided needed benefits for them so I could cut cigarette taxes. But that is what this vote is about. The Senate will be telling the American public either that it believes the budget situation precludes cutting cigarette taxes, or that cigarette tax cuts are more important than the more than the 17 programs being eliminated and the over 28 programs suffering severe cuts in this budget.

I know the kind of message I want to send. I therefore urge the adoption of this amendment.

The PRESIDING OFFICER. Who yields time?

Mr. DOLE. Mr. President, I yield back the time on this side.

If all time is yielded back I am prepared to move to table.

This is the second vote on this amendment. I move we table it. Maybe they will offer it again.

The PRESIDING OFFICER. The question is on the motion to table.

Mr. DIXON. Yeas and nays.

Mr. LEVIN. Mr. President, with my last 5 seconds let me say this is going to be applied to deficit reduction and not to the spending program. That is the difference between this amendment and the last one.

The PRESIDING OFFICER. All time has expired.

Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion to lay on the table the amendment of the Senator from Michigan. On this question the yeas and nays have been ordered and the clerk will call the roll.

The legislative clerk called the roll.

Mr. STEVENS. Mr. President, on this vote I have a pair with the distinguished Senator from North Carolina, [Mr. EAST]. If he were present and voting, he would vote "yea." If I were at liberty to vote, I would vote "nay." Therefore, I withhold my vote.

Mr. SIMPSON. I announce that the Senator from North Carolina [Mr. EAST] and the Senator from California [Mr. WILSON] are absent due to illness.

Mr. CRANSTON. I announce that the Senator from Nebraska [Mr. EXON] is absent because of illness.

The result was announced—yeas 50, nays 46, as follows:

[Rollcall Vote No. 70 Leg.]

YEAS—50

Abdnor	Hart	Quayle

PRESENT AND GIVING A LIVE PAIR, AS PREVIOUSLY RECORDED—1

Stevens, against

NOT VOTING—3

East	Exon	Wilson

So the motion to lay on the table amendment No. 91 was agreed to.

Mr. DOMENICI. Mr. President, I move to reconsider the vote by which the motion to table was agreed to.

Mr. PACKWOOD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BYRD. Mr. President, I suggest the absence of a quorum, and I ask unanimous consent that the time not be charged against either side.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BYRD. Mr. President, I ask unanimous consent that I may have 5 minutes not to be charged against our side. The majority leader may charge it against that side. But I ask unanimous consent that the 5 minutes not be charged against anyone or any side, so that we might have the distinguished majority leader comment on the amendment to be introduced, and that we might have some indication of when we may vote on the amendment.

The PRESIDING OFFICER. Is there objection? Without objection it is so ordered.

Mr. DOLE. Mr. President, if I could have the attention of my colleagues, I do have a perfecting amendment drafted.

I say very honestly to the distinguished minority leader that this just came to me a moment ago—about 10 minutes ago. Earlier, I had given to the minority leader sort of a summary of what the perfecting amendment contains.

I can indicate in a general way, and then in more detail when we get into the debate—maybe Senator DOMENICI could do so. But it is $56 billion in 1986 savings; about $295 billion over 3 years; defense, 0-3-3 real growth; 1-year COLA freeze on Social Security, veterans, military civilian retirement; no tax increases; domestic reform resulting in savings similar to those in the White House leadership plan with some adjustments. There are 13 programs terminated.

We can get into those in more detail later. There are major adjustments to the original package. Medicare and Medicaid savings have been reduced. Amtrak has not been discontinued. SBA was not discontinued. Mass transit was cut 20 percent instead of a 5-year phaseout. Impact aid, part B, was frozen at 1984 levels. The modification of the underlying assumptions on Postal subsidies will be made as the Senator from Alaska, Senator STEVENS, indicated earlier on the floor. In addition $3.5 billion was added back to the agricultural section.

In addition there is a new export incentive program using CCC stocks. It has been named the BICEP Program. Bonus Incentive Commodity Export Program [BICEP]. There is the new farm credit interest rate Buydown Program. There is a $1 billion a year add-on for farm credit guarantees. The reduction in water conservation funds has been reduced from 30 to 15 percent. We have worked out a compromise on REA. I had a letter from the President of the REA commending that action several days ago.

The funds for the Job Corps were reduced 30 percent instead of a program termination. We modified the student aid proposal and include simply a freeze on student assistance at the 1985 level, and a $200 million savings in the GSL Program. There is no $8,000 cap.

NIH grants are compromised at 6,000 new grants per year versus 5,500 in the so-called White House-leadership package.

That is simply a very general explanation of the program.

I would say seriously that it does address many of the concerns which have been raised here today. I might say, too, in the nutrition area, we went back and added money to the nutrition program after the vote on the Senate floor. So that was one reason we would hope, if we had amendments, if there was a strong indication in the Senate which did not agree with the previous position, adjustments could be made.

I would hope that we reflect in our compromise at least some of the concerns all Senators have and that enough of the concerns are dealt with so that we have enough Senators to get a majority.

Again I will say very candidly I am not certain we have that, but we are prepared to offer the amendment and see what happens.

[The following proceedings occurred after midnight.]

Mr. BYRD. Mr. President, this amendment is a perfecting amendment and would not be the program until its adoption if it is adopted. Does this amendment fulfill the requirement of mathematical consistency?

Mr. DOLE. It does.

Mr. BYRD. Would the distinguished majority leader indicate if we can vote on this amendment by 12:30 a.m.? Would a half-hour be satisfactory to either side?

Mr. DOLE. It might take a little more time than that because we do have some Members who we have been trying to brief in groups of 12. I think we still have some to visit with.

I wonder if we might agree on 1 hour equally divided. If we do not use it all we can yield it back.

Mr. BYRD. We have 18 minutes remaining on the resolution.

Mr. CHILES. If I might ask the majority leader, my understanding is that the hour he is talking about is a new hour, not to disturb the 18 minutes.

Mr. DOLE. That is correct.

Mr. BYRD. Could we make it 40 minutes equally divided? Thirty minutes equally divided. Then we have 18 minutes we could add.

Mr. DOLE. Mr. President, let me indicate to the minority leader that the reason I cannot agree to the 30 or 40 minutes is Senator WILSON will be here for the vote. As I have accommodated certain Senators on his side on votes, I need to be accommodated on this. I am not trying to delay. It may be that he will be here. I recall a few weeks ago we held a vote for 40 minutes. Unless we plan to have a long vote, I assume there could be amendments following the vote.

Mr. BYRD. There can be amendments following the vote. If we do not agree to a request, of course, the time limitation would be 1 hour. Am I correct? This is an amendment to an amendment.

The PRESIDING OFFICER [Mr. MATTINGLY]. There are only 18 minutes remaining for debate at this time.

Mr. BYRD. Could we agree to 30 minutes? That would be better than 18 minutes.

Mr. DOLE. I wonder if I might suggest the absence of a quorum not to be charged to the minority leader's time so I can discuss it with him.

Mr. BYRD. Mr. President, I ask for the yeas and nays on the amendment.

Mr. DOMENICI. It has not been offered yet.

The PRESIDING OFFICER. There is no amendment pending.

Mr. BYRD. I will agree to a quorum call inasmuch at it will not be charged.

Mr. DOMENICI. The amendment has not been read yet.

Mr. BYRD. No, and I do not intend that it be read. Of course, there are many other things that can be done.

Mr. KENNEDY. Reserving the right to object, I have two remaining amendments. I know everyone is tired and we have been going on for a long period of time. I would like to get votes on those matters. I can understand with a quorum call time goes on even later. But there are other amendments. I just want to indicate on the two items I have, they will not consume a great deal of time. I want to be certain that we have not lost the opportunity to vote on the amendments.

Mr. HOLLINGS. I can call up an amendment, too. Is that all right with the majority leader and the minority leader? Why not just call up amendments?

Mr. CHILES. We have a list of amendments. The only problem is we have only 18 minutes and we were hoping to save a little of that time until after the package passed in case we had amendments to offer after the package passed. In calling up these amendments, we cannot have discussions. We only put them up there and have a rollcall on them.

Mr. HOLLINGS. We can send up an amendment that will be at the $200 million level and ask for the yeas and nays.

Mr. BYRD. Mr. President, I ask unanimous consent that there be 10 minutes equally divided or 5 minutes equally divided, not to be charged against the 18 minutes. Or 1 minute. It is whatever the Senator wants. It is just so we do not charge it against the 18 minutes. Is that all right?

The PRESIDING OFFICER. Is there objection?

Mr. KENNEDY. Reserving the right to object, and I will not object, I would like to get the same reading on my amendment.

Mr. BYRD. The only problem we have is we are trying to keep the number of amendments down at the moment.

Mr. KENNEDY. I know that. I will only take a minute on each one of mine.

Mr. BYRD. We are trying to give the majority leader a little bit of time to get Senator WILSON in.

Mr. DOLE. I suggest to my colleagues not to object because if there will be a rollcall on each of these that will take 10 minutes and that will be a little time.

Mr. CHILES. Can we take them up in about 2 minutes each?

Mr. HOLLINGS. Yes.

Mr. CHILES. Very well, 1 minute on a side.

Mr. DOLE. We would like 2 minutes on our side.

Mr. DOMENICI. Four minutes.

The PRESIDING OFFICER. Is there objection?

Mr. KENNEDY. Mr. President, what is the request?

Mr. DOLE. Two on a side?

Mr. CHILES. Two on a side, yes, Mr. President.

Mr. DOLE. I propound that request, that the distinguished Senator from South Carolina be recognized to offer an amendment, and be given 4 minutes, 2 minutes on a side.

Mr. BYRD. And not to be charged to the 18 minutes.

Mr. DOMENICI. Mr. President, and they are subject to the germaneness rule that applies to budget resolutions. I assume that is part of it.

Mr. CHILES. That is correct.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. DOLE. Mr. President, I hope that on that vote, since we have not had a vote for a while, there would be a 15-minute rollcall.

The PRESIDING OFFICER. The Senator from South Carolina.

AMENDMENT NO. 92

(Purpose: To maintain the Economic Development Assistance Programs at the current level of $200,000,000 in fiscal years 1986, 1987, and 1988)

Mr. HOLLINGS. Mr. President, I call up my amendment No. 92 on the Economic Development Administration Act which is at the desk.

The PRESIDING OFFICER. The amendment will be stated

The bill clerk read as follows:

The Senator from South Carolina [Mr. HOLLINGS], for himself and Mr. BUMPERS, proposes an amendment numbered 92.

Mr. HOLLINGS. I ask unanimous consent that further reading be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

In the pending amendment, do the following:

On page 3, increase the amount on line 12 by $200,000,000.

On page 3, increase the amount on line 13 by $200,000,000.

On page 3, increase the amount on line 14 by $200,000,000.
On page 3, increase the amount on line 18 by $20,000,000.
On page 3, increase the amount on line 19 by $60,000,000.
On page 3, increase the amount on line 20 by $110,000,000.
On page 3, increase the amount on line 25 by $20,000,000.
On page 4, increase the amount on line 1 by $60,000,000.
On page 4, increase the amount on line 2 by $110,000,000.
On page 4, increase the amount on line 6 by $20,000,000.
On page 4, increase the amount on line 7 by $60,000,000.
On page 4, increase the amount on line 8 by $110,000,000.
On page 4, increase the amount on line 12 by $20,000,000.
On page 4, increase the amount on line 13 by $60,000,000.
On page 4, increase the amount on line 14 by $110,000,000.
On page 18, increase the amount on line 8 by $200,000,000.
On page 18, increase the amount on line 9 by $20,000,000.
On page 18, increase the amount on line 17 by $200,000,000.
On page 18, increase the amount on line 18 by $60,000,000.
On page 19, increase the amount on line 1 by $200,000,000.
On page 19, increase the amount on line 2 by $110,000,000.

Mr. HOLLINGS. Mr. President, this is the amendment copy.

Mr. President, this amendment provides for continuation of the $200 million level for Economic Development Assistance Programs for fiscal years 1986, 1987, and 1988.

In the discussion earlier today on Senator SASSER's amendment, which also made provision for EDA, the chairman of the Budget Committee and other opponents parroted the administration's line for terminating EDA. For example, they talked of the delinquent EDA loans. That is history, and a diversion, as this amendment does not provide for loans. In fact, there have not been any EDA loans since 1981.

There was also mention of the fact that 80 percent of the country is eligible for EDA assistance. That is true, because of the moratorium on designation of EDA areas, but the Secretary of Commerce has the power to be a virtual Czar over economic development. All he needs to do is say, "We're going to deal with worst off places." Or he could concentrate on growth centers, or any other policy instead of throwing up his hands and dealing with the situation.

Let us talk about those areas. As of last December, there were 748 counties with more than 12 percent unemployment. The national economic growth has not done much for those counties. EDA is one of the few programs that rural area, such as Marlboro County, SC, which had unemployment at 17.1 percent, can look to for help. Trickle-down is not going to reach Allendale, McCormick, Marion, Marlboro, and Union counties in South Carolina, which all have unemployment rates above 12 percent. Neither is there any hope in the enterprise zones that the administration touts as a substitute for EDA.

This amendment provides the assistance to our communities in the form of vitally needed grants for public works, as well as the planning and technical assistance they need to attract industry. It also provides for the economic adjustment grants that help when a major employer leaves town. If we deny this help, we are turning our backs to rural America and saying come into the cities, and further exacerbating the problems of our cities.

This $200 million is a pitiful sum in view of the need, but by maintaining this lifeline and concentrating this small amount, we can do something for these places outside the economic mainstream, both in the rural areas and urban pockets of poverty. Those who urge us to look at the national employment figures, should instead be joining us in looking behind those national averages at the 18.8 percent unemployment among our youth, particularly the 42.1 percent unemployment among black youth.

Mr. President, I yield to the Senator from Arkansas.

Mr. BUMPERS. Mr. President, let me say first of all that I recognize the necessity for cutting some programs, but they ought to be based on a benefit-cost ratio. There is not a Government program since its inception that has a higher benefit-cost ratio, that is administered with less administrative cost, and that provides jobs at a lower cost. If that is not sufficient criteria, there is not a program in this whole United States that deserves to survive.

Mr. HOLLINGS. Mr. President, I ask unanimous consent that the Senator from Maine [Mr. MITCHELL] be added as a cosponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HOLLINGS. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. DOLE. Mr. President, do we have 2 minutes on this side?

The PRESIDING OFFICER. The Senator is correct.

Mr. DOLE. I yield those 2 minutes to the Senator from New Mexico [Mr. DOMENICI].

Mr. DOMENICI. Mr. President, I just say to my friend that I do not have any studies here to counter that argument, but I do not think I have to have any to say it just is not true. Frankly, we have $9 billion out there now since we started the EDA program in loans and loan guarantees. The best we can find out about it is that there are 55 percent of them that are in default at this point.

In case anybody on the authorizing committees of the U.S. Senate is interested, we have not authorized this program in 3 years. That means 3 years ago, we effectively killed the program. If we were to follow the normal processes of the Senate, going to an authorizing committee and having them draw a bill after hearings, we have not had that for 3 years. It just found its way into a House appropriations bill with some language creating it there. I really do not believe the most dynamic economic development program in the history of the Republic could be 3 years deauthorized and find itself in hidden areas of some big appropriations continuing resolution. I think if it were that good, we would be right up front and center, and everybody would be delighted to have it.

It has not been authorized since 1981. I guess I was 1 year wrong. The criteria do not target the funds toward areas of need. The reason that has not happened is that actually, EDA came into existence because we had an Appalachian Regional Commission, and it covered six or seven States. When Congress was about to do away with it, somebody said, "I think rather than do away with it, we ought to have another one that is like it for everybody else." So we put EDA in, and it was supposed to be for a few States.

The PRESIDING OFFICER. The time of the Senator from New Mexico has expired.

The Senator from South Carolina has 51 seconds.

Mr. HOLLINGS. Mr. President, I want the record to show that we are not asking for loans. The Senator is referring to the loans made before 1981. Since then, there have been no loans, and we are not asking for loans. This program, established under public law, the Public Works and Economic Development Act, is still in effect. The appropriations have been supported in both Houses. When administered, it is administered extremely well; and they should not be eliminating it, but instead be working for the jobs our communities need.

We understand the program; I believe it is understood quite clearly.

I yield back the remainder of our time, Mr. President.

The PRESIDING OFFICER. All time is yielded back. The majority leader.

Mr. DOLE. Mr. President, I move to lay the amendment on the table. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion

to lay the amendment on the table. The yeas and nays have been ordered. The clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. SIMPSON. I announce that the Senator from North Carolina [Mr. EAST] and the Senator from California [Mr. WILSON] are absent due to illness.

Mr. CRANSTON. I announce that the Senator from Nebraska [Mr. EXON] is absent because of illness.

The PRESIDING OFFICER. Are there any other Senators in the Chamber who wish to vote?

The result was announced—yeas 64, nays 33, as follows:

[Rollcall Vote No. 71 Leg.]

YEAS—64

Andrews	Goldwater	McConnell
Armstrong	Gorton	Murkowski
Baucus	Gramm	Nickles
Bentsen	Grassley	Nunn
Boren	Hart	Packwood
Boschwitz	Hatch	Proxmire
Bradley	Hatfield	Quayle
Chafee	Hawkins	Roth
Chiles	Hecht	Rudman
Cochran	Heflin	Sasser
Cranston	Heinz	Simpson
D'Amato	Helms	Specter
Danforth	Humphrey	Stafford
DeConcini	Johnston	Stevens
Denton	Kassebaum	Symms
Dodd	Kasten	Thurmond
Dole	Lautenberg	Trible
Domenici	Laxalt	Wallop
Durenberger	Lugar	Warner
Evans	Mathias	Weicker
Garn	Mattingly	
Glenn	McClure	

NAYS—33

Abdnor	Harkin	Mitchell
Biden	Hollings	Moynihan
Bingaman	Inouye	Pell
Bumpers	Kennedy	Pressler
Burdick	Kerry	Pryor
Byrd	Leahy	Riegle
Cohen	Levin	Rockefeller
Dixon	Long	Sarbanes
Eagleton	Matsunaga	Simon
Ford	Melcher	Stennis
Gore	Metzenbaum	Zorinsky

NOT VOTING—3

East	Exon	Wilson

So the motion to table the amendment (No. 92) was agreed to.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the motion was agreed to.

Mr. HATFIELD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BYRD. Mr. President, I ask unanimous consent that the distinguished majority leader have 2 minutes, without it being charged.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Mr. President, I say to the distinguished minority leader that I am now prepared to offer the perfecting amendment, unless we want to proceed with additional amendments, if we could agree to 20 minutes on a side, 40 minutes overall.

Mr. BYRD. We could do it with less.

Mr. DOLE. I understand from the distinguished manager of the bill that he can explain it in 15 minutes. There would be 30 minutes, 15 minutes on a side.

I propound that request: Thirty minutes on the perfecting amendment, equally divided.

The PRESIDING OFFICER. Is there objection?

Mr. BYRD. Mr. President, reserving the right to object, do we have 18 minutes remaining?

Mr. DOLE. This would be in addition to the 18 minutes.

Mr. BYRD. Yes.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

AMENDMENT NO. 93

Mr. DOLE. Mr. President, I send a perfecting amendment to the desk.

The PRESIDING OFFICER. The perfecting amendment will be stated.

The bill clerk proceeded to read the amendment (No. 93), proposed by the Senator from Kansas [Mr. DOLE], for himself and Mr. DOMENICI.

Mr. DOLE. Mr. President, I ask that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

The amendment reads as follows:

In the pending amendment, strike all after the word "That", and insert in lieu thereof the following:

the Congress hereby determines and declares that the concurrent resolution on the budget for fiscal year 1985 is revised and replaced, the first concurrent resolution on the budget for fiscal year 1986 is established, and the appropriate budgetary levels for fiscal year 1987 and 1988 are set forth.

(a) The following budgetary levels are appropriate for the fiscal years beginning on October 1, 1984, October 1, 1985, October 1, 1986, and October 1, 1987:

(1) The recommended levels of Federal revenues are as follows:

Fiscal year 1985: $736,200,000,000.
Fiscal year 1986: $793,600,000,000.
Fiscal year 1987: $866,300,000,000.
Fiscal year 1988: $955,900,000,000.

and the amounts by which the aggregate levels of Federal revenues should be increased are as follows:

Fiscal year 1985: $0.
Fiscal year 1986: $900,000,000.
Fiscal year 1987: $2,000,000,000.
Fiscal year 1988: $3,400,000,000.

and the amounts for Federal Insurance Contributions Act revenues for hospital insurance within the recommended levels of Federal revenues are as follows:

Fiscal year 1985: $44,800,000,000.
Fiscal year 1986: $51,000,000,000.
Fiscal year 1987: $56,100,000,000.
Fiscal year 1988: $61,300,000,000.

and the amounts for Federal Insurance Contributions Act revenues for old-age, survivors, and disability insurance within the recommended levels of Federal revenues are as follows:

Fiscal year 1985: $186,200,000,000.
Fiscal year 1986: $200,700,000,000.
Fiscal year 1987: $216,900,000,000.
Fiscal year 1988: $248,300,000,000.

(2) The appropriate levels of total new budget authority are as follows:

Fiscal year 1985: $1,055,600,000,000.
Fiscal year 1986: $1,069,500,000,000.
Fiscal year 1987 $1,132,800,000,000.
Fiscal year 1988: $1,212,900,000,000.

(3) The appropriate levels of total budget outlays are as follows:

Fiscal year 1985: $949,100,000,000.
Fiscal year 1986: $965,000,000,000.
Fiscal year 1987: $1,011,100,000,000.
Fiscal year 1988: $1,060,200,000,000.

(4) The amounts of the deficits in the budget which are appropriate in the light of economic conditions and all other relevant factors are as follows:

Fiscal year 1985: $212,900,000,000.
Fiscal year 1986: $171,400,000,000.
Fiscal year 1987: $144,800,000,000.
Fiscal year 1988: $104,300,000,000.

(5) The appropriate levels of the public debt are as follows:

Fiscal year 1985: $1,849,300,000,000.
Fiscal year 1986: $2,086,500,000,000.
Fiscal year 1987: $2,312,700,000,000.
Fiscal year 1988: $2,525,200,000,000.

and the amounts by which the statutory limits on such debt should be accordingly increased are as follows:

Fiscal year 1985: $25,500,000,000.
Fiscal year 1986: $237,200,000,000.
Fiscal year 1987: $226,200,000,000.
Fiscal year 1988: $212,600,000,000.

(6) The appropriate levels of total Federal credit activity for the fiscal years beginning on October 1, 1984, October 1, 1985, October 1, 1986, and October 1, 1987, are as follows:

Fiscal year 1985:

(A) New direct loan obligations, $52,700,000,000.

(B) New primary loan guarantee commitments, $68,950,000,000.

(C) New secondary loan guarantee commitments, $68,200,000,000.

Fiscal year 1986:

(A) New direct loan obligations, $30,250,000,000.

(B) New primary loan guarantee commitments, $77,000,000,000.

(C) New secondary loan guarantee commitments, $68,200,000,000.

Fiscal year 1987:

(A) New direct loan obligations, $27,600,000,000.

(B) New primary loan guarantee commitments, $1,500,000,000.

(C) New secondary loan guarantee commitments, $68,200,000,000.

Fiscal year 1988:

(A) New direct loan obligations, $26,800,000,000.

(B) New primary loan guarantee commitments, $86,000,000,000.

(C) New secondary loan guarantee commitments, $68,200,000,000.

(b) The Congress hereby determines and declares the appropriate levels of budget authority and budget outlays, and the appropriate levels of new direct loan obligations, new primary loan guarantee commitments, and new secondary loan guarantee commitments for fiscal years 1985 through 1988 for each major functional category are:

(1) National Defense (050):

Fiscal year 1985:

(A) New budget authority, $292,600,000,000.

(B) Outlays, $252,000,000,000.

(C) New direct loan obligations, $0.

(D) New primary loan guarantee commitments, $0.

(E) New secondary loan guarantee commitments, $0.

Fiscal year 1986:

(A) New budget authority, $302,500,000,000.

(B) Outlays, $273,100,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1987:
(A) New budget authority, $323,400,000,000.
(B) Outlays, $292,100,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1988:
(A) New budget authority, $346,800,000,000.
(B) Outlays, $313,000,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
(E) New secondary loan guarantee commitments, $0.
(2) International Affairs (150):
Fiscal year 1985:
(A) New budget authority, $25,300,000,000.
(B) Outlays, $18,000,000,000.
(C) New direct loan obligations, $11,500,000,000.
(D) New primary loan guarantee commitments, $10,300,000,000.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1986:
(A) New budget authority, $21,200,000,000.
(B) Outlays, $17,800,000,000.
(C) New direct loan obligations, $8,200,000,000.
(D) New primary loan guarantee commitments, $12,300,000,000.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1987:
(A) New budget authority, $20,400,000,000.
(B) Outlays, $17,100,000,000.
(C) New direct loan obligations, $7,800,000,000.
(D) New primary loan guarantee commitments, $12,300,000,000.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1988:
(A) New budget authority, $20,700,000,000.
(B) Outlays, $16,700,000,000.
(C) New direct loan obligations, $7,900,000,000.
(D) New primary loan guarantee commitments, $12,300,000,000.
(E) New secondary loan guarantee commitments, $0.
(3) General Science, Space, and Technology (250):
Fiscal year 1985:
(A) New budget authority, $9,100,000,000.
(B) Outlays, $8,700,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1986:
(A) New budget authority, $9,100,000,000.
(B) Outlays, $9,000,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1987:
(A) New budget authority, $9,000,000,000.
(B) Outlays, $8,800,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1988:
(A) New budget authority, $9,300,000,000.
(B) Outlays, $9,000,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
(E) New secondary loan guarantee commitments, $0.
(4) Energy (270):
Fiscal year 1985:
(A) New budget authority, $1,600,000,000.
(B) Outlays, $6,500,000,000.
(C) New direct loan obligations, $1,700,000,000.
(D) New primary loan guarantee commitments, $0.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1986:
(A) New budget authority, $5,200,000,000.
(B) Outlays, $5,100,000,000.
(C) New direct loan obligations, $2,100,000,000.
(D) New primary loan guarantee commitments, $4,100,000,000.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1987:
(A) New buget authority, $5,200,000,000.
(B) Outlays, $4,600,000,000.
(C) New direct loan obligations, $1,700,000,000.
(D) New primary loan guarantee commitments, $300,000,000.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1988:
(A) New budget authority, $4,900,000,000.
(B) Outlays, $4,200,000,000.
(C) New direct loan obligations, $1,600,000,000.
(D) New primary loan guarantee commitments, $600,000,000.
(E) New secondary loan guarantee commitments, $0.
(5) Natural Resources and Environment (300):
Fiscal year 1985:
(A) New budget authority, $12,700,000,000.
(B) Outlays, $13,100,000,000.
(C) New direct loan obligations, $100,000,000.
(D) New primary loan guarantee commitments, $0.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1986:
(A) New budget authority, $12,200,000,000.
(B) Outlays, $12,500,000,000.
(C) New direct loan obligations, $100,000,000.
(D) New primary loan guarantee commitments, $0.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1987:
(A) New budget authority, $12,600,000,000.
(B) Outlays, $12,400,000,000.
(C) New direct loan obligations, $100,000,000.
(D) New primary loan guarantee commitments, $0.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1988:
(A) New budget authority, $12,800,000,000.
(B) Outlays, $12,500,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
(E) New secondary loan guarantee commitments, $0.
(6) Agriculture (350):
Fiscal year 1985:
(A) New budget authority, $24,800,000,000.
(B) Outlays, $21,000,000,000.
(C) New direct loan obligations, $13,800,000,000.
(D) New primary loan guarantee commitments, $5,700,000,000.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1986:
(A) New budget authority, $17,200,000,000.
(B) Outlays, $14,500,000,000.
(C) New direct loan obligations, $11,700,000,000.
(D) New primary loan guarantee commitments, $9,000,000,000.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1987:
(A) New budget authority, $17,700,000,000.
(B) Outlays, $15,800,000,000.
(C) New direct loan obligations, $10,200,000,000.
(D) New primary loan guarantee commitments, $9,000,000,000.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1988:
(A) New budget authority, $17,000,000,000.
(B) Outlays, $12,900,000,000.
(C) New direct loan obligations, $9,100,000,000.
(D) New primary loan guarantee commitments, $9,000,000,000.
(E) New secondary loan guarantee commitments, $0.
(7) Commerce and Housing Credit (370):
Fiscal year 1985:
(A) New budget authority, $12,600,000,000.
(B) Outlays, $5,600,000,000.
(C) New direct loan obligations, $6,500,000,000.
(D) New primary loan guarantee commitments, $27,000,000,000.
(E) New secondary loan guarantee commitments, $68,200,000,000.
Fiscal year 1986:
(A) New budget authority, $6,800,000,000.
(B) Outlays, $3,400,000,000.
(C) New direct loan obligations, $4,200,000,000.
(D) New primary loan guarantee commitments, $28,400,000,000.
(E) New secondary loan guarantee commitments, $68,200,000,000.
Fiscal year 1987:
(A) New budget authority, $5,600,000,000.
(B) Outlays, $2,300,000,000.
(C) New direct loan obligations, $4,200,000,000.
(D) New primary loan guarantee commitments, $30,100,000,000.
(E) New secondary loan guarantee commitments, $68,200,000,000.
Fiscal year 1988:
(A) New budget authority, $6,100,000,000.
(B) Outlays, $5,100,000,000.
(C) New direct loan obligations, $4,500,000,000.
(D) New primary loan guarantee commitments, $31,900,000,000.
(E) New secondary loan guarantee commitments, $68,200,000,000.
(8) Transportation (400):
Fiscal year 1985:
(A) New budget authority, $29,600,000,000.
(B) Outlays, $26,100,000,000.
(C) New direct loan obligations, $300,000,000.
(D) New primary loan guarantee commitments, $300,000,000.
(E) New secondary loan guarantee commitments, $0.

Fiscal year 1986:
(A) New budget authority, $27,200,000,000.
(B) Outlays, $26,100,000,000.
(C) New direct loan obligations, $200,000,000.
(D) New primary loan guarantee commitments, $300,000,000.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1987:
(A) New budget authority, $27,900,000,000.
(B) Outlays, $27,700,000,000.
(C) New direct loan obligations, $100,000,000.
(D) New primary loan guarantee commitments, $300,000,000.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1988:
(A) New budget authority, $27,300,000,000.
(B) Outlays, $27,400,000,000.
(C) New direct loan obligations, $100,000,000.
(D) New primary loan guarantee commitments, $300,000,000.
(E) New secondary loan guarantee commitments, $0.
(9) Community and Regional Development (450):
Fiscal year 1985:
(A) New budget authority, $8,400,000,000.

(C) New direct loan obligations, $1,800,000,000.
(D) New primary loan guarantee commitments, $200,000,000.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1986:
(A) New budget authority, $6,600,000,000.
(B) Outlays, $7,900,000,000.
(C) New direct loan obligations, $1,200,000,000.
(D) New primary loan guarantee commitments, $200,000,000.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1987:
(A) New budget authority, $6,700,000,000.
(B) Outlays, $7,100,000,000.
(C) New direct loan obligations, $1,100,000,000.
(D) New primary loan guarantee commitments, $200,000,000.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1988:
(A) New budget authority, $7,100,000,000.
(B) Outlays, $6,700,000,000.
(C) New direct loan obligations, $1,300,000,000.
(D) New primary loan guarantee commitments, $200,000,000.
(E) New secondary loan guarantee commitments, $0.
(10) Education, Training, Employment, and Social Services (500):
Fiscal year 1985:
(A) New budget authority, $31,600,000,000.
(B) Outlays, $30,300,000,000.
(C) New direct loan obligations, $1,100,000,000.
(D) New primary loan guarantee commitments, $8,700,000,000.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1986:
(A) New budget authority, $30,100,000,000.
(B) Outlays, $30,300,000,000.
(C) New direct loan obligations, $1,100,000,000.
(D) New primary loan guarantee commitments, $9,000,000,000.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1987:
(A) New budget authority, $30,700,000,000.
(B) Outlays, $29,900,000,000.
(C) New direct loan obligations, $1,100,000,000.
(D) New primary loan guarantee commitments, $9,400,000,000.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1988:
(A) New budget authority, $31,300,000,000.
(B) Outlays, $30,400,000,000.
(C) New direct loan obligations, $1,100,000,000.
(D) New primary loan guarantee commitments, $9,600,000,000.
(E) New secondary loan guarantee commitments, $0.
(11) Health (550):
Fiscal year 1985:
(A) New budget authority, $33,600,000,000.
(B) Outlays, $33,500,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $200,000,000.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1986:
(A) New budget authority, $35,700,000,000.
(B) Outlays, $35,300,000,000.

RECONCILIATION

SEC. 2. (a) Not later than June 30, 1985, the committees named in subsections (b) through (bb) of this section shall submit their recommendations to the Committees on the Budget of their respective Houses. After receiving those recommendations, the Committees on the Budget shall report to the House and Senate a reconciliation bill or resolution or both carrying out all such recommendations without any substantive revision.

SENATE COMMITTEES

(b) The Senate Committee on Agriculture, Nutrition, and Forestry shall report (1) changes in laws within its jurisdiction which provide spending authority as defined in section 401(c)(2)(C) of the Congressional Budget Act of 1974, sufficient to reduce budget authority and outlays, (2) changes in laws within its jurisdiction other than those which provide spending authority as defined in section 401(c)(2)(C) of the Act, sufficient to achieve savings in budget authority and outlays, or (3) any combination thereof, as follows: $3,577,000,000 in budget authority and $3,860,000,000 in outlays in fiscal year 1986, $3,280,000,000 in budget authority and $5,097,000,000 in outlays in fiscal year 1987, and $3,571,000,000 in budget authority and $8,689,000,000 in outlays in fiscal year 1988.

(c) The Senate Committee on Armed Services shall report changes in laws within its jurisdiction which provide spending authority as defined in section 401(c)(2)(C) of the Congressional Budget Act of 1974, sufficient to achieve savings of $0 in budget authority and $539,000,000 in outlays in fiscal year 1986, $0 in budget authority and $942,000,000 in outlays in fiscal year 1987, and $0 in budget authority and $1,073,000,000 in outlays in fiscal year 1988.

(d) The Senate Committee on Banking, Housing, and Urban Affairs shall report (1) changes in laws within its jurisdiction which provide spending authority as defined in section 401(c)(2)(C) of the Congressional Budget Act of 1974, sufficient to reduce budget authority and outlays, (2) changes in laws within its jurisdiction other than those which provide spending authority as defined in section 401(c)(2)(C) of the Act, sufficient to achieve savings in budget authority and outlays, or (3) any combination thereof, as follows: $8,895,000,000 in budget authority and $3,959,000,000 in outlays in fiscal year 1986, $9,638,000,000 in budget authority and $5,937,000,000 in outlays in fiscal year 1987, and $10,905,000,000 in budget authority and $7,055,000,000 in outlays in fiscal year 1988.

(e) The Senate Committee on Commerce, Science, and Transportation shall report (1) changes in laws within its jurisdiction which provide spending authority as defined in section 401(c)(2)(C) of the Congressional Budget Act of 1974, sufficient to reduce budget authority and outlays, (2) changes in laws within its jurisdiction other than those which provide spending authority as defined in section 401(c)(2)(C) of the Act, sufficient to achieve savings in budget authority and outlays, or (3) any combination thereof, as follows: $2,006,000,000 in budget authority and $1,679,000,000 in outlays in fiscal year 1986, $781,000,000 in budget authority and $471,000,000 in outlays in fiscal year 1987, and $987,000,000 in budget authority and $706,000,000 in outlays in fiscal year 1988.

(f) The Senate Committee on Energy and Natural Resources shall report (1) changes in laws within its jurisdiction which provide spending authority as defined in section 401(c)(2)(C) of the Congressional Budget Act of 1974, sufficient to reduce budget authority and outlays, (2) changes in laws within its jurisdiction other than those which provide spending authority as defined in section 401(c)(2)(C) of the Act, sufficient to achieve savings in budget authority and outlays, or (3) any combination thereof, as follows: $3,014,000,000 in budget authority and $2,265,000,000 in outlays in fiscal year 1986, $2,836,000,000 in budget authority and $2,666,000,000 in outlays in fiscal year 1987, and $2,847,000,000 in budget authority and $2,925,000,000 in outlays in fiscal year 1988.

(g) The Senate Committee on Environmental and Public Works shall report (1) changes in laws within its jurisdiction which provide spending authority as defined in section 401(c)(2)(C) of the Congressional Budget Act of 1974, sufficient to reduce budget authority and outlays, (2) changes in laws within its jurisdiction other than those which provide spending authority as defined in section 401(c)(2)(C) of the Act, sufficient to achieve savings in budget authority and outlays, or (3) any combination thereof, as follows: $723,000,000 in budget authority and $310,000,000 in outlays in fiscal year 1986, $1,221,000,000 in budget authority and $1,393,000,000 in outlays in fiscal year 1987, and $1,738,000,000 in budget authority and $2,066,000,000 in outlays in fiscal year 1988.

(h) The Senate Committee on Finance shall report (1) changes in laws within its jurisdiction which provide spending authority as defined in section 401(c)(2)(C) of the Congressional Budget Act of 1974, sufficient to reduce budget authority and outlays, (2) changes in laws within its jurisdiction other than those which provide spending authority as defined in section 401(c)(2)(C) of the Act, sufficient to achieve savings in budget authority and outlays, or (3) any combination thereof, as follows: $0 in budget authority and $10,847,000,000 in outlays in fiscal year 1986, $0 in budget authority and $18,608,000,000 in outlays in fiscal year 1987, and $0 in budget authority and $22,429,000,000 in outlays in fiscal year 1988.

(i) The Senate Committee on Foreign Relations shall report (1) changes in laws within its jurisdiction which provide spending authority as defined in section 401(c)(2)(C) of the Congressional Budget Act of 1974, sufficient to reduce budget authority and outlays, (2) changes in laws within its jurisdiction other than those which provide spending authority as defined in section 401(c)(2)(C) of the Act, sufficient to achieve savings in budget authority and outlays, or (3) any combination thereof, as follows: $192,000,000 in budget authority and $47,000,000 in outlays in fiscal year 1986, $275,000,000 in budget authority and $109,000,000 in outlays in fiscal year 1987, and $282,000,000 in budget authority and $140,000,000 in outlays in fiscal year 1988.

(j) The Senate Committee on Governmental Affairs shall report (1) changes in laws within its jurisdiction which provide spending authority as defined in section 401(c)(2)(C) of the Congressional Budget Act of 1974, (2) changes in laws within its jurisdiction other than those which provide spending authority as defined in section 401(c)(2)(C) of the Act, or (3) any combination thereof, sufficient to achieve increases in contributions and savings in budget authority and outlays as follows: $375,000,000 in contributions, $0 in budget authority and $3,654,000,000 in outlays in fiscal year 1986, $1,325,000,000 in contributions, $0 in budget authority and $7,651,000,000 in outlays in fiscal year 1987, and $1,370,000,000 in contributions, $0 in budget authority and $8,889,000,000 in outlays in fiscal year 1988.

(k) The Senate Committee on Labor and Human Resources shall report (1) changes in laws within its jurisdiction which provide spending authority as defined in section 401(c)(2)(C) of the Congressional Budget Act of 1974, sufficient to reduce budget authority and outlays, (2) changes in laws within its jurisdiction other than those which provide spending authority as defined in section 401(c)(2)(C) of the Act, sufficient to achieve savings in budget authority and outlays, or (3) any combination thereof, as follows: $1,380,000,000 in budget authority and $668,000,000 in outlays in fiscal year 1986, $1,808,000,000 in budget authority and $1,687,000,000 in outlays in fiscal year 1987, and $2,130,000,000 in budget authority and $2,242,000,000 in outlays in fiscal year 1988.

(l) The Senate Committee on Small Business shall report (1) changes in laws within its jurisdiction which provide spending authority as defined in section 401(c)(2)(C) of the Congressional Budget Act of 1974, sufficient to reduce budget authority and outlays, (2) changes in laws within its jurisdiction other than those which provide spending authority as defined in section 401(c)(2)(C) of the Act, sufficient to achieve savings in budget authority and outlays, or (3) any combination thereof, as follows: $460,000,000 in budget authority and $504,000,000 in outlays in fiscal year 1986, $629,000,000 in budget authority and $1,028,000,000 in outlays in fiscal year 1987, and $1,117,000,000 in budget authority and $1,044,000,000 in outlays in fiscal year 1988.

(m) The Senate Committee on Veterans' Affairs shall report (1) changes in laws within its jurisdiction which provide spending authority as defined in section 401(c)(2)(C) of the Congressional Budget Act of 1974, sufficient to reduce budget authority and outlays, (2) changes in laws within its jurisdiction other than those which provide spending authority as defined in section 401(c)(2)(C) of the Act, sufficient to achieve savings in budget authority and outlays, or (3) any combination thereof, as follows: $1,076,000,000 in budget authority and $986,000,000 in outlays in fiscal year 1986, $1,344,000,000 in budget authority and $1,534,000,000 in outlays in fiscal year 1987, and $1,741,000,000 in outlays in fiscal year 1988.

(n) The Senate Select Committee on Indian Affairs shall report (1) changes in laws within its jurisdiction which provide spending authority as defined in section 401(c)(2)(C) of the Congressional Budget Act of 1974, sufficient to reduce budget authority and outlays, (2) changes in laws within its jurisdiction other than those which provide spending authority as defined in section 401(c)(2)(C) of the Act, sufficient to achieve savings in budget authority and outlays, or (3) any combination thereof, as follows: $148,000,000 in budget authority and $61,000,000 in outlays in fiscal year 1986, $153,000,000 in budget authority and $116,000,000 in outlays in fiscal year 1987, and $159,000,000 in budget authority and $137,000,000 in outlays in fiscal year 1988.

(o) The Senate Committee on Energy and Natural Resources, pursuant to section (f), and the Senate Committee on Agriculture, Nutrition, and Forestry, pursuant to subsection (b), shall review (1) changes in laws within their jurisdiction which provide spending authority as defined in section 401(c)(2)(C) of the Congressional Budget Act of 1974, sufficient to reduce budget authority and outlays, (2) changes in laws within their jurisdiction other than those which provide spending authority as defined in section 401(c)(2)(C) of the Act, sufficient to achieve savings in budget authority and outlays, or (3) any combination thereof, as follows: $52,000,000 in budget authority and $12,000,000 in outlays in fiscal year 1986, $113,000,000 in budget authority and $86,000,000 in outlays in fiscal year 1987; and $127,000,000 in budget authority and $111,000,000 in outlays in fiscal year 1988.

HOUSE COMMITTEES

(p) The House Committee on Agriculture shall report (1) changes in laws within its jurisdiction which provide spending authority as defined in section 401(c)(2)(C) of the Congressional Budget Act of 1974, sufficient to reduce budget authority and outlays, (2) changes in laws within its jurisdiction other than those which provide spending authority as defined in section 401(c)(2)(C) of the Act, sufficient to achieve savings in budget authority and outlays, or (3) any combination thereof, as follows: $3,577,000,000 in budget authority and $3,860,000,000 in outlays in fiscal year 1986, $3,280,000,000 in budget authority and $5,097,000,000 in outlays in fiscal year 1987, and $3,591,000,000 in budget authority and $8,689,000,000 in outlays in fiscal year 1988.

(q) The House Committee on Armed Services shall report changes in laws within its jurisdiction which provide spending authority as defined in section 401(c)(2)(C) of the Congressional Budget Act of 1974, sufficient to achieve savings of $0 in budget authority and $539,000,000 in outlays in fiscal year 1986, $0 in budget authority and $942,000,000 in outlays in fiscal year 1987, and $0 in budget authority and $1,073,000,000 in outlays in fiscal year 1988.

(r) The House Committee on Banking, Finance and Urban Affairs shall report (1) changes in laws within its jurisdiction which provide spending authority as defined in section 401(c)(2)(C) of the Congressional Budget Act of 1974, sufficient to reduce budget authority and outlays, (2) changes in laws within its jurisdiction other than those which provide spending authority as defined in section 401(c)(2)(C) of the Act, sufficient to achieve savings in budget authority and outlays, or (3) any combination thereof, as follows: $7,932,000,000 in budget authority and $3,774,000,000 in outlays in fiscal year 1986, $8,490,000,000 in budget authority and $5,508,000,000 in outlays in fiscal year 1987, and $9,125,000,000 in budget authority and $6,303,000,000 in outlays in fiscal year 1988.

(s) The House Committee on Education and Labor shall report (1) changes in laws within its jurisdiction which provide spending authority as defined in section 401(c)(2)(C) of the Congressional Budget Act of 1974, sufficient to reduce budget authority and outlays, (2) changes in laws within its jurisdiction other than those which provide spending authority as defined in section 401(c)(2)(C) of the Act, sufficient to achieve savings in budget authority and outlays, or (3) any combination thereof, as follows: $1,137,000,000 in budget authority and $821,000,000 in outlays in fiscal year 1986, $1,553,000,000 in budget authority and $1,784,000,000 in outlays in fiscal year 1987, and $1,861,000,000 in budget authority and $2,298,000,000 in outlays in fiscal year 1988.

(t) The House Committee on Energy and Commerce shall report (1) changes in laws within its jurisdiction which provide spending authority as defined in section 401(c)(2(C) of the Congressional Budget Act of 1974, sufficient to reduce budget authority and outlays, (2) changes in laws within its jurisdiction other than those which provide spending authority as defined in section 401(c)(2)(C) of the Act, sufficient to achieve savings in budget authority and outlays, or (3) any combination thereof, as follows: $4,205,000,000 in budget authority and $7,308,000,000 in outlays in fiscal year 1986, $2,900,000,000 in budget authority and $8,450,000,000 in outlays in fiscal year 1987, and $2,987,000,000 in budget authority and $10,994,000,000 in outlays in fiscal year 1988.

(u) The House Committee on Foreign Affairs shall report (1) changes in laws within its jurisdiction which provide spending authority as defined in section 401(c)(2)(C) of the Congressional Budget Act of 1974, sufficient to reduce budget authority and outlays, (2) changes in laws within its jurisdiction other than those which provide spending authority as defined in section 401(c)(2)(C) of the Act, sufficient to achieve savings in budget authority and outlays, or (3) any combination thereof, as follows: $192,000,000 in budget authority and $47,000,000 in outlays in fiscal year 1986, $275,000,000 in budget authority and $109,000,000 in outlays in fiscal year 1987, and $282,000,000 in budget authority and $140,000,000 in outlays in fiscal year 1988.

(v) The House Committee on Government Operations shall report (1) changes in laws within its jurisdiction which provide spending authority as defined in section 401(c)(2)(C) of the Congressional Budget Act of 1974, sufficient to reduce budget authority and outlays, (2) changes in laws within its jurisdiction other than those which provide spending authority as defined in section 401(c)(2)(C) of the Act, sufficient to achieve savings in budget authority and outlays, or (3) any combination thereof, as follows: $0 in budget authority and $64,000,000 in outlays in fiscal year 1986, $0 in budget authority and $3,699,000,000 in outlays in fiscal year 1987, and $0 in budget authority and $5,203,000,000 in outlays in fiscal year 1988.

(w) The House Committee on Interior and Insular Affairs shall report (1) changes in laws within its jurisdiction which provide spending authority as defined in section 401(c)(2)(C) of the Congressional Budget Act of 1974, sufficient to reduce budget authority and outlays, (2) changes in laws within its jurisdiction other than those which provide spending authority as defined in section 401(c)(2)(C) of the Act, sufficient to achieve savings in budget authority and outlays, or (3) any combination thereof, as follows: $540,000,000 in budget authority and $292,000,000 in outlays in fiscal year 1986, $559,000,000 in budget authority and $402,000,000 in outlays in fiscal year 1987, and $634,000,000 in budget authority and $526,000,000 in outlays in fiscal year 1988.

(x) The House Committee on Merchant Marine and Fisheries shall report (1) changes in laws within its jurisdiction which provide spending authority as defined in section 401(c)(2)(C) of the Congressional Budget Act of 1974, sufficient to reduce budget authority and outlays, (2) changes in laws within its jurisdiction other than those which provide spending authority as defined in section 401(c)(2)(C) of the Act, sufficient to achieve savings in budget authority and outlays, or (3) any combination thereof, as follows: $405,000,000 in budget authority and $383,000,000 in outlays in fiscal year 1986, $206,000,000 in budget authority and $194,000,000 in outlays in fiscal year 1987, and $212,000,000 in budget authority and $204,000,000 in outlays in fiscal year 1988.

(y) The House Committee on Post Office and Civil Service shall report (1) changes in laws within its jurisdiction which provide spending authority as defined in section 401(c)(2)(C) of the Congressional Budget Act of 1974, (2) changes in laws within its jurisdiction other than those which provide spending authority as defined in section 401(c)(2)(C) of the Act, or (3) any combination thereof, sufficient to achieve increases in contributions and savings in budget authority and outlays as follows: $375,000,000 in contributions, $0 in budget authority and $3,590,000,000 in outlays in fiscal year 1986, $1,325,000,000 in contributions, $0 in budget authority and $7,502,000,000 in outlays in fiscal year 1987, and $1,370,000,000 in contributions, $0 in budget authority and $8,642,000,000 in outlays in fiscal year 1988.

(z) The House Committee on Public Works and Transportation shall report (1) changes in laws within its jurisdiction which provide spending authority as defined in section 401(c)(2)(C) of the Congressional Budget Act of 1974, sufficient to reduce budget authority and outlays, (2) changes in laws within its jurisdiction other than those which provide spending authority as defined in section 401(c)(2)(C) of the Act, sufficient to achieve savings in budget authority and outlays, or (3) any combination thereof, as follows: $1,895,000,000 in budget authority and $469,000,000 in outlays in fiscal year 1986, $2,616,000,000 in budget authority and $1,833,000,000 in outlays in fiscal year 1987, and $3,820,000,000 in budget authority and $2,897,000,000 in outlays in fiscal year 1988.

(aa) The House Committee on Small Business shall report (1) changes in laws within its jurisdiction which provide spending authority as defined in section 401(c)(2)(C) of the Congressional Budget Act of 1974, sufficient to reduce budget authority and outlays, (2) changes in laws within its jurisdiction other than those which provide spending authority as defined in section 401(c)(2)(C) of the Act, sufficient to achieve savings in budget authority and outlays, or (3) any combination thereof, as follows: $460,000,000 in budget authority and $504,000,000 outlays in fiscal year 1986, $629,000,000 in budget authority and $1,028,000,000 in outlays in fiscal year 1987, and $1,117,000,000 in budget authority and $1,044,000,000 in outlays in fiscal year 1988.

(bb) The House Committee on Veterans' Affairs shall report (1) changes in laws within its jurisdiction which provide spending authority as defined in section 401(c)(2)(C) of the Congressional Budget Act of 1974, sufficient to reduce budget authority and outlays, (2) changes in laws within its jurisdiction other than those which provide spending authority as defined in section 401(c)(2)(C) of the Act, sufficient to achieve savings in budget authority and outlays, or (3) any combination thereof, as follows: $1,076,000,000 in budget authority and $986,000,000 in outlays in fiscal year 1986, $1,344,000,000 in budget authority and $1,534,000,000 in outlays in fiscal year 1987, and $1,457,000,000 in budget authority and $1,741,000,000 in outlays in fiscal year 1988.

(ac) The House Committee on Ways and Means shall report (1) changes in laws within its jurisdiction which provide spending authority as defined in section 401(c)(2)(C) of the Congressional Budget Act of 1974, sufficient to reduce budget authority and outlays, (2) changes in laws within its jurisdiction other than those which provide spending authority as defined in section 401(c)(2)(C) of the Act, sufficient to achieve savings in budget authority and outlays, or or (3) any combination thereof, as follows: $0 in budget authority and $10,330,000,000 in outlays in fiscal year 1986, $0 in budget authority and $14,370,000,000 in outlays in fiscal year 1987, and $0 in budget authority and $16,671,000,000 in outlays in fiscal year 1988.

APPROPRIATIONS

SEC. 3. (a) It shall not be in order to consider any measure making appropriations in the Senate or House of Representatives, if the enactment of such bill or resolution, as recommended by the respective Committee on Appropriations, would cause the aggregate total budget authority for function 050, National Defense, to exceed $303,200,000,000 in fiscal year 1986; aggregate total budget authority to exceed $324,100,000,000 in fiscal year 1987; and aggregate total budget authority to exceed $347,600,000,000 in fiscal year 1988.

(b) It shall not be in order to consider any measure making appropriations in the Senate and House of Representatives, if the enactment of such bill or resolution, as recommended by the respective Committee on Appropriations, would cause the aggregate total budget authority for nondefense discretionary activities to exceed $140,800,000,000 in fiscal year 1986; aggregate total budget authority to exceed $143,800,000,000 in fiscal year 1987; and aggregate budget authority to exceed $149,300,000,000 in fiscal year 1988.

(c) The provisions of subsection (a) or (b) of this section may be waived or suspended in the Senate by a majority vote of the Members voting, a quorum being present, or by unanimous consent of the Senate.

MISCELLANEOUS PROVISIONS

SEC. 4. If the Congress has not completed action by October 1, 1985, on the concurrent resolution on the budget required to be reported under section 310(a) of the Congressional Budget Act of 1974 for fiscal year 1986, then, for purposes of section 311 of such Act, this concurrent resolution shall be deemed to be the concurrent resolution required to be reported under section 310 of such Act.

SEC. 5. It shall not be in order in the House of Representatives or the Senate during fiscal years 1986 and 1987 to consider any bill, resolution, or amendment, except proposed legislation reported in response to reconciliation instructions contained in this resolution, authorizing new direct loan obligations or new loan guarantee commitments unless that bill, resolution, or amendment also provides that the authority to make or guarantee such loans shall be effective only to such extent and in such amounts as are contained in appropriation acts. This section shall not be applicable to agricultural price support and related programs of the type in operation on January 1, 1985, that are funded through the Commodity Credit Corporation.

SEC. 6. It is the sense of the Congress that the previous distinction between "unified budget" and "off-budget" spending be ended, and that budget authority and outlays for the so-called "off-budget" agencies be included in the budget totals.

SEC. 7. (a) The Senate finds that—

(1) the existing tax structure of the United States distorts economic activity, leading to an inefficient use of national resources and a weakening of our domestic economic vitality and competitive posture in international markets;

(2) the relative tax burdens among various taxpayer categories are manifestly unfair insofar as they arise from differences in the capabilities of taxpayers to take advantage of complicated tax laws;

(3) the ability of the Federal Government to plan and conduct rational fiscal policy is frustrated by elaborate schemes to avoid taxation and the unintended effects of tax incentives and penalities;

(4) progressive erosion of voluntary compliance threatens the fiscal integrity of our public finances and the confidence of our citizens in the Federal Government's capacity to govern; and

(5) a number of plans, each designed to simplify and reform the Tax Code, have been before the Congress for a time sufficient to allow for extensive analysis and evaluation.

(b) It is therefore the sense of the Senate that tax reform should be adopted as soon as possible, and that it should incorporate the following principles and objectives:

(1) efficiency and responsiveness to market conditions in the economic activities of American businesses and consumers;

(2) simplicity of structure and lower marginal tax rates;

(3) a fair and equitable distribution of the tax burden among all taxpayers, with relief for those below the poverty level, and incentives to bring them into the work force;

(4) a broader tax base, with deductions essential to avoid genuine hardship or to protect the economic security of the American people; and

(5) increased incentives for work, saving, and investment.

SEC. 8. It is the sense of the Senate that because the Senate requires timely reporting of legislative action on spending bills, and because the Senate requires continual control over the budget, the Director of the Congressional Budget Office shall issue a weekly report during periods when the Senate is in session detailing and tabulating the progress of congressional action on bills and resolutions providing new budget authority and changing revenues and the public debt for a fiscal year, including, but not limited to the requirements set forth in Public Law 93-344, section 308(b).

SEC. 9. It is the sense of the Senate that the amount of budget authority and outlays set forth in this concurrent resolution for the functional category of Income Security for fiscal year 1985 are sufficient to ensure that $1,500,000,000 is apportioned among the States to carry out the Special Supplemental Food Program authorized by section 17 of the Child Nutrition Act of 1966 (commonly referred to as the WIC program); and it is assumed that the Office of Management and Budget should therefore release and apportion to the States the full amount of $1,500,000,000, which was appropriated for the WIC program for fiscal year 1985 since—

(1) Public Law 98-473 provided that, in carrying out the WIC program, funds shall be apportioned to the States based on an annual appropriation level of $1,500,000,000;

(2) the Conference Report on H.R. 5743 (H. Rept. 98-1071), the Agriculture, Rural Development and Related Agencies Appropriation Act, 1985, which was incorporated in Public Law 98-473, expresses the conferees' intent that the WIC program be carried out in such a manner as to fully obligate the $1,500,000,000 appropriated by Public Law 98-473 for such program for fiscal year 1985;

(3) such Conference Report also explicitly stated that any action to allocate funds inconsistent with a full-year appropriation level of $1,500,000,000 for the WIC program would be an improper withholding of funds; and

(4) the Office of Management and Budget has not made available to the Department of Agriculture for distribution to the States the full amount of funds intended by Congress to be allocated to the WIC program in any of the first three quarters of fiscal year 1985, and has not made funds available for such program during such quarters at the rate intended by the Congress.

SEC. 10. It is the sense of the Congress that functional totals should be reduced to reflect a limitation on the amount of social security benefits paid to illegal and non-resident aliens. It is assumed that the Finance Committee will report legislation to accomplish the required changes in law. Such legislation may limit benefits to the amount of wage-earner's contribution plus interest, unless the wage-earner is a citizen of a country with which the United States has a treaty or totalization agreement and that this provision would apply to individuals becoming eligible on or after January 1, 1986.

SEC. 11. It is the sense of the Congress that overall Federal outlays should be reduced and it is assumed that legislation should be enacted to conform the overtime requirements under the Walsh-Healey Act and the Contract Work Hours and Safety Standards Act with the Fair Labor Standards Act and it is further assured that the resulting outlay reductions shall be utilized to achieve the previously agreed-upon program outlay savings.

SEC. 12. It is the sense of the Congress that tax legislation should be enacted to provide for payment of minimum taxes by corporations and individuals on the broadest feasible definition of income to assure that all of those with economic income will pay tax, and that the resulting revenues be used to reduce individual income tax rates and to increase the threshold amount for tax payments by individuals in connection with consideration of comprehensive tax reform legislation.

SEC. 13. It is the sense of the Senate that revenues should be increased and it is assumed that tax legislation will be enacted to limit to the national median family income the amount of farm loss which may be deducted against nonfarm income, and it is further assumed that revenues derived from enactment of such legislation be used to reduce individual income tax rates and to assure that full-time, family-size farm operators will not be disadvantaged by unfair competition from high-income taxpayers with substantial nonfarm income.

SEC. 14. It is sense of the Congress that revenues should be increased and it is assumed that the Finance Committee will develop legislation to reduce the tax enforcement gap, estimated by the IRS at $92 billion in FY 1986. It is further assumed that such legislation should provide for increased and improved enforcement and collection, through audits, examinations, and other steps designed to identify and eliminate tax cheating and increase revenue collections from individuals and corporations currently evading federal taxes, and that the legislation should include steps designed to increase voluntary compliance with tax laws and that such steps may include increased staff for taxpayer assistance, speedier processing of returns and provision of public information designed to build public trust and understanding of IRS enforcement efforts and that such legislation should also provide that the resources of the IRS shall be increased to accomplish full enforcement of U.S. tax laws, increasing voluntary compliance until such time as further marginal spending on IRS resources does not substantially increase tax yields and that such legislation is fully compatible with tax simplification, including but not limited to reductions in income tax rates or the deficit.

The additional cosponsors are Senators ABDNOR, ARMSTRONG, BOSCHWITZ, CHAFEE, DANFORTH, DURENBERGER, EVANS, GORTON, GRAMM, HATFIELD, HELMS, LAXALT, MCCONNELL, PACKWOOD, RUDMAN, SIMPSON, STAFFORD, SYMMS, THURMOND, TRIBLE, and WARNER.

Mr. DOLE. Mr. President, I am going to yield all the time to the distinguished chairman of the Budget Committee.

Mr. DOMENICI. I thank the distinguished majority leader.

Mr. BYRD. Will the distinguished Senator yield for a parliamentary inquiry?

Mr. DOMENICI. Of course.

Mr. BYRD. Mr. President, who controls time on this side?

The PRESIDING OFFICER. The minority leader or his designee.

Mr. BYRD. Mr. President, I designate Mr. CHILES to control the time.

I thank the Senator for yielding.

(Mr. KASTEN assumed the chair.)

Mr. DOMENICI. Mr. President, I yield myself 7 minutes.

Mr. President, first, I am hopeful that we are coming close to the end. I think it goes without saying, if that is the case, it has been a long and difficult job for a lot of people and many people have worked very hard to contribute to this and I thank them all.

Mr. President, it is probably an understatement, but let me at the same time thank and congratulate the Senate on completing this long, arduous debate. I also want to sincerely praise all those Senators, from both sides of the aisle, who have made it possible for us to come to this final agreement. I know, all too well, that it has not been easy. My respect for my fellow Senators always is heightened during these debates, for truly the difficult issues we debate are not simple or trivial.

I know it has been a difficult debate and feelings have sometimes been strained. But the magnitude of the deficit problem we face, and therefore the debate we have been engaged in on that issue, goes far beyond any personal feelings or petty differences.

The substitute deficit reduction agreement we have proposed tonight achieves what cynics thought impossible: we have significantly reduced the projected deficits. The substitute amendment offered here this evening would reduce the fiscal year 1986 deficit by over $55 billion next year, cumulatively nearly $300 billion over the next 3 years. And all this is accomplished with no increase in revenues.

Mr. President, this proposed substitute sets the deficits on a downward path. Our goal of reducing the deficit from its current high level of 5 percent of GNP, downward to 2 percent of GNP by fiscal year 1988 has been achieved in this substitute proposal. We have reached a long ways in 3½ to 4 months. The promised land, while a long way from being reached, has at least taken a major step toward being achieved tonight.

I do not deny that this substitute proposal may not meet everyone's particular desires. But it does, I contend, meet everyone's broader goal of significantly reducing the deficit.

Mr. President, I will be brief, but just so everyone understands, this substitute proposal amends the original Senate Republican leadership-White House agreement. As our distinguished majority leader has already indicated—this substitute retains the 0-3-3 real growth in defense that the Senate adopted a week ago.

And I am committed to go to conference and to return from conference with 0-3-3 and nothing less for defense. I have been asked that and I can say that publicly. That is where we will be or we will not be back unless the distinguished chairman is overruled.

As such, this substitute achieves nearly $17.7 billion more in defense savings than was assumed in the original Senate-White House agreement. It assumes a 1-year freeze on all COLA adjustments, except for low-income COLA adjusted programs and adds back nearly $1.3 billion for the poor elderly in the form of increased SSI benefits.

Where the proposal reduces defense spending it at the same time adds back funding for a number of domestic programs—approximately $17.0 billion over the next 3 years. It assumes increased funding add backs—for a number of specific programs over the next 3 years—to name just a few:

Rural housing, $3.5 billion; agriculture credit guarantees, $3 billion; agriculture price supports, $2.5 billion; SBA, $2.5 billion; Job Corp, $1.4 billion; impact aid, $0.2 billion; student aid, returned to the level suggest by Senator STAFFORD, $2.2 billion; health programs, $2.1 billion; child nutrition, $0.4 billion; soil and water conservation, $0.3 billion; postal subsidies, $0.3 billion; NASA, $0.3 billion; Medicare, $1.8 billion; Amtrak, $1.6 billion; and Indian health, $0.1 billion.

Mr. President, I ask unanimous consent that a series of tables summarizing the substitute proposed this evening be included in the RECORD at this point.

There being no objection, the charts were ordered to be printed in the RECORD, as follows:

Mr. DOMENICI. I conclude where the debate began over 10 days ago. It is my very strong feeling—and I know I have stated it many, many times—that the deficits this country faces have the potential to seriously jeopardize future economic growth not only for the near-term future but also for our future and our children's future. A vote for this substitute amendment is not only a courageous vote but also a vote for our future. It is time to lay aside our political differences, lay aside out personal feelings, and vote for sustaining economic growth and the benefits that brings to all members of our society.

Mr. President, I have a summary that I ask be made a part of the RECORD.

There being no objection, the summary was ordered to be printed in the RECORD, as follows:

FINAL PACKAGE

MAJOR FEATURES

$56 billion 1986 savings. About $295 billion over 3 years.

Defense at 0/3/3 real growth.

One-year COLA freeze on Social Security, Veterans, Military/Civilian retirement.

No tax increases.

Domestic reforms and savings similar to White House/Leadership plan with adjustments noted below.

PROGRAMS TERMINATED (13)

Trade adjustment assistance to firms.

Conrail (Sale).

Appalachian Development Program.

Economic Development Administration.

UDAG.

General Revenue Sharing.

Export-Import Bank Direct Loans.

Community Services Block Grant after 1986.

WIN.

HODAG.

Section 312 Rehabilitation Loans.

U.S. Travel and Tourism Program.

Direct Treasury Payment for most of Postal Subsidy Program.

MAJOR ADJUSTMENTS TO ORIGINAL WHITE HOUSE/LEADERSHIP (WH/L) PLAN (DOLE PACKAGE)

Medicare/Medicaid: reduces 3-year savings from $20.1 billion to $17.5 billion.

No cap on state medicaid reimbursement

No Part B premium increase in 1986. Phased up to 30% over next five years vs. 35% in WH/L plan.

Amtrak: 12%/25%/40% cut instead of termination.

SBA: Weicker $2.5 billion 3 year savings compromise instead of total termination of lending programs ($5.0 billion savings).

Mass Transit Operating Subsidy: 20% cut instead of 5-year phase out.

Impact Aid Part B: Freeze at 1984 level ($78 million) instead of termination.

Postal Subsidies: Stevens-Abdnor-Roth compromise. Small newspapers and nonprofits retain subsidized rates. Substantive, legislation to limit program abuses, improve overhead allocations and spread part of subsidy cost over all regular rate users.

Agricultural Programs: $3.5 billion added back to WH/L plan plus following programs:

New export incentive program using CCC stocks to counter foreign subsidies.

New farm credit interest rate buy-down program.

$1 billion per year add on for farm credit guarantees.

No change in Federal crop insurance.

Soil and water conservation cut reduced from 30% to 15%.

Abdnor compromise on REA.

Job Corps: 30% cut instead of termination.

Student Aid: Freeze on student assistance at 1985 level and $200 million savings in GSL programs. No $8,000 cap on cost of education (Stafford compromise).

NIH Grants: Weicker compromise at 6,000 new research grants per year vs. 5500 in WH/L.

I reserve the balance of my time.

Mr. CHILES addressed the Chair.

The PRESIDING OFFICER. The Senator from Florida is recognized.

Mr. CHILES. Mr. President, I yield 3 minutes to the distinguished Senator from Iowa.

The PRESIDING OFFICER. The Senator from Iowa is recognized for 3 minutes.

Mr. HARKIN. Mr. President, I look at this package, and once again see, in the Dole budget No. II, a fraud being perpetrated on the American farmer, and on us, who represent those farmers.

We are told that Dole II really puts money back into agriculture. Well, as

Will Rogers once said: "Any way you slice it, it's still baloney."

Fact: Dollars spent on agriculture over 3 years are cut by 25 percent from base line in Dole II.

Fact: At a time when we are losing our soil at an alarming rate, conservation is cut by $356 million, or 15 percent over 3 years.

Fact: When farmers are now sinking under the weight of high interest rates, Dole II sticks it to the farmer even more. They will tell you that Dole II adds a billion dollars more in FmHA loan guarantees. Big deal.

What they do not tell you is they cut $9 billion out of direct loans. This means that farmers will have to pay interest rates up to 14 or 15 percent, when under the direct loan program they can now get those same loans for 10¼ percent. The 25,000 to 30,000 farmers who got direct loans this year will not get those loans next year. Well, if this is a good deal for farmers, please spare us your good deals.

Fact: Dole II provides $490 million for an interest buydown over 3 years. But mark my word, David Stockman will weasel out of this like he weaseled out of the $650 million restructuring program they announced before the election last fall. How is he going to weasel out of it? They will drag their feet next year, and in 1987 they will try to rescind it.

If they are not successful, then in 1988, after 20 percent of our farmers have been forced off the land, they will give the money to the big, rich farmers just before the election in 1988.

Fact: Dole II has an export PIK program. It sounds good but this really only benefits the big grain companies and the shippers. It gives a few crumbs to the farmers.

Dole II is as unfair to farmers as the first Dole plan. Agriculture is only about 2 percent of the budget, but under Dole II it absorbs 5 percent of the cuts. Under Dole I it absorbed 6 percent of the cuts, but any way you look at it, it is still unfair.

Farmers were fooled once, but not again. Here is a recent headline in the Des Moines Sunday Register: "Farmer Approval of Reagan Sinks to 24 Percent."

Mr. President, I ask unanimous consent that this article be printed in the RECORD after my comments.

I tell you this: If you adopt this budget, this approval rating will go down to 10 percent next year, because farmers know bull when they see it.

This should not be called the Dole II budget. It should be called the "Family Farm Liquidation Budget of 1985."

There being no objection, the article was ordered to be printed in the RECORD, as follows:

FARMER APPROVAL OF REAGAN SINKS TO 24 PERCENT

(By David Elbert)

Ronald Reagan is trapped and rapidly sinking in Iowa's quicksand farm economy, a special Iowa Poll of farmers shows.

Less than six months after Iowa farmers backed the re-election of the president by a 2-1 margin, his support in the countryside has collapsed, and now only one of four farmers (24 percent) approves of the job Reagan is doing, while 63 percent disapprove.

Even among farmers who voted for Reagan in November, fewer than half (40 percent) now support him, while 48 percent register disapproval, according to the poll, based on interviews with 304 adult members of Iowa farm households earlier this month.

The findings reflect the deepest sense of agricultural despair of any time in recent memory. They show that about 14,000 farm operators, or some 12 percent of the state's total, had trouble getting credit this spring and that about half that number have cut back normal operations as a result.

STEERED INTO RUIN

They also show that while a vocal minority of farmers have been claiming bankers steered them into ruin, the majority of farmers are a little less likely to blame local lenders than farmers themselves.

Articles Monday and Tuesday will examine the extent to which farm problems have worsened since April 1984 when a similar poll found that nine out of 10 farmers believed they were experiencing the roughest times of their lives, and take a look at what farmers think the future may hold.

Although conducted only two weeks after Reagan's "keep the grain, export the farmers" joke at a Washington, D.C., dinner, the poll shows that other millstones are weighing down the president.

Chief among them are his farm policies. At a time when farmers are undergoing their worst hardships since the Great Depression, 84 percent say the federal government's response has been inadequate.

In fact, some like O'Brien County farmer Larry Hofman, think Reagan's recent farm policy has been counterproductive.

COLD SHOULDER

Hofman, 33, is one of the farmers who voted for Reagan but now disapproves of the way he is doing his job. "I feel he has given agriculture a pretty cold shoulder," said Hofman.

For example, Hofman said, when the administration started talking late last year about phasing out price supports it "scared the heck out of people and land prices up here plummeted."

The poll shows Hofman and his O'Brien County neighbors are far from alone on the question of price supports. A wide margin, 61 percent, which is almost identical to Reagan's negative job rating, oppose Reagan's plan for phasing out price supports, while only 23 percent back the president's proposal.

Farmers, like Hofman, who bought land 3½ years ago at what turned out to be precisely the wrong time, believe Reagan has betrayed a campaign promise to Iowa farmers to help them restructure their debts. Consequently, 68 percent register disapproval of Reagan's veto of legislation designed to provide emergency credit aid, while 24 percent approve of the veto.

This and earlier polls confirm that Reagan's farm support has continued to sink, almost from the day after his re-election. Only a week before the Nov. 6 election, 58 percent of Iowa farmers approved of the way Reagan was doing his job; in February shortly before he vetoed the emergency credit measure, his farm support had slipped to 42 percent, and now it is down to 24 percent.

The PRESIDING OFFICER. The time yielded to the Senator from Iowa has expired.

Mr. CHILES. Mr. President, I yield 3 minutes to the distinguished Senator from West Virginia.

The PRESIDING OFFICER. The Senator from West Virginia is recognized.

Mr. ROCKEFELLER. Mr. President, thank you.

This proposal like its predecessors starts from the view that the only cause of the Federal deficit is spending on domestic programs. Accordingly, the Republican proposals have sought to curb cost-of-living adjustments on Social Security, and other retirement programs, and to make deep cuts in a range of crucial domestic activities.

Mr. President, as a freshman Senator, and one who has not previously served in the Congress, I have been naturally reluctant to speak to my colleagues on the major issues that have confronted us so far, because those issues have been primarily defense and foreign policy matters—MX and Nicaragua—in which I have had little prior background. Under the circumstances, the time-honored tradition that new Senators be seen and not heard has been easy for me to observe.

The budget and the philosophical choices it presents are a different matter. As a former Governor, I am familiar with the difficulties in preparing a budget and the tough choices which the process entails. Also as a former Governor, I have seen first hand the importance of certain Federal programs and what happens to people and communities when those programs are reduced or eliminated. I have strong convictions about the direction in which the present administration has taken the country, and what these choices on the budget represent, in large part because the impact of these budget choices could be so severe for my State of West Virginia.

It is interesting to trace the evolution of the administration's economic views. We had the original argument that it was possible to simultaneously cut taxes, increase defense spending, and balance the budget—which defied common sense and economics and proved to be as impossible as it sounded. Later came the argument that the economy could simply grow its way out of the deficits—which lasted only until the 1984 election was over. Now we are told by the President and Mr. Stockman that the deficits threaten our economy in a very fundamental way. At long last, the American people

are being treated to some straight talk about the consequences of the deficits.

But the administration has not yet reached the point of honesty about the causes.

President Reagan told us last month, as he has repeatedly, that the cause of Federal budget deficits is runaway domestic spending. And, he says, the cause of runaway domestic spending is the U.S. Congress. Therefore, he proposed a budget which eliminates 17 domestic programs, most of which are vital to my State, and makes proposals for cuts in 40 others, as well as cutting back on cost-of-living adjustments for Social Security and other retirement programs.

The facts tell another story. The facts are that in the past 4 years, the Reagan administration and OMB Director David Stockman have kept a tight rein on Federal domestic spending—and continually boast of this accomplishment. We've also gone through 2 years of economic expansion, which normally lessens the deficit by raising revenues while reducing the need for certain government transfer payments.

And yet, the deficit has exploded in the past 5 years from $61 billion in 1980, to $148 billion in 1982, and over $175 billion in each of the last 2 years. Of course, the Reagan recession deserves some of the blame for this trend, but recovery hasn't reversed it: deficits in the $200 billion to $300 billion range are projected each year for the rest of the decade, even with steady economic growth.

Actually, the big growth areas of the budget have been defense—including foreign military aid—and interest—not domestic programs. According to a report by the Joint Economic Committee, between 1980 and 1985 spending on defense and foreign aid increased from $145 billion to $268 billion. As a share of the budget, these activities have grown from 25 percent to 29 percent. Interest on the debt grew from $52 billion to $130 billion during this time, and now accounts for nearly 14 percent of the budget, instead of 9 percent as in 1980.

Spending on Social Security has risen, but so have payroll taxes which pay for it. The system is running a surplus and, under current projections, will do indefinitely. Since 1980, programs which aid the elderly and disabled have grown by $23 billion—entirely due to inflation and the increased numbers of elderly people in the population.

Spending on public welfare programs has risen by about $19 billion since 1980, because more people were in desperate enough economic straits to qualify for aid—not because the programs became more generous. In fact, because such programs were the major focus of earlier rounds of budget cutting, they grew much less than they generally would have during a severe recession and now account for a smaller portion of the budget—6 percent—than they did in 1980.

Spending on all other functions of Government—including public investment programs like education, research, transportation, and infrastructure—is more than $25 billion lower now than it was in 1980. As a share of the Federal budget, these programs have declined from 21 percent to 15 percent. The cuts in the administration-GOP package would shrink this category to about 11 percent.

What this means is that the root cause of the deficit is not, and cannot be, domestic spending. In fact, we have massive Federal deficits threatening our economic future for one overriding major reason—the 1981 Reagan tax cut. The tax cut totaled over $700 billion in revenues in just the first 5 years. And the losses keep mounting and for 1990 alone exceed $280 billion. Former Defense Secretary James Schlesinger called that tax cut the "single most fiscally irresponsible act in history"; without the revenues, he predicted, this country would be neither able to pay for national defense nor for domestic programs to which we were committed. And that is precisely our current predicament. Our tax base now supports only 80 percent of Federal expenditures, compared to 90-95 percent during the 1960's and 1970's.

Next to the ill-designed tax cut, the hallmark of the Reagan program has been its unfairness. The combination of Federal budget cuts with Federal tax cuts has represented a massive transfer of wealth from those who could least afford it, to those who least needed it. From 1980-84, only high income households actually got a tax cut. And in income brackets above $200,000 the average reduction was over $17,000. At the same time, however, because payroll taxes were rising during this period, lower- and middle-income households saw their tax bills go up. Over roughly the same period of time, cuts in Government transfer programs—Medicaid, food stamps, housing, and AFDC—cost low-income households an average of $1,300.

The erosion of the corporate tax base also proceeded with a vengeance under this administration. Corporate taxes now account for only 8 percent of Federal revenues, while over half of corporate income escapes taxation altogether.

In short, we gave a tax cut of a size that we couldn't afford, primarily to those who least needed it. The tax cut was wonderful for me and other upper-income taxpayers. It was wonderful for General Motors, General Dynamics, and General Electric. Now the Reagan administration wants the general public to pick up the bill. In my view, whatever the outcome of the tax reform debate later this year, we need to insure that the wealthiest individuals and the corporations pay their fair share.

We need to reduce the deficit, but we face a fundamental choice about how to do it. Depending on how we deal with the deficit, we can reverse the unfairness and mistaken priorities of the Reagan program, or we can compound them. We can try to restore fairness by sharing the burden more equitably, or we can again hit the people and regions that have suffered most under the Reagan program.

Reducing the deficit is not an end in itself. The true goals are the economy's continued growth and stability. This means actions to reduce our deficit must be accompanied by easier monetary policies to keep the expansion going and bring unemployment down. And it's completely counterproductive to devise deficit reduction proposals which undermine the economy's prospects for growth and full employment. We risk adopting a cure for the deficit problem that is worse than the disease.

For these reasons I am not going to support the President's effort to eliminate programs that have been vital to my State of West Virginia. Economic development programs, such as EDA and ARC, have contributed substantially to my State's economic progress in the past and are still badly needed. The Reagan administration measures those programs in terms of cost to the Federal budget; I measure those programs in terms of the economic growth they have supported—gains which would not have occurred without them. By this test, such programs have been highly cost effective.

I'm not going to pay for the Reagan tax cuts by cutting into vital expenditures for education and other human needs. How does forcing schools to drop out of the School Lunch Program or slashing research budgets or curtailing student loans make our economy stronger? With unemployment still unacceptably high, we need more emphasis on education and training—not less.

I'm not going to deal with the Reagan budget deficits by reneging on our promise to our senior citizens that Social Security benefits will be kept intact. We fixed the system in 1983; it is fiscally solvent and not contributing to the overall budget deficit. Freezing or capping Social Security COLA's amounts to a permanent cut in benefits which is both unfair and unacceptable. From the time 20 years ago, when he advocated making Social Security voluntary, the President has never understood the importance of the social contract between generations which Social Security represents.

I support limiting this year's defense increase to the rate of inflation, with 3

percent real growth annually thereafter. Since President Reagan took office, defense spending has increased by 35 percent in real terms and is currently greater than at the height of the Vietnam war. Freezing this year's budgetary authority for defense in real terms will in fact provide over $100 billion more for national security than just 5 years ago. A defense budget freeze at that level will not, in my view, jeopardize the modernization of our Armed Forces nor undercut the preparedness of those forces.

What has happened in the past 4 years is sometimes difficult to understand because it is so sweeping in scope. The administration cut taxes irresponsibly by an enormous amount to benefit the wealthiest Americans and corporations. Then they turn around and tell the public: we have a deficit, so therefore we can't spend money for economic development, for education, for clean air and water, for food stamps, for Social Security. They are following a conscious strategy of trying to grind down the domestic budget between a rapidly expanding Pentagon budget on the one hand, and a radically diminished tax base on the other hand. The President and Mr. Stockman are now using the deficit issue as a excuse to get rid of programs which they have always opposed.

Above all, the budget is a statement of our country's priorities. It depicts the kind of people we are, and the kind of society we would like to be.

In making the case for his budget compromise, the President said in his recent televised address:

> Every dollar the government spends comes out of your pockets. Every dollar the government gives to someone has to first be taken away from someone else.

That is one way to view it. The President has been able to capitalize on people's frustrations with Government—feelings that somehow they don't get their money's worth from the taxes they pay. But I don't think the people of my State, or the rest of the country, really share the administration's view that most Government spending is useless. There are important services and functions besides defense—education, environmental protection, research and development, help for the needy—that Government can provide for us collectively that we can't purchase as individuals.

From my experience as Governor, I know that States and localities lack the resources to take on the responsibilities that the President wants to shrug off. I know that private charities and generous individuals can't solve our growing poverty problems on their own. The scaling back of Federal Government expenditures envisioned by the Republican proposals will inevitably lead to a situation where the wealthy take care of themselves, but the poor and middle class will see their standard of living decline. My State has been extremely hard hit economically in recent years, but I don't believe that the Republican plan is a fair or compelling program for the Nation as a whole. I cannot support the set of priorities which the Republican proposals represent.

The PRESIDING OFFICER. Who yields time?

Mr. CHILES. Mr. President, I yield myself 5 minutes.

The PRESIDING OFFICER. The Senator from Florida is recognized.

Mr. CHILES. Mr. President, I want to compliment the distinguished Budget Committee chairman and the majority leader. I know an awful lot of hard work has gone into this package. I know how long this process has been. I compliment them, for they have brought the package up to this point and obviously they think they have the votes to pass it. I know it is not easy to get together a package like this, and to bring it to this point. It was not easy in the Budget Committee. It was not easy with the different forces that are working in the changes here, and I will have to say that I think this package today is better than the package that we started with in Dole I that was presented here. It looks a lot closer to the package that the distinguished Budget Committee chairman presented in the Budget Committee.

Having said that, I want to discuss a few of the numbers here because our brethren in the press never seem to get these numbers or pick them up. I guess it is easy when you have the pulpit. But we are still talking about when we start talking about how much we cut in the first year, how much we cut in the second year, and how much we cut in the third year. The plan uses the Rose Garden numbers. Remember, those numbers are numbers that were never passed into law. They were a wish list. They were a wish list of the President of the United States and his Senate Republicans. They put it together. They actually passed those numbers in defense on the floor of the Senate. But that is as far as they went. They did not go into conference. That is the only place in this budget that we use anything other than a CBO base line—is their use of the Rose Garden numbers in defense. So they use that to say that they have cut a lot more in defense, and they use that to say that they have saved a lot more. Well, it is a pretty appreciable difference because this plan is advertised as saving $56 billion or cutting $56 billion the first year. It cuts $43 billion. The only thing we can cut is from where we were last year, and what we passed into law. That is the only thinking that we cut on any other figure, and I know this probably will not ever get picked up in the papers tomorrow morning. I took my clothes off in the Budget Committee to try to get the figure in. It is still $43 billion. That is the amount it saves in the first year—$80 billion in the second year as opposed to $89 billion and $114 billion in the third year as opposed to $139 billion.

One other thing I will remind you is this: when this is advertised as getting the deficits down to $104 billion in the third year, remember that is using the OMB economics. That is the economics that says in 1990, you are going to be able to get a mortgage on your house for 7 percent. It says in 1988 the Treasury bills are going to be 5¼ percent. It says that the growth rate is going to be 4 to 4½ percent from now on every year even though we are seeing the growth rate fall out from under us. Basically CBO had not estimated this plan. They had not had time, but if you use the CBO economics, you have to add to that $104 billion in the third year. It comes out to around $150 billion in the third year.

My concern with all of the good work that has gone into this plan, the strong endeavor that has gone into this plan on the part of the people that have worked for it, is we have deficits of $150 billion.

Deficits of $150 billion or even deficits of $104 billion 3 years from now do not turn around the direction of the way the deficits go. Even if it was $104 billion, you would have $100 billion deficits from now on. If it is $150 billion, they will be growing, because the compounded interest on the debt will make that deficit grow.

I say that because we did have a plan before us that we voted on that would have brought those deficits down to zero in 1990 or 1991. They were on a glide path going down to zero, and I think it was a very balanced plan.

It did not get enough votes, but I think it would have been much better for the country.

The one other thing that I have to fault this plan is that it is not balanced. It is not shared sacrifice.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. CHILES. I yield myself 2 additional minutes.

When we are talking about some drastic cuts we are making in programs, in nutrition programs, in student loan programs, in a lot of our development programs, in elderly programs, we see those cuts, but where is the balance in that of asking everybody in this country to pay their fair share?

Again, I think we had not one, but at least two plans that would have attempted to do that by saying that there should be some revenues, and those revenues could have come from

minimum corporate tax, minimum individual tax, closing of some of the loopholes.

We could not even pass in here a little tax that just said we were going to continue the cigarette tax. We could not even pass in here a provision that said to keep people from paying more for their doctors' bills we are going to ask the cigarette tax to continue.

Because of that, I really think the plan is faulted, because it does not have balance. To ask our elderly to take a 1-year freeze on their COLA's when we are not asking fat cats to take a 1-year freeze on their tax expenditures, on their loopholes, or any kind of freeze, when we are not asking those corporations that are earning millions and millions of dollars—and everybody is rushing to be for a corporate minimum tax now—we are not asking them to pay anything for Government, but we have heard the arguments that we are going to take the tax and reduce the rates. What do my taxes go for? My taxes go to pay for the Government. That is what everybody's taxes in this room pay for. But corporate taxes are not to pay for the general Government, but just to reduce other taxes.

That is why this plan is flawed. That is why I think it should not pass tonight. If it does not pass, I think we could very quickly put together a plan that bears many of the features of this, but would do one additional thing: It should have shared sacrifice and it would be calling on everybody to do something.

The VICE PRESIDENT. The time of the Senator has expired. Who yields time?

Mr. DOMENICI. I yield 3 minutes to the Senator from Texas.

The VICE PRESIDENT. The Senator from Texas is recognized for 3 minutes.

Mr. GRAMM. Mr. President, we have had a long debate and have heard a lot about what you are voting against in this budget. Our distinguished colleague from Florida just told us that you are voting against nutrition and education.

We all know we are voting for a freeze on defense and for a freeze on COLA's. I would like to spend my brief time in talking about what we are voting for in this budget. We are voting to sustain a recovery that has brought jobs and hopeful opportunities to our people. We are voting to sustain a recovery that has put 7.5 million people to work.

I ask my colleague from Florida, is that not a nutrition program, 7 million families at work bringing home a paycheck, putting groceries on the table? That is a nutrition program that every American family wants. No food stamp program will ever substitute for that.

Is that not a housing program? There are 7.5 million families at work building up a nest egg to build and buy their own homes. You can have HUD. I will take that.

It is an education program; 7.5 million families are at work saving money to send their children to college.

We are voting here on 7 million new jobs in the next 4 years. We are voting here on a 2 percentage point decline in interest, a $100 a month decline in mortgage payments. In short, we are voting to strengthen and sustain the recovery.

So when you are looking at all the things you are voting against, when you are looking at all the programs you would like to have, I would like to ask my colleagues, both Democrats and Republicans, to look at what you are voting for, to look at what we have done in the last 4 years in reducing the growth rate of spending, in putting more money back in the pockets of the American people. They have responded in the greatest postwar recovery in American history.

We can vote tonight to strengthen and sustain that recovery. In casting that vote, you are not voting for all the special interest groups that we voted here for on all of these amendments. You are voting for the public interest. You are voting for those who do the work and pay the taxes and pull the wagon, who do not have all these lobbyists out here in the corridors saying they are going to remember your name in their newsletter, they are going to remember you tonight, somebody will benefit.

But they are the people who make the people work. We have cast all these votes on all these amendments for special interests. I ask my colleagues to cast this vote for America and vote for this President.

Mr. DOMENICI. Mr. President, before I yield to the leader, let me make a few brief comments about the remarks of my good friend, the ranking minority member of the Budget Committee.

Frankly, I do not think anybody that is going to vote for this needs any explanation as to whether they are voting to really cut the budget. You might argue where you started, but I am sure you are all going to suffer a little pain here, because this is indeed a historic event. This would be the largest reduction in the history of the Republic. Applied to defense and domestic programs, there is nothing even close to it in our history. You might argue where you started, but we have to find out where we ended. We ended up with a package that dramatically reduces domestic expenditures; that removes a number of programs that are not high priority; that reforms five or six programs that needed it for decades; that freezes cost of living as a part of that; that reduces defense somewhat over that which the President wanted.

When you put it together, it is the bottom line that counts. I am sure nobody here is worried about whether they have cut enough. There is some indication that maybe we are exaggerating the cut.

Well, if we are exaggerating the cut, I do not know why it is so hard. It seems to me it is because we really are, for the first time, changing the nature of the expenditure path of this Federal Government.

Frankly, we ought not do it unless we are worried about something. I am worried, as most of you are, about the black cloud of debt that hangs over this country, that is going to ruin this recovery and hurt far more people than restraining and changing some of these programs.

If I was not convinced of that, I would not be here.

If you are not convinced of it, do not vote for it.

On the other hand, if you are, you better vote for it, because there is nobody around who is going to do it for us. I will tell you that. If we do not do it, it will not be done.

If you do not vote this tonight and send it to the House, they will not do anything, either. They have been waiting around forever.

I think it should be nice to send this over there.

If they want to add the taxes that some say would be shared sacrifice, they can add to this package. It is $295 billion without it. If they would like to add a little more shared sacrifice, keeping the cost-of-living freeze and other things, we will give them that privilege. Except we think we have asked everybody to share, already.

We think it is a fair package.

In closing, I want to particularly thank the majority leader. This is my first effort with him in a majority leadership role on a significant package, and I compliment him.

He has done a marvelous job and I hope all of his efforts and the efforts of the others prove tonight to be not in vain but rather a step in the right direction for the future of this country.

Mr. CHILES. Mr. President, I yield 1 minute to the distinguished Senator from Michigan.

Mr. RIEGLE. Mr. President, President Reagan promised the country that there would be no cuts in social security, including the COLA's. This package breaks that promise. Yet the Social Security System is in surplus and it is not contributing one dime to the deficit.

Under this proposal, the average person on Social Security will lose $18 a month in buying power next year. That will drive 470,000 people below the poverty line. When we asked what

would happen to those people, the proposal we have here says they are supposed to go on welfare, In fact, they even make provision here for the fact that they will go on welfare.

They should not have to do that, Mr. President, particularly in light of the fact that a promise was made.

In the last 4 years, this administration and this party have cut Social Security $110 billion through the year 1990. The senior citizens have already contributed that much to deficit reduction and they ought to be exempt from further cuts, as the President promised and as the Senator's party promised just a few moments ago.

There is absolutely no justification for cutting Social Security and I hope that tonight, we will have the integrity and the honor to keep that promise.

Mr. WEICKER. Mr. President, I and my colleague Senator INOUYE have been deeply concerned that the President's original budget and the subsequent Senate/White House compromise would have severely damaged the fabric of the Federal commitment to improved health for all Americans. Under these two proposals health research, training, and services were to be slashed—some to the point of elimination. Indeed, because of our deep concern we were prepared to offer an amendment to the budget to correct this.

The budget proposal now before us, however, addresses many of Senator INOUYE's and my concerns, thanks to an agreement with our colleagues Senators DOLE and DOMENICI. The tremendous momentum of our Nation's biomedical and behavioral research efforts is maintained through this agreement, which firmly establishes an all-time high of 6,000 NIH new and competing grants per year and comparable increases in research centers and ADAMHA grants.

Also agreed is a complete restoration of all health professions training funds, assistance to colleges and the Geriatric Training Initiative. Cuts are eliminated in the maternal and child health block grant, community health centers and mental health clinical training activities, and State planning grants.

Mr. President, through this agreement with the majority leader and the Senate Budget Committee chairman we are maintaining our investments in better health. This investment will yield record breakthroughs, vital community and clinical health services, and a properly trained health manpower pool, and other dividends so vital to our, and our children's futures.

Mr. ZORINSKY. Mr. President, the latest compromise budget proposal offered by the Senate majority leader is far from perfect. However, significant concessions have been made. Coupled with the unquestioned need to act on the budget deficit, these concessions are sufficient to allow me to vote for the so-called "Dole II" amendment.

Major concessions in the area of agriculture include several for which I personally fought for agricultural programs. Chief among the concessions is a restoration of $2.5 billion for Commodity Credit Corporation price support and farm credit programs over 3 years, bringing the total allocation for CCC operations to $32.25 billion. The administration has assured me this amount will accommodate the provisions of my farm bill as well as most of the other bills that have been introduced.

Other concessions in the area of agriculture I obtained include:

A $4 billion annual Farmers Home Administration farm loan program.

Inclusion of $490 million to "buy down" interest rates on farm loans made by commercial banks or cooperative lenders. These funds will be made available through a program tailored after a provision in my own emergency farm credit aid package that was vetoed by President Reagan earlier this year.

A $2 billion export promotion program that uses surplus farm commodities to effectively reduce the price of U.S. farm products in the international marketplace. This concept is included in S. 1051, the comprehensive, 4-year farm bill I introduced last week. The administration has agreed to implement the program immediately.

Retention of a viable Rural Electrification Administration Program.

A significant increase in soil and water conservation programs over the original Dole compromise budget.

No reductions in the existing Federal crop insurance program.

I am also pleased that some provision was made for impact aid, Amtrak, and child nutrition programs under this latest compromise.

Significant program reductions remain in the "Dole II" compromise. I would have preferred to see more of these reductions rescinded. However, I also know Congress must take action to show it is serious about reducing the budget deficit. Fairness and equity must prevail in any ultimate attempt to balance a budget. I will continue to broaden and expand the base of the sharing of this responsibility in future budget reduction proposals.

Mr. GORTON. Mr. President, I should like first to congratulate my distinguished colleagues, the majority leader and the chairman of the Budget Committee, for having guided us from Budget Committee markup to these final hours of debate of the 1986 budget proposal. I have great respect and affection for both of them, and I am pleased to say I support and cosponsor this new deficit reduction package.

I support this package because it is as fair and effective as any we can possibly achieve. By fair, I mean that the pain of curbing runaway spending will be borne more equitably across the varying sectors of our society than has been the case with any preceding plan. By effective, I mean that the spending cuts approach the budget deficit reduction goals we have set for ourselves, and we have avoided increasing the taxes of the American people.

I am especially pleased that some funds will be restored to important programs such as rural housing, the Small Business Administration, and impact aid. I also believe it important to restore some of the savings to Medicare and Medicaid, and I commend Senator PACKWOOD for this fine contribution.

I have been confident throughout this process that this type of proposal would be assembled—one which could achieve what we are aiming at, while sparing some of the most important programs from overly drastic reductions. I am proud to have been a part of that process. That is not to say, however, that there are no elements in this package which are difficult to embrace in their entirety, and that is not to say that there is no pain.

Mr. President, I urge my colleagues on both sides to support this new package. We have come a long way since the President submitted his initial proposal in February. We have considered and compromised; we have debated and disposed. Now it is time to recognize our responsibilities and the urgency of this task, and to accept this package as one which will accomplish what we absolutely must accomplish. We have fought our battles. Let us now agree to come together in the spirit of reducing this deficit. We are pledged to act in the interest of the Nation, Democrats and Republicans alike, and it is our duty to insure that our economy will continue to grow; that our children will not be unduly burdened with debt that is not their own; and that our economy will continue to flourish as an example to all others.

Mr. DECONCINI. Mr. President, it has been a tortuous 3 weeks since the first copy of the so-called White House-Republican Leadership budget plan arrived on our desks, heralded as the bottom line in deficit reduction for 1986 through 1988. The President of the United States went on national, prime time television to proclaim the Republican budget compromise as the "Taxpayers Protection Act." We have had 50 hours of debate on the White House compromise package; two comprehensive, detailed deficit reduction plan alternatives; an across-the-board freeze on all spending for 1 year; and dozens of amendments, addressing issues ranging from Social Security to the pay of Senators. And after all the dust has settled, the Senate is left

with pretty much what it started out with: A flawed, inequitable, budget plan that forces various elements of the Federal community to make tremendous sacrifices while other pieces of the Federal budget receive merely a slap on their fiscal wrist. To add insult to injury, the budget package that we are left with has no prospect in sight for achieving a balanced budget. It is for these fundamental reasons and others that I oppose the so-called Revised White House-Leadership budget plan.

Mr. President, this has been one of the most frustrating 3 legislative weeks that the junior Senator from Arizona has spent since coming to the Senate. Here's why.

First, we have had in the White House for the past 5 years a President who rode into office on the promise of achieving a balanced budget by 1984. In fact, back in 1981, President Reagan projected that if his proposals would be implemented, the Federal budget would actually generate a surplus in 1985 and 1986. Needless to say, we have fallen about $200 billion short of achieving that honorable and laudatory goal set forth by the President nearly 5 years ago. I do not hold the President totally responsible for our failure to achieve a balanced budget. Certainly, the Congress must share in the disappointment and the failure to bring our fiscal house into balance. But after 4 years of accumulating "red ink" and falling deeper and deeper in debt, I expected much better than the budget plan that we have before us in May 1985. I expected better than a plan endorsed by the President that calls for a deficit of nearly $100 billion in 1988. I expected better than a plan endorsed by the President that would force our senior citizens and our veterans to lose their cost-of-living adjustment while at the same time our defense budget would be allowed to grow by the rate of inflation. I expected better than a plan endorsed by the President that would slash the Job Corps by 30 percent and freeze our war on drugs dead in its tracks for a year, while at the same time increase certain low-priority foreign aid information and exchange programs by 12 percent. And I expected better from the President and the Republican leadership in the Senate, than a plan to virtually eliminate postal subsidies to charities, churches, veterans groups, and small county newspapers—groups that rely on the mails to raise funds and promote their crucial social causes. But the package that has prevailed, as the President's best deficit reduction shot, does all of these things—and more.

Mr. President, I am doubly disappointed by the Revised White House-Republican Leadership plan because in the past 2 days we have had an excellent opportunity to adopt alternative deficit reduction plans that would have reduced the deficit substantially more than the White House-Leadership plan and which would have done so in a more fair and equitable way. Let me briefly recap those plans and explain why I supported them.

First, I joined the ranking member of the Senate Budget Committee, Senator CHILES in sponsoring a deficit reduction package that would have cut the deficit by $12.7 billion more than the White House-Leadership plan over 3 years and balanced the budget by 1991. The Chiles alternative plan would have cut spending by nearly $186 billion over 3 years, including deeper cuts in defense and deeper cuts in Federal civilian pay then the White House-Leadership plan. Overall, the Chiles plan would have reduced the deficit by $266.8 billion over 3 years, with $2.50 in spending cuts for every $1 of revenue enhancements. And this plan would have achieved this ratio of spending cuts to revenues without any change whatsoever in personal income tax rates for the American taxpayer. Unfortunately, the Chiles alternative package was defeated by a vote of 35 to 63.

Second, a second alternative deficit reduction package was proposed by the distinguished Democratic Leader, Senator BYRD, which, if adopted, would have cut the deficit $9.1 billion more than the White House-Leadership budget plan over 3 years, while restoring equity and fairness to the mix of spending cuts proposed in the White House plan. The Democratic leader's plan would have restored funding for critical programs such as the Job Corps, veterans health care programs, and Medicare and Medicaid, while cutting back low priority foreign aid programs by $1.9 billion more than the President and the Republican leadership recommended over the next 3 years. The Democratic leader's package provided additional funding for child nutrition programs and education programs, while mandating substantial corporate tax loophole closings and improved enforcement of our tax laws. The Democratic leader's plan even provided a 1-percent real growth increase for our national defense, yet this effective budget plan was defeated by 11 votes, 43 to 54.

Finally, an across-the-board freeze on all programs—from national defense to Federal pay to law enforcement—was offered and, unfortunately defeated by a wide margin. Although the deficit reduction impact of this plan would not have been as significant over 3 years as the other two plans mentioned above, it would have halted the growth of spending dead in its tracks for 1 year and given the Congress a full year opportunity to make permanent generic changes in the way the President and the Congress do business on the budget.

Mr. President, let me make one final comment, not on the White House-Leadership package itself, but the manner in which it was handled on the Senate floor. For the first time in my brief tenure in the Senate, the nonpartisan way the Senate normally does its business became a partisan race against the clock to monopolize the time on amendments and shut out Members of the minority in their efforts to craft a different mix of deficit reduction proposals. We saw crucial policy and budgetary issues relegated to 7 minutes of debate at 9 in the evening. We saw Members denied access to the floor to offer critical amendments that would attempt to correct inequities in elements of the White House-leadership package. And we saw the Democratic leader forced to request a rollcall vote to buy one-half hour of time to caucus his colleagues to review the final Republican budget proposal. Even that simple request was denied. My own amendment to put the Senate on record against an Office of Management and Budget ploy to short-change the Women, Infants, and Children [WIC] Nutrition Program was relegated to 5 minutes of debate on each side of this important issue. In short, not only did the Senate spend a long, long time waiting at the deficit reduction dinner table, it got a bad meal and a raw deal at the end.

Mr. President, I am deeply disappointed that I could not support the budget plan that was proposed and endorsed by the President and the Republican leadership in the Senate. As a sponsor of a constitutional amendment to balance the budget, I was hopeful that the other side of the aisle would construct a deficit reduction plan that would get us closer to a balanced budget within the next decade. Nevertheless, I hope that the House of Representatives and ultimately, our House-Senate conferees on the budget resolution will be able to salvage a respectable deficit reduction strategy that will guide the Appropriations Committee, the Finance Committee, and all Members of the Congress over the next 3 years and pave the way toward meaningful, equitable spending restraint in the future.

AMENDMENT RESTORING FUNDS FOR SBA'S CREDIT, MANAGEMENT ASSISTANCE, AND DISASTER LOAN PROGRAMS

Mr. WEICKER. Mr. President, the leadership amendment includes funding for the Small Business Administration's credit, management assistance and disaster loan programs. It reflects a just and fair compromise agreed to by the Republican leadership and the administration who deserve credit for recognizing the importance of SBA's credit programs and management assistance network to our Nation's small business sector and the economy.

Mr. President, the proposal recommends significant savings in SBA's budget, while maintaining the basic core and structure of the agency, as laid out in S. 408, which was reported out of the Senate Committee on Small Business by a vote of 16 to 3 after 3 days of extensive hearings. The amendment achieves $2.5 billion in outlay reductions over the next 3 fiscal years.

This amendment builds upon the savings achieved by S. 408. In the committee reported bill, the bulk of SBA's direct loan programs are eliminated, along with the agency's Nonphysical Disaster Program. In addition to the savings achieved by S. 408, this amendment also assumes two major policy changes. First, effective October 1, 1985, farmers would be required to go to FmHA for disaster assistance. CBO estimates that this will achieve $817 million in outlay savings over the next 3 years. Second, the Small Business Investment Company [SBIC] Program would be financed through the private capital markets rather than the Federal Financing Bank [FFB]. Under this proposal, SBIC's would be permitted to bypass the FFB and take their 100-percent Government guaranteed debentures directly to the street for financing. The SBIC industry utilized this financing mechanism from 1971 through 1974. Instead of receiving financing directly from FFB, SBIC's would get funding through the street from investors who purchased their SBA guaranteed debentures. CBO estimates $529 million outlay savings by changing the SBIC funding mechanism.

These two policy changes coupled with S. 408's recommendations achieve approximately $2.2 billion in outlay savings over the next 3 years.

Additional cost savings will be achieved through further SBA program reductions or modifications. I will want to consult closely with my ranking member and the other members of the committee before finalizing any game plan on how these additional savings are to be realized.

I would like to commend Senator BUMPERS, ranking member of the committee, for his support and counsel over the past few months. He has been deeply involved in this fight to preserve SBA. His involvement in the drafting of S. 408 and in the extensive hearings on the bill proved instrumental. I know this compromise causes the Senator from Arkansas some problems, especially the farm disaster provisions. However, his support reflects the fact that our mutual priorities have been achieved. First, SBA and its field structure, will remain. Second, its lending and counseling activities will continue.

Mr. President, I would like to delineate the programs that will be maintained and discuss their importance. First, all of SBA's credit programs including the 7(a) guarantee loan, SBIC, MESBIC and 503 certified loan programs, and veterans and handicapped direct loans will be maintained, although in some cases at reduced levels.

SBA principally through its 7(a) Guaranteed Loan Program has provided financial assistance to nearly 500,000 of the 4.5 million businesses that seek credit during their lifetime, according to GAO. This is a market penetration of over 10 percent and, according to GAO again, has been of invaluable aid to small businesses who desperately need long-term financing not otherwise available.

According to GAO, up to 40 percent of banks' long-term small business financing carries an SBA guarantee, and 82 percent of lenders they surveyed said that without SBA's guarantee, their small business loans would not have been made, or would have had tougher terms. Bankers testified that eliminating SBA could cause small firms to lose their only source of long-term credit. Kenneth Guenther, representing 7,800 banks as executive director of the Independent Bankers Association of America, summed up the need to retain the Guaranteed Loan Program:

> Every leading expert in small business finance would argue that long-term credit is essential to growing small firms and that the supply is woefully inadequate. It is precisely in this area that the SBA's presence is so significant.

He and other witnesses emphasized that the assistance provided by SBA under its guarantee program is not subsidized: these rates are market rates and generally more than 2 percent above the prime rate.

Mr. President, the SBA Loan Guarantee Program is no free lunch. The Federal guarantee permits banks to provide long-term loans, 7-10 years in length, to businesses, often start-ups, who do not have the eligibility to obtain such financing. As a result, jobs are created and economic activity is generated. These loans are paid back. The actual loss rate of SBA's bank guarantee loan is 6 percent.

Mr. President, the Small Business Investment Company [SBIC] and Minority Enterprise Small Business Investment Company [MESBIC] programs, also preserved under this amendment, provide over 20 percent of venture capital financing in America, filling a critical void in the availability of equity financing for small firms. Just last year President Reagan recognized the significant accomplishments of these programs and called them a "public/private partnership—that—can do things that Government alone cannot accomplish." In addressing this group he stated:

> Your service breakthroughs, the jobs created and retained, the economic gains, and yes, the additional taxes collected over the last quarter century from your program's successes have real meaning for us all.

In its 25-year history there have been only $38 million in program write-offs to date. Cray Research, Inc., the world's leading supplier and developer of super computers, and super computing technology, in testimony before the Small Business Committee, attributed its very existence to SBIC financing and said that in 2 years it will pay more to the Government in taxes alone than total losses in the program to date. The 1958 act which authorized the SBIC Program recognized that commercial banks are not able to furnish equity financing, and established SBIC's to combat this clear market imperfection. To date, SBA's venture capital programs, which President Reagan himself has called "pioneers of private sector/Government efforts to expand the availability of venture capital for small businesses," have provided $2 billion in equity financing to 70,000 firms, creating 250,000 jobs. SBIC's and MESBIC's generate tax revenues and jobs far in excess of Government outlays, and have been responsible for great small business success stories, including Cray Research, Apple Computer, Federal Express and Essence magazine.

Mr. President, this amendment also preserves the 503 Certified Development Company Loan Program. This is one of the Federal Government's principal economic development tools, spurring economic growth and jobs at low cost to the Government. Under the 503 Program, SBA joins with State and local governments, as well as local financial institutions in making long-term bricks and mortar financing available to healthy small businesses for planned expansion and job creation. To date, 541 CDC's have been certified by SBA, funding over 2,300 projects, totaling $703 million, creating or retaining nearly 100,000 jobs. Witnesses testified before the committee that the 503 Program has, in many instances, put rural areas on the map by increasing the capital available to these communities, where rural banks cannot meet local needs and finance essential main street service businesses. Terminating the 503 Program would choke the already short supply of long-term financing for small enterprise, its lifeblood, and would half much of the economic growth in cities and rural areas now being seen across America.

In addition, this amendment maintains the SBA Physical Disaster Loan Program. Since 1953, SBA has been the principal agency in the Federal Government to provide critical and timely assistance to businesses and homeowners who are victims of physical disasters. It has provided over $12 billion in disaster assistance to nearly

1 million businesses and homeowners throughout the Nation. And, over 96 percent of these loans, not grants, are paid back in full. Under this program, SBA moves quickly to disaster locations to provide financial assistance for uninsured losses resulting from natural disasters such as floods, hurricanes, tornados, earthquakes, fires, mudslides, and other catastrophes. Again, SBA steps in to provide loans for uninsured loss. Especially in the case of floods, other insurance is too costly or in some cases simply not available.

Mr. President, I want to reiterate the point that SBA's disaster loan respond only to losses not covered by private insurance. Ninety percent of property damage by natural disasters is due to flooding. Most private insurance companies exclude flood coverage on their policies. The National Flood Insurance Program, administered by FEMA, covers only 25 percent of eligible structures. Furthermore, 2,700 communities, in flood prone areas, remain ineligible for Federal flood insurance.

I cite these statistics to demonstrate the need for SBA's Physical Disaster Program. Since 1916, it has been the policy of the Congress that "Government should aid and assist victims of flood and other catastrophes." I am pleased that this policy will not be abandoned.

Mr. President, SBA's management assistance delivery network, which operates through universities and private sector organizations to provide counseling and training to small business owners to cure the leading cause of small business failures: improper management practices, is also preserved. Over 3 million entrepreneurs have sought and obtained SBA's management help in the last 6 years alone. In addition to the Service Corps of Retired Executives [SCORE], Small Business Development Centers [SBDC's] now located in 37 States, and the Small Business Institute [SBI] Program, which operates through universities located in every State of the Union, will be maintained. These programs, along with the management assistance arm of SBA's district offices, often provide the only source of affordable onsite management counseling for small companies.

Mr. President, lastly, I want to assure my colleagues that the Surety Bond Guarantee Program will remain under this compromise.

Through its Surety Bond Gaurantee Program, the SBA assists qualified small business contractors by extending a guarantee to a surety of up to 90 percent against loss in order to make bonding more easily obtainable. Since its inception in 1971, this program has guaranteed over 166,000 surety bonds, permitting the award of over $12 billion in contracts to small businesses. With the assistance of the SBA Surety Bond Guarantee Program, small and minority business contractors are now able to obtain the surety bonding required to bid on almost all federally funded and private construction contracts.

Mr. President, the dynamic sector of our economy is small business. Small business is where the action is. It is the small business sector where the new jobs are created and the innovations developed. Many new businesses or ideas would never get off the ground without the SBA's credit programs. When you consider the jobs created and the increased revenues paid by businesses assisted, these programs pay for themselves.

In conclusion, Mr. President, this amendment achieves substantial savings while at the same time preserving the SBA and its essential credit and management assistance programs. By adopting this amendment, the Senate will be addressing the needs of our small business sector and attempting to meet our deficit reduction goals. I urge the Senate to support this fiscally responsible approach.

Mr. INOUYE. Mr. President, the agreement which Senator WEICKER has been able to achieve today would ensure that the important service delivery, research, and clinical training programs of the Department of Health and Human Services will be continued at the highest possible level. Originally, Mr. President, we proposed that for fiscal year 1986, we continue the fiscal year 1985 level of funding with a 4-percent increase for inflation. However, that which we are offering today is the best that we have been able to achieve.

Mr. President, the Senate Appropriations Subcommittee on Labor-HHS-Education, which has jurisdiction over the Department of Health and Human Services, has just now completed its hearings on the Department's fiscal year 1986 budget request. We are just beginning to receive testimony from the public witnesses who, like you and I, are the beneficiaries of the programs we are addressing here today. If this year's testimony is in any way similar to that which I heard last year, we should be very proud of the advances in medical and health sciences which our Nation's clinicians and scientists have accomplished to date. Yet, Mr. President, we still have a long way to go.

For example, Mr. President, last year native Hawaiians were reported to have the highest incidence of cancer of any segment of our Nation's population. This past year the President's Cancer Panel traveled, at my request, to Hawaii to hold hearings on their unique needs. These native American peoples are also disproportionately represented on numerous other indicators of health and social welfare which consistently indicate that there is a very real and pressing need for continuing Federal assistance. For example, over 30 percent of all premature births in the State of Hawaii are Hawaiian, with the mothers being disproportionately young. Only this past year the Maternal and Child Health Program began to focus upon their unique needs. These are but two of the important programs which our amendment addresses today. Similarly, although the need for quality mental health and alcoholism-related treatment is high among native Hawaiians, I was recently informed that there is only one native Hawaiian graduate of an American Psychological Association-approved clinical training program. Unfortunately, I am all too aware that similar statistics could be cited for every other one of our minority and native American populations.

Mr. President, this past year the prestigious Institute of Medicine reported that behavioral disorders are implicated in 50 percent of all morbidity and mortality in our Nation. It's report stressed the importance of the Congress giving increased priority to the programs of the Alcohol, Drug Abuse, and Mental Health Administration. The Institute of Medicine pointed out, for example, that for every patient being treated for cancer more than $300 is spent on research. Unfortunately, the comparable figure for schizophrenia is only $7.

I am sure that every one of us is aware of the excellent work that the wife of one of our colleagues is doing with the Mental Health Association in attempting to combat the unfortunate stigma which mental health care presently possesses. However, for her to be truly successful, we must provide sufficient clinical training and research funds, as well as providing adequate service delivery support.

Mr. President, during the past decade we have received increasing testimony stressing the fundamental importance of prevention. The Surgeon General's report "Healthy People" pointed out that 7 of the top 10 killers in our Nation could be substantially reduced if those at risk would only change their habits and modify their lifestyles. There is a crying need for more behavioral and basic research in this area in particular. Yet, public witnesses last session informed us that for every $1,400 we spend on curative care, we only spend 50 cents on preventive measures.

Last year the Appropriations Subcommittee received moving testimony describing how the very quality of the daily lives of numerous citizens has been improved by research endeavors sponsored by the National Institutes of Health and the National Institute of Mental Health. Individual witnesses

came forth and stated that either they, or their loved ones, would simply have not been alive if these basic behavioral and biomedical advances had not been made.

Mr. President, it was truly moving to learn for example, that in fact we now have a whole new generation of health, employment, and social problems to deal with because those affected are living longer than could ever have been predicted in the past. We have truly come a long way, but we have much more to do; we simply must not stop here.

Mr. President, we must ensure that we do not diminish our Federal commitment to our Nation's health care programs. These programs are truly in our national interest.

Mr. SYMMS. Mr. President, in my fourth year as a participant in the yearly budgeting process here in the Senate, I remain deeply disturbed by the fact that Americans now have considerably more, but not necessarily better Government, and no prospects for a balanced budget within the next 4 years, even according to the compromise plan agreed upon by the White House and the Senate leadership.

Considering that President Reagan campaigned in 1980 on the promise of a balanced budget, as have many of his predecessors in office, Americans are rightfully asking, "What went wrong?"

When this President assumed office in 1981, Congress was urged to enact three major legislative items. The first was across-the-board tax rate reduction, to stimulate savings and investment and to encourage economic expansion and job creation. The supply-siders had urged tax cuts and were convinced they would work, as they worked under President John F. Kennedy's administration. The second item was a plea for domestic spending restraint, and last, a defense modernization program to rebuild our Armed Forces. Defense increases were overwhelmingly mandated after a decade of wholesale neglect, based on growing public awareness of the Soviets' exploitation of America's unwillingness to support our allies, as evidenced in major setbacks in Iran, Afghanistan, and Nicaragua.

The President achieved two early successes from a Congress stunned into action by his electoral sweep. The requested tax rate reductions were enacted, as was tax indexing. Those were two major victories for the working population. Indexing was the major contribution of the Reagan Presidency toward fairness in the Tax Code; since it prohibited Congress from profiting secretively through inflation. Bracket creep pushed taxpayers into higher brackets, while increased revenues allowed Congress to finance more social spending. But the economic recession of 1981, the inevitable legacy from the Carter years of stagflation, Federal tax growth at its highest rate in history, and a too tight monetary policy inflicted by the Federal Reserve, caused the Reagan administration to deviate from its soundly based economic policy. Reaganomics, was, for the moment, abandoned out of uncertainty and political expediency.

Since 1981, the administration succumbed to a number of proposals that increased the tax burden on the American people. The Kemp-Roth tax rate reductions were changed to a 5-10-10 formula, and delayed. Then they were delayed again. The major tax hike of the President's first term, TEFRA, passed, along with a Social Security hike, in 1982. A gasoline tax was enacted in December 1982, and last, TEFRA II was adopted as yet another deficit reduction measure. Defying all Washington remedies, the deficit persisted.

Woody Hayes, the legendary football coach, once lectured to one of his classes that the United States had been in 10 wars, 8 of which we had won, 1 of which we'd tied, and 1 lost. Coach Hayes remarked that "Now 8-1-1 is not a bad record, but I don't like the trend." Similarly, there was cause for concern about the record of the administration in its willingness to accept tax increases under the guise of deficit reduction.

For the past 4 years, what the Congress has delivered is tax increases that have virtually eliminated the gains from the across-the-board rate reductions we made in 1981, spending restraint only in the very small, comparatively speaking, area of the budget in the nondefense, discretionary programs, but no restraint whatsoever in the massive budget area of the entitlements, the real budget busters, and only a modest defense program that has not redressed the serious imbalance of our forces with respect to our Soviet and Warsaw Pact adversaries.

What is the root cause of the deficit? Contrary to what some of my colleagues on the other side of the aisle might argue, it's profligate spending, which caused the deficit, not the tax cuts, which fueled the recovery, nor the military spending increase. The excesses in Federal spending and taxation have resulted from Congress' unwillingness to control domestic spending.

A common fallacy, bought by many in Congress, is that the widening deficit is crowding out private borrowers and driving up interest rates. This argument helps fuel the tax advocates. Widely ignored by those who believe Americans should never have been granted the Reagan tax cuts is the fact that the public now carries the highest tax load in history, with 20 percent of the GNP taxed away at the national level, and with State and local taxation making that burden nearly 40 percent of GNP. The real measure of crowding out is the amount of total Government spending combined with the total amount of Government borrowing, and there is far too much of both for the continued health and competitiveness of our economy.

Fortunately, the American people increasingly recognize the real culprit in the Federal spending spree, and they do not blame the President. If there was a single message to the elected last November, it was that Government is excessive and wasteful, and that spending should be controlled, not taxes increased. The central election theme of 1980—that spendthrift, vote-buying policies plagued this country with record inflation and high interest rates, and that the American people know better than their Government how to spend the money they've earned—was overwhelmingly reapproved.

Following November's elections, an early spirit in the Congress signaled that perhaps this year, 1985, would be different. There was an early optimism that perhaps the House and Senate would go beyond merely reducing the rate of growth in programs, and actually cut spending. But while many Senators and Representatives campaigned successfully on the importance of handling the deficit, without advocating tax increases as the cure, once the President's budget was announced, the momentum for spending cuts abruptly halted. Special interest groups, the taskmasters of Congress, those profiting most from programs created and perpetuated for their benefit, launched their annual campaign against deficit reduction by spending cuts. The special interests jammed switchboards with calls in opposition to spending cut proposals, bombarded Members with telegrams, and demanded appointments with the staffs. It was all too evident that Congress would capitulate again, and that deficit reduction, while embraced by all in the abstract, is shunned by many in the specific.

Mr. President, although some politicians frequently single out defense spending as the primary reason for the deficit, the Defense Department is only part of the problem. In 1965, domestic spending accounted for 10.1 percent of GNP, while in 1983, it stood at 16.9 percent of GNP. Defense decreased in those same years from 7.7 percent of GNP to 6.5 percent. Unlike defense spending, which is justified as the fundamental responsibility of the Federal Government, a myriad of programs are now funded at the national level which do not benefit specifically the poor, the disabled, or the poverty-stricken elderly in our society. Most entitlement programs today are not

based on individual need or on poverty statistics, despite floor rhetoric to the contrary. Intended as income security programs, many of these entitlement programs have been transformed by vote-seeking politicians into massive income redistributors, with bonanzas for those at the receiving end, and burdensome taxation on those wage earners who seriously doubt that their future benefits will match their present input. Seventy-five percent of income security programs now finance retirement programs, while only one-sixth of all the money spent on entitlements is for "means-tested" programs, or those aimed at helping the poor. It is those programs on autopilot that present the greatest challenge to Congress.

Historically, the New Deal is often cited for implanting the anticapitalist notion that the Government is the best resolver of social and economic ills, and indeed, many new Government entities were instituted in the New Deal era. But the real marker of explosive budget growth could well be the institution of the COLA, the cost-of-living adjustment which Congress tied to many social programs. The Budget Committee counts about programs linked to an index such as the Consumer Price Index.

COLA's were devised to increase payments automatically to individuals as the cost of living rose, to keep Federal income checks in pace with inflation. COLA's were tied to the CPI, or to some other gauge measuring the cost of consumer goods, housing and wages. The COLA, however, was overgenerous, as the CPI, or Consumer Price Index is an imprecise measurement of cost of living. To worsen the situation, Congress could not refrain from putting its hands in the cookie jar, and tampering with trust funds. Congress frequently extended benefits to program participants far and above the amount of money they themselves contributed to the program. In Social Security, benefits increased from 1970 to 1983 by 239 percent, while the consumer price index increased substantially less during that period, by 177 percent, and average wages by 144 percent.

From 1961 to 1981, following the introduction of COLA's in many domestic programs, social spending skyrocketed from $37 billion to $163 billion, from 5.4 percent of the GNP to an incredible 11 percent in just 20 years. The early 1970's witnessed the sharp expansion of existing programs, like Social Security and AFDC (aid to families with dependent children), and the creation of many new ones, including Medicare, Medicaid, and food stamps. With the preponderance of new Federal programs, and the growing acceptance of Government as the great provider, the social stigma from accepting welfare payments all but vanished.

With the ratio of privately employed people to transfer payment recipients declining from 5 to 1 in 1950 to 1.3 to 1 in 1983, necessary reform of entitlement programs has become seemingly an insurmountable political task. Voters all too willingly accept prospective payments that will exceed their own contributions to income security programs, passing the burden of costs onto later generations. My colleagues, that burden has become much too high. I actually had a constituent contact my office today who said he's be willing to forgo the Social Security payments he'll be entitled to in 15 more years, because the burden of the payments today is just too high. There are a lot more Americans, especially the younger generation, who share that view.

With the spending bias that has afflicted the Congress, the disintegration of the ethos of limited government and balanced budgets, and the natural preference of many in our society for the enormous Federal trough, rather than competition for earnings in the marketplace, not to mention the intense pressure upon Members of Congress from powerful lobbying firms expending millions to continue to enhance the special dispensations their clients receive, a solution outside of the realm of Congress appears to be the only realistic alternative.

Education of the public about the dangers of escalating spending is crucial, and much credit should be given to the President for taking that message to the American people. The public increasingly questions the value and effect of many social programs. Rather than helping the needy to become self-sufficient, welfare programs have too often helped to promote the institutionalization of poverty in America. It is important to recognize that levels of poverty depend more upon the performance of the economy than upon the rate of Government social spending. Increases in poverty over the past three decades occurred during the years in which the GNP dropped—in 1954, 1958, 1970, 1974, and 1975. During all the other years, the poverty rate decreased. The solution to poverty has been shown not to be more Federal programs, but rather, a thriving economy with opportunity and employment for all citizens.

More and more Americans realize that the United States has suffered in its transformation from a free society, in which private property rights are respected, to a genuine welfare state, where the producers only have a residual claim to what remains of their earnings after the Federal, State, and local governments have subdivided it along their political constituencies. What happens when the Government redistributes income? People discover quickly that productivity, at least honest productivity, does not pay, and that political activity can be more lucrative than economic activity. Exorbitant rates of taxation promote the expansions of the underground economy, provide a disincentive for productivity, and make fair revenue collection virtually impossible.

The best demonstrated means to reduce the deficit is with strong economic growth. From November 1982 through June 1984, 6.7 million jobs were created, the best job creation rate of any 19-month period in history. Civilian unemployment declined from 10.7 percent to 7.1 percent in June 1984. CBO acknowledged last year that a 2-percentage point sustained increase in the growth of the economy could have brought down the cumulative deficit by $440 billion during 1984–87. A 1-percentage point drop in interest rates for all Government securities at that time could have cut the deficit by $35 billion, while the same percentage drop in unemployment also would have cut the deficit by $35 billion. Congress can promote economic growth and true deficit reduction only through cutting spending, not by raising taxes. The last two times Congress cut taxes, in 1978, when capital gains rates were reduced, and in 1981, then personal tax rates were rolled back, revenues went up substantially. Tax increases, as history has clearly shown, have never reduced the deficit, but have provided disincentives for growth, have served to finance new spending programs, have damaged our international competitiveness, and adversely impacted savings and investments, the capital formation necessary for business expansion.

I offered a budget this year in the committee, as I did last year. I received four votes on this proposal. The plan would have virtually eliminated the deficit by 1989, without raising revenues, and without detriment to those at or below the poverty level, or dependent on Federal benefit checks. My budget would have mandated a one-time 10-percent cut in civilian DOD personnel, and a 10-percent cut in personnel costs at all other Federal agencies. The plan would freeze all Federal pay and COLA's for 3 years, and cut all nondefense, discretionary programs by 10 percent. My plan would also have eliminated many nonessential functions and agencies that have long been targeted by the President for termination. While some of these cuts seem hard to swallow to some, I am convinced that the prospects for long-term economic expansion depend upon such strong measures of budget control, and will ultimately provide many more benefits than these programs do presently. The cuts passed by the committee, and

those proposed in the compromise, are a step in the right direction, but they are meager compared with the cuts that should be made.

One of the most important political developments at the grass roots level is the impending passage of the balanced budget amendment, which only requires two more States' approval. If 34 States adopt the amendment, Congress will be forced to either watch the reins of power shift to the electorate through a constitutional convention, or adopt its own balanced budget amendment. Although Congress infrequently examines initiatives to improve the budget process, the major obstacle to reform is overlooked—the absolute lack of political will in the Congress. The Budget Act of 1974 was deliberately devised for maximum flexibility in budgeting, and it is that largesse that Congress refuses to relinquish.

For that reason, prospects for passage of even a trial line-item veto remain remote. The line-item veto, which has been useful to 43 Governors, is under stiff opposition from Congress, which views it as an unwarranted executive intrusion on the purse string powers of the Congress. Well, I am inclined to believe we shouldn't be trusted with the purse strings, because we are incapable of saying no to any request for money. We're bankrupt, and yet, we mindlessly go on spending more and more as if there's no tomorrow.

For those Members who claim they dislike line-item veto because they say it doesn't reach enough spending, then I ask, for what reason do they oppose it? If it's truly as ineffective as they say, then why do they fear its passage?

The President made an emphatic commitment to veto any budget-busting bills that reach his desk, and I hope this pledge, remains, in his words, as "strong as 10 pounds of onions." President Reagan has not used his veto as often as he could have, but if the Senate continues to make no progress on budget restraint, he has my vote to sustain any of his vetoes.

H.L. Mencken once commented that Franklin Roosevelt thought the Federal Government was a gigantic milk cow with 100 million teats. Americans recognize today that the Federal Government has long surpassed its feeding capacity, and cannot continue to spend enormous sums of money which it does not have. Weaning from the Federal trough, no matter how distasteful to some, is imperative. It is the duty of this spendthrift Congress to face up to fact and exercise fiscal restraint. Ultimately, it is critical that the President exert his great leadership ability and make his veto promise come true.

Despite the howls of protest from privileged constituencies, and their vocal Washington representatives, I am certain a sizable majority of Americans want this budget mess resolved. And, I think the American people are prepared to make sacrifices to ensure that the economy stays on track, and to see that their futures and those of their children, are secure. I wholeheartedly support this package, and will continue to press for even deeper cuts in many areas, for greater program accountability and efficiency, and for preferred private solution to social needs.

Mr. CHAFEE. Mr. President, I support the substitute amendment which has been offered by the majority leader because it represents the best opportunity now available to us to succeed in reducing the Federal deficit.

Reducing the deficit is the most important single action which Congress can take to assure a prosperous future for our Nation. If this budget can survive through the House, it means interest rates will come down, we will be able to compete with our goods internationally, we will be able to compete with imports, and there will be more jobs for Americans and Rhode Islanders. Cutting the deficit is an extremely difficult task. It has compelled us to make some very hard choices among limited possibilities. It has compelled us to examine carefully every segment of the budget in the search for savings, and to closely evaluate our national priorities.

I want to commend my colleagues, Senator DOLE and Senator DOMENICI, for their diligence in attempting to achieve significant reduction of the deficit. Through compromise we find ourselves with a budget which addresses a variety of often conflicting interests and provides adequate funding for priority programs without raising taxes. This has not been easy. There is absolutely no way that this could be accomplished to the complete satisfaction of everyone. I am not in agreement with every provision of this amendment. But I believe it merits our support as a vehicle for achieving the critical goal of reducing the deficit and preserving our Nation's economic recovery.

From the outset of this year's budget discussions I pledged to the people of Rhode Island that I would work in favor of a deficit reduction package which is balanced, requiring restraint throughout every segment of the budget and not requiring any group or program to bear a disproportionate share of one burden of reducing the deficit.

This amendment achieves that goal and, most importantly, it enables us to attack the deficit problem without raising taxes. Spending for national defense is held to zero real growth in the next fiscal year—a significant reduction from the level of 6 percent real growth first requested by the administration. This restraint in military spending is absolutely essential in order to reduce the deficit in a manner which is both fair and responsible.

It has been observed many times during the budget debate that the fairest way to reduce the deficit is simply to freeze all Federal spending. While this may sound appealing, it is not sufficient. A simple budget freeze falls short for two reasons. First, it fails to produce the necessary savings—only $40 billion in the next fiscal year when those on both sides of the aisle have agreed that over $50 billion in savings is needed. In addition, a freeze of the defense budget at the 1985 level may jeopardize national security projects such as the Trident submarine and involve layoffs at key defense installations. Second, it fails to set priorities. A freeze treats all Federal programs equally and fails to distinguish between those serving important human needs such as health and education as opposed to programs which are nice but hardly essential, such as urban development grants and the Appalachian Regional Commission.

I have worked throughout the budget process to maintain adequate funding for high priority domestic programs, what are "people" programs, and am pleased that this package contains these provisions.

The package maintains spending for elementary and secondary education programs at the fiscal year 1985 level, as well as funding for library services and construction activities. In addition it provides funding for handicapped education activities above the freeze level.

Funding for higher education programs including student financial assistance are restored to the level approved by the Senate Budget Committee. This amendment also includes increased funding for health programs, including the National Institutes of Health. Furthermore, it maintains the funding levels included in my Medicare and Medicaid amendment which completely rejected the cap on Medicaid expenditures.

Other important domestic programs which the administration had eliminated, are maintained in this budget package. General revenue sharing, whose abrupt termination could have posed great difficulties for American cities and town, is continued through fiscal year 1986. Support for mass transit is reduced gradually rather than abolished. The Job Corps Program is reduced rather than eliminated. Vital environmental protection programs such as Superfund and the Sewer Construction Grants Program, are continued.

Programs that have assisted small businesses through the Small Business Administration are maintained in this package. The Federal Government will

continue to serve as an advocate for small businesses and provide support through programs such as the Small Business Development Centers, the Service Corps of Retired Executives, minority business development, SBIC, and other activities.

This amendment restores funding for Amtrak, the termination of which was sought by the administration. Earlier today I supported the successful amendment to restore funding for Amtrack at a level 10 percent less than the fiscal year 1985 appropriation. Although I am disappointed that the amount contained in this amendment is reduced, I believe the overall package is worthy of support.

In closing, Mr. President, I am satisfied with the overall package before us. Although I may quarrel with individual components such as Amtrak, we have no choice left to us if we are going to continue prosperity and give people hope for the future. We have kept faith with those people in need of Government services the most, with restorations we have made to Women's, Infants' and Children's Programs, with school lunch subsidies, help for the handicapped, and Medicare and Medicaid.

Those receiving Social Security are asked to give up for 1 year their COLA. I'm sorry that this is necessary, but I believe that this option proposed on the floor by the minority is superior to the 3-year ceiling in the first plan. I am sure that on reflection those people receiving Social Security benefits will understand that the freeze is necessary to insure that our children are left with hope for the future and not simply debt.

Mr. President, I hope this package is adopted tonight and the other body moves quickly and responsibly to get this deficit under control. If we act now, interest rates will come down, we can export goods instead of jobs once again, and inflation—the cruelest thing of all to those on fixed incomes—will be held in check.

Mr. BYRD. Mr. President, well over a week ago, we began the journey of floor consideration of the first concurrent budget resolution for fiscal year 1986 that has brought us to this point. It has been a rather amazing episode.

First, Mr. President, the majority leader filed the amendment tree so as to freeze out any Democratic amendments until such time as the majority leader chose to allow us to offer amendments to the budget he submitted.

Then, Mr. President, the majority leader offered a budget proposal that was developed behind closed doors at the White House in meetings that involved only the Senate Republicans and the Reagan administration. This compromise budget was, in fact a compromise totally within the ranks of the Republican Party—not between Republicans and Democrats.

The Senate Republican leadership then brought that budget proposal to the floor.

Then, Mr. President, the majority leader used his right of recognition to offer on behalf of the various Members on his side of the aisle amendments to dismantle the very "Republican compromise budget" that he so painstakingly placed before the Senate in a way that prevented amendment until he permitted. These amendments from his side of the aisle were amendments the majority leader opposed.

It didn't take the Senate long, Mr. President, by agreeing to amendments offered by Republican Senators, to dismantle the compromise budget, and turn it into a hollow shell. But even after this occurred, the Republican leadership left us locked in the parliamentary straitjacket established at the beginning, so that the only amendments that could be offered were to a vehicle that the majority leader openly acknowledged was dead, and which he said he would seek to replace with a new budget.

Now, the distinguished majority leader has offered his second Republican budget.

The important fact about the revised Republican budget is not that it is an improvement—which it hardly could have escaped being. The important fact is that it still is unfair to elderly, disabled, ill, and poor Americans. It still short changes America's future by cutting back on critical responsibilities of Government such as education, child nutrition, and investment in transportation and economic development programs. It still jeopardizes this Nation's competitiveness by making big cuts in the funding of job training and retraining programs, export promotion activities, and basic science and research activities—all of which have been crucial to the progress of the last two centuries that has made America the envy of the rest of the world.

Our examination of the budget just introduced by the majority leader has, unavoidably, been hasty. We have had it available to us for only a very short time. Based on this quick examination, however, let me describe some of its specific failures:

It imposes a freeze on cost-of-living adjustments in Social Security, railroad retirement, veterans pension and disability, and military and civilian Federal retirement programs—which is calculated by the Congressional Budget Office to force hundreds of thousands of elderly persons below the poverty level.

It requires a harsh increase in premiums, deductibles, and other out-of-pocket expenses for Medicare beneficiaries—even after the severity of those increases was reduced slightly from the first compromise budget.

It will force States to make cuts in eligibility and benefits in the Medicaid Program—already cut back substantially in the past 3 years—leaving tens of thousands of elderly persons needing nursing home care and children of impoverished families without adequate medical attention.

It makes substantial cuts in chapter I education programs for the disadvantaged, and other education programs vital to producing capable, knowledgeable adults to be the leaders and workers in tomorrow's America.

It terminates the Appalachian Regional Commission, the Economic Development Administration and the Urban Development Action Grant Program.

It eliminates the Revenue Sharing Program after fiscal year 1986—a program depended upon by the Nation's cities and counties.

It cuts the community development grant.

It terminates the filling of the strategic petroleum reserve.

It makes substantial reductions in funding for energy research and conservation.

It will force establishment of substantially increased user fees for citizens visiting our national parks.

It halts funding for a variety of housing and housing rehabilitation programs.

It cuts funds for the National Flood Insurance Program.

It eliminates funding for educating and training health professionals such as nurses.

It hits the Federal Government's employees hard, with dramatic increases in payroll reductions for their pension program and a freeze in pay regardless of the effects of inflation.

It slows the purchase of equipment needed by the Federal Aviation Administration to keep the Nation's airways safe and efficient.

Mr. President, this is not the budget the United States or its people need or deserve. And this is not the way to determine and enact the budget that is needed.

Finally, Mr. President, I want to be sure that no one hears my statement as a statement of resignation or acquiescence. The fight is not over. I hope a sufficient number of Members on the other side of the aisle will recognize the inadequacy of this budget, and will vote accordingly.

Mr. President, this budget does not meet the test. It hurts those who already are suffering. It hamstrings our ability as a nation to compete in the increasingly contentious world economy. It fails to adequately invest in the future of our Nation, our children, and their children.

I urge my colleagues to vote against this budget.

Mr. CHILES. Mr. President, I yield back the remainder of our time.

The VICE PRESIDENT. The majority leader.

Mr. DOLE. Mr. President, I cannot take much time. How much time remains?

The VICE PRESIDENT. Two minutes 50 seconds.

Time on this amendment has expired.

Mr. BYRD. Mr. President, I yield myself 15 seconds.

The VICE PRESIDENT. The Senator is recognized.

Mr. DOLE. Mr. President, we have gone through a long, sometimes difficult, sometimes spirited, budget debate on the floor over the past several weeks.

Long before that, discussions among Senate Republicans and the White House began, and then the Senate Budget Committee, under the fine leadership of PETE DOMENICI, put together its deficit cutting plan.

Democrats, too, spent many hours sifting through all the alternatives and drafting their own budget proposals.

All of us, no matter what the particulars of our individual proposals, had one goal in common, and that was to reduce the deficit in a way that would make a difference. We strove to reduce the deficit enough to help guarantee that the robust economic growth that has moved this country into an unprecedented period of prosperity continues. And reduce the deficit enough so that the prosperity spreads and brings in more and more Americans. We wanted to reduce the deficit enough so that we could insure that our children will not have to foot the huge bill for our spending excesses.

On April 30, just last Tuesday, we set the parameters for this budget debate by agreeing, on a 50-49 vote, to slash the deficit by about $300 billion over the next 3 years. No Democrats joined us on this side of the aisle on that vote. But yesterday, in a symbolic way, my friends on the Democratic side joined the battle. The two plans, one offered by the distinguished minority leader Senator BYRD, the other by the ranking Democrat on the Budget Committee [Mr. CHILES], both envisioned deficit-reductions in the same ballpark we have aimed for: About $300 billion over the next 3 years. So, it seems to me that we are all together on what needs to be done, if not on the means to do it.

There are still, and I would guess there will always be, differences among us as to how to finally arrive at that magic deficit-cutting goal.

And that, without question, is the crucial reason why we have had to go through this long, long process in crafting the final budget plan.

Since most of the elements of this plan have been around for some time, some may ask why it required dozens of meetings and many hours on the floor to arrive at this package.

But the simple fact is, that we had to take this one step at a time. We had to give President Reagan the opportunity to have a vote on a defense figure that he wanted.

We worked very hard to get the President on board for the 2 percent Social Security formula, and we needed to give him and those who supported that concept the opportunity to vote on that issue as well.

We also felt it was important to get all the input we could from Members, some of whom were not involved in the initial discussions with the White House, the Budget Committee markups, or the talks that led to the GOP leadership plan.

And finally, I might add, I think that it was beneficial for us to vote on the Democratic alternatives, and see that in the Senate today, a majority for increasing taxes as a means to reduce the deficit does not exist.

So, the revised package I am offering to the Senate is a distillation—perhaps not a perfect one—but I think a very, very good mixture of both what is substantively right and politically realistic.

The changes we have made in the leadership package reflect that sense of concern and realism. And while the savings in some areas have been shaved—with the increased savings from a 1-year freeze in defense spending, the bottom line remains the same. And what is more important, we will still make many structural changes in programs, changes that will, over the long haul, save the taxpayers millions and millions of dollars.

Mr. President, let me point out that the final package does terminate 13 Federal programs: These include community services block grants, the Work Incentive Program, Ex-Im Bank's direct loan program; the Economic Development Administration, the Appalachian Regional Commission, the sale of Conrail, certain SBA direct loan programs, HODAG and section 312 rehabilitation loans, emergency disaster farm loans, the U.S. Travel and Tourism Administration, trade adjustment assistance to firms by the International Trade Administration, and promotion and development of fish products by NOAA, and direct Treasury payments for most of the postal subsidy program.

The deficit reduction totals, with all these final revisions, therefore meet the goal we set for ourselves back in January. In fiscal 1986, we will save $56 billion. And over the next 3 years, the deficit will be reduced by $295 billion. And we have done this without raising any new taxes.

DEFENSE

Clearly one of the biggest—if not the biggest—changes from the original leadership plan is the reduction in the military budget. The final compromise mirrors the decision made by the Senate last week to freeze defense spending in 1986 and just allow for increases for inflation. In fiscal 1987 and 1988, defense spending would increase 3 percent after inflation.

While the figure is obviously lower than the President desired, we have been assured by defense experts that this level of spending should be sufficient to maintain the national security. We are confident that the Armed Services Committee will be able to find savings in the Pentagon budget by imposing better management, procurement, and other cost-savings methods, savings that in no way will effect our defense posture.

But I must add, that this has to be the final compromise on defense; no one can question that it is contributing its fair share.

SOCIAL SECURITY

The final package we will be voting on today does contain a 1-year freeze in cost-of-living adjustments for Social Security and all Federal retirement benefits. A freeze in COLA adjustments has had broad support as evidenced by yesterday's vote on the Hollings/Chiles amendment.

Almost every Federal program will be frozen or cut in this budget package. So, the 1-year freeze in COLA adjustments, which will result in 3-year savings of about $30 billion, reflects the desire to spread the burden of sacrifice evenly, throughout the population. As all of us who have tried to put together deficit reduction packages have discovered, it will be very difficult to get a handle on the deficit if we exempt large spending programs from a spending freeze or from cuts.

There have been a lot of scary numbers thrown around on how a Social Security COLA freeze would affect the elderly. But the fact is, in the case of the average Social Security recipient, the monthly increase that would be forgone as a result of a 1-year freeze would be $17 per month.

The benefit of any across-the-board reduction, like the delay in a COLA, is that it spreads the impact or reduction across the broadest possible population so no one individual is hurt substantially more than another.

MEDICARE/MEDICAID

We have revised the reforms in the Medicare Program, for instance, adding back close to $3 billion over the next 3 years to allay concerns about adding overly burdensome costs to beneficiaries. The largest portion of the savings—65 percent—results from provider, not beneficiary, changes.

The final package does not, does not assume the cap in Medicaid growth included in the Senate Budget Committee's resolution. And the reforms still in Medicare and Medicaid combined will, over the 3 years, still account for $17.5 billion in savings.

AGRICULTURE

In agriculture, the revised White House-Senate leadership plan strikes a careful and reasonable balance between the continuing need for Federal support for rural America and the need to bring Federal deficits under control.

The provisions covering farm price supports and credit programs would reduce baseline outlays $14.5 billion over the 3 years. Even with the reduction, CCC outlays will still average over $10 billion per year for producer loans, target price deficiency payments, the dairy program, and other activities of the Commodity Credit Corporation.

In addition, the administration has committed to using a minimum of $1 billion in surplus Government-owned commodities as bonuses to facilitate the export sale of U.S. farm commodities and value-added products in order to restore American competitiveness abroad.

In credit programs, the compromise plan would maintain a level of $4 billion in operating loans by the Farmers Home Administration, raising the level of loan guarantees as the direct lending program is phased out over 5 years. And $240 million will be made available to buy down interest rates on guaranteed loans to farmers who need additional assistance, and whose bankers agree to match the buydown.

The Emergency Disaster Loan Program would be eliminated as a wasteful and costly solution to protecting farmers and ranchers against losses due to weather and other natural disasters. In its place, the Federal Crop Insurance Program would continue to receive full funding to provide farmers a 30-percent subsidy on the premium for all-risk coverage. Disaster protection would still be provided in countries where crop is not available.

Proposed reduction in spending on soil and water conservation programs have been cut back to only 15 percent of the current services level. Rural Electrification Administration (REA) infrastructure support will not be affected by gradual reductions in lending authority in fiscal year 1985-88.

Mr. President, the agriculture-related provisions of this compromise represent a fair contribution by the rural sector of our economy to the driving need to bring down deficits and interests rates. I would only mention the firm and unwavering support of the American Farm Bureau Federation, the National Grange, the American Soybean Association, and the National Corn Growers Association—all members of the agriculture-based balanced budget brigade.

STUDENT AID

In the area of student aid, we have also agreed to address some of the concerns expressed by Senator STAFFORD and others. The final package adds back $2.2 billion in funds over the next 3 years. The compromise would freeze the spending level for discretionary student aid, including Pell grants and college work study. And it maintains the savings, mostly administrative and financial reforms, in the Guaranteed Student Loan Program, that were contained in the Senate Budget Committee resolution.

SMALL BUSINESS ADMINISTRATION

The compromise calls for retaining the Small Business Administration and certain loan programs, yet we will still achieve major cost savings. The plan would reduce the SBA direct loans by 70 percent from the fiscal 1985 level, raise loan guarantee fees, and reduce the percentage of each loan guaranteed from 90 to 80 percent. The compromise would also call for reform of the SBA Disaster Loan Program by assuming the elimination of amounts for nonphysical disaster loans and farmer eligibility for physical disaster loans.

The reforms would result in a cut in outlays for SBA's business assistance programs by half. Instead of $5 billion in savings, we will achieve $2.5 billion over the next 3 years. But using the assumptions in the compromise, SBA would have negative outlays by 1987.

EXPORT-IMPORT BANK

The final package adds back approximately $101 million for Export-Import Bank programs. We agreed to increase the size of the interest rate subsidies. But the subsidy would be provided through a regular appropriation rather than out of Eximbank capital. We have also increased the size of the Subsidized Guarantee Program and eliminated the origination fee for subsidy program.

POSTAL SUBSIDIES

Although the final agreement incorporates much of the original proposal to reform postal subsidies, we have restored $100 million in appropriations for each of the next 3 years. This would provide the assurance that rural newspapers will continue to qualify for reduced rates, along with nonprofits, library and classroom publications, and mail for the blind and handicapped. Savings from other postal subsidy reforms would still amount to $1.6 billion over the next 3 years.

MOMENT OF TRUTH

That is a brief summary of the major changes in the Dole 2 package.

I am not one much given to quoting poetry. But what we are confronting here tonight reminds me of a simple, but poignant poem written by Robert Frost. The closing lines read: "Two roads diverged in a wood, and I—I took the one less traveled by, and that has made all the difference."

Politicians are not known for taking the road less traveled by—especially if it means taking a course that leads to some very difficult decisions—decisions that would cut or freeze most Federal programs and eliminate other programs that affect almost every citizen in the United States. But tonight, if we have the courage to take that road, we can make a difference.

We can make a difference for my farmers in Kansas, by assuring that interest rates will drop perhaps 1 or 2 or even 3 points—drop enough to make it easier for those who want to export their products.

We can make a difference for a young family who wants to buy a home, or a car.

We can make a difference for the small businessman who needs capital to start or expand his business.

We can make a difference for retirees, who are the hardest hit by inflation.

We can make a difference for college graduates just entering the job market—or anyone trying to go back to work.

We can make a difference—a difference not just for today, but the kind of sea-change that will extend and expand the American economy for years to come—one that will affect not only our lives, but those of our children.

The moment of truth has come. It is time to put aside the partisanship, stop the rhetoric, and act. I hope we have the courage to do so.

Mr. President, I would just like to close this debate by thanking my colleagues on both sides of the aisle. As I reflect on the process that has been going on now for 4 or 5 months, I have been told we have had in excess of 100 meetings involving different Senators on this side of the aisle in the past 5 or 6 weeks. And it is not easy. I think sometimes, we do tend to dwell on the negatives and not on the benefits of what would happen if, in fact, we should be successful. And I am not certain we will be successful. I think it is time to find out.

I think it is time the American people find out. If we want to reduce the deficit without raising taxes, that is an alternative. I do not quarrel with my colleagues on the other side, except I remind them that in 1982, when I raised taxes $100 billion, I did not get a single vote from that side. The vote was 50 to 47.

We closed a lot of loopholes, we took away a lot of preferences, we raised taxes on a lot of corporations. Not a single vote from that side. So I am not going to apologize for the Republicans when it comes to tax preferences, whatever it may be.

But I have to believe that somewhere out there, the American people are watching us. They could not care less about the fact that it is 25 after 1. They probably think we should have done this in about a day and a half.

I do not know what the result will be if we lose. We only lose the vote; the American people lose the confidence in the U.S. Senate.

I just say to those who just cannot bring themselves to reduce the deficit for one reason or another that I really believe that we put together a good package, largely due to the efforts of the distinguished chairman of the Budget Committee and a core group and other groups and the leadership, with the support of the President.

It has not been easy for the President to accept this package because of the defense numbers. But he did. I do not know if we can find fault. If you really want to find fault, there is plenty to find fault with. We can all nitpick each other's programs for a long time.

But this is the moment of truth. This is it. If we fail, I imagine somebody else can offer a package that contains some taxes and that is not going to pass, either. I have heard about some packages that may be floating around. But this President will not increase taxes. We do not need to increase taxes. We have not reached the last resort.

When we reach the last resort, I assume the Senator from Kansas will be willing to stand up front and say, "OK, we finally cut spending, we are not going to raise taxes to avoid tough decisions on spending." I will be willing to walk the path with those who are willing to take that course. But let us, for once, demonstrate that we can do it without raising taxes.

In 1982, we promised the President, "If you will let us raise taxes, we will give you $3 for every $1 in spending cuts." You know what he got; about 92 cents in spending cuts for every dollar increase in taxes. So he has been down that road.

I think everyone has made up their minds, but I do not give up on my friends and colleagues on the Democratic side. We have all tried hard, we have all put forth packages, we have all made votes, we have all worked, we have all had great ideas. But the bottom line is, Who has the votes?

I hope that, if we are successful, many on the Democratic side will join the great majority on the Republican side in sending a signal—a bipartisan signal. So far as I know, deficits affect everybody—Democrats and Republicans alike, and Independents and people all up and down the economic ladder, people of all races and all colors. This does not single out certain people. We are sort of deficit-proof in this area, with high Federal employment.

I just suggest, Mr. President—and we are pleased to have you here—more than you know. [Laughter.]

I thank all my colleagues for their assistance. I will thank you more if you can vote with us.

Mr. DOLE. Mr. President, have the yeas and nays been ordered?

The VICE PRESIDENT. The yeas and nays have not been ordered.

Mr. DOLE. I ask for the yeas and nays.

The VICE PRESIDENT. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. DOLE. I would suggest that there be a 15-minute vote.

Mr. BUMPERS. If the majority leader will yield, there will have to be another vote after this; is that correct? Even if there are no amendments, there will still have to be a vote on passage.

Mr. DOLE. I think that is correct. I understand there may be some amendments. There may be some loose ends to tie up.

The VICE PRESIDENT. The question is on agreeing to the amendment.

The yeas and nays have been ordered. The clerk will call the roll.

The legislative clerk called the roll.

Mr. SIMPSON. I announce that the Senator from North Carolina [Mr. EAST] is absent due to illness.

Mr. CRANSTON. I announce that the Senator from Nebraska [Mr. EXON] is absent because of illness.

The VICE PRESIDENT. Are there any other Senators in the Chamber desiring to vote.

The result was announced—yeas 49, nays 49, as follows:

[Rollcall Vote No. 72 Leg.]

YEAS—49

Abdnor	Grassley	Pressler
Andrews	Hatch	Quayle
Armstrong	Hatfield	Roth
Boschwitz	Hecht	Rudman
Chafee	Heinz	Simpson
Cochran	Helms	Stafford
Cohen	Humphrey	Stevens
Danforth	Kassebaum	Symms
Denton	Kasten	Thurmond
Dole	Laxalt	Trible
Domenici	Lugar	Wallop
Durenberger	Mattingly	Warner
Evans	McClure	Weicker
Garn	McConnell	Wilson
Goldwater	Murkowski	Zorinsky
Gorton	Nickles	
Gramm	Packwood	

NAYS—49

Baucus	Glenn	Melcher
Bentsen	Gore	Metzenbaum
Biden	Harkin	Mitchell
Bingaman	Hart	Moynihan
Boren	Hawkins	Nunn
Bradley	Heflin	Pell
Bumpers	Hollings	Proxmire
Burdick	Inouye	Pryor
Byrd	Johnston	Riegle
Chiles	Kennedy	Rockefeller
Cranston	Kerry	Sarbanes
D'Amato	Lautenberg	Sasser
DeConcini	Leahy	Simon
Dixon	Levin	Specter
Dodd	Long	Stennis
Eagleton	Mathias	
Ford	Matsunaga	

NOT VOTING—2

East Exon

The VICE PRESIDENT. On this vote the yeas are 49, the nays are 49. The Vice President votes "aye."

So the amendment (No. 93) was agreed to.

The VICE PRESIDENT. The galleries will be in order. There will be no displays of approval or disapproval.

The majority leader is recognized.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. DOMENICI. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Several Senators addressed the Chair.

The VICE PRESIDENT. The majority leader is recognized.

Mr. DOLE. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The VICE PRESIDENT. Is there objection? Without objection, it is so ordered.

Mr. BYRD. Mr. President, how much time remains?

The VICE PRESIDENT. The Senator has 18 minutes remaining.

Mr. BYRD. I thank the distinguished Presiding Officer, the Vice President.

Mr. President, I have discussed this with several others, the distinguished ranking manager, the distinguished minority whip, and other Senators on this side. We have two amendments, possibly three, that we would want to offer.

I think that both sides can feel well in that they have put forth their best. The vote revealed that. And I want to express pride in Members on both sides of the aisle for the high level of debate that has been conducted. I particularly want to express my gratitude to Senator JOHN STENNIS who has stayed here throughout and is still here.

[Applause.]

On behalf of all Senators on this side, I wish to express appreciation to Senator EXON in absentia. If Senator EXON could have been here his vote would have been with this side of the aisle and that would have given us 50 votes on this side of the aisle. The distinguished Vice President, theoretically, could have still had the pleasure and honor of breaking the tie. But also I extend congratulations to Mr. WILSON who came to the Chamber and cast his vote.

So all of these are profiles in courage.

So we have two amendments, possibly three. Now this does not bind any Senator on this side who may wish to offer an amendment and get a vote on it.

But I would hope that we could confine our amendments now to the two and possibly three. One deals with Social Security COLA's, one deals with Medicare payments, and there may be a third by Mr. CRANSTON, we are not sure yet. May I say we fought a good fight and we have finished the course and I congratulate the distinguished majority leader on his victory.

Mr. DOLE. Mr. President, will the Senator yield to me just for one moment?

Mr. BYRD. Yes.

Mr. DOLE. Mr. President, I appreciate the willingness of the minority leader to sort of wrap this up this morning. I can indicate to Members now that we will probably not be in session later today, and it may be that Monday will only be a pro forma session. I will announce that later. I assume that many Members were about 24 hours behind their schedule, in any event.

I would also indicate, not to get into a contest, but had JOHN EAST been able to be there, it would have been 50 to 50 and our distinguished Vice President could have exercised his rights.

I extend my best wishes to both Senator EXON and Senator EAST. I think they are out there guarding each other. At least we told EAST to keep an eye on EXON.

I hope we can dispose of this.

Mr. MOYNIHAN addressed the Chair.

Mr. CHILES. Mr. President, I yield 2 minutes to the Senator from New York.

AMENDMENT NO. 94

(Purpose: To allow funds for a full cost-of-living adjustment under title II of the Social Security Act in fiscal year 1986)

Mr. MOYNIHAN. Mr. President, on behalf of myself, the Senator from Michigan [Mr. RIEGLE]; the Senator from West Virginia [Mr. BYRD]; and the Senator from California [Mr. CRANSTON], I send an amendment to the desk and ask for its immediate consideration.

The VICE PRESIDENT. The clerk will report.

The bill clerk read as follows:

The Senator from New York [Mr. MOYNIHAN], for himself, Mr. RIEGLE, Mr. BYRD, and Mr. CRANSTON, proposes an amendment numbered 94.

Mr. MOYNIHAN. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The VICE PRESIDENT. Without objection, it is so ordered.

The amendment reads as follows:

In the pending amendment, do the following:

On page 3, decrease the amount on line 12 by $68,000,000.

On page 3, increase the amount on line 13 by $29,000,000.

On page 3, increase the amount on line 14 by $9,000,000.

On page 3, increase the amount on line 18 by $6,068,000,000.

On page 3, increase the amount on line 19 by $8,934,000,000.

On page 3, increase the amount on line 20 by $9,708,000,000.

On page 3, increase the amount on line 25 by $6,068,000,000.

On page 4, increase the amount on line 1 by $8,934,000,000.

On page 4, increase the amount on line 2 by $9,708,000,000.

On page 4, increase the amount on line 6 by $100,000,000.

On page 4, increase the amount on line 7 by $900,000,000.

On page 4, increase the amount on line 8 by $2,400,000,000.

On page 4, increase the amount on line 12 by $100,000,000.

On page 4, increase the amount on line 13 by $800,000,000.

On page 4, increase the amount on line 14 by $1,500,000,000.

On page 24, decrease the amount on line 2 by $167,000,000.

On page 24, decrease the amount on line 3 by $55,000,000.

On page 24, decrease the amount on line 12 by $228,000,000.

On page 24, decrease the amount on line 13 by $66,000,000.

On page 24, decrease the amount on line 22 by $257,000,000.

On page 24, decrease the amount on line 23 by $76,000,000.

On page 25, decrease the amount on line 17 by $190,000,000.

On page 25, increase the amount on line 18 by $5,834,000,000.

On page 26, decrease the amount on line 2 by $740,000,000.

On page 26, increase the amount on line 3 by $8,003,000,000.

On page 26, decrease the amount on line 11 by $1,459,000,000.

On page 26, increase the amount on line 12 by $3,059,000,000.

On page 32, increase the amount on line 17 by $289,000,000.

On page 32, increase the amount on line 18 by $289,000,000.

On page 33, increase the amount on line 2 by $997,000,000.

On page 33, increase the amount on line 3 by $997,000,000.

On page 33, increase the amount on line 3 by $997,000,000.

On page 33, increase the amount on line 11 by $1,725,000,000.

On page 33, decrease the amount on line 12 by $1,725,000,000.

On page 40, decrease the first amount on line 16 by $5,943,000,000.

On page 40, decrease the amount on line 17 by $8,152,000,000.

On page 40, decrease the second amount on line 18 by $8,213,000,000.

On page 51, decrease the first amount on line 7 by $5,943,000,000.

On page 51, decrease the amount on line 3 by $8,152,000,000.

On page 51, decrease the second amount on line 9 by $8,213,000,000.

Mr. RIEGLE. May we have order in the Chamber?

THE VICE PRESIDENT. The Senate is not in order. The Senate will be in order.

The Senate from New York.

Mr. MOYNIHAN. I thank the Vice President.

Mr. President, this is a simple amendment. It restores the cost of living adjustment for fiscal year 1986 as provided under law, the Social Security Act.

Mr. President, one point and only one point. In this the 50th year of Social Security, we are proposing for the first time ever to cut Social Security benefits for the purpose of acquiring revenue for the general budget. For the first time ever we will be cutting Social Security benefits to acquire revenues for the general purpose budget. Mr. President, this is an appalling break with practice, an appalling precedent to set in our single most social insurance program.

Mr. President, I ask for the yeas and nays.

The VICE PRESIDENT. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The VICE PRESIDENT. Is all time yielded back?

Mr. DOLE. Mr. President, I will not take a great deal of time. I will yield to my distinguished colleague. But I want every body to focus on what is happening here now.

Parliamentary inquiry, I am entitled to time, is that correct, on the amendment?

The VICE PRESIDENT. That is correct. The manager of the opposition is entitled to the time.

Mr. DOLE. What we are witnessing is a passage of a deficit reduction act, about $300 billion, and then an immediate efffort to dismantle it, which is their right under the rules. You can offer amendments until the time runs out and then you can just offer amendments and get a vote.

According to my count, there have been 78 Senators—78—who voted for COLA freezes of one kind or another in this Chamber in the past few days. Seventy-eight percent.

I would just hope that now we have reached this point on this procedural matter. We have already settled the issue on its merits. Some have indicated in that vote they could not vote on the merits for a package that contained a COLA freeze. This vote is not on the merits, because I will move to table it at the appropriate time. It is an effort to come in the back door and take the package apart. It is a procedural vote.

So I appeal to my colleagues who have supported COLA reductions, who could not support the package for any number of reasons, to support the motion to table. The record has been made on COLA's. Those who voted against, voted against the package on its merits for that reason and I assume the same will follow on the next amendment, whatever it is, Medicare,

Medicaid. We have already had one vote on that today. And if there is a third amendment or a fourth or fifth, I do not quarrel with my colleagues for offering amendments.

But I would just hope that we keep in mind that now we are back into procedure. We have settled the issue. By a 50 to 49 vote, we have decided to reduce the deficit by $300 billion, at least the Senate sends that signal across the country and to the U.S. House of Representatives.

So we have achieved that. And I hope that my colleagues on both sides of the aisle would help us maintain that, even though they could not support us in that effort.

Mr. RIEGLE addressed the Chair.

The VICE PRESIDENT. Who yields time?

Mr. RIEGLE. Will the Senator from Florida yield a minute of time to the Senator from Michigan?

Mr. CHILES. I yield 1 minute.

I would ask the distinguished majority leader whether it would be possible to have a 10-minute rollcall.

Mr. RIEGLE. I just want to read what President Reagan said in an interview this year when he was being interviewed by Current Events. He said:

> I have to say my pledge during the campaign carried with it the clear implication that present social security beneficiaries would get their cost-of-living increases as well. I made that pledge and so, therefore, I feel bound by it.

We are not talking about procedure. We are talking about $18 a month in buying power for the average person on Social Security. With their phone bills rising, their grocery bills rising, and utility bills rising, they are being squeezed. They are being squeezed. If we do not stand up and honor this pledge tonight, we are driving literally a half-million elderly people—many of them in the worst condition in our society—below the poverty level. We ought to keep the President's pledge.

The VICE PRESIDENT. The Senator's 1 minute has expired.

Is all time yielded back on the amendment?

Mr. DOLE. Mr. President, I move to table the amendment, and I ask for the yeas and nays.

The VICE PRESIDENT. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. DOLE. Mr. President, will this be a 10-minute rollcall?

The VICE PRESIDENT. It will be a 10-minute rollcall.

The question is on agreeing to the motion of the Senator from Kansas to lay on the table the amendment of the Senator from New York. On this question, the yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. SIMPSON. I announce that the Senator from North Carolina [Mr. EAST] is absent due to illness.

Mr. CRANSTON. I announce that the Senator from Nebraska [Mr. EXON] is absent because of illness.

The VICE PRESIDENT. Are there any other Senators in the Chamber who wish to vote?

The result was announced—yeas 51, nays 47, as follows:

[Rollcall Vote No. 73 Leg.]

YEAS—51

Abdnor	Grassley	Packwood
Andrews	Hatch	Pressler
Armstrong	Hatfield	Quayle
Boschwitz	Hawkins	Roth
Chafee	Hecht	Rudman
Cochran	Heinz	Simpson
Cohen	Helms	Stafford

NOT VOTING—2

East	Exon

So the motion to lay on the table was agreed to.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the motion was agreed to.

Mr. DOMENICI. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 95 TO AMENDMENT NO. 43

(Purpose: To restore Medicare/Medicaid)

The VICE PRESIDENT. The Senator from Massachusetts.

Mr. KENNEDY. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The VICE PRESIDENT. The clerk will report.

The bill clerk read as follows:

The Senator from Massachusetts [Mr. KENNEDY] proposes an amendment numbered 95 to amendment numbered 43.

Mr. KENNEDY. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The VICE PRESIDENT. Without objection, it is so ordered.

The amendment is as follows:

On page 3, increase the amount on line 11 by $0.

On page 3, increase the amount on line 12 by $500,000,000.

On page 3, increase the amount on line 13 by $800,000,000.

On page 3, increase the amount on line 14 by $1,200,000,000.

On page 3, increase/decrease the amount on line 17 by $0.

On page 3, increase the amount on line 18 by $1,200,000,000.

On page 3, increase the amount on line 19 by $1,500,000,000.

On page 3, increase the amount on line 20 by $2,500,000,000.

On page 3, increase/decrease the amount on line 24 by $0.

On page 3, increase the amount on line 25 by $1,200,000,000.

On page 4, increase the amount on line 1 by $1,500,000,000.

On page 4, increase the amount on line 2 by $2,500,000,000.

On page 4, increase/decrease the amount on line 5 by $0.

On page 4, increase the amount on line 5 by $1,200,000,000.

On page 4, increase the amount on line 7 by $2,700,000,000.

On page 4, increase the amount on line 8 by $5,200,000,000.

On page 4, increase/decrease the amount on line 11 by $0.

On page 4, increase the amount on line 12 by $1,200,000,000.

On page 4, increase the amount on line 13 by $1,500,000,000.

On page 4, increase the amount on line 14 by $2,500,000,000.

On page 21, increase the amount on line 8 by $300,000,000.

On page 21, increase the amount on line 9 by $300,000,000.

On page 21, increase/decrease the amount on line 10 by $0.

On page 21, increase/decrease the amount on line 12 by $0.

On page 21, increase/decrease the amount on line 14 by $0.

On page 21, increase the amount on line 16 by $400,000,000.

On page 21, increase the amount on line 17 by $300,000,000.

On page 21, increase/decrease the amount on line 18 by $0.

On page 21, increase/decrease the amount on line 20 by $0.

On page 21, increase/decrease the amount on line 22 by $0.

On page 21, increase the amount on line 24 by $600,000,000.

On page 21, increase the amount on line 25 by $500,000,000.

On page 22, increase/decrease the amount on line 1 by $0.

On page 22, increase/decrease the amount on line 3 by $0.

On page 22, increase/decrease the amount on line 5 by $0.

Medical Insurance (570):

On page 22, increase/decrease the amount on line 8 by $0.

On page 22, increase/decrease the amount on line 9 by $0.

On page 22, increase/decrease the amount on line 10 by $0.

On page 22, increase/decrease the amount on line 12 by $0.

On page 22, increase/decrease the amount on line 14 by $0.

On page 22, increase the amount on line 16 by $200,000,000.

On page 22, increase the amount on line 17 by $900,000,000.

On page 22, increase/decrease the amount on line 18 by $0.
On page 22, increase/decrease the amount on line 20 by $0.

On page 40, decrease the amount on line 15 by $0.
On page 40, decrease the first amount on line 16 by $1,200,000,000.
On page 40, increase/decrease the second amount on line 16 by $0.
On page 40, decrease the amount on line 17 by $1,500,000,000.
On page 40, increase/decrease the first amount on line 18 by $0.
On page 40, decrease the second amount on line 18 by $2,500,000,000.

Mr. KENNEDY. Mr. President, as I understand, the Senator from Florida has yielded 2 minutes.

Are we asking for 2 minutes a side? May I have the attention of the Senator from Florida?

Are we asking for 2 minutes a side?

Is that agreeable to the majority leader.

Mr. DOLE. We would like to have 3 minutes.

Mr. KENNEDY. Two minutes a side?

Mr. CHILES. No. Two minutes on this side and 3 minutes on that side.

Mr. KENNEDY. Mr. President, this amendment has two parts. One deals with the restoration of the cuts that have been made in the Dole, et al., program for the reduction of benefits on the Medicare Program, which we debated earlier this evening.

The second part deals with Medicaid.

Mr. President, I rise to offer an amendment to protect America's aged and disabled Medicare beneficiaries and those poorest for Nation's poor who depend on Medicaid.

Medicare has done more to bring dignity and security to the lives of America's senior citizens than any social innovation since Social Security.

This year is the 20th anniversary of the passage of Medicare. It is ironic that, at the end of Medicare's second decade, this budget package proposed to break the promise of Medicare—a promise that was already been eroded by excessive health care cost inflation.

The authors of these unfair proposals either do not know or do not care that Medicare covers less than half the elderly's health care costs.

They either do not know or do not care that America's senior citizens will have to pay an average of $1,800 this year out of their own pockets to purchase the health care they need.

They either do not know or do not care that excessive health care cost inflation has meant that this $1,800 represents 15 percent of the elderly's income—the same percentage they had to pay in the dark days before Medicare; and

They either do not know or do not care that this will skyrocket to 19 percent of income by the year 2000 even without any changes in Medicare benefits.

The proposals in this budget package would take a staggering $9.6 billion away from the 30 million elderly and disabled Medicare beneficiaries over the next 5 years.

As if these proposals are not enough, they would be on top of cuts already enacted since this administration has been in office that will take $11.5 billion from Medicare beneficiaries during the same period.

The cumulative total of this budget package, plus Reagan budget cuts already enacted is $21.1 billion—about $700 per beneficiary.

This administration is unwilling to tax rich corporations, but it is only too willing to tax Medicare beneficiaries.

Mr. President, even under current law, the amount the elderly will have to pay for medical care will increase substantially. In 1977, the average elderly person had to pay $698 for the medical care they needed; by 1985, that had risen to $1,800; and by the year 2000—even if none of the benefit cuts in this package are enacted—the medical bill of the average senior citizen will be over $4,600. The elderly already pay too much for medical care.

This budget proposal would raise the Medicare part B premium to 30 percent of program costs. The sponsors of this part B premium tell you that the part B premium was originally set at 50 percent of program costs, but they don't tell you the full history of how we got where we are today.

In 1976, the Congress recognized that, because of excessive health care cost inflation, the premium was going up much faster than beneficiary income. Accordingly, the premium increase was capped by the percentage increase in the Social Security benefit.

In 1982, and again in 1984, this cap was temporarily lifted and the premium was fixed at 25 percent of program costs. In 1988, under current law, the premium will, once again, be capped by the Social Security benefit increase.

The budget proposal would permanently reverse Congress' wise policy. It would tie beneficiary premiums to an excessively high rate of inflation in program costs and would raise the share of program costs financed by the premium from the current 25 percent to 30 percent.

This proposal would permanently victimize Medicare beneficiaries for an excessive health care cost inflation Congress has failed to control. Last year, program costs went up three times as fast as the Social Security COLA. Over the next 3 years, elderly Medicare beneficiaries would have to pay a whopping $2 billion Republican tax increase and over 5 years a horrendous $8.1 billion tax increase just to maintain their part B coverage.

We have heard a lot of discussion tonight about the Social Security COLA. What the defenders of the COLA freeze do not say is that this package would attack the COLA twice.

In 1990, the difference between the current law premium and the premium under the budget proposal will eat up about 40 percent of the entire Social Security COLA.

The COLA adjustment was supposed to pay for the increases in the cost of food, shelter, fuel, and all the other essentials the elderly need. If this proposal is adopted, most of the COLA will go to pay for the part B premium increase, leaving only a fraction for the elderly's other needs.

For the 15 million beneficiaries below the median Social Security benefit, the difference between the current law premium and this budget proposal's premiums will eat up almost 60 percent of the COLA.

This proposal in this unfair package would delay Medicare eligibility 1 month—from the first day of the month in which the beneficiary turns 65 to the first day of the month after the 65th birthday.

Over the next 5 years, this proposal will cost the elderly $1.5 billion. When the Finance Committee brought this proposal to the floor last year, their own figures indicated that 160,000 elderly beneficiaries would be exposed to the costs of uninsured illness during that month.

The Congress recognized 2 years ago that it is wrong to raise the age of eligibility for Social Security. We should recognize today that it is wrong to raise the age of eligibility for Medicare.

In addition to the proposals I have just outlined that create additional costs for Medicare beneficiaries, this budget proposal would eliminate the so-called double adjustment for teaching hospitals. While this double adjustment does overpay some teaching hospitals, it also compensates for legitimate additional costs that some teaching hospitals experience that are not reflected in the DRG methodology. Precipitous elimination of this adjustment without compensating alterations in the DRG methodology would

be unfair to some hospitals and could jeopardize care for the poor.

As we review the Medicare proposals affecting beneficiaries that are included in this package, one fact is clear above all others: They callously ignore the needs of America's senior citizens.

Our amendment would strike all the proposals that harm senior citizens and would phase out, rather than immediately eliminate the teaching hospital adjustment.

In total, our amendment would add back $4.6 billion over the next 3 years. It would leave more than 70 percent of the Medicare savings in this package intact.

I believe it is wrong to tax the elderly and disabled to pay for a tax reduction program from which they did not benefit. I believe it is wrong to add to the medical costs of those who already pay too much for the medical care they desperately need. And I believe it is wrong to come back here, year after year, in these budget debates and break the promise of Medicare in order to pay for this administration's failed fiscal policies.

In his televised address to the Nation on the budget, the President said, "We will never renege on our pledge to our elderly and disabled citizens." I hope that my colleagues will take him at his word and support my amendment to protect our senior citizens.

This budget proposal contains many shocking and inhumane proposals, but proposals to cut health services to the poor must rank near the top of the list of the many destructive proposals in this budget.

Mr. President, there could not be a worse time to cut health programs for the poor than today.

The number of people without any health insurance at all during a particular point in the year has increased 10 million since 1977, from 25 to 35 million. This is a 40-percent increase.

The proportion of the poor and new poor covered by Medicaid has declined from 63 percent to 50 percent since 1975.

Public hospitals all over the country are reporting dramatic increases—on the order of 300-400 percent—in so-called "economic transfers." We are seeing newspaper reports again, for the first time since the 1960's of people showing up at emergency rooms with life-threatening conditions being turned away because they have no health insurance.

More and more hospitals are adopting explicit limits on the amount of charity care they will provide, and the Medicare reimbursement proposals contained in this budget are likely to make the problem worse.

What is the impact of all these trends? A recent Robert Woods Johnson study reported that 1 million Americans annually are denied care that they request because they lack the ability to pay for it, and another 5 million do not even seek care they feel they need because they know they cannot afford to pay for it.

In the light of this tragic and worsening statistic, what does the budget package propose?

It proposes a Medicaid cut of $1.2 billion over 3 years. And who would be the victims of these cuts? Of the 22 million people who depend on Medicaid, 3 million are poor, aged Americans, 3 million are poor, blind, and disabled Americans, 5 million are poor parents, and 11 million are poor children. Are these really the people this body thinks should pay for deficit reduction?

Medicaid cuts will hurt the poor in every State in the country, but it will hurt people residing in the poorest States the worst, because their programs are so pathetic already. Even in the best States, eligibility levels for Medicaid are below poverty. But in the 10 States with the lowest Medicaid eligibility levels, eligibility is only one-third of the poverty level—that's $3,468 for a family of four. Medicaid cuts would make it even more difficult for these poor States to catch up.

This approach to balancing the budget—a so-called balanced approach—reminds me of nothing so much as the words of the French philosopher who said, "the law, in its sublime impartiality, forbids rich and poor alike from sleeping under the bridge and stealing bread." I hope this body will reject this cynical definition of fairness today.

The Members of the Senate have received a letter signed by a bipartisan group of 37 Governors from both political parties and all sections of the country stating, "reductions in Federal Medicaid funding will force us to reduce basic medical care. That is unacceptable to us, and we believe it should be unacceptable to Congress."

I know America is a far better country than this package indicates, and I hope the Senate will demonstrate the fine quality of our country by its vote on my amendment.

I believe, Mr. President, the quality of our service in this body and the quality of our country as a humane society is tested by how we care for our weakest members: the old, the sick, and the poor. The Medicare and Medicaid proposals in this budget package are a sad commentary on our society.

I would hope this amendment would be accepted.

Mr. PACKWOOD addressed the Chair.

The VICE PRESIDENT. The Senator from Oregon.

Mr. PACKWOOD. Mr. President, there is a great portion of this amendment we have voted on before, the Medicare amendment.

The Senator from Massachusetts makes a great point that we are laying hard on the beneficiaries. Who are we laying hard on?

We freeze prospective hospital payments. We freeze exempt hospital payments. we freeze nonparticipating physican payment limits. We freeze clinical laboratory fee schedules. That is on the Medicare side.

Out of a $16.3 billion cut, approximately $1.2 billion of it falls on beneficiaries. That is the Medicaid side. The rest falls on providers.

Mr. President, I am not certain what his Medicaid is, but I can give you the portions.

On Medicaid in the next 3 years, we are scheduled to spend $72 billion. The proposal was adopted here, the Durenberger-Heinz-Chafee-Packwood amendment, which cuts $1.2 billion out.

Mr. President, if you stand here and say we cannot find $1.2 billion in Medicaid legitimately, then we cannot find anyplace to save.

I hope this amendment will be rejected.

Mr. KENNEDY. Mr. President, how much time remains?

The VICE PRESIDENT. All time of the proponent has expired.

Mr. KENNEDY. Mr. President, I ask for 30 seconds.

The VICE PRESIDENT. Is the Senator from Florida yielding 30 seconds?

Mr. CHILES. Yes, I yield.

The VICE PRESIDENT. The Senator from Massachusetts.

Mr. KENNEDY. Mr. President, the savings that the Senator from Oregon mentions are the savings that will still be included if this amendment is accepted. We do not touch the savings that are achieved by the savings against the providers. None of that is touched.

The Senator from Oregon does a disservice if he is trying to suggest that we are somehow reducing those savings. We are not. This amendment is designed only to protect the aged, the disabled, and the poor.

Mr. PACKWOOD. Mr. President, I move to lay the amendment on the table.

Mr. CHILES. Mr. President, I yield 1 minute to the distinguished Senator from Arkansas.

The VICE PRESIDENT. A motion to table has been made. It is not debatable.

Mr. PACKWOOD. Mr. President, I ask for the yeas and nays.

Mr. President, I withhold my motion.

Mr. CHILES. Mr. President, I yield 1 minute.

The VICE PRESIDENT. The motion to table has been made and is not debatable.

Mr. BUMPERS. Mr. President, will the Senator withhold his motion to table for 1 minute?

Mr. PACKWOOD. Yes, Mr. President.

Mr. CHILES. I yield 1 minute to the Senator from Arkansas.

Mr. BUMPERS. Mr. President, 2 weeks ago, I toured the Children's Hospital in Little Rock, AR. Here is what the administrators there told me: They did $50 million last year and they wrote off $12 million of it in indigent care. In my State, if you are in a family of four—bear in mind we have been cutting Medicaid every year for 5 years. What is it? Health care for the poorest of the poor. We cannot tax the big corporations; take it away from the children.

In my State, if you come from a family of four—a mother and a father and two children—and you make over $3,031 a year, you are not eligible for Medicaid. The number of children in my State who are no longer eligible for Medicaid has doubled in 4 years.

Mr. DOMENICI. Mr. President, I ask for the yeas and nays.

The VICE PRESIDENT. Does the Senator renew his motion to table?

Mr. PACKWOOD. I renew it, Mr. President, and ask for the yeas and nays.

The VICE PRESIDENT. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The VICE PRESIDENT. The question is on agreeing to the motion to lay the amendment on the table. The yeas and nays have been ordered. The clerk will call the roll.

The bill clerk called the roll.

Mr. SIMPSON. I announce that the Senator from North Carolina [Mr. EAST] is absent due to illness.

Mr. CRANSTON. I announce that the Senator from Nebraska [Mr. EXON] is absent because of illness.

The VICE PRESIDENT. Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 54, nays 44—as follows:

[Rollcall Vote No. 74 Leg.]

YEAS—54

Abdnor	Grassley	Nunn
Andrews	Hatch	Packwood
Armstrong	Hatfield	Pressler
Boschwitz	Hawkins	Proxmire

Ford	Long	Stennis
Glenn	Matsunaga	

NOT VOTING—2

East	Exon

So the motion to lay on the table was agreed to.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the motion to table the amendment was agreed to.

Mr. DOMENICI. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. METZENBAUM addressed the Chair.

The VICE PRESIDENT. Who yields time?

Mr. METZENBAUM addressed the Chair.

The VICE PRESIDENT. Who yields time?

Mr. METZENBAUM. Mr. President, I believe a Member of the Senate is entitled to recognition without yielding time.

The VICE PRESIDENT. The time is under the control of the minority leader.

Mr. METZENBAUM. Will the Senator from Florida yield to the Senator from Ohio some time?

Mr. CHILES. How much time does the Senator from Florida have?

The VICE PRESIDENT. One minute and a half.

Mr. CHILES. I yield a minute and a half.

Mr. METZENBAUM. I thank the Senator from Florida.

The VICE PRESIDENT. The Senator from Ohio.

AMENDMENT NO. 96

(Purpose: To raise revenues and reduce the deficit with a minimum corporate tax.)

Mr. METZENBAUM. Mr. President, I send an amendment to the desk on behalf of Senators HOLLINGS, LEVIN, and myself, and ask for its immediate consideration.

The VICE PRESIDENT. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Ohio [Mr. METZENBAUM], for himself, Mr. HOLLINGS, and Mr. LEVIN, proposes an amendment numbered 96.

Mr. METZENBAUM. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The VICE PRESIDENT. Without objection, it is so ordered.

The amendment is as follows:

In the pending amendment, do the following:

On page 2, increase the amount on line 9 by $2,100,000,000.

On page 2, increase the amount on line 10 by $4,600,000,000.

On page 2, increase the amount on line 11 by $3,800,000,000.

On page 2, increase the amount on line 15 by $2,100,000,000.

On page 2, increase the amount on line 16 by $4,600,000,000.

On page 2, increase the amount on line 17 by $3,800,000,000.

On page 3, decrease the amount on line 12 by $100,000,000.

On page 3, decrease the amount on line 13 by $400,000,000.

On page 3, decrease the amount on line 14 by $800,000,000.

On page 3, decrease the amount on line 18 by $100,000,000.

On page 3, decrease the amount on line 19 by $400,000,000.

On page 3, decrease the amount on line 20 by $800,000,000.

On page 3, decrease the amount on line 25 by $2,200,000,000.

On page 4, decrease the amount on line 1 by $5,000,000,000.

On page 4, decrease the amount on line 2 by $4,600,000,000.

On page 4, decrease the amount on line 6 by $2,200,000,000.

On page 4, decrease the amount on line 7 by $7,200,000,000.

On page 4, decrease the amount on line 8 by $11,800,000,000.

On page 4, decrease the amount on line 12 by $2,200,000,000.

On page 4, decrease the amount on line 13 by $5,000,000,000.

On page 4, decrease the amount on line 14 by $4,600,000,000.

On page 32, decrease the amount on line 17 by $100,000,000.

On page 32, decrease the amount on line 18 by $100,000,000.

On page 33, decrease the amount on line 2 by $400,000,000.

On page 33, decrease the amount on line 3 by $400,000,000.

On page 33, decrease the amount on line 11 by $800,000,000.

On page 33, decrease the amount on line 12 by $800,000,000.

On page 40, line 19, add the following new sentence: "The Senate Committee on Finance shall report changes in laws within the jurisdiction of the committee sufficient to increase revenues as follows: $2,100,000,000 in fiscal year 1986; $4,600,000,000 in fiscal year 1987; and $3,800,000,000 in fiscal year 1988.".

On page 51, line 10, add the following new sentence: "The House Committee on Ways and Means shall report changes in laws within the jurisdiction of the committee sufficient to increase revenues as follows: $2,100,000,000 in fiscal year 1986; $4,600,000,000 in fiscal year 1987; and $3,800,000,000 in fiscal year 1988.".

Mr. METZENBAUM. Mr. President, this is a very simple amendment. The other day we talked a little bit about a minimum corporate tax. It was a resolution having to do with nothing. It did not really provide anything.

This is the President's minimum tax. It is not mine. It is the 15-percent minimum tax on corporations on earnings over $50,000. If we want to really ad-

dress ourselves to the issue, this is the way to do it. All of the money would be used to reduce the deficit. As the President said on August 11, 1982, in Montana:

> Would you rather reduce deficits and interest rates by raising revenue from those who are not now paying their fair share, or would you rather accept higher budget deficits, higher interest rates, and higher unemployment?

I think you know the answer. This is to deal with the deficit. This is to do what the President wants us to do. Let us adopt the corporate minimum tax.

The VICE PRESIDENT. The 50 hours have expired.

Mr. METZENBAUM. Mr. President, I ask for the yeas and nays.

Mr. DOLE. Mr. President, I ask unanimous consent that I might have 1 minute on this side.

The VICE PRESIDENT. Is there objection? The Chair hears none, and it is so ordered.

Mr. PACKWOOD. Mr. President, we have previously passed in this body a sense-of-the-Senate minimum corporate tax resolution. The Finance Committee is going to be working on it this year. As far as I am concerned, I am going to pursue a minimum tax, both corporate and individual, and I think we can get it. It is not a substitute for tax reform. We are going to get that also. But there is no need now for the Senate to adopt this amendment. We have already adopted a sense-of-the-Senate resolution, and we will carry it out.

Mr. DOLE. Mr. President, I move to table the amendment of the Senator from Ohio.

The VICE PRESIDENT. The question is on agreeing to the motion to table the amendment of the Senator from Ohio. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. DOLE. Mr. President, I ask unanimous consent that I may proceed for 1 minute.

The VICE PRESIDENT. Without objection, it is so ordered.

Mr. DOLE. Do I understand there will be no further amendments after this one?

Mr. BYRD. Mr. President, will the distinguished majority leader ask for 3 minutes? It will save time.

Mr. DOLE. I ask for 2 additional minutes.

The VICE PRESIDENT. Without objection, the majority leader is granted 3 minutes.

Mr. BYRD. Mr. President, I think I am in a position on this side, having talked with the distinguished manager of the resolution on this side, to suggest that this be the last rollcall vote so that all Senators, after casting this vote, can go home.

Now, there is an unwinding, if I may use that word, of the various amendments as they are set up in the charts that we have talked about on several occasions, but I see no need to have any more votes on the resolution. We have already voted once on what will be the final package. I do not see any need to keep Senators around for that purpose, Senator STENNIS and others. I suggest that the distinguished majority leader ask unanimous consent that we proceed immediately to the amendment in the A position and the horizontal bar and proceed to vote immediately then on the resolution itself, as amended. And if no Senators on this side wish to ask for the yeas and nays on final passage, I think we can assure it will just be a voice vote or votes after this vote.

Does the distinguished majority leader feel that way about it on his side?

Mr. DOLE. I must say I do feel that way about it. I understand final passage would be on a voice vote. I could vitiate the order for the yeas and nays as we go down that tree.

Mr. BYRD. If the distinguished majority asked that they be vitiated en bloc, that would take care of it.

Mr. DOLE. Could I do that at this time?

Mr. BYRD. Yes.

Mr. METZENBAUM. Not this one.

Mr. DOLE. We are going to vitiate that all right.

Mr. President, I do not want to delay, but I think maybe as a precautionary matter, I should make that request after we have disposed of this amendment.

SCHEDULE

Mr. BYRD. All right. Will the distinguished majority leader take a minute or so and inform our colleagues as to what the schedule will be—we are not going to be in tomorrow, as I understand it—on Monday and Tuesday? What is going to be coming up before the Senate?

Mr. DOLE. Mr. President, it is now Friday, so we can go over until Tuesday at 12 noon, and I indicate that that will happen.

I have discussed with the distinguished chairman of the Armed Services Committee and the distinguished chairman of the Foreign Relations Committee that on Tuesday we would turn to the Defense authorization bill or the Foreign Affairs authorization bill. I hope to be able to discuss that on Monday.

Mr. GOLDWATER. Mr. President, the distinguished majority leader and I have discussed the possibility of bringing up the Armed Services bill on Tuesday, and I think it is possible for us to do that. Because of the new figures that have been supplied us today, we have to get our slide rules out and see where we can find the money.

So I suggest that the Foreign Relations bill come up Tuesday, and then we on the Armed Services Committee can look forward to Thursday, because we have to finish this by the Memorial Day recess in order to get it finished by Christmas.

[Laughter.]

Mr. DOLE. I thank the distinguished Senator from Arizona.

Mr. President, I have just been notified by the distinguished chairman of the Foreign Relations Committee that we can proceed with the foreign affairs authorization bill on Tuesday, and then we may be able to dispose of S. 408, the Small Business Administration bill, which could be conformed to the resolution and should not take a great deal of time.

Mr. BYRD. I thank the distinguished majority leader.

Do we correctly understand that there will be no votes on Monday? The Senate will not be in session tomorrow.

Mr. DOLE. We will not be in session on Monday, either.

Mr. BYRD. We will recess or adjourn over until Tuesday?

Mr. DOLE. Until Tuesday.

Mr. BYRD. What time does the able majority leader expect to come in on Tuesday?

Mr. DOLE. At noon. We will have the policy luncheon recess, so we will start on the bill about 2 o'clock.

Mr. BYRD. Would the distinguished majority leader say that there would be no rollcall votes other than possibly a parliamentary one in connection with the establishment of a quorum, that there would be no other rollcall votes on Tuesday before 5 o'clock?

Mr. DOLE. Is that satisfactory to the distinguished chairman?

Mr. LUGAR. The bill will take 2 days. It is necessary to deal with amendments prior to that time. We will cooperate with the majority leader to work the will of the Senate. We would like to go Tuesday and Wednesday to complete the bill.

Mr. BYRD. What time can we expect a vote?

Mr. DOLE. No rollcall votes before 5 o'clock on Tuesday, unless it is a procedural vote.

Mr. DOLE. Mr. President, have the yeas and nays been ordered on the motion to table?

The VICE PRESIDENT. The yeas and nays have been ordered.

Mr. DOLE. As soon as this vote is completed, I can indicate to the membership about vitiating the order for the yeas and nays.

The VICE PRESIDENT. The question is on agreeing to the motion to table the amendment of the Senator from Ohio.

On this question the yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. SIMPSON. I announce that the Senator from North Carolina [Mr. EAST] is absent due to illness.

Mr. CRANSTON. I announce that the Senator from Nebraska [Mr. EXON], is absent because of illness.

The PRESIDING OFFICER (Mr. STEVENS). Are there any other Senators who wish to vote?

The result was announced—yeas 61, nays 37, as follows:

[Rollcall Vote No. 75 Leg.]

YEAS—61

Abdnor	Goldwater	Murkowski
Andrews	Gorton	Nickles
Armstrong	Gramm	Packwood
Biden	Grassley	Pressler

NOT VOTING—2

East	Exon

So the motion to lay on the table was agreed to.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the motion to lay on the table was agreed to.

Mr. DOMENICI. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DOLE. Mr. President, in the two instances where the yeas and nays have been ordered, I ask unanimous consent that they be vitiated.

The PRESIDING OFFICER. Without objection, it is so ordered.

Without objection, amendment No. 43 is agreed to.

Without objection, the motion to recommit is agreed to.

The chairman of the Budget Committee.

Mr. DOMENICI. Mr. President, on behalf of the Committee on the Budget, I report to the Senate Senate Concurrent Resolution 32 as modified.

Mr. STAFFORD. I wish to discuss the budget resolution as it relates to assumptions about the Superfund program. I do so because the Superfund law expires on September 30 and must be reauthorized this year. The Senate Committee on Environment and Public Works, which I chair, reported a 5-year, $7.5 billion program extension. The Senate Finance Committee has scheduled action on the Superfund reauthorization next week. In addition, the House committees plan to act on reauthorizations this year and the White House budget submitted earlier this year assumed an expanded program. Consequently, I believe it is necessary to clarify with the Senator from New Mexico, the chairman of the Budget Committee, just how the budget plan affects Superfund.

Mr. DOMENICI. I thank the Senator from Vermont. This is a complicated subject, as the Senator points out, because legislation is moving through Congress. Rather than prejudge the final outcome of congressional deliberations, we have decided to wait for Senate Finance Committee action, and final Senate action, and then accommodate that action.

Mr. STAFFORD. What accommodation does the Senator have in mind?

Mr. DOMENICI. We intend to hold the Superfund reauthorization harmless by the following process.

If the Superfund reauthorization is considered on the Senate floor prior to adoption of a budget resolution, I can assure you that as chairman of the Senate Budget Committee, I will do everything in my power to assure that the Budget Committee will waive section 303 of the Budget Act to allow its consideration.

After the Senate Finance Committee reports legislation expanding the Superfund Program and increasing revenues that finance the program, and after the Senate acts on the bill, I would propose the following: To the extent that the HUD and independent agencies appropriation bill exceeds its allocation because of the increases in the Superfund Program, we would hold the Appropriations Committee harmless consistent with Senate action. This will not increase the deficit in the budget plan we are now debating and, if revenue projections for the new program exceed estimated outlays, this process would actually lower projected deficits.

Mr. STAFFORD. I thank the Senator for his understanding. I know he wishes that the Congress be given the latitude to freely and fully debate the new Superfund bill and this accommodation seems to give us that latitude.

Mr. LAUTENBERG. Mr. President, I also thank the Senator from New Mexico and the Senator from Vermont for reaching this understanding. As the Senators know, I have had a deep interest in seeing that this understanding be reached.

Mr. CHAFEE. I commend both Senator STAFFORD and Senator DOMENICI for reaching this understanding. As one who is deeply concerned about the prevalence of hazardous waste dumps throughout the United States, with my own State of Rhode Island having its share of such sites, I am extremely anxious that the Superfund Program be extended and enlarged without hitch well prior to its expiration date on September 30, 1985.

Mr. BRADLEY. Mr. President, after listening to the exchange between the Senator from New Mexico and the Senator from Vermont, I am reassured that if the Senate Finance Committee reports a Superfund bill of $7.5 billion in 1985 it will not violate the budget resolution. The need to clean up toxic wastes should not be caught in the intricacies of the budget process. The exchange of the distinguished budget chairman indicates that the Superfund extension will be enacted this year.

Mr. BENTSEN. Mr. President, immunization of children has been one of the most spectacularly successful preventive health measures available. Through the appropriate use of vaccine, smallpox has been eradicated from the Earth. In this country, we have also essentially eliminated diptheria, tetanus, and poliomyelitis as diseases of children. We are on the verge of achieving elimination of measles as a native disease and are beginning to intensify our efforts in order to hasten the ultimate elimination of rubella.

These achievements have had a dramatic impact on the death rate that used to be considered an inevitable part of growing up. Thousands of children are now alive and well who would have died of these diseases if our modern vaccines had not been developed.

Since 1957, with the introduction of the Sabine polio vaccine, the Federal Government has assumed an increasingly important role in immunizing children against measles, mumps, rubella, polio, diphtheria, tetanus, and pertussis. Of the approximately 3.8 million vaccinated annually, our goal has been for one half to be immunized through programs supported by the Center for Disease Control.

Appropriate administration of safe and effective vaccines continues to be one of the most cost efficient ways to improve the quality of life in each and every community across this country. For example, the benefit/cost ratio of rubella immunization given in combination with measles vaccine is estimated to be 23 to 1. For polio immunization the ratio is 10 to 1. In more human terms, that means an estimated savings of about $1 billion per year for polio, and $500 million each year for measles. Since 1963, over 57 million cases of measles and 19,000 cases of mental retardation have been averted, and the lives of 5,700 children have been saved as a result of measles immunization.

But without a modification in the budget assumptions used to develop the leadership's budget resolution

package, we could well jeopardize the extraordinary track record this country has achieved. As I understand it, the budget assumptions underlying this package freeze funding for the immunization program at the fiscal year 1985 level. And in each of the succeeding 2 years, an inflation factor of approximately 3 percent is applied.

Yet, over the past year alone, the cost of purchasing MMR [measles, mumps, rubella] vaccine has increased by nearly 27 percent, polio by 10 percent and DTP by 10 percent. Simple arithmetic using conservative estimates of funding that will be required to continue to support current levels of service indicates that we will need an additional $5 million in funding to cover the cost of vaccine.

In testimony before the Congress, representatives of the Center for Disease Control have warned repeatedly that a 6-month supply of vaccine is the minimum that should be kept in reserve. This country now has only one producer of MMR and polio vaccine and two distributors of DTP. A stockpile is needed to prevent disruption of supply, something which has happened at least 9 times since 1976. Currently, CDC has a 3-month reserve of MMR and polio vaccine, and only a 2-week supply of DTP. The shortage of DTP has been so acute in recent months that, until last week, physicians were being advised to delay the fourth and fifth doses given older children so that there was vaccine available for infants 2 to 6 months old.

A new vaccine, found to be 95 percent effective in combating bacterial meningitis and other serious disabling conditions caused by hemophilis influenza B has recently been approved by the Food and Drug Administration and recommended for use for all 2-year-olds by the Public Health Service Immunization Protection Advisory Committee. If purchased in bulk by the Center for Disease Control, children could be immunized at a cost savings of up to 15 percent. Further, administration of this vaccine to children attending day care programs and preschool will dramatically reduce the number of deaths and permanently disabling conditions that affect approximately 2,000 of the 20,000 children who contract invasive hemophilis annually.

In order to accomplish each of the objectives outlined above, that is, to provide $5 million in additional funding to maintain current immunization service levels; to make a modest attempt at improving the vaccine stockpile; and to initiate an H flu immunization program will require $21 million in budget authority for fiscal year 1986. CBO has calculated the proper outlays for that figure and also the proper numbers for fiscal years 1987 and 1988 using the proper deflator. In BA, over the 3-year budget horizon that total is $66 million, and in outlays the 3-year figure is $56 million.

I would like to have the distinguished chairman of the Budget Committee's assurance that there is sufficient room in the budget resolution package for these expenditures.

Mr. DOMENICI. The Senator is correct, there is sufficient room in function 550 for the activities the Senator describes.

Mr. BENTSEN. I thank my colleague from New Mexico and yield to the Senator from Arkansas for additional clarification.

Mr. BUMPERS. Mr. President, I am proud to join Mr. BENTSEN today in the effort to provide additional funding for our childhood immunization program. This additional funding is absolutely essential if we are to continue to protect our children from childhood disease. The fiscal year 1986 budget request provides for a freeze in funding for the immunization program that is run by the Centers for Disease Control and the States, but that is simply not enough money for this vital and cost effective preventive health program.

I join my colleagues in the quest to restrain Government spending, but I feel the budget request will not provide for immunizations for our children and will cost our Government many more health dollars in the long run.

Our vaccine program has been so successful that we have virtually eliminated measles, polio, diphtheria, tetanus, and mumps, and the suffering caused by those diseases. The program has also saved our Nation millions of dollars; the benefit-cost ratio of rubella immunization given in combination with measles vaccine is estimated to be 23 to 1, and the benefit-cost ratio for polio immunization is 10.3 to 1. This translates to an estimated savings of about $1 billion per year for polio, and $500 million per year for measles. Trimming $1 million from the immunization program in fiscal year 1986 might mean future spending of $10 million for health care for those children who contract measles or mumps or polio.

The immunization program needs additional funds because the prices of vaccines have escalated astronomically in the last several years, vaccine stockpiles are dangerously low, and the resources of our public health clinics are strained as more children are going to those clinics for their immunizations.

Over the past year alone, the cost of MMR increased by 26.9 percent, polio by 10 percent, and DTP by 10 percent. DTP was up 300 percent over the past 2 years. For fiscal year 1986, CDC is estimating a 25-percent increase in MMR, a 10-percent increase in polio vaccine, and a 10-percent increase in DTP. Those estimates of price increases are conservative, but even if we accept them, it is clear that a freeze in funding for vaccine purchases won't allow us to buy enough vaccine for our children in fiscal year 1986.

In testimony before congressional committees, CDC has stated that a 6-month supply of all vaccines should be in reserve at all times. This reserve is especially necessary since we now have only one producer of MMR and polio vaccine and only two manufacturers of DTP. This winter's shortages of DTP vaccine forced physicians to delay booster shots for some children and made it clear that we have to do more to improve our stockpiles.

CDC has 3 months of MMR and polio in reserve but no DTP. At least $40 million would be required to bring all three vaccines to optimal stockpile levels, yet the budget request provides only $4 million for vaccine stockpiling. We surely won't be able to purchase and stockpile much vaccine with that amount of money.

The additional $21 million we have requested for the immunization program is modest. This request includes an additional $5 million for State grants to purchase vaccines, an additional $5 million for stockpiling, and $11.4 million for H flu vaccine. The additional $5 million for State grants should provide some cushion for the projected price increase and for the increased caseloads in our public health clinics. The additional funding for stockpiling will not allow for the entire 6 months' stockpile we need, but it will allow us to make some progress toward adequate stockpiles, especially of the DTP vaccine.

The H flu vaccine—hemophilos influenzae B—has been approved and recommended for use by 2-year-olds. This vaccine would prevent the most common cause of bacterial meningitis in children. An additional $11.4 million would allow CDC to start this program and immunize one-half our 2-year-olds.

None of us wants to lose any of the ground we have gained in our fight against childhood diseases. That fight will require adequate funding.

It is my understanding that this $21 million is additional funding over and above the amount included in the Senate leadership-White House agreement, so that other programs in function 550 need not be reduced commensurately. Is that accurate?

Mr. DOMENICI. The Senator is correct.

TREATMENT OF THE PROPOSAL FOR THE VETERANS' ADMINISTRATION TO COLLECT COSTS OF CERTAIN CARE FROM INSURANCE COMPANIES

Mr. CRANSTON. Mr. President, there is one point relating to function 700, veterans' benefits and services, under the first concurrent resolution on the budget for fiscal year 1986 (S. Con. Res. 32) as to which the distinguished chairman of the Veterans' Affairs Committee, Mr. MURKOWSKI, and

I, as ranking minority member of the committee, would appreciate having the views of the very able chairman, Mr. DOMENICI, and ranking minority member, Mr. CHILES, of the Budget Committee. Both the Budget Committee reported resolution and the White House/Republican Senate leadership packages are based on the assumption that Congress will enact health insurance reimbursement legislaton under which the Veterans' Administration would seek to recover from insurance carriers the cost of care provided to non-service-connected disabled veterans.

Our concern in this regard is that, if ultimately this assumption underlies the conference agreement on the resolution, the collections estimated to result from the enactment of such legislation not be considered to be applied or accounted for in any way that would reduce the levels of appropriations for the VA's medical care account, or any other VA appropriations account, under the budget resolution. Any such prospective reduction of amounts provided for VA appropriations account could result in the VA having less resources available to it than is needed to accomplish the workload and maintain the staffing levels intended by the Congress.

The chairman of our committee, Mr. MURKOWSKI, and I believe the administration does not intend that result.

Mr. MURKOWSKI. Mr. President, I certainly agree with the distinguished ranking minority member of our committee on this matter. With respect to the administration's position, we note that, in the VA's budget documents, the estimated collections are shown as proprietary receipts and, under the administration's legislative proposal transmitted to the Congress on May 7, any amounts collected pursuant to this legislation would be "deposited in miscellaneous receipts of the U.S. Treasury as a proprietary receipt." Thus, the collections would not be credited to the VA's medical care account and would not be deemed to reduce in any way the appropriations needs of that account.

Mr. CRANSTON. Mr. President, in light of the foregoing, it is our understanding that the estimated savings—the negative budget authority and outlay figures—should not be allocated to the Appropriations Committee under the so-called "cross-walk" pursuant to section 302(a) of the Budget Act. We would, therefore, like to ask the chairman and ranking minority member of the Budget Committee whether this understanding is correct.

Mr. DOMENICI. Mr. President, my good friends from California [Mr. CRANSTON] and Alaska [Mr. MURKOWSKI] are correct in their understanding. For purposes of the first concurrent resolution on the budget for fiscal year 1986, it is assumed that the collections resulting from the enactment of such legislation would be deposited in the General Treasury in miscellaneous receipts and the estimated savings—receipts—would not be crosswalked to the Appropriations Committee.

Mr. CHILES. Mr. President, I have had the opportunity to discuss this matter with the chairman of our committee and he has correctly stated the views of both of us on this matter.

Mr. MURKOWSKI. I thank the Senators for making this important clarification.

Mr. CRANSTON. I also thank the Senators. They have been most helpful.

Mr. HATCH. Mr. President, will the Senator from New Mexico yield for a comment or two about the Job Corps?

Mr. DOMENICI. I will be happy to yield for a comment.

Mr. HATCH. I think everyone here knows just how strongly I support the Job Corps. Since I made a visit to the Clearfield Job Corps Center in Utah in 1980 and became convinced that this type of comprehensive, residential approach was needed, I have tried to defend this program and its mission to serve the truly disadvantaged youth of our Nation—those youth who have no other place to go. I am proud of my support for the Job Corps and my remarks today, or my vote for this budget proposal should not be construed in any way to detract from that support.

However, I am also well aware that we must curtail Federal spending. For that simple reason, I believe that the 70-percent restoration of funds for the Job Corps is a fair and responsible compromise. This level of funding is predicated not only on what the Job Corps has already achieved, but also on its even greater potential following some reforms which will be proposed in a reconciliation process. Senator KENNEDY and I are both anxious to stabilize the program and we will get down to work as soon as the budget resolution has been agreed to by both the House and Senate. We will also be pleased to work with the House Education and Labor Committee which has always shown great interest in the Job Corps.

There are many ways cuts could be made in the Job Corps without taking the reform route. One would be to eliminate centers which have unacceptable performance records, but that would jeopardize the Job Corps program in many States where it is needed most. We could eliminate centers which will require the most extensive commitment of resources for renovation, but that too would eliminate centers in strategic locations. We could reduce it piecemeal—such as eliminating residential training academies, or reducing the time students may spend in Job Corps—but those solutions do not lend themselves to a comprehensive program. Job Corps would become disjointed and unfocused. We could eliminate civilian conservation centers, but this solution is not satisfactory to many people and States which have excellent conservation centers.

In short, Mr. President, there is really only one good way to make budget reductions in the Job Corps, and that is to take a good hard look at the manner in which the funds are administered. We cannot make necessary reductions without reforming the program. Frankly, we need to make this effort to ensure reductions are made equitably as well as to promote the long-term efficacy of the Job Corps program.

The Job Corps is a unique concept for providing skills training and job counseling to economically disadvantaged youth. Eighty-five percent of these kids are high school dropouts. As many as 25 percent have been rejected by the U.S. Armed Forces because they have been unable to meet the minimum entrance requirements.

The success of the concept is clear from the statistics: In 1979, 93 percent of Job Corps terminees were placed in either private sector jobs, admitted to school, or entered the Armed Forces. The placement rate of the Job Corps has increased steadily since it was created in 1964. As a distinguished fellow Utahn and former Secretary of Education, Ted Bell, has said, "No educational endeavor in our society has a more difficult assignment." Yet, Mr. President, Job Corps has been successful in reaching out to these young people, and inspiring them to achieve greater things.

David Parent, a graduate of Northlands Job Corps Center in Vermont, and winner of the National Job Corps Alumni Association's essay contest, is currently enrolled in the Putnam Memorial Hospital School of Nursing in Bennington, VT, working to earn his LPN. He wrote in his winning essay:

> I never thought I'd be able to qualify to be accepted to nursing school, but now that I stuck to it, and finished the work I had to do at Job Corps, I'm able to contribute greatly to the physical and psychological well-being of the many patients I come into contact with every day as a nurse . . . These people need the best I can give. Through the Job Corps I have learned to be of the greatest service to those who depend on me every day.

Mr. President, David Parent is not alone. We need not look far for Job Corps' success stories. It is simply unreasonable to think we should eliminate a program which has motivated youth like David to learn, to work, and to serve society rather than to exist on public assistance. Studies by reputable independent consultants, including Mathematica, Inc., have all concluded that the Job Corps returns $1.45 for

every dollar which is spent. I do not think, Mr. President, that we can afford not to invest in a Job Corps program. These young people are the future of our Nation.

Having said this, Mr. President, I feel I must also be honest and say that the Job Corps could benefit from reform. The restoration of funds in this budget resolution not only ensures the continuation of Job Corps, but it provides all of us with the opportunity to improve its performance. I know Senator KENNEDY, the distinguished ranking member of the Labor and Human Resources Committee, has also been a staunch advocate of the Job Corps, as have our counterparts in the House, GUS HAWKINS and JIM JEFFORDS. One thing we know is that we should not allow Job Corps to become stale, inflexible or mired in the status quo for its own sake.

In 1982, Congress enacted landmark legislation to reform the job training system in our Nation. The changes were designed to make job training more responsive to individual labor markets and to target expenditures on one purpose: training for jobs. It is time, I truly believe, that we incorporate Job Corps into this system. The concept of comprehensive, residential centers should be an integral part of the arsenal of Federal assistance for education and job training available to every State to help combat youth unemployment. It seems to me that a State trying to develop a job training program without the resources of a residential Job Corps center to reach a special population of youth would be like the Pentagon trying to plan for the defense of our Nation without rifles or tanks.

Further, Mr. President, we need to direct more funds to States where there are no Job Corps facilities or where Job Corps opportunities are not available proportionate to the need. One example is California which has an economically disadvantaged population of 601,268—over 11 percent of the total number of disadvantaged youth in the country—yet California receives less money than two other States with substantially fewer young people in need. Connecticut has nearly 48,000 economically disadvantaged young people, but no Job Corps centers. I have to believe that at least several hundred of those teenagers could benefit greatly from a program like Job Corps. Alabama has an economically disadvantaged youth population of 118,912 and only one Job Corps center. At a minimum, Mr. President, States should command their own resources, specifically designated for this purpose, to make reciprocity agreements with Job Corps centers in other States.

I think Senator KENNEDY would agree that now is the time to advance this program. It is the time to address some of the issues that have constantly cast aspersions on the program's integrity and effectiveness. We need to get States and private industry councils involved in Job Corps without sacrificing the expertise of current Job Corps contractors. We will need to make reductions without zeroing out Job Corps opportunities in any State. We need to reduce expenditures on Federal contracting and procurement bureaucracy and spend what funds we have on creating slots for kids.

I am pleased that we have agreed to save the Job Corps and that the budget will allow for a viable program, not just the bare bones. I will work diligently to ensure that this is the best program it can possibly be—not just for the sake of the kids whose hope it is, but for the taxpayers whose hard-earned funds we are investing.

Mr. President, I thank the Senator from New Mexico for yielding.

Mr. DOMENICI. Mr. President, I thank the Senator from Utah, the distinguished chairman of the Labor and Human Resources Committee for his comments. I have to say that I have rarely seen a Senator so committed to any program and so willing to fight for it, even if he disagrees with his own leadership. As chairman of the Budget Committee, I am appreciative of his recognition of the need to restrict spending, even in those programs we believe are worthwhile. He has been a statesman during this budget debate and I thank him for it. I will do everything I can to assist him in achieving these beneficial reforms.

I know the Senator from Massachusetts has also been a loyal supporter of the Job Corps and I appreciate the spirit of bipartisanship which exists on this issue.

REA BUDGET

Mr. ABDNOR. Mr. President, I would like to clarify a few items concerning the REA budget. As my colleagues are aware, the Senate/administration deficit reduction plan as released in mid-April proposed cuts in the Rural Electrification Administration [REA] Program which were based on two very shocking assumptions. First, it was assumed that direct loans, guaranteed loans, and rural telephone loans would be phased out over 8 years. Second, it was assumed that direct loan interest rates would be increased at a rate equal to the Treasury's cost of borrowing plus 1⅛ percent. In essence, it was assumed that the REA Program would be phased out and eliminated—that the lights would be turned out in rural America.

I informed my colleagues, Budget Director Stockman, and Agriculture Secretary Block early on that these assumptions were totally unacceptable to me and that I would actively oppose and vote against any proposal which proposed to phase out REA.

Since that time, I have been meeting almost daily with Senator DOLE, Senator DOMENICI, and Budget Director Stockman to try to develop an acceptable compromise. Additionally, I have met with Mr. Bob Bergland, executive vice president of the National Rural Electric Cooperative Association [NRECA] and other NRECA staff in order to develop a package which is fair to rural electrification and rural America.

The package we have before us today is fair to rural electrification. It addresses the concerns I raised, those raised by the over 80,000 rural electric cooperative members in my home State of South Dakota, and the 25 million customers of rural electric cooperatives nationwide. The REA provisions in the Dole substitute are acceptable to NRECA.

Specifically, these provisions call for a rescission of $550 million of loan authority in fiscal year 1985, a $550 million reduction in loan levels from the baseline in fiscal year 1986, a $600 million reduction in loan levels from the baseline in fiscal year 1987, and $650 million reduction in loan levels from the baseline in fiscal year 1988.

Additionally, I would like to gain the assurance of the talented Budget Committee chairman, Senator DOMENICI, on a few points. Am I correct to state that the budget savings reflected in the Dole amendment are arrived at by assuming a reduction in loan levels, not by proposing a phase out of direct, guaranteed, and rural telephone lending?

Mr. DOMENICI. The Senator is correct. We have modified the Senate-White House agreement so that the Dole amendment assumes a reduction in REA loan levels, not a phase out of REA loans.

Mr. ABDNOR. Am I also correct in stating that the savings are not assumed to be derived from an increase in direct loan interest rates from the current 5 percent to a rate equal to the Treasury's cost of borrowing plus 1⅛ percent?

Mr. DOMENICI. The Senator is correct. The Dole amendment assumes that direct loan interest rates remain at 5 percent, and do not increase to the Treasury's cost of borrowing plus 1⅛ percent as envisioned in the Senate-White House agreement. Let me take this opportunity to commend the able Senator from South Dakota for his successful efforts to work out this modification that effectively maintains the savings in the agreement and meet the concerns of rural electric and telephone cooperatives.

Mr. ABDNOR. I also would like to clarify an agreement which has been reached with the distinguished majority leader. I am aware that the REA Administrator is considering a draft proposal which would replace its exist-

ing general funds rule with a working capital criterion. I have been informed that this new criterion could make 70 percent of all rural electric systems ineligible for both new REA loans and advances on already approved loans. According to the information I have received, 91 percent of South Dakota's rural electric cooperatives would be made temporarily, or perhaps permanently, ineligible under the proposed criterion. Surely this appears to be yet another attempt to phase out REA.

Mr. DOMENICI. At my urging, the majority leader has requested that the administration delay making administrative changes that would restrict the ability of rural electric systems to obtain REA loan funds. Before such changes are implemented, the majority leader has requested that the NRECA and the appropriate congressional committees of jurisdiction have the opportunity to review and comment upon the changes fully. It is my understanding that the REA Administrator and Budget Director Stockman have agreed to this request.

Mr. ABDNOR. I would like to thank the distinguished chairman of the Budget Committee and the majority leader for their cooperation in putting together a package which is fair to REA and the rural families, businesses, and communities which it serves.

Mr. HELMS. Mr. President, the new compromise package for agriculture is one that I hope every Senator will be able to support. Let me outline the changes in the assumptions that are proposed. The changes provide a more attractive program for our Nation's farmers.

Significant changes have been made in farm price supports, farm credit programs, Federal crop insurance, and soil and water conservation programs. In addition, the new compromise assumes a new export incentive program, and retains the changes already made by the Abdnor amendment for REA.

Mr. President, in farm price supports, changes in programs that would result in savings of $5.5 billion over 3 years would still be made. That means that the Federal Government will still spend about $10 million for each of 3 years for commodity price supports—a total of $30 billion for Commodity Credit Corporation programs.

In addition, a strong Export Incentive Program is included. Utilizing surplus CCC stocks, the program will be targeted to meet the competition in foreign subsidized sales in a broad range of farm products. Although the CCC may show significant book losses, these will not count against the $10 billion that can be spent for commodity programs each year, nor will it affect the $5.5 billion in savings for the commodity programs that is assumed for the reconciliation.

The first part of the agreement in farm credit programs is similar to the previous compromise. The Farmers Home Administration Disaster Loan Program will be terminated in counties where Federal crop insurance is available. This will result in a 3-year savings of about $5.1 billion.

In addition, Mr. President, existing Farmers Home Administration ownership and operating programs will be consolidated into a new $4 billion annual program with a transition to a guaranteed program. This is an increase of $1 billion in the overall FmHA Lending Program. Under the new program, the level for direct loans will be $2 billion, $1.5 billion, and $1 billion in fiscal years 1986, 1987, and 1988, respectively. For the same years, the level for guaranteed loans will be $2 billion, $2.5 billion, and $3 billion, respectively. It is estimated that the phasedown of direct loans will save $3.8 billion over 3 years.

Under the new program, guaranteed loans can qualify for an up to 2-percent interest rate buydown, if the borrower can meet the cash-flow test, the bank matches the buydown, a borrower meets the no credit elsewhere test, and existing bank loans are classified. It is assumed that there would be $240 million available for this buydown program over 3 years.

The new compromise agreement eliminates any savings that were assumed from changes in the Federal Crop Insurance Program. This will ensure continued program integrity while the Disaster Loan Program is phased down.

In other agricultural programs, the assumptions for reductions in funding for soil and water conservation programs were reduced by 50 percent from the previous compromise. This translates to a 15-percent reduction from the baseline in conservation programs, as opposed to the 30 percent in the former package.

The compromise also includes the Abdnor amendment on the Rural Electrification Administration that was previously agreed to by the Senate.

Mr. ZORINSKY. Mr. President, I should like to ask the distinguished chairman of the Budget Committee a question concerning the Farm Program savings assumed in this package. As I understand the final package, it adds back $2.5 billion in funding for agriculture price support and farm credit programs.

Am I correct in assuming that the Agriculture Committee retains complete discretion for spending among various farm commodity support, farm credit programs, and other programs within its jurisdiction?

Further, am I correct in believing that the savings assumed under the resolution's reconciliation instructions can be met in part or whole from these various programs, while augmenting commodity price support activities? In short, I assume that the bulk of the funding being added back could be used for commodity price support programs with a portion being used for farm credit?

Mr. DOMENICI. The distinguished ranking member of the Senate Agriculture Committee is correct. Within the total budget authority under the jurisdiction of the Senate Agriculture Committee, it is clearly the prerogative of that committee to meet its reconciliation instructions in whatever manner achieves the assumed savings.

I would be less than candid with the Senator if I did not point out to him that, in arriving at the assumed reconciliation outlay savings, the resolution assumed reforms in farm price support programs, farm credit, and other programs under its jurisdiction. I am hopeful that in addressing the 1985 farm bill the Agriculture Committee will give serious consideration to some of the reforms assumed in this resolution.

FOREST SERVICE PROGRAMS

Mr. McCLURE. Mr. President, I note that a provision has been added to the budget resolution which requires both the Committee on Energy and Natural Resources and the Committee on Agriculture, Nutrition, and Forestry to review certain programs within their respective jurisdictions for reconciliation savings.

The programs of concern, Mr. President, are those of the U.S. Forest Service. Under the Senate Rules, jurisdiction over Forest Service programs is assigned to the Energy and Natural Resources Committee, the Agriculture Committee, or jointly to both. However, this sharing in jurisdiction is not fully preserved in the budget resolution. As reported by the Budget Committee, and in the White House agreement, assumptions regarding savings in Forest Service programs were reconciled only to the Agriculture Committee. The Forest Service programs within the jurisdiction of the Energy and Natural Resources Committee were not reflected in its reconciliation instructions set forth in section 2.

The subject provision corrects this situation, however. The provision, which is supported by the chairman of the Agriculture Committee, assigns the reconciliation assumptions regarding Forest Service programs to both committees and allows each committee to review those programs within their respective jurisdictions with respect to achievement of the stated savings.

This provision, Mr. President, assures that the budget resolution is neutral with respect to assumptions regarding committee jurisdiction over Forest Service programs.

Mr. HELMS. Mr. President, I thank my friend, the chairman of the Committee on Energy and Natural Re-

sources for his comments on this change in the instructions for the Committee on Energy and Natural Resources. I can accept this change because it does not affect the instructions or the assumptions for the Committee on Agriculture, Nutrition, and Forestry.

The change is intended to allow the Committee on Energy and Natural Resources to review programs in the Forest Service that are within their jurisdiction, and to receive credit for savings that they might recommend for Forest Service programs within their jurisdiction.

Should the Committee on Agriculture, Nutrition, and Forestry make changes in Forest Service programs within its jurisdiction, it would receive credit for savings. Thus, each committee would receive full credit for whatever savings it achieved in the respective committees. However, neither committee will receive any credit for savings enacted by the other committee.

Also, the change in instructions for the Energy Committee is intended to reflect the shared jurisdiction over certain forestry legislation, and is not intended to provide the opportunity for either committee to affect Forest Service programs not within the jurisdiction of the respective committee.

Mr. DOMENICI. Mr. President, I agree and want to compliment the two distinguished chairmen on their willingness to address this difficult jurisdictional issue. I believe the two chairmen have clearly identified a difficult issue and have found a unique way to address it. I thank both of them for their work.

Mr. ZORINSKY. Mr. President, I would like to ask the distinguished chairman of the Senate Budget Committee a question concerning a provision included in the original budget resolution as reported out of his committee that I understand has been modified in the substitute resolution offered today.

As I understand it, as reported, section 5 of the budget resolution would have had the effect of limiting Federal loan programs authorized in fiscal years 1986 and 1987 to amounts provided in advance by appropriation acts.

Mr. DOMENICI. The distinguished Senator from Nebraska is correct, and I am grateful to the Senator for bringing this issue to our attention so that we could make the modification.

Mr. ZORINSKY. I would point out to the Senate that that provision, as originally reported and if applied to commodity price support programs, would have been an administrative nightmare that would have crippled the operations of the Commodity Credit Corporation and disrupted the commodity markets.

Currently, price support program levels are set by Congress in farm legislation, and the programs are carried out with the use of Commodity Credit Corporation funds. The borrowing authority of the Commodity Credit Corporation is replenished, as needed, by subsequent appropriations that restore net realized losses on support operations and related programs.

Commodity price support loan programs are a marketing tool for producers and serve to protect farmers against unreasonably low commodity prices. During times of severe shortages and subject to statutory resale provisions, the Commodity Credit Corporation releases commodities it has acquired, which keeps consumer prices from increasing sharply.

Under section 5 of the budget resolution as reported, it would not have been in order, during fiscal years 1986 and 1987, for either House of Congress to consider any bill, resolution, or amendment authorizing new direct loan obligations or new loan guarantee commitments unless the legislation also provided that that authority to make or guarantee loans would have been effective only to the extent, and in such amounts, as were contained in appropriation acts. This provision would, if implemented, seriously impair the essential operations of the Commodity Credit Corporation since it is impossible to anticipate the demands that will be placed on CCC.

Mr. DOMENICI. The distinguished ranking member of the Senate Agriculture Committee, an expert in this area, is without question correct in his assessment of how this provision as reported out of committee would have affected the Commodity Credit Corporation's activities. For that reason, in past years Congress has exempted Commodity Credit Corporation operations from this provision as it was contained in other budget resolutions. In 1982, in fact I offered an amendment on the initiative of Senators HELMS and HUDDLESTON to exempt CCC from this provision.

I therefore can assure my distinguished friend that the substitute resolution we are offering here today modifies section 5 as originally reported out of the committee in exactly the same fashion as Congress has done in past years. Specifically, the amendment provides that the provisions of section 5 shall not be applicable to agricultural price support and related programs of the type in operation on January 1, 1985, that are funded through the Commodity Credit Corporation.

It is clear that this special treatment is justified because of the uniqueness of the Commodity Credit Corporation programs. However, this modification does not mean that CCC can spend unlimited amounts. Any increase in the borrowing authority of CCC is already subject to the appropriation process and, under this amendment, Congress will continue to control the expenditures of CCC.

I thank the Senator for bringing this issue to our attention.

Mr. ZORINSKY. I thank the chairman for his understanding and his assurances.

FUNDING FOR THE ASBESTOS SCHOOL HAZARD ABATEMENT ACT OF 1984

Mr. ABDNOR. Mr. President, as the author of the Asbestos School Hazard Abatement Act of 1984 [ASHAA], which was enacted August 11, 1984, I am extremely pleased with the way the Environmental Protection Agency [EPA] is implementing this new program. In addition to providing no-interest loans and grants to eligible local educational agencies for asbestos abatement projects, the Agency is using a portion of its administrative moneys to develop a model contractor training and certification program. This effort will benefit not only those LEA's which receive financial assistance under ASHAA, but it will also serve to ensure that asbestos hazards in other schools and buildings are addressed in a safe and appropriate manner.

ASHAA authorized $50 million for fiscal year 1984, $50 million for fiscal year 1985, and $100 million for each of 5 subsequent years for asbestos abatement projects. During this fiscal year—the first year of the program—the Agency is spending $50 million appropriated through the fiscal year 1984 second general supplemental appropriations measure.

Mr. President, it is my understanding that the budget proposal before us is not intended to reduce funding below EPA's current program levels. I would like to ask the distinguished chairman of the Budget Committee, Senator DOMENICI, to clarify the intent of the committee with respect to EPA's budget.

Mr. DOMENICI. The Senator from South Dakota is correct. Except for those programs that are reduced below a freeze level, the Senate-White House agreement generally assumes a 1-year freeze on all domestic discretionary programs. Our assumptions embodied in this budget resolution do not include any reductions for EPA programs.

Mr. ABDNOR. I thank my good friend and colleague from New Mexico for his clarification. I know that the Senator is aware of my commitment to seek additional funding for asbestos abatement activities in our Nation's schools, and I look forward to working with he, Senator D'AMATO, Senator LAUTENBERG, and others who serve on the Appropriations Subcommittee on HUD-Independent Agencies, as well as with Senator STAFFORD, the distinguished chairman of the Committee

on Environment and Public Works and coauthor of ASHAA, to secure continued funding for this vital program.

Mr. WALLOP. May I ask the chairman of the Budget Committee a question? It is my understanding that the new budget package does include features of my proposed amendment relating to the sport fish restoration fund, commonly known as the Wallop/Breaux fund. Is that correct?

Mr. DOMENICI. Yes, that is correct.

Mr. WALLOP. The central feature of that amendment cosponsored by Senators BINGAMAN, BOREN, BURDICK, DECONCINI, DURENBERGER, GOLDWATER, HELMS, HOLLINGS, MCCLURE, and SARBANES was the retention of the permanent appropriation for the sport fish restoration fund, whereby all revenues going into the fund are automatically appropriated to appropriate conservation programs. Is the sport fish restoration fund now treated in the new leadership budget package as a permanent appropriation?

Mr. DOMENICI. Yes, the current package treats the sport fish restoration fund as a permanent appropriation that passes all revenues through to conservation programs.

Mr. WALLOP. I thank the Senator from New Mexico for clarifying these matters for me and I thank his staff for their help in this effort. Inclusion of the permanent appropriation in this package sends a clear message to the boaters and fishermen of American that the moneys collected as part of the 1984 act will be used as promised. I commend the leadership for honoring this commitment.

PETROLEUM OVERCHARGE FUNDS

Mr. MCCLURE. Mr. President, I had intended to offer an amendment to change the assumption in the budget resolution regarding the use of Petroleum overcharge restitution funds. The amendment would have reflected such funds as undistributed offsetting receipts (in function 950), rather than being offset against the energy function (270) and income security (600).

The amendment was intended to clarify that appropriations for the Department of Energy's energy conservation programs, such as the low-income weatherization and the school and hospital programs, and the HHS fuel assistance program would not be dependent on the use of overcharge funds. The amendment has the support of the National Governors' Association, and I ask unanimous consent that its letter of support be included at the end of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. MCCLURE. Mr. President, I have now been assured by the chairman of the Budget Committee, Senator DOMENICI, and the chairman of the Appropriations Committee, Senator HATFIELD, that my amendment is not required to achieve the objective intended by my amendment. I have been assured that when the assumptions in the budget resolution are cross walked to the Appropriations Committee the ceilings on the energy programs and income security programs of concern will not reflect any offset of petroleum overcharge funds. In other words the cross walk to the Appropriations Committee, and in turn to the Appropriations subcommittees, will assume the same funding levels for these programs. As was originally reported by the Budget Committee.

This assurance regarding the cross walk is particularly critical, Mr. President, because there is little or no support for the legislation transmitted to Congress last week by the administration. This agreement will thus assure the Committee on Energy and Natural Resources has sufficient time to consider this matter.

For example, Mr. President, there is dispute regarding the amount of petroleum overcharge funds that may be involved. The resolution assumes an offset of $1 billion annually for 3 years against certain Federal energy conservation and income security programs. However, while over $850 million are currently being held in escrow, only $50 million are potentially available for the offsets proposed by the administration. While we can expect several billion dollars to eventually become available, we cannot, at this time, predict exactly when or how much will become available.

The understanding that has been reached with the chairman of the Budget Committee and the chairman of the Appropriations Committee would avoid the potential problem that overcharge funds would not be available when needed in the normal appropriations process. This agreement assures that the Appropriations Committee has the flexibility to fund these programs from general revenues.

I ask the chairman of the Budget Committee if he agrees with this characterization of the agreement.

Mr. DOMENICI. That is correct, Mr. President, the crosswalk to the Appropriations Committee will assume funding of the subject energy conservation and income assistance programs from general revenues at the full amount.

Mr. HATFIELD. Mr. President, that is also my understanding.

EXHIBIT 1

NATIONAL GOVERNORS' ASSOCIATION,
MAY 2, 1985.

Hon. JAMES A. MCCLURE,
Chairman, Committee on Energy and Natural Resources, U.S. Senate, Senate Dirksen Office Building, Washington, DC.

DEAR CHAIRMAN MCCLURE: We are writing to reaffirm the National Governors' Association's opposition to the use of oil overcharge revenues to supplant federal appropriations.

Your proposed amendment to the White House/Senate compromise budget package to raise the appropriations ceilings for energy conservation and assistance programs addresses some of our concerns about the use of overcharge revenues. The amendment would not bring the budget compromise fully in line with NGA policy on energy since it would not raise the appropriations for these programs to their full FY85 levels, nor would it eliminate overcharge revenues from the budget.

Despite these differences, however, the amendment would clarify that regular appropriations for conservation, weatherization, and low income energy assistance will not be dependent on overcharge revenues. The Governors support you in this effort.

The use of oil overcharge revenues to supplant, dollar-for-dollar, federal energy conservation and assistance programs would violate the restitutionary standard for distribution of refunds. Overcharged customers would, in effect, forfeit compensation for damages identified by the courts.

Your amendment makes clear that any attempt to divert overcharge refunds away from overcharged consumers will have to be approved by your Committee on Energy and Natural Resources, and we look forward to working with you again to defeat any such proposals.

As you know, the Governors are quite concerned about the federal deficit. The current NGA policy calls for holding 1986 nondefense discretionary appropriations to the 1985 level, the national defense appropriations to the 1985 level plus inflation, and a freeze on all cost-of-living adjustments, including social security.

Thank you again for your efforts to address these concerns about the use of oil overcharge revenues.

Sincerely,

GOV. ANTHONY S. EARL,
Chairman,
Committee on Energy and Environment.
GOV. JOHN H. SUNUNU,
Vice Chairman,
Committee on Energy and Environment.

Mr. STAFFORD. Mr. President, I want to indicate my strong support for the figures in the Senate leadership compromise on education programs. Many colleagues shared my concern about the deep cuts contained in the first and second versions of the first budget resolution. The package before us now represents a freeze plus additional savings in two programs. All discretionary aid programs would be frozen at their fiscal year 1985 level of funding except for the Impact Aid Program. The Guaranteed Student Loan Program, the only entitlement program in the area of education, is slated for a funding reduction of $200 million in fiscal year 1986, $300 million in fiscal year 1987 and $400 million in fiscal year 1988.

This new package is very close to what I originally suggested in a letter to the Budget Committee on January 14 of this year. I share the view held by most Members of Congress that we must act now to reduce our very serious budget deficit. The funding levels contained in this amendment for education programs are responsible and reasonable. They target education as a priority for Federal funding, and yet

at the same time they do not contribute to a growing Federal deficit.

Once again, I would like to check these figures with the chairman of the Budget Committee. The leadership substitute would add $700 million in budget authority for education programs in fiscal year 1986, $800 million in BA for fiscal year 1987, and $800 million in BA for fiscal year 1988. GSL savings would be $200 million in fiscal year 1986, $300 million in fiscal year 1987 and $400 million in fiscal year 1988. Therefore all the Federal education programs, with the exceptions of guaranteed student loans and impact aid, are assumed to have a budget authority equal to their fiscal year 1985 appropriated funding level. The Education for all Handicapped Chidlren Act, which is under the jurisdiction of the Handicapped Subcommittee chaired by my friend, LOWELL WEICKER, has been addressed separately in negotiations between the Senate leadership and Senator WEICKER.

Mr. DOMENICI. I can assure the Senator from Vermont that his assumptions are correct.

Mr. DOLE. Mr. President, I take the opportunity to pay special recognition to Senator MATTINGLY, who more than a year ago, developed a program to expand U.S. farm exports that was a critical element of our deficit reduction program.

This so-called bonus incentive Commodity Export Program will make Government surplus commodities available on a bid basis as bonuses to companies who complete the sale of U.S. agriculture products. We hope that this program will reduce future budget outlays.

Senator MATTINGLY, as I said, developed an innovative program along these lines last year. The idea, which has gained wide acceptance, will be included as part of the deficit reduction plan. And the end result will be a plus for American farmers and the American economy.

BONUS INCENTIVE COMMODITY EXPORT PROGRAM [BICEP]

Mr. MATTINGLY. Mr. President, yesterday, May 8, the U.S. Department of Commerce released further data on our merchandise trade for the first quarter of this year. These figures show an overall first quarter merchandise trade deficit of $28.3 billion. This represents a 16-percent larger deficit than during the same period last year. More importantly, these statistics include a $1.0 billion reduction in the level of agricultural export sales from the $9.5 billion mark established during the final quarter of 1984. Wheat shipments were down by 35 percent. Corn exports were off 12 percent, soybeans 5 percent and cotton dropped 2 percent. Altogether farm exports are down by an average of 11 percent during the period. On top of this drop in exports comes an equally devasting fall in the average price for cotton—down 6 percent, soybeans and corn—both down 2 percent.

The data I have just given you only defines the troubled export performance of our agricultural sector. The data does not detail the tangled problems this particular export community must deal with. U.S. agricultural products must compete in a world market held hostage to almost universally unfair, predatory export subsidies which are employed by our competitors. The high value of the dollar provides additional advantage to other nations' agricultural products as U.S. commodities become priced out of world markets. Other factors such as cargo preference burdens, conflicting domestic price support programs, and a disjointed and ineffective trade policy only serve to further complicate the agricultural export situation.

The program which we are discussing at present is one which the Senate has considered—and adopted—in various forms on previous occasions. Twice in the past 3 years I have introduced similar legislation which has received favorable consideration by the Agriculture Committee. In two or three instances I recall having worked with the distinguished Senator from Mississippi, Senator COCHRAN, in adopting amendments which I offered on appropriations measures which would have mandated the use of financial or in-kind assistance for U.S. exporters who were experiencing adverse effects from unfair, predatory foreign trading practices. So, the idea of an export PIK—or bonus incentive—program meshes perfectly with a trade theme frequently sounded by this Senator; namely, while working to eliminate the inconsistencies in today's global trading system, let us concentrate on the formulation and implementation of positive action that will help U.S. exporters while also gaining the full attention of those who would continue to treat the United States unfairly in the world marketplace.

The program before the Senate today embodies a basic concept of commerce: You can encourage sales by offering the buyer a premium and increase profits if that premium is obtained by the one offering it at little or no cost. The provisions which we are including as a part of this current budget package is just that—authorization for the use of surplus commodities to help stimulate exports and overcome foreign subsidies. This is the same formula which was suggested by the junior Senator from Mississippi in his recently introduced BICEP bill and which he so eloquently explained here on the Senate floor.

By the end of this year we will have a total of $6,249 million worth of surplus Government-owned agricultural commodities in storage. Just to store those commodities will cost the U.S. taxpayer $361.0 million this year alone. Under the Bonus Incentive Commodity Export Program [BICEP] a minimum of 10 percent of surplus, expensive to store commodities, would be made available to be offered as a premium to those actively exporting U.S. value-added agricultural products. We are offering a positive incentive to U.S. agricultural exporters which is entirely legal under international rules. And we are finding a profitable use for surplus commodities that have been sitting—at ever-increasing cost and waste—in warehouses all over this country. The American Farm Bureau Federation estimates that over a 2-year period this export bonus plan could offer net savings of as much as $170 million depending on the amount of commodities used in the program. At the very least, the program would net $56 million in savings from storage payments during the first 2 years and will result in greater Treasury revenues generated from the taxes on jobs which will be generated and retained as a result of this increased export activity.

Mr. President, I have argued repeatedly that the best farm policy we could possibly have for our producers would be the formulation and implementation of a comprehensive, aggressive, effective trade policy. We talk about adopting a 4- or 6-year farm bill which is supposed to help stabilize income for agricultural producers and which—some say—should be more "market oriented." Unfortunately, there just isn't much of a market to get "oriented to" any more. This bonus export incentive measure, which helps to restore lost markets by allowing our producers to combat unfair foreign subsidies, is a first vital step on a long march leading to new trade policy.

Of course, the issue of removing foreign countries' tariff and nontariff trade barriers must also be addressed. In addition we must make certain that our domestic exporters are not hindered by our own Government policies and actions such as embargoes and price support programs.

Mr. President, I do hope that when the Senate conferences with the House of Representatives on this budget measure we will hold firm on this very important provision. It is one of the most sensible provisions in the package because it will provide an efficient, effective tool to promote and increase the export of American agricultural products at a minimal cost to the Government. Actually, we should say that it will do so at no cost because the commodities which will be used as incentive bonuses have already been bought and paid for and there is no chance that we can ever reasonably hope to dispose of them at a price which would recover the acquisition

costs plus the costs of storage. I want to thank the distinguished majority leader and the many others who have worked to support the inclusion of this vital program.

Mr. LEVIN. Mr. President, what this Nation's economy needs is substantial deficit reduction achieved through a fair, balanced, and rational program. The amendment before us meets none of these criteria.

At a time when we should develop a plan that substantially reduces the deficit, this program offers a deficit of $104 billion in 1988—and probably $150 billion under more realistic economic assumptions—and gives no indication when we might see a balanced budget. This is in marked contrast to the Chiles-Hollings package, which I supported earlier which got us to a zero deficit in 4 or 5 years. The package now before us asks for severe sacrifice by the people of this Nation, but deprives them of the deficit reduction goal which their sacrifices should merit.

At a time when many in the Senate have talked of the need for shared sacrifice, this program freezes cost-of-living adjustments for senior citizens for 1 year, but refuses to ask those profitable corporations and wealthy individuals who use the Tax Code to avoid paying anything in taxes, to pay at least a minimum tax. This plan prefers to reduce the deficit by putting half-a-million Social Security recipients into poverty than by putting an effective minimum tax on profitable corporations. Those priorities mark this budget plan with a stain of unfairness that cannot be washed away.

At a time when all in the Senate recognize the need to restrain spending, this plan terminates many valuable programs, such as Urban Development Action grants, the Economic Development Administration, and Community Service block grants. These drastic steps, as well as the severe cuts in Medicare, farm programs, the Soil Conservation Service, and Amtrak, are necessitated by the illogic that we are better off as a nation by having a cut in cigarette taxes than by having a viable farm program, a healthy elderly population, or an adequate rail transportation system.

Simply put, this budget plan does not get us where we have to be in order to sustain economic growth. Instead, it risks another recession, at a time when my State of Michigan, for instance, still has double digit unemployment. This budget plan is riddled with unfair and illogical program terminations and prefers these to such balanced and reasonable steps as continuing the cigarette tax at its current level or enacting an effective minimum tax on profitable corporations or wealthy individuals.

Mrs. HAWKINS. Mr. President, the vote we are casting today is a serious one, and will have a far-reaching effect on the citizens of this Nation.

I want to go on record today, as I have consistently done in the past, to state that I am very serious about deficit reduction. I agree that it is the No. 1 problem in our country and that this body has the responsibility to cure this financial illness plaguing our economy.

However, I have also repeatedly stated that freezing the Social Security COLA must not be part of that effort. If we do approve a reduction, even a 1-year freeze, the No. 1 problem in our country will become our elderly's poor standard of living! According to the American Association of Retired Persons, even a 1-year freeze will push half a million elderly people below the poverty line.

Now, I know that many Members of this body have been asked to make hard decisions, and make sacrifices—and I have participated in that effort when the program under consideration would indeed have an impact on this Nation's indebtedness. Mr. President, I have made the point before, and I will make it again, Social Security did not cause the deficit problem and cutting it will not help the deficit problem. It will only allow us to finance our out of control spending and it allows others to swallow cuts in programs that are causing the problem—programs that are funded by the general fund.

By voting against this package, I am not saying that I do not support deficit reduction. Only that I do not believe it should include reductions to the Social Security COLA. Social Security is not a "sacred cow." It is different than these other programs, because it is self-financed. Any money saved cannot be used for any other purpose.

There are other ways that this deficit can be reduced. We must look further in those areas. I am convinced that there is still some fat—let's cut the fat, not Social Security.

I believe, Mr. President, that the majority of Members in this body agree with me on this issue. The amendment I offered last week to prevent a 3-year reduction passed this body by a vote of 64 to 35. Obviously, my colleagues share my concern for the elderly, and I am pleased that we got rid of the complicated and unfair formula in the first compromise package. I have stood firm on this particular issue throughout the budget debate, so I don't believe that my vote on final passage will surprise anyone—I simply cannot support a budget resolution that contains a reduction in the Social Security COLA.

Furthermore, I would like to state for the record that following this vote, which is on the merits of this package, there will be a series of procedural votes which I intend to support.

My vote on the procedural motion is not on the merits. The record clearly shows that I have consistently voted for Social Security when it counts and voted against cuts in the program when the vote counts. A procedural vote makes no change and I do not wish to support putting this Chamber in a deadlock situation.

Mr. BUMPERS. Mr. President, I have followed the budget debate closely as it progressed from the President's original budget proposal, through the Budget Committee and now onto the so-called leadership package that has been offered by Senator DOLE for the President. I would like to take just a few minutes to put this current budget debate into both historical and economic perspective.

In 1980, then candidate Ronald Reagan promised to increase defense spending, cut taxes by 25 percent, and balance the budget by 1984, and maybe by 1983. I was one of three Senators who, in 1981, voted for spending cuts but against the tax cuts because I thought it was a prescription for fiscal disaster. Should we have a strong defense? Yes. Are there Government programs that can be trimmed back without sacrificing valuable benefits? Certainly. Did working people of this country, then and now, need a break on their taxes? Yes. But, Mr. President, I believe that our first responsibility to our constituents is responsible management of their hard-earned tax dollars. It was not responsible management of Government resources to vote for proposals that would generate $200 to $300 billion deficits and double the national debt in 4 years. But, despite the temptation to engage in blame placing, rancor, and recrimination on why we face the current dilemma, the task that confronts us today is how best to reduce the budget deficits and to restore some semblance of sanity into the Federal budget.

This year's budget began with the President's proposal which ignored revenues, and exempted defense, Social Security, and net interest from any deficit reduction efforts. Since these three areas constitute 72 percent of the budget, the President's budget proposal was focused entirely on the remaining 28 percent of the budget. In addition, according to the Congressional Budget Office, that budget would contain deficits of $145 billion as far as the eye could see. That budget got 4 of 22 votes in the Budget Committee.

Similarly, the budget subsequently adopted by the Budget Committee was never allowed to come to the Senate floor. Instead, the President and the Senate GOP leadership offered the plan that we face today. I would like to commend them on their effort to bring a budget to the floor that would reduce the budget deficits. I regret,

however, that it has taken 3 years of $200 billion deficits before the problem of these deficits began to get serious attention. After carefully considering this proposal, I decided that for several reasons, I could not support it.

First, the package is predicated on overly optimistic economic assumptions. The package presumes annual economic growth of 4 percent for 1986, 1987, and 1988. The consensus forecast for this period is 3.2–3.4 percent, and given the 1.3-percent growth in the first quarter of 1985 these numbers are probably optimistic. Also, the leadership package presumes mortgage interest rates of 7 percent by 1990 and T-bill rates of 5 percent. No economist in the country believes these projections.
